HERITAGE HA.com
Auction Galleries

Dear FUN Bidder,

The Florida United Numismatists January convention is the world's largest coin show, and Heritage Auction Galleries is the world's largest numismatic auctioneer. You know this is going to be a wonderful event! Heritage is proud to continue serving the numismatic community as the Official Auctioneer of FUN, and we look forward to doing so for many years – and setting many records with the fine folks of FUN.

So, welcome to another exciting FUN auction event, with Signature and Platinum Night sessions for Coins, as well as an important Currency Signature Auction. How big will FUN 2009 be? Heritage set the World Record for the most valuable numismatic auction at FUN 2005 ($62 million), then set a new record at FUN 2007 ($78 million+). The success of every auction depends upon the enthusiasm and participation of our bidders; we already know that more than 700 consignors have entrusted us with their treasures.
We thank the community for your continued support!

FUN 2009 contains so many rarities that it has taken more than a thousand pages to describe them all. Even the list of catalogs is impressive, with dedicated volumes for Platinum Night, the Lemus Collection, the O'Neal Collection, Currency, and others. You have more than 15,000 coin and currency auction lots to consider in Orlando, plus thousands more in our NYINC auction of ancient and world coins. This is a great time to be building a significant collection. I must also point out that this is the first auction catalog to feature our Video Lot Descriptions at HA.com; we have recently experimented with these neat tools, and the reception of our bidders and consignors has been most gratifying. Visit us online and have a peek.

Featured FUN consignments include:

## The Peter J. Adasek, M.D. Collection

PPediatrician Dr. Peter Adasek is an extraordinary numismatist, but he is also a professional with a much greater mission: educating the world about child abuse, and doing everything in his power to help eradicate that heinous crime. Dr. Adasek graduated from Union College in Schenectady before earning his M.D. from the State University of New York at Syracuse. He interned at the Utah School of Medicine in Salt Lake City, followed by a pediatric residency at the University of Washington's School of medicine in Seattle. He served as a pediatrician with the USAF from 1968-1970 in Germany, and then joined a private practice in Colorado Springs. His unusual specialty came of first-hand experience with child abuse, in his training, military service, and eventually as the staff expert in Colorado Springs. He too frequently witnessed the results of abuse, eventually dedicating his career to these little victims.

Dr. Adasek helped pioneer the use of videotape equipment in the mid-1970s for presenting accurate, compelling information to the justice system. He is now an internationally recognized expert, and travels the world lecturing and working directly with police, teachers, social workers, and the medical community. He has published widely and belongs to many national organizations around the world. Among his many honors is his appointment as a visiting professor and official government advisor to the Czech and Slovak Republics.

Dr. Adasek's introduction to old coins came from his grandfather's old leather bag, which accompanied him when he left Slovakia (in the old Austrian Hungarian Empire) around the time of WWI. His grandfather also put old coins from his new adopted country into his treasure bag, and on special occasions would share with young Peter his Indian cents and Columbian Expo half dollar, alongside his Czech freedom medal. Dr. Adasek's mother helped with her son's growing interest; working in the accounting functions of various businesses, she was able to bring home unusual bills or coins when they came in. As Dr. Adasek's medical practice became more established, his interest in gold and gold bullion grew, and he started to make auction purchases of proof gold. A Life Member of ANA, he has enjoyed taking their summer courses. He also collects Anasazi artifacts and Navaho Squash Blossom necklaces. Many of the proceeds from this collection will be distributed to charitable organizations.

## The Arno Collection

Attracted by rarity, beauty and pedigree, the collector behind the Arno Collection focused on building one of the highest rated Morgan sets in existence while targeting coins with unusual and interesting histories. Famous pedigrees like Eliasberg, Jack Lee, Norweb, Wayne Miller, Bodway, and PCGS Tour make up a significant portion of this richly varied set, with many pop 1 and plate coins throughout. Similar to his well-researched collection of pop and contemporary art, the owner has a particular taste for coins with striking eye appeal, including Morgans with luscious toning and powerful, deeply mirrored surfaces. The current collection contains many of his earliest purchases and includes several irreplaceable examples highlighting the beauty that continues to inspire collectors of high quality Morgan dollars.

## The Calvin Collection

A wide-ranging collection, and within that a specialty collection especially strong in better-date and high quality Saints. Included are such important coins as his 1907 High Relief with Wire Rim MS64 PCGS; 1927-S MS64 NGC; 1931-D MS64 PCGS and CAC. Other important dates included are 1908-S MS62 NGC, 1909-D MS64 PCGS, 1909/8 MS64 PCGS; 1912 MS65 PCGS and CAC; 1924-S MS64 PCGS; 1925-D MS64 PCGS; 1925-S MS62 NGC; and 1926-D MS63 PCGS. Among his noteworthy Walking Liberty half dollars are a 1919-S MS64 PCGS; 1920-D MS65 PCGS; and a 1921 MS65 NGC.

## The Deb-Ann Collection

The consignor of the Deb-Ann coins has been a serious collector for more than a quarter of a century, with his appetite whet by the GSA sales of Carson City dollars, and starting with some major purchases out of the Bareford Auction in 1981. At the fourth Garrett sale, he also began to seriously pursue early pattern coins. He always sought items of consequence, especially the early American coinages, and always the best coin possible. He also collected widely in world coins, and counts many significant rarities among the items he consigned to Heritage's 2009 NYINC auction also taking place in January. He has always loved history and art, and was able to indulge his passion for the finest – and understood that when the time to sell comes, there is always a market for the best.

## The Martin L. Diffenbaucher, Jr. Collection

Among the nearly 300 coins of the Diffenbaucher Collection estate consigned to FUN can be found many extraordinary rarities collected during his lifetime of dedicated numismatic effort: 1795 $5 Small Eagle AU53 NGC; 1795 $10 13 Leaves AU55 NGC; 1801 $10 MS62 NGC; 1849 $5 Norris, Gregg, & Norris R.E.; and his 1849 $5 Oregon Exchange Co. Other important coins cover the range of American collecting: 1652 Oak Tree Shilling AU55 NGC; 1793 Liberty Cap cent; 1793 Chain cent AMERI.; 1796 quarter Fine 12 PCGS; 1806 $5 Round Top 6, 7x6 Stars MS61 NGC; 1807 $2.50 AU55 NGC; 1818 $5 MS61 NGC; 1850 $5 Baldwin; 1852 $10 Assay Office MS61 NGC; 1853 $20 Assay Office, 900 Thous.; 1856 cent PR65 NGC; 1858 pattern Indian Cent, Judd-210; 1860 $5 Mormon; 1861 $10 MS62 NGC; 1861 $2.50 Clark, Gruber & Co.; 1903 $5 PR65 Cameo NGC; and his 1907 $20 High Relief, Wire Rim MS64 NGC. Mr. Diffenbaucher spent his entire life in southern Pennsylvania, and was well known to the leading dealers of a generation past.

## The Findley Collection

The Findley Collection was formed by an astute numismatist who has assembled many sets in many series, over many decades. This very private collector insists on anonymity, but if the total extent of his holdings is ever revealed in the future, he will be revered as one of America's greatest numismatists. In the meantime, enjoy the quality and eye-appeal of these selections.

## The Dale Friend #2 PCGS Registry Set of Barber Half Dollars

In the early 1950s, Dale Friend started his collecting history with a wonderful 12th birthday gift from his parents: an S-VBD Lincoln cent graded AU, for which they paid the princely sum of $23. Dale quickly began to fill his albums out of circulation, and visited the local coin store on Saturdays for supplemental purchases. He never spent more than $20 for a coin, but he managed to fill most of his Indian cent, Lincoln cent, Liberty nickel, and Buffalo nickel albums. He was even making decent progress on a Barber quarter set out of circulation, when, at the age of 15, Dale put his coin books away and moved on to other interests.

In 1992, as a very successful trial lawyer, Dale had achieved financial success and returned to his earlier interest in rare coins. He didn't like the stock market, as it always seemed that someone else was in charge. He wandered into Kenny Duncan's shop to buy some bullion, and got started on an education in rare type coins instead. The collector in him was reenergized. Along with his type purchases, he bought a 1912-S Barber half in 1993, and added to that series over the next several years. He still wasn't specializing in them – that started in 1997, when an article in Coin World about a Houston neighbor selling his Barber coins provided Dale with a great opportunity – he bought more than two dozen of Dennis Nagy's wonderful coins in two transactions. Now a serious Barber half collector, he began attending major shows, and making new collector friends (including Peter Shireman & Dr. Steven Duckor). Dale completed his set in Gem in 2002, and then began to upgrade! His crowning achievement came with his purchase of the Eliasberg Micro-O in MS68. "I never thought I would own the Micro-O, as I was still new to such serious collecting as paying more than $100,000 for a single coin." This was previous the Finest Known on the PCGS Registry, and now resides at the #2 spot. The joy of assembling this magnificent set now behind him, Dale is concentrating on other series.

## The Good Morgan Sunshine #3 PCGS Registry Set of Proof Morgan Dollars

The collector who assembled the Good Morgan Sunshine Collection of Proof Morgan Dollars is a well known artist in the music industry, so the name of his Registry Set is a 'tip of the hat' to the well-known song. He was certainly serious about the selection process, and was well on his way to achieving #1 Registry Status; the average rating of his coins was extraordinarily high. Assembled with the expert assistance of Rick Tomaska, some two dozen Morgan proofs exhibit all the quality and eye-appeal that any collector or dealer could ask for, and more. Rick and his client sought coins with exceptional eye appeal, light original toning, and cameoed if possible.

It is the #3 Current Finest Morgan Dollars Basic Set, Proof (1878-1904) on the PCGS Registry. Any collectors looking for Registry leading coins will find many delightful pieces here. Many coins in this set are either the finest known in a PCGS holder, or second finest known. Among the finest known: 1879 (the only DCAM by PCGS), 1886 (the only PR67 CAM), and 1890 (the only PR68CAM). Tied for finest known are his: 1881 (highest grade in CAMEO), 1882 (highest grade in DCAM), 1883 (highest grade in CAMEO), 1885 (highest grade in CAMEO), 1888 (highest grade in CAMEO), and 1901 (highest grade in CAMEO).

## The Commander David R. Hinkle, USN (Ret) Collection, Part Three

David Randall Hinkle was the oldest son in a family of West Texas farmers and ranchers, and grew up farming, punching cows, and trapping wild horses. An All-Star scholar-athlete in football and boxing in high school, he became a licensed Baptist preacher at age sixteen and later graduated with honors (and the title of Brigade Boxing Champ) from the U.S. Naval Academy in 1954.

Among the earliest officers picked by Admiral Rickover for the Naval Nuclear Program, he served on six submarines, culminating with command of the nuclear attack sub USS PARGO. Commander Hinkle received more than forty medals and commendations for testing and evaluating submarine weapon systems during an eighteen-year career. His sea duty included Formosa Patrol, Vietnam Picket Duty, RECON missions, under-ice ops, and scouting for the 6th Fleet battle groups in the Mediterranean and 7th Fleet in the Orient. He retired from the Navy in 1973 and soon thereafter started a small consulting business with his wife Muriel. Sonalysts, Inc., is now a multidisciplinary company of scientists, engineers, educators and artists with a current annual sales volume of more than $50 million and with clients as wide-ranging as the movie industry and the International Atomic Energy Agency. His business career has been as diverse as Editor-in-Chief of the coffee table book "U.S. Submarines" to cocktails with President Reagan at the White House (after selection as the Best Small Business in the northeast and #2 nationally) by the Small Business Administration.

His half-century numismatic quest started with his roommate finding a half-dime in Baltimore, following a Naval Academy football game Intrigued with the strange coin, Midshipman Hinkle offered to buy it for $5. His roommate countered that he would take whatever the nearby coin dealer would pay, which was $1.50). Hinkle obtained his first coin and "a good lesson in acquiring numismatic treasures—open the book before opening the mouth or wallet." His many overseas deployments also exposed him to ancient and world coins. He is primarily a type collector and enjoys exploring the full range of a country's numismatic heritage. He has enjoyed collecting and wishes to pass on his acquisitions to those who will appreciate them. Heritage first offered treasures from his collection in our FUN 2005 Signature Auction.

## The Jack Lee Estate Collection

Heritage has previously offered coins from Jack Lee's estate inventory and collections, including his #1 All-Time Finest Registry Set of Lincoln Cents. In FUN, we offer additional treasures. The "Ex: Jack Lee" pedigree is important in American numismatics. Jack Lee was an admired numismatist, a worthy competitor, and a dear friend for more than three decades; his passing in 2008 affected many at Heritage. Jack's dealings set a standard that brought credit to the numismatic community, and his name will be remembered and appreciated by generations of numismatists. We know that time will not diminish the importance of the Jack Lee pedigree. His keen eye is evident in these coins.

Jack was a little different from most dealers. He was unable to resist buying coins for his personal account, pursuing coins that he really liked. A titan of the finance industry in the South, Jack was fortunate to have the means to pursue his collections. Of course, with his exceptional eye and exquisite tastes, nearly every numismatist will agree with his selections. We were proud to sell the Jack Lee III Collection in November 2005, and honored to have been entrusted by his family, whom he adored and who adored him, to sell these coins from his estate. Additional coins will be included in our February Long Beach auction.

## The Lemus Collection – Queller Family Collection Part Two

One of the finest collections of pattern coinage of our generation, the Lemus Collection – Queller Part Two is being offered in a separate catalog in our first-ever Pattern Night presentation. Assembled over many decades by the Queller Family, this collection of 465 different patterns rivals the record-setting Queller Family Collection of Silver Dollars (that Heritage sold in the 2008 Central States Signature Auction) for aesthetic appeal and numismatic breadth.

## The Malibu Collection, Part Two

Heritage was proud to offer Part One of the Malibu Collection in our September 2008 Long Beach Signature Auction. The consignor has been in love with old and rare coins since the age of eight, when he received a fair Standing Liberty quarter "of indeterminate date that dropped into the change slot of a Coke machine at a country gas station near Lake George, New York – my numismatic memories combine my camping and fishing trips with Dad! I began gathering old coins from circulation in a Mason jar, and I loved every coin." Serious collecting began around 2000 as financial success encouraged the pursuit of rarer items.

Standing Liberty quarters remain the consignor's favorite series, and he is working to finish that Registry set. He is selling additional high-quality proof seated quarters in FUN to concentrate on Seated halves and dollars. He loves the Seated coinage, especially the historic span covered by this design type, associating every date with important events in American history. "The Seated Liberty coins represent such a long and fascinating period of American history – with all of the tales of westward expansion, the taming of the Old West, the Civil War, and Reconstruction during the nineteenth century. Additionally, the Seated design is spectacularly beautiful in its simplicity." As was the case with his prior consignment, many of these eye-appealing quarters are among the finest known. Specialists and type collectors alike will continue to seek this pedigree for their collections.

## The James Mossman Collection

James Mossman was introduced to old coins the old-fashioned way – with his paper route in Canada. At the age of eleven, he delivered the Toronto Star Weekly; it sold for twenty cents, but he was often given a quarter in payment. He was intrigued by the many old coins that he would occasionally receive, some from the 1920s and 1930s. As he states it: "These images from the past were very powerful." Like many young collectors, his interest waxed and waned during his early adulthood, but with financial success came a "reignited interest in collecting American coins," his new home. This collection has received his dedicated attention over the last seven years. He decided to collect by type based on design aesthetics – the beauty and appearance of each coin. His success can be judged by the eye-appeal of more than 140 treasures. His favorite designs will raise no eyebrows – the High Relief double eagle, the Continental dollar, the early Flowing Hair designs, and Seated No Stars issues. Mr. Mossman is continuing to collect in other areas.

## The Omaha Collection

Assembled by a husband and wife collecting team over a quarter of a century, this is a marvelous collection of 500+ high quality type coins, including some exceptionally rare gold. As their experience and resources grew, so did their pursuit of greater rarities. In the early years, experience was strengthened with smaller purchases; in the later years, personal favorites like their Stellas could be pursued with enthusiasm. While coins were part of an overall plan of investment diversification, this was their favorite joint activity; buying rarities remained fun for them.

## The Jim O'Neal Collection of Saint-Gaudens $10 Indians

In a specialized FUN catalog, Heritage is proud to offer another of Jim O'Neal's wonderful collections – his ten dollar Saint-Gaudens Indian set, the #1 All-Time Finest at PCGS in both the Date Set and Full Circulation Strike categories (with similar distinction on the NGC Registry). Heritage was privileged to auction his extensive US currency collection in 2005, and his Indian Head half eagle collection (#4 All-Time Finest on PCGS Registry in 2008. Jim is actively assembling what he hopes will one day be a truly world class type set of U.S. coinage, political memorabilia, presidential campaign pinbacks, presidential biographies, and antique wine.

## The Plymouth Collection

The consignor of the Plymouth Collection enjoyed two advantages in his youth that speak fondly of an earlier day. His interest in rare coins started at age six, with the gift of a bag of some 300 Indian cents that his father had been putting aside out of the cash register of his pharmacy. In one of those wondrous coincidences that occur every so often, his father was also the family physician to a close relative of Ruth Bauer, so he grew up knowing Ruth and Harry J. Forman. Over time he became a more serious collector, and for more than a decade he has been pursuing high-quality Standing Liberty and Barber quarters. These coins had always intrigued him, and after picking so many dateless examples out of circulation in his youth, he promised himself to someday pursue quality at this level.

## The Scott Rudolph Collection

Scott Rudolph has assembled a marvelous collection of American type and better date/variety coins, ranging across most series but especially strong in the quarter denomination. These coins exhibit the high quality and eye appeal that advanced collectors covet, and the sharp eye and exquisite taste of Mr. Rudolph is evident in every coin. Among the wonderful rarities: 1915-S $50 Pan-Pac Octagonal MS67 NGC and Round MS66 NGC; 1916 nickel Doubled Die Obverse MS64 PCGS; 1916 nickel Doubled Die Obverse MS62 PCGS; 1796 quarters MS62 PCGS and MS64 NGC; 1827/3 quarter Restrike PR66 NGC; 1841 quarter PR66 NGC; 1844 quarter PR66 NGC; 1845 quarter PR66 NGC; 1852-O quarter MS63 PCGS; 1853 Arrows and Rays quarter PR66 Cameo NGC; 1858 quarter PR67 NGC; 1896-O quarter MS67 NGC; 1901-S quarter MS65 PCGS; 1879 $4 Flowing Hair, Judd-1635, PR66 Cameo PCGS; 1891 $20 PR67 Ultra Cameo NGC; plus some two dozen more full-page rarities!

Mr. Rudolph is the Chairman and Chief Executive Officer of NBTY Inc., a vertically integrated global manufacturer, marketer, distributor and retailer of a broad line of high-quality, value-priced nutritional supplements. NBTY markets some 22,000 products under numerous brands well known to consumers around the world. Mr. Randolph has grown NBTY through successful marketing of existing brands and strategic acquisitions – more than 30 companies since 1986. Facilities can be found in multiple countries encircling the globe, including more than one thousand retail locations, and 13,000 employees.

## The San Jose Collection of Colonial Coinage

The very private numismatist who assembled the San Jose Collection chose Colonial Coinages as his objective for more than a decade. Appreciative of the historical significance of these pieces of early Americana, they reminded him daily of the efforts of the Founding Generation, and the sacrifices required establishing this new nation. The challenge of the multitude of varieties, spread across so many series, also meant that the thrill of the pursuit was always present, especially when seeking specimens in such high grades.

## The Sanderson Family Collection of Morgan Dollars

The Sanderson Family Collection of Morgan dollars owes its genesis to the consignor's grandfather, a second-generation Irish immigrant. Guy Sanderson occasionally allowed his grandson, then a New Hampshire farmboy, to accompany him to his favorite Boston pubs. Grandmother Sanderson, on the other hand, thought it entirely appropriate to sprinkle the young consignor "with Holy Water at the approach of a thunderstorm. Grandfather was more of a people person, who never met a friend or a stranger on the bus or at the bar that he didn't like." To the country lad, it seemed as if his grandfather knew everyone in Boston!

In one establishment in 1944, his grandfather received several silver dollars in change, and handed one nicer-looking 1893-O to his grandson, saying "save this silver dollar, it will be worth a lot someday." This started a passion that has lasted more than half a century: "I still have that 1893-O Morgan Dollar today; I put it in a holder some time ago, and it is a permanent part of my collection." In those days, his grandmother could feed their family for a week with a dollar; she wasn't aware of the nascent coin collecting or the pub visits.

The consignor began to fill small boxes with interesting coins pulled from circulation, and at the age of eleven, while recovering from an appendectomy, he half-filled the cent and nickel albums that his mother bought to help him pass the time. He continued collecting on and off over the next twenty-five years, with breaks for military service, college, marriage, and raising a family. "It came to me that selective purchases of the right series, one with a broad market and reasonably available on the open market, would be a good long term investment. I considered that only two twentieth century series fit these parameters, and I chose Morgan Dollars: they were a lot less expensive; there were large numbers available for purchase except for the very rarest dates; the market for selling was broad; and finally, my grandfather was correct when he gave me my first Morgan – it is worth a lot more!"

The consignor sold part of his first set for a large profit when prices shot up, and kept some coins that are still part of the collection; this further convinced him that Morgans were a great investment. "In fact, I was so convinced that Morgan Dollars would continue to achieve high appreciation that I altered my buying strategy. Higher graded coins increased in value faster than lower grades, so it was clear that purchasing the very highest graded Morgans would produce the greatest return over time." The consignor followed this philosophy for a quarter-century. "The bidders will be the judge of my efforts by demonstrating what this set is really worth."

---

Heritage has sold more than $250 million in rare coins and currencies at the FUN conventions over the last six years, an incredible record! We deliver this demand from more than 400,000 registered bidder-members at HA.com, and a mailing list exceeding 600,000. The results – the record prices can be seen in our Permanent Auction Archives at HA.com.

I invite you to join us in Orlando to participate in this exciting event, and ask that you stop by the lot viewing room or at the Heritage tables on the bourse to say hello if you can join us. You can also bid through the Interactive Internet™ and HERITAGE Live!™ bidding systems at HA.com. Many of our bidders have used HERITAGE Live!™ to participate live during the auction floor sessions to great success; others use it just to watch and become more familiar with the auction process! You can also participate by telephone, mail, fax, or agent options. I wish you the best of luck with your bidding, however you choose to participate!

Sincerely,

Greg Rohan
President

# SESSION ONE

Live, Internet, and Mail Bid Signature Auction #1121
Wednesday, January 7, 2009, 1:00 PM ET, Lots 1 - 901
Orlando, Florida

A 15% Buyer's Premium ($9 minimum) Will Be Added To All Lots

## COLONIALS

### XF 1662 Oak Tree Twopence
### Rare Die State Large 2 Noe-33
### Ex: Richard Picker Collection

1 **1662 Oak Tree Twopence XF40 NGC.** Large 2. Crosby 1-A1, Noe-33, R.7. 10.6 gn. Extremely close to Noe-34, and cataloged as that variety in its Picker auction catalog appearance. Cataloged here as the rarer Noe-33 per its Americana Sale description, which elaborated "the line-like die crack from the rim at 9 o'clock on the reverse through the date digits is not yet complete, showing a break between the bead and 1, equivalent to the state of Ford:71, a similar quality Noe-33 that brought $13,800 [in 2005]." A problem-free full flan example with golden-brown fields and dove-gray legends and devices. Listed on page 36 of the 2009 *Guide Book*.
*Ex: Richard Picker Collection (Stack's, 10/1984), Lot 19; Americana Sale (Stack's, 1/2007), lot 6367.*
*From The Deb-Ann Collection.*(#17)

### Handsome Oak Tree 1662 Twopence
### AU50, Small 2, Noe-30

2 **1662 Oak Tree Twopence AU50 NGC.** Small 2. Crosby 1-A2, Noe-30, R.4. 12.0 gn. Lightly toned tan-gold and cream-gray. The obverse is misaligned toward 7 o'clock, with a wide area of unstruck surface centered at 1 o'clock. Despite the misalignment, the peripheral letters are virtually complete. Impressively unabraded, and the minor clips along the border are mint-made and obligatory for the series. Listed on page 36 of the 2009 *Guide Book*.(#17)

### AU 1662 Oak Tree Twopence
### Small Date, Noe-29

3 **1662 Oak Tree Twopence AU50 PCGS.** Small Date. Noe-29, Crosby 1-A2. R.6. 10.8 gn. The small and distant 2 identifies this elusive Noe variety. This lustrous example displays little if any wear, and the tree, domination, date, and peripheral legends exhibit a pleasing strike. The reverse has ideal centering, while the obverse is slightly misaligned toward 7 o'clock. The pearl-gray and gunmetal-blue surfaces are somewhat wavy but lack abrasions. Listed on page 36 of the 2009 *Guide Book*. Population: 5 in 50, 29 finer (11/08). (#17)

### Excellent Crosby 1b-D, Noe-22
### 1652 Oak Tree Sixpence, VF30

4 **1652 Oak Tree Sixpence VF30 PCGS.** Crosby 1b-D, Noe-22, R.5. IN on obverse, first S in MASATHVSETS corrected. 31.6 grains. Moderately worn with slight waviness to the gold-gray planchet. Few abrasions of note despite time spent in circulation; a pleasing mid-range example of this historic issue. Listed on page 37 of the 2009 *Guide Book*.(#19)

## XF Noe-20 1652 Oak Tree Sixpence

5 **1652 Oak Tree Sixpence XF40 NGC.** Crosby 1a-D, Noe-20, R.6. 31.8 grains. This richly detailed piece shows little actual wear, however, a roundish depression between the 2 and D and a small flattened area opposite on the other side at the A of MASATHUSTS. The wavy surfaces display mixed tones of silver on this specimen made before die recutting which resulted in Noe 21 and 22 (the later states are also rare). This is one of the varieties sometimes struck on cut down shillings, and traces of an undertype are present between 4 and 5 o'clock on the obverse. Listed on page 37 of the 2009 *Guide Book*.
*Ex: Palm Beach Signature (Heritage, 11/2004), lot 5002, which realized $5,750.*
*From The San Jose Collection of Colonial Coinage.*(#19)

## Pleasing 1652 AU53 Oak Tree Sixpence, Noe-21

6 **1652 Oak Tree Sixpence AU53 NGC.** Crosby 1c-D, Noe-21, R.5. "IN" on obverse, backwards S. An interesting, briefly circulated representative of this popular colonial issue, softly struck as usual at the margins but with remarkably strong central detail. Patina is generally violet-silver with elements of gold-gray at the peripheries. Listed on page 37 of the 2009 *Guide Book*.(#19)

7 **1652 Oak Tree Shilling—Improperly Cleaned—NCS. VF Details.** Crosby 1b-D, Noe-7, R.5. 70.5 gn. IN at Bottom. The slate-gray surfaces are lightly hairlined and the tree is softly brought up, but the legends are bold where permitted by mint clips. A horizontal depression affects the upper curve of the 6. A distinctive variety with several heavy die cracks on the right reverse. Listed on page 37 of the 2009 *Guide Book*.(#20)

## XF Sharpness 1652 Oak Tree Shilling
## Rare Noe-11 Variety

8 **1652 Oak Tree Shilling—Damaged—NCS. XF Details.** IN at Bottom. Crosby 6b-E2, Noe-11, R.6. 71.6 gn. Bent at one time above the date and at the base of the date, since straightened. Small digs are noted near the west portion of the tree and on the obverse at 6 o'clock. Darkened to ebony-brown with sea-green overtones. The legends are nearly complete at the borders despite mint clips at 9 and 11 o'clock. Listed on page 37 of the 2009 *Guide Book*.(#20)

## Very Rare 1652 Noe-10 Oak Tree Shilling
## XF Details, Ex: Norweb Collection

9 **1652 Oak Tree Shilling—Genuine—PCGS.** In-housed graded XF Details, Scratched, Tooled. Ex: Norweb. IN at bottom. Crosby 5a-E1, Noe-10, High R.6. 67.3 gn. The die break at EW at NEW helps distinguish between Noe-10 and the similar Noe-11 and Noe-12.

**The present piece is discussed and plated in the classic Eric Newman reference, Secret of the Good Samaritan Shilling (1959).** Newman wrote: "an alteration of an Oak Tree shilling into a Pine Tree shilling is in the Norweb collection. ... The temptation existed for an unscrupulous person to take a weakly-struck [referring to the tree] specimen of Noe-10 and have an engraver 'improve it' by cutting a new tree on the surface of the coin. The specimen on Plate IV herein is the result."

In addition to the aforementioned alteration, an attempt has been made to smooth out a vertical scratch left of the date and denomination, and the tree has a pair of faint pinscratches. Both sides have full legends, and the golden-tan and dove-gray surfaces retain glimmers of luster. Listed on page 37 of the 2009 *Guide Book*.
*Ex: Major Richard Lambert Collection (S.H. Chapman, 10/1910); Norweb Collection, Part I (Bowers and Merena, 10/1987), lot 1167.* (#20)

## Attractive XF 1652 Pine Tree Sixpence, Noe-33

10 **1652 Pine Tree Sixpence XF40 PCGS.** Noe-33, Crosby 1-A, R.3. 30.9 grains. A deep battleship-gray representative with attractive surfaces and the usually seen die break above the V in VI. The obverse is somewhat off center toward 12 o'clock, as usual for Noe-33, while the reverse is slightly off center toward 7 o'clock affecting the tops of the legends in that area. The central obverse is wavy, as made from a rocker press. Listed on page 37 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage*.(#22)

## VF Large Planchet 1652 Pine Tree Shilling No H Variety, Noe-11

11 **1652 Pine Tree Shilling, Large Planchet VF20 PCGS.** Noe-11, Crosby 2a-A1, R.4. 68.7 grains. The "All N's Retrograde, No H in MASATVSETS" variety, which demonstrates the inexperience of some of the Massachusetts silver die engravers. Interestingly, only the six N's are reversed. This piece has a generally bold tree, and most of the peripheral letters are clear. Rich dove-gray fields contrast with the lighter steel-gray design. A wave between 11 o'clock and 1:30 affects the top of the tree, and a second wave at 8 o'clock on the obverse causes uneven wear opposite on the reverse. Listed on page 37 of the 2009 *Guide Book*.
*Ex: Jones Beach Collection (Heritage, 1/2007), lot 18*.(#23)

## AU 'Straight Tree' 1652 Pine Tree Shilling Large Planchet, Noe-2

12 **1652 Pine Tree Shilling, Large Planchet AU50 PCGS. CAC.** No pellets at trunk. Crosby 4-F, Noe-2, R.5. 69.9 gn. The distinctive 'Straight Tree' variety, which has parallel and diagonal straight branches on the pine tree. A desirable example with unmarked surfaces and only minor wear. Somewhat wavy, as made, and a mint-issued clip affects the tops of a couple of obverse letters at 9 o'clock. Listed on page 37 of the 2009 *Guide Book*.
*From The James Mossman Collection*.(#23)

13 **1652 Pine Tree Shilling, Small Planchet VG10 PCGS.** Crosby 20-L, Noe-19, R.5. 65.3 grains. A vertical bend is evident on the obverse of this medium gray shilling. the surfaces are pleasing, and all of the legends are complete. Some surface irregularity is noted on the reverse.(#24)

## Lovely 1652 Pine Tree Shilling, XF45 Small Planchet, Noe-16

14 **1652 Pine Tree Shilling, Small Planchet XF45 NGC.** Crosby 21-L, Noe-16, R.2. 68.0 grains, per NGC. A splendid deep silver-gray example, accompanied by hints of iridescence on both sides, with clear underlying mint luster. A remarkably well-centered example, with nearly complete borders on both sides. All of the peripheral legends are complete on both sides, a highly unusual occurrence. In 1966 Mayflower coins described this piece as: "Struck on a large round planchet. All features very bold with faint wear. This specimen almost as choice as the N-16 pictured in Noe and certainly must be among the finest. A handsome EF."

Mayflower Coin Auctions, Inc., was located at 40 Bromfield Street in Boston, Massachusetts, conducting 30 sales from 1956 to 1976. Operated by Maurice Gould, Manuel Lipson, and Joseph Lipson, the firm handled many important properties during their two decades in business. They are particularly known for the Emerson Gaylord Collection of gold coins, the Bradbury Thurlow sale of colonials, and the C.H. Stearns Collection of colonials. Listed on page 37 of the 2009 *Guide Book*.
*Ex: C.H. Stearns (Mayflower Coin Auctions, 12/1966), lot 103; later, American Numismatic Rarities (9/2006), lot 11*.
*From The Deb-Ann Collection*.(#24)

## Very Fine Vlack 1-B St. Patrick Halfpenny

15 **(1670-75) St. Patrick Halfpenny VF20 PCGS.** Vlack 1-B, Breen-200. The brass splasher is not readily visible. Localized weakness is visible at 6 o'clock on both obverse and reverse, with considerable detail remaining elsewhere including full separation on the harp strings. Although the surfaces are a bit rough, no verdigris is visible. A highly collectible piece. Listed on page 39 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage*.(#46)

## Very Fine St. Patrick Halfpenny
## Vlack 4-E, Small Letters

16 **(1670-75) St. Patrick Halfpenny VF20 PCGS.** Vlack 4-E, Breen-204, "very rare." Small letters on both sides. A medium brown example that lacks a splasher and has no apparent marks. Only mildly granular, and the king has a couple of small depressed areas. For this New Jersey import, the Halfpenny is much scarcer than the Farthing. Listed on page 39 of the 2009 *Guide Book*. Population: 16 in 20, 27 finer (11/08).(#46)

## Undated American Plantations Token, MS62

17 **(1688) American Plantations 1/24 Part Real MS62 PCGS.** Newman 4-E, Breen-78. Head midway between G and B. Breen suggests that the pieces with the head positioned between G and B are restrikes produced in the early 19th century, but he also states that the restrikes have either a obverse die break, or obverse die rust. With its unusually brilliant and flashy obverse, this piece has neither of those characteristics. The reverse has considerable deep steel toning over pewter-gray surfaces. Listed on page 39 of the 2009 *Guide Book*. (#49)

## XF London Elephant Token
## Rare Diagonals Variety, Hodder 1-A

18 **(1694) London Elephant Token, Diagonals XF40 PCGS.** Breen-185. Hodder 1-A. Breen considered this variety "Very Rare" in 1988 when he released his epic *Encyclopedia*, and it remains so today, in relation to the more often encountered No Diagonals variety (Hodder 2-B). The obverse die also differs, the tusks are further from the rim than on the usual Hodder 2 obverse, where the tusks nearly touch the dentils. This tan-brown example has moderate wear but the central diagonals are still obvious. Smooth overall with a couple of unimportant thin upper obverse marks. Listed on page 44 of the 2009 *Guide Book*. Population: 1 in 40, 2 finer (11/08).(#61)

## Select Thick Planchet London Elephant Token

19 **(1694) London Elephant Token, Thick Planchet MS63 Brown PCGS.** No Diagonals. Breen-186. An interesting and enigmatic series, these halfpence are believed to have been struck somewhere between 1672 and 1694. This is the more frequently encountered variant, and the surfaces show attractive brown coloration with a streaky, occasional overlay of darker brown. Well struck, the lower portion of the obverse shows evidence of having been struck from a worn die and there is a prominent carbon spot on the lower portion of the reverse. Listed on page 44 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage*.(#55)

## AU 1722 Blundered Date Variety
## Rosa Americana Halfpenny

20 **1722 Rosa Americana Halfpenny, D. G. REX AU50 PCGS.** Breen-135. This is the blundered date variety described by Breen with the date first entered too close to the legend, and then recut with a pellet over the digit 1. Typical dark brown surfaces with light corrosion. It is highly unusual to find any of the Rosa Americana pieces without some degree of corrosion or surface roughness. Listed on page 40 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage*.(#101)

## Beautiful 1722 Rosa Americana Halfpenny, AU58

21 **1722 Rosa Americana Halfpenny, D. G. REX AU58 PCGS.** Breen-133. UTILE DULCI. Stops after REX and 1722. A sharply struck olive-brown piece with a dash of mauve patina on the obverse center. The obverse is beautifully smooth, while the reverse has only a couple of unimportant marks. A tough of wear on the high points accounts for the grade. Listed on page 40 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage*.(#101)

## Glossy Mint State D. G. REX Variant 1722 Rosa Americana Halfpenny

22 **1722 Rosa Americana Halfpenny, D. G. REX MS61 Brown PCGS.** Breen-133. DEI GRATIA is abbreviated on this scarce Rosa Americana variety. Mahogany-brown toning, deepest on the devices, with glossy unperturbed surfaces. Double struck with a minor clockwise shift. Listed on page 40 of the 2009 *Guide Book*. Population: 1 in 61, 5 finer (11/08).
*From The San Jose Collection of Colonial Coinage.*(#101)

## Double-Struck 1722 VTILE DULCI Rosa Americana Penny, AU53

23 **1722 Rosa Americana Penny, VTILE AU53 PCGS.** Breen-113. Short ribbons. Unusual Criss-Cross edge device. Clearly double struck, and visible on the neck and base of the central obverse device, and at top of the rose on the reverse. Three minor die varieties are known, according to Breen in his *Complete Encyclopedia*, where he called this type "rare." Attractive surfaces with pale olive and dark brown color blended together on both sides. Faint corrosion is visible on both sides as usual. Listed on page 40 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage.*(#110)

## Borderline Uncirculated UTILE 1722 Rosa Americana Penny, Breen-115

24 **1722 Rosa Americana Penny, UTILE AU58 PCGS.** Breen-115, "Rare," rosette after date only. Pale tan, rose, and walnut-brown embrace this unmarked and sharply defined piece. The king's neck has a few tiny planchet striations, as made. Listed on page 40 of the 2009 *Guide Book*. Population: 5 in 58, 13 finer (11/08).
*Ex: Palm Beach Signature (Heritage, 11/2004), lot 5009.*
*From The San Jose Collection of Colonial Coinage.*(#113)

## Mint State Breen-116 1722 Rosa Americana Penny

25 **1722 Rosa Americana Penny, UTILE MS61 Brown PCGS.** Breen-116. This subtype exhibits short ribbons, rosettes before and after ROSA AMERICANA, and a stop after REX. A sharply struck mahogany-brown piece that retains glimpses of its original lighter brassy olive-tan color. The obverse is well centered, the reverse is slightly uncentered, the final letters in AMERICANA are complete but tight against the rim. A few undistracting marks are noted beneath the eye and on the truncation. Listed on page 40 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage.*(#113)

## Beautiful Near-Mint 1723 Rosa Americana Halfpenny With Crowned Rose

26 **1723 Rosa Americana Halfpenny, Crown AU58 PCGS.** Breen-140. The crowned rose variety with a stop after REX and no stop after the date. Both the uncrowned and crowned rose varieties were struck in 1723; while the former is scarce, the crowned rose variety is ideal for type collectors. This is a beautiful, sharply struck deep mahogany-brown piece which still bears a good deal of luster on its relatively smooth surfaces. Listed on page 41 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage.*(#119)

## Sharp 1723 Rosa Americana Halfpenny Crowned Rose, MS63

27 **1723 Rosa Americana Halfpenny, Crown MS63 Brown PCGS.** Breen-140. Crowned rose, stop after REX, no stop after the date. This is an attractive, sharply struck piece which still bears traces of original mint color amidst its otherwise chocolate-brown surfaces. Tough to find nicer and as such likely destined for a high-quality Colonial type set. Population: 3 in 63, 2 finer (11/08).
*From The San Jose Collection of Colonial Coinage.*(#119)

28 **1723 Rosa Americana Penny AU58 NGC.** Breen-121. This well defined penny is mostly deep brown but retains glimpses of its initial yellow-gold color. Marks are difficult to find. Design recesses display minor build-up. Listed on page 41 of the 2008 *Guide Book*.
*From The San Jose Collection of Colonial Coinage*.(#125)

## Quality MS62 1723 Rosa Americana Penny

29 **1723 Rosa Americana Penny MS62 Brown PCGS.** Breen 122. Stop after REX, no stop after the date. Mislabeled as a halfpenny on the PCGS holder. Unlike the halfpenny, the Rosa Americana penny was struck only in the crowned rose variety in 1723. Ample luster remains in the recessed areas, while the surfaces are refreshingly smooth for a Rosa Americana copper. Tough to find this nice, and an ideal piece for a type collection of colonial coinage. Population: 5 in 62, 3 finer (11/08).
*From The San Jose Collection of Colonial Coinage*.(#125)

## Delightful 1723 Rosa Americana Penny, MS63

30 **1723 Rosa Americana Penny MS63 Brown NGC.** Breen-122. Stop after REX. No stop after 1723. Small 3. Rosa Americana coinage was minted on planchets made of a kind of brass sometimes referred to as "Bath Metal"; the composition was 75% copper, 24.7% zinc, and 0.3% silver. As time goes on, these pieces tone into the kind of brown color seen so often with other copper and brass coinage, but the original color is brassy-gold in hue, rather than red. Ample measures of original color are visible through many of the recessed areas on this delightful penny; although presumably not enough to warrant NGC designating the piece as Red and Brown (or Gold and Brown). A light dusting of verdigris is noted on the devices.
*From The San Jose Collection of Colonial Coinage*.(#125)

## Vibrant MS62 1723 Rosa Americana Twopence

31 **1723 Rosa Americana Twopence MS62 Brown PCGS.** Breen-92. Stop after REX, no stop after the date. This is a vibrantly beautiful coin, whose full details and high degree of luster lend it an eye appeal unusual for any Rosa Americana piece. The grade is defined by light and entirely undistracting surface chatter throughout the fields. Listed on page 41 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage*.(#128)

## Select 1723 Rosa Americana Twopence

32 **1723 Rosa Americana Twopence MS63 Brown PCGS.** Breen-92. Stop after REX, no stop after 1723. This high grade olive-brown twopence has a penetrating strike and only a few minor marks or spots. A worthy acquisition in such quality. Listed on page 41 of the 2009 *Guide Book*. Population: 6 in 63, 1 finer (11/08).(#128)

## Harp Left 1722 Hibernia Halfpenny MS64 Brown, Ex: John J. Ford, Jr.

33 **1722 Hibernia Halfpenny, Type One, Harp Left MS64 Brown NGC.** Eight harpstrings. Martin 4.1-Bb.2, R.3. A late obverse die state with noticeable crumbling (as made) above the ribbons and on the nosetip. A beautiful chocolate-brown Hibernia halfpenny. The mildly prooflike fields appear undisturbed. Listed on page 42 of the 2009 *Guide Book*. Census: 3 in 64 Brown, 0 finer (11/08).
*Ex: A.H. Baldwin & Sons, 10/1973; John J. Ford, Jr. Collection, Part VII (Stack's, 1/05), lot 27*.(#167)

34 **1723 Hibernia Farthing, D:G:REX MS63 Brown PCGS.** Martin 1.1-Bc.1, R.5. This well struck farthing is principally chocolate-brown but has glimpses of dark brown in peripheral areas. Free from apparent abrasions, and a scarce Colonial issue. Listed on page 42 of the 2009 *Guide Book*. Population: 10 in 63, 4 finer (11/08).
*From The San Jose Collection of Colonial Coinage*.(#173)

35 **1723 Hibernia Halfpenny MS64 Brown PCGS.** Martin 4.57-Gc.13, R.3. This chocolate-brown near-Gem has an exacting strike and undisturbed fields. The cheek retains the granular texture of the planchet before the strike. One thin mark on the bust tip is of little import. Listed on page 43 of the 2009 *Guide Book*. Population: 20 in 64 Brown, 5 finer (11/08).
*From The San Jose Collection of Colonial Coinage.*(#180)

## Beautiful Gem 1723 Hibernia Halfpenny, Red and Brown

36 **1723 Hibernia Halfpenny MS65 Red and Brown PCGS.** Nelson-8, Breen-155, No pellet before H, Large 3. Martin 4.47-Gb.7, R.4. This is a beautifully preserved piece with significant but not overwhelming red color. Sharply struck, this piece has the smooth surfaces that might be suggested by the assigned grade. Students of the series might note a series of die breaks evident through US of GEORGIUS. Listed on page 43 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage.*(#181)

## Lovely 1724 Hibernia Halfpenny, MS62

37 **1724 Hibernia Halfpenny MS62 Brown PCGS.** Breen-166, stop after date. Martin 4.67-K.3, R.2. A lovely and unmarked example of this very scarce final year Hibernia issue. Hints of mint salmon-pink color reside in secluded areas, while the devices and most of the fields exhibit pleasing golden-brown toning. A light die crack connects the tops of ERNIA in HIBERNIA. Listed on page 43 of the 2009 *Guide Book*. Population: 3 in 62, 2 finer (11/08).
*From The San Jose Collection of Colonial Coinage.*(#190)

## Lustrous Choice 1724 Hibernia Halfpenny

38 **1724 Hibernia Halfpenny MS64 Brown NGC.** Breen-164. Martin 8.3-L.2, R.6. This highly lustrous near-Gem Hibernia halfpenny is sharply struck and lacks any visible marks. Outstanding quality for this final Hibernia date. Listed on page 43 of the 2009 *Guide Book*. Census: 2 in 64 Brown, 2 finer (an MS65 Brown and an MS65 Red and Brown) (11/08).(#190)

## Gorgeous Gem French Colonies 1740-BB Half Sou Marque

39 **1740-BB French Colonies Half Sou Marque MS65 PCGS.** Breen-690, Vlack-325, R.1. The present example is the single finest certified by either PCGS or NGC. As one might expect from this honor, the surfaces are unabraded, the silvering is seamless, and the strike is above average. Light rose and cream-gray toning further aids the eye appeal. Listed on page 51 of the 2009 *Guide Book*. Population: 1 in 65, 0 finer (11/08).(#158600)

## Exquisite MS62 Brown 1767-A French Colonies Sou West Indies RF Counterstamp

40 **1767-A French Colonies Copper Sou, RF Counterstamp MS62 Brown NGC.** Breen-701. Most surviving 1767-A copper sous were counterstamped circa 1793 for circulation in the West Indies. The RF counterstamp, as usual, is deeply impressed within the wreath, flattens the A mintmark opposite, and creates a mildly saucer-shaped appearance. Among the finest certified examples, and an impressive piece with lustrous and unabraded chocolate-brown surfaces. Listed on page 51 of the 2009 *Guide Book*. Census: 2 in 62 Brown, 1 finer (11/08).(#158637)

## Impressive Choice AU 1766 William Pitt Halfpenny

41 **1766 Pitt Halfpenny AU55 PCGS.** Betts-519, Breen-251. The "Great Commoner," Sir William Pitt, was hailed by traders on both sides of the Atlantic for his efforts to repeal the despised Stamp Act. This sharp Choice AU example has apple-green centers framed by golden-brown borders. Struck on an evenly granular Housed in a green label holder. Listed on page 48 of the 2009 *Guide Book*. Population: 12 in 55, 13 finer (11/08).
*From The San Jose Collection of Colonial Coinage.*(#236)

## Lovely Gem 1773 Virginia Halfpenny

42 **1773 Virginia Halfpenny, Period MS65 Brown PCGS.** Newman 25-M. Both sides display glimpses of the initial orange-red luster, although most of this lovely Gem is toned chocolate-brown. Evenly struck and impressively preserved. Clashed on the upper obverse and lower reverse, as struck at the Tower Mint in London. Listed on page 43 of the 2009 *Guide Book*. Population: 3 in 65, 1 finer (11/08).
*From The San Jose Collection of Colonial Coinage.*(#240)

## Bright Gem Red and Brown Period 1773 Virginia Halfpenny, Newman 25-M

43 **1773 Virginia Halfpenny, Period MS65 Red and Brown NGC.** Newman 25-M. Bright original copper-red color is especially pervasive on the reverse. The cheek, neck, and obverse field have acquired medium brown toning. A well struck and beautifully preserved Gem, worthy of a high quality Early American type collection. Struck from clashed dies. Listed on page 43 of the 2009 *Guide Book*.(#241)

## MS63 Red 1773 Virginia Halfpenny Period, Eight Harpstrings

44 **1773 Virginia Halfpenny, Period MS63 Red PCGS.** Eight harpstrings, Newman 20-N. A boldly impressed and lightly abraded Select example. The salmon-red color is only slightly muted by blushes of steel-gray on the portrait and a couple of darker areas of on the lower right reverse. Listed on page 43 of the 2009 *Guide Book*. Population: 17 in 63 Red, 30 finer (11/08).
*From The San Jose Collection of Colonial Coinage.*(#242)

## Gem 1773 Virginia Halfpenny No Period, Prooflike Fields

45 **1773 Virginia Halfpenny, No Period MS65 Brown NGC.** Eight harp strings. Dies unlisted in Newman (1956). A fully prooflike example with rich olive, lilac-brown, and navy-blue colors. Traces of mint red color remain in the protected areas. Nearly imperceptible hairlines prevent a finer grade. Listed on page 43 of the 2009 *Guide Book*.
*Ex: Denver Signature (Heritage, 8/2006), lot 26, which realized $3,220.*
*From The San Jose Collection of Colonial Coinage.*(#243)

## Sumptuous 1773 Virginia Halfpenny, MS66 Brown No Period, Newman 3-F

46 **1773 Virginia Halfpenny, No Period MS66 Brown PCGS.** Newman 3-F. Seven harpstrings. An exquisitely detailed and beautifully preserved Premium Gem representative with absolutely smooth surfaces. Each side shows rich chocolate and mahogany patina with vibrant blue and violet overtones. Charming visual appeal. Listed on page 43 of the 2009 *Guide Book*. Population: 5 in 66 Brown, 0 finer (12/08).(#243)

## Pleasing AU53 Voce Populi Farthing

47 **1760 Hibernia-Voce Populi Farthing, Large Letters AU53 PCGS.** Breen-234, Nelson-1. A pleasing medium-brown piece with a few mint-made planchet striations on the seated effigy and a hint of darker toning in the recessed areas. The obverse is well centered, the reverse moderately off center toward 2:30. Boldly clashed (as made) on the upper right obverse. Voce Populi farthings are far scarcer than their halfpenny counterparts. Listed on page 47 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage.*(#256)

## Near-Gem Zelinka 2-A
## 1760 Voce Populi Halfpenny

48 **1760 Hibernia-Voce Populi Halfpenny MS64 Brown PCGS.** Z. 2-A, N.4, R.1. A wonderful chocolate-brown Choice Voce Populi that has unabraded surfaces and exemplary detail on the devices. The reverse has a hint of granularity near the raised arm. A late obverse die state with extensive crumbling on POPULI and the bust truncation. Listed on page 47 of the 2009 *Guide Book*. Population: 8 in 64 Brown, 0 finer (11/08).(#262)

## MS63 Brown VOOE POPULI
## 1760 Voce Populi Halfpenny, Z. 7-E

49 **1760 Hibernia-Voce Populi Halfpenny, VOOE POPULI MS63 Brown NGC.** Z. 7-E, N.3, R.3. The present lot is the sole VOOE Voce Populi halfpenny certified as Mint State by NGC. It is a lustrous golden-brown piece with splendidly undisturbed fields and devices. Well struck, although the highpoints are bluntly defined, since the dies were deliberately engraved to impart the appearance of wear, even on newly struck examples. This practice encouraged their acceptance in circulation. Listed on page 47 of the 2009 *Guide Book*.(#265)

## Desirable VG10 1776 Continental Dollar
## CURENCY, Newman 1-C

50 **1776 Continental Dollar, CURENCY, Pewter VG10 PCGS.** Crosby Pl. VIII, 15; Newman 1-C; Breen-1089; R.3. Though the present pewter piece is substantially worn with a handful of planchet flaws in the central obverse, it is nonetheless most pleasing for the grade assigned. Deep slate-gray surfaces offer intriguing violet and peach overtones. An excellent choice for the budget-conscious collector seeking an example of this iconic American colonial issue. Listed on page 81 of the 2009 *Guide Book*.(#791)

## Lovely 1787 Massachusetts Half Cent
## Ryder 4-C, MS63

51 **1787 Massachusetts Half Cent MS63 Brown PCGS.** Ryder 4-C, R.2. The stop after the S is inconspicuous, as it is placed next to an arrowhead. The M in MASSACHUSETTS is recut, while the arrow feather touches the lower left foot of the E in WEALTH. A 2% curved clip is centered at 5 o'clock relative to the obverse. This lovely State Copper has mint-made planchet striations on the Indian's midsection and in the upper right reverse field, but the surfaces are free from abrasions. Listed on page 57 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage*.(#296)

52 **1788 Massachusetts Cent, Period AU53 NGC.** Period after MASSACHUSETTS. Ryder 7-M, High R.4. CENT is bold on the eagle's breast, and the Indian's clothing shows only moderate wear. This walnut-brown piece has woodgrain-textured fields, and marks are limited to a light pinscratch beneath the shoulder and a few wispy blemishes near the period. Listed on page 57 of the 2009 *Guide Book*.(#311)

## Near-Mint 1785 Connecticut Copper
## Bust Right, Late Dies M. 6.3-G.1

53 **1785 Connecticut Copper, Bust Right AU58 PCGS.** M. 6.3-G.1, R.3. A beautiful golden-brown state copper with minor planchet roughness on the central reverse, as made. The reverse die is failing dramatically, notably near the effigy's head but also on the branch hand and above the 8 in the date. Listed on page 59 of the 2009 *Guide Book*. Population: 3 in 58, 0 finer (11/08).
*Ex: Troy Wiseman Collection, Part Two (Heritage, 1/2007), lot 123, which realized $3,737.50*.(#316)

## Popular 1785 African Head Connecticut Copper, AU50

54 **1785 Connecticut Copper, African Head AU50 PCGS.** M. 4.1-F.4, R.1. Although not the finest known, and likely not even in the Condition Census, this example is far finer than most of its type. A deep olive-brown representative of this popular *Guide Book* variety. Sharply defined aside from the date, which is softly struck. Minutely granular, a bit more so on the reverse. A mark between NE in CONNEC is not conspicuous. Listed on page 58 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage*.(#319)

## 1786 Hercules Head Connecticut Copper Choice XF, Late Dies Miller 5.3-N

55 **1786 Connecticut Copper, Hercules Head XF45 PCGS.** Miller 5.3-N, R.2. This Hercules Head copper is tied with one other piece for the honor of finest PCGS-certified. The other XF45 PCGS was sold in our 8/06 Denver Signature for $5,175. The present medium brown example is interesting for its dramatic late die state. The reverse die has sunken, which causes the field to rise and consume a portion of the seated effigy. AUCTORI is boldly die clashed onto the reverse. Struck slightly off center toward 4:30. Listed on page 59 of the 2009 *Guide Book*.(#334)

## Finest Certified AU53 1787/1788 Connecticut Copper Mailed Bust Left, Miller 9-R

56 **1787/1788 Connecticut Copper, Mailed Bust Left AU53 PCGS.** M. 9-R, High R.4. A very scarce Guide Book variety, and by far the finest of only three pieces graded by NGC and PCGS combined (11/08). An essentially unabraded medium brown representative that has an even strike and a beard-like die break beneath the portrait. Struck from rotated dies, and the reverse is moderately misaligned toward 10 o'clock. Listed on page 59 of the 2009 *Guide Book*, where it is unpriced above XF.(#352)

## Remarkable 1787 Connecticut Copper Miller 6.1-M, AU58

57 **1787 Connecticut Copper, Laughing Head AU58 NGC.** Miller 6.1-M, R.1. The "Laughing Head" type is not recorded on the NGC insert. An attractive and well centered chestnut-colored example, crisply struck on a problem-free planchet. The obverse is remarkably clean, while the reverse has a rim bruise at 5 o'clock and a vertical scratch to the right of the shield. Listed on page 59 of the 2009 *Guide Book*. Census: 1 in 58, 1 finer (11/08).
*From The San Jose Collection of Colonial Coinage*.(#358)

## Pleasing 1788 Connecticut Copper Mailed Bust Left, AU50

58 **1788 Connecticut Copper, Mailed Bust Left AU50 PCGS.** Miller 11-G, R.2. The reverse is somewhat off-center toward 12 o'clock, with the top of the head and the tops of some letters missing. In contrast, the obverse is reasonably well centered, and the overall visual effect of this coin is quite pleasing. The surfaces are free from obtrusive marks, and the small degree of wear present is both appropriate for the grade and undistracting. Population: 2 in 50, 5 finer (11/08).
*From The San Jose Collection of Colonial Coinage*.(#403)

59 **1787 Machin's Mills Halfpenny AU50 PCGS.** Vlack 17-87A, R.2. An attractive medium brown piece. The seated figure has moderate wear on the chest and waist, but her drapery and shield are sharp, as is the portrait of good King George. Evenly micro-granular, but no verdigris or abrasions are present. Listed on page 64 of the 2009 *Guide Book*.
*Ex: Long Beach Signature (Heritage, 6/2005), lot 5016, which realized $2,530.*
*From The San Jose Collection of Colonial Coinage*.(#469)

## Elusive AU Seated Right
## 1787 Nova Eborac, Breen-987

60 **1787 Nova Eborac Copper, Seated Right AU50 PCGS.** Breen-987. A deep golden-brown piece, unusually smooth save for a mint-made strike-thru near the chin of the mailed bust. Minor rim dings are at 5:30 on the reverse and 11 o'clock on the obverse. An early die state that has a bold clashmark (as made) near the seated figure's foot instead of the usually seen die break. Listed on page 65 of the 2009 *Guide Book*. Population: 2 in 50, 8 finer (11/08).
*Ex: FUN Signature (Heritage, 6/2005), lot 5017, which realized $2,070.*
*From The San Jose Collection of Colonial Coinage.*(#475)

61 **1786 New Jersey Copper, Wide Shield VF30 PCGS.** Maris 14-J, R.1. A richly detailed reddish-brown piece with mildly granular surfaces. There are a few minor marks, but the overall appearance is attractive. All legends and devices are clear. Listed on page 66 of the 2009 *Guide Book*. Population: 8 in 30, 20 finer (11/08).
*Ex: Long Beach Signature (Heritage, 6/2004), lot 5013.*(#498)

62 **1787 New Jersey Copper, Outlined Shield AU53 NGC.** Maris 48-g, R.1. A diagonal die break across the shield helps identify the variety. This chocolate-brown state copper has a minor retained lamination on the reverse at 6:30, but the only apparent marks are a pair of thin lines near the horse's head. Listed on page 66 of the 2009 *Guide Book*.(#503)

63 **1787 New Jersey Copper, Small Planchet, Plain Shield AU55 PCGS.** Maris 43-d, R.1. Medium brown overall with glimpses of lavender here and there. The lower obverse has faint marks, but the remainder of the piece is generally unabraded. Listed on page 66 of the 2009 *Guide Book*. Population: 6 in 55, 12 finer (11/08). (#506)

## Appealing Maris 46-e New Jersey Copper, MS62

64 **1787 New Jersey Copper, Small Planchet, Plain Shield MS62 Brown NGC.** Maris 46-e, R.1. Generally well struck, although areas of striking weakness are evident in the lower right obverse border, including the date, and the upper right reverse margin. A thin planchet flaw through the upper right corner of the shield and a couple of reddish planchet streaks do not reduce the substantial eye appeal. Struck from a noticeably clashed obverse die. Listed on page 66 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage.*(#506)

## Scarce 1787 PLURIBS New Jersey Copper, XF45

65 **1787 New Jersey Copper, PLURIBS XF45 NGC.** Maris 60-p, High R.4. A very scarce *Guide Book* blundered variety, the second U in PLURIBUS was omitted by the engraver. This deep chocolate-brown piece was not fully brought up in the centers, and may have less actual circulation wear than the third party grade implies. Small marks are present but trivial, and no corrosion is evident. The obverse is nearly perfectly centered, the reverse is off center by a couple of degrees toward 6:30. Listed on page 66 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage.*(#512)

## Fascinating 1787 New Jersey Copper
## Struck Over a 1788 Connecticut Copper, AU58

66 **1787 New Jersey Copper, Camel Head—Struck Over a 1788 Connecticut Copper—AU58 NGC.** Maris 56-n, R.1. A bold chocolate-brown example with unmarked surfaces and generally bold definition. Planchet flaws (as made) affect the lower left obverse and upper left reverse. A pair of slender die cracks (as struck) reach the left side of the shield. The ON in CONNEC from the undertype is visible above the V in NOVA, and Liberty's branch hand appears within the upper right portion of the shield. Listed on page 67 of the 2009 *Guide Book*.
*Ex: Lyman Low, 9/1918, lot 128; Hillyer Ryder, F.C.C. Boyd, John J. Ford, Jr. Collection (Stack's, 10/2003), lot 186.*
*From The San Jose Collection of Colonial Coinage.*(#515)

## Bold Choice XF Running Fox
## 1788 New Jersey Copper, M. 75-bb

67 **1788 New Jersey Copper, Running Fox XF45 PCGS.** M. 75-bb, R.4. A golden-brown example of this challenging New Jersey subtype. The left obverse border has the heavy break associated with the variety, but the devices and legends are clear and the surfaces are only moderately granular. Only two planchet flaws are present, on the shield center and beneath the R in PLURIBUS. Listed on page 67 of the 2009 *Guide Book*. Population: 2 in 45, 5 finer (11/08). (#524)

68 **1788 New Jersey Copper, Head Left VF20 PCGS.** Maris 50-f. The challenging Head Left design, represented solely by three 1788 varieties. An evenly struck medium brown piece with unmarked and moderately granular surfaces. None have been certified by PCGS above XF45. Listed on page 67 of the 2009 *Guide Book*. Population: 3 in 20, 8 finer (11/08).(#527)

### Elusive VF30 Head Left
### 1788 New Jersey Copper, M. 50-f

69 **1788 New Jersey Copper, Head Left VF30 PCGS.** Maris 50-f, R.2. The popular and desirable Head Left subtype. These pieces are rarely encountered in grades above VF20; indeed, our Permanent Auction Archives show that we have only offered one piece finer than the current piece, an XF40 specimen that sold for $27,600 at FUN 2007. Unevenly struck, with soft definition evident through VA C and the lower left reverse. The remainder of the coin is bold with only the moderate wear expected of the grade. Listed on page 67 of the 2009 *Guide Book*. Population: 1 in 30, 5 finer (11/08).(#527)

### Choice XF 1785 Vermont Copper
### VERMONTS Landscape Ryder-2

70 **1785 Vermont Copper, VERMONTS XF45 PCGS.** RR-2, Bressett 1-A, R.2. The die break (as made) through the 8 in the date is noticeable but less dramatic on this intermediate die stage. Its tornado shape is only slightly evident. The rising sun, the trees, and the all-seeing eye have splendid definition, and most of the letters in the peripheral legends are clear. The tan and walnut-brown surfaces are only faintly granular. Listed on page 68 of the 2009 *Guide Book*. Population: 5 in 45, 3 finer (11/08).
*Ex: FUN Signature (Heritage, 1/2004), lot 4041.*
*From The San Jose Collection of Colonial Coinage.*(#539)

### 1786 Vermont Landscape Copper
### Choice XF, VERMONTENSIUM
### RR-7, Bressett 5-E

71 **1786 Vermont Copper, VERMONTENSIUM XF45 PCGS.** RR-7, Bressett 5-E, R.3. This medium brown Landscape copper displays glimpses of luster throughout the devices. Impressively devoid of marks or corrosion. A few degrees off center toward 2 o'clock, but all letters are at least partly present. From a later die state with sinking noted just above the plow. Listed on page 68 of the 2009 *Guide Book*. Population: 15 in 45, 19 finer (11/08). (#545)

### Borderline Uncirculated Landscape
### 1786 VERMONTENSIUM Copper
### RR-6, Bressett 4-D

72 **1786 Vermont Copper, VERMONTENSIUM AU58 NGC.** RR-6, Bressett 4-D, R.2. A virtually unabraded golden-brown representative that has bold definition on the major devices. A 2% curved rim clip (as made) is noted at 1 o'clock. The borders have a few moderate planchet flaws, as made, these mostly affect the BLI in PUBLICA and the CI in DECIMA. The obverse is moderately misaligned toward 6 o'clock. A decidedly lofty grade for a Landscape Vermont piece, and worthy of the finest specialized cabinet. Listed on page 68 of the 2009 *Guide Book*.
*Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5031, which realized $6,325.*
*From The San Jose Collection of Colonial Coinage.*(#545)

## Popular XF Details Baby Head
## 1786 Vermont Copper, RR-9

73 **1786 Vermont Copper, Baby Head—Planchet Flaw, Corroded—NCS. XF Details.** RR-9, Bressett 7-F, R.3. A splendidly detailed and darkly toned representative of this memorable Vermont variety. The crudely engraved bust somewhat resembles Orson Welles. The present piece has planchet flaws on the obverse neck, the VE in VERMONT, and on the chest of the reverse figure. Evenly granular but without verdigris or marks. Listed on page 68 of the 2009 *Guide Book*.(#548)

## Lightly Circulated 1786 Vermont Copper, XF40

74 **1786 Vermont Copper, Bust Left XF40 PCGS.** Ryder-10, Bressett 8-G, R.4. This piece grades highly from a technical perspective, since wear is moderate and the golden-brown fields are free from marks and verdigris. Planchet flaws are relatively prominent on the major devices, and the left borders also display mint-made flaws. Listed on page 68 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage*.(#551)

75 **1787 Vermont Copper, BRITANNIA AU50 NGC.** RR-13, Bressett 17-V, R.1. Medium brown with glimpses of cherry-wine on the reverse effigy. The portrait has a wealth of detail, while the reverse legends are fragmented, as always due to a worn-out reverse die. A small mint-made clip is noted on the reverse at 3 o'clock. Listed on page 68 of the 2009 *Guide Book*.(#554)

## AU 1788 Vermont Copper
## Bust Right, Ryder-16

76 **1788 Vermont Copper, Bust Right AU50 PCGS.** RR-16, Bressett 15-S, R.1. Softly struck in the centers, which is usual for the variety. The peripheral legends and design elements are bold, however, and the smooth chocolate-brown surfaces are choice. In fact, abrasions or planchet defects of any kind are refreshingly absent. Listed on page 68 of the 2009 *Guide Book*.
*Ex: Central States Signature (Heritage, 5/2005), lot 5024, which realized $2,530.*
*From The San Jose Collection of Colonial Coinage*.(#563)

77 **1783 Nova Constellatio Copper, Pointed Rays, Small US AU58 NGC.** Crosby 2-B, R.2. A partly lustrous dark brown example. Crisply struck and smooth save for a minor edge nick on the obverse at 8 o'clock. The late state with a die break (as made) on the rays beneath the eye. An interesting incused semi-circle near the Small US appears to have been a flaw on the planchet prior to the strike. Listed on page 52 of the 2009 *Guide Book*.
*Ex: San Francisco ANA Signature (Heritage, 7/2005), lot 5048.*
*From The San Jose Collection of Colonial Coinage*.(#801)

## MS62 Brown 1783 Nova Constellatio
## Blunt Rays, Crosby 3-C
## From the Ford, Ryder, Parmelee Collections

78 **1783 Nova Constellatio Copper, Blunt Rays MS62 Brown PCGS.** Crosby 3-C, R.3. 113.1 grains and 27.3 mm, according to the Ford catalog. A beautiful chocolate-brown piece with satin luster and problem-free surfaces. A diagonal die break (as made) rises through ER in LIBERTAS. Nova Constellatio Coppers of any variety are very rare in Uncirculated grades. Listed on page 52 of the 2009 *Guide Book*. Population: 3 in 62, 4 finer (11/08).
*Ex: Lorin G. Parmelee Collection (New York Coin & Stamp Co., 6/1890), first of two in lot 586; Hillyer Ryder, F.C.C. Boyd; John J. Ford, Jr. Collection, Part V (Stack's, 10/04), lot 37; San Francisco ANA Signature (Heritage, 7/2005), lot 5050.*
*From The San Jose Collection of Colonial Coinage*.(#807)

## Near-Mint 1785 Nova Constellatio Crosby 3-B, Pointed Rays, Large Date

79 **1785 Nova Constellatio Copper, Pointed Rays, Large Date AU58 NGC.** Crosby 3-B, R.2. This richly detailed Nova Constellatio has dark brown patina and no indication of abrasions. Moderately granular, the dies are relatively early with the break on the wreath only partly present beneath the L in LIBERTAS. Listed on page 52 of the 2009 *Guide Book*. Census: 5 in 58, 9 finer (11/08).
*From The San Jose Collection of Colonial Coinage.*(#813)

## MS63 Brown 1787 Fugio Cent Pointed Rays, STATES UNITED, Cinquefoils

80 **1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS63 Brown PCGS.** Newman 13-X, R.2. A splendid medium brown Fugio copper that likely once belonged to the famous *Bank of New York* holdings. A few degrees off center toward 3 o'clock, with resulting softness of strike on the right borders, but this unabraded example is otherwise sharply defined. Minor slender planchet flaws have toned but are as made. Listed on page 83 of the 2009 *Guide Book*.
*From The James Mossman Collection.*(#883)

## MS64 Brown 1787 Fugio Cent Struck 25% Off Center STATES UNITED, Pointed Rays, Cinquefoils

81 **1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Struck 25% Off Center—MS64 Brown NGC.** Newman 13-X, R.3. Struck 25% off-center toward 4 o'clock. Although Mint State Fugio cents are collectible courtesy of the Bank of New York holdings, the existence of a 25% off-center Fugio cent is a remarkable situation. This Choice example has full luster with lovely chocolate brown surfaces. These surfaces, especially on the reverse, have the moderate planchet flaws, striations, and toning streaks characteristic of the issue. Listed on page 83 of the 2009 *Guide Book*.
*Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5049, which realized $6,750.50.*
*From The San Jose Collection of Colonial Coinage.*(#883)

## Scarce 1787 Fugio Cent, New Haven Restrike, Silver, MS61

82 **1787 Fugio Cent, New Haven Restrike, Silver MS61 ICG.** According to page 84 of the 2009 *Guide Book:* "The so-called New Haven 'restrikes' were made for Horatio N. Rust from dies recreated in 1859, partially through use of hubs or other devices obtained by 14-year-old C. Wyllis Betts in 1858 on the site of the Broome & Platte store in New Haven, where the original coins were made."

This is a fine-looking example with deep, intermingled charcoal-gray and plum toning. Lustrous and free of marks, with numerous tiny bits of die rust on both sides. Only a few of these pieces are known, and they are scarce at any grade level.
(#915)

83 **1787 Fugio Cent, New Haven Restrike, Copper MS63 Brown PCGS.** Newman 104-FF. The golden-brown surfaces are satiny and smooth. A well struck and pleasing piece. From late dies with two bold cracks along the left obverse border. Listed on page 84 of the 2009 *Guide Book*.(#916)

84 **1787 Fugio Cent, New Haven Restrike, Copper MS63 Brown NGC.** Newman 104-FF. A thoroughly lustrous and intricately struck example of this widely collected pre-Civil War production. The beautiful golden-brown fields are undisturbed. Slightly granular, as made from lightly rusted dies. Listed on page 84 of the 2009 *Guide Book*. Census: 22 in 63 Brown, 17 finer (11/08).(#916)

85 **1787 Fugio Cent, New Haven Restrike, Copper MS64 Brown NGC.** Newman 104-FF. Warm glimmers of peripheral mahogany yield to chocolate-brown at the centers. Well-defined with interesting eye appeal and few marks for the grade.
*Lot includes auction tag from The Norweb Collection (Bowers and Merena, 11/88), lot 3568.*
*From The Deb-Ann Collection.*(#916)

## Copper MS65 Brown 1787 New Haven Restrike Fugio Cent

86 **1787 Fugio Cent, New Haven Restrike, Copper MS65 Brown PCGS.** Newman 104-FF. A meticulously struck and gorgeously preserved Gem of this popular 19th century copy. Chocolate-brown with glimpses of mint red in protected areas. Thin rings identify the so-called New Haven Restrike, which wasn't made in New Haven and isn't a restrike, since a strict numismatic interpretation of 'restrike' requires the original dies. However, the variety has been collected consistently since the 1860s. Listed on page 84 of the 2009 *Guide Book*. Population: 2 in 65 Brown, 1 finer (11/08).
*From The San Jose Collection of Colonial Coinage.*(#916)

87 **1787 Fugio Cent, New Haven Restrike, Copper MS63 Red and Brown ICG.** Newman 104-FF. Glimpses of orange-red outline peripheral elements, with the fields and central devices are chocolate-brown. Precisely struck and unabraded. Portions of the reverse exhibit die rust, characteristic of the 19th century variety. (#917)

## MS65 Red and Brown 'New Haven Restrike' Fugio Cent

88 **1787 Fugio Cent, New Haven Restrike, Copper MS65 Red and Brown PCGS.** Newman 104-FF. Original mint orange-gold illuminates the borders and obverse design recesses of this otherwise chocolate-brown Gem. An essentially pristine example of this widely collected mid-19th century copy. Encapsulated in a green label holder. Listed on page 84 of the 2009 *Guide Book*. Population: 13 in 65 Red and Brown, 4 finer (11/08).
*From The San Jose Collection of Colonial Coinage*.(#917)

## Uncirculated Copper, Wreath Below Rhode Island Ship Token

89 **1778-1779 Rhode Island Ship Token, Wreath Below, Copper MS60 Brown PCGS.** Breen-1141. A magnificently detailed Mint State example that has dark brown toning and generally smooth surfaces. A small edge flaw at 4 o'clock is of mint origin. The wreath below the ship was added to the die to replace the VLUGTENDE legend, which unintentionally implied that Admiral Howe's flagship fled the scene. Listed on page 48 of the 2009 *Guide Book*. Population: 1 in 60, 3 finer (11/08).(#576)

## Choice XF Pewter, Wreath Below Rhode Island Ship Token

90 **1778-1779 Rhode Island Ship Token, Wreath Below, Pewter XF45 NGC.** Breen-1142. Well defined with characteristic battleship-gray color and a few spots of verdigris on the upper obverse. Luster clings to protected areas of the design. An important rarity for the Early American collector, since most Rhode Island ship tokens were struck in copper or bronze. Listed on page 48 of the 2009 *Guide Book*.
*Ex: FUN Signature (Heritage, 1/2006), lot 453, which realized* $6,900.
*From The San Jose Collection of Colonial Coinage*.(#585)

## John L. Roper's Pewter 1778-1779 Rhode Island Ship Token Wreath Below Ship Variety, XF45

91 **1778-1779 Rhode Island Ship Token, Wreath Below, Pewter XF45 PCGS.** Ex: Roper. Breen-1142. A richly detailed steel-gray representative. Smooth despite a few faint field marks and unobtrusive spots of deep gray verdigris. PCGS has only certified a total of eight examples of this rare variety. Most Rhode Island Ship Tokens are struck in brass or copper. Breen believed that the pewter pieces were dies trials. Listed on page 48 of the 2008 *Guide Book*.
*Ex: John L. Roper, 2nd Collection (Stack's, 12/1983), lot 174*. (#585)

92 **1781 North American Token AU53 PCGS.** Breen-1144. Breen asserts the enigmatic North American token was struck in Dublin during the 1810s, and exported to the United States because of its war-caused chronic shortage of coppers. This lightly circulated example appears unabraded but has its share of toned planchet flaws. Listed on page 69 of the 2009 *Guide Book*. Population: 5 in 53, 7 finer (11/08).
*From The San Jose Collection of Colonial Coinage*.(#589)

## Pleasing XF45 1783 Chalmers Short Worm Shilling

93 **1783 Chalmers Shilling, Short Worm XF45 NGC.** Breen-1011. The "worm" refers to the thin object held between the birds' beaks, though the protrusions at the top are reminiscent of leaves, which might suggest a sprig or a branch. Softly struck but still luminous with only light wear across the high points of the violet-gray and sunset surfaces. Listed on page 49 of the 2009 *Guide Book*.(#596)

## Famous XF Bar Cent

94 **(1785) Bar Copper XF40 PCGS.** Breen-1145. A deep brown example of this famous and challenging Early American type. Smooth and desirable despite a few unobtrusive thin marks near the peak of the S. Both major diagnostics are present; the spur from the end of the second bar, and a slender die crack at the center between bars. Listed on pages 70 of the 2009 *Guide Book*. Population: 7 in 40, 53 finer (11/08).
*From The San Jose Collection of Colonial Coinage*.(#599)

## Lustrous Choice AU 1787 Auctori Plebis Token

95 **1787 Auctori Plebis Token AU55 PCGS.** Breen-1147. Mint gloss shimmers across the chocolate-brown and gunmetal-gray surfaces. A richly detailed example with a few minor ticks on the portrait. The usual die state with a banner-like break around the seated figure. The Draped Bust Left portrait and AUCTORI legend shows close imitation of the 1787 Connecticut coppers. Only one piece has been certified finer by PCGS, out of 65 examples graded. Listed on page 70 of the 2009 *Guide Book*.
*Ex: Benson Collection, Part II (Ira & Larry Goldberg, 2/2002), lot 16, which realized $2,415*.(#601)

96 **1794 Franklin Press Token MS63 Brown PCGS.** Breen-1165. The chocolate-brown patina cedes to olive-brown colors when the piece is rotated under a light. A boldly struck example with a beautifully smooth obverse and only pinpoint strike-throughs on the reverse field. In a green label holder. Listed on page 72 of the 2009 *Guide Book*. Population: 16 in 63 Brown, 6 finer (11/08).
*Ex: Palm Beach Signature (Heritage, 11/2004), lot 5036.*
*From The San Jose Collection of Colonial Coinage*.(#630)

97 **1794 Talbot, Allum & Lee Cent, NEW YORK MS62 Brown NGC.** Fuld-4, Breen-1032. Small ampersand. This dark brown cent token lacks any remotely consequential marks save for an unimportant obverse edge nick at 4:30. Careful rotation beneath a light reveals ample satin luster. Listed on page 72 of the 2009 *Guide Book*.(#634)

## Gem 1795 Talbot, Allum & Lee Cent

98 **1795 Talbot Allum & Lee Cent MS65 Brown PCGS.** Fuld-1, Breen-1035. Light olive-brown and salmon-pink colors adorn this intricately struck representative, which possesses unbroken cartwheel shimmer. A shallow strike-thru, as produced, is noted above the left side of the packaged trade goods, and a single faint hair-thin mark crosses Liberty's raised arm. Listed on page 72 of the 2009 *Guide Book*. Population: 6 in 65 Brown, 1 finer (11/08).
*Ex: San Francisco ANA Signature (Heritage, 7/2005), lot 5033, which realized $2,300.*
*From The San Jose Collection of Colonial Coinage*.(#640)

## Gorgeous 1795 Talbot, Allum, & Lee Cent PR62 Brown

99 **1795 Talbot, Allum & Lee Cent PR62 Brown PCGS.** Fuld-1, Breen 1035. Beautiful powder-blue and chestnut-gold undertones emerge when this golden-brown specimen is rotated beneath a light. The faint hairlines and field marks are consistent with the grade. Business strikes are listed on page 72 of the 2009 *Guide Book*, proofs are unlisted. PCGS has certified only 27 1795 proofs (11/08). (#90640)

## Rare Proof 1795 Talbot, Allum, & Lee Cent, PR63 Red and Brown

100 **1795 Talbot, Allum & Lee Cent PR63 Red and Brown NGC.** Fuld-1, Breen-1035. Mellowed mint red and powder-blue grace the obverse. The reverse is ocean-blue and olive with peripheral rose tints. Well struck and flashy with a few faint hairlines on the lower right obverse. Business strikes are listed on page 72 of the 2009 *Guide Book*.(#90641)

## 1794 Talbot, Allum & Lee Cent Muled with 1793 Birmingham Halfpenny MS64 Red and Brown

101 **1794 Talbot, Allum & Lee Cent/Birmingham Halfpenny Mule MS64 Red and Brown PCGS.** Breen-1040, Fuld Mule 1. The 1794 Talbot, Allum & Lee obverse is muled with the 1793 Birmingham halfpenny reverse. The edge has the standard LONDON lettering. Although the Talbot firm was located in New York, these tokens were produced in Birmingham, England by Peter Kempson and Company. Several different mules are known, made for sale to Conder token collectors of the day. This lovely piece has noticeable mint red and is graced by pleasing bluish-brown toning on both sides. The fields are reflective and the overall eye appeal is excellent. As of (11/08), the only Birmingham Mule certified as Red and Brown by PCGS. None have been certified as Red.
*Ex: FUN Signature (Heritage, 1/2008), lot 111, which realized $5,462.50.*(#983)

## Elegant PR63 Brown 1796 Copper Company of Upper Canada Token

102 **1796 Myddelton/Copper Company of Upper Canada Token PR63 Brown PCGS.** Ex: James A. Stack. Crosby Pl. IX 23, Breton-722, Breen-1076, R.5. Obverse: same as the 1796 Myddelton token. Hope (with anchor) presents two children to Liberty, who holds a pole bearing a liberty cap. Cornucopia behind Liberty, representing the fertility of Kentucky. Plant sprig between the figures, representing Myddelton's Kentucky venture. Reverse reads ONE HALF PENNY around, COPPER COMPANY OF UPPER CANADA in the center.

Despite the Brown designation from PCGS, this delightful proof piece displays much mint red in the protected areas around the devices and peripheral legends. Matthew Boulton and James Watt, Jr., were principals of the Soho Mint, where this piece is believed to have been struck in 1802/3. A wonderful example of this historic muling with an equally marvelous provenance. Listed on page 73 of the 2009 *Guide Book*.(#651)

## MS63 Brown 1796 Castorland Medal Original Dies, Second Restrike

103 **1796 Castorland Medal, Bronze MS63 Brown PCGS.** Breen-1065. Reeded edge. Irregular letter alignment on CASTORLAND, die rust on the receptacle handle, and die failure near the S in PARENS identify the present piece as a Paris Mint restrike from the original dies. The latest reverse die state this cataloger has seen. Sharply struck and satiny with deep walnut-tan toning. Listed on page 73 of the 2009 *Guide Book*.(#654)

## Gem Bronze '1796' Castorland Medal From Original Paris Mint Dies

104 **1796 Castorland Medal, Bronze MS65 Brown PCGS.** Breen-1065. Breen's second restrike, but from both original dies. The reverse field is raised near 3 o'clock from a sinking die, and die rust accompanies the right handle of the vessel. A well struck and beautiful chocolate-brown Gem. Struck three times by the dies, as indicated by doubling on the dentils. Listed on page 73 of the 2009 *Guide Book*. Population: 3 in 65, 1 finer (11/08).
*From The San Jose Collection of Colonial Coinage*.(#654)

## Desirable 1820 North West Token in Brass, Good 4

105 **1820 North West Token, Brass Good 4 PCGS.** Breen-1083. Holed at 12 o'clock, as most examples are, with considerable wear across each side and evidence of possible burial on the olive-gold and chocolate-brown surfaces. Despite its flaws, it remains a highly desirable example of this challenging issue, which circulated in the area that would become the Oregon Territory. Listed on page 74 of the 2009 *Guide Book*.(#662)

## Near-Mint 1783 Georgivs Triumpho Token

106 **1783 Georgivs Triumpho Token AU58 NGC.** Baker-7, R.3. Believed contemporaneous with its date, this token bears a portrait of General George that more closely resembles King George. The usual die state with a heavy vertical die break across the left (facing) shoulder of the standing figure. A charming medium brown representative with bold definition and only a hint of wear on Washington's nose and the chest of the reverse figure. Listed on page 75 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage*.(#664)

## Bold 1783 Georgivs Triumpho Token AU58

107 **1783 Georgivs Triumpho Token AU58 PCGS.** Baker-7, R.3. An important dark walnut-brown example that displays substantial satin luster. The familiar die state with a heavy vertical break across the central to upper reverse. Listed on page 75 of the 2009 Guide Book. Population: 6 in 58, 1 finer (11/08).(#664)

## Impressive MS62 Brown 1783 Large Military Bust Cent

108 **1783 Washington & Independence Cent, Large Military Bust MS62 Brown PCGS.** Baker-4. Dark brown with occasional glimpses of lighter tan toning. This richly detailed Military Bust cent is smooth aside from a couple of faded thin marks on the field near the extended arm. Listed on page 75 of the 2009 *Guide Book*. Population: 6 in 62 Brown, 1 finer (11/08).(#667)

### 1783 No Button Draped Bust Washington Cent, Copper Restrike Plain Edge, Baker-3C, MS63 Brown

109 **1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Plain Edge MS63 Brown PCGS.** Baker-3C, R.5. A mildly prooflike walnut-brown representative with well struck devices and lightly impressed borders. A faint fingerprint near the N in UNITED and a hair-thin mark beneath the first T in STATES are of little import. Certified as an Original business strike by PCGS (Baker-2, R.1), but this is the very scarce 19th century Taylor proof restrike. Listed on page 76 of the 2009 *Guide Book*. (#682)

### PR66 Brown Plain Edge Copper Restrike No Button, Baker-3C 1783 Washington Draped Bust Cent

110 **1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Plain Edge PR66 Brown PCGS.** Baker-3C. The scarce Small Letters, Plain Edge restrike variety, struck from a different set of dies than the more often encountered Engrailed Edge, Large Letters restrike. The iridescent electric-blue and plum-red fields are beautiful to behold. Precisely struck, and pristine except for infrequent minor contact on the obverse field. Listed on page 76 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage*.(#682)

### Baker-3 Restrike 1783 Washington Draped Bust Cent Engrailed Edge, No Button, PR66 Brown

111 **1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Engrailed Edge PR66 Brown PCGS.** Baker-3. The Large 3 in the date identifies the W.S. Lincoln restrike. This gorgeous Premium Gem has an unimprovable strike, with exceptional definition on the central devices. The golden-brown and ice-blue fields are smooth and reflective. Listed on page 76 of the 2009 *Guide Book*. Population: 9 in 66 Brown, 4 finer as Brown (11/08).
*From The San Jose Collection of Colonial Coinage*.(#685)

### Restrike 1783 Washington Cent Draped Bust, No Button, Copper Gem Proof Red and Brown, Baker-3

112 **1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Engrailed Edge PR65 Red and Brown PCGS.** Baker-3. Rulau and Fuld attribute these restrikes of the 1783 issue to London dealer W.S. Lincoln in 1860. The Large 3 in the date, in addition to the reflective fields, distinguish these restrikes from originals. An undisturbed pumpkin-gold beauty with subtle lilac patina on the portrait and obverse field. Listed on page 76 of the 2009 *Guide Book*.
*Ex: Long Beach Signature (Heritage, 5/2006), lot 67, which realized $3,737.50.*
*From The San Jose Collection of Colonial Coinage*.(#686)

### Choice Proof Red Copper Restrike 1783 Washington Draped Bust Cent, Baker-3

113 **1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Engrailed Edge PR64 Red PCGS.** Baker-3. A boldly struck brick-red near-Gem. Free from contact, and only a tiny toning fleck or two precludes a finer grade. A restrike made in the mid-19th century by English entrepreneur W.S. Lincoln. Listed on page 76 of the 2009 *Guide Book*. Population: 2 in 64 Red, 0 finer (11/08).
*Ex: New York Signature (Heritage, 6/2005), lot 5016; Troy Wiseman Collection, Part Two (Heritage, 1/2007), lot 249, which realized $3,450.*
*From The San Jose Collection of Colonial Coinage*.(#687)

## Silver Restrike No Button PR63
## 1783 Washington Draped Bust Cent

114 **1783 Washington & Independence Cent, Draped Bust, No Button, Engrailed Edge Silver Restrike PR63 PCGS.** Baker-3A. The very scarce silver version of the W.S. Lincoln restrike, produced in the mid-19th century. The thick lettering distinguishes it from the Taylor proof restrike. Well struck and prominently mirrored with peripheral gold toning. The fields are lightly hairlined, and a few gray spots are distributed. The obverse is double struck, rotated slightly counter-clockwise within the collar between strikes. Listed on page 76 of the 2009 *Guide Book*.
*From The San Jose Collection of Colonial Coinage.*(#688)

## Popular Select 1783 Unity States Cent

115 **1783 Washington Unity States Cent MS63 Brown PCGS.** Baker-1. An uncommonly lofty grade for this popular Washington variety, which is usually encountered between VF and AU. Light to medium brown toning with the peripheral roller marks (as made) endemic to the issue. Listed on page 76 of the 2009 *Guide Book*. Population: 2 in 63, 2 finer (11/08).(#689)

## MS63 Double Head Washington Cent
## Baker-6, Tied for Finest Certified

116 **Undated Washington Double Head Cent MS63 Brown NGC.** Baker-6, R.1. The present piece is tied with one other example as the finest graded among 266 pieces certified by either NGC or PCGS. It is a lustrous and sharply struck chocolate-brown Double Head cent with minimally abraded surfaces. Listed on page 76 of the 2009 *Guide Book*. Census: 2 in 63 Brown, 0 finer (11/08).(#692)

## Near-Gem 1791 Large Eagle Cent

117 **1791 Washington Large Eagle Cent MS64 Brown PCGS.** Baker-15, R.2. This is one of the popular Washington issues that is relatively available in higher grades, although Choice examples such as this are infrequently encountered. The first 1 in the date is recut with a complete serif visible above the final position. Sharply struck, and undisturbed aside from a solitary thin mark concealed between shield stripes. Glossy medium brown surfaces accented by splashes of pale blue within the peripheral devices. Listed on page 77 of the 2009 *Guide Book*. Population: 22 in 64 Brown, 5 finer (11/08).
*Ex: New York Signature (Heritage, 7/2004), lot 5014, which realized $2,990.*
*From The San Jose Collection of Colonial Coinage.*(#702)

## Rare 1792 Washington Born Virginia Cent
## Inscribed Reverse XF40

118 **1792 Washington Born Virginia Cent, Inscribed Reverse XF40 PCGS.** Baker-60, R.6. Breen-1239. Copper. This rare variety is part of a series of copper Washington pieces struck between 1791 and 1792 by the Westwood Mint in Birmingham, England. The 1791 issues were private patterns for Federal coinage, the latter issues were simply produced for export and circulation in the United States. There are two die varieties of the Born Virginia, Inscribed Reverse. The first (Breen-1238) is extremely rare, and has the 1 in 1789 centered between the TE in UNITED. Breen-1239 is collectible, but rare in all grades, and usually found in VF. This mahogany-brown example is evenly struck and has the expected number of moderate field marks. Listed on page 78 of the 2009 *Guide Book*. Population: 2 in 40, 7 finer (11/08).(#723)

## Uncirculated Lettered Edge
## 1793 Washington Ship Halfpenny

119 **1793 Washington Ship Halfpenny, Copper, Lettered Edge MS61 Brown PCGS.** Baker-18, R.3. Although only scarce in circulated grades, the 1793 Ship halfpenny is difficult to locate in Mint State. The strike is crisp aside from the left half of Washington's epaulet, the highpoint of his hair, and the middle sail on the ship. The reverse die is somewhat sunken, as usual. Nonetheless, the ship and sails offer pleasing definition. A horizontal strike-through is noted from the hair ribbon to the second E of PRESIDENT. Listed on page 79 of the 2009 *Guide Book*. Population: 5 in 61 Brown, 2 finer (11/08).
*Ex: Palm Beach Signature (Heritage, 3/2006), lot 50; Liberty Collection of United States Colonial Coinage (Heritage, 1/2008), lot 125, which realized $9,775.*(#734)

## Gem 1795 Washington Grate Halfpenny
## Reeded Edge, Large Buttons, Baker-29AA

120 **1795 Washington Grate Halfpenny, Large Buttons, Reeded Edge MS65 Brown PCGS.** Baker-29AA. A gorgeous Gem that features blended chocolate-brown and steel-blue toning. The strike is penetrating, even on LONDON, and the fields show only inconsequential contact. Listed on page 79 of the 2009 *Guide Book*. Population: 4 in 65 Brown, 0 finer (11/08).(#746)

121 **1795 Washington Grate Halfpenny, Large Buttons, Reeded Edge MS64 Red and Brown PCGS.** Baker-29AA. The salmon-pink surfaces have mellowed only slightly over the past two centuries. Devoid of marks and noticeable carbon. Struck from widely rotated dies. Listed on page 79 of the 2009 *Guide Book*.
*Ex: FUN Signature (Heritage, 1/2004), lot 4077.*
*From The San Jose Collection of Colonial Coinage.*(#747)

## Small Buttons, Reeded Edge
## 1795 Washington Grate Halfpenny
## MS63 Brown, Among Finest Certified

122 **1795 Washington Grate Halfpenny, Small Buttons, Reeded Edge MS63 Brown PCGS.** Baker-29D. A golden-brown representative that has satin luster and a beautifully preserved reverse. The usual die state with several small obverse breaks. The right obverse field has an inconspicuous pinscratch. Crisply struck overall, although the underlying planchet surface is incompletely struck up near the OND in LONDON. Scarcer than the Large Buttons, Reeded Edge variety, and quite rare in Select Mint State. Listed on page 79 of the 2009 *Guide Book*. Population: 1 in 63, 1 finer (11/08).(#749)

123 **1795 Washington Liberty & Security Halfpenny, LONDON Edge MS62 Brown PCGS.** Ex: Benson. Baker-31. A smooth medium brown Washington halfpenny with satin luster and smooth surfaces. Somewhat softly impressed on the portrait and eagle, characteristic of the issue. Listed on page 80 of the 2009 *Guide Book*. Population: 1 in 62 Brown, 2 finer (11/08).
*Ex: Benson Collection, Part I (Ira & Larry Goldberg, 2/2001), lot 130.*
*From The San Jose Collection of Colonial Coinage.*(#755)

124 **1795 Washington Liberty & Security Halfpenny, ASYLUM Edge AU53 PCGS.** Baker-31A. The ASYLUM edge is partly legible through the PCGS holder. The rarest of the Liberty and Security halfpenny varieties. "At least 15 known" according to Rulau-Fuld, which would categorize the ASYLUM variety as R.6. A deep brown example with light wear and a few toned-over marks. Listed on page 80 of the 2009 *Guide Book*.(#761)

125 **Undated Washington Liberty & Security Penny MS60 Brown NGC.** Baker-30, Bust Left, Plain rims. The NGC insert incorrectly implies that this piece is the 1795 Bust Right Asylum Edge variety, which would be Baker-31A. Baker-30 *also* has an Asylum Edge, as can be seen on the present piece courtesy of its new NGC holder. A dark brown example with a crisp strike, a few faint field marks, and a hint of granularity on the reverse field. Listed on page 80 of the 2009 *Guide Book*.(#767)

## Select Liberty & Security Penny
## Washington Bust Left, Baker-30

126 **Undated Washington Liberty & Security Penny MS63 Brown PCGS.** Baker-30, R.2. Glossy chestnut-brown surfaces with tinges of deeper violet and steel-blue patina across both sides. A few paper thin planchet voids are barely noticed on the left side of the obverse. Listed on page 80 of the 2009 *Guide Book*.
*Ex: Central States Signature (Heritage, 5/2005), lot 5033, which realized $2,990.*
*From The San Jose Collection of Colonial Coinage.*(#767)

## Elusive AU North Wales Halfpenny
## Baker-34, Plain Edge

127 **(1795) Washington North Wales Halfpenny, Plain Edge, One Star at Each Side of Harp AU50 PCGS.** Baker-34, R.4. An impressively unabraded and verdigris-free representative of this scarce Washington import. Golden-brown with hints of maroon. Portions of the harp are softly struck, as always since the maker wanted new pieces to appear worn, to encourage acceptance in circulation. Population: 2 in 50, 3 finer (11/08).
*Listed on page 80 of the 2009 Guide Book.*
*From The San Jose Collection of Colonial Coinage.*(#770)

## Choice AU Baker-266B
## Washington Success Medal, Large Size, Plain Edge

128 **Undated Washington Success Medal, Large Size, Plain Edge AU55 PCGS.** Baker-266B. Struck in brass with a plain edge. From a different obverse die than the usually encountered Baker-265. Rulau speculates that the Baker-266 series is a circa-1860 restrike. Blended chocolate-brown and jade-green with attractive surfaces and only minor highpoint wear. The all-seeing eye is sharply struck for the type. Listed on page 80 of the 2009 *Guide Book*. Population: 4 in 55, 10 finer (11/08).
*From The San Jose Collection of Colonial Coinage.*(#779)

## Near-Mint Washington Success Medal
## Reeded Edge, Large Size, Baker-265

129 **Undated Washington Success Medal, Large Size, Reeded Edge AU58 PCGS.** Baker-265, with the familiar obverse die break from 11 to 3 o'clock across Washington's nose. This lovely piece is toned medium brown and is virtually devoid of marks. The all-seeing eye is incompletely brought up, as always. Listed on page 80 of the 2009 *Guide Book*. Population: 3 in 58, 7 finer (11/08).
*From The San Jose Collection of Colonial Coinage.*(#780)

## Silvered Small Size Plain Edge
## AU53 Washington Success Medal

130 **Undated Washington Success Medal, Small Size, Plain Edge, Silvered AU53 NGC.** Baker-267A. Golden-brown luster dominates the borders and the reverse field. The devices are green-gray. No marks are worthy of comment, and the portrait shows only moderate wear. The central eye on the reverse is indistinct, as always seen because of metal flow to the portrait during the strike. Listed on page 80 of the 2009 *Guide Book*.(#782)

## Borderline Uncirculated Plain Edge
## Small Size Success Medal

131 **Undated Washington Success Medal, Small Size, Plain Edge AU58 PCGS.** Baker-267A, R.4. The brassy olive-gold color infrequently cedes to lilac hues. A later die state of this scarce issue, with much of the first G in GEORGE no longer present. A thin mark through the first E in GEORGE is the sole detraction. Listed on page 80 of the 2009 *Guide Book*. Population: 2 in 58, 5 finer (11/08).
*From The San Jose Collection of Colonial Coinage.*(#782)

### Scarce Small Size Success Medal
### MS62, Plain Edge, Baker-267A

132 **Undated Washington Success Medal, Small Size, Plain Edge MS62 PCGS.** Baker-267A, R.4. A shimmering olive-brown example, undisturbed aside from an unobtrusive pinscratch distant from the focal points at 5 o'clock. A retained lamination (as made) is noted beneath the second T in STATES. Unlike most pieces seen, the eye in the center on the reverse is sufficiently struck to recognize the motif. The Small Size Success Medal is scarcer than its Large Size counterpart. Listed on page 80 of the 2009 *Guide Book*.
*Ex: Oak Collection of American Colonial Coinage (Heritage, 9/2005), lot 485, which realized $4,887.50.*
*From The San Jose Collection of Colonial Coinage.*(#782)

133 **Undated Washington Success Medal, Small Size, Reeded Edge AU53 PCGS.** Baker-267, Breen-1289, R.6. A bold and well centered representative. The olive-brown color cedes to gray hues on portions of the reverse. The major devices exhibit wispy thin marks. Listed on page 80 of the 2009 *Guide Book*.
*Ex: Long Beach Signature (Heritage, 9/2004), lot 5018.*
*From The San Jose Collection of Colonial Coinage.*(#783)

134 **Undated Washington Success Medal, Small Size, Reeded Edge, Silvered AU50 NGC.** Baker-267B. The obverse is mostly dark gray, while the reverse is light silver-gray save for dashes of tan. The high points of both sides have toned. The surfaces appear undisturbed. Listed on page 80 of the 2009 *Guide Book*. Census: 1 in 50, 1 finer (11/08).
*From The San Jose Collection of Colonial Coinage.*(#790)

### Choice AU Silvered Small Size
### Reeded Edge Washington Success Medal

135 **Undated Washington Success Medal, Small Size, Reeded Edge, Silvered AU55 PCGS.** Baker-267B. The Guide Book notes, "specimens with original silvering are rare." This lightly circulated Washington piece has olive-gray, ivory, and dove-gray coloration. There are no marks or planchet issues. As usual, the central reverse eye is softly defined. The legends display minor build-up. Listed on page 80 of the 2009 *Guide Book*. Population: 1 in 55, 5 finer (11/08).
*Ex: Denver Signature (Heritage, 8/2006), lot 97, which realized $3,162.50.*
*From The San Jose Collection of Colonial Coinage.*(#790)

### Near-Mint Silvered Small Size
### Reeded Edge Washington Success Medal

136 **Undated Washington Success Medal, Small Size, Reeded Edge, Silvered AU58 PCGS.** Baker-267B. Scarcer than the non-silvered brass reeded edge variety (Baker-267). A cream-gray example with delicate olive-green tints. Attractive and problem-free with a crisp strike save for the unavoidable softness on the all-seeing eye. Listed on page 80 of the 2009 *Guide Book*. Population: 4 in 58, 1 finer (11/08).(#790)

### Near-Mint Silvered Large Size
### Plain Edge Washington Success Medal

137 **Undated Washington Success Medal, Large Size, Plain Edge, Silvered AU58 PCGS.** Baker-265A. As of (11/08), one of only two silvered plain edge large size success medals certified by PCGS. The Guide Book states, "specimens with original silvering are rare and are valued 20 to 50% higher." The usually encountered die state with a bold crack from 11 o'clock to 3:30 through Washington's hair and nose. The silvering is largely intact, although hints of brassy olive-yellow are present on the cheekbone and all-seeing eye. Listed on page 80 of the 2009 *Guide Book*.(#787)

## HALF CENTS

138 **1793—Corroded—ANACS. VG8 Details.** C-3, B-3, R.3. The obverse of this variety is identified by a small 7 in the date and a low L in LIBERTY. On the reverse, the fraction bar is long and crowded between the ribbons. Medium brown surfaces are moderately porous. An as-made fissure traverses the lower right obverse. EAC 4.(#1000)

## VF Details C-2 1793 Half Cent

139 **1793—Scratched—NCS. VF Details.** C-2, B-2, R.3. Close evaluation beneath a loupe reveals numerous fine obverse pinscratches and a subtle spot above the 9 in the date. The reverse is pleasing aside from some metal loss on the reverse rim near 9:30. The dies are rotated 45 degrees clockwise. Still a sharp example of this single-year introductory type. EAC 8.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#1000)

## Pleasing VF30 1794 Half Cent, C-1, B-1

140 **1794 VF30 PCGS.** C-1, B-1. Holder precludes edge identification, but more likely the scarce Large Letters Edge than the very rare Small Letters Edge variety. Moderately worn with generally smooth chocolate-brown fields, though several apparent abrasions are present on Liberty's well-defined portrait. EAC 15.(#1003)

## Excellent AU50 1794 Half Cent, C-1, B-1

141 **1794 AU50 PCGS.** C-1, B-1. Edge lettering not visible, but more likely the Large Letters variety than the Small Letters. The present example exhibits generally chocolate-brown surfaces with slight deepening at the high points and fragments of caramel at the reverse peripheries. EAC 20. Population: 10 in 50, 61 finer (12/08). (#1003)

142 **1795 Lettered Edge—Scratched—NCS. VF Details.** C-1, B-1, R.2. From the second year of Liberty Cap half cent production, with a new Liberty head design. A couple of shallow scratches are noted on the upper right obverse. Otherwise, this is an evenly worn chocolate-brown example, with few other marks or distractions on either side. EAC 6.(#1009)

## Impressive 1795 C-1, B-1 Half Cent MS62 Brown, Lettered Edge, With Pole

143 **1795 Lettered Edge MS62 Brown NGC.** C-1, B-1, R.2. Manley Die State 2.0 with a bulge through AME. The second year of the Liberty Cap type, but with an entirely different head than appeared in 1794. The basic design is the same, but engraving differences are enough that the 1795 to 1797 half cents should be considered an entirely new design.

Lustrous mahogany surfaces exhibit the usual scattered marks that often accompany high grade pieces, and they are generally attributed to planchet roughness before the coins were struck. The fields are faintly reflective, and retain remnants of original mint red near some devices. This extraordinary piece will be a nice addition to the cabinet of a specialist or a type collector. EAC 50.(#1009)

## Nice 1795 Half Cent Plain Edge VF20, C-4, B-4, Die State 2

144 **1795 Plain Edge VF20 ANACS.** C-4, B-4, R.3. Manley Die State 2.0, which has HALF CENT very softly struck. The "Punctuated Date." Both sides display medium brown patina, and are only lightly marked. Ronald Manley says in his *Half Cent* reference that this variety is usually available in grades of Very Fine or lower. EAC 10.(#1018)

145 **1803 AU58 PCGS.** C-3, B-3, R.1. The date spacing is 180 3. The T in LIBERTY is footless. On the reverse, the Ts are footless, and the lower right serif of F in HALF is missing. A nice mahogany-tan piece with considerable luster, faint wear, and several noticeable marks on each side. EAC 25.(#1060)

146 **1804 Spiked Chin AU50 PCGS.** C-8, B-7, R.1. Manley Die State 3.0 with absent obverse dentils. Predominantly golden-brown with blushes of medium brown on the devices and portions of the reverse field. Impeccably devoid of abrasions or other detractions. EAC 40. Population: 21 in 50, 50 finer (11/08).(#1075)

## Pleasing C-3, B-3 1805 Small 5, Stems Half Cent, VG10

147 **1805 Small 5, Stems VG10 NGC.** C-3, B-3, R.4. The 1805 half cents offer an interesting paradox: while the Small 5, Stems variety is the only one of the *Guide Book* subdivisions to encompass multiple die pairs, the C-2 and C-3 combined are substantially rarer than either the Small 5, No Stems or Large 5, Stems variants. While rated R.4, the 1805 C-3 half cent is an important condition rarity among the small early coppers. Even though more than 100 examples of the variety survive, the finest known is only XF40, and the top six drop to Fine 12. This piece is not far from that Condition Census. Though substantially worn, it is readily pleasing with smooth cherrywood and tan surfaces. Typical weakness at the CE of CENT. EAC 7.(#1087)

## Popular MS62 Brown 1806 Half Cent Small 6, No Stems, C-1, B-3

148 **1806 Small 6, No Stems MS62 Brown PCGS.** C-1, B-3, R.1. The lone die pair for this popular *Guide Book* variety. The "Brown" designation is misleading, since the surfaces show considerable faded copper-orange at the margins as well as a vibrant blend of mahogany and violet-brown patina. Minimally marked with solid detail. EAC 55.(#1093)

## Red and Brown MS63 1806 Half Cent Large 6, Stems, C-4, B-4

149 **1806 Large 6, Stems MS63 Red and Brown PCGS. CAC.** C-4, B-4, R.1. Manley Die State 1.0, scarce, with bold repunching on the 6. Few 1806 half cents have survived the past two centuries with as much remaining mint red as the present piece. Orange-gold illuminates the legends and outlines the devices. The open fields and portrait are medium brown. Carbon is essentially absent, although the obverse has a few minor concealed marks. EAC 60.
*From The James Mossman Collection.*(#1100)

## Luminous C-1, B-1 1807 Half Cent, MS62 Brown

150 **1807 MS62 Brown NGC.** C-1, B-1, R.1. The lone variety for the year. This luminous survivor is minimally marked with rosewood and violet elements that visit otherwise deep brown surfaces. The strike is solid to the right, though slight softness is visible at the central portrait and left wreath. Flowlines from the late die state of this piece impart the distinctive appearance that is typical of most 1807 half cents. As a single variety date, this half cent will be of interest to specialists and date collectors alike, and should be the topic of considerable bidding discussion when it crosses the auction block. EAC 55. Census: 12 in 62 Brown, 2 finer (12/08).
*Ex: William Eckberg Collection.*(#1104)

151 **1809/6 XF45 PCGS.** C-5, B-5, R.1. 9 over inverted 9. Well struck with deep tobacco-brown color on the obverse, and slightly lighter mahogany toning on the reverse. Free of distracting marks, with an area of planchet roughness observed near H, C, and below on the reverse. Typically worn for the grade. EAC 40.(#1126)

152 **1810 AU58 NGC.** C-1, B-1, R.2. The lone variety for the year. High grade half cents of 1810 are elusive in today's numismatic marketplace. Although there are many AU and Mint State coins known, they seldom appear for sale. Only a trace of friction is visible on this well struck half cent's rich rosewood and chocolate surfaces. The reverse is rotated approximately 45 degrees counterclockwise. Weakness at the right side is explained by Ronald Manley in his Half Cent Die State Book: "Typical 1810 C-1 half cents have nonparallel die faces, resulting in a characteristic striking weakness on the right obverse and reverse sides." The planchet of this piece is visually out of round. EAC 50. Census: 3 in 58, 12 finer (12/08).(#1132)

153 **1826 6 over Horizontal 6 AU58 NGC.** C-2, B-2, R.3. An early die state with the repunched date details clearly visible. The scarcer of two varieties for the year, represented here by a well-defined reddish-brown piece. Smooth surfaces show just a touch of friction. The 1826 C-2 half cent is one of the most elusive varieties of the Classic Head type, especially in high grades. EAC 50.
*Ex: William Eckberg Collection.*(#1144)

## Pleasing C-1, B-1 1826 Half Cent, MS65 Brown

154 **1826 MS65 Brown PCGS.** C-1, B-1, R.1. Manley Die State 3.0 is closest, though the reverse is not so extensively clashed as is recorded. This well struck example has a pleasing medium-brown base with elements of orange, violet, and olive present in various places. Surfaces are generally smooth and attractive. EAC 60.(#1144)

## Gem Red and Brown 1828 13 Stars Half Cent, C-3, B-2

155 **1828 13 Stars MS65 Red and Brown PCGS.** C-3, B-2, R.1. Manley Die State 2.0. The right obverse border exhibits mint red, and glimpses of slightly faded red, intermingled with sea-green, are present across portions of the reverse. A minimally abraded Gem with vibrant luster. Crisply struck save for the left-side stars. Encased in an old green label holder. Population: 5 in 65 Red and Brown, 5 finer (all as MS65 Red) (11/08). EAC 55.(#1148)

## Lustrous Red Gem 1833 Half Cent, C-1, B-1

156 **1833 MS65 Red PCGS.** C-1, B-1, R.1. Manley Die State 2.0. Cherry-red is predominant, although the portrait and central reverse display lilac tints. This lustrous Gem has an intricate strike, and is unabraded save for trivial contact on the bust tip. EAC 63. Population: 2 in 65 Red, 0 finer (11/08).
*From The James Mossman Collection.*(#1164)

157 **1835 MS64 Red and Brown NGC.** C-1, B-1, R.1. Manley Die State 2.0. The 5 in the date is lightly repunched. Die clash marks are obvious near Liberty's portrait. A highly lustrous and well struck near-Gem. There are no surface marks, and only scattered carbon flecks limit the grade. Although there is no way to be certain, it is quite possible that this piece survives from a hoard of 1835 half cents that Elmer Sears discovered a century after they were struck. It is said that many of the hoard coins retain considerable original mint red color like this piece. EAC 63.(#1169)

## Fire-Red Gem 1857 Half Cent

158 **1857 MS65 Red PCGS.** C-1, B-1, R.2, the sole dies. The pumpkin-gold color is remarkably consistent for a copper coin past its sesquicentennial. Only a hint of mellowing is present, mostly on the central reverse field. The strike is crisp, carbon is minor, and careful rotation yields only trivial surface grazes. Condition Census quality. A low mintage date, since the denomination ceased production relatively early in 1857. Both the half cent and large cent were replaced by the small cent, since the large diameter copper coins cost more than their face value to produce. EAC 64. Population: 2 in 65 Red, 0 finer (11/08).
*From The James Mossman Collection.*(#1241)

## PROOF CLASSIC HEAD HALF CENTS

### Attractive C-2, B-2 1835 Half Cent PR64 Red and Brown

159 **1835 PR64 Red and Brown NGC.** C-2, B-2, R.6 as a proof. Die State I, with no trace of a crack through the ICA in AMERICA. The 1839 was the last half cent issue for which both proofs and business strikes were coined until 1849, and this is similarly the last die pair to see use for both purposes until the latter date. This attractive specimen striking shows generally violet-brown centers with considerable faded reddish-orange at the margins and on the reverse, unusual for this older copper issue. Pleasingly detailed with only a handful of largely inconsequential hairlines visible in the fields. EAC PR63.(#1205)

### PR62 Brown 1836 Half Cent, B-1
### Original Striking, Large Berries

160 **1836 Original PR62 Brown NGC.** Large Berries. B-1, Low R.6. Richly toned in sea-green, plum-red, and navy-blue. A crisply struck specimen that has an unabraded reverse and a smooth portrait. The obverse field has only minor contact. 1836 ends a six-year run of Classic Head proof half cents. The proof series resumes in 1840 with the Braided Hair type. EAC PR50. Census: 4 in 62 Brown, 10 finer (11/08).
*From The Findley Collection.*(#1207)

## PROOF BRAIDED HAIR HALF CENTS

### Choice Proof First Restrike
### 1852 Half Cent, Small Berries, B-2

161 **1852 Restrike, Small Berries PR64 Brown PCGS.** B-2, R.5. Breen's First Restrike with a double T in CENT. A precisely struck Choice proof that displays iridescent sea-green, cherry-red, and electric-blue shades when the piece is rotated beneath a light. Well preserved despite a faint graze above HALF. A struck-in thread from star 2 to the neck may help future pedigree researchers. EAC PR60. Population: 14 in 64 Brown, 6 finer (11/08).(#1317)

### Scarce, Low-Mintage 1857 Half Cent, PR64 Brown, B-2

162 **1857 PR64 Brown PCGS.** B-2, R.4. This variety was produced using what Breen refers to as "Reverse C of 1856," and it is most easily identifiable by doubling on the T in CENT. All proof half cents are rare, and the final-year 1857 is no exception. Attractive and original, the present specimen reveals mottled electric-blue, gold, and orange-apricot colors beneath dominant copper-brown toning. Both sides are sharply struck with no outwardly distracting blemishes. A few wispy contact marks at the top of Liberty's portrait, nevertheless, are mentioned for pedigree purposes. Certified in an old-style green label PCGS holder. EAC PR60. Population: 16 in 64 Brown, 2 finer (11/08).(#1332)

## LARGE CENTS

### VF Sharpness 1793 Chain Cent
### Famous Sheldon-1 AMERI. Reverse

163 **1793 Chain AMERI.—Rim Damage—NCS. VF Details.** S-1, B-1, R.4. The cent was the first denomination struck by the fledgling first Philadelphia Mint, and the AMERI. variety was the first cent issue. Thus, the Sheldon-1 AMERI. cent is the first die variety and the first issue of any denomination struck for circulation by the U.S. Mint. As such, its historical importance is significant. Perhaps the majority of survivors are sufficiently worn that the AMERI. legend is indistinct. The present piece, however, has bold legends and pleasing detail on the portrait. The chain, of course, is well defined. The rims display a series of minor to moderate bruises, but the tan-brown surfaces lack verdigris or obtrusive marks. Two tiny planchet voids are noted, beneath the chin and to the right of the date. EAC 6.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#1340)

## Pleasing Good 1793 Chain Cent Periods, S-4, B-5

164 **1793 Chain Periods Good 4 PCGS.** S-4, B-5, R.3. Though the date is nearly worn smooth, the period after the Y in LIBERTY is bold, confirming the variety. Generally doeskin-brown surfaces show areas of fresher copper-gold near the margins, especially where rim bumps occur. The mildly abraded reverse shows a degree of peripheral weakness, but the chain remains bold. EAC 3.(#91342)

## Interesting VF35 Details S-2, B-2 1793 Chain Cent

165 **1793 Chain AMERICA—Corroded—ANACS. VF35 Details.** S-2, B-2, High R.4. Deep olive-brown surfaces show light to moderate wear across each side, as well as a degree of fine corrosion. While the obverse is softly struck, the Chain reverse is bold, and aside from the aforementioned corrosion and a few small digs at the margins, the reverse displays attractively. EAC 12.(#1341)

166 **1793 Wreath Cent, Vine and Bars—Obverse Damage—NCS. Fine Details.** S-9, B-12, R.2. Dark olive surfaces show slight evidence of corrosion on both sides. The obverse damage is nothing more than a few tiny punch marks that are hardly significant. EAC 5.(#1347)

## Pleasing Fine 1793 Wreath Cent Vine and Bars Edge, S-8, B-13

167 **1793 Wreath Cent, Vine and Bars Fine 12 PCGS.** S-8, B-13, R.3. This variety, though scarce in an absolute sense, is actually one of the more available Wreath cent die pairs. The present example has deep violet-brown surfaces that show occasional scattered abrasions. For the grade, the central devices retain excellent definition. EAC 8.(#1347)

## Fine Details S-6, B-7 1793 Wreath Cent, Vine and Bars Edge

168 **1793 Wreath Cent, Vine and Bars—Rim Damage—NCS. Fine Details.** S-6, B-7, R.3. The rims have a few unimportant dings, most apparent between 3 and 6 o'clock on the obverse and 5 to 7 o'clock on the reverse. However, there are no other marks remotely worthy of comment, and the piece is free from corrosion. The bulge on the left obverse field is as made and characteristic of the variety. The medium brown surfaces exhibit olive and rose hues. EAC 6.(#1347)

## VF Details 1793 Wreath Cent, S-8, B-13

169 **1793 Wreath Cent, Vine and Bars—Corroded—ANACS. VF Details, Net Fine 12.** S-8, B-13, R.3. Dark lavender, steel-blue, and olive-green encompass this well detailed Wreath cent. Both sides are evenly granular once viewed beneath a loupe, but there are no scratches or hairlines. An important first year, single year type. EAC 8.(#1347)

## 1793 Wreath Cent, VF Details S-5, B-6, Vine and Bars Edge

170 **1793 Wreath Cent, Vine and Bars—Environmental Damage—NCS. VF Details.** S-5, B-6, R.4. A lightly and evenly granular example of this eagerly pursued first-year cent type. The obverse rim has minor dings near 5 and 10 o'clock, but the legends are bold and the types are clear. EAC 8.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#1347)

## Pleasing VF 1793 Wreath Cent
## Vine and Bars, S-6, B-7

171 **1793 Wreath Cent, Vine and Bars VF20 PCGS.** S-6, B-7, R.3. A pleasing mid-range representative of this scarce die pairing. Each side shows minor rim crumbling and a degree of wear across the upper parts of the design. Solidly detailed in the shallow areas with few marks for the grade, though a minor rim bump appears above and to the left of the L in LIBERTY. EAC 10.(#1347)

## Scarce 1793 Wreath, Vine, and Bars Cent
## VF30, S-8, B-13

172 **1793 Wreath, Vine and Bars, VF30 PCGS.** S-8, B-13, R.3. Tall 7 in the date. All three leaves arise from a nearly horizontal, slightly curved twig, extending across the tops of 7 and 9 to near the corner of the 3. The reverse shows a triangular bow, which is concave at the top. A diagonal die crack bisects the reverse center. This is the second major design type of this date, with a redesigned head of Liberty on the obverse and a wreath replacing the infamous chain on the reverse. The edge is decorated with an irregular vine and bar design. This example reveals deep chocolate-brown coloration across the two sides, along with fairly strong violet undertones. The obverse displays a few faint adjustment marks near the periphery, while the reverse has a rather deep scratch, extending from the lower left rim between N and I of UNITED, across the intervening leaves and the wreath bow. A significant example of this scarce early date and variety. EAC 20.(#1347)

## 1793 Wreath Cent, Lettered Edge
## VF20, S-11b, B-16b

173 **1793 Wreath Cent, Lettered Edge VF20 ANACS.** S-11b, B-16b, R.4. The left leaf points straight upward toward the E in LIBERTY, and the fraction is at the extreme right of the space between the ribbons. Medium brown surfaces exhibit relatively nice design feature detail, except for the usual weakness in ONE CENT. A couple of rim bruises are noted on each side. EAC 10.(#1350)

## Charming Choice VF 1794 Cent
## Head of 1794, S-22, B-6

174 **1794 Head of 1794 VF35 PCGS.** S-22, B-6, R.1. This variety's easy availability makes it popular with early copper type collectors. This glossy walnut-brown example, though a VF by level of wear, is minimally marked with considerable pleasing luster that graces the reverse. Strong definition for the grade and eye appeal to match. EAC 20.(#901374)

## Pleasing 1794 Cent, XF40
## Head of 1794, S-21, B-5

175 **1794 Head of 1794 XF40 PCGS.** S-21, B-5, R.3. Light but distinct wear is present at the high points of the medium chocolate-brown devices. Scattered abrasions are present on each side, including several on and near the portrait. Still, interesting eye appeal for this second-year large cent issue. EAC 20.(#901374)

### Elegant XF40 1794 Head of 1794 Cent, S-57, B-55

176 **1794 Head of 1794 XF40 PCGS.** S-57, B-55, R.1. This long-lasting die pair has proved a durable collector favorite. Slight color variations from mushroom-brown to cherrywood add interest to each side. Though a handful of tiny digs and other marks are present in the fields, the focal areas of the central devices are largely abrasion-free. EAC 30.(#901374)

### Noteworthy XF 1794 Cent Head of 1794, S-42, B-29

177 **1794 Head of 1794 XF40 PCGS.** S-42, B-29, R.4. Slightly shifted on the flan with uneven dentilation noted on the reverse. Strong overall design definition with wear concentrated at only a few spots on the wreath and in Liberty's hair. Modestly marked for the grade assigned with pleasingly smooth medium-brown surfaces. EAC 30.(#901374)

### XF Sheldon-44 1794 Cent, Head of 1794

178 **1794 Head of 1794 XF40 ANACS.** S-44, B-33, R.1. A well detailed example that possesses traces of luster within protected regions. Generally medium brown, although the reverse has a few blushes of mildly granular steel-blue surface. A straight, heavy die crack from the N in ONE to 12:30 identifies this variety. The reverse has a lighter but longer crack between 6 and 9 o'clock. EAC 20.(#901374)

### Bold XF 1794 Cent Head of 1794, S-31

179 **1794 Head of 1794 XF40 PCGS.** S-31, B-13, R.1. This medium brown example has smooth surfaces and pleasing definition. Verdigris is nearly absent, and the only remotely mentionable mark is a faded and curved line on Liberty's cheek. Glimpses of luster emerge from protected areas. An exceptional example of this popular early copper type. EAC 30.
*Ex: Denver Signature (Heritage, 8/2006), lot 148.*(#901374)

180 **1794 Head of 1794 XF40 PCGS.** S-58, B-56, R.3. Low date. Right ribbon end high, thin, pointed. Even charcoal coloration with silver-grayish accents on the highpoints. Well centered and lightly worn, with few marks. EAC 20.(#901374)

### AU Sharpness 1794 Cent S-21, Head of 1794

181 **1794 Head of 1794—Corroded—NCS. AU Details.** S-21, B-5, R.3. The first of the Head of 1794 cent die varieties, attributed by the die break between the cap and the B in LIBERTY. A mildly granular piece with medium brown toning and a few small pits near the date and the LI in LIBERTY. Splendidly detailed, and vastly superior to the usual worn and corroded example. EAC 25.(#901374)

### Attractive AU53 Details 1794 Cent Head of 1794, S-21, B-5

182 **1794 Head of 1794—Corroded, Cleaned—ICG. AU53 Details.** S-21, B-5, R.3. Excellent strike and solid remaining detail. Though the chocolate-brown surfaces show fine granularity from corrosion, as well as faint hairlines from a possible attempt to remove said corrosion, this is a pleasing example of its scarce die variety nonetheless. EAC 30.(#901374)

## Chocolate-Brown 1794 Cent Head of 1794, S-30, B-12

183 **1794 Head of 1794 AU53 PCGS. CAC.** S-30, B-12, R.1. Breen Die State IV. The familiar "First Marred Field" variety, with a die lump beneath the cap, and various clashes and cracks elsewhere. A lovely chocolate-brown cent with problem-free surfaces and pleasing sharpness within Liberty's hair. A desirable late state S-30. EAC 40.
*From The James Mossman Collection.*(#901374)

## Splendid Choice AU S-22, B-6 1794 Cent, Head of 1794

184 **1794 Head of 1794 AU55 PCGS.** S-22, B-6, R.1. Breen Die State V with die crumbling near UNITED. A lovely chocolate-brown cent with pleasantly smooth fields and only light friction on Liberty's hair and forehead. Brief, thin marks east of the pole and between the ES in STATES will identify this example. A lovely example of the popular "Mounds Reverse" variety. EAC 40.
*Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 78, which realized $8,050.*(#901374)

185 **1795 Plain Edge—Corroded—NCS. Fine Details.** S-78, B-8, R.1. LIBERTY and the date are closely spaced. A charcoal-brown example with light corrosion over both sides. The obverse shows more remaining detail than the reverse. EAC 5.(#1380)

## Pleasing Plain Edge 1795 Cent, S-78, B-8, AU50

186 **1795 Plain Edge AU50 NGC.** S-78, B-8, R.1. Along with the S-76b, one of the two most readily available 1795 Plain Edge cent varieties and among the most popular with type collectors. This softly struck example has smooth violet-brown and cherrywood surfaces that show only a handful of trivial faults. EAC 30.(#1380)

## Indented, Double Struck in Collar AU55 1795 Plain Edge Cent, S-78, B-8

187 **1795 Plain Edge—Double Struck in Collar & Indented—AU55 PCGS.** S-78, B-8, R.1. This cent shifted or rotated slightly between its two strikes. Liberty has a double profile, and the back of the cap is also doubled, with the fainter impression from the initial strike. The second strike has a straight indent near the obverse rim between 7 and 9 o'clock. Apparently, the shift of the coin between strikes brought a portion of the piece against a portion of the press, although no such indent is seen on the rotated double struck Robinson example (*Breen Cent Encyclopedia*, page 256). An early owner must have appreciated the unique look of this coin, since it has a whisper of wear, and the medium brown surfaces are problem-free. EAC 45.(#1380)

## 1796 S-87, B-8 Liberty Cap Cent VF20

188 **1796 Liberty Cap VF20 NGC.** S-87, B-8, R.3. A richly defined medium brown example. The majority of the dentils are present and Liberty's back hair tresses are separated. The only relevant abrasions are proximate to the M in AMERICA, the E in LIBERTY, the T in CENT, and the 1s in the fraction. EAC 12.
*Ex: Palm Beach Signature (Heritage, 11/2004), lot 5097; FUN Signature (Heritage, 1/2007), lot 361.*(#1392)

## Charming XF S-81, B-2 1796 Liberty Cap Cent

189 **1796 Liberty Cap XF40 NGC.** S-81, B-2, R.3. An attractive two-tone example with dark steel brown surfaces and lighter brown color on the devices. An early die state of this variety with no evidence of the usually seen bulge in the left obverse field. Much better than usually seen of this variety, and near Census level. EAC 30.
*Ex: Repman (6/22/1971); Jules Reiver Collection (Heritage, 1/2006), lot 19254.*(#1392)

## XF 1796 Liberty Cap Cent, S-91, B-3

190 **1796 Liberty Cap XF40 PCGS.** S-91, B-1, R.3. A richly defined walnut-brown example from the final year of the Liberty Cap design. There are no noticeable marks, and despite intermittent minor granularity along the obverse periphery, the eye appeal is attractive. EAC 20. Population: 5 in 40, 31 finer (11/08).(#1392)

## XF Definition 1796 Cent, S-81, B-2

191 **1796 Liberty Cap—Corroded—NCS. XF Details.** S-81, B-2, R.3. A die scratch between the NI in UNITED confirms the variety. Somewhat granular on the obverse border between 6 and 9 o'clock, and the EN in CENT is softly impressed and has a few nearby marks. Otherwise, this steel-gray cent is impressive, and retains glimpses of luster within the hair, wreath, and legends. EAC 20.(#1392)

192 **1796 Draped Bust, Reverse of 1795—Corroded—NCS. VF Details.** S-97, B-20, R.3. Clearly identifiable as Sheldon-97, with the 7 and 6 in the date high, and four berries on each branch on the reverse. Noticeably corroded on both sides. EAC 8.(#1401)

193 **1796 Draped Bust, Reverse of 1794 VF20 NGC.** S-110, R.3. The last two figures of the date are very close and connected by a crack, and there is a small lump under the E of UNITED. This is a nicely defined VF, with medium brown patination covering both sides, each of which is quite smooth and devoid of significant marks. EAC 12. Census: 3 in 20, 1 finer (11/08).
*From The Martin L. Diffenbaucher, Jr. Collection.*(#1404)

## AU55 Details S-108, B-12 1796 Cent
## Ex: Robinson, Whitney, Husak

194 **1796 Draped Bust, Reverse of 1794—Corroded—ANACS. AU55 Details.** S-108, B-12, R.4. The latest recorded die state for the variety. The obverse is cracked from the left border to the lower curls, through 96 and the drapery into the right field, from the end of this crack up to the nose, and from the other end of this crack between 96, up across the shoulder, and into the hair curls. The reverse is lapped with the right branch separated from the ribbon knot. This piece is moderately granular and has glimpses of gray verdigris on each side, yet it retains good eye appeal due to its sharpness and absence of marks. EAC 25.
*Ex: Purchased unattributed (7/1985) by Jack H. Robinson (Superior, 1/1989), lot 196, $1,980; Jack H. Beymer; Anthony Terranova (4/1989); John Whitney (Stack's, 5/1999), lot 1743, $3,737.50; Anthony Terranova; Early American Coppers (2002), lot 208, $1,700; Chris Victor-McCawley; Walter Husak Collection (Heritage, 2/2008), lot 2109, $3,450.*(#1404)

195 **1796 Draped Bust, Reverse of 1794—Whizzed—ICG. AU55 Details.** S-110, B-16, R.3. The left sides of L and I are recut. Die chips reside near Liberty's throat; and broad die cracks appear through the date, above TY, into the right obverse field, etc. On the reverse, a large die lump is joined to the lower edge of E in UNITED. Some of the surface areas have been "whizzed", in order to minimize abrasions. EAC 25.(#1404)

## Double Struck 1797 Cent, S-140, B-22
## Partial Obverse Brockage
## Reverse of 1797, Stems, Fine 12

196 **1797 Reverse of 1797, Stems—Double Struck with Partial Brockage Obverse—Fine 12 PCGS.** S-140, B-22, R.1. The first strike was uncentered toward 12 o'clock on a slightly oversized and oval-shaped planchet. The second strike was uniface reverse and off center toward 7 o'clock, relative to the reverse. The second strike is partial, only a 20% impression from the reverse die, since a planchet (not included) rested at an angle over the present piece at the time of the second strike. Choice surfaces for the grade with pleasing steel brown color. Several errors are known among cents of this date; however, we are not sure any could be more important than this. EAC 12.
*Ex: Pittsburgh Signature (Heritage, 8/2004), lot 8282, which realized $2,415.*(#1422)

## Elusive S-134, B-4 1797 Cent, VF35
## Reverse of 1797, Stems

197 **1797 Reverse of 1797, Stems VF35 PCGS.** S-134, B-4, R.4. On the walnut-brown and mahogany-violet reverse, an extensive die crack blots out much of the E in AMERICA. An attractive Choice VF representative of this very scarce variety, one that shows surprisingly little wear save at the high points of the devices. EAC 20.(#1422)

## Scarce 1797 Reverse of 1797 Cent
## Stems, S-126, B-16, XF45

198 **1797 Reverse of 1797, Stems XF45 PCGS.** S-126, B-16, R.3. With prominent die crack from Liberty's neck to the right obverse rim. Excellent striking definition on the portrait with only light, even wear across the chocolate-brown surfaces. More typical weakness is visible within the reverse wreath. Still, a pleasing coin. For the design when not attributed by variety, Population: 11 in 45, 72 finer (12/08). EAC 30.(#1422)

199 **1797 Reverse of 1797, Stems—Cleaned—ICG. XF45 Details.** S-140, B-22, R.1. The B in LIBERTY is missing its upper left serif; and the top right serif of T is separated from the upright, possibly by die polish. Die scratches extend from the ends of the fraction bar and the left stem. This charcoal-brown example is lightly worn with few marks on either side. There are no clear indications of improper cleaning. EAC 20.(#1422)

200 **1797 Reverse of 1797, Stems—Cleaned—ICG. AU50 Details.** S-138, B-20, R.1. This variety features a diagnostic bulge on the upper right portion of the reverse. Medium tan-brown color, a die crack extends from the bottom of Y into the middle of the right obverse field. Attractive and free of severe marks. EAC 20.(#1422)

201 **1798 First Hair Style VF35 ICG.** S-161b, B-22, R.2. Dies 17-P. An attractive Choice VF example of this First Hair Style variety. Faint granularity is noted in some of the obverse fields, and an arc of dark coloration (possibly a mint-made grease streak) is located at 6 o'clock on the lower reverse border. EAC 20.(#1431)

202 **1798 First Hair Style—Corroded—ICG. XF45 Details.** S-145, B-2, R.3. Dies 1-B. The design elements are well centered on the planchet and mostly bold, although ONE CENT is noticeably weak. Die rust is evident beneath LIBERTY and the date. The dark-brown surfaces are porous from light corrosion. EAC 15.(#1431)

203 **1798 First Hair Style—Scratched—ICG. XF45 Details.** S-158b, B-17, R.4. Dies 16-M. An attractive charcoal-brown example of this Sheldon variety, from a later die state with a prominent die break on the reverse: from the rim through T in UNITED, the wreath, the lower right foot of A, and T2 in STATES to the rim above. A shallow scratch extends diagonally over the reverse center, extending through the upper crossbar of E and the left side of N in CENT. EAC 20.(#1431)

## Condition Census 1798 S-164, B-20 Cent, AU53

204 **1798 First Hair Style AU53 PCGS.** S-164, B-20, R.4. Breen Die State II, with minor obverse die bulges. Splendid medium brown surfaces with some areas of darker patina on both sides. A few minor abrasions are evident but mostly nondistracting. Graded XF40 and ranked sixth finest known for the variety, per Bill Noyes. Unlisted in Del Bland's Census. EAC 40.
*Ex: Homer Downing (New Netherlands, 8/1952), lot 1813; Harold Bareford; Herman Halpern (Stack's, 3/1988), lot 151; J.R. Frankenfield (Superior, 2001), lot 409.*(#1431)

205 **1798 Second Hair Style VF35 NGC.** S-167, B-33, R.1. Breen Die State VI. This medium brown Draped Bust cent has impressive detail on the portrait and wreath. A good strike save for some softness on OF. Mildly granular, partly due to the late die state. EAC 20.(#1434)

206 **1798 Second Hair Style XF40 NGC.** Ex: Jules Reiver Collection. S-179, B-37, R.2. Die State II. This die marriage pairs the "high 98" obverse with the "blundered E" reverse. A die crack rises from atop Liberty's hair to between IB and a die chip in the field below L. This lovely coin is medium-brown with pewter highlights. The upper rims are a bit weak on both sides, but the strike is robust and there are minimal marks to quibble about. EAC 30.
*Ex: George Ramont (9/20/1969); Jules Reiver Collection (Heritage, 1/2006), lot 19423.*(#1434)

## Scarce XF 1798 Cent
## S-187, B-40, Second Hair Style
## Ex: Jules Reiver

207 **1798 Second Hair Style XF40 NGC.** Ex: Jules Reiver Collection. S-187, B-40, R.1. Smooth dark brown surfaces with a minor rim bruise left of the date, but no other imperfections, aside from the usual minor marks that result from its intended use. This is a relatively early die state. The obverse has a readily visible branch crack from the main crack down to the border at 4 o'clock. The reverse has two die cracks through CA, one through the bases, and the other through the tops and continuing toward the final 0 of the denominator. The reverse is rotated slightly counterclockwise. EAC 30.
*Ex: Jules Reiver Collection (Heritage, 1/2006), lot 19439.*(#1434)

208 **1798 Second Hair Style XF40 ICG.** S-172a, B-34, R.2. This die marriage is attributed by the repunched 7 in the date, and the boldly repunched M in AMERICA. This is an appealing olive-brown example with even wear on the highpoints of the design, and a few faint marks in the right obverse field. EAC 30.(#1434)

209 **1798 Second Hair Style XF40 ICG.** S-166, B-32, R.1. The thick die crack from ED through the last 0 in the denominator is diagnostic for the die marriage. This is a somewhat glossy chocolate-brown example which is boldly struck overall, save for partial weakness on the upper portions of some peripheral lettering. EAC 30.(#1434)

210 **1798 Second Hair Style XF40 ICG.** S-185, B-46, R.2. Die State VIII. Die chips are noted at RT and 7; a thick die crack extends from the obverse rim near 4 o'clock to the junction of Liberty's jaw and throat, then upwards to the base of B. On the reverse, the fraction bar is longer than usual, and placed too far right; a heavy rim break resides directly above I in AMERICA. Heavy clash marks appear on the upper right obverse, and on the upper right reverse. A dark chocolate-brown example with even wear and few abrasions on either side. EAC 25.(#1434)

## Choice XF 1798 Cent
## S-170, B-29 Second Hair Style

211 **1798 Second Hair Style XF45 NGC.** S-170, B-29, R.3. This well detailed example is principally chocolate-brown, although slightly deeper toning is seen left of the C in CENT. Close inspection locates a couple of subtle gray spots and a few small ticks on the nose and right obverse field. Elusive in problem-free VF and better grades. EAC 20.(#1434)

212 **1798 Second Hair Style—Corroded, Cleaned—ICG. XF45 Details.** S-184, B-45, R.1. The date shows a tall 7 with a die lump above and to the left. A die crack from the second A in AMERICA extends through the right ribbon. The deep red-brown surfaces exhibit minor corrosion and slight granularity from an old cleaning. EAC 30.(#1434)

213 **1798 Second Hair Style—Corroded—ICG. AU50 Details.** S-173b, B-38, R.3. A prominent die break covers the tops of RT and the left top branch of Y in LIBERTY. A charcoal-brown example with some darker charcoal splotches, representing corrosion, on the obverse fields. Boldly struck and lacking any noteworthy abrasions on either side. EAC 30.(#1434)

## Bold S-184, B-45 1798 Cent AU53

214 **1798 Second Hair Style AU53 NGC.** S-184, B-45, R.1. The die scratch through the right ribbon end aids identification of this Draped Bust variety. A planchet cutter left a curve near the obverse border between 6 and 8 o'clock, as made and technically a mint error. Satin luster shimmers across the devices on this dusky deep brown cent. The lower right obverse quadrant has minor contact, and the C in AMERICA has subtle gray spots. Struck from a clashed reverse die. EAC 40.(#1434)

## Popular S-188, B-2 1799/8 Cent, VF20 Details

215 **1799/8—Corroded—ANACS. VF20 Details.** S-188, B-2, R.4. Scarcer than the normal date S-189, and a key (along with the 1793) to a date collection of large cents. All letters are legible aside from the O in OF, and Liberty has substantial hair and eye detail. The dark brown surfaces are consistently granular, but the only relevant mark is a subdued obverse pinscratch near 4 o'clock. EAC 8.(#1446)

## Interesting Good Details 1799 Cent, S-189, B-3

216 **1799—Corroded—NCS. Good Details.** S-189, B-3, R.2. The 1799 cent is among the most pursued dates in the large cent series, and the present piece, though substantially worn with moderate corrosion on the chocolate-brown surfaces, is a readily collectible survivor that offers a way to own this issue to the collector on a tighter budget. Moderate abrasions are visible on and near the portrait. EAC 3. *From The Martin L. Diffenbaucher, Jr. Collection.*(#1443)

### Choice XF S-209, B-23 1800 Cent From the Wes Rasmussen Collection

217 **1800 XF45 NGC.** Ex: Rasmussen. S-209, B-23, R.3. Die State V. The obverse die appears to have a slight projection down from the lowest lock of hair, between the hair curl and the point of the digit 1. Struck from an intermediate die state with prominent clash marks on the obverse. The quality is well above average, especially for an 1800 cent, with attractive olive-brown coloration, intermingled with golden-brown on the obverse. A few moderate abrasions are noted along the obverse periphery. EAC 40.
*Ex: McLaughlin and Robinson Coins, Inc. Auction (6/86), lot 392; Wes Rasmussen Collection (Heritage, 1/2005), lot 3245, which realized $2,760.*(#1449)

### Pleasing S-212, B-20 1800 Cent, AU53

218 **1800 AU53 PCGS.** S-212, B-20, R.3. The sole appearance of both the obverse and reverse dies for the year. Both sides are well-defined with deep brown surfaces that show extensive violet overtones. Though light wear is present on the smooth devices, this is largely restricted to the high points. EAC 40.(#1449)

219 **1800—Cleaned—ICG. AU53 Details.** S-197, B-12, R.1. The "18Q0" variety. Large die chips are noted inside of the first 0, and immediately beneath the second 0 in the date. A heavy, V-shaped die break is also noted near IB. This piece has strong details on each side, and minimal indications of improper cleaning. EAC 45.(#1449)

### Scarce S-194, B-8 1800 Cent, XF45 80 Over 79, Style Two Hair

220 **1800 80 Over 79, Style Two Hair XF45 PCGS.** S-194, B-8, R.3. From an advanced die state with substantial breaks or "cuds" at the lower right reverse rim. Deep violet-brown coloration appears uniform head-on, but tilting under a light reveals an interesting dappled pattern. Overall, a great representative of this scarce die pair. EAC 30.(#1455)

221 **1800/79—Corroded—ICG. AU55 Details.** S-196, B-10, R.1. Dies 4-G. The crossbar of a previous 7 is noted over the top of 8, and the outline of a previous 9 is easily seen within the first 0 in the date. A charcoal-brown piece with excellent details and the nearly complete absence of any surface marks. Light corrosion covers both sides. EAC 40.(#1455)

222 **1801 XF40 ICG.** S-222, B-16, R.1. Straight low date. 1 and 00 in the denomination are spaced apart. A pleasing example with charcoal-brown coloration and a few scattered marks. The upper 1 in the denomination and the NT in CENT are softly struck. EAC 30.(#1458)

223 **1801—Corroded—ICG. AU53 Details.** S-224, B-13, R.1. The date is evenly curved with blunt 1s. The denominator is spaced "1 00". There is a large die break or cud noted on the right reverse rim, between 3 and 4 o'clock. The Details grade for this coin actually seems conservative, as the piece looks like a strong AU58. There is only light corrosion noted on each side. EAC 45.(#1458)

### Appealing S-216, B-6 1801 Cent, AU55

224 **1801 AU55 PCGS.** S-216, B-6, R.1. A pleasing, briefly circulated example of this more available die pair, ideal for the numismatist collecting large cents by *Guide Book* variety. Both sides have attractive violet-walnut patina, with the reverse slightly deeper in color than the obverse. Well struck save for the OF on the reverse, which is nearly invisible. EAC 45.(#1458)

225 **1802 XF40 PCGS.** S-237, B-10, R.2. This variety has the widest date and the largest reverse berries of any 1802 die marriage. This XF example shows pleasingly smooth surfaces that are evenly worn across the highpoints. Deep violet-brown coloration covers both sides. EAC 30.(#1470)

### Attractive AU S-227, B-5 1802 Cent

226 **1802 AU50 PCGS.** S-227, B-5, R.2. A fundamentally appealing representative of this popular Draped Bust large cent issue, generally dusky violet-brown with a stripe of deeper color visible at Liberty's neck and extending parallel to the slope of the bust. Well struck with light wear largely confined to the high points. EAC 45.(#1470)

227 **1802—Damaged, Cleaned—ICG. AU50 Details.** S-232, B-12, R.1. This is a surprisingly nice example, considering the impaired assessment by ICG. Without magnification the coin appears to easily be an AU55 or AU58 piece, with rich red-brown coloration and smooth surfaces. Under low magnification, several digs are noted near N in ONE (this is the "damage"). There are no obvious signs of improper cleaning, however. EAC 40.(#1470)

## Beautiful S-231, B-9 1802 No Stems Cent, XF45

228 **1802 No Stems XF45 PCGS.** S-231, B-9, R.1. One of just two die pairs for this popular *Guide Book* variety, the two of roughly equal rarity. Subtle lavender overtones embrace otherwise chocolate-brown surfaces that show few marks. Wear is largely confined to the high points of the well-defined central devices. EAC 35.(#1476)

229 **1802 No Stems AU50 ICG. ICG has incorrectly attributed this as a 1/000 variety.** S-241, B-20, R.1. Double fraction bar, widely repunched second S in STATES. The glossy surfaces have two tone chocolate-brown and lilac patina. Light rub on Liberty's shoulder and on the leaves in the wreath. Scattered tiny contact marks do not significantly affect the eye appeal. EAC40.
*Ex: Long Beach Signature (Heritage, 2/2003), lot 5105; FUN Signature (Heritage, 1/2005), lot 7060.*(#1476)

## Surprising 1802 No Stems Cent, Obverse Misaligned Die S-231, B-9, AU55

230 **1802 No Stems—Obverse Misaligned Die With Indent—AU55 NGC.** S-231, B-9, R.1. The reverse of this piece appears virtually normal with only a few patches of tan at the high points of the otherwise deep brown surfaces. The obverse, by contrast, shows die misalignment toward 9 o'clock, as well as a substantial indent below the bust and to the right of the date. Fascinating and desirable. EAC 25.(#1476)

231 **1803 Small Date, Small Fraction, XF40 PCGS.** S-256, B-15, R.3. E in LIBERTY is low and close to R. Corner of 3 just touches the drapery and, 1 in the date leans right more than does 8. On the reverse, there is a spur out from the dentil between UN, and smaller spurs from the dentils near STA. This is an attractive chocolate-brown representative with few noticeable marks on either side. Struck from slightly misaligned dies with the obverse dentils missing from approximately 8:30 to 1:00. EAC 35.(#1482)

## Captivating AU50 1803 Large Cent Small Date, Small Fraction, S-250, B-10

232 **1803 Small Date, Small Fraction AU50 PCGS.** S-250, B-10, R.3. Well struck with a certain elegance to the eye appeal. Minimally marked chocolate-brown surfaces show occasional suggestions of lighter peach and violet patination on the reverse. An interesting and attractive representative of this scarce die pairing. EAC 45.(#1482)

233 **1803 Small Date, Small Fraction—Cleaned—ICG. AU53 Details.** S-251, B-8, R.2. 1 and 8 in the date are much closer than 03. The fraction bar is the shortest of any 1803 cent variety. Well produced with few marks and rich chocolate-brown surfaces. Slight haziness and milky-green color on the reverse are indications of harsh cleaning. EAC 40.(#1482)

## Exquisite Near-Mint 1803 Cent Small Date, Small Fraction, S-253, B-12

234 **1803 Small Date, Small Fraction, AU58 NGC.** S-253, B-12, R.2. Die State IV. This is the "Period Variety" among 1803 large cents with a small raised die dot immediately after the final 0 of the denominator. On this example, the "period" is rather faint yet fully visible. Chestnut brown and lighter tan color with just a few small splashes of darker steel toning. Slight olive coloration highlights the devices. Just a few minor surface marks are present, mostly on the obverse. The reverse has traces of reddish patina within the wreath. Traces of faded mint red are hidden within the leaves of the wreath and around other devices. EAC 45.
*Ex: Hollinbeck Stamp & Coin Co. (3/53), lot 25; Norweb Collection (Bowers and Merena, 11/88), lot 2822; Wes Rasmussen Collection (Heritage, 1/2005), lot 3305.*(#1482)

## Desirable 1803 Large Cent, AU50
## Small Date, Large Fraction, S-261, B-20

235 **1803 Small Date, Large Fraction AU50 PCGS.** S-261, B-20, R.2. Both sides exhibit subtle interplay between the deep walnut-brown and violet-cherrywood elements that characterize the smooth surfaces. Well-defined and minimally abraded with most wear concentrated and isolated on the high points. Intangibles rate highly for this coin. EAC 35.(#1485)

## Interesting 1803 Small Date, Large Fraction Cent
## S-260, B-19, AU55

236 **1803 Small Date, Large Fraction AU55 PCGS.** S-260, B-19, R.1. The obverse is primarily cinnamon-brown with small dots of deeper violet patina around the letters of LIBERTY, while the reverse shows slightly deeper coloration with ample steel-blue elements at the margins. Minimally marked and well struck overall, though the left wreath is a trifle soft. EAC 45.(#1485)

## Lustrous 1803 S-258, B-17 Cent, MS63 Brown

237 **1803 Small Date, Large Fraction MS63 Brown PCGS.** S-258, B-17, R.1. Breen Die State IV, the latest die state he recorded, with faint bulges at the lower left obverse. Although a few minor surface marks are evident on each side, the overall appearance is excellent, with considerable faded mint luster on frosty medium brown surfaces with splashes of darker toning. EAC 55.
*Ex: Chris Victor-McCawley (privately, 7/2003).*(#1485)

## Middle State 1803 S-243, B-1 No Stems Cent, AU58

238 **1803 No Stems AU58 PCGS.** S-243, B-1, R.2. Breen Die State III, with a narrow rim break along the obverse border right of TY. The surfaces have attractive light olive toning, with lighter tan faded from original mint red. A few fine scratches are visible on Liberty's cheek, along with a small area of dark green and maroon verdigris at Liberty's shoulder. EAC 40.
*Ex: Chris Victor-McCawley (privately, July 2005).*(#921501)

## Key Fine Details 1804 Cent, S-266b, B-1

239 **1804—Burnished—NCS. Fine Details.** S-266b, B-1, R.2. The middle die state with a break over the RTY in LIBERTY, but no break over MERIC. This deep brown example is somewhat glossy, but is nicely defined and lacks noticeable marks. The only dies for the date, and a stopper in a date collection of early American cents. EAC 7.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#1504)

## Exceptional MS66 Brown
## 'Restrike' 1804 Half Cent

240 **1804 Restrike MS66 Brown PCGS. CAC.** An out-of-mint issue, struck circa-1860 from muled and altered date Mint dies that had been sold as steel scrap. The rarity of the official 1804 cent, known from a single die pair, created demand that was partly met by this contemporaneously condemned private restrike. Struck from broken and heavily rusted dies. Evenly toned golden-brown, but otherwise essentially as made. EAC 60. Population: 6 in 66 Brown, 0 finer (11/08).(#45344)

### Magnificent MS66 Brown 'Restrike' 1804 Cent

241 **1804 Restrike MS66 Brown PCGS.** Breen-1761. Per Breen, "Struck about 1858 by parties unknown from rusted dies retrieved from scrap metal sold by the Mint in 1833. Obv. altered from 1803 Sheldon 261; rev. of 1820. Both dies hand-strengthened." This issue outraged some 19th century collectors, but it has been listed in the *Guide Book* since its inception. The obverse has the usual heavy lower left reverse breaks. As made aside from its beautiful aquamarine and light golden-brown toning. EAC 62. Population: 6 in 66 Brown, 0 finer (11/08).(#45344)

242 **1805—Tooled, Cleaned—ICG. XF45 Details.** S-268, B-2, R.3. This Sheldon/Breen variety shows a blunt 1 in the date; and a leaf point from the left side of the wreath that extends beyond the E in STATES. Faint tooling marks appear in the lower right obverse field, beneath Liberty's chin. The surfaces are faintly granular from cleaning. EAC 40.(#1510)

### Pleasing S-267, B-1 1805 Cent, AU55

243 **1805 AU55 PCGS.** S-267, B-1, R.1. An attractive example of this initial Sheldon and Breen listing for the year, one of just three die pairings for the 1805 cent. Aside from a single abrasion at Liberty's lower neck, the violet-brown surfaces are largely mark-free. Well struck with minimal dentilation. EAC 45.(#1510)

### Popular S-270, B-1 1806 Cent, XF40

244 **1806 XF40 PCGS.** S-270, B-1, R.1. The only variety for the year. While the 1806 is not a great rarity as are a number of single-die-pair years, it presents a challenge nonetheless in better circulated grades. This well struck, lightly circulated representative sports rich chocolate-brown surfaces. EAC 30.(#1513)

### Favorite 1807 S-271, B-1 Comet Cent, XF45

245 **1807 Comet XF45 PCGS.** S-271, B-1, R.1. Though not a particularly elusive die pair, this variety has enjoyed years of fame thanks to its distinctive left obverse die break. The present piece has deep brown surfaces that show only light wear and a few scattered marks. It was struck at least twice, with doubling noted on Liberty's profile. EAC 35.(#1531)

### Choice XF S-278, B-2 1808 Cent

246 **1808 XF45 NGC.** S-278, B-2, R.3. Scarcer than S-279, the most often seen 1808 marriage. A dark walnut-brown representative of the conditionally elusive Classic design. Smooth aside from a couple of ticks near the date and a vertical line beneath the ear. Peripheral elements are softly impressed, but the devices exhibit pleasing definition. EAC 35.(#1543)

### Bold AU53 1809 Cent, S-280, B-1

247 **1809 AU53 NGC.** S-280, B-1, R.2, the sole dies. Deep walnut-brown toning embraces this late dies example. The fields are impressively void of abrasions, and the portrait has only a few faint marks. Classic Head cents are notoriously difficult to secure in quality grades, and this lightly circulated piece will satisfy the devoted specialist. EAC 35.(#1546)

### Brockage Reverse 1810 Cent
### S-285, B-2, Fine 12, Ex: Arconti

248 **1810—Brockage Reverse—Fine 12 PCGS.** S-285, B-2, R.2. For its Superior auction appearance, McCawley-Grellman explained the mint error as: "The reverse is an incuse impression of the obverse, caused when a previously struck cent failed to eject from the press. The brockage impression is aligned perfectly with the normal obverse." Despite its unusual appearance, the cent circulated for some time, and the dark brown surfaces have acquired the expected number of small marks. EAC 8.
*Ex: Michael Arconti Collection of United States Large Cent Errors, (Superior, 7/2003), lot 68.*(#1549)

249 **1810 VF35 PCGS.** S-283, B-4, R.2. The die dot on the upright of the Y of LIBERTY and the E in STATES nearer to T than S diagnoses this available variety. The dark brown surfaces show some moderate marks and strike weakness on the left side obverse through stars 1-3, and correspondingly on the reverse through D STAT. The planchet was misaligned before striking, leaving irregular dentilation. EAC 20.(#1549)

### Choice XF S-282, B-3 1810 Cent

250 **1810 XF45 PCGS.** S-282, B-3, R.2. The reverse die misalignment toward 2 o'clock helps attribute the variety. This is a deep brown Classic cent that has pleasing definition and an absence of detrimental marks. Mint gloss remains in protected areas. A conditionally challenging type. EAC 40. Population: 10 in 45, 32 finer (9/08).(#1549)

251 **1810—Cleaned—ICG. AU55 Details.** S-284, B-5, R.3. Well detailed with slight fadeaway on the peripheral devices, and uneven definition on the rim. Rich red-brown coloration and blemish-free surfaces, which are a trifle bright from improper cleaning. EAC 35.(#1549)

### Doubled 1810 S-282, B-3 Large Cent, AU58

252 **1810 AU58 PCGS.** S-282, B-3, R.2. Breen Die State II, with a faint crack joining the inner points of stars 10 and 11. A minute double profile is visible, along with bold doubling on LIB and RTY. Only the E fails to show the doubling. Frosty medium brown surfaces are splashes with darker toning on both sides. The surfaces are remarkably pleasing. EAC 50.(#1549)

253 **1810/09—Cleaned—ICG. AU53 Details.** S-281, B-1, R.1. The sole 1810/09 overdate variety of this year. A somewhat glossy deep red-brown example with faintly granular, nearly mark-free surfaces. Slightly subdued in its overall appearance, as a result of cleaning. EAC 40.(#1552)

### Pleasing AU 1811 Cent, S-287, B-1

254 **1811 AU50 PCGS.** S-287, B-1, R.2. The only non-overdated die pair for the year, with both obverse and reverse distinct from the 1811/0 pieces. This well struck example shows only modest wear across the portrait and wreath, though the violet-brown fields also show a number of small, scattered digs. EAC 40.(#1555)

### Unworn S-287, B-1 1811 Cent

255 **1811—Damaged—ICG. MS60 Details.** S-287, B-1, R.2. No trace of wear is visible on this unusually well-defined piece, deep blue-brown on the obverse with rich violet and peach accents gracing the reverse. Both sides show evidence of unfortunate rim damage, but the presence of the holder minimizes the visual impact. EAC 30.(#1555)

### Lovely AU53 1812 Small Date Cent, S-290, B-2

256 **1812 Small Date AU53 PCGS.** S-290, B-2, R.1. Despite light wear, this Classic Head cent displays lovely central detail, particularly through the often-weak upper hair, though the obverse stars exhibit a degree of softness. Lush chocolate-brown surfaces are minimally marked with ample violet and blue overtones. EAC 35.(#1561)

### Charming S-290, B-2 1812 Small Date Cent, AU55

257 **1812 Small Date AU55 PCGS.** S-290, B-2, R.1. Elegant sapphire overtones lend color to the otherwise teak-brown surfaces. The strike is solid, if not absolutely sharp, and only a touch of wear is present on the uppermost design elements. The reverse shows evidence of heavy peripheral die deterioration. EAC 40.(#1561)

258 **1812 Large Date VF35 ANACS.** S-288, R.3. The 812 of the date is closer than 18, and the point of the highest leaf is just barely past the right side of S. This is a sharply defined, medium brown specimen. Both sides are remarkably clean. EAC 20.(#1564)

### Gorgeous AU53 1812 Large Date Cent, S-288, B-3

259 **1812 Large Date AU53 ICG.** S-288, B-3, R.2. The less available of the two Large Date varieties for this year. Warm rose-violet and cool blue overtones lend color to this otherwise deep brown representative. Light wear is noted at Liberty's hair, both upper and lower. Only the right obverse shows dentilation, with this taking on an almost scalloped appearance. EAC 40.(#1564)

260 **1812 Large Date—Cleaned—ICG. AU58 Details.** S-288, B-3, R.2. A lightly cleaned example with strong details and glossy rose-brown surfaces. A few abrasions are noticeable on the lower left portion of the obverse, but the reverse is mark-free. EAC 45.(#1564)

### Conditionally Challenging Choice AU 1813 Cent, S-293, B-1

261 **1813 AU55 PCGS.** S-293, B-1, R.2. Medium brown overall with glimpses of ebony on the left reverse. Luster shimmers from the legends and devices, and both sides appear unabraded save for a hair-thin mark near the reverse center dot. The leaves and Liberty's eyebrow displays slight wear. EAC 45.(#1570)

262 **1813—Cleaned—ICG. AU55 Details.** S-292, B-2, R.2. Well detailed but somewhat granular from harsh cleaning. Deep charcoal-violet toning with few marks on either side. EAC 35.(#1570)

### Desirable 1813 S-293, B-1 Cent, AU55

263 **1813 AU55 PCGS.** S-293, B-1, R.2. Breen Die State IV, the latest he recorded, with die cracks through the tops and bases of TED S, and the tops of ST. Medium brown surfaces exhibit satiny luster with hints of pale blue toning. A few small corrosion spots are visible on each side. EAC 45.(#1570)

### Difficult Select Mint State 1814 Crosslet 4 Cent, S-294, B-1

264 **1814 Crosslet 4 MS63 Brown NGC.** S-294, B-1, R.1. This variety is attributed by the Crosslet 4 in the date; the only other die marriage, S-295, features a Plain 4. Walter Breen, in his *Encyclopedia of Early United States Cents, 1793-1814*, cites Robert Julian's research in saying: " ... Chief Coiner Adam Eckfeldt delivered 357,830 cents to Mint Treasurer Benjamin Rush on October 27, exhausting the Mint's supply of cent blanks." Breen goes on to say: "Unsurprisingly, gem uncirculated 1814s are unobtainable."

This Brown Select example displays highly attractive glossy medium brown surfaces that exhibit sharply struck design elements. Most of the dentilation shows on both sides, and is for the most part quite bold. Each face is devoid of significant contact marks, spots, or corrosion. In other words, a truly outstanding specimen. Census: 15 in 63 Brown, 11 finer (6/07). EAC 55.(#1573)

265 **1814 Plain 4 VF35 PCGS.** S-295, B-2, R.1. The second of just two die marriages for this early Large Cent date. This example shows considerable detail for the Choice VF grade level, and rich mahogany-brown toning across both sides. A diagonal streak of charcoal color traverses the lower reverse, and some charcoal accents are also seen near the peripheries. EAC 20.(#1576)

266 **1814 Plain 4—Corroded, Cleaned—ICG. AU50 Details.** S-295, B-2, R.1. Plain 4 in the date. Advanced die state with significant crumbling along Liberty's throat. A deep charcoal-brown example with light corrosion across both sides. Harshly cleaned at some point in the past. EAC 25.(#1576)

### Near-Mint 1814 Plain 4 Cent, S-295, B-2

267 **1814 Plain 4 AU58 PCGS.** S-295, B-2, R.1. The only Plain 4 variety for the year, just as the S-294 is the only Crosslet 4 die pairing. The obverse is in a late state on this piece, with a die crack through the lower right and a break forming at Liberty's chin. Rich chocolate-brown pieces offer bold violet overtones. EAC 45.(#1576)

### Handsome MS63 Brown 1814 Plain 4 Cent, Sheldon-295, B-2

268 **1814 Plain 4 MS63 Brown PCGS.** S-295, B-2, R.1. Medium brown with glimpses of golden-brown and slightly darker and minutely granular areas near star 13 and the second S in STATES. Well struck and satiny with an impressively mark-free appearance. Housed in an old green label holder. EAC 55. Population: 6 in 63 Brown, 3 finer (11/08).(#1576)

### Luminous MS64 Brown 1816 Cent, N-2

269 **1816 MS64 Brown NGC.** N-2, R.1. Die State A, with crumbling at stars 8-10 but no die crack between STATES and OF. This example is well-defined, if a trifle softly struck at the lower left stars, and the surfaces are smooth. Blended violet-blue and peach-orange patina dominates each side. EAC 63. NGC has graded just three finer examples in the color category (11/08).(#1591)

270 **1818 MS65 Brown NGC.** N-10, R.1. A die crack extends through the date and all of the obverse stars. Well struck and lustrous, with deep violet-brown coloration and blemish-free surfaces. A no-questions Gem example of this popular Randall Hoard date. EAC 60. Census: 11 in 65 Brown, 2 finer (11/08).(#1600)

271 **1819 Large Date MS63 Brown PCGS. CAC.** N-2, R.1. Pleasing medium brown surfaces with some splashes of darker toning and remnants of original orange luster. EAC 50.(#1603)

### Beautiful Gem 1830 Cent Large Letters Reverse, N-4

272 **1830 Large Letters MS65 Red and Brown PCGS.** N-4, Low R.3. Noyes Die State B. A lustrous and pleasing Gem with golden-brown and orange-red toning. The major devices are well struck, and the right-side stars exhibit full centril detail. Occasional minor peripheral carbon is all that prevents an even finer grade. While large cent striking was heavy in 1830, with over 1.7 million pieces struck across a range of varieties, high-end Mint State survivors are elusive today, particularly with some degree of Red on the surfaces. This is the single finest Red and Brown example known to PCGS (11/08). EAC 55. *From The James Mossman Collection.*(#1673)

## Pleasing Choice VF 1830 Medium Letters Cent, N-6

273 **1830 Medium Letters VF35 PCGS.** N-6, R.4. The reverse, the lone instance of a Medium Letters reverse for the year, is diagnostic. The N-6 has its own *Guide Book* variety, which drives up demand. This piece is softly struck as always across the central devices, but considerable luminosity remains in the mahogany and chocolate-brown fields. Attractive and interesting. EAC 30.
*Ex: Henry Chapman; Norweb III (Bowers and Merena, 11/88), lot 2905, per included paper holder.*(#1675)

274 **1837 Head of 1838 MS65 Brown NGC.** N-10, R.1. This vibrant Gem has frosty mint luster and bold design details with lovely lilac-brown surfaces. Faint traces of pale blue toning are evident in the protected areas near the design elements. EAC 63.(#1729)

275 **1843 Petite Head, Small Letters MS65 Brown NGC.** N-12, R.2. Attractive golden-brown patina with hints of faded red. The design elements are sharply struck, except for the star centers along the right border. The lustrous surfaces are remarkably well-preserved without any notable abrasions. EAC 60.(#1844)

276 **1850 MS67 Brown NGC.** N-21, R.2. Grellman Die State b. Lines from the dentils at star 2 are gone, but no rim cuds have developed on the reverse. This is a Superb example and is almost certainly the finest known for the variety. The obverse has bluish-brown color with traces of mint red luster, while the reverse is mostly faded orange with light touches of blue. EAC 63.(#1889)

## Superb Gem N-39 1851 Cent

277 **1851 MS67 Brown NGC.** N-39, R.3. Grellman Die State b. This is a sharply struck Superb Gem with deep steel blue and brown color, accented by traces of faded orange luster. Flawless aside from a fleck northeast of star 13. None have been certified in grades above MS67 (11/08). EAC 63.
*Ex: Long Beach Signature (Heritage, 9/2004), lot 5084; Central States Signature (Heritage, 5/2005), lot 5109.*(#1892)

## Rich Red Gem 1851 Cent, N-15

278 **1851 MS65 Red PCGS.** N-15, R.4. Grellman Die State b, as are the vast majority of Mint State examples for this die pair, thanks to a hoard. Fresh copper-orange surfaces show hints of pink on the reverse and minimal carbon. The strike is solid overall, and the preservation is impressive. EAC 65. Population: 15 in 65 Red, 0 finer (12/08).(#1894)

279 **1852 MS67 Brown NGC.** N-16, R.1. Minute mint-made die lumps on ONE CENT confirm the variety. Only the fifth star is not crisply struck, and the remainder of the devices are well rendered by the dies. Virtually pristine and generally golden-brown in color, although ample hints of original Red are also present despite the Brown designation. EAC 60.(#1898)

280 **1853 MS66 Brown NGC.** N-25, R.1. A significant hoard of N-25 cents was once discovered, with nearly all pieces showing most or all red mint color. The present example is an exception with deep brown patina accompanying traces of orange mint luster. Both sides are satiny and attractive. EAC 63.
*From The Findley Collection.*(#1901)

281 **1853 MS66 Brown PCGS.** N-25, R.1. Grellman Die State b. The "Brown" designation is uncharitable, since considerable reddish-orange and mahogany is visible at the margins. Well-defined at the centers, if a trifle softly struck at the margins. Strong eye appeal for this hoarded variant. EAC 63.(#1901)

## Beautiful Superb Gem 1853 Cent, N-25

282 **1853 MS67 Brown NGC.** N-25, R.1. Grellman Die State b. A 'bar' in the denticles between stars 1 and 2 identify the die marriage. Forest-green and golden-brown invigorate this lustrous and well preserved Superb Gem. A few stars are incompletely brought up, but the major devices are intricately impressed. EAC 63. Census: 3 in 67 Brown, 0 finer (11/08).(#1901)

## Fabulous MS67 1853 Cent, N-25

283 **1853 MS67 Brown NGC.** N-25, R.1. The familiar variety with repunching beneath the 1 in the date and a horizontal bar (as made) from a dentil between stars 2 and 3. Booming luster and consistent chocolate-brown toning confirm the exemplary quality of this nicely struck and virtually immaculate Superb Gem. EAC 60. Census: 3 in 67 Brown, 1 finer as MS67 Red and Brown (11/08).(#1901)

284 **1853 MS65 Red and Brown PCGS. CAC.** N-25, R.1. The obverse is fully lustrous with bright orange mint color, and the reverse is lustrous with frosty brown surfaces and hints of faded mint color. Tiny obverse pepper spots are of little significance. EAC 63.(#1902)

## Red Gem N-25 1853 Cent

285 **1853 MS65 Red NGC.** N-25, R.1. Grellman Die State b. Orange-gold throughout, with slight mellowing seen on the central obverse. This minimally abraded Gem is boldly struck save for the occasional star center. EAC 65. Census: 45 in 65 Red, 12 finer (11/08). *Ex: Long Beach Signature (Heritage, 9/2004), lot 5101.* (#1903)

## Sumptuous MS66 Red 1853 Cent, N-25

286 **1853 MS66 Red PCGS.** N-25, R.1. Grellman Die State b. For this hoard variety, Red and Brown survivors are the rule, making this fully Red piece a treat. Pink and copper-orange surfaces are essentially unturned, and the central detail is delightful. PCGS has graded just one finer Red representative (11/08). EAC 65.(#1903)

## Interesting MS67 Red and Brown N-12 1854 Cent

287 **1854 MS67 Red and Brown NGC.** N-12, R.2. Grellman Die State b. Both sides offer a blend of rich copper-orange and vibrant violet-brown shadings. Unabraded and impressively appealing. The right side stars are not fully struck, but the coin is crisply detailed otherwise. Tied for the finest Red and Brown example known to NGC (11/08). EAC 63.(#1905)

## 70% Off Center Fine 15 1855 Upright 5s Cent

288 **1855 Upright 5s—Struck 70% Off Center—Fine 15 PCGS.** Likely N-7, based upon the date location. Struck dramatically off center toward 10:30. The date is complete. The border between the struck and unstruck portions is wavy, as made. Toned maroon-brown, and tiny marks are distributed. An impressive mint error from the sunset years of the series.(#1907)

## Dramatic N-4 1855 Upright 5s Cent, MS67 Brown

289 **1855 Upright 5s MS67 Brown NGC.** N-4, R.1. A pair of die lumps show below Liberty's earlobe and a pair of faint die lines are within the N in CENT, these confirming the Newcomb variety. Although designated as Brown, there is a considerable amount of orange-red luster on each side. An attentive strike brings out bold detail on the design elements, with only a few star centers showing softness. Both faces are impeccably preserved, further enhancing the coin's outstanding eye appeal. EAC 63.(#1907)

290 **1855 Upright 5s MS64 Red PCGS.** N-4, R.1. A pair of die lumps on Liberty's jaw, left of the ear, are diagnostic. Upright 5s. Fiery orange-red coloration with tremendous luster. Both sides are abrasion-free, while minor carbon is noted along the obverse periphery. A premium quality coin for the grade. EAC 64.(#1909)

### Glorious MS66 Red 1855 Cent
### Upright 5s, N-4

291 **1855 Upright 5s MS66 Red PCGS.** N-4, R.1. Grellman Die State a. An unabraded pumpkin-gold Premium Gem that boasts sweeping luster and a crisp strike. Only star 5 lacks precise central definition. Only inconsequential carbon on the upper left obverse field precludes an unprecedented higher grade. Housed in a green label holder. EAC 65. Population: 13 in 66 Red, 0 finer (11/08). *From The James Mossman Collection.*(#1909)

### Gem Red and Brown N-6
### 1856 Upright 5 Large Cent

292 **1856 Upright 5 MS65 Red and Brown NGC.** N-6, R.1. Grellman Die State a. A beautiful pumpkin-orange Gem that has an unabraded reverse and only the faintest grazes on the obverse. Carbon is minor, and the strike is bold save for the upper obverse star centers. EAC 64. Census: 16 in 65 Red and Brown, 9 finer (11/08).(#1920)

### Striking N-8 1856 Upright 5 Cent, MS65 Red

293 **1856 Upright 5 MS65 Red NGC.** N-8, R.4. A scarcer Newcomb variety best identified by the hair-thin diagonal die crack from the rim through the MER in AMERICA. This lustrous brick-red Gem has a pleasing strike on the major devices, although the majority of the stars lack precise centers. An olive spot beneath the TE in STATES is of little import. EAC 64.(#1921)

## PROOF LARGE CENTS

### Pleasing N-10 1855 Cent, PR64 Red and Brown

294 **1855 PR64 Red and Brown PCGS.** N-10, R.5 as a proof. The obverse is gleaming copper-gold with just a touch of violet, while the reverse shows deeper peach tones with elements of lilac. Sharply struck with scattered carbon present on the obverse. EAC PR63. Population: 4 in 64 Red and Brown, 2 finer (12/08).(#1995)

### Desirable N-3 1857 Cent, PR62 Brown

295 **1857 PR62 Brown PCGS.** N-3, Low R.5 as a proof. A luminous, exquisitely detailed survivor from the last of the proof large cent issues. Both sides have attractive surfaces that show a blend of walnut and mocha patina. Though wispy hairlines and a few tiny points of contact preclude a finer designation, the eye appeal is strong. EAC PR45.(#2000)

## FLYING EAGLE CENTS

296 **1857 MS64 NGC.** Luminous surfaces are generally pale golden-brown with a prominent streak of pumpkin-orange at the left obverse. Well-defined and pleasingly preserved for the designation. (#2016)

### Exceptional Gem 1857 Flying Eagle Cent

297 **1857 MS65 NGC.** Medium chestnut-tan toning dominates, but the central reverse has a blush of steel-gray. Exquisitely preserved despite a fleck beneath the front wing, and well struck aside from moderate incompleteness on the edge of the tail and the right-side cotton leaves.(#2016)

## Gem 1857 Flying Eagle Cent

298 **1857 MS65 NGC.** This attractive Gem displays intense fire-red and red-gold color on the obverse, with more muted mauve and brick-red toning across the reverse. Well struck with lustrous, distraction-free surfaces. The front wing has an interesting die scratch, as made. Seldom seen any finer.(#2016)

299 **1858 Large Letters MS64 PCGS.** Microscopic doubling is evident on some of the letters in the legend, and in a few instances the letters actually appear to be tripled. The doubling is likely the result of the minting process rather than a doubled die. Both sides have splendid golden luster with bold design elements.(#2019)

## Scarce 8 Over 7 1858 Flying Eagle Cent MS64, FS-302, Snow-7

300 **1858 Large Letters MS64 PCGS. CAC.** FS-302 (formerly FS-006.1), Snow-7. 8 over 7 Overdate. A portion of a previous 7 resides just above and to the right of 8. All of the obverse letters and are doubled. A gorgeous golden-tan representative with intense mint luster. The well preserved surfaces are entirely abrasion-free. Only scattered flyspecks prevent an even finer grade assessment. (#2019)

## Lustrous Gem 1858 Large Letters Cent

301 **1858 Large Letters MS65 PCGS.** High Leaves, Closed E in ONE. Exactingly struck and thoroughly lustrous with only a single unimportant mark noted above the O in ONE. The almond-gold fields are virtually devoid of carbon. A two year type, excluding the pattern 1856. Encapsulated in a green label holder.(#2019)

## Satiny Gem Large Letters 1858 Cent

302 **1858 Large Letters MS65 PCGS. CAC.** High Leaves, Closed E in ONE. It has been said that the Flying Eagle type was abandoned after 1858 because it was difficult for the eagle's extremities to achieve a full strike. But the present Gem has complete design detail, down to the tip of the tail and the veins of the cotton leaves. The satiny sun-gold surfaces are completely devoid of marks, and pinpoint carbon requires magnification to observe. Encapsulated in a green label holder.
*From The James Mossman Collection.*(#2019)

## Crisp Gem Large Letters 1858 Cent

303 **1858 Large Letters MS65 NGC.** Low Leaves, Closed E in ONE. A crisply struck tan-gold Gem with dazzling luster and attractive preservation. The final year of this conditionally scarce type. Struck a couple of degrees off center toward 7:30, with the border widest on the reverse near 4:30. The obverse die has been lapped, removing plumage detail near the I in UNITED.(#2019)

304 **1858 Small Letters MS64 NGC.** Low Leaves, Closed E in ONE. Crisply struck and lustrous with consistent tan-gold toning. Nearly void of contact, and the infrequent minute flecks are trivial for the grade.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#2020)

## Radiant, Sharply Struck 1858 Small Letters Cent, MS65

305 **1858 Small Letters MS65 NGC.** Radiant with coruscant mint frost, the surfaces are awash in bright reddish-golden and tan color. Modest hints of brightness are evident in the fields, but we can find no abrasions or carbon flecks that would cast doubt upon the MS65 designation. Sharply struck throughout both sides, the reverse is rotated a few degrees clockwise in relation to the obverse. Census: 70 in 65, 15 finer (11/08).(#2020)

### Attractively Toned MS66
### 1858 Small Letters, Low Leaves Cent

306 **1858 Small Letters MS66 NGC.** Low Leaves, Closed E in ONE. This thoroughly lustrous and exactingly struck Premium Gem features lovely rose-red, lime-green, and yellow-gold toning. An outstanding example of this briefly produced type coin. The obverse legends are lightly strike doubled. Certified in a former generation holder.
*From the Estate of Robert R. Rollins Collection, Part Two.* (#2020)

## INDIAN CENTS

307 **1859 MS64 NGC. CAC.** Minor die cracks on each side add to the desirability of this Choice Mint State piece. Both sides are fully lustrous with intermingled gold and tan patina.(#2052)

### Gorgeous Gem 1859 Cent

308 **1859 MS65 PCGS. CAC.** A magnificent Gem that is free from the visible carbon and contact usually seen even on high grade Indian cents. The strike is intricate, and the straw-gold color is consistent. Aside from scarce 1858 patterns, 1859 is the sole date of the Laurel Wreath subtype.
*From The James Mossman Collection.*(#2052)

### Appealing 1859 Premium Gem Cent

309 **1859 MS66 NGC.** The copper-gold lustrous surfaces of this Premium Gem are imbued with hints of light tan, and a well executed strike leaves nearly complete delineation on the design elements, denied only by softness in a couple of the feather tips. Both sides are devoid of mentionable contacts or spots. Great overall eye appeal. Census: 10 in 66, 1 finer (11/08).(#2052)

310 **1860 Pointed Bust MS64 PCGS.** FS-006.4. A scarce variety with the transitional pointed bust of Liberty, as issued in 1859. This near-Gem is highly lustrous, with lovely golden-tan color and a streak of apricot-orange across the center of the reverse. Tiny planchet flaws are noted above the tops of many of the peripheral obverse letters; but post-striking marks or abrasions are minimal, consisting of a couple of superficial nicks on Liberty's cheek.(#2056)

### Lustrous 1860 Pointed Bust Gem Cent

311 **1860 Pointed Bust MS65 NGC.** FS-006.4. The Pointed Bust variety is very scarce and highly desirable in Mint State grades. This Gem specimen displays copper-gold luster laced with mint-green on the obverse and a blush of lilac on the central reverse. The design elements are well struck for the most part, except for softness on two of the diamonds, the adjacent curls, and the horizontal shield lines. Nicely preserved throughout. Census: 7 in 65, 3 finer (11/08). (#2056)

312 **1860 MS65 PCGS.** Solidly struck on all of the design elements, with lovely tan and rose coloration across the well preserved surfaces. A satiny Gem example of this copper-nickel issue, technically impressive with plenty of eye appeal.(#2058)

313 **1860 MS65 PCGS. CAC.** Swirling luster and lovely chestnut-tan coloration are hallmarks of this well preserved Gem. Only under magnification do a couple of trivial nicks become apparent: one on Liberty's jaw and the other on the upper right reverse field. From the first of five copper-nickel Indian cent issues.
*From The James Mossman Collection.*(#2058)

### Outstanding 1861 Cent, MS66

314 **1861 MS66 PCGS.** The lustrous sandy-tan surfaces boast a crisp strike, including excellent delineation on all feather tips and diamonds. Well preserved surfaces reveal just a few tiny light flecks. This Premium Gem displays enormous eye appeal, and will be a super addition to a higher level Mint State collection. Population: 52 in 66, 10 finer (11/08).(#2061)

## Impeccably Preserved 1862 Cent, MS66

315 **1862 MS66 PCGS.** 1862 copper-nickel cents are available through near-Gem. The MS65 certified population drops significantly, as does that of Premium Gems, and higher-grade coins are elusive. This lustrous MS66 cent displays pretty golden-tan color on impeccably preserved surfaces. The design features are boldly struck, save for softness on the tips of the first three or four feathers. Population: 56 in 66, 7 finer (11/08).(#2064)

316 **1863 MS65 PCGS.** This meticulously struck and satiny Civil War Gem appears unabraded. Chestnut-gold with glimpses of peach and a few pinpoint obverse flecks.(#2067)

317 **1864 Copper-Nickel MS65 NGC.** This exactingly struck Gem has satin luster and undisturbed surfaces. Medium golden-brown toning only increases the eye appeal. A lower mintage Civil War issue. (#2070)

318 **1864 Bronze No L MS65 Red PCGS.** Light copper-orange surfaces teem with luster, and the strike is crisp. Remarkable eye appeal with nearly a copper-nickel appearance in the timelessness of the surfaces. (#2078)

## Attractive 1864 Bronze No L Cent, MS66 Red

319 **1864 Bronze No L MS66 Red PCGS.** Copper-gold luster enriches both sides of this Premium Gem, and a well executed strike sharpens the design elements, except for softness on the first three feather tips. All four diamonds show clearly. A couple of trivial marks are not worthy of individual mention. Population: 32 in 66 Red, 1 finer (11/08).(#2078)

## Finest-Certified 1865 Indian Cent MS67 Red and Brown

320 **1865 Plain 5 MS67 Red and Brown NGC.** The obverse shows gold and orange-red, although the cheek is deep lilac, as is the central reverse. This precisely struck Superb Gem has vibrant luster and has only minimal carbon. In terms of its numerical grade, the present example is the single finest-certified, as it is the only piece to garner an MS67 grade from either NGC or PCGS, as of (11/08). (#2083)

## Premium Gem 1866 Cent Red and Brown Repunched Date FS-301, VP-001

321 **1866 MS66 Red and Brown NGC.** FS-301 (previously FS-7.7), Snow-2, VP-001. The date is sharply repunched, most obviously below the upper serif of the 1, and on the peak of the second 6. Copper-red with blushes of pale blue. A single carbon fleck resides just above the R in AMERICA. Essentially devoid of any significant marks; a marvelously well preserved Premium Gem example of this scarce variety.(#2086)

322 **1867 MS64 Red PCGS.** Well struck in the centers, although minor blending of detail is noted on the right shield corner. Booming luster and peach-gold color confirm the eye appeal. Scattered minute carbon determines the grade. Housed in an old green label holder. Population: 73 in 64, 20 finer (11/08).(#2090)

## Vivid 1867 Cent, MS64 Red

323 **1867 MS64 Red NGC.** Vivid orange-gold surfaces yield pleasing luster, along with sharply struck design elements, including clarity on all feather tips and diamonds. A handful of trivial marks prevent the attainment of Gem classification. Nevertheless, this is an attractive piece with great eye appeal. Census: 15 in 64 Red, 11 finer (11/08). (#2090)

## Imposing Red Gem 1867 Cent

324 **1867 MS65 Red NGC.** Booming luster and seamless straw-gold color combines with an exquisite strike to ensure the high quality of this impressive Gem. Virtually unabraded, and also essentially free from flyspecks. An important example of this Reconstruction date. Census: 9 in 65 Red, 0 finer (11/08).(#2090)

## Exemplary Red Gem 1868 Cent

325 **1868 MS65 Red PCGS.** This well struck orange-red Gem has vibrant luster and minimal carbon. The quality is exemplary for this low mintage Reconstruction issue, since most Uncirculated survivors are spotted or offer only faded mint bloom. Population: 30 in 65 Red, 3 finer (11/08).(#2093)

## Lovely 1869/9 Cent MS66 Red and Brown FS-008.3, Snow-3

326 **1869/9 MS66 Red and Brown NGC.** FS-008.3, Snow-3. Fivaz and Stanton (2000) state that this repunched date variety was once attributed as an 1869/8, but has recently been confirmed as an 1869/9. The secondary image is visible north of the primary date (not attributed as 1869/9 on the insert). Copper-gold luster shows beneath the overlay of light tan patina. Nicely struck, including the diamonds and feather tips. A couple of minute flecks are noted on the reverse. Census: 30 in 66 Red and Brown, 0 finer (10/08). (#2095)

## Difficult 1869 Cent, MS64 Red

327 **1869 MS64 Red PCGS.** The 1869 cent is very difficult to locate in all grades. This fully red near-Gem specimen displays bright golden luster laced with traces of crimson, slightly more so on the reverse. A generally well struck piece, except for minor softness on the second diamond from the top. A few tiny light carbon flecks limit the numerical grade. Population: 42 in 64 Red, 35 finer (11/08). (#2096)

328 **1870 MS62 Red and Brown PCGS.** FS-301, previously FS-008.81. Snow-4. Repunched Date. The 1, 7, and 8 were first punched north of the primary digits. A lustrous and unabraded representative, very softly struck on all of the design's high points.(#2098)

## Vibrant 1871 Cent, MS64 Red

329 **1871 MS64 Red PCGS.** This near-Gem cent is sharply struck on all but a couple of the feather tips. Vibrant copper-gold surfaces display blushes of crimson and sky-blue on the obverse. A few tiny flecks are visible on each side, as are a couple of laminations. Population: 23 in 64 Red, 18 finer (11/08).(#2102)

## Condition Rarity 1872 Cent MS66 Red and Brown

330 **1872 MS66 Red and Brown NGC.** The 1872 is a well known condition rarity among Indian Cent specialists, particularly with any degree of the original luster intact. Both sides of this important Gem are pleasingly glossy in texture with remnants of orange-red luster peering through medium blue-brown toning. The design elements are well brought up, and the noteworthy lack of distracting blemishes is exactly what one should expect for the MS66 designation. Census: 8 in 66 Red and Brown, 0 finer (10/08).(#2104)

## Challenging 1872 Cent, MS64 Red

331 **1872 MS64 Red NGC.** Copper-gold surfaces display well struck design elements, except for flatness on the horizontal shield lines, a typical situation for the 1872, due to machine oil or water resting on the planchet or on the dies (David Bowers, 2006). A couple of minuscule marks limit the grade. A tiny piece of verdigris is noted at the top of the N in ONE. Census: 16 in 64 Red, 4 finer (10/08). (#2105)

332 **1873 Open 3 MS64 Red PCGS.** From reddish-orange to pale salmon and wheat-gold, this shining Choice coin explores the edges of the Red designation without crossing over the line. Well-defined and pleasing. Population: 49 in 64 Red, 25 finer (11/08). (#2108)

## Popular 1873 Indian Cent Doubled Die Obverse, AU50, FS-009

333 **1873 Doubled LIBERTY, Closed 3 AU50 PCGS.** Snow-1. FS-009. This popular *Guide Book* variety is one of the boldest doubled dies in the Indian cent series, with obvious doubling seen on LIBERTY, the headdress feathers, and Liberty's profile. This moderately worn chocolate-brown example shows few marks and suitable eye appeal for the grade.(#2115)

334 **1874 MS66 Red and Brown NGC.** Richly toned in sun-gold and cherry-red with a glimpse of forest-green on the cheek. Sharply struck and unabraded.
*Ex: Long Beach Signature (Heritage, 6/2004), lot 5129; FUN Signature (Heritage, 1/2006), lot 767.*(#2119)

## Well Struck 1875 Red Gem Cent

335 **1875 MS65 Red PCGS.** Copper-gold color adorns both sides of this Gem, and the reverse fields are semiprooflike at certain angles. A well executed strike leaves strong definition on the design elements, including all the feather tips and the four diamonds. Neither side reveals mentionable contact marks. Encased in a green-label holder. Population: 38 in 65 Red, 6 finer (11/08).(#2123)

336 **1877 VF35 PCGS.** Some issues in U.S. numismatics are simply universally recognized as key dates, and the 1877 Indian cent is one of them. This Choice VF example displays relatively clean surfaces with smooth red-brown coloration and even wear across both sides. A very suitable example of this important issue, for the grade.(#2127)

## Key Date 1877 Cent, XF45

337 **1877 XF45 PCGS.** A pleasing light to medium-brown example of this key date in the Indian cent series. Relatively nice definition remains on most of the design elements, though only the top diamond is outlined, as is part of the second one from the bottom. The surfaces on both sides are quite clean.(#2127)

## Select Mint State Key 1877 Cent

338 **1877 MS63 Brown NGC.** Shallow N in ONE. Beautifully toned apple-green and golden-brown. A lustrous key date cent that appears devoid of carbon and is smooth aside from minor contact on the jaw and left obverse field. The lowest mintage Philadelphia issue of the series. Certified in a prior generation holder.(#2127)

## Glowing Red and Brown 1877 Cent MS64

339 **1877 MS64 Red and Brown NGC.** Shallow N in ONE. This satiny and sharply struck Choice key date cent is richly toned in fire-red, sea-green, and cobalt-blue, with the deeper shades on the obverse. Nearly void of carbon, and contact is limited to a pair of minuscule ticks on the cheek.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#2128)

## Bold Gem Red and Brown 1877 Cent

340 **1877 MS65 Red and Brown NGC.** Shallow N in ONE. A boldly struck Gem representative of this coveted series key. The orange-gold and dusky brown surfaces are only minimally abraded, and display sweeping satin luster. Only the 1909-S has a lower mintage than the 1877, but the 1877 was little saved, and is much scarcer in Mint State.(#2128)

## Lustrous 1877 Cent, MS64 Red

341 **1877 MS64 Red PCGS.** The small mintage of 852,500 Indian cents in 1877 was recognized early on. In a September 13, 2005 *Numismatic News* article titled "1877 Indian Cent a Perennial Favorite," Paul Green says:

> "For small cents that were first released in 1857, a mintage of less than 1 million pieces was remarkable. It had never happened before and there is reason to believe that perhaps a few more 1877 cents were saved than would normally be the case simply because some learned early that it was low-mintage."

Green might be correct in his contention that 1877 cents were saved in relatively large numbers (this is at odds with Richard Snow, however, who asserts that very few 1877s were saved; see Snow's *A Guide Book of Flying Eagle and Indian Head Cents*, 2006, pp 135-136). In any event, perusal of PCGS/NGC population data reveals that these services have certified a few thousand "Brown" examples in grades ranging from Poor to Gem. Close to 500 "Red and Brown" coins, mostly in Mint State grades, have also been graded, as have about 90 "Red" pieces, all in Mint State.

Both sides of this near-Gem example display potent copper-gold luster. While the design features are generally well defined, certain areas reveal the typically-seen softness, including the feathers tips and the lower diamond. Mentionable contact marks are absent, but light flecks scattered over each side deny Gem status. Encased in a scarce doily label holder. Population: 40 in 64 Red, 28 finer (11/08). (#2129)

342 **1880 MS64 Red PCGS.** Snow-2, "Scarce." The second 8 in the date is lightly recut within the upper half of the lower loop. An exquisitely struck near-Gem with rich luster and lovely red-orange, olive, and lilac color. A few reverse flyspecks may have limited the grade, since the piece is unmarked on both sides.(#2138)

### 1880 Clashed Reverse Cent
### MS65 Red, Snow-1, FS-101

343 **1880 Clashed Rev. MS65 Red PCGS.** Doubled Die Obverse, Snow-1, FS-101, formerly FS-009.41. An example of the Off-Center Clashed Reverse variety, which also shows slight doubling on LIBERTY. The reverse shows a widely off-center clash mark in the area around NE, where the obverse die came in contact. Lustrous orange-gold surfaces display sharply struck design elements. Nicely preserved throughout. Accompanied by an Eagle Eye Photo Seal certificate depicting the coin in a former green-label holder, # 2138.65/1437658.(#2138)

### Gorgeous 1880 Indian Cent, MS66 Red

344 **1880 MS66 Red PCGS.** Both sides of this Premium Gem are awash in gorgeous orange-gold luster, and each is impeccably preserved. A precision strike leaves virtually complete definition on the design elements. Housed in a green-label holder. Population: 15 in 66 Red, 1 finer (11/08).(#2138)

### Pleasing 1881 Cent, MS66 Red

345 **1881 MS66 Red NGC.** Orange-gold luster adorns both sides of this Premium Gem, each of which displays sharply struck design features. A few minor flecks do not detract from the coin's overall pleasing eye appeal. Difficult to locate fully red in the better Mint State grades. Housed in a prior generation holder. Census: 10 in 66 Red, 1 finer (10/08).(#2141)

346 **1883 Misplaced Date MS65 Red PCGS.** FS-301, formerly FS-009.45. Snow-8. A misplaced date variety that has the top of a 3 emerging from the denticles. Intricately struck and satiny with dusky orange and rose tints. The central reverse has scattered minute flecks.(#2147)

### Sharply Struck 1886 Type Two Cent, MS64 Red

347 **1886 Type Two MS64 Red PCGS.** On this variety, the lowest feather points between the C and A of AMERICA. A blend of yellow-gold and crimson occupies the obverse of this near-Gem, while yellow-gold dominates the reverse, blushed with faint crimson and sky-blue in the center. This sharply struck piece reveals just a couple of grade-defining marks. Population: 29 in 64 Red, 8 finer (11/08).(#92156)

### Attractive 1886 Type Two Cent
### MS65 Red

348 **1886 Type Two MS65 Red NGC.** The lowest headdress feather points between C and A on this variety. Yellow-gold coloration on the reverse cedes to a mix of yellow-gold, crimson, and sky-blue on the obverse. Save for softness in the feather tips, the design elements display relatively sharp detail, despite the die wear that is typical for this issue (see David Bowers, 2006). Nicely preserved throughout. Census: 9 in 65 Red, 1 finer (10/08).(#92156)

349 **1887 MS65 Red NGC.** Sun-gold with glimpses of campfire-red. Sharply struck, lustrous, and unabraded with a single tiny spot beneath the chin. Encapsulated in a prior generation holder. Census: 22 in 65 Red, 4 finer (11/08).(#2159)

### Luminous 1888 Cent, MS65 Red

350 **1888 MS65 Red PCGS.** The luminous surfaces of this Gem are adorned with rich orange-gold color, and an attentive strike imparts sharp definition to the design elements, the sole exception being softness in the first three feathers. A scattering of tiny spots is noted on both sides. Encapsulated in a green-label holder. Population: 30 in 65 Red, 13 finer (11/08).(#2168)

## Bold 1889 Red Gem Cent

351 **1889 MS65 Red PCGS.** Soft reddish-gold luster displays traces of light green. An exacting strike leaves bold definition on the design elements, though the feather tips reveal minor softness. Both sides have been well cared for. Housed in a green-label holder. Population: 32 in 65 Red, 6 finer (11/08).(#2174)

352 **1890 MS65 Red PCGS.** A truly lovely Gem, fully red and highly lustrous, with unmarked and nearly carbon-free surfaces overall. Just one tiny carbon speck is noted in the upper left obverse field. This issue becomes extremely scarce at any higher grade levels. Population: 44 in 65 Red, 8 finer (11/08).(#2177)

## Lustrous 1891 Cent, MS66 Red

353 **1891 MS66 Red NGC.** Both sides of this Premium Gem are awash with pumpkin-orange luster, and each displays sharply struck design elements, including crisp definition on all four diamonds. A few minuscule light flecks do not detract. A difficult coin to locate with full red in the better Mint State grades. Census: 3 in 66 Red, 0 finer (10/08).(#2180)

354 **1893 MS65 Red PCGS.** Beautiful orange-red dominates this lustrous and well struck cent. The reverse is close to pristine, and the obverse has only wispy surface grazes. Population: 77 in 65 Red, 22 finer (11/08).(#2186)

355 **1894 MS65 Red PCGS.** A lustrous pumpkin-orange Gem with exemplary surfaces. Marks are essentially absent, and carbon is minimal. Population: 65 in 65 Red, 23 finer (11/08).(#2189)

## Gorgeous 1895 Cent, MS66 Red

356 **1895 MS66 Red NGC.** Ex: Maine Roll. A gorgeous fire-red Premium Gem. The strike is exquisite, even on the feather tips and shield, and the lustrous surfaces are unabraded save for faint contact on the cheek and above the wreath ribbon. Rare in such carbon-free quality. Census: 32 in 66, 8 finer (10/08).(#2192)

## Attractive 1896 Cent, MS66 Red

357 **1896 MS66 Red NGC.** Ex: Richmond Collection. The 1896 is a scarce issue, especially in full red Gem and better grades. Copper-gold color graces this Premium Gem, and a well executed strike leaves sharp definition on the design elements. A couple of minute obverse marks might well preclude an even higher grade. Census: 7 in 66 Red, 2 finer (10/08).(#2195)

## Gem 1897 Indian Cent, MPD, FS-011.5

358 **1897 MS65 Brown NGC.** FS-011.5. MPD. The 1 in neck variety. A dramatic and extremely important variety once one knows where to look, with the flag or left base of a misplaced 1 protruding like a horn from Liberty's neck. Well-defined and lustrous with smooth mahogany and violet-brown surfaces. (#2196)

## Appealing 1897 MS66 Red Cent

359 **1897 MS66 Red NGC.** The 1897 cent can be located in most Mint State grades except for MS65 Red or higher. This Premium Gem displays copper-gold satiny luster, and is exquisitely struck on the design features. Nicely preserved throughout. Census: 9 in 66 Red, 2 finer (10/08).(#2198)

## Vibrant 1898 Cent, MS67 Red

360 **1898 MS67 Red NGC.** Vibrant copper-orange luster exudes from both sides of this Superb Gem cent, each of which exhibits sharply struck design elements, save for softness on a couple of the feather tips. This is an impeccably preserved coin that will fit comfortably in a high-grade collection. Census: 9 in 67 Red, 0 finer (10/08). (#2201)

361 **1899 MS66 Red NGC.** Snow-2 with nice repunching on the 8 and second 9. Vibrant luster adorns orange-gold surfaces laced with whispers of mint-green. All four diamonds possess complete detail, but most of the feather tips are softly defined. Both sides are close to immaculate. Encased in a prior generation holder. Census: 53 in 66, 10 finer (11/08).(#2204)

## Exquisite 1899 Cent, MS67 Red

362 **1899 MS67 Red NGC.** This Superb Gem displays virtually unsurpassable quality for the issue. The strike is sharp and the smooth faces speak volumes for the care with which this coin was preserved over the past century. Variegated hues of sunset-red and copper-gold are exquisitely displayed on both sides. The surfaces are extremely frosty with swirling mint luster. One tiny carbon fleck is noted under the E of CENT, this being mentioned solely for future identification purposes. Obviously very scarce at this grade level. Census: 9 in 67 Red, 1 finer (10/08).(#2204)

## Radiant 1900 Cent, MS66 Red

363 **1900 MS66 Red PCGS.** Gold luster radiating from both sides of this Premium Gem displays a splash of orange on the upper obverse. Aside from softness in the first two feather tips, an exquisite strike is apparent on the design features. A couple of obverse marks and some light flecks may well preclude an even higher grade. Population: 57 in 66 Red, 6 finer (11/08).(#2207)

364 **1901 MS66 ★ Red NGC.** Snow-12. The date is lightly repunched. Deep orange, fire-red, and apple-green endows this lustrous and precisely struck Premium Gem. Minute carbon is all that limits the grade. Presently the only Red business strike 1901 cent to receive a Star designation from NGC (11/08).(#2210)

365 **1901 MS66 Red NGC.** A lustrous orange-red Premium Gem that appears pristine aside from a solitary fleck beneath the lowest headdress feather. The strike is crisp except for portions of the dentils. Census: 27 in 66 Red, 2 finer (11/08).(#2210)

366 **1902 MS66 Red NGC.** Lovely orange-red color encompasses this lustrous and assertively struck Premium Gem. Well preserved and highly attractive. In an older generation holder.(#2213)

367 **1902 MS66 Red NGC.** This crisply struck Premium Gem provides potent luster and undisturbed surfaces. The reverse is deep orange, while the obverse is lighter straw-gold and apricot. Housed in a former generation holder.(#2213)

368 **1903 MS66 Red PCGS.** A pinpoint-sharp Premium Gem with dazzling luster and lovely olive and orange-red color. Population: 57 in 66 Red, 5 finer (11/08).
*Ex: Long Beach Signature (Heritage, 2/2005), lot 5251, which realized $1,437.50.*(#2216)

## Splendid 1903 Cent, MS67 ★ Red

369 **1903 MS67 ★ Red NGC.** Booming luster and a penetrating strike proclaim the quality of this splendid Superb Gem, a great candidate for the high-end type or date set. Generally peach-red, although the centers have hints of aqua-blue. A pleasing piece, pristine save for a few pinpoint flecks in the date area. Census: 2 in 67 ★ Red, 0 finer (10/08).(#2216)

370 **1905 MS66 Red NGC.** Blazing luster, a needle-sharp strike, peach-gold color, and mark-free surfaces attest to the quality of this late date Premium Gem. The obverse has minor carbon. Certified in a former generation holder. Census: 56 in 66 Red, 4 finer (11/08). (#2222)

371 **1906 MS66 Red NGC.** A sharply struck olive-gold and peach Premium Gem that has vigorous luster and exquisite surfaces. In a former generation holder. Census: 33 in 66, 1 finer (11/08). (#2225)

372 **1908 MS66 Red NGC. CAC.** The pleasing orange-gold surfaces show strong luster, and the design elements are sharply impressed. Carefully preserved and practically mark-free, though a handful of flyspecks are present on the reverse. NGC has graded just two finer Red pieces (11/08).(#2231)

## Lovely MS65 Red 1908-S Cent

373 **1908-S MS65 Red PCGS.** Orange and straw-gold shades embrace this lustrous and unmarked semi-key Gem. Carbon is essentially absent, and the eye appeal is formidable. The 1908-S was the lowest mintage of any issue since 1877, although the following year 1909-S had an even smaller production, due to the change in design. (#2234)

## Lustrous 1908-S Cent, MS66 Red

374 **1908-S MS66 Red NGC.** The 1908-S cent is scarce in the high-end Mint State grades, especially with the Red designation. The lustrous, gold surfaces of this Premium Gem display well struck design elements, except for weakness in the feather tips. Nicely preserved, with just a few light flecks mentioned for complete accuracy. Census: 23 in 66 Red, 0 finer (10/08).(#2234)

## Vibrant MS66 Red 1908-S Cent

375 **1908-S MS66 Red NGC.** This low mintage Premium Gem is devoid of marks or spots. The wood-grain surfaces are lustrous and display shades of olive-gold. Crisply struck despite slight blending on the uppermost feathertips. The first branch mint cent issue. Census: 23 in 66 Red, 0 finer (11/08).
*From The Plymouth Collection.*(#2234)

376 **1909 MS66 Red PCGS.** Intensely lustrous with beautiful sunset-orange and lime-green toning across the dazzling surfaces. Boldly struck and minimally marked. A great Premium Gem example from the final year of the Indian cent series. PCGS has only graded four pieces finer (11/08).(#2237)

377 **1909 MS66 Red PCGS. CAC.** This is a gorgeous, fully red Premium Gem Indian cent from the final year of the long-lived series. Scintillating mint luster illuminates the nearly pristine surfaces, which exhibit boldly struck devices. PCGS has only graded four specimens finer (11/08).
*From The James Mossman Collection.*(#2237)

## MS64 Red 1909-S Indian Cent

378 **1909-S MS64 Red NGC.** Lustrous surfaces display pleasing orange coloration, and exhibit sharply struck design elements. A few tiny flecks on each side and a hint of ebony on the left border of the shield keep this piece from full Gem classification. All in all, a pleasing key branch-mint issue.
*From The Plymouth Collection.*(#2240)

## Choice Red 1909-S Indian Cent

379 **1909-S MS64 Red NGC.** Orange and green-gold accents adorn this lustrous and unabraded near-Gem. A precisely struck key date cent with minimal carbon and good eye appeal. Only the second year that cents were struck at San Francisco, delayed by a 19th century law designed to protect silver interests.(#2240)

## Pleasing Choice Red 1909-S Cent

380 **1909-S MS64 Red PCGS. CAC.** A lustrous sun-gold near-Gem with minimal carbon and a small area of gunmetal-gray near the IT in UNITED. A crisply struck and unabraded example of this famous low mintage issue. Production was interrupted by the advent of the Lincoln cent. Housed in a green label holder.(#2240)

### Desirable Red Near-Gem 1909-S Indian Cent

381 **1909-S MS64 Red PCGS.** Radiantly lustrous, with satiny golden-tan surfaces that reveal boldly struck design elements and careful preservation. As usual for this final-year issue, the top three feathertips of Liberty's headdress are somewhat softly rendered. Scattered carbon specks and a couple of tiny contact marks near the jaw confirm the near-Gem grade assessment. An important, semi-key date that actually has a lower mintage than the vaunted 1877 issue.(#2240)

### Magnificent 1909-S Cent, MS65 Red

382 **1909-S MS65 Red PCGS.** Pretty copper-gold luster adorns both sides of this S-mint Gem, and a well executed strike imparts strong definition to the design features, with the usual exception of the feather tips. Richard Snow (2006) writes that "all 1909-S cents will show this feather tip weakness." This is a truly nice, well preserved coin. Housed in a first generation holder.(#2240)

### Vibrant Red Gem 1909-S Indian Cent

383 **1909-S MS65 Red PCGS.** This peach-red key date Cent exhibits potent luster and is splendidly unabraded aside from faint contact on the cheek. Only minuscule carbon stands in the way of an even finer grade. Only the second branch mint cent issue, and the mintage of 309,000 pieces is the lowest of the series.(#2240)

## PROOF INDIAN CENTS

### Choice Proof 1859 Cent
### Single Year Laurel Wreath Reverse

384 **1859 PR64 NGC.** Orange-gold and lime-green shades emerge when this precisely struck near-Gem is rotated beneath a light. The smooth surfaces have minimal carbon. Business strikes for this single-year design subtype are plentiful in Mint State, but proofs are much scarcer, since only 800 specimens were struck.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#2247)

### Pleasing PR66 1860 Indian Cent

385 **1860 PR66 PCGS.** This pleasing Premium Gem is boldly impressed, and the sun-gold and chestnut-tan fields and devices are undisturbed aside from the occasional pinpoint fleck. Proofs of this date are far more difficult to locate than implied by the mintage of 1,000 pieces, since many sets went unsold. Population: 7 in 66, 0 finer (11/08). (#2253)

### Gem Proof 1861 Indian Cent

386 **1861 PR65 NGC.** The reflective pumpkin-gold fields appear virtually as made. The strike is exquisite throughout. Despite a mintage of 1,000 pieces, the proof 1861 is rare. Much of the mintage was eventually melted by the Mint due to low sales of proof sets. Census: 19 in 65, 6 finer (11/08).
*From The Martin L. Diffenbaucher, Jr. Collection.*(#2256)

## Lovely Gem Proof 1861 Cent

387 **1861 PR65 PCGS.** This pinpoint-sharp Gem features undisturbed tan, gold, and olive surfaces. Although the reported proof mintage is 1,000 pieces, much of the production for the Civil War date went unsold and was eventually melted by the Mint. In a green label holder. Population: 18 in 65, 2 finer (11/08).(#2256)

## Sharp 1861 Cent, PR65 Cameo

388 **1861 PR65 Cameo PCGS.** Unlike many 1861 proof cents, this piece is deeply mirrored in the fields. Likewise, the devices show a significant amount of mint frost that gives the coin a pronounced cameo contrast on each side. The only mentionable flaw is a small carbon spot in the left obverse field below the I in UNITED. Population: 4 in 65 Cameo, 0 finer (11/08).(#82256)

## Delightful PR66 1862 Cent

389 **1862 PR66 NGC.** Few proof 1862 Indian cents can match the aesthetic and technical merits of this captivating Gem. Both sides are tinged in orange-brown colors that brighten substantially as the coin rotates beneath a light. The devices are crisply impressed throughout, and the surfaces are free of grade-limiting hairlines. A splendid Premium Gem for the discerning specialist. Census: 28 in 66, 4 finer (11/08).
*Ex: Long Beach Signature (Heritage, 10/2001), lot 5358.*(#2259)

## Charming PR67 1862 Cent

390 **1862 PR67 NGC.** Bright, pale lemon-gold surfaces with hints of salmon and tan. The strike and preservation are equally laudable. With an estimated mintage of just 550 pieces, few Superb Gem proofs have survived to the present day; NGC has graded only four such coins, and PCGS just one (11/08).(#2259)

## Splendid PR66 Cameo 1863 Cent

391 **1863 PR66 Cameo PCGS.** An intricately struck and unabraded specimen of this elusive Civil War proof date. Contrast between the devices and the flashy fields is particularly evident on the reverse. A mere 460 proofs were struck. Population: 8 in 66 Cameo, 0 finer (11/08).
*Ex: V. A. Everest Collection (Heritage, 7/2003), lot 5412, which realized $5,290.*(#82262)

## Pleasing 1864 Copper Nickel Cent PR66 Cameo

392 **1864 Copper Nickel PR66 Cameo PCGS.** The frosted motifs of this Premium Gem proof are highlighted by the deeply mirrored fields. A delicate blend of orange, lavender, and yellow-gold patination bathes both sides, each of which has benefited from a precision strike. A handful of tiny flecks does not negate the pleasing eye appeal. Population: 6 in 66 Cameo, 1 finer (11/08).(#82265)

## Low Mintage Bronze No L
## 1864 Cent, PR64 Red and Brown

393 **1864 Bronze No L PR64 Red and Brown PCGS.** The obverse has yellow-gold borders and a lilac-toned center. The reverse has peripheral orange-gold but is primary steel-blue and deep plum-red. Exactingly struck and unabraded. The Guide Book lists a lowly mintage of 150+ pieces for the Bronze No L proof cent. An opportunity to acquire an attractive example of this underappreciated scarcity.(#2277)

## PR65 Red and Brown
## 1864 Bronze No L Cent, Snow-11

394 **1864 Bronze No L PR65 Red and Brown PCGS.** Snow-11. Curious concentric die lines emanate from the obverse center, perhaps a relic of the Janvier reduction lathe device. This Civil War Gem is nicely struck and retains most of its initial fire-red color. The wreath and the cheek display tints of steel-blue. No marks or carbon are present, although the field near the lower right shield corner is mildly granular. Encased in a green label holder. Population: 32 in 65, 15 finer (11/08).(#2277)

## Cameo Red Gem Proof
## 1864 Bronze No L Cent

395 **1864 Bronze No L PR65 Red Cameo PCGS.** Rose-red and lime-green invigorate this flashy and unabraded Gem. The strike is precise except for the tips of the upper three headdress feathers. Minute obverse carbon is all that declines an even finer third party assessment. Population: 4 in 65 Red Cameo, 1 finer (11/08). (#82278)

## Sharp PR65 Red Cameo 1867 Cent

396 **1867 PR65 Red Cameo NGC.** The peach-red fields display irrefutable contrast with the radiant devices. The contrast is particularly compelling on the reverse. This needle-sharp Gem lacks hairlines or other abrasions, and the minor carbon on the cheek and denomination is barely worthy of mention. Census: 4 in 65 Red Cameo, 1 finer (11/08).
*From The Martin L. Diffenbaucher, Jr. Collection.*(#82290)

## Fabulous 1867 Indian Cent, PR65 Red Cameo
## Ex: Heathgate Collection

397 **1867 PR65 Red Cameo PCGS.** A needle-sharp Gem with good contrast and impressive eye appeal. The luminous pumpkin-orange and rose surfaces are essentially undisturbed, although a tiny toning fleck is centered above the N in ONE. Although the traditional mintage of 625 pieces has been questioned, the 1867 is unquestionably scarcer than any post-1877 proof issue. As of (11/08), only five pieces have been certified as Gem Red Cameo by PCGS, with just two coins even finer in Cameo condition.
*Ex: Heathgate Collection (Ira & Larry Goldberg, 2/2001), lot 1100, which realized $5,290.*(#82290)

## Pleasing PR66 Red 1870 Cent

398 **1870 PR66 Red NGC.** The fields show the usually seen die polishing marks on each side. Bright and highly reflective, each side shows deep, cherry-red color that lightens around the denticles. The devices are fully struck, and the surfaces overall are problem-free. Census: 6 in 66 Red, 0 finer (11/08).(#2299)

## Effusive 1870 Cent, PR66 Red

399 **1870 PR66 Red NGC.** While issues such as the 1870, 1871, and 1872 cents have higher reported mintages than their peers from the years immediately following the Civil War, paradoxically, the later coins are more elusive today. This Red Premium Gem, tied for numerically finest in the color category for its issue (11/08), is attractively detailed with fresh copper-orange surfaces. (#2299)

400 **1872 PR65 Red and Brown PCGS.** A strong woodgrain appearance characterizes both sides of this Gem specimen. Sharply struck and free of disturbing marks or hairlines. An important proof issue due to the scarcity of business strikes. Population: 65 in 65 Red and Brown, 7 finer (11/08).(#2304)

## Lofty PR66 Red Closed 3 1873 Cent

401 **1873 Closed 3 PR66 Red PCGS.** A beautiful peach-red Premium Gem that possesses a powerful strike and satin luster. Study beneath a lens fails to find any marks, and carbon is essentially absent save for a small obverse fleck near 12 o'clock. This proof date features a heavy right pendant on the T in CENT. Population: 3 in 66 Red, 0 finer (11/08).(#2308)

402 **1876 PR66 Red and Brown NGC.** A magnificent olive-gold and apricot Premium Gem, free from carbon or marks. Outstanding from a technical perspective, and worthy of a substantial bid. (#2316)

## Beautiful PR66 Red 1876 Cent

403 **1876 PR66 Red PCGS.** Cherry-red tints enrich the borders, while the fields and portrait are primarily yellow-gold with glimpses of olive-green. A precisely struck and decidedly mirrored Premium Gem, kept from perfection by a few tiny obverse toning flecks. Population: 8 in 66 Red, 0 finer (11/08).(#2317)

## Delightful PR62 Brown 1877 Cent

404 **1877 PR62 Brown NGC.** Bold N in ONE. This satiny specimen shows generous glimpses of initial orange-red, although the piece is designated Brown by NGC. Exactingly struck, and well preserved despite a minor spot above the E in ONE. Only 900 proofs were struck. A desirable yet affordable representative of this coveted key date.(#2318)

## Gem Red and Brown Proof 1877 Cent

405 **1877 PR65 Red and Brown NGC.** Bold N in ONE. This key date Gem comes close to full Red, but the central reverse has light streaks of sea-green blended with peach and rose-red. The strike is precise, abrasions are absent, and only inconsequential carbon is present. In demand due to the low mintage of the 1877 circulation strike, only the 1909-S has a lesser production.(#2319)

## Great 1877 Indian Cent, PR65 Cameo

406 **1877 PR65 Cameo PCGS.** This is a simply beautiful specimen striking with fully original mint-red color that reveals olive tinged undertones at indirect angles. The razor-sharp strike is far superior to that often seen on business strikes in this series, and the fields glow with an intense reflectivity that could only have been imparted by proof production methods. A great representative of the ever-popular 1877 Indian cent in proof format. Population: 2 in 65 Cameo, 2 finer (11/08).(#82320)

## Beautiful 1878 Indian Cent, PR66 Cameo

407 **1878 PR66 Cameo PCGS.** This is a simply splendid proof 1878 Indian cent. The eye appeal of the piece is the finest that we have ever seen, for any specimen from this issue; which has few survivors that display noteworthy cameo contrast. Sharply struck with intermingled peach, rose, deep-purple and lime-green coloration on the obverse. Impressively preserved and free of surface distractions. Population: 5 in 66 Cameo, 0 finer (11/08).(#82323)

## Important PR67 Red 1882 Cent

408 **1882 PR67 Red PCGS.** Yellow-gold with glimpses of fire-red at the centers. A satiny Superb Gem with an exquisite strike and a nearly pristine appearance. Unimportant obverse carbon barely merits mention. Exceptional quality for this proof date, which usually comes spotted or partly toned. Certified in a green label holder. Population: 4 in 67 Red, 0 finer (11/08).(#2335)

## Lavishly Toned PR67 1883 Cent

409 **1883 PR67 Brown PCGS.** Dramatically toned in deep swirls of violet-red, cobalt-blue, orange, and apple-green. This sharply struck Superb Gem appears pristine beneath a loupe, without any indication of marks or carbon. A prize for the connoisseur of patinated coinage. Population: 3 in 67 Brown, 0 finer (11/08).(#2336)

## Immaculate 1885 Cent PR68 Brown

410 **1885 PR68 Brown NGC.** Reflective fields highlight the devices at most angles. Golden-tan and sky-blue patina are accented with whispers of lavender and orange-gold at the margins, and an attentive strike leaves strong definition on the design elements. Immaculately preserved surfaces confirm the numerical grade. Census: 2 in 68, 0 finer (11/08).(#2342)

## Exquisite Red Premium Gem Proof 1886 Type One Cent

411 **1886 Type One PR66 Red PCGS.** *Ex: Heathgate Collection.* The fields are nicely reflective and each side shows rich golden-red toning, with deep purple-rose coloration observed on the upper reverse. Exquisitely preserved and free of distractions. Of the 4,290 proof cents struck this year, only 1,800 pieces were of the Type One variety. Population: 11 in 66 Red, 0 finer (11/08).(#2347)

## Lovely Cherry-Red 1887 Cent PR66

412 **1887 PR66 Red PCGS.** The cherry-red centers are bounded by lighter straw-gold. The Indian's cheek shows glimpses of olive. This penetratingly struck representative has scant indications of carbon, and ranks among the finest certified specimens. Population: 2 in 66 Red, 0 finer (11/08).(#2350)

### Exquisite 1889 Cent, PR66 Red

413 **1889 PR66 Red PCGS.** Among the finest certified survivors of this 1880s production, both sides are ablaze with copper-golden luster. There is a tinge of bright golden iridescence intermingled over the reverse, and the surfaces retain their essentially mark-free appearance at all angles. A no-questions Premium Gem. Population: 8 in 66 Red, 0 finer (11/08).(#2356)

### Radiant PR66 Red 1893 Cent

414 **1893 PR66 Red PCGS.** Prominently mirrored with attractive orange-red color along with hints of olive emanating from the devices. Perfect save for two or three microscopic flecks. A wonderful addition to a competitive Registry Set. Population: 5 in 66 Red, 2 finer (11/08). *Ex: Central States Signature (Heritage, 4/2003), lot 5409; Baltimore Signature (Heritage, 7/2003), lot 5509.*(#2368)

415 **1901 PR66 Red PCGS.** This is a beautiful Premium Gem proof Indian cent with crisply struck design elements and exquisitely preserved surfaces. Lovely golden orange-tan toning adorns both sides of this highly impressive specimen. Population: 20 in 66 Red, 7 finer (11/08).(#2392)

### Attractive PR66 Red 1905 Cent

416 **1905 PR66 Red PCGS.** The obverse is rich pumpkin-orange, while the reverse is lemon-gold with an upper crest of peach. A precisely struck Premium Gem with glassy fields and a solitary fleck within the E in CENT. Housed in a green label holder. Population: 12 in 66 Red, 2 finer (11/08).(#2404)

417 **1909 PR66 Red NGC. CAC.** This is a beautiful proof specimen from the final year of the Indian cent series, which endured for 50 years. From a scant mintage of 2,175 pieces, with few survivors at the Premium Gem grade level. Sharply struck with watery fields and lovely orange-gold and sea-green toning. Census: 10 in 66 Red, 0 finer (11/08).(#2416)

## LINCOLN CENTS

### 1909 VDB Doubled Die Lincoln FS-1101, MS66 Red

418 **1909 VDB Doubled Die MS66 Red PCGS.** FS-1101 (FS-012). The doubling is most prominent on the 190 of the date and on the RTY of LIBERTY. This is a splendid Premium Gem with pretty red-orange obverse coloration complementing a tinge of jade on the reverse, and there are no visible carbon flecks. Certified with the new PCGS five-digit variety number, for Registry Set collectors. Sharp and lustrous.

### Singular Red Gem 1909 VDB Cent

419 **1909 VDB MS68 Red NGC.** As the lone finest Red representative of this issue certified by NGC (11/08), this is a singular survivor with dramatic eye appeal. Fiery reddish-orange surfaces are virtually pristine with a subtle lightening of color at the central reverse. Exquisitely detailed and carefully preserved for nearly a century. (#2425)

420 **1909-S VDB XF40 PCGS.** An attractively detailed golden-brown XF example of this all-time collector favorite. The initials are crisp, and there are only a couple of minor obverse field marks. (#2426)

421 **1909-S VDB AU58 PCGS.** Just a touch of wear visits this well-defined example, generally mahogany-brown with varying elements of oak and honey-gold. Minimally marked and attractive, a solid representative of this famous Lincoln cent key.(#2426)

422 **1909-S VDB AU58 PCGS.** Just a trace of friction visits the highest design elements on this well struck example. Generally chocolate-brown with occasional hints of pumpkin-orange visible at the margins.(#2426)

423 **1909-S VDB—Corroded—ANACS. MS60 Details.** An unworn example with vibrant reddish-orange, peach, and violet patina across each side. The obverse displays beautifully, though two small patches of corrosion affect the reverse.(#2426)

424 **1909-S VDB MS62 Brown NGC.** Long acknowledged as the Lincoln cent key date, despite the greater scarcity of the 1914-D, the '09-S VDB has always captivated collectors due to its low mintage. This example is nicely preserved and shows boldly struck design elements. A single tiny contact mark is noted on Lincoln's forehead. (#2426)

425 **1909-S VDB MS62 Brown ANACS.** Both sides have a pleasing blend of chocolate-brown with traces of faded mint red that has now turned to light gold.(#2426)

### Pleasing MS63 Brown 1909-S VDB Cent

426 **1909-S VDB MS63 Brown PCGS.** Despite the Brown designation, this key-date Lincoln cent shows considerable faded honey-gold at the margins and in thin strands through the centers. Well struck with fewer abrasions than the Select designation might make one expect. Strong visual appeal with minimal carbon.(#2426)

427 **1909-S VDB MS63 Red and Brown PCGS.** Whispers of light tan patina visit the yellow-gold surfaces of this Select key-date Lincoln. A well executes strike leaves virtually complete definition on the design elements. Remnants of a light fingerprint are evident, slightly more so on the obverse.(#2427)

### Choice Red and Brown 1909-S VDB Cent

428 **1909-S VDB MS64 Red and Brown PCGS.** This intricately struck Choice cent possesses vibrant luster and is virtually unabraded. Carbon is also absent aside from a solitary spot on the stem of the right wheat ear. This low mintage, first year variety comes with an interesting fable concerning the professional jealousy of Chief Engraver Charles Barber.(#2427)

### Well-Struck MS64 Red and Brown Key 1909-S VDB Cent

429 **1909-S VDB MS64 Red and Brown PCGS.** This well struck Choice key date cent has muted fire-gold and gunmetal toning. The strike is penetrating, even on the VDB initials. No marks are detected, and carbon is minor. A worthy representative of this historic and widely collected low mintage issue.(#2427)

### Gem Red and Brown 1909-S VDB Cent

430 **1909-S VDB MS65 Red and Brown PCGS.** The obverse is essentially full Red, but the obverse is about evenly divided between deep orange-gold and steel-brown. Crisply struck and satiny with mark-free fields and devices. Only inconsequential carbon on the obverse field deters an even higher grade.(#2427)

### Charming MS65 Red and Brown 1909-S VDB Lincoln Cent

431 **1909-S VDB MS65 Red and Brown PCGS. CAC.** The reverse is yellow-gold and orange-red reverse, while the obverse is evenly divided into shades of rose-red and olive-gold. Lustrous, painstakingly struck, and exceptionally unabraded. Faint carbon near the shoulder is of little consequence. Close to full red, and a desirable key date Gem.(#2427)

### MS66 Red and Brown Key Date 1909-S VDB Cent

432 **1909-S VDB MS66 Red and Brown PCGS.** Orange-gold, apple-green, and ruby-red embrace the unabraded and original surfaces. This razor-sharp key date cent has satin luster and matte-like fields. The absence of carbon or marks ensures outstanding quality. Housed in an old green label holder.(#2427)

## MS66 Red and Brown Key Date 1909-S VDB Cent

433 **1909-S VDB MS66 Red and Brown NGC.** Whispers of tan patination visit both sides of this key-date Lincoln cent representative, but copper-gold luster still dominates each. An attentive strike imparts sharp definition to the design elements, including the grains and lines in the wheat stalks. Splendidly preserved surfaces appear mark-free and provide only negligible carbon. Protected within a former generation holder.(#2427)

## Lovely Red Near-Gem 1909-S VDB Cent

434 **1909-S VDB MS64 Red NGC.** A lovely yellow-gold Choice example of this perpetual collector favorite. The strike is needle-sharp, even on Brenner's initials. Marks are essentially absent, and only faint russet shading on the lower reverse precludes an even more lofty grade. Still considered by many to be the key date of the series.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#2428)

## Choice Red 1909-S VDB Cent

435 **1909-S VDB—Planchet Flaw Obverse—MS64 Red PCGS.** A roundish depression in the right obverse field in front of the nose is as made, caused by a strike through a foreign object such as a small piece of metal. The mint error adds interest to this Choice key date cent, which has dazzling luster and light peach and straw-gold toning. Well struck and unabraded with occasional minute carbon. (#2428)

## Popular Red Gem 1909-S VDB Cent

436 **1909-S VDB MS65 Red NGC.** Exceptionally sharp striking definition for this popular and low-mintage issue with vibrant luster. Surfaces are minimally marked and generally pale copper-gold or orange with occasional emerald overtones. A single carbon fleck over Lincoln's shoulder has little effect on the eye appeal.(#2428)

## Red Gem Key 1909-S VDB Cent

437 **1909-S VDB MS65 Red PCGS. CAC.** A wonderful representative of this famous series key. Yellow-gold overall with a hint of fire-red on Lincoln's hair. Lustrous and devoid of consequential abrasions or carbon. The low mintage and historic 1909-S VDB is always available for a price in Mint State, but examples of the present exquisite quality stand out from their peers.
*From The James Mossman Collection.*(#2428)

## Dazzling Gem Red 1909-S VDB Cent

438 **1909-S VDB MS65 Red PCGS.** This splendid Gem is primarily sun-gold but has hints of lime-green. Potent luster sweeps exactingly struck and essentially unabraded surfaces. Minuscule carbon is generally relegated to the right obverse margin. An impressive example of this widely held key date. Encapsulated in a green label holder.(#2428)

## Rich Red Gem 1909-S VDB Cent

439 **1909-S VDB MS65 Red PCGS.** Lustrous reddish-gold surfaces host boldly executed devices. Close examination reveals a few tiny flecks and slight muting of color on the reverse that prevents a higher grade. Still, a remarkably well-preserved Red Gem representative that should find a welcome place in a high-end Lincoln cent cabinet. (#2428)

## Lustrous 1909-S VDB Cent, MS65 Red

440 **1909-S VDB MS65 Red PCGS.** Beautiful copper-gold luster invigorates this key date Lincoln cent, and an attentive strike emboldens the bow tie, date and mintmark, and lines and grains in both wheat wheat stalks. A few minute flecks are hardly noticeable. Housed in a green label holder.(#2428)

## Exemplary MS67 Red 1909 Cent

441 **1909 MS67 Red PCGS.** A sun-gold Superb Gem that also has glimmers of olive-green and a swath of fire-red across the obverse periphery. Intricately struck aside from the tops of the letters in TRUST. Encapsulated in a green label holder. Lustrous and beautiful. Population: 54 in 67 Red, 0 finer (11/08).(#2431)

## Red Superb Gem 1909 Cent

442 **1909 MS67 Red PCGS.** Despite a mintage that is more than 2 1/2 times greater than its VDB counterpart, this first year Lincoln is scarcer in Gem and better grades. The present fully struck orange-gold Superb Gem provides potent luster and undisturbed surfaces. Population: 54 in 67, 0 finer (11/08).
*Ex: Central States Signature (Heritage, 4/2006), lot 604; FUN Signature (Heritage, 1/2007), lot 1741.*(#2431)

443 **1909-S MS65 Red PCGS.** This first-year issue is known to be well produced, but the currently-offered Gem example is even finer than usual. Technically impressive with evenly, crisply struck design elements, great luster, and excellent surface preservation. A faint woodgrain effect on both sides increases the coin's eye appeal. (#2434)

## Exquisite 1909-S Lincoln Cent MS66 Red

444 **1909-S MS66 Red PCGS.** A precision strike leaves exquisite delineation on the design features of this Premium Gem. Splashes of orange and crimson adorn the copper-gold surfaces. A few minute grade-consistent marks do not detract from the coin's overall great eye appeal. PCGS has graded a mere four coins finer.(#2434)

445 **1909-S S Over Horizontal S MS66 Red NGC. CAC.** FS-012.3. The underlying horizontal mintmark is obvious without magnification. The fresh mint bloom exhibited by this Premium Gem cent gives it the appearance of a piece just struck a few days or weeks ago; not almost 100 years ago. Typically well struck, and free of even the most incidental contact on both sides. Census: 24 in 66 Red, 0 finer (11/08).(#92434)

## Worthy MS66 Red 1910-S Cent

446 **1910-S MS66 Red PCGS.** A magnificent Premium Gem with dazzling luster and consistent pumpkin-gold color. The strike is exacting, and a loupe is required to locate the solitary small mark and rare fleck of carbon that denies an even higher grade. Housed in a green label holder. Population: 60 in 66 Red, 2 finer (11/08). (#2440)

## Imposing MS66 Red 1911-D Cent

447 **1911-D MS66 Red PCGS.** This radiant pumpkin-gold Premium Gem is nearly bereft of contact, and the occasional pinpoint fleck is of little concern. This early branch mint issue is seldom located in such exceptional quality. Certified in an old green label holder. Population: 17 in 66 Red, 1 finer (11/08).(#2446)

## Captivating 1911-S Cent MS66 Red and Brown

448 **1911-S MS66 Red and Brown NGC.** Lightly granular, matte-like surface textures characterize both sides of this Premium Gem S-mint. Copper-gold luster dominates the obverse, while ceding somewhat to light tan patina on the reverse margins. An attentive strike sharpens the design elements, and both faces are devoid of significant marks or spots. Census: 3 in 66 Red and Brown, 0 finer (11/08).(#2448)

## Beautiful MS66 Red 1912 Cent

449 **1912 MS66 Red PCGS.** Excellent satiny luster with remarkably fresh copper-orange surfaces and a strong strike. Aside from a tiny flaw to the right of Lincoln's forehead, each side is largely undisturbed. In a green label holder. Highly elusive any finer with Red surfaces; PCGS has certified just seven such pieces (11/08). (#2452)

## Conditionally Scarce Gem Red 1912-D Lincoln Cent

450 **1912-D MS65 Red PCGS.** Sharply struck except for weakness on AM of AMERICA, this a lovely, fully red Gem Lincoln cent from the fourth year of this immensely popular coinage series. Lustrous and highly attractive, with satiny surfaces that show a few flyspecks but seem essentially blemish-free on both sides. PCGS has only graded nine pieces finer, as of (12/08).(#2455)

## Fire-Red MS66 1913 Cent

451 **1913 MS66 Red PCGS.** A wonderful orange-red Premium Gem from the first year of the Wilson Administration. Boldly struck, highly lustrous, and completely devoid of marks. A glass finally finds a couple of trivial flecks. In an old green label holder. Population: 60 in 66 Red, 4 finer (11/08).(#2461)

## Lovely Red Gem 1913-S Cent

452 **1913-S MS65 Red PCGS.** This satiny pumpkin-gold Gem has an exemplary strike and remarkably clean, unmellowed surfaces. Few West Coast collectors set aside examples of this lower mintage branch mint issue prior to the 1930s. Encapsulated in an old green label holder. Population: 43 in 65 Red, 2 finer (11/08).(#2467)

## Magnificent Red MS66 1914 Cent

453 **1914 MS66 Red PCGS.** A gorgeous orange-red Premium Gem whose lustrous surfaces are exceptionally close to immaculate. The strike is unimprovable, and the eye appeal merits superlatives. A high mintage date, but few remain in similar quality. Encased in a green label holder. Population: 46 in 66 Red, 3 finer (11/08). (#2470)

## Choice Red and Brown 1914-D Cent

454 **1914-D MS64 Red and Brown NGC.** This low mintage key date cent comes fairly close to full red, but the fields and devices have mellowed slightly over the past 95 years. A loupe reveals minor carbon, but both sides are unabraded. While the 1909-S VDB cents were eagerly hoarded, little saving accompanied the 1914-D, and the latter is far scarcer in Mint State.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#2472)

## Key Date 1914-D Cent MS64 Red and Brown

455 **1914-D MS64 Red and Brown PCGS.** The copper-gold surfaces of this near-Gem key date Lincoln display occasional tan toning spots, somewhat more so on the obverse. Sharp definition occurs on the design elements, save for weakness in portions of the right wheat stalk. Encapsulated in an old green-label holder.(#2472)

## Pleasing Red and Brown Gem 1914-S Cent

456 **1914-S MS65 Red and Brown NGC.** This is a fully lustrous coin, perhaps 40% red and with the remainder a pleasing light brown color that creates a nice overall visual effect. The strike and surface quality are fully in line with the assigned grade. As of (11/08), exactly 200 1914-S cents have been certified with Red color, regardless of grade, and fewer than 100 have been certified as Gems with any color designation. Because of the dearth of alternatives, gem level Red and Brown coins such as the present piece enjoy high demand from date collectors.
*From The Findley Collection.*(#2475)

## Rich Red Gem 1914-S Cent

457 **1914-S MS65 Red NGC.** This is a sharply struck Gem with deep orange luster. Not as rare as the 1914-D in absolute terms, but potentially harder to locate in Gem quality. Take a look at the population figures. Only a few tiny spots are visible under close inspection. Census: 5 in 65 Red, 0 finer (11/08).(#2476)

## Impressive 1915 Cent, MS66 Red

458 **1915 MS66 Red PCGS.** A lovely orange-red Premium Gem that possesses blazing cartwheel sheen and appears completely devoid of abrasions. Carbon flyspecks are also absent. Phenomenal quality for this lower mintage Philadelphia date. It is theoretically possible to obtain a higher graded example, but it would be a Herculean task to surpass the eye appeal. Population: 79 in 66 Red, 6 finer (11/08). (#2479)

## Pleasing 1915-S Lincoln Cent, MS64 Red and Brown

459 **1915-S MS64 Red and Brown PCGS.** The razor-sharp striking definition is impressive on both sides of this lustrous near-Gem example. A modest degree of carbon restricts the grade, but the satiny surfaces are pleasingly free of even the smallest marks. The coloration is more golden-tan than Red and Brown, and the eye appeal of the piece is substantial for the grade.(#2484)

460 **1915-S MS64 Red PCGS.** Pale wheat-gold surfaces show occasional undercurrents of violet. Well-defined with textured fields that show occasional carbon, which accounts for the grade. Population: 49 in 64 Red, 33 finer (11/08).(#2485)

## Fire-Red Gem 1915-S Cent

461 **1915-S MS65 Red PCGS.** An intricate strike and vibrant luster ensure the quality of this unabraded early branch mint Gem. The brick-red color is undiminished by Father Time, and only the most patient observer can locate the infrequent pinpoint carbon beneath a loupe. Housed in an old green label holder. Population: 28 in 65 Red, 5 finer (11/08).(#2485)

## Condition Rarity 1916 Cent MS67 Red

462 **1916 MS67 Red PCGS.** The generous mintage of nearly 132 million pieces helps to make the 1916 Lincoln cent obtainable through Gem, and to some extent even through Premium Gem. Superb Gem Red specimens are rare, however. The lustrous orange-gold surfaces of this example exhibit well struck devices. A couple of minute flecks do not disturb. Population: 34 in 67 Red, 0 finer (11/08).(#2488)

## Elusive Choice Red 1916-S Cent

463 **1916-S MS64 Red PCGS.** Yellow and orange intermingle across this lustrous and minimally abraded near-Gem. Sharply struck, and enticing despite a couple of subtle gray areas on the bust truncation. Like all branch mint issues from the teens, the 1916-S is seldom seen full red. Housed in an old green label holder.(#2494)

## Challenging Red Gem 1917-D Cent

464 **1917-D MS65 Red PCGS.** Rose-red and sun-gold compete for territory across this lustrous and unabraded branch mint Gem. Long-in-use dies show some blending of detail at the obverse margin, but the strike itself is sharp. Housed in an old green label holder. Population: 43 in 65 Red, 5 finer (11/08).(#2500)

## Exquisite MS66 Red 1918 Cent

465 **1918 MS66 Red PCGS.** Dazzling luster and bright orange-gold color confirm the freshness of this precisely struck Premium Gem. Flawless aside from faint contact beneath the R in AMERICA. An outstanding cent that withstood the years much better than did President Wilson. Certified in an old green label holder. Population: 60 in 66 Red, 9 finer (11/08).(#2506)

466 **1918-D MS64 Red PCGS.** Vivid fire-red and sea-green coloration covers the well preserved surfaces of this highly attractive near-Gem. Fully struck and free of even small surface marks, with a handful of scattered carbon specks that keep it from grading as a Gem. In a green label PCGS holder.(#2509)

## Pleasing Red Gem 1918-D Cent

467 **1918-D MS65 Red PCGS.** A beautiful peach-gold Gem with coruscating luster and a decisive strike. Neither side has any visible marks, and a strong lens is needed to find the occasional minute carbon fleck. Struck from lightly rotated dies. Population: 28 in 65 Red, 7 finer (11/08).(#2509)

## Delightful MS65 Red 1918-S Cent

468 **1918-S MS65 Red NGC.** For decades the 1918-S has been underrated in Gem, particularly with fully Red surfaces, though recent years have brought greater awareness. The present coin offers sharply struck and well-preserved devices that rise from essentially unturned copper-gold fields. A few color variations are present on the reverse. Census: 7 in 65 Red, 0 finer (11/08).(#2512)

## Spectacular 1919 Cent, MS67 Red

469 **1919 MS67 Red NGC.** A spectacular example of this common, early issue. The surfaces are bright and very flashy with copper-gold luster. An attentive strike leaves full definition throughout. Amazingly clean surfaces are devoid of mentionable contact marks or spots. Census: 11 in 67 Red, 0 finer (11/08).(#2515)

470 **1919-D MS65 Red and Brown PCGS.** This is a marvelous Gem specimen that displays remarkable striking definition and highly lustrous champagne-tan surfaces. Mark-free on both sides, with a handful of scattered flyspecks that are hardly noticeable. In an old green label PCGS holder. Population: 25 in 65 Red and Brown, 2 finer (11/08).(#2517)

## Lovely MS66 Red 1919-D Cent

471 **1919-D MS66 Red PCGS.** This gorgeous campfire-red Premium Gem has a good strike and unperturbed surfaces. A glimpse of gunmetal-gray behind Lincoln's head barely merits mention. Denver Mint cents from the teens are rarely located so nice. Housed in a green label holder. Population: 11 in 66 Red, 1 finer (11/08). (#2518)

472 **1919-S MS64 Red PCGS.** Satin luster and even reddish-tan coloration are noted over both sides of this well preserved near-Gem cent. Boldly struck with crisp details on all of the obverse design elements, and just a trace of weakness on some of the reverse letters. A handful of scattered carbon flecks are noted on each side of this conditionally scarce example.(#2521)

## Handsome Red Gem 1920-D Cent

473 **1920-D MS65 Red PCGS.** Apricot and canary-gold encompass this shimmering and intricately impressed Gem. No abrasions are present, and only minute carbon on the lower right quadrant denies a higher grade. Another difficult Denver issue to secure in spot-free full red. Population: 84 in 65 Red, 5 finer (11/08).(#2527)

474 **1921 MS66 Red PCGS.** Mint State 1921 cents are relatively plentiful in all color designations. Even fully Red pieces are available, but as David Lange (2005) says: " ... these frequently fall short of the gem category because of spotting or indifferent striking quality." The MS66 Red example offered here does not fit this profile. A solid strike emboldens the design features, including sharp delineation in Lincoln's hair and bowtie, and on the grains and lines of both wheat stalks. Impeccably preserved surfaces exude intense luster, and display gorgeous golden color with splashes of golden-orange on the obverse. Population: 60 in 66 Red, 11 finer (11/08).(#2533)

475 **1921 MS66 Red PCGS.** Bright wheat-gold and honey-orange surfaces teem with luster. Excellent strike and eye appeal. PCGS has graded only 11 finer Red representatives (11/08).(#2533)

476 **1922 No D Strong Reverse Fine 15 PCGS.** FS-401, formerly FS-013.2. Die Pair 2. Even in this substantially worn state, the lines of the wheat ears remain bold. Chocolate-brown surfaces show few overt flaws.(#3285)

477 **1922 No D Strong Reverse VF25 NGC.** This is the variety known as Die Pair Two, considered by most to be the only true 1922 No D variety. Dark brown surfaces are slightly lighter on the reverse. (#3285)

478 **1922 No D Strong Reverse VF30 PCGS.** FS-013.2. Die Pair #2. The "true" No D cent, distinguished even in this moderately worn grade by the bold definition of the wheat ears. Minimally marked surfaces are largely chocolate-brown.(#3285)

479 **1922 No D Strong Reverse VF35 PCGS.** FS-401, formerly FS-013.2. Die Pair 2. This deep golden-brown key date cent is impressively unabraded and has pleasing sharpness on the lines of the wheat ears. The second 2 in the date is bold, characteristic of this coveted variety.
*From The Scott Rudolph Collection.*(#3285)

### Pleasing 1922 No D Cent, VF35, Die Pair Two

480 **1922 No D Strong Reverse VF35 NGC.** FS-401, formerly FS-013.2. Die Pair 2, evidenced by the strong second 2 in the date and the well-detailed reverse. Since the US Mint started coining cents in 1793, the Philadelphia Mint has produced coins every year except two — 1815, with no cents produced at all, and 1922, when cents were made only in Denver. As a result, the Denver 1922 cent variety minted without a D brings a very high premium from Lincoln cent collectors. This is pleasing circulated coin, with an even brown color, no undue surface marks, and a degree of wear consistent with the grade.
*From The Findley Collection.*(#3285)

### XF Strong Reverse 1922 No D Cent

481 **1922 No D Strong Reverse XF40 PCGS.** FS-401, formerly FS-013.2. Die Pair 2. A medium brown key date cent with sharp definition on the lines of the wheat ears. The obverse has lesser detail, as always for this important variety, which was struck from a well worn obverse die. The second 2 in the date is nonetheless bold, diagnostic for the issue. Problem-free, and pleasing for the grade. (#3285)

### Desirable Choice XF 1922 No D, Strong Reverse Cent

482 **1922 No D Strong Reverse XF45 ANACS.** FS-013.2. Die Pair #2. The most popular (and most desirable) of the missing-mintmark die pairs, distinguished by the bold detail on the wheat stalks of the reverse. Modestly worn chocolate-brown surfaces are minimally marked and pleasing. Housed in a small-format ANACS holder. (#3285)

### Scarce 1922 No D Strong Reverse Lincoln Cent, AU50

483 **1922 No D Strong Reverse AU50 PCGS. CAC.** FS-401, formerly FS-013.2. Die Pair 2. The most valued of three No D and Weak D varieties of this date, from the Denver Mint. Easily distinguished from its counterparts by the strong, full design detail on the reverse. This tobacco-brown example is evenly worn and lightly marked. (#3285)

## Impressive Key Near-Mint Strong Reverse No D 1922 Cent

484 **1922 No D Strong Reverse AU58 PCGS.** FS-401, formerly FS-013.2. Die Pair 2. This desirable chocolate-brown Borderline Uncirculated example displays traces of steel-blue on the reverse when it is rotated beneath a light. Partly lustrous and essentially unabraded with minor friction on Lincoln's jaw and cheekbone. A small subtle gray area above the date is of little import. Population: 39 in 58, 37 finer (11/08).(#3285)

485 **1922 No D Weak Reverse AU55 PCGS.** Die Pair 1. A die crack extends through L in PLURIBUS and O in ONE. This chestnut-brown piece is lightly worn, with a couple of tiny marks on Lincoln's temple and forehead.(#2540)

486 **1923-S MS64 Red and Brown PCGS.** Better-than-average striking definition for this issue, which is usually mushy on one side or the other. Scarce in all Mint State grades, this piece exhibits good luster although the original red is somewhat muted due to streaky, woodgrain effect on both sides. A blemish-free near-Gem cent, housed in a green label PCGS holder.(#2547)

## Challenging Choice Red 1923-S Cent

487 **1923-S MS64 Red PCGS.** Scintillating luster sweeps this unblemished peach-red near-Gem. The upper obverse has inconspicuous carbon that hardly affects the exquisite eye appeal. A challenging and low mintage San Francisco issue. Certified in a green label holder. Population: 58 in 64 Red, 16 finer (11/08). (#2548)

## Fire-Red MS66 1924 Cent

488 **1924 MS66 Red PCGS.** This handsome yellow-gold representative has dynamic cartwheel sheen and uncommonly carbon-free surfaces. Marks are also conspicuously absent, and the strike is bold save for the top of the O in ONE. Certified in a green label holder. Population: 63 in 66 Red, 4 finer (11/08).(#2551)

489 **1924-D MS65 Red and Brown NGC.** The frosty surfaces are about 30 percent mint red with blushes of tan and violet. Lincoln's hair and beard shows striking softness as does the upper half of the O in ONE, but most of the other features are sharp.(#2553)

490 **1925-D MS64 Red PCGS.** This satiny red-orange near-Gem is well struck on the reverse, and only shows minor weakness on the obverse. Fully Red pieces are scarce, but MS64 Red is the most available level for such coins. Nicely preserved and free of noticeable surface distractions.(#2563)

## Dazzling Red Gem 1925-D Cent

491 **1925-D MS65 Red PCGS.** A lovely brick-red Gem with vibrant luster and refreshingly unabraded fields and devices. Generally sharp strike despite trivial incompleteness on peripheral elements. One tiny spot between the ON in ONE corresponds to the grade. Encased in a green label holder. Population: 39 in 65 Red, 1 finer (11/08).(#2563)

## Sharp 1925-S Cent MS64 Red

492 **1925-S MS64 Red PCGS.** This near-Gem S-mint representative displays bright copper-gold surfaces infused with hints of orange. A better-than-average strike results in generally well impressed design elements, except for softness in Lincoln's hair. Both sides are nicely preserved. Population: 53 in 64 Red, 10 finer (11/08).(#2566)

## Luminous Red Gem 1926-D Cent

493 **1926-D MS65 Red PCGS.** Surprisingly fresh luster invigorates copper-orange surfaces that have scarcely mellowed from the day the coin was made. The strike is well-executed, and this Gem displays beautifully with minimal obverse carbon, though a few small flecks are visible on the reverse. Housed in a green label holder. Population: 43 in 65 Red, 2 finer (11/08).(#2572)

## Choice Red and Brown 1926-S Cent

494 **1926-S MS64 Red and Brown PCGS.** The 1926-S is notorious for its ultra-rarity in full red. NGC and PCGS have each certified just one example as MS65 Red with none finer. The present orange-gold Red and Brown near-Gem has mellowed slightly in olive and lilac hues, but luster sweeps the mark-free fields and devices. A good strike with minor softness on the top of the O in ONE.(#2574)

## Well Struck 1926-S Cent MS64 Red and Brown

495 **1926-S MS64 Red and Brown PCGS.** Whispers of light green and crimson visit the copper-gold lustrous surfaces of this near-Gem S-mint. A well executed strike leaves strong definition on the design elements, including completeness in the lines and grains of the wheat stalks. Minute brownish freckles are scattered over each side. (#2574)

## Elusive Fully Red MS64 1926-S Cent

496 **1926-S MS64 Red PCGS.** This low-mintage cent (4,550,000 pieces) is a key date in the Lincoln cent series. It is especially difficult to locate examples in full Red. Indeed, PCGS and NGC have graded fewer than 100 Red examples in all grades. A scant two of these grade MS65, and none finer!

David Bowers, in his *A Guide Book of Lincoln Cents*, says of the 1926-S: "This is *the* rarity among pristine (undipped) Mint State Lincolns. Recently, Sam Lukes, a Lincoln cent specialist for many years, stated (in a July 23, 2007 letter to Bowers) that he has never seen a 1926-S that he would call MS-65 Red."

Copper-gold luster is splashed with orange on the reverse of this Red near-Gem specimen, and an attentive strike leaves strong delineation on the design elements. A few minute marks and tiny flecks deny Gem status. Housed in a green label holder. Population: 67 in 64, 1 finer (11/08).(#2575)

## Condition Scarcity 1927 Cent MS67 Red

497 **1927 MS67 Red PCGS.** The 1927 cent can be obtained right through the MS66 grade level, even in full Red. Red Superb Gems like that in the current offering are scarce, however. Highly lustrous surfaces adorn both sides, each of which exhibits well struck design features. Serious contact marks are absent; a few trivial light flecks do not detract. Population: 26 in 67 Red, 0 finer (11/08).(#2578)

## Beautiful Red Gem 1927-D Cent

498 **1927-D MS65 Red PCGS.** Scintillating luster and a needle-sharp strike proclaim the quality of this olive and orange Gem. Virtually devoid of marks, and a few minute gray flecks near the face are inconsequential. Certain to be contested by Registry collectors. Encased in an old green label holder. Population: 50 in 65 Red, 2 finer (11/08).(#2581)

499 **1927-S MS64 Red PCGS.** Elegant copper-orange surfaces show occasional streaks of umber that appear horizontally across the obverse. Well-defined and attractive for the issue.(#2584)

## Red Superb Gem 1929 Cent

500 **1929 MS67 Red PCGS.** An exquisite peach-gold Superb Gem that has booming luster and a pleasing strike. A few subtle hints of gray visit the upper and lower reverse field. Splendid quality from a year best known for its stock market crash. Population: 32 in 67 Red, 0 finer (11/08).(#2596)

## Delightful MS66 Red 1929-D Cent

501 **1929-D MS66 Red PCGS.** A magnificent Premium Gem whose orange-gold surfaces lack any indication of marks or visible flecks. A precisely struck and thoroughly lustrous example of this conditionally rare Denver issue. Housed in a green label holder. Population: 19 in 66 Red, 0 finer (11/08).(#2599)

## Exquisite MS66 Red 1929-S Cent

502 **1929-S MS66 Red PCGS.** This outstanding Premium Gem retains its full initial orange color, and the thoroughly lustrous fields and devices lack the visible flyspecks or spots that usually accompany branch mint cents from the 1920s. Sharply struck and exceptional. Housed in an old green label holder. Population: 21 in 66 Red, 0 finer (11/08).(#2602)

## Red Superb Gem 1931 Cent

503 **1931 MS67 Red NGC.** This beautiful Superb Gem is primarily yellow-gold, but has cherry-red and apple-green along the margins. Well struck and unabraded with only a whisper of carbon on the lower obverse. Extraordinary quality for this lower mintage issue. Census: 11 in 67 Red, 0 finer (11/08).(#2614)

504 **1931-S MS66 Red PCGS.** Warm reddish-orange surfaces show only the slightest tinge of violet on the obverse. Well-defined and attractive, tied for the finest Red example known to PCGS (11/08). (#2620)

## Extraordinary MS67 Red 1932 Cent

505 **1932 MS67 Red PCGS.** The rich orange-red fields and devices appear pristine, and the strike is good with only a hint of softness on the first letters in AMERICA. The lowest mintage Philadelphia issue, since coinage demand diminished as the Great Depression progressed. Population: 24 in 67 Red, 0 finer (11/08).(#2623)

## Doubled Die Obverse FS-015 MS66 Red 1936 Cent

506 **1936 Doubled Die Obverse Type Two MS66 Red PCGS.** FS-015. The date is prominently die doubled, and light doubling is apparent on LIBERTY and TRUST. Three major doubled dies are known for the 1936, making it a cherrypicker's delight. This is a gorgeous pumpkin-gold Premium Gem with exemplary preservation. Minor planchet marks near the shoulder were present prior to the strike. Population: 11 in 66 Red, 0 finer (11/08).(#92650)

507 **1943-S MS68 PCGS.** A top-notch "steelie" with strong luster and uncommonly sharp definition for the issue. Interesting visual appeal. Tied for the finest graded by PCGS (11/08).(#2717)

508 **1950-S MS67 Red PCGS.** Remarkable fire and freshness are the prime attributes of this gold-orange Superb Gem. Excellent eye appeal with just a hint of satin surrounding the well struck devices. (#2785)

509 **1955 Doubled Die Obverse AU55 PCGS.** The prominently doubled obverse must have been noticed soon after this piece began circulating. Generally chocolate-brown with glimmers of copper-orange originality visible at the margins.(#2825)

510 **1955 Doubled Die Obverse—Recolored—ANACS. MS60 Details.** FS-101, formerly FS-021.8. Die 1. This example is well struck and shows crisp, unworn design details. There are a few wispy, inconsequential marks noted, and the coin has been artificially toned to show elements of steel-green, lilac, purple-red, and yellow over mostly golden-brown surfaces.(#2825)

## Famous Select Mint State Doubled Die Obverse 1955 Cent

511 **1955 Doubled Die Obverse MS63 Brown PCGS.** FS-101, formerly FS-021.8. Golden-brown, olive, and mauve color embrace this sharply struck and unmarked representative. The most famous of all doubled die varieties, as it is easily noticed with the unaided eye. Housed in an older green label holder.
*Ex: Long Beach Signature (Heritage, 6/2004), lot 5439.*(#2825)

## Delightful MS64 Brown 1955 Doubled Die Obverse Cent

512 **1955 Doubled Die Obverse MS64 Brown PCGS. CAC.** FS-101, formerly FS-021.8. This exactingly struck Choice key date cent has vibrant cartwheel sheen and rich chocolate-brown toning. No carbon is detected, and only trivial surface grazes prevent classification as a full Gem. The most dramatic doubled die error of the Lincoln series.(#2825)

## Near-Gem 1955 Doubled Die Cent

513 **1955 Doubled Die Obverse MS64 Brown NGC.** FS-101, formerly FS-021.8. Golden-brown and apple-green intermingle across this lustrous and unabraded near-Gem. No carbon is evident, even when viewed beneath a loupe. The obverse die doubling is dramatic, characteristic of this famous and significant mint error. (#2825)

### Worthy MS64 Brown
### 1955 Doubled Die Obverse Cent

514 **1955 Doubled Die Obverse MS64 Brown NGC.** FS-101, formerly FS-021.8. The most famous of the many Lincoln cent doubled die varieties, widely collected since its discovery more than a half-century ago. Although designated Brown for its rich olive-brown toning, mint red persists within the legends on both sides. Sharply struck, and devoid of apparent marks or carbon.(#2825)

## PROOF LINCOLN CENTS

### Enchanting PR66 Red 1909 Cent

515 **1909 PR66 Red PCGS. CAC.** The later proof 1909 Lincoln cents are among the more available matte proof pieces for the series, yet fully Red examples are hard to come by. The vibrant orange and copper-gold surfaces of the present piece have scarcely mellowed, and the sharply struck devices are impeccably preserved. PCGS has graded six finer Red representatives (11/08).(#3305)

### Impressive 1910 Cent
### PR65 Red and Brown

516 **1910 PR65 Red and Brown PCGS.** Vibrant copper-gold obverse surfaces imbued with hints of light green and crimson cede to a more more mellow reddish-gold reverse. An impressive strike imparts strong delineation to the design elements, including the bow tie, and lines in the wheat stalks. Devoid of mentionable marks or spots. Population: 48 in 65 Red and Brown, 16 finer (11/08). (#3307)

### PR66 Red and Brown 1910 Cent

517 **1910 PR66 Red and Brown PCGS.** The brick-red surfaces have mellowed slightly in forest-green and lilac shades. Intricately struck and satiny. A loupe reveals finely granular surfaces, as made save for a single trivial fleck in front of the mouth. A scarce and underappreciated proof date.(#3307)

518 **1911 PR64 Red and Brown PCGS.** The surfaces of this matte proof near-Gem shade through light copper-orange to rose and violet. Sharply struck with interesting eye appeal, and housed in a green label holder.(#3310)

### Elusive Red Gem Proof 1911 Cent

519 **1911 PR65 Red NGC.** A satiny orange and canary-gold Gem that has the exacting strike expected of a matte proof cent. The obverse appears pristine, and only a few subtle gray flecks are noted on the upper left reverse. Encapsulated in a former generation holder. Census: 4 in 65, 1 finer (11/08).(#3311)

### Appealing 1912 Gem Brown Proof Cent

520 **1912 PR65 Brown NGC.** Rich purple, sky-blue, and yellow-gold patination covers the obverse, while the reverse is mostly golden-brown with splashes of lavender and powder-blue. All of the design features are crisply impressed, enhancing the coin's outstanding eye appeal. Semiglossy surfaces are free of mentionable marks or spotting. Census: 28 in 65 Brown, 13 finer (11/08).(#3312)

## Exquisitely Toned Choice Proof Red and Brown 1912 Cent

521 **1912 PR64 Red and Brown PCGS.** Exquisitely toned in orange-red, forest-green, and lemon shades. The strike is pinpoint-sharp, and the unabraded surfaces are limited in grade by only a single minute spot northeast of the date. Matte proofs are the unheralded keys to a truly complete set of Lincoln cents. Certified in an old green label holder.(#3313)

522 **1912 PR65 Red and Brown NGC.** Lushly toned in sea-green, orange, cherry-red, and lemon-gold. Exactingly struck and unabraded with satin luster and a virtual absence of carbon. Encapsulated in a prior generation holder. Census: 27 in 65 Red and Brown, 10 finer (11/08).(#3313)

523 **1913 PR64 Red and Brown PCGS.** Magenta, violet, lavender, and reddish-orange shadings prevail on each side, with the reverse slightly deeper in color. Razor-sharp detail and gorgeous eye appeal for a matte proof Lincoln cent.(#3316)

## Delightful 1913 Cent, PR66 Red and Brown

524 **1913 PR66 Red and Brown NGC.** Razor-sharp detail is evident on coin to the extent that the viewer can almost pick out the individual hairs in Lincoln's beard. The degree of detail, in combination with the matte surfaces, gives this piece a delightful visual effect. The obverse is primarily burnt orange in color, while a streak of crimson meanders between the rim and the right obverse field between 12 o'clock and 8 o'clock. The small degree of brown visible on the coin lies on the reverse, mostly in the peripheries between the left wheat ear and PLURIBUS. A few grade-defining pinpricks of carbon are noted above the date and near the stem of the left wheat ear.
*From The Findley Collection.*(#3316)

525 **1913 PR65 Red NGC. CAC.** This decisively struck Gem has a light yellow-gold obverse, while the reverse features rich peach-red with a central blush of lemon. Matte proof Lincoln cents are difficult to locate with fully Red surfaces. Census: 26 in 65, 13 finer (11/08). (#3317)

526 **1914 PR64 Red and Brown PCGS.** Gold-orange and mahogany shadings assume a woodgrain pattern across the obverse with more consistent color on the reverse. Tiny disturbances in the finely textured fields account for the grade.(#3319)

## PR65 Red and Brown 1914 Cent

527 **1914 PR65 Red and Brown NGC.** Predominantly pumpkin-gold, although the borders display pleasing cherry-red and forest-green. A penetratingly struck and exemplary Gem with luminous, undisturbed surfaces. Only 1,365 matte proof 1914 cents were struck, less than the number of 1909-S VDB cents that have survived in Mint State. (#3319)

## Red Gem Proof 1936 Cent Brilliant Finish, Type Two

528 **1936 Type Two—Brilliant Finish PR65 Red PCGS.** After a 20 year gap, proof coinage resumed in 1936. Collectors of the day concentrated on acquiring the latest commemorative issues, and relatively few ordered proof sets. This sharply struck Gem is pumpkin-orange and appears perfect aside from the occasional minuscule carbon fleck.(#3335)

## Attractive 1936 Type Two Lincoln Cent, PR65 Red

529 **1936 Type Two—Brilliant Finish PR65 Red NGC.** A highly reflective Gem, the surfaces radiate deep golden-orange coloration in the absence of any distracting contact marks. A trace amount of milkiness is evident in the obverse fields, keeping this specimen from an even finer grade designation. Census: 61 in 65 Red, 19 finer (12/08).
*From The Plymouth Collection.*(#3335)

## Conditionally Scarce 1936 Type Two Lincoln Cent, PR66 Red

530 **1936 Type Two—Brilliant Finish—PR66 Red PCGS.** This is a gorgeous Premium Gem proof from the second proof type produced in 1936: the so-called Brilliant Finish. This example demonstrates razor-sharp striking execution on all of the Lincoln cent's familiar features, including Lincoln's beard, hair and ear. Vivid orange-red toning dominates on both sides, but areas of bright silver-blue also occur, especially on Lincoln's cheek, neck, and collar. Population: 28 in 66 Red, 2 finer (11/08).(#3335)

## Spectacular 1936 Brilliant PR64 Red Cameo Cent The Finest Certified

531 **1936 Brilliant PR64 Red Cameo PCGS.** Spectacular golden-red colors greet the viewer of this needle-sharp near-Gem example. Only a small contact mark on Lincoln's cheek prevents a finer grade. A much scarcer first year issue as a cameo proof. Indeed, PCGS has certified a mere three examples, this coin being the finest. (#83335)

532 **1938 PR66 Red Cameo PCGS.** The gleaming lemon-orange surfaces and their impressive preservation are highly appealing. More noteworthy is the distinct contrast between the lightly frosted devices and the mirrors. Population: 5 in 66 Red Cameo, 1 finer (11/08).(#83341)

533 **1939 PR67 Red NGC.** It would be difficult to overstate the quality of this impressive proof Lincoln cent. Fully struck with utterly immense reflectivity in the fields, and immaculate surfaces. A mere 13,520 pieces were produced, and Superb Gem survivors are rare. Census: 27 in 67, 0 finer (11/08).(#3344)

534 **1939 PR67 Red NGC.** Gleaming copper-gold surfaces are decisively detailed and profoundly mirrored. Striking visual appeal and impressive preservation for this brilliant-era issue. Census: 27 in 67 Red, 0 finer (11/08).(#3344)

535 **1942 PR66 Red PCGS.** A meager total of 32,600 proof Lincoln cents were produced in this wartime year, after which proof coinage was suspended at the U.S. Mint until 1950. This Premium Gem is crisply struck and impressively preserved, with fetching red-orange color and just a trace amount of milkiness on each side. Population: 92 in 66 Red, 3 finer (11/08).(#3353)

536 **1950 PR66 Ultra Cameo NGC.** Fully struck with deep cherry-red coloration and intensely reflective fields on each side. Free of hairlines or any other surface distractions.(#93359)

537 **1957 PR66 Deep Cameo PCGS.** Fully struck with deep cherry-red coloration and intense, deep cameo contrast on both sides. Exquisitely preserved and free from all surface distractions. This appealing Premium Gem proof is housed in an earlier PCGS holder with a green insert. Population: 8 in 66 Deep Cameo, 10 finer (11/08).(#93380)

## Magnificent PR69 Red Ultra Cameo 1958 Cent Finest NGC Certified

538 **1958 PR69 Red Ultra Cameo NGC.** A magnificent razor-sharp specimen from the final year of the Wheat Ears reverse. The seamless straw-gold color finally cedes to peach hues on the lower obverse and upper reverse margins. NGC has only graded 21 pieces as Red Ultra Cameo in all proof grades, this example being the finest. (#93383)

## Elusive 1990 No S Cent, PR68 Deep Cameo PCGS

539 **1990 No S PR68 Deep Cameo PCGS.** On several occasions from the late 1960s to the 1990s, proof dies that were made in Philadelphia and sent to San Francisco for the year's production were not stamped with a mintmark. In most instances, only a few proofs were struck and sent out with proof sets before the error was spotted and the die pulled from service. Of course, this type of die error was only possible once San Francisco started coining proofs in 1968. In the Lincoln cent series, only the 1990 No S proofs were coined without a mintmark. Other examples include the 1971 nickel, and the 1968, 1970, 1975, and 1983 dimes. This amazing and superlative piece has gorgeous orange luster with brilliant devices and deeply mirrored fields.(#93506)

### Desirable No S 1990 Cent
### PR69 Red Ultra Cameo

540 **1990 No S PR69 Red Ultra Cameo NGC.** The rare 1990 No S proof cent is the last Mint blunder of its kind. It is the only cent entry in the error category, which also includes the 1971 No S nickel and the No S 1968, 1970, 1975 dimes. The S mintmark has since been added to proof hubs, which should prevent future dates of No S errors. The present piece is a flawless pumpkin-gold Superb Gem with glassy fields and thickly frosted devices. The strike is razor-sharp, and there is no indication of carbon or contact. Census: 11 in 69 Red Ultra Cameo, 0 finer (11/08).(#93506)

## TWO CENT PIECES

### Notable 1864 Small Motto Two Cent, MS64 Red

541 **1864 Small Motto MS64 Red PCGS.** The Small Motto is the scarcer of the two *Guide Book* varieties for this popular first-year two cent issue. The lustrous surfaces of this attractive Choice coin are a light golden-tan. A few flecks are scattered about, the most noticeable being located in the lower right part of the shield; still, a pleasing piece. Population: 17 in 64 Red, 20 finer (11/08). (#3581)

### Scarce 1864 Small Motto Two Cent
### MS65 Red and Brown

542 **1864 Small Motto MS65 Red and Brown PCGS.** The ephemeral introductory subtype with small letters in IN GOD WE TRUST. This handsome Gem lacks visible marks and only has a smattering of carbon. Mostly sun-gold with subtle mellowing to olive across the open fields. The reverse die has myriad slender cracks and appears unlikely to have survived many additional strikes.(#3580)

### High Grade MS66 Red
### 1864 Large Motto Two Cent

543 **1864 Large Motto MS66 Red PCGS. CAC.** A highly lustrous peach-gold near-Gem. Impressively void of abrasions, and the type is practically unobtainable any finer. The obverse is essentially as made, and we note just a couple of tiny specks on the reverse periphery. Population: 46 in 66 Red, 1 finer (11/08).
*Ex: FUN Signature (Heritage, 1/2005), lot 5537.*(#3578)

544 **1865 MS66 Brown NGC.** Plain 5. Mahogany-brown toning is prevalent, but glimpses of original brick-red color emerge at the borders, particularly on the reverse. A well struck and undisturbed second-year Premium Gem. Census: 21 in 66 Brown, 0 finer (11/08). (#3582)

### Superior Gem 1865 Two Cent Piece

545 **1865 MS65 Red and Brown PCGS.** Plain 5. Under low magnification, the design details on this Gem example are noticeably sharper than usual, for this intricately designed type that was difficult to produce. This piece is also very clean, highly lustrous, and free of abrasions. A few scattered flyspecks are observed on each side, but seem like a relatively minor consideration on such a superior example.(#3583)

546 **1865 MS64 Red NGC. CAC.** Fancy 5. Fully brilliant orange luster is retained on both sides of this splendid near-Gem. The surfaces exhibit minor carbon of little significance, but sufficient to prevent a higher grade.(#3584)

### Splendid MS66 Red 1865 Two Cent

547 **1865 MS66 Red PCGS.** Plain 5. This orange-red Premium Gem has exemplary luster and a meticulous strike. The reverse is unabraded, and the obverse is nearly as smooth. A desirable type coin, and a high grade survivor from this tumultuous year. Population: 43 in 66 Red, 2 finer (11/08).(#3584)

### MS66 Red 1865 Two Cent Piece

548 **1865 MS66 Red NGC.** Fancy 5. A lovely sun-gold Premium Gem that exhibits vibrant luster and appears completely free from abrasions. The strike is precise, and only infrequent tiny tan freckles deny perfection. From an tumultuous year in American history. Census: 24 in 66 Red, 0 finer (11/08).
*From The James Mossman Collection.*(#3584)

### Red Gem 1869 Two Cent Piece

549 **1869 MS65 Red NGC.** A better date, much scarcer than the 1864 Large Motto as a Red Gem. This piece has light orange-red color on each side with a few blushes of red interspersed. Sharply defined except on the leaves on the left side of the shield. Only minor carbon is noted. A well preserved and attractive example, housed in a former generation holder. Census: 18 in 65 Red, 2 finer (11/08).
*Ex: Long Beach Signature (Heritage, 9/2006), lot 622, which realized $2,760.*(#3605)

550 **1871 MS64 Red PCGS.** A brilliant near-Gem in a green-label PCGS holder, this example has bold design features with frosty luster and deep orange surfaces that are enhanced by subtle iridescence. (#3611)

### Rare MS64 Red and Brown 1872 Two Cent Piece, FS-006

551 **1872 MS64 Red and Brown PCGS.** FS-006. TRUST is nicely die doubled. The final business strike issue, which had a small run of 65,000 pieces. By 1872, small denomination coins had returned to circulation, which negated the need for the two cent piece. This lustrous cent is mostly orange-red apart from an area of steel-blue across the central reverse. Well struck and only lightly abraded. (#3613)

## PROOF TWO CENT PIECES

552 **1865 PR66 Red and Brown PCGS. CAC.** An impressive, conditionally scarce Premium Gem with flashy reflectivity in the fields and pleasingly variegated red-gold, tobacco-brown, and emerald-green coloration. Free of hairlines or contact marks. Population: 11 in 66 Red and Brown, 0 finer (11/08).(#3628)

553 **1865 PR64 Red PCGS.** Housed in a green-label PCGS holder, this near-Gem proof has deep orange surfaces with gorgeous iridescent toning. Both sides have fully mirrored fields.(#3629)

554 **1867 PR66 Brown NGC.** Rich violet-brown and cobalt-blue toning adorns the immaculately preserved surfaces of this Premium Gem proof. Fully struck on all of the design elements. Census: 8 in 66 Brown, 1 finer (11/08).(#3633)

555 **1868 PR65 Red and Brown PCGS.** This proof issue had a modest mintage of 600 pieces, and survivors are scarce at the Gem level of preservation. This specimen is crisply struck with deeply reflective fields and somewhat variegated toning on the reverse. Well preserved and free of contact marks or other problems.(#3637)

556 **1870 PR64 Red PCGS.** Splendid pumpkin-orange patina graces both sides of this lustrous near-Gem example from near the end of the series. A number of carbon flecks on each side limit the grade, but only a couple of inconsequential contact marks are visible under magnification. One of an approximate mintage of just 1,000 pieces. Population: 40 in 64 Red, 46 finer (11/08).(#3644)

### Desirable PR66 Red and Brown 1871 Two Cent

557 **1871 PR66 Red and Brown NGC. CAC.** Smooth surfaces, generally mahogany and violet-tinged, show a degree of unfaded copper-orange close to the margins. The strike is crisp, and the eye appeal is powerful. A few flecks visible within the shield are of little consequence. Census: 20 in 66 Red and Brown, 1 finer (11/08). (#3646)

### Choice 1873 Two Cent Piece Closed 3, Proof-Only

558 **1873 Closed 3 PR64 Brown PCGS.** This proof-only near-Gem has a rich layer of speckled olive-brown over both sides, although ample orange-gold luster persists on both sides. There are no bothersome handling marks or hairlines to be found, and the design elements are crisply produced. Population: 33 in 64 Brown, 13 finer (11/08). (#3651)

### Impressive 1873 Closed 3 Two Cent Piece, PR65 Red and Brown

559 **1873 Closed 3 PR65 Red and Brown PCGS.** This Gem proof is fully struck and reveals distinctly matte-like surfaces; an appearance that seems very natural and pleasing for the type. This piece is immaculately preserved, and both sides are free of even the smallest signs of any contact or mishandling. The Closed 3 proof type is original to 1873, unlike the later Open 3 restrikes. Population: 79 in 65, 15 finer (11/08).(#3652)

### Attractive PR64 Red and Brown 1873 Open 3 Two Cent

560 **1873 Open 3 PR64 Red and Brown PCGS.** Both sides offer a blend of deep mahogany and pumpkin-orange. Overall eye appeal is striking, and the impression is bold. Only a few stray hairlines are visible in the fields. The Open 3 restrikes are highly elusive, owing to an estimated production of 500 pieces, and Choice and better survivors are particularly challenging. PCGS has graded 18 finer Red and Brown representatives (11/08).(#3655)

## THREE CENT SILVER

561 **1851-O MS64 PCGS.** Almond-gold and pearl-gray blend throughout this shimmering and nicely struck near-Gem. The obverse is unabraded, and the reverse has only a couple of faint grazes near the mintmark. The sole New Orleans issue of this stopgap denomination.(#3665)

### Popular 1851-O Three Cent Silver MS66

562 **1851-O MS66 NGC.** A coin of enduring popularity with collectors, the 1851-O is the only mintmarked issue of the series. The surfaces of this extraordinary coin have dappled, multicolored rose, gold, and blue patination. Beneath the light layerings of color lurks coruscating mint luster. The originality is unquestioned, as is this coin's attractive eye appeal. Census: 13 in 66, 3 finer (11/08).
*Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5415; Long Beach Signature (Heritage, 2/2005), lot 5645, which realized $4,370.* (#3665)

### Dazzling MS66 1853 Three Cent Silver

563 **1853 MS66 PCGS.** Faint tan toning visits this lustrous and beautifully preserved Premium Gem. Well struck on the shield, with incompleteness limited to a few peripheral stars. A magnificent type coin from the introductory date of the series. Population: 45 in 66, 5 finer (11/08).(#3667)

### Pleasing 1853 Three Cent Silver MS66

564 **1853 MS66 PCGS. CAC.** Lovely lavender and olive-gold toning visits this essentially pristine Premium Gem. The cartwheel luster is dazzling, and the strike is sharp save for a couple of peripheral star centers. 1851 to 1853 were the heavy production years for the three cent silver series, since silver coins of other denominations were hoarded by speculators. Population: 45 in 66, 5 finer (11/08).
*From The James Mossman Collection.*(#3667)

565 **1856 MS64 PCGS.** Richly toned with beautiful, satiny luster beneath the silver-gray central toning and the gold, rose, and violet shadings dominant at the peripheries. Elegant eye appeal. Population: 68 in 64, 23 finer (11/08).(#3672)

### Original MS66 1857 Three Cent Silver

566 **1857 MS66 NGC.** Medium walnut-brown toning embraces this lustrous and unabraded Premium Gem. A few of the peripheral stars are soft, but the shield is well brought up. Struck from clashed dies, and encased in a prior generation holder. Essentially unobtainable any finer. Census: 11 in 66, 1 finer (11/08).
*From The James Mossman Collection.*(#3673)

### Dynamic Gem 1858 Three Cent Silver

567 **1858 MS65 NGC.** Lustrous, virtually brilliant, and splendidly unabraded. This Premium Gem is nicely struck with only moderate inexactness on the horizontal shield lines. A better date with a mintage of slightly more than 1.6 million pieces. Struck from notably clashed dies. Census: 42 in 65, 29 finer (11/08).(#3674)

### Lavishly Toned Superb Gem 1858 Three Cent Silver

568 **1858 MS67 NGC.** This beautiful Superb Gem displays rich, swirling tones of gunmetal-blue, crimson, and golden-olive patina. It is devoid of abrasions on either side, although both sides are prominently die clashed. A gorgeous trime ideal for a high grade silver type set. Census: 15 in 67, 0 finer (11/08).
*Ex: Long Beach Signature (Heritage, 6/2005), lot 5325; Central States Signature (Heritage, 4/2006), lot 757.*(#3674)

569 **1866 MS64 PCGS.** This well struck Choice coin shows substantial reflectivity in the pearl-gray fields, not unusual for this issue of 22,000 pieces. Pleasingly preserved for the grade. Population: 14 in 64, 22 finer (11/08).(#3686)

570 **1867 MS63 PCGS.** Generally bright silver-white with a subtle crescent of tan visible at the left obverse. Excellent strike and luster. Population: 5 in 63, 15 finer (11/08).(#3687)

### Delightful MS66 Prooflike 1871 Three Cent Silver

571 **1871 MS66 Prooflike NGC.** Immensely reflective with crisp detail and mild contrast. Subtle gold-gray shadings drape much of the carefully preserved reverse. Like all post-Civil War trime issues, a highly elusive and desirable issue in business-strike format. Census: 1 in 66 Prooflike, 1 finer (11/08).

### Colorful MS66 1871 Three Cent Silver

572 **1871 MS66 PCGS. CAC.** A beautifully toned representative of this challenging post-Civil War business-strike issue, beautifully detailed with warm luster that filters through profound green-gold, violet, sapphire, and rose-magenta patina. Incredible eye appeal for this issue of only 3,400 pieces. Population: 15 in 66, 11 finer (11/08). (#3692)

## PROOF THREE CENT SILVER

### Rare, Important Superb Gem Proof 1862 Three Cent Silver

573 **1862 PR67 NGC.** This meticulously struck Superb Gem shows no sign of incompleteness on either the shield or the reverse stars. Dusky magenta and ocean-blue embraces the undisturbed and unmarked surfaces. An important opportunity for the specialist in this relatively brief series. Census: 6 in 67, 0 finer (11/08).(#3711)

## Attractively Toned Low Mintage PR67 1863 Three Cent Silver

574 **1863 PR67 NGC.** The obverse field and devices are brilliant, although the border exhibits golden-tan, sky-blue, and plum-red. The star and shield display notable cameo contrast with the glittering field. The reverse lacks contrast due to its rich apple-green and olive-gold patina. Crisply struck and desirable. Just 460 proofs were struck. Census: 6 in 67, 1 finer (11/08).(#3712)

575 **1866 PR64 PCGS.** Sharply struck and free of any noticeable clash marks. This near-Gem displays substantial layers of sea-green, yellow-gold, purple-red, and burnt-orange iridescence over the carefully preserved surfaces.(#3716)

576 **1866 PR66 NGC. CAC.** This is a lavishly toned Premium Gem proof with shades of deep electric-green and coral color appearing across the highly reflective surfaces. Sharply struck and well preserved with contact-free surfaces that are also free of the frequently-seen die clash marks of this brief denomination. Census: 19 in 66, 1 finer (11/08).(#3716)

## Peripherally Toned Gem Proof Cameo 1866 Three Cent Silver

577 **1866 PR65 Cameo PCGS. CAC.** A pinpoint-sharp Gem that has brilliant centers encompassed by golden-brown borders. Obvious white-on-black contrast confirms the PCGS designation. A loupe reveals only unmarked and spot-free surfaces. A scant 725 proofs were struck. Population: 5 in 65 Cameo, 8 finer (11/08).(#83716)

## Cameo Gem Proof 1867 Three Cent Silver

578 **1867 PR65 Cameo NGC.** A needle-sharp Gem that has dazzling reflectivity and delicate gold toning. An undisturbed specimen with blatant eye appeal. Only 625 proofs and 4,000 business strikes were issued, since fractional currency drove silver coins from commerce. Census: 8 in 65 Cameo, 11 finer (11/08).(#83717)

## Terrific PR66 Cameo 1869 Three Cent Silver

579 **1869 PR66 Cameo NGC.** The three cent silver series was waning by 1869, and had already been superseded by the three cent nickel; but 600 proof trimes were struck nonetheless in 1869. This beautiful piece shows golden toning across each side, and deep, watery reflectivity in the fields. The surfaces are essentially undisturbed, and this is a conditionally desirable Premium Gem, especially with the Cameo designation. Census: 9 in 66 Cameo, 3 finer (11/08). (#83719)

580 **1871 PR66 PCGS.** Attractive silver-blue and green-gold patina embraces each side of this sharply struck Premium Gem proof. Carefully preserved and housed in a green label holder. Population: 22 in 66, 4 finer (11/08).(#3722)

## Conditionally Rare Superb Gem Proof 1871 Three Cent Silver

581 **1871 PR67 NGC.** The introduction of the three cent nickel was the beginning of the three cent silver's slow demise. While business strike production dwindled through the later Civil War and Reconstruction years, with many examples melted in 1873, proofs remained popular with collectors, and a handful of sublimely beautiful specimens have survived to the present day. This is one such piece, decisively struck with dappled green-gold and aqua patina that drapes each side. Even under magnification, the impressively preserved surfaces show only a handful of trivial faults. NGC has graded only one numerically finer representative, as of (11/08). (#3722)

582 **1871 PR64 Cameo PCGS.** Light champagne toning enhances the eye appeal of this glittering near-Gem Cameo proof. Splashes of iridescence are evident on the obverse. The fields exhibit myriad die polishing lines.(#83722)

583 **1872 PR65 PCGS.** A gorgeous Gem proof with excellent cameo contrast visible beneath pale gold toning. This piece remains in an older green-label holder. Population: 27 in 65, 15 finer (11/08). (#3723)

584 **1872 PR65 NGC.** A tempting little Gem from the penultimate proof trime issue, gleaming silver-white in the centers with blue and violet-gray shadings visible at the margins. Carefully preserved. Census: 47 in 65, 30 finer (11/08).(#3723)

585 **1873 PR63 PCGS.** This proof-only specimen is lavishly toned in apple-green, electric-blue, peach, and plum-red. Well struck and attractive despite the expected faint field hairlines.(#3724)

### Brilliant Cameo Gem Proof-Only
### 1873 Three Cent Silver

586 **1873 PR65 Cameo NGC.** The final-year, proof-only issue of the three cent silver type had a low mintage of only 600 pieces, easily the lowest of the series, making this an unquestioned key date. Many of the 600 coins have survived, but few of them have received a Cameo grade designation from either of the major services. This example is sharply struck and untoned, with glassy fields, frosted devices, and distraction-free surfaces. Census: 12 in 65 Cameo, 15 finer (11/08).(#83724)

## THREE CENT NICKELS

587 **1868 MS66 PCGS.** A splendidly preserved prooflike Gem with light honey-gold and dove-gray patina. The upper reverse has several spindly die cracks. Struck from multiply clashed dies. Population: 29 in 66, 1 finer (11/08).
*Ex: FUN Signature (Heritage, 1/2004), lot 5060, which realized $1,840.*
*From The Scott Rudolph Collection.*(#3734)

588 **1869 MS66 PCGS.** This piece is highly lustrous with light gold-gray patina over both sides. Boldly struck with a near-absence of marks, and tied for numerically finest known to NGC or PCGS (11/08).(#3735)

### Lightly Toned Gem
### 1873 Open 3 Three Cent Nickel

589 **1873 Open 3 MS65 PCGS. CAC.** The radiantly lustrous surfaces of this three cent nickel Gem display wisps of light gray-tan color over each side. Generally well struck, except for minor softness in the centers of the Roman columns. Impressively unabraded, although each side displays overlapping sets of mint-made clashmarks. No proofs exist for the 1873 Open 3, unlike all other issues in the series. Population: 11 in 65, 0 finer (11/08).(#3740)

590 **1876 MS65 PCGS.** A stunning Gem with brilliant light gray surfaces. Both sides have satiny luster with frosty devices; the obverse field is reflective. Population: 25 in 65, 4 finer (11/08).(#3744)

### Superlative 1882 Three Cent Nickel, MS66

591 **1882 MS66 PCGS.** There is obvious repunching on 882 in the date. Only 22,200 business strikes were produced of this rare issue, and proofs are much more frequently encountered in high grades. This is a superlative example that is brilliant throughout, with some ice-blue color noted in the pearl-gray fields. Well preserved and distraction-free. In a green label holder. Population: 14 in 66, 3 finer (11/08).(#3750)

### Lushly Toned Gem Business Strike
### 1885 Three Cent Nickel

592 **1885 MS65 PCGS.** Powder-blue, yellow-gold, and jade-green embrace this satiny and sharply struck Gem. Mark-free surfaces ensure the exemplary eye appeal. A scant 1,000 business strikes were issued, and surviving Gems are many times rarer than proofs. Population: 12 in 65, 10 finer (11/08).(#3753)

### Low Mintage Superb Gem
### 1888 Three Cent Nickel

593 **1888 MS67 NGC.** Delicate olive-gold patina illuminates this decisively struck Superb Gem. Cartwheel luster dazzles the eye, and the surfaces are essentially pristine. Blending of the reverse dentils toward the field confirms the business strike status. A magnificent representative of this low mintage date. Census: 11 in 67, 0 finer (11/08).(#3757)

# PROOF THREE CENT NICKELS

## Key Choice Proof 1865 Three Cent Nickel

594 **1865 PR64 PCGS.** The 1865 three cent nickel, although perhaps the most common date in the series as a circulation strike, is the key to the series when collected as a proof, thanks to a stingy mintage of 500 pieces. Fully struck and minimally toned, with reflective fields interrupted only by a trivial planchet flaw near ED ST.
*From The Findley Collection.*(#3761)

## Appealing PR66 Deep Cameo 1866 Three Cent Nickel

595 **1866 PR66 Deep Cameo PCGS. CAC.** This powerfully struck Premium Gem exhibits light golden toning, but the distinction between the glassy fields and the frosted motifs is nonetheless exceptional. Unabraded and virtually carbon-free. Only 725+ proofs were struck. Population: 6 in 66 Deep Cameo, 1 finer (11/08). (#93762)

596 **1868 PR66 Cameo NGC.** A generally untoned and extraordinarily well-mirrored specimen that evens adds nice contrast between the fields and the devices. The design features are exquisitely impressed throughout. Census: 21 in 66 Cameo, 9 finer (11/08). (#83764)

597 **1876 PR66 NGC.** This satiny specimen is expertly struck and offers delicate sun-gold toning. Perfect aside from a couple of tiny carbon flecks. A lower mintage than the post-1877 proof dates. (#3772)

## Gem Proof-Only 1877 Three Cent Nickel

598 **1877 PR65 PCGS. CAC.** The 1877 is the scarcest of the three proof-only dates within the three cent nickel series. Only 510 proof sets were sold in 1877, although the actual mintage is somewhat higher since collectors of the day could purchase individual denominations. This well struck Gem is bathed in dove-gray, and lacks any evidence of either carbon or contact.(#3773)

## Beautiful PR65 Cameo 1877 Three Cent Nickel

599 **1877 PR65 Cameo PCGS.** As the lowest-mintage proof-only issue in the series, the 1877 is arguably the most important date for the format. This moderately contrasted Gem is minimally toned with light, yet pleasing frost that drapes the central devices. Pleasingly mirrored. Population: 21 in 65 Cameo, 42 finer (11/08). (#83773)

## Remarkable 1877 Three Cent Nickel, PR66 ★ Cameo

600 **1877 PR66 ★ Cameo NGC. CAC.** The 1877 is a key proof-only issue, and a mere 510 pieces were produced. This is a deeply mirrored example with heavy frost on the devices, resulting in stark cameo contrast which is quite unusual for the type. Sharply struck and virtually pristine, with untoned surfaces that show a bit of milky haze over the reverse but are otherwise essentially flawless. NGC has graded only three pieces as PR66 ★ Cameo, and just four coins even finer, with the ★ designation (11/08).(#83773)

601 **1888 PR67 Cameo PCGS. CAC.** Exceptional Cameo contrast is displayed by the frosty snow-white devices and the glittering, flashy fields. A penultimate proof issue, always available with relatively dull mirrors but infrequently found with such outstanding eye appeal. A pristine specimen, worthy of the finest quality Registry Set. Population: 7 in 67 Cameo, 0 finer (11/08).(#83785)

### Stone-White PR66 ★ Ultra Cameo 1888 Three Cent Nickel

602 **1888 PR66 ★ Ultra Cameo NGC. CAC.** The thickly frosted portrait, wreath, and obverse legends provide illimitable contrast with the darkly reflective fields. A brilliant, intricately struck, and flawless representative of this penultimate date. As of (11/08), NGC has certified just four pieces as Ultra Cameo, and the present example is the only one that has garnered a Star designation.(#93785)

603 **1889 PR66 PCGS.** RPD-001. The date is repunched below the base of the 1. Only moderately reflective, the surfaces are nevertheless swirling with mint luster that enhances the pale gray-rose toning seen over each side. Sharply struck and blemish-free.(#3786)

604 **1889 PR67 NGC.** The brilliant surfaces shimmer with luster and pleasingly reflective mirrors. A lovely, Superb type coin that is without fault, even when closely examined with a magnifier. Census: 40 in 67, 1 finer (11/08).(#3786)

## SHIELD NICKELS

### Attractive Gem 1866 Rays Nickel

605 **1866 Rays MS65 PCGS.** The unblemished, dusky rose-gray surfaces exhibit satin luster. Weakly struck in several areas throughout the reverse stars and rays and the obverse wreath, and with several light die cracks, as is typical of the issue. Still, an attractive Gem example of this two-year type.(#3790)

### Exquisite Gem 1866 Rays Nickel

606 **1866 Rays MS65 PCGS. CAC.** Chestnut-gold fills the fields and devices, while glimpses of apricot beckon from the borders. This satiny and boldly struck Gem is exceptionally free from contact, and has only minimal indication of carbon. The introductory Rays subtype was coined only through 1866 and the first part of 1867. The rays were removed by the Mint in an attempt to extend die life.
*From The James Mossman Collection.*(#3790)

### Delightful Gem 1866 Rays Nickel

607 **1866 Rays MS65 PCGS.** A gorgeous Gem example from America's first circulating copper-nickel five cent issue, impressively lustrous with light nickel-gray margins and warm honey-gold patina over the centers. Well-defined overall with only trifling softness noted at certain central design elements. PCGS has graded 27 finer examples (11/08).(#3790)

### Notable Gem 1866 Rays Nickel

608 **1866 Rays MS65 NGC.** Lightly toned in swirls of autumn-gold. This well struck Gem provides potent luster, and any marks are difficult to find. The reverse has minor strike-throughs near UNITED and the base of the prominent 5. Numerous obverse die cracks attest to the travails of the Mint in striking the newly introduced nickel denomination.(#3790)

### Premium Gem 1866 Rays Nickel

609 **1866 Rays MS66 PCGS.** First year of issue for the Shield nickel series and only a two-year type, since the rays between the reverse stars were removed in 1867. This Premium Gem shows generally bold details for the issue, although the shield border and stars have occasional incompleteness. Light gold toning visits surfaces that appear pristine save for a tiny gray obverse spot at 8 o'clock. Population: 27 in 66, 0 finer (11/08).
*Ex: Central States Signature (Heritage, 5/2007), lot 1434, which realized $5,750.*
*From The Scott Rudolph Collection.*(#3790)

## Premium Gem 1866 Rays Nickel

610 **1866 Rays MS66 NGC.** This is a splendid Premium Gem with remarkable aesthetic appeal. Sharply struck and thoroughly lustrous with medium gold toning. The surfaces are essentially mark-free and exhibit several peripheral die cracks. Census: 24 in 66, 0 finer (11/08).
*Ex: Long Beach Signature (Heritage, 9/2006), lot 765.*(#3790)

## Near-Gem 1866 Rays Nickel
## Dramatic FS-001 Repunched Date

611 **1866/1866 Rays MS64 PCGS. CAC.** Breen-2461, FS-001, Fletcher-8. The date is widely repunched northeast, with little effort made by the Mint to efface the initial date entry, which was placed too high on the die. One of many interesting varieties of Shield nickels from this introductory year, when the Mint struggled from die breakage and let quality control slip. Satiny, carbon-free, and unabraded with medium brown toning and a suitable strike. Population: 4 in 64, 0 finer (11/08).
*Ex: FUN Signature (Heritage, 1/2008), lot 641, which realized $6,900.*
*From The Scott Rudolph Collection.*(#93790)

## Captivating MS65 1867 Rays Nickel

612 **1867 Rays MS65 NGC.** The brilliant, essentially nickel-white surfaces show numerous die cracks on both sides, evidence that those dies saw long service. The reverse die in particular must have shattered soon after this piece was struck, as the area around AMERICA shows about eight radiating cracks, a couple of them heavy. Further attesting to the die overuse is the lack of field-device contrast, which on this coin actually enhances the appearance of a consistent Gem striking. A lovely, interesting survivor. Census: 51 in 65, 10 finer (11/08).
*From The Scott Rudolph Collection.*(#3791)

## Outstanding Premium Gem 1867 With Rays Nickel

613 **1867 Rays MS66 NGC.** Repunched date. An unusually well defined example with only slight weakness evident on the lower reverse. The fields show slight reflectivity and there is highly attractive olive-gold color over each side. One of the better Rays nickels we have seen in some time. Census: 9 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#3791)

614 **1867 No Rays MS66 NGC.** Lightly toned with dashes of powder-blue and honey-gold. The centers show moderate incompleteness of strike, usual for the type. A splendidly preserved Premium Gem.
*Ex: Western Hills Collection (Heritage, 6/2005), lot 5478; Hensley Collection (Heritage, 11/2005), lot 503.*
*From The Scott Rudolph Collection.*(#3794)

## Interesting MS66 1869 Nickel

615 **1869 MS66 NGC.** The 6 and 9 in the date are repunched relatively widely, but this particular variety appears to be unlisted in the *Cherrypickers' Guide*. A lustrous and lightly toned Premium Gem that lacks visible marks or carbon. Immensely appealing and highly elusive in this state and beyond. Census: 13 in 66, 3 finer (11/08).
*From The Scott Rudolph Collection.*(#3796)

616 **1870 MS65 NGC.** A remarkable Gem with bold design features and brilliant light gray surfaces. Both sides exhibit frosty luster. The obverse has several die cracks and some short die file marks at the border right of the date.(#3797)

## Charming MS66 1870 Nickel

617 **1870 MS66 NGC.** Gem Mint State examples of most Shield nickels are rare, and this date is no exception. As a Premium Gem, this example has only a few peers, with just one coin in a higher grade found in the combined certified population (11/08). Both sides have faint champagne toning over brilliant light gray color. The surfaces are satiny and lustrous, and the devices are sharply defined with only slight peripheral weakness.
*From The Scott Rudolph Collection.*(#3797)

## Amazing MS66 1872 Nickel

618 **1872 MS66 NGC.** Bright nickel-white surfaces reveal shimmering luster and well struck devices with a touch of blue in the fields. A small fleck is noted to the upper right of the shield. Still, a remarkable Premium Gem representative from this underrated issue of slightly over 6 million pieces. Census: 10 in 66, 2 finer (11/08). (#3799)

619 **1873 Open 3 MS65 PCGS. CAC.** Doubled obverse die with slight doubling on the annulet and top leaf groups left and right of the cross. The surfaces are satiny light gray with hints of iridescent toning.(#3800)

## Fabulous Premium Gem 1873 Open 3 Nickel

620 **1873 Open 3 MS66 PCGS. CAC.** This is a fabulous Premium Gem Open 3 Shield nickel. Both sides are awash in bright luster, and display untoned surfaces that have been well cared for. A powerful strike emboldens the design elements, resulting in complete separation in the horizontal and vertical lines of the shield and in the star radials. David Bowers (2006) writes of the 1873 that: "... choice and gem mint state coins are very elusive. When located, the problems of striking and eye appeal arise. In short, finding a nice specimen ... will be a challenge." As we have seen, Bowers' comments are not applicable to the present example. Population: 6 in 66, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3800)

621 **1874 MS65 PCGS.** Well-defined for the issue with only trifling softness found on the reverse stars. Splashes of green-gold patina visit otherwise pale nickel-gray surfaces that are carefully preserved. Population: 28 in 65, 5 finer (11/08).(#3803)

## Interesting 1875 Nickel, MS65
## Doubled Die Obverse, Repunched Date

622 **1875 Doubled Die Obverse / Repunched Date MS65 PCGS.** FS-011.5. An interesting combination doubled die and repunched date, prominently doubled on the annulet with a secondary image of a 5 to the north of the main one. A die crack through the repunched date is an easy-to-spot clue. Excellent definition, particularly on the reverse stars. This luminous Gem is generally nickel-gray with occasional hints of sage near the margins. For all pieces not specifically attributed by PCGS, Population: 21 in 65, 9 finer (11/08).

## Great Premium Gem 1876 Shield Nickel

623 **1876 MS66 PCGS.** David Bowers (2006) writes that "A properly graded MS65 or finer coin, if well struck and with good eye appeal, is a rare find indeed." This description fits the bill for this Premium Gem. Its essentially untoned surfaces exhibit sharply struck devices that, on the obverse, stand out against prooflike fields. The reverse fields exhibit heavy die polish lines, and both sides are devoid of mentionable abrasions. Great overall eye appeal! Population: 8 in 66, 0 finer at either service (11/08).
*From The Scott Rudolph Collection.*(#3805)

624 **1882 MS66 PCGS. CAC.** Light tan patina endows this lustrous and remarkably clean representative. The strike is intricate apart from the centers of the letters in TRUST. A minor strike-through is noted beneath the first S in STATES. The borders exhibit numerous slender die cracks, as made. Population: 69 in 66, 4 finer (11/08).
*From The Scott Rudolph Collection.*(#3812)

625 **1883 MS66 PCGS. CAC.** A lustrous Premium Gem representative from the final year of issue. Well-defined with and undisturbed with a touch of gold toning at the centers. Both sides have several spindly peripheral die cracks. PCGS has certified only 9 pieces finer (11/08).
*From The Scott Rudolph Collection.*(#3813)

### Glorious Superb Gem 1883 Shield Nickel

626 **1883 MS67 PCGS. CAC.** Blushes of canary-gold overlie the ice-blue surfaces of this thoroughly lustrous Superb Gem. Simply an outstanding Shield nickel. This well struck and gorgeous final-year type coin is certain to satisfy even the most demanding specialist. Population: 9 in 67, 0 finer (11/08).
*From The James Mossman Collection.*(#3813)

### Underrated 1883/2 Shield Nickel Variety, MS63

627 **1883/2 MS63 NGC.** FS-013.1. The underdigit 2 is plainly visible when viewed under loupe, just left of the 3 in the date. A large die break also resides beneath 18 in the date. An underappreciated variety that is rarely encountered in Mint State. This well struck piece has nicely preserved surfaces that are mostly free of toning. (#3814)

## PROOF SHIELD NICKELS

### Captivating Gem Proof 1866 Rays Nickel

628 **1866 Rays PR65 PCGS.** This is a remarkable Gem proof with exceptional eye appeal. The surfaces are deeply mirrored around lustrous devices, and fully enhanced by attractive gold toning. This is an important piece as it is the first year of issue and the only date of the With Rays design that is readily accessible to most collectors as a proof. PCGS has graded just 44 finer examples for the contrast category (11/08).(#3817)

### Contrasted 1866 Rays Nickel, PR66 Cameo

629 **1866 Rays PR66 Cameo NGC.** Brilliant throughout with no obvious or distracting marks on either side of this immaculate Gem, and the diagnostic center dot on the reverse is plainly visible. The devices are heavily frosted and provide strong two-toned contrast against the potent mirrors. Census: 33 in 66 Cameo, 7 finer (11/08). (#83817)

### Elegant PR65 Cameo 1867 No Rays Nickel

630 **1867 No Rays PR65 Cameo PCGS.** The 1867 No Rays proofs are fairly elusive, and quality can be a problem, more in the way of eye appeal than in sharp details (David Bowers, 2006). This stunning Gem Cameo is essentially untoned on the obverse and displays speckled milky-gray color on the reverse. Boldly impressed motifs add to the eye appeal. Population: 28 in 65 Cameo, 7 finer (11/08). (#83821)

### Gleaming 1867 No Rays Nickel, PR65 Cameo

631 **1867 No Rays PR65 Cameo PCGS.** Essentially untoned throughout, the fields showing great depth of mirrored reflectivity and the devices have a noticeable level of mint frost which gives the coin a degree of contrast. A great example from this first year of No Rays nickel production. Population: 28 in 65 Cameo, 7 finer (11/08).(#83821)

## Pleasing PR66 Cameo 1867 No Rays Nickel

632 **1867 No Rays PR66 Cameo NGC.** Excellent striking definition with hints of nickel-blue patina over the gleaming mirrors. A great specimen of this initial No Rays proof Shield nickel issue, carefully preserved with powerful eye appeal. NGC has graded just two finer Cameo examples (11/08).
*From The Scott Rudolph Collection.*(#83821)

## Delicately Toned 1868 Nickel PR66

633 **1868 PR66 PCGS. CAC.** Hints of olive-green and red-wine toning adorn this needle-sharp and undisturbed Premium Gem. The date is appears triple punched with a slight offset on the 18 and wide recutting within the loops of the final 8. A scant 600 proofs were struck, and few have survived in such exceptional grade. Population: 8 in 66, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3822)

## Striking PR66 1868 Shield Nickel

634 **1868 PR66 NGC.** A wonderful example of this early proof Shield nickel, with just a dusting of tan coloration over highly reflective fields and powerfully frosted devices. The obverse demonstrates pleasing cameo contrast while the reverse is more uniform in its reflectivity. Rarely encountered any finer. Census: 19 in 66, 2 finer (11/08).(#3822)

## Fantastic PR66 Cameo 1868 Nickel

635 **1868 PR66 Cameo NGC.** Each side offers substantial contrast between the gold-tinged fields and the modestly frosted devices, with the obverse's cameo effect slightly stronger than that of the reverse. Sharply struck, carefully preserved, and delightful for this first full year of No Rays proofs. Census: 12 in 66 Cameo, 2 finer (11/08).(#83822)

636 **1869 PR66 Cameo NGC.** Fully reflective fields are set against frosted devices, producing the cameo effect that is so highly valued by specialists. Minimally toned with gorgeous surfaces. Census: 6 in 66 Cameo, 2 finer (11/08).(#83823)

## Pastel Toned PR66 1870 Nickel

637 **1870 PR66 PCGS. CAC.** Pastel caramel-gold, rose-red, and olive-green visit this boldly struck and satiny Premium Gem. The exemplary surfaces are free from hairlines and virtually devoid of carbon. Much scarcer than implied by the mintage of 1,000 pieces, since unsold sets were melted. Population: 4 in 66, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3824)

638 **1871 PR65 Cameo PCGS.** A boldly struck Gem with pleasing contrast and virtually untoned surfaces. A few tiny flecks are noted on the lower obverse. Population: 16 in 65 Cameo, 10 finer (11/08). (#83825)

## Vibrant PR66 Cameo 1871 Nickel

639 **1871 PR66 Cameo NGC.** Impressively contrasted with an essentially untoned obverse and subtle green-gold and gray shadings across the reverse that have minimal impact on that side's contrast. This Premium Gem boasts powerful striking definition and amazing eye appeal. Census: 9 in 66 Cameo, 5 finer (11/08).(#83825)

## Commendable PR66 1872 Nickel

640 **1872 PR66 PCGS. CAC.** Fletcher-06 with prominent obverse die doubling visible on the annulet and the intersection of the shield lines. It is likely that most proofs of this date use this obverse die, but the variety is nonetheless interesting. The strike is powerful, and the lustrous surfaces display light golden toning. Population: 43 in 66, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#3826)

641 **1872 PR66 PCGS.** Fletcher-06. The annulet is doubled south, with the doubling visible to the unaided eye. Golden-brown toning graces this beautiful proof. The design features are sharply struck. Just one small fleck is noted in the lower right obverse quadrant. Population: 43 in 66, 2 finer (11/08).
*Ex: Central States Signature (Heritage, 5/2005), lot 5901.*(#3826)

## Elegant PR67 1872 Nickel

642 **1872 PR67 NGC.** Marvelously reflective with elegant, even green-gold tints that enliven the obverse. Both sides offer exquisite detail, and the reverse offers rich gold-orange toning around a potent nickel-white center. Dramatic eye appeal. Census: 5 in 67, 0 finer (12/08).
*From The Scott Rudolph Collection.*(#3826)

## Exquisite Superb Gem 1872 Five Cent Proof

643 **1872 PR67 NGC.** Excellent strike and reflectivity. While the central devices show little frost and this Superb Gem shows minimal contrast as a result, the specimen's essential brilliance makes for winning eye appeal. This coin is tied for numerically finest certified by either NGC or PCGS (11/08).(#3826)

644 **1873 Closed 3 PR66 Cameo PCGS. CAC.** Sharply impressed with profoundly reflective fields and deep olive-golden toning. There are no apparent marks, and the 1 in the date is lightly repunched. Population: 15 in 66 Cameo, 0 finer (11/08).
*Ex: Long Beach Signature (Heritage, 9/2003); Long Beach Signature (Heritage, 9/2006), lot 799; FUN Signature (Heritage, 1/2007), lot 2075.*
*From The Scott Rudolph Collection.*(#83827)

## Formidable PR67 Cameo 1873 Closed 3 Shield Nickel

645 **1873 Closed 3 PR67 Cameo NGC.** Whispers of gold grace this flashy and otherwise brilliant Superb Gem. Penetratingly struck, and the surfaces are virtually as struck. The 1 in the date is lightly repunched. Among the finest certified examples of this underappreciated proof issue. Census: 3 in 67 Cameo, 0 finer (11/08). (#83827)

## Marvelous PR67 1874 Five Cent

646 **1874 PR67 PCGS.** With an estimated mintage of just 700 specimens, the 1874 is among the less heavily minted proof Shield nickels, and Superb Gems such as the present coin are highly elusive. Delicate gold and nickel-gray patina drapes much of the smooth surfaces. Population: 7 in 67, 0 finer (12/08).
*From The Scott Rudolph Collection.*(#3828)

## Satiny PR66 Cameo 1874 Nickel

647 **1874 PR66 Cameo PCGS. CAC.** Fletcher-4. The 74 in the date is lightly repunched north. This nearly brilliant Premium Gem has shimmering and unabraded fields. The shield is lightly frosted, and striking incompleteness is mostly limited to the star near the C in AMERICA. Population: 8 in 66 Cameo, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#83828)

## Radiant PR66 Cameo 1874 Nickel

648 **1874 PR66 Cameo PCGS.** In an absolute sense, the 1874 is not a particularly rare date in the proof Shield nickel series, but it blossoms into a conditionally challenging issue above the Gem level with Cameo-grade contrast. This modestly gold-tinged Premium Gem fills the bill, immensely reflective with a crisp strike. Population: 8 in 66 Cameo, 2 finer (11/08).(#83828)

## Elegant PR66 1875 Nickel

649 **1875 PR66 NGC.** Light peach-gold patina across the vibrant mirrors lends this Premium Gem an aura of age and originality. Excellent detail and preservation for this often-overlooked issue of just 700 proofs. Housed in an older-format holder. NGC has certified just one finer example (11/08).(#3829)

## Coruscating PR66 Cameo 1875 Nickel

650 **1875 PR66 Cameo NGC. CAC.** Gentle russet-gold toning graces this flashy and sharply struck Premium Gem. Despite the light patina, the contrast between the devices and fields is perceptible. The absence of hairlines or spots verifies the exemplary quality. Scarce relative to the higher mintage proof issues that close the series. Census: 10 in 66 Cameo, 1 finer (11/08).
*Ex: Denver Signature (Heritage, 8/2006), lot 579.*
*From The Scott Rudolph Collection.*(#83829)

651 **1876 PR66 PCGS.** A crisply struck centennial coin with lovely olive-green, sun-gold, and apricot toning. A solitary minuscule fleck is noted on the center of the shield. Population: 31 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#3830)

652 **1876 PR66 Cameo NGC.** Apparently brilliant at first glance, though examination under a light reveals charming green-gold overtones. Impressively frosted on the sharply struck central devices. Census: 23 in 66 Cameo, 4 finer (11/08).(#83830)

## Graceful PR67 Cameo 1876 Nickel

653 **1876 PR67 Cameo NGC.** Delicate tints of almond-gold deny absolute brilliance, but this fully struck Superb Gem has dazzling field reflectivity and outstanding preservation. The minimal carbon is limited to the scrollwork atop the shield. A wonderful souvenir of our Centennial year. Census: 3 in 67 Cameo, 1 finer (11/08). (#83830)

## Worthy PR66 Ultra Cameo 1876 Nickel

654 **1876 PR66 Ultra Cameo NGC.** Sales at the Centennial Exposition in Philadelphia helped make the 1876 more available in proof than preceding issues. Ultra/Deep Cameos, however, are rare - only 11 such coins have been seen by NGC and PCGS. The current Premium Gem is essentially untoned and boldly struck, and exhibits noticeable field-motif contrast. The surfaces on both sides are attractively preserved. Census: 4 in 66 Ultra Cameo, 1 finer (11/08).
*Ex: Long Beach Signature (Heritage, 2/2007), lot 2525, which realized $4,600.*(#93830)

## Needle-Sharp 1877 Nickel, PR66

655 **1877 PR66 PCGS.** Proof-only dates yield instant popularity, and the low-mintage 1877 nickel is hardly an exception. The present Premium Gem is exquisitely detailed with hints of green-gold toning at the obverse margins that extend into broader coverage on the reverse, along with nickel-gray. Population: 32 in 66, 0 finer (11/08). (#3831)

## Low-Mintage 1877 Shield Nickel, PR65 Cameo

656 **1877 PR65 Cameo PCGS.** The 1877 Shield nickel was a proof-only issue of 510 pieces, the lowest mintage of the entire series. This crisply struck specimen exhibits an unusually high degree of field-to-device contrast, for the type, with mildly frosted devices and considerable reflectivity in the fields. Population: 32 in 65 Cameo, 29 finer (12/08).
*From The Scott Rudolph Collection.*(#83831)

## Fantastic PR66 Cameo 1877 Nickel

657 **1877 PR66 Cameo NGC.** Delicate hints of ice-blue patina drape the gleaming mirrors of this strongly contrasted Premium Gem. The strike is crisp on the mildly frosted central devices. Impressive eye appeal for this noted and popular proof-only Shield nickel issue. Census: 28 in 66 Cameo, 4 finer (11/08).(#83831)

## Charming PR66 Cameo 1877 Five Cent

658 **1877 PR66 Cameo PCGS.** A great example of this popular proof-only issue, heavily contrasted with potent mirrors and impressive striking definition. Occasional hints of liquid green-gold patina splash across the reverse margins, while the obverse is minimally toned nickel-white. Population: 24 in 66 Cameo, 5 finer (12/08).
*From The Scott Rudolph Collection.*(#83831)

659 **1878 PR66 NGC.** A Premium example of this scarce, proof-only date, of which only 2,350 pieces were struck. Sharply struck with moderately reflective fields. Both sides are toned in attractive, light olive-gray and sage patina.(#3832)

## Superb Gem Proof 1878 Nickel

660 **1878 PR67 NGC.** Though the previous year's proof-only issue amounted to a little over 510 specimens, the Mint produced 2,350 pieces for 1878, starting a trend of four-figure mintages that would continue for decades. A hint of autumn-gold appears at the upper obverse rim, but the shimmering surfaces of this Superb Gem are otherwise untoned. Boldly defined and exquisitely preserved. Census: 21 in 67, 0 finer (11/08).
*Ex: Central States Signature (Heritage, 5/2007), lot 1446, which realized $2,702.50.*
*From The Scott Rudolph Collection.*(#3832)

661 **1878 PR66 Cameo NGC.** Impressively undisturbed, this sharply struck and lustrous Premium Gem exhibits peripheral butter-gold toning. The lower loop of the final 8 in the date is recut. As a date, the second rarest of the denomination, since the 1878 was struck only in proof format. Census: 9 in 66 Cameo, 3 finer (11/08).
*Ex: Long Beach Signature (Heritage, 9/2006), lot 813.*
*From The Scott Rudolph Collection.*(#83832)

662 **1879 PR67 NGC.** Light gold toning enriches the borders of this flashy Superb Gem. The strike is exquisite, and the surfaces are exemplary save for minor planchet imperfections near the UN in UNITED. A low mintage date. Census: 11 in 67, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#3833)

663 **1879 PR66 Cameo PCGS.** Light tan and powder-blue grace this flashy Premium Gem. Faint cloud-gray patina is present near 4 o'clock on the reverse. Proofs for this date are made more desirable by a low business strike production of 25,900 pieces. Population: 16 in 66 Cameo, 3 finer (11/08).
*From The Scott Rudolph Collection.*(#83833)

664 **1879 PR66 Cameo NGC.** Hints of gold grace the central shield at the vertical stripes, but the rest of the coin shows little or no patina. Well-defined with pleasing frost on the devices. Census: 13 in 66 Cameo, 6 finer (11/08).(#83833)

665 **1879/8 PR67 NGC.** Breen-2514, "Very Scarce." An overdate variety listed both in Breen and in the *Guide Book*. The overdate is undesignated on the holder insert. This Superb Gem example is sharply struck and essentially pristine, with pale gold surfaces that exhibit flashy reflectivity in the fields.
*From The Scott Rudolph Collection.*(#3834)

666 **1879/8 PR66 Cameo PCGS.** Even gold toning adds a touch of luxury to both sides of this flashy Premium Gem. The fields are deeply reflective and the devices are frosty and boldly defined. To find a more attractive example would prove to be a challenge. Population: 30 in 66 Cameo, 7 finer (11/08).(#83834)

## Astonishing PR65 Ultra Cameo 1879/8 Nickel

667 **1879/8 PR65 Ultra Cameo NGC.** The apparent overdate feature appears as an elongated "tail" on the 9 in the date. A boldly contrasted piece with ample nickel-white frost across the sharply struck devices, with strong mirrors surrounding. A light fingerprint appears at the lower right reverse, but the piece displays beautifully. (#93834)

668 **1880 PR67 NGC.** Light almond-gold toning visits the unabraded surfaces of this satiny Superb Gem. Penetratingly struck, and trivial reverse field imperfections limit the grade. Nearly all high grade examples of the low mintage 1880 Shield nickel are found in proof format. Census: 31 in 67, 1 finer (11/08).
*Ex: Long Beach Signature (Heritage, 5/2006), lot 615.*
*From The Scott Rudolph Collection.*(#3835)

## Interesting PR67 Cameo 1880 Nickel

669 **1880 PR67 Cameo NGC.** Impressively contrasted for this later proof Shield nickel issue, with the frost across the exquisitely detailed central devices being particularly noteworthy. Just a hint of green-gold patina visits the rims, and the mirrors are essentially untoned. Census: 19 in 67 Cameo, 1 finer (11/08).(#83835)

## Charming PR67 1881 Nickel

670 **1881 PR67 NGC.** A lovely and lightly toned Superb Gem proof, faintly green-gold at the rims with virtually nickel-white centers that are delightfully mirrored. One of the berries is separated from the obverse wreath, a common side effect of this year's lapped dies. Census: 24 in 67, 1 finer (11/08).(#3836)

671 **1881 PR66 Cameo PCGS.** Minute freckles of tan patina overlay this meticulously struck premium Gem. Moderate white on black contrast furthers the eye appeal. Another low mintage date for business strikes, which increases the demand for proofs. Population: 45 in 66 Cameo, 10 finer (11/08).
*Ex: Palm Beach Signature (Heritage, 3/2005), lot 5284.*(#83836)

## Remarkable 1881 Shield Nickel, PR67 Cameo

672 **1881 PR67 Cameo PCGS. CAC.** The 3,575 specimens coined for the proof mintage compare with a business strike production of just 68,800 pieces. This sharply struck representative exhibits traces of gold and rose color against shimmering nickel-gray surfaces that evoke a pleasing degree of cameo contrast. A lovely coin with no appreciable distractions to the unaided eye. Population: 10 in 67 Cameo, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#83836)

## Wonderful PR67 Cameo 1881 Nickel

673 **1881 PR67 Cameo NGC.** Subtle golden tints invigorate each side of this later-date Shield nickel Cameo proof. The strike is razor-sharp, and delicate frost graces the minimally toned central devices. Incredibly appealing with marvelous preservation. NGC has certified just one finer Cameo coin (11/08).(#83836)

## Appealing PR67 Cameo 1881 Nickel

674 **1881 PR67 Cameo NGC.** Considerable reflectivity in the fields, though parts show more flash than actual mirrors, with substantial contrast between the open spaces and the mildly frosted, sharply struck central devices. Interesting visual appeal. NGC has graded just one finer Cameo example (11/08).(#83836)

675 **1882 PR67 PCGS.** Lightly toned nickel-gray overall with elements of rose. This sharply struck Superb Gem offers noteworthy eye appeal, though contrast is minimal. Population: 39 in 67, 0 finer (11/08).(#3837)

676 **1882 PR67 Cameo NGC.** Dazzling luster and an intricate strike combine with delicate gold toning to ensure exemplary eye appeal. A wonderful representative of this penultimate proof issue. Census: 21 in 67 Cameo, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#83837)

677 **1882 PR67 Cameo NGC.** Subtle golden tints visit the obverse, while the strongly contrasted reverse is essentially brilliant. Gleaming fields are virtually flawless to the unaided eye. Census: 21 in 67 Cameo, 0 finer (11/08).(#83837)

678 **1883 PR67 PCGS.** This piece has bold definition on all the design elements and the bright reflectivity in the fields serves to enhance and enliven the light, pastel iridescence seen on each side. A gorgeous specimen from the final year of the design. Population: 20 in 67, 0 finer (11/08).(#3838)

### PR67 Cameo 1883 Shield Nickel

679 **1883 PR67 Cameo NGC.** 1883 was a transitional year, with Chief Engraver Charles Barber's Liberty nickel replacing predecessor Longacre's Shield nickel. The design change and publicity regarding the No Cents design led to higher proof mintages, yet Superb Gems remain scarce. This is a lustrous and faintly toned specimen that has an intricate strike and essentially pristine surfaces. The date shows traces of recutting. Census: 13 in 67 Cameo, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#83838)

## LIBERTY NICKELS

### Impeccable 1883 No Cents Nickel, MS67

680 **1883 No Cents MS67 NGC.** An attractive example of this one-year type coin, essentially untoned with strong luster. A solid strike leaves exquisite definition on the design elements, save for the usual minor softness in the corn ear left of the bow knot. Both sides are impeccably preserved. A few spidery die cracks link the stars. Census: 49 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3841)

### Superb Gem 1883 No Cents Nickel

681 **1883 No Cents MS67 NGC.** Potent luster and delicate caramel-gold toning endows this magnificent single year type coin. The sole imperfection is an incomplete strike on the left ear of corn and a couple of the star centers. Notoriously plentiful in MS63 to MS65, the No Cents nickel becomes a significant conditional rarity at the MS67 level. Census: 49 in 67, 0 finer (11/08).(#3841)

682 **1883 With Cents MS66 PCGS.** The surfaces are blemish-free in all areas and exhibit a moderate dusting of chestnut-gold and pearl-gray patina. The strike is sharp aside from the first two stars and the left ear of corn. Housed in a green label holder. Population: 48 in 66, 1 finer (11/08).
*Ex: Atlanta Bullet (Heritage, 8/2001), lot 349.*
*From The Scott Rudolph Collection.*(#3844)

683 **1883 With Cents MS66 PCGS.** Warm powder-blue and light gold patina drapes well-preserved and lustrous surfaces. The design features are well-impressed throughout. PCGS has graded only one finer example (11/08).(#3844)

684 **1885 AU53 NGC.** Luminous olive-gold and nickel-gray shadings mingle on this well struck, briefly circulated Liberty nickel key. Minimally marked and fundamentally pleasing.(#3846)

### Desirable Choice 1885 Nickel

685 **1885 MS64 PCGS.** A lovely near-Gem representative of this most prized of circulation-strike Philadelphia Liberty nickel issues. Warm gold and orange patina of varying degrees drapes warmly lustrous surfaces. The strike is substantially above-average with only faint evidence of weakness on the reverse wreath.(#3846)

## Beautiful Gem 1886 Nickel

686 **1886 MS65 NGC.** A highly lustrous example of this key Liberty nickel issue. Well-defined in the centers, though the stars and peripheral wreath elements display some softness. A thin layer of golden patina drapes much of the otherwise nickel-gray surfaces. Despite an original mintage of more than 3.3 million pieces, few examples were saved, and Mint State coins are elusive today. Census: 24 in 65, 3 finer (11/08).
*From The Scott Rudolph Collection.*(#3847)

## Interesting MS65 1886 Nickel

687 **1886 MS65 PCGS.** While not a rarity to the same extent as its 1885 counterpart, the 1886 nickel ranks easily as one of the keys to the series. This Gem is sharply struck in the centers with only occasional hints of softness visible on the obverse stars. Shining surfaces blend nickel-white shadings with occasional golden-peach iridescence. Population: 34 in 65, 4 finer (11/08).(#3847)

## Important 1887 Nickel MS66

688 **1887 MS66 PCGS. CAC.** Ex: Baxi. Formidable luster and original dusky golden-gray toning embrace this unabraded Premium Gem. Minor softness on the left ear of corn, as usual for business strikes of the type. A great candidate for Registry collectors, as this piece is tied for the finest certified by either NGC or PCGS (11/08).
*Ex: Long Beach Signature (Heritage, 5/2007), lot 431, which realized $3,737.50.*
*From The Scott Rudolph Collection.*(#3848)

## Striking Premium Gem 1888 Nickel

689 **1888 MS66 NGC.** A charming and carefully preserved Premium Gem that is notable for both a sharp strike and uncommonly strong luster. Rich patina, generally lilac and violet with considerable green-gold elements near the margins, adds considerable visual interest. Census: 12 in 66, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3849)

## Lovely 1889 Nickel, MS67

690 **1889 MS67 NGC.** This is a well produced issue that is generally available at grade levels up to and including MS65. Superb Gems are rare, however, and only three examples have achieved that lofty designation at NGC, and none at PCGS, as of (11/08). This lovely MS67 nickel is sharply struck, and the well preserved essentially untoned surfaces are nearly immaculate. The intense cartwheel luster that radiates from each side ensures an unusually high degree of eye appeal. A few minute flecks are visible on the lower obverse.
*From The Scott Rudolph Collection.*(#3850)

691 **1890 MS65 PCGS. CAC.** Blushes of golden toning visit portions of the reverse borders. Well struck, save for the usual softness on the left ear of corn. Lustrous and attractively preserved. Population: 54 in 65, 11 finer (11/08).
*Ex: Dallas Signature (Heritage, 4/2007), lot 384, which realized $1,610.*
*From The Scott Rudolph Collection.*(#3851)

## Gorgeous Premium Gem 1890 Liberty Nickel

692 **1890 MS66 NGC.** Sharply struck, with just the barest trace of weakness evident on the reverse left ear of corn, this is a resplendent Premium Gem with great cartwheel luster in the fields and lovely olive-gray and orange-gold toning. Impressively preserved and nearly pristine, with no distracting marks or spots on either side. Census: 11 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#3851)

## Conditionally Elusive 1891 Liberty Nickel, MS66

693 **1891 MS66 PCGS.** Gold-orange patina, slightly less pronounced on the reverse, covers the highly lustrous surfaces. The obverse details are robust, though the left kernels of corn are ill-defined on the reverse. A handful of tiny ticks in the fields preclude an even higher grade. Population: 14 in 66, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3852)

## Beautiful Premium Gem 1891 Nickel

694 **1891 MS66 NGC.** Stone-gray, almond-gold, and olive-green enrich this lustrous and exactingly struck Premium Gem. Marks are nearly absent, and the quality is practically unsurpassable. Surprisingly affordable despite its conditional rarity. Census: 14 in 66, 1 finer (11/08).
*From The James Mossman Collection.*(#3852)

695 **1891 MS66 NGC.** Frosty and delicately toned copper-gold and violet. The strike is about average with flatness noted on a few of the stars on the obverse and at the base of the wreath on the reverse. Census: 14 in 66, 1 finer (11/08).(#3852)

## Delightful 1893 Nickel, MS66

696 **1893 MS66 PCGS. CAC.** Delectable original patina on each side features blushes of gold, apricot, and jade. Well struck save for the left ear of corn, with a couple of tiny reeding marks on the reverse that fail to distract. No finer examples have been graded at PCGS. Population: 13 in 66, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3854)

697 **1894 MS65 PCGS.** The centers are slightly nickel-blue, while considerable gold-green color is present at the margins. Well-defined by the standards of the issue with pleasing preservation. Population: 43 in 65, 24 finer (11/08).(#3855)

## Impressive Gem 1895 Nickel

698 **1895 MS65 NGC.** The strike is unusually crisp on this Gem, down to the sharp centers of the stars. What the eye notices first is not the strike, however, but the coin's remarkable color, dusky apricot, mauve, and forest-green over well-preserved and luminous surfaces. Census: 37 in 65, 9 finer (11/08).(#3856)

## Dazzling Gem 1895 Liberty Nickel

699 **1895 MS65 PCGS.** Ex: Baxi. Fully struck with sparkling, exquisitely preserved surfaces, apricot toning streaks that mingle with the natural silver-green color, and an overall appearance that seems nearly flawless. Under close examination with a magnifier, this dazzling Gem will please even the most demanding specialist. Population: 48 in 65, 10 finer (11/08).
*From The Scott Rudolph Collection.*(#3856)

## Lower Mintage 1896 Nickel MS66

700 **1896 MS66 NGC.** The lower mintage 1896 has long been a collector favorite. This attractive high grade example has blazing luster and moderate powder-blue and olive toning. The left ear of corn and the uppermost star is incompletely brought up, but the overall strike is good. Thorough evaluation beneath a powerful loupe will find only the infrequent and inconsequential luster graze. The 1896 has a mintage of less than 9 million pieces, the only such post-1894 Philadelphia business strike within the series. Census: 2 in 66, 0 finer (11/08).
*Ex: Dallas Signature (Heritage, 10/2006), lot 460.*
*From The Scott Rudolph Collection.*(#3857)

701 **1897 MS64 PCGS.** FS-301, formerly FS-014.48. Doubling is most prominent on the 7 but is visible on other digits as well. Softly struck with luminous green-gold and nickel-gray surfaces. The lone example of this variety certified as such by PCGS (11/08). (#3858)

## Beautiful Premium Gem 1897 Liberty Nickel

702 **1897 MS66 NGC.** An amazingly flashy coin with much greater eye appeal than usual, for any Liberty nickel issue. The lovely pale-gold toning on the obverse compares to lighter silver-gray reverse color, where subtle golden highlights are also evident. Sharply struck except for the difficult left ear of corn, with well preserved surfaces that are virtually mark-free. Census: 4 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#3858)

## Delightful Premium Gem 1898 Liberty Nickel

703 **1898 MS66 NGC.** Warm peach-gold and cool sky-blue patina converge on the surfaces of this delightful Premium Gem. Well defined with strong luster and a couple of small marks within the wreath that preclude an even finer grade. A conditionally scarce example from an issue that is virtually unobtainable any finer. Census: 15 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#3859)

## Lustrous 1899 Five Cent, MS67

704 **1899 MS67 NGC.** Blended olive, gold, and lilac toning adorns this well preserved turn-of-the-century nickel. Luster sweeps across the smooth surfaces, and the strike is full with the exception of the left ear of corn. Desirable in such exceptional quality. Census: 4 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3860)

705 **1900 MS66 PCGS. CAC.** The lower left ear of corn in the wreath is flat as usual, but all other details on both sides of this Premium Gem are sharply defined. The surfaces are frosty and lustrous with hints of gold toning. Population: 39 in 66, 5 finer (11/08).(#3861)

706 **1900 MS66 NGC.** Medium tan-brown toning enriches this lustrous and essentially pristine Premium Gem. Nicely struck aside from some softness on the upper stars. Census: 32 in 66, 4 finer (11/08).
*From The Scott Rudolph Collection.*(#3861)

## Conditionally Rare Superb Gem 1900 Liberty Nickel

707 **1900 MS67 NGC.** Glowing luster exudes from both sides of this Superb Gem, each of which displays a beautiful sheen of sky-blue color, joined by a streak of apricot-gold on the lower right reverse quadrant. Generally well struck, save for the usual weakness in the wreath and ear of corn immediately left of the bowknot. A few tiny specks occur near the obverse borders. Census: 4 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3861)

708 **1901 MS66 NGC.** Light almond-gold toning visits this highly lustrous and impeccably preserved Premium Gem. A suitable strike, with the left ear of corn softly defined. Census: 35 in 66, 2 finer (11/08).
*Ex: Palm Beach Signature (Heritage, 11/2004), lot 5856; Long Beach Signature (Heritage, 2/2005), lot 5889.*
*From The Scott Rudolph Collection.*(#3862)

## Impressive Superb Gem 1902 Liberty Nickel

709 **1902 MS67 NGC.** A hint of greenish-gold patina graces the highly lustrous surfaces of this pleasing Superb Gem. Solidly struck overall, though the left ear of corn is filled. The obverse is exceptionally clean, while two tiny contact marks are noted inside the wreath on the reverse. Census: 3 in 67, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#3863)

710 **1903 MS66 PCGS.** Potent luster, a precise strike, and original light autumn-gold toning provide exceptional eye appeal. Only minor marks are detected. Population: 72 in 66, 2 finer (11/08).
*Ex: Atlanta ANA Signature (Heritage, 4/2006), lot 250, which realized $1,150.*
*From The Scott Rudolph Collection.*(#3864)

711 **1904 MS66 PCGS.** Lovely peach-gold shades endow this lustrous Premium Gem. The design elements are sharply impressed, save for characteristic softness on the left ear of corn. Well preserved, and desirable in such quality. Population: 61 in 66, 0 finer (11/08).
*Ex: Palm Beach Signature (Heritage, 3/2006), lot 321.*
*From The Scott Rudolph Collection.*(#3865)

712 **1905 MS66 NGC.** Slate, powder-blue, and autumn-gold toning adorns this unabraded and crisply struck Premium Gem. A delightful representative of the date. Census: 32 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#3866)

713 **1905 MS66 PCGS.** Almond-gold and ice-blue toning visits this thoroughly lustrous and well struck Premium Gem. Outstanding quality for this more available issue. Population: 65 in 66, 0 finer (11/08).
*Ex: Charlotte ANA Signature (Heritage, 3/2007), lot 218, which realized $1,495.*
*From The Scott Rudolph Collection.*(#3866)

## Pleasantly Toned MS66 1907 Nickel

714 **1907 MS66 PCGS.** Potent luster sweeps this well preserved Premium Gem, which displays exquisite streaks of pale peach and gunmetal-gray toning. The strike is alert save for characteristic inexactness on the stars near the coronet tip and the left ear of corn. Housed in a green label holder. Population: 27 in 66, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3868)

## Shimmering 1908 Five Cent, MS66

715 **1908 MS66 PCGS.** The 1908 five cent is a high-mintage issue of more than 22 million pieces, and is difficult to locate in the better Mint State grades. Gloria Peters and Cynthia Mohon, in their *The Complete Guide to Shield and Liberty Head Nickels*, write "... a nice '08 in unc. will not be that easy to find in grades 65 and up. Planchets tend to be granular and the normal problems associated with the issue (strike) are still prevalent."

We present here a lovely Premium Gem, featuring shimmering luster and an impressive strike that clearly delineates the design detail, including the wreath elements left of the bow knot. Light shades of lavender, ice-blue, and gold rest on the very clean surfaces. A few trivial obverse marks likely prevent an even higher grade. This issue is virtually never encountered any finer than this. Population: 12 in 66, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3869)
***See: Video Lot Description***

## Conditionally Scarce 1908 Liberty Nickel, MS66

716 **1908 MS66 PCGS.** The glistening, impressively preserved surfaces display boldly struck devices and lovely, warm champagne-gold toning. Faint streaks of apricot color also emerge, on each side. Only a couple of the obverse stars are incomplete, along with the reverse left ear of corn. Virtually pristine, with great eye appeal. Population: 12 in 66, 0 finer (11/08).(#3869)

## Remarkable 1909 MS66 Nickel

717 **1909 MS66 PCGS.** This conditionally rare Premium Gem displays stunning luster and remarkably well struck design elements. Essentially untoned, both sides of the piece are distraction-free, and surface marks of any kind are virtually nonexistent. Neither of the major grading services has certified an example of this late Liberty nickel issue any finer. Population: 22 in 66, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3870)

718 **1910 MS66 NGC.** Lovely rose-red, powder-blue, and lemon endow this crisply struck and satiny Premium Gem. An exceptional example worthy of a competitive Registry holding. Census: 12 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#3871)

719 **1911 MS66 NGC.** Dusky tan-gold shades encompass this undisturbed high grade example. Potent luster sweeps minimally abraded surfaces. Census: 21 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#3872)

## Final-Year 1912 Nickel, MS66

720 **1912 MS66 PCGS. CAC.** The 1912 Liberty nickel, with a business strike mintage of over 26 million pieces, is easily available through MS64, and even Gems can be located with a little searching and patience. MS66 coins are much more elusive. This Premium Gem displays radiantly lustrous surfaces that are covered with a thin veneer of champagne-gold color. The obverse strike is exceptional for this poorly struck issue, while the reverse exhibits some minor softness in the corn ear and leaves left of the bowknot. Both sides are carefully preserved. Population: 25 in 66, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3873)

## Desirable MS65 1912-D Nickel

721 **1912-D MS65 PCGS.** Along with its S-mint counterpart, the 1912-D was the first branch mint five cent nickel issue. The present Gem representative offers strong, pleasing luster beneath luminous green-gold and peach patina. Though the peripheral design elements are softly struck, the well-preserved central devices are comparatively sharp. PCGS has graded 27 finer examples (11/08).(#3874)

722 **1912-D MS65 NGC.** This branch mint nickel has pleasing luster and dusky chestnut-gray toning. The strike is sharp save for the kernels on the left ear of corn. Free from marks, and carbon is of little consequence.
*From The Scott Rudolph Collection.*(#3874)

723 **1912-D MS65 PCGS. CAC.** Lustrous surfaces are visited by waves of gold-tan, light green, orange, and subtle lavender patination. Strike weakness is noted on several of the star centers, and on the leaves and corn ear to the left of the bowknot. There are no mentionable contact marks or spots to report.
*From The Plymouth Collection.*(#3874)

## Lovely MS65 1912-D Nickel

724 **1912-D MS65 PCGS.** Bright, slightly satiny surfaces are awash in delicate orange-gold patina. Excellent definition overall, with only a touch of softness visible at Liberty's leftmost curls. This initial Denver Liberty nickel issue would prove to be the last as well, since 1913 brought the Buffalo nickel design. PCGS has graded 27 finer pieces (11/08).(#3874)

## Magnificent 1912-D Nickel MS66

725 **1912-D MS66 PCGS. CAC.** Light golden-gray patina delicately graces the surfaces of this typically struck and virtually pristine Premium Gem nickel. Only a few obverse stars and the reverse left ear of corn are incompletely struck. Eye appeal such as this is only possible in the loftiest grades of preservation. Population: 27 in 66, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3874)

## Patinated Select 1912-S Nickel

726 **1912-S MS63 PCGS.** A satiny Select example that has deep dove-gray and chestnut toning. Surprisingly free from marks, although an apparent shallow strike-through is noted beneath the eye. The low mintage 1912-S ranks among the keys to the series. Housed in a first generation holder.(#3875)

### Attractive Near-Gem 1912-S Liberty Nickel

727 **1912-S MS64 PCGS.** There is apparent repunching on the lower right base of 1 in the date. Boldly struck overall, with softness noted on the lower obverse stars (1 and 2, 11-13), and on the reverse left ear of corn. Olive-gold toning yields to purple-red coloration near the borders. A pair of small marks reside beneath star 8.(#3875)

### Key Gem 1912-S Nickel

728 **1912-S MS65 NGC.** This key date nickel easily has the lowest mintage of the series, excluding the unauthorized 1913 proofs. Gems are predictably scarce. This satiny example features dusky chestnut-gold toning, although the borders display glimpses of powder-blue. The strike is sharp aside from the left ear of corn, and the few tiny ticks are largely confined to the obverse. Census: 85 in 65, 5 finer (11/08). *From The Scott Rudolph Collection.*(#3875)

### Gem Lustrous 1912-S Liberty Nickel

729 **1912-S MS65 NGC.** The 1912-S Liberty nickels were the first experience the San Francisco Mint had with striking the hard nickels, and most of the survivors show notable strike weakness as a result, due possibly to either improper die spacing or efforts to extend the useful life of dies past their prime—or both. This piece shows a strike that is about typical for the issue, with softness showing on the high points of the hair beneath the coronet, and on the reverse at that pesky lower left ear of corn. The eye appeal, however, is above average, with pretty golden-pink coloration and radiant luster. *From The Plymouth Collection.*(#3875)

### Enchanting MS65 1912-S Nickel

730 **1912-S MS65 PCGS.** The low-mintage 1912-S Liberty nickel is one of the most sought-after coins of the 20th century. It is challenging in all Mint State grades and always brings impressive prices when offered at public auction. This piece displays a better than average strike for the issue. The star centers are strong, as is most of Liberty's hair, and the leaves and corn ear to the left of the bow knot. The surfaces are originally toned in medium golden-gray hues overlying soft luster. An attractive example of this important issue. PCGS has graded eight finer examples (11/08).(#3875)

## PROOF LIBERTY NICKELS

### Incredible PR67 1883 No Cents Nickel

731 **1883 No Cents PR67 NGC.** This No Cents specimen is a Superb Gem. Both sides are silky smooth in all areas with no noteworthy distractions. Razor-sharp throughout, the devices contrasting appreciably with the moderately reflective fields. Richly toned colorful reddish-orange, ice-blue, and antique-gold over the obverse and reverse. Tied for numerically finest in its contrast category at NGC and PCGS (11/08).(#3878)

### Bold 1883 No Cents Nickel PR67

732 **1883 No Cents PR67 NGC.** A satiny and brightly mirrored specimen with pinpoint sharpness and delicate gold toning. As a business strike, the No Cents variety is plentiful due to contemporary hoarding. However, proofs of the single year subtype are scarce in the present quality. Census: 19 in 67, 0 finer (11/08).(#3878)

733 **1883 No Cents PR66 Cameo PCGS. CAC.** This penetratingly struck and essentially immaculate Premium Gem is lightly toned honey-gold. The date digits display traces of recutting. Satiny and exquisite. Population: 55 in 66 Cameo, 11 finer (11/08). *From The Scott Rudolph Collection.*(#83878)

## Amazing PR67 Cameo 1883 No Cents Nickel

734 **1883 No Cents PR67 Cameo NGC.** Minimally toned with distinct contrast on each side, that of the obverse being slightly stronger with deeper frost across the sharply struck portrait. Carefully preserved with incredible mirrors and eye appeal. Neither NGC nor PCGS has certified a numerically finer Cameo coin (11/08).(#83878)

735 **1883 No Cents PR65 Deep Cameo PCGS. CAC.** Fantastic contrast and minimal patina on the richly frosted nickel-white devices and the gleaming fields. Amazing eye appeal for this one-off proof issue. Population: 3 in 65 Deep Cameo, 4 finer (11/08). (#93878)

## Opulent PR67 1884 Nickel

736 **1884 PR67 NGC.** Light rose overtones drape the obverse, while the sharply struck reverse is minimally patinated with an unfettered nickel-white gleam. Both sides exhibit considerable contrast, and the lack of a Cameo designation for this Superb Gem seems an oversight. Census: 7 in 67, 1 finer (11/08).(#3882)

## Marvelous PR67 Cameo 1884 Nickel

737 **1884 PR67 Cameo NGC.** Both sides show distinct contrast between the deep nickel-gray reflectivity of the mirrors and the lighter, mildly frosted effect on the sharply struck central devices. Carefully preserved with noteworthy eye appeal for this second-year proof Liberty nickel issue. Census: 15 in 67 Cameo, 2 finer (11/08). (#83882)

## Lovely 1884 Liberty Nickel, PR67 Cameo

738 **1884 PR67 Cameo NGC.** Fully struck with noteworthy reflectivity in the fields and appealing natural coloration that includes shades of olive-gray and rose. The central devices are lightly frosted, allowing for a mild cameo effect on each side. Free of contact marks or hairlines, with a small, unobtrusive planchet flaw noted in the hair detail just above Liberty's forehead. A lovely Superb Gem proof Liberty nickel. Census: 15 in 67 Cameo, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#83882)

739 **1885 PR64 PCGS.** Attractive gold and peach highlights endow this precisely struck and lustrous Choice proof. A key date due to its business strike scarcity.
*Ex: San Francisco ANA Signature (Heritage, 7/2005), lot 5625.* (#3883)

## Gem Proof 1885 Liberty Nickel

740 **1885 PR65 NGC.** Business strikes of this type frequently show striking weakness on some of the obverse stars; and very often on the left ear of corn, located on the lower reverse just to the left of the ribbon bow. This Gem proof is fully struck, however, on all design elements, and free of hairlines or contact marks. Essentially untoned with a bright, pleasing appearance. The 1885 Liberty nickel business strike issue is the key to the series, and the proof issue becomes correspondingly important to collectors.(#3883)

## Gorgeous PR67 1885 Nickel

741 **1885 PR67 PCGS.** Honey-gold and ice-blue adorn this satiny and razor-sharp Superb Gem. Proofs of the present quality are desirable due to the rarity of the low mintage business strike in similar condition. Perfect aside from the infrequent carbon fleck and an inconspicuous retained lamination (as made) near the bust tip. Population: 15 in 67, 1 finer (11/08).
*From The Deb-Ann Collection.*(#3883)

## Fantastic Superb Gem Proof 1885 Nickel

742 **1885 PR67 NGC.** Though its mintage of 3,790 pieces is not particularly impressive, the proof 1885 nickel's proximity to its key-date business-strike counterpart elevates it above its peers. This lofty Superb Gem is carefully preserved with razor-sharp detail. Most noteworthy is its patina, pale nickel-blue over the fields with green-gold over the central devices. Census: 15 in 67, 2 finer (11/08). (#3883)

743 **1885 PR65 Cameo PCGS.** Pretty gold and rose toning appears on both sides, with good contrast and a couple of dark toning streaks. A nice Gem Cameo proof of this date, much more difficult as a business strike. Well struck and pleasing.
*From The Findley Collection.*(#83883)

## Key PR67 Cameo 1885 Nickel

744 **1885 PR67 Cameo NGC. CAC.** Deeply mirrored with light gold toning and sharply contrasting design elements. The 1885 is an always-popular issue in proof format because of the well known scarcity of Uncirculated 1885 nickels, the key date in the series. The reverse exhibits a tiny strike-through near the base of the V that is only visible with magnification. Census: 14 in 67 Cameo, 0 finer (11/08).
*Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 376, which realized $4,312.50.*
*From The Scott Rudolph Collection.*(#83883)

745 **1886 PR66 PCGS. CAC.** Exactingly struck and satiny with rich green-gold patina. Perfect aside from a few minute flecks. A popular low mintage date. Population: 72 in 66, 16 finer (11/08).
*From The Scott Rudolph Collection.*(#3884)

746 **1886 PR67 NGC.** Business strikes of this date are elusive, especially in the highest grades, thus Superb Gem proofs are often desired as a collectible alternative. Sharp design details and rich proof luster are evident through medium golden-tan toning. Census: 16 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3884)

## Superb Gem Proof 1887 Liberty Nickel

747 **1887 PR67 NGC.** The bright, silver-white surfaces offer a quicksilver appearance on this bold Superb Gem, one of only a tiny handful so certified at both NGC and PCGS. A couple of tiny dark toning spots appear only under a loupe, yet the overall eye appeal is high for those who prefer their coins untoned. Census: 4 in 67, 0 finer (12/08).
*From The Scott Rudolph Collection.*(#3885)

748 **1889 PR67 NGC.** Ice-blue at the periphery with bluish-green color at the centers and occasional amber-orange accents on each side. The devices display excellent detail, and the surfaces are exceptionally well preserved. Highly appealing. Census: 16 in 67, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#3887)

749 **1890 PR66 Cameo NGC.** The brilliant quicksilver surfaces show essentially no trace of color, with excellent contrast and good eye appeal. Seldom seen finer—NGC has certified only two Cameos in higher grade, and PCGS none—from a proof mintage of 2,740 pieces. Sharply struck, better than average even on the lower left ear of corn on the reverse.(#83888)

750 **1892 PR66 Cameo PCGS.** Boldly impressed and gleaming with pale ice-blue over the fields and light lemon-yellow patina on the devices. Deeply reflective and attractive. Exemplary despite a small spot near the obverse rim at 10 o'clock. Population: 16 in 66 Cameo, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#83890)

## Stunning 1892 Nickel PR67 ★ Cameo

751 **1892 PR67 ★ Cameo NGC.** Both sides of this wonderful Superb Gem proof are color free, and each displays stunning filed-motif variance irrespective of the angel of observation. Additionally, a well executed strike imparts crisp definition to the design elements, none of which reveal even a hint of weakness. Immaculately preserved throughout, and highly deserving of the coveted Star. Census: 1 in 67 ★ Cameo, 0 finer (11/08).(#83890)

## Stunning 1892 Liberty Nickel, PR67 Cameo

752 **1892 PR67 Cameo NGC.** True Superb Gem Liberty nickels are scarce; this proof specimen is just such a coin. The glittering, jet-black fields and sharply frosted devices seem as struck, with nary a contact mark nor a hairline to be found. The stunning Cameo contrast on both sides give the piece an almost majestic appearance. Census: 8 in 67 Cameo, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#83890)

## Exemplary PR67 ★ Cameo 1893 Nickel

753 **1893 PR67 ★ Cameo NGC.** Pastel sun-gold and ice-blue toning visits this flashy Superb Gem. Exquisite definition on the design elements bears evidence of a powerful strike, and both sides appear immaculate aside from infrequent pinpoint carbon. Census: 3 in 67 ★ Cameo, none finer (11/08).
*From The Scott Rudolph Collection.*(#83891)

754 **1895 PR66 NGC.** Light gold-orange overtones drape the luminous nickel-gray surfaces. Considerable mirrors and a sharp strike greatly enhance the visual appeal. Census: 34 in 66, 4 finer (11/08). (#3893)

755 **1896 PR66 Cameo NGC. CAC.** A bold Cameo proof with nicely frosted devices and black mirrors. A hint of pale gold is noted across otherwise untoned surfaces and the strike is needle-sharp. A very attractive late nineteenth century proof. Census: 8 in 66 Cameo, 4 finer (11/08).
*From The Scott Rudolph Collection.*(#83894)

## Beautiful 1897 Liberty Nickel, PR67 Cameo

756 **1897 PR67 Cameo NGC.** A brilliant and beautiful Superb Gem with dramatic white-on-black contrast that approaches an Ultra Cameo designation. Conservatively assessed as Cameo by NGC. The strike is razor-sharp, and any faint surface imperfections are relegated to the reverse border near 7:30. Census: 7 in 67 Cameo, 4 finer (11/08).
*From The Scott Rudolph Collection.*(#83895)

## PR67 ★ Ultra Cameo 1897 Nickel

757 **1897 PR67 ★ Ultra Cameo NGC.** This precisely struck Superb Gem displays dramatic contrast between the deeply frosted devices and the darkly mirrored fields. An immaculate specimen from the year of William McKinley's inauguration. Census: 1 in 67 ★ Ultra Cameo, 0 finer (11/08).(#93895)

## Lushly Toned 1900 Liberty Nickel PR67

758 **1900 PR67 NGC. CAC.** Beautiful jade-green and orange-gold patina enriches this intricately struck Superb Gem. Only a powerful loupe can detect traces of carbon, and there no visible marks or hairlines. Outstanding quality for this turn of the century date. Census: 26 in 67, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#3898)

## Lovely PR67 Cameo 1901 Nickel

759 **1901 PR67 Cameo NGC. CAC.** A brilliant and prominently mirrored Superb Gem that boasts a pinpoint-sharp strike, even on the sometimes indistinct left ear of corn. A gorgeous, flawless specimen that appears the same today as it did when Queen Victoria ruled England. Census: 6 in 67 Cameo, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#83899)

## Lustrous PR67 Cameo 1902 Nickel

760 **1902 PR67 Cameo PCGS.** This Superb Gem appears brilliant upon first glance, but has a whisper of golden toning on each side. Meticulously struck, lustrous, and essentially immaculate. Cameo frost is most perceptible on Liberty's hair and the wreath. Population: 6 in 67 Cameo, 0 finer (11/08).(#83900)

## Superb Gem Proof 1903 Nickel

761 **1903 PR67 PCGS. CAC.** Delicate sun-gold and salmon-pink toning blends throughout this exactingly struck and lustrous specimen. The dies were struck in medal turn, due to an inexperienced or absent-minded mint worker. A beautiful Superb Gem proof Liberty nickel. Population: 20 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3901)

## Magnificent 1903 PR68 ★ Nickel

762 **1903 PR68 ★ NGC. CAC.** This magnificent Superb Gem proof displays hints of light gold peripheral color that frames soft violet in the central areas. An exacting strike completes the design features, and both faces are immaculately preserved. Well deserving of the Star designation and the CAC green label. Census: 1 in 68 ★, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3901)

## Brilliant PR67 Cameo 1904 Nickel

763 **1904 PR67 Cameo NGC.** 1904 nickels with a Cameo finish are few and far between as evidenced by the census/population data, showing NGC and PCGS have certified just 10 Cameo examples. The reason for this, as pointed out by David Bowers in his *Guide Book of Shield and Liberty Head Nickels*, is that the portrait and devices were not frosted, following new procedures for making proof dies. He states: "The portrait is in low contrast, reflecting changes at the Mint, which had just recently moved into a new building. ... At this point, 'cameo' pieces were no longer available, a situation that would last for several years." The 10 certified Cameos, including the Superb Gem in the present lot, likely resulted from the earliest strikes. Untoned surfaces yield strong contrast between deeply mirrored fields and exquisitely struck, design elements. Both sides are virtually unimprovable. This lovely specimen is tied with two others for the finest certified (11/08).
*Ex: Central States Signature (Heritage, 5/2007), lot 2040, which realized $7,475.*
*From The Scott Rudolph Collection.*(#83902)

764 **1905 PR67 ★ NGC.** This beautiful Superb Gem appears brilliant at first glance, but does have a hint of yellow toning. Suitably struck and flashy with outstanding preservation. The reverse has obvious cameo contrast, as does Liberty's hair, two features that likely elicited the Star designation from NGC. Census: 2 in 67 ★, none finer with a Star (11/08).
*From The Scott Rudolph Collection.*(#3903)

## Formidable PR67 Cameo 1906 Nickel

765 **1906 PR67 Cameo PCGS. CAC.** This is a beautiful and virtually flawless example of the issue. Both sides of the piece are fully struck and entirely untoned, with good reflectivity in the fields and lovely light frost on the devices. Population: 12 in 67 Cameo, 1 finer (11/08).
*Ex: Dallas Signature (Heritage, 11/2007), lot 265, which realized $4,312.50.*
*From The Scott Rudolph Collection.*(#83904)

### Impressive PR67 Cameo 1906 Nickel

766 **1906 PR67 Cameo NGC. CAC.** An impressive proof nickel, this virtually untoned Superb Gem is intricately detailed with full mint brilliance. The white-on-black contrast deserves mention, since relatively few proof nickels from this era have any degree of contrast. None have been certified as Deep or Ultra Cameo by a leading service. Census: 11 in 67 Cameo, 0 finer (11/08).
*Ex: Dallas Signature (Heritage, 4/2007), lot 403, which realized $2,530.*
*From The Scott Rudolph Collection.*(#83904)

767 **1908 PR67 NGC.** Pastel lemon and powder-blue illuminate the obverse. Alternating blushes of salmon-pink and apricot toning encompasses the reverse. A satiny Superb Gem whose only imperfection is a less than absolute strike. Census: 24 in 67, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#3906)

768 **1909 PR67 NGC.** Moderately mirrored and nearly untoned with traces of lilac haze on each nearly immaculate side. An exquisite Superb Gem specimen that soon will venture into antique territory. NGC has graded just seven finer pieces (11/08).(#3907)

769 **1909 PR67 NGC.** Fully struck and virtually pristine with beautifully reflective honey-gold surfaces. A magnificent Superb Gem proof. Census: 87 in 67, 7 finer (11/08).
*Ex: Long Beach Signature (Heritage, 6/2004), lot 5599; Palm Beach Signature (Heritage, 3/2005), lot 5334; Dallas Signature (Heritage, 11/2005), lot 630.*
*From The Scott Rudolph Collection.*(#3907)

### Gorgeous 1909 Five Cent PR68 Cameo

770 **1909 PR68 Cameo NGC.** Gorgeous accents of amber, rose, charcoal-gray and sea-green adorn the surfaces of this Superb Gem proof nickel. The denticles and devices are all fully and crisply struck, including the reverse left ear of corn. The fields display illimitable depths of mirrored reflectivity, and the central design elements are mildly frosted, inducing an attractive cameo effect on both sides. Census: 7 in 68 Cameo, 0 finer at either service (11/08).
*From The Scott Rudolph Collection.*(#83907)

771 **1910 PR67 NGC.** Beautifully toned in rose-red, lemon-gold, and olive-yellow, with the deepest colors along the reverse periphery. Well struck and exceptionally preserved. Census: 46 in 67, 6 finer (11/08).
*From The Scott Rudolph Collection.*(#3908)

772 **1911 PR66 PCGS.** Luminous olive and aqua shadings drape the smooth surfaces of this sharply struck Premium Gem. Well-preserved and delightful. Population: 45 in 66, 7 finer (11/08).(#3909)

773 **1911 PR67 Cameo NGC.** The 1911 nickel had a proof mintage of 1,733 pieces, of which several hundred specimens have been certified by NGC and PCGS. The two services have given fewer than 90 coins a Cameo designation. This Superb Gem Cameo yields good field-motif contrast at all angles of view. Untoned surfaces are impeccably preserved, and exhibit crisply struck design elements. Census: 8 in 67 Cameo, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#83909)

774 **1912 PR66 Cameo NGC.** A gleaming, faintly toned Premium Gem example from the final official Liberty nickel proof issue. The crisply struck devices show delicate frost that contributes to this coin's appreciable contrast. Census: 13 in 66 Cameo, 5 finer (11/08).
*From The Scott Rudolph Collection.*(#83910)

## BUFFALO NICKELS

### Dazzling 1913-D Type One Nickel, MS67

775 **1913-D Type One MS67 PCGS. CAC.** The 1913-D Type One is generally a well produced issue that has strong mint luster. In addition, it also has the charm of being part of a three-issue set of a one-year type. This is a lovely example that has even reddish tinted color and overwhelming mint frost. Nicely struck throughout, there are no mentionable marks on either side. Population: 41 in 67, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#3916)

### Scarce MS66 1913-S Type One Nickel

776 **1913-S Type One MS66 PCGS. CAC.** Although the 1913-S Type Two hogs all the glory, its Type One counterpart is also low mintage, and is the sole S-mint issue of the Raised Ground design. This is a shimmering and essentially pristine Premium Gem that exhibits delicate almond-gold and lime-green toning. The Indian's profile is widely strike doubled.
*From The James Mossman Collection.*(#3917)

## Captivating MS67 1913-S Type One Nickel

777 **1913-S Type One MS67 PCGS. CAC.** Lange (2006) asserts that for the 1913-S Type One, "the better struck pieces are usually characterized by ... subdued luster." This example has grand luster and excellent detail, a wonderful exception. The shining and carefully preserved surfaces have a delicate layer of champagne patina. PCGS has graded only one finer representative (11/08).
*From The Scott Rudolph Collection.*(#3917)

## Superb Gem Type Two 1913 Nickel

778 **1913 Type Two MS67 PCGS. CAC.** David Lange (2000) writes that: "The changeover to the Type 2 reverse was ordered on May 6, and coinage of the revised nickels commenced four days later." Champagne-gold patina bathes highly lustrous surfaces, joined by blushes of delicate violet. A good strike with minor blending on the curve of the tail and the hair above the braid. Exceptionally well cared for surfaces add to the coin's lovely eye appeal. Population: 14 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3921)

## Radiant 1913-D Type Two Nickel, MS66

779 **1913-D Type Two MS66 PCGS.** The radiantly lustrous surfaces of this D-mint five cent are adorned with a veneer of soft violet and yellow-green patina, and exhibit sharply struck design elements. The well preserved surfaces are devoid of mentionable marks. Encapsulated in a green-label holder. Population: 50 in 66, 10 finer (11/08).
*From The Calvin Collection.*(#3922)

## Premium Gem 1913-D Type Two Buffalo Nickel

780 **1913-D Type Two MS66 PCGS.** Though many individuals saved examples of the Type One Fraser design, the Type Two pieces of 1913 were met with less enthusiasm. The piece offered here is an uncommonly high-quality survivor. Well defined with strong, slightly frosty luster and washes of gold, orange, and pink patina. The reverse die is rotated slightly counterclockwise. PCGS has graded only 10 coins finer, as of (11/08).
*From The Scott Rudolph Collection.*(#3922)

781 **1913-S Type Two MS64 PCGS.** A luminous Choice representative from the most challenging of the 1913-dated Buffalo nickel circulation varieties, well struck with soft luster beneath rose-orange and nickel-gray surfaces. Minimally marked for the grade.
*From The Calvin Collection.*(#3923)

782 **1913-S Type Two MS64 NGC.** Rich, dappled gold-orange and violet patina embraces each side of this softly lustrous near-Gem. The strike is pleasing, if not absolutely bold on the high points. (#3923)

## Lovely MS65 1913-S Type Two Nickel, Ex: Fivaz

783 **1913-S Type Two MS65 PCGS.** Ex: Fivaz Collection. Light golden patina graces warmly lustrous and well-preserved surfaces. This well-defined Gem offers an aura of originality and grand eye appeal for this issue, the most elusive of the 1913-dated Buffalo nickels. PCGS has certified 30 finer examples (11/08).(#3923)

## Vibrant MS65 1913-S Type Two Nickel

784 **1913-S Type Two MS65 NGC.** Only 1.2 million pieces were struck of this first-year issue and few Gems are available for the large numbers of collectors of this popular series. A hallmark of this well struck coin is its color; the central features are gray-lilac with deep golden-rose and lime-green coloration in the fields. A distinctive and attractive coin. Census: 66 in 65, 21 finer (11/08). (#3923)

## Gem Type Two 1913-S Buffalo Nickel

785 **1913-S Type Two MS65 PCGS.** This low mintage issue is desired by collectors in all grades. Although 1913-dated nickels were set aside in quantity by those who encountered the new Buffalo design in their change, most of those pieces had the Type One reverse, with a mound instead of a plain near the denomination. A lustrous chestnut-gold and stone-gray Gem with an unabraded appearance and only minor carbon on the face. LIBERTY is softly brought up, but the mintmark is sharp.(#3923)

786 **1914 MS66 PCGS.** Lustrous and unabraded with light gold-tan toning and only trivial carbon. The strike is full save for slight merging on the hair above the braid. Just 16 pieces have been certified finer by PCGS (11/08).
*From The Scott Rudolph Collection.*(#3924)

## Attractive 1914/3 Nickel, MS64

787 **1914/3 MS64 PCGS.** FS-101, formerly FS-014.87. Light golden patina drapes the slightly satiny fields and the well-defined devices. This piece appears to be a Gem at first glance, and even though close examination reveals a handful of minor marks, their impact on the coin's impressive eye appeal is minimal. This popular and intriguing *Guide Book* overdate is thought by David Lange to have been the result of an overdate on a working hub. This resulted in several varieties with varying states of boldness for the overdate; the present coin shows the crossbar of the 3 strongly. Population: 11 in 64, 4 finer (11/08).(#93924)

788 **1914-D MS65 PCGS. CAC.** A green-label PCGS holder houses this Gem 1914-D nickel. Deep gold and iridescent patina masks the frosty luster. Although both sides have myriad tiny spots, none are evident without magnification.(#3925)

789 **1914-D MS65 PCGS.** Ruby and nickel-blue shadings embrace most of each side, with the former prevailing on the reverse. Well-defined and attractive for the grade. Housed in a green label holder.
*From The Calvin Collection.*(#3925)

790 **1914-D MS65 PCGS.** Remarkable frosty luster with excellent texture on the obverse. This minimally toned Gem has a sharp strike and an appearance more reminiscent of a silver coin than a copper-nickel one.(#3925)

## Outstanding MS66 1914-D Nickel

791 **1914-D MS66 PCGS. CAC.** This satiny and precisely struck Premium Gem is toned in caramel-gold and gunmetal-gray shades. Exceptionally unabraded, and rare in such remarkable quality. The obverse field has the irregular (as made) texture of the 1913-D Type One. Population: 37 in 66, 5 finer (10/08).
*From The Scott Rudolph Collection.*(#3925)

792 **1914-S MS65 PCGS.** The light yellow-gold and lilac shadings that drape the lustrous obverse cede to orange and lavender on the reverse. A pleasingly well-defined Gem, housed in a green label holder.(#3926)

## Colorful Premium Gem 1914-S Nickel

793 **1914-S MS66 PCGS.** Iridescently toned in pastel butter-gold, jade-green, and rose-red. A loupe fails to locate any marks, and the lustrous fields and devices offer a superior strike. A small retained lamination is noted between the back legs. An early branch mint issue, little-saved in Mint State despite an enticingly low mintage. Population: 31 in 66, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3926)

## Delightful Premium Gem 1914-S Nickel

794 **1914-S MS66 PCGS.** Carefully preserved, pleasingly textured surfaces are lustrous beneath ample nickel-blue patina with peach over the central reverse. Uncommonly sharp definition for the issue, particularly on the bison's often-weak shoulder. This gorgeous survivor is tied for the finest certified by PCGS (11/08). (#3926)

## Lovely Superb Gem 1915 Nickel

795 **1915 MS67 PCGS. CAC.** Dazzling luster erupts from impeccably well preserved surfaces that are bathed in delicate hues of low intensity powder-blue and beige-gold patination. Intricately struck, with exceptional definition noted on the hair above the braid. No 1915 nickels have been assigned higher grades by either PCGS or NGC. Population: 36 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3927)

## Interesting MS66 1915-D Nickel

796 **1915-D MS66 PCGS.** Remarkable detail with delightful luster on both the smooth reverse and the textured obverse. Minimally marked, even by the standards of the grade, with little patina and fascinating eye appeal. Essentially unavailable any finer, with only two such pieces certified by PCGS (11/08).(#3928)

## Delicately Toned 1915-S Gem Nickel

797 **1915-S MS65 PCGS.** A medley of champagne-gold, violet, and yellow-green patination bathes both sides of this S-mint Gem, and an attentive strike delivers strong definition to the design features. Highly lustrous surfaces are free of significant contact marks. Housed in a green-label holder.
*From The Calvin Collection.*(#3929)

## Beautiful MS66 1915-S Nickel

798 **1915-S MS66 PCGS. CAC.** The total mintage for the 1915-S nickel amounted to just over 1.5 million pieces, a tiny figure by modern standards. Potent powder-blue, olive-gold, and mauve patina graces the shimmering surfaces of this splendidly preserved Premium Gem. Well struck save for the hair above the braid. Population: 27 in 66, 3 finer (11/08).
*From The Scott Rudolph Collection.*(#3929)

## Desirable MS66 1915-S Nickel

799 **1915-S MS66 PCGS.** Light nickel-blue patina overall. As befits the grade, there is not a single distracting handling mark or carbon fleck, and the luster has survived the passage of time intact. This sharply struck MS66 representative would do wonders for a high-grade Buffalo nickel date set. Population: 27 in 66, 3 finer (11/08). (#3929)

## Challenging 1915-S Nickel MS66

800 **1915-S MS66 NGC.** The light honey-gold surfaces of this Premium Gem are devoid of any visible abrasions. Splendid luster and a sharp strike heighten the eye appeal. Microscopic carbon is difficult to locate, even when viewed beneath a loupe. An elusive low mintage early branch mint issue. Census: 25 in 66, 0 finer (11/08). (#3929)

## Well-Struck 1916 Nickel, MS67

801 **1916 MS67 PCGS.** Despite improvements to the hub for this year to reduce design deficiencies as well as a relatively high mintage, finding a well struck 1916 nickel can be a challenge. Happily, this is a bright, frosted coin that shows complete striking details on each side. Exceptionally clean, as one would expect from an MS67, this is a wonderful example of this early Buffalo nickel.

A review of the PCGS *Population Report* indicates that only 10 examples have been certified at the MS67 level (11/08), with none finer. More noteworthy is the fact that the population has remained nearly unchanged since 2003, with only one MS67 example being certified by PCGS since that time.

*From The Scott Rudolph Collection.*(#3930)

## Handsome Gem 1916-S Nickel

802 **1916-S MS65 PCGS.** This lustrous walnut-brown and steel-gray Gem is pleasantly unperturbed by contact. The centers show minor incompleteness, but the date, mintmark, tail, horn, and LIBERTY are well struck. Significantly scarcer than its high-mintage Philadelphia counterpart.

*From The Scott Rudolph Collection.*(#3933)

## Lustrous MS66 1916-S Nickel

803 **1916-S MS66 PCGS.** Medium tan-gold and forest-green embrace this lustrous Premium Gem. Well struck for an early S-mint issue, since only the feathertips and the bison's forehead hair lack precise definition. Marks are virtually absent, and carbon is limited to a few microscopic flecks beneath the bison's beard. Struck from a prominently clashed obverse die. Population: 28 in 66, 4 finer (11/08).

*From The Scott Rudolph Collection.*(#3933)

## Great Superb Gem 1917 Buffalo Nickel

804 **1917 MS67 NGC.** The eye appeal of this coin is enormous, with light toning in hues of rose and ice-blue ceding to jade-green at the obverse rim, and to gold color on the central reverse. The sharp strike encompasses the horn, the Indian's braid, and LIBERTY. A great coin that will never need upgrading. Census: 5 in 67, 1 finer (11/08).

*From The Scott Rudolph Collection.*(#3934)

805 **1917-S MS64 PCGS.** The soft, pleasing luster shows occasional quicksilver elements beneath subtle gray-gold and pink shadings. Well struck with solid eye appeal despite a flaw through the portrait's central hair.

*From The Calvin Collection.*(#3936)

## Splendid MS66 1917-S Nickel

806 **1917-S MS66 PCGS.** Deep golden-brown and medium-gray toning adorns the satiny, highly lustrous surfaces of this impressive Premium Gem. Well struck on all of the design elements, including the bison's head and shoulder. A couple of tiny marks on the bison's shoulder are only noticed under magnification. A splendidly preserved example of this early Buffalo nickel issue. Population: 22 in 66, 0 finer (11/08).

*From The Scott Rudolph Collection.*(#3936)

## Conditionally Scarce Premium Gem 1918 Buffalo Nickel

807 **1918 MS66 PCGS.** Soft pastel colors cover each side of this lovely coin, a Premium Gem example of an issue that is notoriously scarce in the better grades of Mint State. The strike is above average for the issue, which is typically quite poor. Other than a couple of minor marks on the bison's shoulder, the satiny surfaces are mark-free. Some of the typical orange-peel texture (as made) is noted on each side, mostly near the reverse peripheries. Population: 41 in 66, 7 finer (11/08).

*From The Scott Rudolph Collection.*(#3937)

### Lustrous 1918-D Gem Five Cent

808 **1918-D MS65 PCGS.** Even though 8.3 million pieces were struck of the 1918-D, it is a very elusive strike and condition rarity among early Buffalo nickels. This piece has strong mint luster. While not fully detailed, the surfaces are exceptionally clean and there is just the lightest hint of violet and orange color. Population: 66 in 65, 21 finer (11/08).
*From The Calvin Collection.*(#3938)

### Beautiful 1918-D Nickel, MS66

809 **1918-D MS66 PCGS.** This is a beautifully toned coin, featuring shades of gold with pink-mauve highlights on the Native American's cheek and the bison. The strike, although not full, is strong, and the few surface marks that limit the grade do nothing to adversely affect this coin's strong eye appeal. Surpassed in grade by only one coin at NGC and PCGS combined. Population: 20 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#3938)

810 **1918/7-D VG10 PCGS.** FS-016.5. Lower-grade examples of this *Guide Book* variety can be elusive due to date wear, but this pleasing gold-gray piece has all digits remaining bold. Roughly one-third of the bison's horn is visible.(#3939)

### Popular 1918/7-D Buffalo Nickel, Fine 15

811 **1918/7-D Fine 15 PCGS. CAC.** FS-016.5. A desirable representative of this dramatic and widely collected overdate. The surfaces are a light to medium-gray with balanced wear and no overtly offensive distractions. Nickels (and cents) were in short supply and were being produced at an unprecedented rate in 1918, setting the stage for the production of this immensely popular variety.(#3939)

### Desirable VF Details 1918/7-D Nickel

812 **1918/7-D—Improperly Cleaned—NCS. VF Details.** Despite the notation on the NCS insert, this is an entirely presentable example of this desirable overdate variety. The level of detail is strong, with about 90% of the horn remaining. Interestingly, the reverse is rotated about ten degrees counterclockwise. A few planchet voids are noted, mostly on the reverse.
*From The Omaha Collection.*(#3939)

### 1918/7-D Overdate Buffalo Nickel, VF25

813 **1918/7-D VF25 PCGS. CAC.** FS-016.5. The thickness on the upper half of the 8 confirms that this is an example of the valuable, intensely sought-after overdate variety. This steel-gray example is fully detailed on the legends and the date. An orange-peel texture in the field directly before the Indian's face is not uncommon for the type.(#3939)

### Pastel Toned Choice 1918-S Nickel

814 **1918-S MS64 NGC.** Ocean-blue and chestnut-gold invigorate this scintillatingly lustrous Choice nickel. Remarkably well struck with the sole exception of minor softness on the hair above the braid. The Indian's profile is strike doubled. An unmarked and exceptionally attractive example of this scarce early S-mint issue.(#3940)

815 **1919 MS66 PCGS. CAC.** Lovely honey-gold and lilac toning endows this lustrous Premium Gem. Well struck aside from the curve of the tail. A small planchet flake to the left of the bison's nose is barely worthy of mention. A delightful Buffalo nickel. NGC and PCGS combined have certified just 16 pieces finer (11/08).
*From The Scott Rudolph Collection.*(#3941)

## Lovely Gem 1919-D Nickel

816 **1919-D MS65 PCGS. CAC.** Green-gold and dove-gray toning embraces this lustrous and impeccably struck Gem. Only the hair above the braid lacks exquisite detail. Marks are uncommonly absent, and the eye appeal is outstanding for this early branch mint issue. Population: 55 in 65, 14 finer (11/08).
*From The Scott Rudolph Collection.*(#3942)

## Beautiful Superb Gem 1920 Nickel

817 **1920 MS67 NGC.** The 1920 nickel, with a mintage of more than 63 million pieces, is a fairly common date through the MS64 level. Even Gem and Premium Gems can be obtained with a little patience and searching. However, Superb Gem examples, such as the current lot, are very elusive, as NGC and PCGS combined have seen only a dozen MS67 pieces with none finer. A thin coat of iridescent ice-blue, lilac, and yellow-gold patina adheres to radiantly lustrous surfaces that are free of mentionable marks. Unlike frequently seen 1920 specimens that are softly struck, this coin exhibits razor-sharp detail throughout, as well as evidence of die clashing near the Indian's chin and lower feathers. A simply beautiful Buffalo nickel! Census: 4 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3944)

## Multi-Color Gem 1920-D Nickel

818 **1920-D MS65 PCGS.** An elusive coin in all but the lowest circulated grades, the 1920-D is also a challenging coin to locate with a bold strike. Those with complete definition are virtually unobtainable. With the exception of one or two isolated features, the present Gem displays sharply impressed devices. The toning is intense, with splashes of powder-blue, salmon-pink, and orange-gold iridescence over a base of rich dove-gray color. Strong underlying luster is noted, but there is not a single noteworthy distraction. Perfect for inclusion in a PCGS Registry Set. Population: 46 in 65, 1 finer (11/08).
*Ex: BTB Collection of Buffalo Nickels (Heritage, 2/2003), lot 5946, which realized $4,715.*
*From The Scott Rudolph Collection.*(#3945)

## Gracefully Toned Gem 1920-D Nickel

819 **1920-D MS65 PCGS.** Medium golden-brown toning enriches the borders of this lustrous and well preserved branch mint Gem. A good strike with above average detail. Impressively devoid of carbon. The left obverse device elements are lightly strike doubled. Population: 46 in 65, 1 finer (11/08).(#3945)

## Smooth Near-Gem 1920-S Nickel

820 **1920-S MS64 PCGS. CAC.** Gunmetal-gray and chestnut tints enrich this coruscating branch mint near-Gem. Die wear has taken its toll on the upper portion of LIBERTY, but the strike is good for the late die state, and the mintmark is sharp. Essentially devoid of abrasions. Only 17 pieces have been certified finer by PCGS (11/08).
*From The Scott Rudolph Collection.*(#3946)

821 **1921 MS66 PCGS. CAC.** David Lange (2000) notes that the 1921 is scarcer than most P-mints in all grades. The current Premium Gem displays a hint of light gold color and is sharply impressed. The lustrous surfaces are devoid of apparent marks.
*Ex: Central States Signature (Heritage, 5/2007), which realized $1,725.*
*From The Scott Rudolph Collection.*(#3947)

## Desirable Gem 1921-S Nickel

822 **1921-S MS65 NGC.** According to David Lange, "...signs of hurried work include multiple die cracks and metal flowlines, both evidence of extended die use." This coin shows evidence of both of these, with small die cracks visible at the date and feathers, as well as weakness in detail near the rim. In contrast, the overall strike is unusually strong for the date, indeed, for any S-Mint product of this timeframe. Green-gold in color, with flashes of bright luster, this is a desirable option for the Buffalo nickel collector searching for a high quality Gem.
*From The Scott Rudolph Collection.*(#3948)

## Amazing Superb Gem 1923 Buffalo Nickel

823 **1923 MS67 NGC.** This is an amazing Superb Gem specimen with sharply detailed obverse and reverse design elements. Both sides are fully brilliant and lustrous, with frosty light-gray surfaces and hints of pale gold toning. This piece is tied for the finest-certified by either NGC or PCGS. Census: 11 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3949)

824 **1923-S MS64 PCGS.** Sharply struck and luminous beneath nickel-gray and gold-orange patina. A degree of die erosion is noted near the right obverse rim. Strong eye appeal for the grade.(#3950)

## Sharply Struck Gem 1923-S Nickel

825 **1923-S MS65 PCGS.** An uncommonly sharp strike for a San Francisco nickel from the 1920s. The hair above the braid, the feathertips, the date, the mintmark, and the bison's hair and shoulder all have superior definition. Minor softness is present on LIBERTY and the curve of the tail. This shimmering and mark-free Gem is toned apricot and olive. Population: 32 in 65, 2 finer (11/08). (#3950)

## Impressive Premium Gem 1924 Buffalo Nickel

826 **1924 MS66 PCGS.** 1924 P-mint nickels are much less common than their 21,620,000-piece mintage suggests. MS66 coins, such as the one we offer in this lot, are challenging; and finer specimens are rare. Intensely lustrous surfaces display a coating of champagne color with delicate sky-blue accents. Much better struck than typically seen. Population: 68 in 66, 4 finer (11/08).
*From The Scott Rudolph Collection.*(#3951)

## Magnificent MS66 1924 Nickel

827 **1924 MS66 PCGS.** Blushes of autumn-gold embrace this exceptional Premium Gem. The strike is superior in all regards save for the curve of the bison's tail. The preservation appears perfect save for a pinpoint fleck above the lip. For the 1924, Mint State examples are clustered around the MS64 grade. MS66 pieces are very scarce. Population: 68 in 66, 4 finer (11/08).
*From The James Mossman Collection.*(#3951)

## Conditionally Scarce Gem 1924-D Nickel

828 **1924-D MS65 PCGS.** Fully struck coins of the 1924-D are nearly unknown (David Lange, 2006). This Gem displays some localized softness on the bison's head, but its tail is quite sharp. Lustrous surfaces show gold, rose, and powder-blue patina; and are devoid of mentionable marks. Population: 89 in 65, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#3952)

## Charming 1924-D Nickel, MS65

829 **1924-D MS65 PCGS.** Pleasingly lustrous with above-average detail for this challenging Roaring Twenties issue. Delicate periwinkle, pink, and champagne toning drapes carefully preserved surfaces. Challenging in Gem and essentially unavailable any finer, with only one such coin known to PCGS (11/08).(#3952)

830 **1925-D MS64 PCGS.** Well struck with luminous rose-gray and gold-orange shadings over quicksilver luster. This well struck piece has the reverse rotated approximately 45 degrees counterclockwise.
*From The Calvin Collection.*(#3955)

## Exemplary Gem 1925-D Nickel

831 **1925-D MS65 NGC.** This is one of the most difficult dates in the Buffalo nickel series to acquire in well struck, problem-free condition. The current Gem, while not fully struck, exhibits a bold date and lettering. Portions of the hair on the Indian, and that over the bison's forehead, are a tad soft, as is the tail. Lustrous surfaces reveal hints of ice-blue and beige, and display some freckles of deeper tan or gray scattered about. Census: 51 in 65, 11 finer (11/08).
*From The Scott Rudolph Collection.*(#3955)

## Bright 1925-S Nickel, MS64

832 **1925-S MS64 NGC.** The 1925-S is one of the front-line strike rarities in the Buffalo nickel series. Although this coin is a long way from fully struck, it is certainly above average, especially on the reverse. Lightly and evenly toned, with bright and satiny underlying luster. The surfaces are remarkably clean for the grade with no obvious impairments to the unaided eye. Housed in an older generation NGC holder.
*From The Calvin Collection.*(#3956)

## Scarce Choice 1925-S Nickel

833 **1925-S MS64 PCGS.** This branch mint near-Gem displays sweeping luster and attractive golden-tan and steel-gray toning. Virtually void of contact, and typically brought up at the borders and on the devices. A peripheral orange-peel texture is as struck from long in use dies.
*Ex: Long Beach Signature (Heritage, 9/2004), lot 5974, which realized $3,680.*
*From The Scott Rudolph Collection.*(#3956)

## Pleasing Superb Gem 1926 Nickel

834 **1926 MS67 NGC.** The brilliant, pristine, and highly lustrous surfaces exhibit sharply struck design elements. Only the curve of the tail and the hair above the braid lack precise detail. Despite its Philadelphia Mint status, difficult to locate in such exemplary quality. Census: 15 in 67, 1 finer (11/08).(#3957)

835 **1926-D MS64 PCGS.** Powder-blue, lavender, and golden-brown colors bathe this well struck and meticulously preserved near-Gem. LIBERTY, the mintmark, and the bison's horn are all sharp. Lustrous and delightful.
*From The Calvin Collection.*(#3958)

## Bold Gem 1926-D Nickel

836 **1926-D MS65 PCGS. CAC.** A pleasing strike for this scarce branch mint issue, since only the central hair is lacking exemplary definition. The mintmark is sharp, unlike sometimes seen. Satiny and unabraded with delicate lime-green and caramel-gold toning. Minute carbon is distributed. Desirable in such lofty quality.
*From The Scott Rudolph Collection.*(#3958)

## Attractive Gem 1926-D Nickel

837 **1926-D MS65 PCGS.** The detail is surprisingly crisp for the issue, particularly on the bison's head, though the shoulder and the obverse portrait are closer to average. Luminous gold-orange and lavender patina embraces carefully preserved surfaces. A rarity any finer, with just 24 such pieces known to PCGS (11/08).(#3958)

## Interesting MS62 1926-S Nickel

838 **1926-S MS62 NGC.** As the only regular-issue Buffalo nickel with a mintage of under a million pieces, the 1926-S enjoys considerable fame. This pleasingly lustrous example is nickel-gray at the softly struck centers with warm reddish-orange patina present in varying degrees in the fields and at the margins. Minimally marked for the grade.(#3959)

## Beautifully Toned Superb Gem 1927 Nickel

839 **1927 MS67 NGC.** This impressive Superb Gem displays violet and greenish-gold patina on the obverse, while gold and light green dominate the reverse. Shimmering and mark-free with an above average strike. For those who will accept only the ultimate in quality. Census: 8 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3960)

## Pastel Toned MS67 1927 Nickel

840 **1927 MS67 NGC.** Iridescent caramel-gold and powder-blue consume the obverse, while the reverse exhibits tan, sky-blue, and honey patina. A wonderfully preserved Superb Gem that has scintillating luster and an above average strike. Only the hair near the braid lacks intricate detail. Census: 9 in 67, 0 finer (11/08). (#3960)

## Distinctive 1927-D Nickel, MS65

841 **1927-D MS65 PCGS.** Both sides show varying degrees of gold-orange and silver-lavender patina, though the obverse shows more of the former color and the reverse exhibits more of the latter. Solid strike, luster, and eye appeal for the issue. PCGS has certified just three finer examples (11/08).(#3961)

842 **1927-S MS63 PCGS. CAC.** Quicksilver luster filters through nickel-lavender and gray-gold patina. Well-defined for the issue with only trifling central softness and few abrasions for the grade. (#3962)

## Lovely MS66 1928-D Nickel, Ex: A D M

843 **1928-D MS66 PCGS. CAC.** Ex: A D M Collection. More sharply struck than most 1928-D nickels, this piece shows strong hair detail on the obverse, full hair on the bison's head, and almost a complete split in the tail. Bright mint luster, as usually seen on this issue. The surfaces are exceptionally clean and there is just the slightest hint of color on each side. Population: 33 in 66, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#3964)

## Worthy Gem 1928-S Nickel

844 **1928-S MS65 PCGS.** Well struck by the standards of any business issue, with incompleteness relegated to the curve of the tail and the tops of a few letters in LIBERTY. Light golden-tan patina with subtle imprints of powder-blue rests upon lustrous, well preserved surfaces. The hair above the braid has a solitary aqua fleck. Population: 62 in 65, 5 finer (11/08).
*Ex: Charlotte ANA Signature (Heritage, 3/2007), lot 306, which realized $3,967.50.*
*From The Scott Rudolph Collection.*(#3965)

## Charming Gem 1928-S Nickel

845 **1928-S MS65 PCGS.** The 1928-S is an S-mint issue that receives far less attention than it deserves, as it is truly scarce, especially in top grades. This piece has a solid strike with lovely light gray luster and champagne accents. Only a slight lack of brilliance seems to keep it from an even higher grade. An outstanding opportunity. PCGS has graded a mere five finer examples (11/08).(#3965)

846 **1929-D MS65 PCGS.** Well struck for a branch mint issue, with only the curve of the tail and the hair above the braid incomplete. Lustrous, faintly toned, and unabraded. A minor retained lamination is noted on the lower portion of the bison's flank.
*From The Calvin Collection.*(#3967)

## Lovely MS66 1929-D Nickel

847 **1929-D MS66 PCGS. CAC.** Bountiful luster on both sides jumps out at the viewer, and delicate orange-gold hues that are imbued with whispers of light blue adorn near-pristine surfaces. The design elements are well brought up, except for the usual softness at the bison's head and shoulder. Population: 40 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#3967)

## Nicely Toned Superb Gem 1930 Nickel

848 **1930 MS67 PCGS.** Sharper struck than most 1930 nickels, the only area of softness is on the braid just above the knot in the Indian's hair. The surfaces have exceptional, frosted mint luster, and each side shows a subtle overlay of pink and lilac toning. Rare as a Superb Gem. Population: 21 in 67, 0 finer (11/08).
*Ex: Long Beach Signature (5/2007), lot 546, which realized $5,750.*
*From The Scott Rudolph Collection.*(#3969)

## Colorful Superb Gem 1934 Nickel

849 **1934 MS67 PCGS.** Exquisite toning in shades of fuchsia and ice-blue graces each side of this attentively struck Superb Gem. Some orange-peel effect is noted on each side, the result of die erosion, but the horn is sharp, the tail is nearly split, and considerable detail shows on the bison's shoulder. Because of the Great Depression, the year 1934 saw the first nickel production since 1931. Population: 18 in 67, 0 finer (11/08).
*Ex: Long Beach Signature (Heritage, 5/2007), lot 559, which realized $7,475.*
*From The Scott Rudolph Collection.*(#3972)

## Pastel Toned MS66 1934-D Nickel

850 **1934-D MS66 PCGS.** Delicate olive-gold and cream-gray toning adorns this satiny Premium Gem. Essentially void of marks, and the strike is good despite the usual incompleteness on the tail curve and the hair above the braid. Population: 42 in 66, 0 finer at either service (11/08).
*Ex: New York Signature (Heritage, 7/2004), lot 5632, which realized $5,290.*
*From The Scott Rudolph Collection.*(#3973)

851 **1935 MS67 PCGS.** Powder-blue and sun-gold embrace this shimmering and virtually immaculate Superb Gem. The strike is decidedly above average, and the eye appeal is superior. PCGS and NGC combined have certified only two examples finer (11/08).
*From The Scott Rudolph Collection.*(#3974)

852 **1935 Doubled Die Reverse XF40 NGC.** FS-018. Doubling is most evident at FIVE CENTS on the reverse with considerable notching. A lightly circulated piece that shows hints of golden patina over otherwise nickel-gray surfaces.(#93974)

## Doubled Die Reverse FS-801 1935 Buffalo Nickel AU55

853 **1935 Doubled Die Reverse AU55 PCGS.** FS-801, formerly FS-018. FIVE CENTS is blatantly die doubled, and UNITED is also nicely doubled. A briefly circulated piece that has streaky slate-gray and walnut-tan toning. The devices conceal a couple of moderate marks. Much rarer than the popular 1937-D Three-Legged variety. Population: 3 in 55, 18 finer (11/08).(#93974)

## Lustrous Near-Mint 1935 Doubled Die Reverse Nickel

854 **1935 Doubled Die Reverse AU58 PCGS. CAC.** FS-801, formerly FS-018. Doubling is immediately apparent on the denomination, and visible through AMERICA and E PLURIBUS UNUM. Although a trace of circulation is visible, this coin presents very well with a high degree of luster and more than ample eye appeal. An affordable and attractive alternative for the collector who does not wish to pay high premiums for a Mint State coin.
*From The Scott Rudolph Collection.*(#93974)

## Multi-Color MS67 1935-D Nickel

855 **1935-D MS67 NGC.** David Lange (2006) writes that "Fully-struck Gems are genuinely rare. Many of these coins were struck from extremely worn dies ... ." An attentive strike brings out impressive definition on the present Superb Gem, save for a touch of softness in the outer parts of some of the letters in LIBERTY. Impeccably preserved surfaces exhibit outstanding luster and iridescent violet and gold patination. Census: 4 in 67, 0 finer (11/08).
*Ex: Long Beach Signature (Heritage, 9/2007), lot 767, which realized $7,475.*
*From The Scott Rudolph Collection.*(#3975)

## Richly Toned MS67 1935-S Nickel

856 **1935-S MS67 PCGS.** Ex: A D M Collection. RPM-1. An obvious RPM, the mintmark was first punched in to the right of the final position. Colorfully toned in lime-green and apricot shades. Lustrous and pristine with a good strike given its San Francisco status. Population: 28 in 67, 0 finer (11/08).
*Ex: Long Beach Signature (Heritage, 9/2007), lot 768, which realized $5,175.*
*From The Scott Rudolph Collection.*(#3976)

857 **1936-S MS67 PCGS.** Apricot, olive, and dove-gray visit this lustrous and alertly struck Gem. There is no evidence of carbon or post-strike contact. Truly an exceptional example. Population: 59 in 67, 0 finer (11/08).
*Ex: Long Beach Signature (Heritage, 5/2007), lot 581, which realized $1,380.*
*From The Scott Rudolph Collection.*(#3979)

## Exquisite MS68 ★ 1937 Nickel

858 **1937 MS68 ★ NGC.** Lemon-gold and cherry-red bands encompass the powder-blue centers. The mint luster is comprehensive, and the strike is intricate save for the unavoidable slight blending on the hair above the braid. The 1937 is plentiful in Mint State, but emerges as an important conditional rarity at the MS68 level. As of (11/08), NGC has assigned the Star designation to two MS68 examples of this date, and they are the two highest-graded pieces certified by that grading service.
*Ex: Central States Signature (Heritage, 5/2007), lot 1648, which realized $10,350.*
*From The Scott Rudolph Collection.*
***See: Video Lot Description***(#3980)

859 **1937-D Three-Legged AU50 PCGS.** FS-020.2. This steel-gray key date nickel has light highpoint wear and a few trivial marks. The portrait is accompanied by small gray spots. All diagnostic features are present, such as the granular back leg and the die lumps beneath the flank.(#3982)

860 **1937-D Three-Legged AU50 PCGS.** This is a nice AU example of the most popular variety in the Buffalo nickel series. The satiny surfaces display cream-gray and caramel toning. The highpoints are evenly worn and there are a few shallow pinscratches on the reverse. (#3982)

861 **1937-D Three-Legged AU55 NGC.** Modest wear at the high points with pleasing detail in general. The strike is solid, and the green-tinged nickel-gray surfaces are attractive. The missing foreleg is readily apparent on the reverse.(#3982)

862 **1937-D Three-Legged AU58 NGC.** FS-020.2. Yellow-gold and lilac toning enriches this lustrous and momentarily circulated key date nickel. The slightly glossy surfaces appear unabraded, and the eye appeal is attractive.(#3982)

### Desirable 1937-D Three-Legged Nickel, MS61

863 **1937-D Three-Legged MS61 NGC.** When detail is missing from a struck coin, it is generally the result of one of three things: a poor strike, post-strike activity such as wear, or excess die polishing. In the former two cases, it is the high point detail that is affected, while the latter affects the lowest points of the design, as in the case of this famous variety. Although the 1937-D three-legged nickel is avidly collected in any grade, it is most often found circulated, rendering mint state pieces such as this one highly desirable. This coin features full luster over a generally rose-gold color. Surface markings appear unusually sparse for a coin that has been assigned this modest Mint State grade.
*From The Omaha Collection.*(#3982)

### Notable MS61 1937-D Three-Legged Nickel

864 **1937-D Three-Legged MS61 NGC.** Remarkably lustrous with subtle golden-rose tints at the margins of the otherwise nickel-gray quicksilver surfaces. Typical striking softness is noted at the bison's shoulder, as well as the obligatory (and desirable!) missing feature at the bison's foreleg. Strong eye appeal for the grade.(#3982)

### Famous Three-Legged MS62 1937-D Nickel

865 **1937-D Three-Legged MS62 PCGS.** FS-020.2. The obverse is stone-gray with glimpses of olive, but the reverse provides delightful shades of lime-green and cherry-wine in addition to cream-gray toning. Satiny and unmarked with pleasing definition. One of two widely collected lapped die mint errors; the other popular variety is the 1922 No D Strong Reverse cent.(#3982)

### Delightful 1937-D Three-Legged Buffalo, MS63

866 **1937-D Three-Legged MS63 NGC.** This piece will make a wonderful New Year's present for some fortunate collector. Both sides boasts delightful lilac and saffron patina over surfaces that appear largely free of abrasions. The luster is subdued, as usually seen even on Mint State examples, and there is normal die fatigue. A nice piece!(#3982)

### Popular 1937-D Three-Legged Nickel, MS63

867 **1937-D Three-Legged MS63 PCGS.** FS-020.2. The 1937-D Three-Legged nickel is most commonly found in high circulated grades, thanks to the publicity the variety received upon discovery, as well as the fact that the Jefferson nickel type began the following year. Happily, this coin has passed the intervening seventy-plus years without entering circulation, and it retains full, pleasing luster atop its nickel-gray surfaces. Well but not quite fully struck, with a few trivial marks accounting for the grade.
*From The Findley Collection.*(#3982)

## Key Three Legged 1937-D Nickel MS64

868 **1937-D Three-Legged MS64 NGC.** FS-020.2. Caramel-gold and steel-blue embrace this lustrous and minimally abraded near-Gem. The strike is sharp, and the eye appeal is imposing. All diagnostics are present, such as the attenuated back leg and the diagonal series of die dots beneath the flank. A perennially collected key date. (#3982)

## Three-Legged 1937-D Nickel MS64

869 **1937-D Three-Legged MS64 PCGS.** FS-020.2. Light caramel-gold and sea-green shades grace this coruscating and unmarked Choice key date nickel. The strike is crisp save for the curve of the tail, and the eye appeal is exemplary. The granular texture on the back leg and on the field beneath the bison are both diagnostic for this widely pursued variety.
*From The Calvin Collection.*(#3982)

## Pursued Three-Legged 1937-D Buffalo Nickel MS64

870 **1937-D Three-Legged MS64 NGC.** FS-020.2. Dusky lilac and green-gold shades embrace this shimmering and well defined representative. A subtle surface graze beneath the bison's beard is the sole observed abrasion. The rough-hewn back leg and the minuscule die lumps below the flank confirm this popular and highly contested variety.(#3982)

## Choice Three-Legged 1937-D Nickel

871 **1937-D Three-Legged MS64 PCGS. CAC.** FS-020.2. An attractive Choice coin that shows vibrant rose-gold toning with a dash of peripheral blue. The diagnostic missing leg and stream of die dots beneath the bison confirm the variety. One of the most coveted varieties of the Buffalo nickel series and included in most date collections.
*Ex: Long Beach Signature (Heritage, 9/2005), lot 1924, which realized $9,200.*(#3982)

872 **1938-D MS67 PCGS.** Extravagantly toned in luminous shades of lemon-gold, aquamarine, and ruby-red. A boldly struck Superb Gem representative of this popular type issue. PCGS has graded only eight coins finer (11/08).
*From The Scott Rudolph Collection.*(#3984)

## Attractively Toned MS68 1938-D Buffalo Nickel

873 **1938-D MS68 NGC.** Peach, ice-blue, and sun-gold shades endow this lustrous and pristine Superb Gem. Only the curve of the tail lacks an exacting strike. All other design elements have exceptional definition. Worthy of the finest quality 20th century type set. Census: 14 in 68, 0 finer (11/08).(#3984)

874 **1938-D/S MS67 PCGS.** OMM-2. Lemon-gold patina embraces this lustrous and nicely struck Superb Gem. Unabraded and attractive. Denver was the only mint to strike the obsolete Buffalo type in 1938. Presumably, leftover S-mint dies were overmintmarked and sent to Denver as an economy measure.(#3985)

875 **1938-D/S MS67 PCGS.** FS-020.5. OMM-1. The most desirable overmintmark variety, which also exhibits repunching of the Denver mintmark beneath its base. A beautiful combination of delicate champagne-gold, beige, sky-blue, and lilac patina adorns this attentively struck and pristine Superb Gem.
*Ex: Long Beach Signature (Heritage, 6/2004), lot 5715; Central States Signature (Heritage, 5/2007), lot 1665, which realized $1,495.*
*From The Scott Rudolph Collection.*(#3985)

876 **1938-D/S MS67 PCGS. CAC.** A stunning 1938-D/S Buffalo that is tied for the finest PCGS has certified. This Superb Gem has considerable gold and pale blue toning over satiny luster. (#3985)

# PROOF BUFFALO NICKELS

## Charming 1913 Type One Nickel, PR66

877 **1913 Type One PR66 PCGS.** Struck with pinpoint sharpness. Both sides are immensely lustrous beneath rich apricot-orange patina. A few isolated splashes of violet and blue are present on the well-defined bison. Overall, a great representative of the lone Type One proof Buffalo nickel issue. PCGS has graded 44 finer specimens (11/08).(#3988)

## Patinated PR66 Type Two 1913 Nickel

878 **1913 Type Two PR66 NGC.** The razor-sharp strike and the subtle matte surface texture confirm the specimen status of this immaculate Premium Gem. Streaky autumn-gold toning is light on the obverse and more prominent on the reverse. A pleasing representative of the briefly issued matte proof subtype. Census: 79 in 66, 42 finer (11/08).(#3990)

## Superb Gem Proof Type Two 1913 Buffalo Nickel

879 **1913 Type Two PR67 PCGS.** Sharply struck, as expected, with bright, satiny surfaces that seem virtually pristine. The mint-green coloration is augmented by extensive apricot and rose toning streaks on both sides. On the Type Two Buffalo nickel, FIVE CENTS is placed in a recessed area beneath the bison's feet, rather than on a raised "ground" area as seen on the Type One. Population: 43 in 67, 4 finer (11/08).
*From The Scott Rudolph Collection.*(#3990)

## Richly Toned PR66 1914 Nickel

880 **1914 PR66 NGC.** Deep peach patina dominates, but cedes to ice-blue across selected high points. A powerful loupe and a strong light fail to locate any imperfections. Exquisitely struck, and highly desirable in such quality. A mere 1,275 proofs were struck. Certified in a former generation holder.(#3991)

## Elegant PR66 1914 Nickel

881 **1914 PR66 NGC.** Demand for proof Buffalo nickels dropped sharply from 1913 to 1914, with the latter year's mintage of 1,275 specimens falling below the total for either the Type One or Type Two proofs of 1913. This exquisitely detailed Premium Gem is richly textured beneath dappled orange and sage patina. Carefully preserved and impressive.(#3991)

## Conditionally Elusive Superb Gem Proof 1915 Nickel

882 **1915 PR67 PCGS.** As noted by expert David Lange, this proof issue typically displays a uniformly high degree of production quality, and survivors from the original mintage of 1,050 pieces tend to come in high grades. Superb Gems, however, are not numerous. This example is crisply detailed on all of the design elements, with a pleasing satiny appearance and immaculately preserved surfaces. A wispy die crack is noted across the bison's shoulder and mid-torso. Population: 49 in 67, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#3992)

## Attractive 1936 Satin Finish Nickel, PR66

883 **1936 Type One—Satin Finish PR66 PCGS.** Light nickel-gray toning overall with glimpses of peach at the margins. This Premium Gem shows excellent striking definition as usual for proofs of the era, though luster is the subdued satin that proved unpopular with collectors of the time, rather than the brilliance that dominated later. Encased in a green label holder.(#3994)

## Lovely PR67 1936 Satin Finish Buffalo

884 **1936 Type One—Satin Finish PR67 NGC.** This piece approaches the top end of the certified population, as both NGC and PCGS have each graded only a couple of dozen pieces in finer grade, less duplicates. The present piece boasts lovely sage and rose coloration on the obverse, with excellent eye appeal. A few small dark toning stripes on the buffalo's midsection fail to detract.(#3994)

## Striking Satin Finish 1936 Nickel, PR67

885 **1936 Type One—Satin Finish PR67 NGC.** A remarkable Superb Gem specimen from the earlier Satin Finish type of the 1936 proof Buffalo nickel, the first proof strikings for the denomination in two decades. Warm lemon-gold and green-gold patina drapes much of each side, though slivers of nickel-white survive at the margins. NGC has graded 21 numerically finer examples (11/08).
*From The Plymouth Collection.*(#3994)

886 **1936 Type Two—Brilliant Finish PR64 NGC.** Razor-sharp striking definition with impressive mirrors beneath thin veils of green-gold and pearl-gray. Despite faint hairlines, this coin offers charming eye appeal.(#3995)

887 **1936 Type Two—Brilliant Finish PR64 NGC. CAC.** Though a handful of wispy abrasions preclude Gem status, the collector who seeks an attractive example without placing too much emphasis on grade might find a bargain here. Excellent strike and mirrors with only a hint of golden toning.(#3995)

## Splendid Gem 1936 Type Two Buffalo Nickel

888 **1936 Type Two—Brilliant Finish PR65 PCGS.** While some of the 1936 Type Two Brilliant Finish nickels keep their original appearance of molten nickel or mercury, this piece has mellowed in color, like a fine wine, to a shade between lilac and platinum, with tinges of gold on the high points. A splendid Gem example. (#3995)

## 1936 Brilliant Finish Buffalo Nickel, PR66

889 **1936 Type Two—Brilliant Finish PR66 PCGS. CAC.** The Brilliant Finish proof coins are much more attuned to most collectors' tastes than the Satin Finish counterparts, unpopular when issued and little loved today. This piece has splendid flash and fire over the quicksilver surfaces, with loads of appeal and only some insignificant tiny flecks away from an even finer grade.(#3995)

890 **1937 PR66 NGC. CAC.** Excellent striking definition with a hint of wateriness to the mirrors. Glimpses of subtle green-gold patina supplement the already-considerable visual appeal.(#3996)

891 **1937 PR66 PCGS.** Faint ice-blue and green-gold toning visits this precisely struck and undisturbed Premium Gem. A exquisite example of this scarce proof type. Certified in a green label holder. (#3996)

892 **1937 PR66 PCGS.** A gleaming Premium Gem proof that offers subtle champagne shadings over much of the fields and lilac accents on the devices. Carefully preserved with grand eye appeal. (#3996)

893 **1937 PR67 PCGS.** Delicate champagne shadings enrich each side of this gleaming Superb Gem proof. Razor-sharp devices and potent mirrors are equally well-preserved.
*From The Plymouth Collection.*(#3996)

## Gorgeous Superb Gem Proof 1937 Buffalo Nickel

894 **1937 PR67 NGC.** The intensely brilliant surfaces reveal just the slightest hint of milky patina on the reverse, and virtually no disturbances of any kind. Nearly unimprovable quality for this increasingly popular issue. From the final proof issue of the famed Buffalo nickel series, with a low mintage of just 5,769 pieces. (#3996)

### Lovely Superb Gem Proof 1937 Buffalo Nickel

895 **1937 PR67 PCGS.** A crisply struck, essentially pristine representative of this final proof issue. The series actually ended the following year, but in 1938 Buffalo nickels were only struck at the Denver Mint, where proofs were not produced. This is a beautifully preserved Superb Gem with deep, watery reflectivity in the fields. (#3996)

## JEFFERSON NICKELS

896 **1939-D Reverse of 1938 MS66 Full Steps PCGS.** This challenging variant presents a major stumbling-block to the would-be assembler of a Full Steps Jefferson nickel step. The strongly lustrous, sharply struck peach-gold piece offered here could act as a cornerstone. PCGS has graded just four finer Full Steps pieces (11/08).(#84005)

897 **1943-P MS68 Full Steps NGC.** All six steps on the reverse are razor-sharp. This immensely lustrous example has pale silver-nickel centers with green-gold and peach-orange elements dominant at the margins.(#84018)

### Popular MS67 Full Steps 1950-D Nickel

898 **1950-D MS67 Full Steps PCGS.** Ex: Compradore Collection. This issue's low mintage of slightly over 2.6 million pieces spurred mass saving among speculators, and while the 1950-D is desirable, across most grades, it is not a rarity. Full Steps coins are elusive, however, and at the MS67 level, the 1950-D is just as much a condition rarity as its peers. The present Superb Gem example is a remarkable piece with frosty luster and sharp design details. The obverse has vivid gold and iridescent toning, and the reverse is essentially brilliant nickel-white with just a touch of champagne. Population: 4 in 67 Full Steps, 0 finer (11/08).(#84042)

## PROOF JEFFERSON NICKELS

### Conditionally Rare 1939 Reverse of 1938 Nickel, PR65 Cameo

899 **1939 Reverse of 1938 PR65 Cameo NGC.** Sharply struck with essentially full definition on Monticello, including the steps. An untoned silver-gray and "black" proof, with tremendous watery reflectivity in the fields and a definite cameo appearance on both sides. A trace amount of milkiness in the obverse fields is noted for the sake of accuracy, but is too faint to be distracting. (#84176)

900 **1960 PR69 Ultra Cameo NGC.** Surprisingly scarce at this grade level, with a mere nine pieces so-designated by NGC and PCGS (as "Deep Cameo") combined, and none finer (11/08). A flawlessly struck proof with watery, inky-black fields and frosted devices. Free of any marks or hairlines.(#94192)

### Amazing PR69 Cameo 1971 No S Nickel

901 **1971 No S PR69 Cameo NGC.** A virtually flawless representative of this popular missing-mintmark *Guide Book* variety, the third such error to appear in proof sets in the four years following the move of proof strikings to San Francisco. Essentially untoned with strong black-and-white contrast, though it does not reach the point of Ultra Cameo. Census: 7 in 69 Cameo, 0 finer (11/08).(#84204)

*End of Session One*

## GOBRECHT DOLLARS

### Problem-Free PR45 1836 Gobrecht Dollar Die Alignment I

1965 **1836 Name on Base, Judd-60 Original, Pollock-65, R.1, PR45 NGC.** Silver. Plain Edge. Die Alignment I (the center of Liberty's head is opposite the DO in DOLLAR). This appears to be an early December striking, but it is impossible to say for certain as 15 points of wear may have effaced the diagnostic die scratch above the eagle that is seen on late December strikings. While effacement of the die scratch is possible but not definitive, the wear seen on each side has definitely effaced most of the reflectivity of the original proof fields. Just the faintest evidence of mirroring can still be seen around the devices. The coin is a pleasing example of this scarce and highly collectible type. The surfaces show even gray patina with a trace of underlying rose and lilac. Both obverse and reverse are essentially problem-free with the only mentionable "flaw" not really a flaw at all but an oval-shaped area of toning on the lower reverse. (#11225)

### AU Details 1836 Gobrecht Dollar Die Alignment I

1966 **1836 Name on Base, Judd-60 Original, Pollock-65, R.1—Repaired, Improperly Cleaned—NCS. Proof AU Details.** Silver. Plain Edge. Die Alignment I (the center of Liberty's head is opposite the DO in DOLLAR). The die scratch above the eagle's wing is just barely visible with magnification, indicating this is a late December striking. It appears that a field repair was made just to the right of Liberty's head as there is a slight ripple in the texture of the coin in that area. Each side was cleaned and has since retoned with light gray patina overall. The striking details are uncommonly strong with the head and foot definition nearly complete. Slight friction is evident on the high point of the eagle's breast.(#11225)

# Attractive PR62 Judd-60 1836 Gobrecht Dollar

1967 **1836 Name on Base, Judd-60 Original, Pollock-65, R.1, PR62 PCGS. CAC.** Silver. Plain Edge. Die Alignment I (the center of Liberty's head is opposite DO in DOLLAR). One of the so-called First Originals with the eagle flying upward. This piece lacks the die scratch above the eagle's wing that was apparently done on the late December strikings. This lack of the scratch identifies this coin as one of the first strikings from early December. These coins are generally found in higher grades. The apparent reason is that they were struck as circulating proofs, and as such they were set aside as mementoes. The fields are nicely reflective with a number of small but individually inoffensive contact marks. Each side is mostly untoned, but there is a pronounced thin ring of blue and golden around the margin on each side. Fully struck in all areas.

Struck (and restruck later) in proof format, the Gobrecht dollars dated 1836-39 were the U.S. Mint's first attempt at circulating silver dollar coinage since the 1803-dated issues, and the then-director of the Mint, Robert Maskell Patterson, apparently spared no effort to ensure that the large silver coins would possess maximal aesthetic beauty and see widespread acceptance in the channels of commerce. They were, after all, important icons of a burgeoning nation. Unfortunately, when the regular Seated Liberty dollar premiered in 1840, the reverse no longer featured the majestic flying eagle, reverting instead to a formulaic eagle with shield on breast from an earlier era, slightly redesigned by Robert Ball Hughes. While they satisfied the needs of commerce, their aesthetics were noticeably impaired. *From The James Mossman Collection.* (#11225)

# Impressive Judd-60 Original 1836 Gobrecht Dollar PR62, Die Alignment I, Early December Striking

1968 **1836 Name on Base, Judd-60 Original, Pollock-65, R.1, PR62 PCGS.** Silver. Plain Edge. Die Alignment I (the center of Liberty's head is opposite the DO in DOLLAR). Struck from the first production run in early December 1836, as seen by the lack of the die scratch that would be clear on a coin of this grade if it were from the second run in later December. These coins were all intended for circulation, but a relatively large percentage of the 400 pieces believed struck in early December were set aside as mementoes, as these pieces are often found in high grades. The presentation coins given to Christian Gobrecht and Andrew Jackson were from this first striking period.

The Judd-60 Gobrecht dollars are by far the most frequently encountered of all the various Gobrecht issues. They are in many ways also one of the most interesting of the many Gobrecht variants, some of which were restruck as much as 40 years after these initial pieces were coined. To enhance their acceptability at the time of issue, these coins were struck as circulating proofs. However, the proof finish in the fields usually does not match our concept of proofs that were mass produced from the late 1850s onward. The fields on this piece are nicely reflective and obviously have a different texture than the devices. The striking details are complete in all areas, including Liberty's foot, hair, and the eagle's plumage—a common trait on coins from this first striking period. There are no obvious or mentionable contact marks on either side and both obverse and reverse show light golden toning with slightly deeper accents of color around the margins.
(#11225)

## Judd-60 Restrike 1836 Gobrecht Dollar XF Details, Die Alignment IV

1969 **1836 Name on Base, Judd-60 Restrike, Pollock-65, R.5—Improperly Cleaned—NCS. Proof XF Details.** Silver. Die Alignment IV (center of Liberty's head opposite the right side of F in OF). The diagnostic die scratch above the eagle's wing is not visible on this piece, but that is because the surfaces are worn to such an extent that it is no longer visible. Jim Gray's rule of thumb was the die scratch was only consistently visible on AU50 and better coins. This March 1837 striking is light gray overall with brilliantish accents over the high points of the devices. The surfaces show dullness from cleaning, but all in all this is actually a surprisingly pleasing Gobrecht dollar. The only mentionable flaws are several pinscratches between the eagle's wing and RIC. (#11227)

## Richly Toned 1836 Gobrecht Dollar, PR62 Die Alignment II, Judd-60 Restrike

1970 **1836 Name on Base, Judd-60 Restrike, Pollock-65, R.5, PR62 NGC.** Silver. Plain Edge. Die Alignment II (Center of Liberty's head opposite ES in STATES). Medallic alignment. The unintentional die scratch is evident on the reverse above the eagle's wing and points toward AT in STATES. This die scratch has been used for 20 or so years to help distinguish the striking periods on the coins in this confusing series. It is generally accepted that the scratch occurred in late 1836. Then, when the 1836-dated coins were struck in March 1837 they had both a medallic alignment and the faint die scratch.

The surfaces on this piece are reflective, as one would expect, and this helps brighten the deep blue, rose, and gray iridescent toning. The strike is sharp overall, and the only marks of any note are located in the reverse field close to the eagle's tail feathers. (#11227)

# PATTERNS

## Brilliant PR66 1838 Half Dollar, Judd-73 Restrike

1971 **1838 Half Dollar, Judd-73 Restrike, Pollock-77, R.5, PR66 NGC.** The obverse, once attributed to Chief Engraver William Kneass, is more likely the work of assistant Christian Gobrecht. It depicts a large draped bust of Liberty facing left. A level flying eagle faces left, dominating the reverse. A restrike that has five different die cracks on the reverse, in addition to tiny specks of die rust on both fields. Struck in silver with a reeded edge. A stone-white and deeply mirrored Premium Gem with a better strike than is usual for a 'midnight mint' restrike. Among the finest certified examples of this popular early silver pattern. Census: 3 in 66, 1 finer (12/08).

## Seldom-Seen 1838 Gobrecht Dollar, PR63
## Die Alignment III, Judd-84 Restrike

1972 **1838 Name Omitted, Judd-84 Restrike, Pollock-93, R.5, PR63 PCGS**. Silver. Reeded Edge. Die Alignment III (center of Liberty's head opposite the N in ONE). Judging from the number of survivors known today, it is believed that 250 to 300 restrikes were produced beginning in the late 1850s. The advancement of die cracks on the reverse led Mike Carboneau and James Gray to believe this die alignment was struck also in one or both of the terms of Henry Linderman as mint director. It is known that some 1838 dollars were restruck in the late 1850s because one coin exists overstruck on an 1859 Seated dollar.

The three dates of Gobrecht dollars all have Judd numbers, but only the 1838 is considered an actual pattern. And of those coins with that date, only the ones in Die Alignment IV and showing no reverse die cracks are considered to have been struck in 1839 (not 1838 as the coin states). Probably only 10 or so originals are believed to have been struck. Apparently the reverse die developed microscopic cracks when these pieces were restruck in the late 1850s. This coin shows the diagnostic, hairline-thin cracks at the bottom of LAR, and the tops of TE and MERI. These cracks are extremely faint and a high-quality loupe is required as well as a light. It is possible that these faint die cracks developed on dollars struck in 1839 (with the 1838 date), but such coins would still be in Die Alignment IV (center of Liberty's head opposite the right side of the F in OF).

The fields on this piece also confirm the later 1850s striking period. They are highly reflective and much deeper than the Gobrecht dollars that are known to have been struck in the 1830s. The use of a polished planchet and a polished die is obvious and gives this coin an undeniable "proofness" even though the striking details are not complete on some of the peripheral stars and Liberty's foot. Each side shows iridescent blue and rose toning and the brightness from the proof fields enlivens the color. Lightly hairlined, as one would expect, the only mark of note is a shallow, curved planchet crack (that at first looks like a scratch) between stars 11 and 12. A high quality example of this seldom-seen Gobrecht issue. Population: 14 in 63, 8 finer (11/08).(#11352)

# Rare, High Grade 1839 Gobrecht Dollar
# PR63, Judd-104 Restrike

1973 **1839 Name Omitted, Judd-104 Restrike, Pollock-116, R.3, PR63 PCGS.** Silver. Reeded Edge. Die Alignment IV (center of Liberty's head opposite the right side of the F in OF). The dollars of 1839 are neatly divided into two categories, restrikes and originals. They are also known in Die Alignment III and IV. All originals are in Die Alignment IV, and they show none of the microscopic die cracks on the reverse. Restrikes, believed to have been struck from 1857 to 1859, are also in Die Alignment IV but do show the tiny die cracks through the reverse lettering. A second set of restrike 1839 dollars are found in Die Alignment III (center of Liberty's head opposite the N in ONE). These pieces are believed to have been struck in the late 1860s, possibly later. This Die Alignment IV coin shows faint die cracking that connects the tops of MERI, but we see no evidence of a crack between TE and no trace of a die crack at the bottom of LAR. This, of course, indicates that this coin was one of the first restrikes produced in the late 1850s.

The condition of 1839 dollars varies widely according to when the coins were produced. Original coins struck in 1839 are rarely found above PR60. Die Alignment IV restrikes, such as this piece, are generally seen in PR60 or better condition. The Die Alignment III restrikes almost always found in high grades, i.e., PR63 or finer.

The surfaces on this piece are murky gray with a golden-blue undertone. Nevertheless, the brightness of the mirrored fields is abundantly evident on each side. The striking definition is strong in all areas, and there are no singularly mentionable or noticeable contact marks on the obverse or reverse. Population: 17 in 63, 9 finer (11/08).(#11446)

## PATTERNS

1974 **1850 One Cent, Judd-119 Original, Pollock-134, Low R.6, PR62 PCGS.** An annular piece with simple designs. The obverse has the denomination and date along with a pair of rosettes. The reverse has only the inscriptions USA and ONE TENTH SILVER, which are connected by bold die cracks. Struck in billon alloy (silver 10% and copper 90%) with a copper edge. A deeply toned piece that has a trace of verdigris within the lower reverse legend.(#11511)

### 1850 Three Cent Silver, Judd-125 Original, PR62

1975 **1850 Three Cent Silver, Judd-125 Original, Pollock-147, R.4, PR62 NGC.** The obverse has a Liberty cap with resplendent rays surrounding. LIBERTY is on the bottom part of the cap, and the date 1850 below. A palm branch encircles the entire reverse to form a wreath, enclosing the numeral III. UNITED STATES OF AMERICA rings the rim. Struck in silver with a plain edge.

The present example of this derivative pattern, which borrows a motif familiar to collectors of Mexican coins from the 1820s onward, has deep charcoal-gray surfaces that show some luster, although subdued, when the coin is turned toward a light.(#11536)

### Proof 1854 Cent, Judd-161 Original

1976 **1854 One Cent, Judd-161 Original, Pollock-187, R.4—Environmental Damage—NCS. Proof.** A mint attempt to replace the cumbersome large cent with a smaller diameter version with similar types. There are no obverse stars, and the wreath is smaller in scale relative to the legends. Struck in bronze with a plain edge. The glossy surfaces are golden-brown and gunmetal-gray. Well struck, but the cheek and nose show slender patches of corrosion, also faintly present on the lower obverse field.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#11663)

1977 **1854 One Cent, Judd-161 Original, Pollock-187, R.4, PR64 Brown PCGS.** Similar to the contemporary Mature Head large cent, but there are no stars, the reverse wreath is smaller, and the diameter is a few millimeters less. A beautiful chocolate-brown Choice proof. The strike is penetrating, and the surfaces are flawless save for a concealed thin mark over the NI in UNITED. Population: 40 in 64 Brown, 14 finer (11/08).(#11663)

### Extremely Rare Oroide 1854 Proof Pattern Cent Judd-162, Pollock-188

1978 **1854 One Cent, Judd-162, Pollock-188, R.8—Polished—NCS. Proof.** An attempted large cent replacement, in a smaller size, lacking obverse stars, and with a smaller wreath. Struck in oroide with a plain edge. By far the most elusive of the patterns sharing this design, with neither the bronze nor the copper variants being a rarity. Though the glossy amber-brass surfaces show the luster of polish rather than an original, natural sheen, the rarity of this variant is such that condition defers to simple availability. A polished-out rim nick is noted at 8 o'clock on the obverse.(#11671)

## Gem Proof 1854 Flying Eagle Cent
## Judd-164 Original, Ex: Beck Collection

1979 **1854 Flying Eagle Cent, Judd-164 Original, Pollock-189, R.5, PR65 Brown NGC.** The hook-necked flying eagle design surrounded by stars and the date below. The reverse closely resembles the regular dies issue for the large cent, although the wreath and letters are smaller, as is the diameter. Struck in bronze with a plain edge. An exquisite chocolate-brown Gem, attractively struck and nearly free from marks or spots.
*Ex: S.H. Chapman; John A. Beck Collection, Part III (Quality Sales, 2/1977), lot 483.*
*From The Martin L. Diffenbaucher, Jr. Collection.*(#11678)

## PR64 Brown Judd-168 Original
## 1855 Flying Eagle Cent

1980 **1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR64 Brown NGC.** The obverse shows a hook-neck eagle surrounded by thirteen stars with the date below. The reverse is similar in design to the large cent, but the wreath is smaller. Struck from clashed dies in bronze with a plain edge. Richly toned in forest-green and golden-brown. Unabraded and lustrous with a pleasing strike. Census: 8 in 64 Brown, 9 finer (11/08).
*From The Martin L. Diffenbaucher, Jr. Collection.*(#11720)

## Partially Red 1855 Flying Eagle Cent Pattern
## Judd-168 Original, PR63 Red and Brown

1981 **1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR63 Red and Brown PCGS.** The design shows a large eagle surrounded by 13 stars on the obverse, while on the reverse ONE CENT is surrounded by a thick laurel wreath which is, in turn, surrounded by UNITED STATES OF AMERICA. Struck in copper or bronze with a plain edge. Very scarce with any of the original red color remaining, this piece shows a significant amount around the outer margins with emerald-green surfaces otherwise and nice reflectivity in the fields. Identifiable by a large planchet flaw in the field above the N in ONE.(#11721)

## Rare 1855 Flying Eagle Cent Pattern
## Judd-173, PR63 Brown

1982 **1855 Flying Eagle Cent, Judd-173, Pollock-198, Low R.7, PR63 Brown PCGS.** A Flying Eagle pattern featuring a hooked-neck eagle on the obverse and ONE CENT in the center of the reverse surrounded by a small laurel wreath. The diameter is between that of the large and small cent. Struck in bronze with a plain edge. This golden-brown Select example has smooth fields and only a couple areas of strike incompleteness.(#11748)

## 1858 Flying Eagle Cent Pattern, Judd-192, PR64

1983 **1858 Flying Eagle Cent, Judd-192, Pollock-235, R.5, PR64 PCGS.** The obverse is the familiar Small Letters 1858 cent. The pattern reverse generally resembles the 1860 regular issue reverse, but there is no shield at the top and the wreath is closed. Struck in copper-nickel with a plain edge. This well struck, attractive hazy honey-gold specimen has a few flyspecks but is otherwise essentially undisturbed.(#11842)

## 1858 Judd-193 Flying Eagle Cent, PR62

1984 **1858 Flying Eagle Cent, Judd-193, Pollock-236, R.5, PR62 NGC.** Ex: Jules Reiver. The obverse is struck from the Small Letters 1858 Indian cent die, while the reverse shows an oak wreath with ornamental shield at top. Struck in copper-nickel with a plain edge. Some hazy luster remains under surfaces that show some dappled dark toning spots. From the noted Jules Reiver collection. (#11844)

## 1858 Flying Eagle Cent, Judd-202, Pollock-245, PR64

1985 **1858 Flying Eagle Cent, Judd-202, Pollock-245, R.5, PR64 PCGS.** Snow-PT19. The Small Eagle obverse with open claws and raised wings. The tall, thin obverse letters represent Paquet's style. The reverse is similar to the regular issue 1859 Indian cent. Struck in copper nickel with a plain edge. This nicely mirrored light golden-brown near-Gem is intricately struck and has a few pinpoint carbon flecks.(#11867)

## Judd-204 1858 Flying Eagle Cent, PR62

1986 **1858 Flying Eagle Cent, Judd-204, Pollock-248, R.5, PR62 PCGS.** Paquet's small flying eagle motif is paired with an ornamental shield and oak wreath reverse. Struck in copper-nickel with a plain edge. This is a sharply struck light-tan proof with excellent eye appeal. Faint hairlines are the only grade-limiting factor, and there is considerably more eye appeal present here than the grade might imply.(#11871)

## Choice Proof Judd-204 1858 Flying Eagle Cent Pattern

1987 **1858 Flying Eagle Cent, Judd-204, Pollock-248, R.5, PR64 NGC.** Snow-PT17a. Paquet's small flying eagle motif is paired with an ornamental shield and oak wreath reverse. Struck in copper-nickel with a plain edge. The flashy straw-gold surfaces are smooth aside from a pinpoint speck above the N in CENT. Precisely struck and highly attractive.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#11871)

## Important Choice Proof Brown Copper 1858 Paquet Flying Eagle Cent, Judd-205

1988 **1858 Flying Eagle Cent, Judd-205, Pollock-249, R.8, PR64 Brown PCGS.** Snow-PT17b. This interesting design pairs Paquet's small eagle obverse with a reverse similar to the issued 1860 Indian cent. The shield, however, is broad and has fancy scrollwork. These dies are fairly common in copper-nickel (Judd-204), but the present extremely rare pattern is struck in copper with a plain edge. It is deeply toned in navy-blue and olive-green with hints of ruby-red on the upper reverse. Razor-sharp, and would presumably grade higher by today's standards. Housed in an old doily label holder. PCGS has certified just four examples, with the current lot tied with one other as finest graded (11/08). NGC has yet to encapsulate any.
*Ex: Champa Collection (Stack's, 8/71).*(#11873)

## Paquet-Design 1858 Flying Eagle Cent
## Judd-206, PR64

1989 **1858 Flying Eagle Cent, Judd-206, Pollock-242, R.5, PR64 PCGS.** Snow-PT16. Die Pair 2 with the Type Two over Type Three reverse (open E in ONE rehubbed with the near-closed E). Paquet's Small Eagle obverse is paired with the regular issue Low Leaves reverse. Struck in copper-nickel with a plain edge. A nicely mirrored walnut-brown specimen, identified by a few russet specks near the end of the tail feathers. Population: 18 in 64, 2 finer (12/08). (#11877)

## Select Mint State Judd-208
## Transitional 1858 Indian Cent

1990 **1858 Indian Cent, Judd-208, Pollock-259, R.1, MS63 PCGS.** Snow-PT28. The well-known transitional pattern for the issued 1859 Indian cent. The centered date variant with five leaf clusters on the wreath. Struck in copper-nickel with a plain edge. Housed in an old green label holder. Precisely struck and mildly glossy with golden-tan toning and scattered minuscule carbon. Population: 15 in 63, 15 finer (11/08).
*From The Martin L. Diffenbaucher, Jr. Collection.*(#11884)

## Transitional Choice Proof
## 1858 Indian Cent, Judd-208

1991 **1858 Indian Cent, Judd-208, Pollock-259, R.1, PR64 PCGS.** Snow-PT28. A transitional pattern, similar to the No Shield Indian Cent introduced into circulation in 1859. The Pollock/Snow subvariety with a centered date and a five leaf clusters in the wreath. Struck in copper-nickel with a plain edge. Population: 35 in 64, 16 finer (11/08).(#11885)

## Exceptional PR66 Cameo
## Judd-208 1858 Indian Cent

1992 **1858 Indian Cent, Judd-208, Pollock-259, R.1, PR66 Cameo NGC.** Snow-PT28. The popular Transitional variety with the designs of the issued 1859 cent, but dated 1858. The die variety with five leaf clusters in the wreath and a centered date. Struck in copper-nickel with a plain edge. A high grade specimen that possesses a needle-sharp strike and exquisite preservation. The mirrored straw-gold fields contrast with delicately frosted devices.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#11885)

## Extremely Rare Judd-210 1858 Indian Cent Pattern PR64 Red and Brown

1993 **1858 Indian Cent, Judd-210, Pollock-260, R.8, PR64 Red and Brown NGC.** The design closely resembles the 1859 Indian cent struck for circulation. The obverse has a broad bust point, and the reverse has five-leaf clusters within the wreath, both unlike the issued 1859 cent. Struck in bronze with a plain edge. Unlisted in Rick Snow's 1856-1858 attribution guide, which pairs the broad bust point obverse only with a six-leaf cluster reverse.

Listed as Unique in bronze alloy in the ninth edition of Judd, although PCGS has certified another, which appeared as lot 132 in Bowers and Merena's May 1996 auction of the Louis E. Eliasberg, Sr. Collection. It was later offered by Heritage in our 1997 New York ANA Signature as lot 7245, and reappeared in a May 2006 Superior auction as lot 896. That second example can be identified by a spot on the field near the RI in AMERICA.

The present example has generous glimpses of orange-red, particularly within the legends. The devices and open fields are toned brown. Well struck and virtually mark-free with a small spot near the C in AMERICA. An outstanding opportunity for the pattern Indian cent specialist.

*Ex: Anderson DuPont Part II (Stack's, 11/1954), lot 1224; Stack's, (8/1971), lot 295.*

*From The Martin L. Diffenbaucher, Jr. Collection.*(#11891)

## Flashy PR66 1858 Indian Cent, Judd-211

1994 **1858 Indian Cent, Judd-211, Pollock-262, R.4, PR66 NGC.** Snow-PT26 with a broad bust point and centered date. Similar to the issued 1859 Indian cent, but the wreath differs, and more closely resembles that of the issued 1860 cent. Struck in copper-nickel with a plain edge. A flashy and unabraded Premium Gem with light honey-gold color and minimal carbon. Census: 1 in 66, 1 finer (11/08).

*From The Martin L. Diffenbaucher, Jr. Collection.*(#11893)

## 1858 Indian Cent, Judd-212, Pollock-256, PR62

1995 **1858 Indian Cent, Judd-212, Pollock-256, R.4, PR62 PCGS.** Snow-PT25. Centered Date, Broad Bust Point. The obverse die is that used to coin regular-issue Indian cents from 1860 through part of 1864, although the Centered Date, Broad Bust Point pieces are much more common than the R.7 Low Date, Narrow Bust Point pieces (Snow-PT32, Pollock-263). The reverse is the Oak Wreath, Ornamented Shield design. Struck in copper-nickel with a plain edge. This piece, certified in a green-label holder, has pretty tan surfaces with a bit of carbon on the reverse.(#11895)

## Conditionally Rare 1858 Indian Cent Pattern Judd-212, Pollock-263, PR66

1996 **1858 Indian Cent, Judd-212, Pollock-263, R.4, PR66 NGC.** The centered date variant with a rounded bust tip. Similar to the later regular issue Indian cent but with a broad, ornamented shield at the top of the reverse, and broad rims. Struck in copper-nickel with a plain edge. With no hairlines, contact marks, or noticeable carbon flecks, this modestly reflective example has great eye appeal. Both sides are tan-gold in color, with a few striations in the fields. Census: 2 in 66, 1 finer (11/08).

*From The Martin L. Diffenbaucher, Jr. Collection.*(#11895)

## Choice Judd-227 1859 Indian Cent
## Possibly From the Famous Farouk Collection

1997 **1859 Indian Cent, Judd-227, Pollock-271, Low R.6, MS64 NGC.** Snow-PT3. The designs are reminiscent of the issued 1860 Indian cent, but the reverse shield is broad and ornamented. Struck in copper-nickel with a reeded edge, and many times rarer than the transitional Judd-228. This is a beautiful sun-gold near-Gem. The obverse has cartwheel luster, while the reverse is prooflike. Intricately struck and mark-free with occasional pinpoint carbon.

Accompanied by an old-type typed collector envelope, and an Abe Kosoff signed cardboard tag that attests 'this coin' is from the Palace Collection of King Farouk of Egypt. The tag refers to AW-313, the pre-Judd Adams-Woodin designation for the pattern variety. Presumably once part of lot 1770, sold on March 3, 1954 in the Cairo, Egypt Sotheby auction.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#11930)

1998 **1859 Indian Cent, Judd-228, Pollock-272, R.1, MS64 PCGS.** A transitional pattern with the obverse of 1859 paired with the reverse of 1860. Struck in copper-nickel with a plain edge. The surfaces are highly lustrous with rich copper-gold toning, and a small splash of milky, pale lilac-blue patina just above the top of Liberty's head. Blemish-free on both sides.(#11932)

## Gem Judd-228 Transitional 1859 Indian Cent

1999 **1859 Indian Cent, Judd-228, Pollock-272, R.1, MS65 NGC.** Snow-PT4. The transitional Pointed Bust Type of 1860. The reverse displays the oak wreath and shield design first struck for circulation on 1860 cents, instead of the simpler laurel wreath reverse used on business strike 1859 cents. Struck in copper-nickel with a plain edge. A tan-gold Gem with vibrant cartwheel sheen, minimal carbon, and only a hint of inexactness of strike on the top of the shield.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#11934)

## Rare Copper 1859 Indian Cent, Judd-230
## Uncirculated Details

2000 **1859 Indian Cent, Judd-230, Pollock-274, High R.7—Plated—NCS. Unc. Details.** Regular die trials issue of the 1859 Indian cent, struck in copper or bronze with a plain edge. This satiny example has a needle-sharp strike and deep brown toning. Rotation beneath a light reveals olive and rose overtones. The plating is deceptive, even to the experienced collector.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#11944)

## Exceptional 1859 Paquet Half, Judd-235, PR65

2001 **1859 Half Dollar, Judd-235, Pollock-282, 284, R.5, PR65 PCGS.** Anthony Paquet's design for the Seated Liberty series, here in the half dollar format. Liberty is seated left. Her left hand rests on an upright shield, and her right arm extends to support a fasces. The reverse features an eagle with outstretched wings, a scroll inscribed E PLURIBUS UNUM in its beak, and the usual statutory legends above and below. Struck in silver with a reeded edge. This is a lovely piece whose reflective fields enhance the rainbow iridescence seen on each side, color that radiates from the center in concentric circles of color.(#11960)

2002 **1859 Half Dollar, Judd-239, Pollock-295, R.4, PR60 ANACS.** Longacre's "French Head" design for the half dollar that features a bust of Liberty facing right, draped with a ribbon inscribed LIBERTY with a wide wreath of oak and vine on her head. The reverse has 1/2 DOLLAR in the center and is surrounded by a wreath of cotton, tobacco, corn, sugar cane, wheat, and oak. Struck in silver with a reeded edge. Remnants of the original proof surface can still be seen beneath the deep gray toning of this piece. The surfaces are noticeably hairlined, accounting for the grade.(#11972)

## 1859 'French Head of Liberty' Half in Silver Judd-239, PR60

2003 **1859 Half Dollar, Judd-239, Pollock-295, R.4, PR60 PCGS.** One of several half dollar patterns from this year that feature the 'French Head of Liberty,' credited to Longacre. The reverse depicts the denomination as 1/2 DOLLAR, instead of HALF DOLLAR (Judd-237 and Judd-245), 50 CENTS (Judd-241), or HALF DOL. (Judd-243). Struck in silver with a reeded edge. The subdued surfaces are noticeably hairlined.(#11972)

## Interesting PR58 1859 Judd-240 Pattern Half

2004 **1859 Half Dollar, Judd-240, Pollock-296, R.5, PR58 PCGS.** The so-called "French Head" design, paired with a larger scale version of the dime "cereal wreath" reverse. Tall letters in UNITED STATES OF AMERICA are consistent with Paquet's style, although the portrait is attributed to Longacre. Struck in copper with a reeded edge. An interesting pattern that shows a trace of wear across generally chocolate-brown surfaces. Occasional splashes of deeper color add interest to the pattern.(#11974)

2005 **1859 Half Dollar, Judd-242, Pollock-298, R.5, PR62 Brown PCGS.** The Longacre design for the half dollar that features a bust of Liberty facing right, draped with a ribbon inscribed LIBERTY with a wide wreath of oak and vine on her head. The reverse has the denomination 50 CENTS within a wreath of cotton, tobacco, sugar cane, corn, wheat, and oak. Struck in copper with a reeded edge. A sharply struck and nicely preserved example. A subtle mixture of olive, gray, and gold-tan coloration is quite appealing. (#11980)

## 1862 Judd-295 Half Dollar, PR64

2006 **1862 Half Dollar, Judd-295, Pollock-353, R.5, PR64 PCGS.** The obverse is the regular-issue Seated Liberty half dollar, while the reverse, left over from 1861 pattern strikes, has a scroll-less GOD OUR TRUST in the field above the eagle's head. Struck in silver with a reeded edge. This sparkling near-Gem has stunning, scattered cobalt-blue, deep purple, and pinkish-gold patina over lustrous, appealing surfaces. Census: 5 in 64, 1 finer (12/08).(#60445)

## 1863 One Cent Pattern, Judd-299, Pollock-359, PR65 Brown Cameo

2007 **1863 One Cent, Judd-299, Pollock-359, R.3, PR65 Brown Cameo NGC.** An experimental piece struck from the regular dies but without the L on the ribbon. Struck in bronze with a plain edge. Medallic alignment of the dies. This pattern represents the Mint's first experiment with bronze coinage. For some reason, these patterns are seldom found with full red color. This piece has shallow-mirrored fields with deep saddle-brown toning in the fields and pale sky-blue patina over the raised devices. A well preserved and attractive Gem proof example of this Civil War era pattern. *From The Martin L. Diffenbaucher, Jr. Collection.*(#60454)

## Popular Judd-299 1863 Bronze Transitional Cent Medal Alignment, PR64 Red and Brown

2008 **1863 One Cent, Judd-299, Pollock-359, R.3, PR64 Red and Brown NGC.** Snow-PT1. Medal alignment. From regular issue dies, but struck in bronze with a plain edge. A transitional pattern for the 1864 bronze No L regular issue. Lime and rose hues visit the slightly mellowed tan-gold surfaces. Well struck and unabraded with a faint fingerprint fragment at 1 o'clock. Census: 6 in 64 Red and Brown, 10 finer (11/08).(#70454)

## Extremely Rare Copper-Nickel Judd-302 1863 With L Indian Cent PR64

2009 **1863 One Cent, Judd-302, Pollock-365, High R.7, PR64 PCGS.** 69.3 gn. Identical in design to the With L 1864 bronze cent, but instead dated 1863. Struck in copper-nickel with a plain edge. The breakdown of elements is listed on the PCGS insert as 87.4% copper, 12% nickel, and 0.6% aluminum. Exactingly struck and devoid of marks with luminous luster and a whisper of carbon. Peach and lime toning only increases the eye appeal.(#60457)

## PR65 Red and Brown Judd-312 1863 Two Cent Pattern

2010 **1863 Two Cents, Judd-312, Pollock-377, R.4, PR65 Red and Brown PCGS.** Both the obverse and the reverse are similar to those adopted for the business strike two cent piece in 1864, except that the motto reads GOD OUR TRUST and the word CENTS is curved on the reverse. Struck in bronze or copper with a plain edge. Moderately reflective, the rich, cherry-red surfaces show ever-so-slight mellowing of color on each side and the only mentionable flaw is a subtle spot above the left fletchings.
*Ex: FUN Signature (Heritage, 1/2004), lot 8412.*(#70467)

## Beautiful PR65 Red and Brown Judd-319 Restrike 1863 Three Cent

2011 **1863 Three Cents, Judd-319 Restrike, Pollock-384, R.5, PR65 Red and Brown PCGS. CAC.** The obverse is similar to the Braided Hair large cent design that was discontinued seven years earlier, only with much smaller digits in the date. The reverse has a design similar to the issued 1864 two cent piece, but the wreath is smaller and the legend UNITED STATES OF AMERICA is larger. Struck in bronze with a plain edge. A meticulously struck Gem with beautiful rose-red, orange, and sea-green toning. Perfect aside from the occasional obverse carbon fleck. Encapsulated in a first generation holder. (#70476)

## 1863 Judd-338 Half Dollar, PR64 Cameo

2012 **1863 Half Dollar, Judd-338, Pollock-410, R.5, PR64 Cameo PCGS.** The obverse is the regular Seated Liberty die for 1863; the reverse is like the regular issue, with the addition of GOD OUR TRUST on a scroll above the eagle's head. Struck in silver with a reeded edge. The lustrous surfaces are silver and highly reflective, with good mirrors and just a touch of powder-gray in near the rims. A sharply struck, pleasing near-Gem of this somewhat available variety.(#60500)

## Interesting 1864 With Motto Pattern Dollar Judd-397, PR64 Brown

2013 **1864 Dollar, Judd-397, Pollock-465, Low R.7, PR64 Brown PCGS.** The obverse is the regular Seated Liberty design for 1864. The reverse is the With Motto Seated Liberty design introduced in 1866. Struck in copper with a reeded edge. Rich blue-green overtones are dominant, while the underlying olive-brown peeks through largely at the margins. Detail is crisp, and aside from a few stray hairlines, the preservation is excellent. A delicacy dating from approximately 1869 to sometime in the early 1870s, according to USPatterns.com, which was " ... offered with restrikes of the other denominations in complete sets."(#60568)

## 1865 Indian Cent Struck in Nickel MS63, Judd-406, Snow-PT2

2014 **1865 One Cent Judd-406, Pollock-475, Low R.6, MS63 NGC.** Fancy 5. Snow-PT2. This dies trial piece is struck in nickel or nickel-silver with a plain edge. The satiny cream-gray surfaces appear unabraded. A good strike overall, with slight softness noted on the upper headdress tips and the wreath ribbon. Census: 1 in 63, 5 finer (11/08).
*From The Martin L. Diffenbaucher, Jr. Collection.*(#70583)

## Blazing Red PR65 Ultra Cameo 1865 With Motto Quarter Judd-426, Ex: Garrett

2015 **1865 Quarter Dollar, Judd-426, Pollock-498, R.6, PR65 Red Ultra Cameo NGC.** Garrett. 93.4 grains. From the regular obverse die of 1865, and paired with the reverse die from 1866 with the motto IN GOD WE TRUST added to a scroll above the eagle's head. Struck in copper with a reeded edge. According to USPatterns.com: "These and the other 'with motto' patterns of this date and also 1863 and are actually restrikes made circa 1869 and into the early 1870s and offered with restrikes of other denominations in complete sets." This is an absolutely amazing piece. The surfaces are completely red throughout and unmellowed by even a trace of browning. The fields are exceptionally deep in mirrored reflectivity and set up strong contrast against the thickly frosted devices. Heavily striated in the reverse fields.
*Ex: Garrett II (Bowers and Ruddy, 3/1980), lot 1029.*(#80611)

## Collectible 1865 With Motto Half, PR63 Brown Judd-430

2016 **1865 Half Dollar, Judd-430, Pollock-503, High R.6, PR63 Brown PCGS.** Regular 1865 die trials issue. Struck in copper with a reeded edge. These and the other die trails issues stuck in other metals, such as copper and aluminum, are actually restrikes struck several years later, probably in the 1869 to early 1870s timeframe. This is richly toned example that has deep olive green and rose toning scattered over each side.(#60615)

# Outstanding 1865 With Motto Seated Dollar
# Judd-434, PR65 NGC

2017 **1865 Dollar, Judd-434, Pollock-507, Low R.7, PR65 NGC.** The obverse die features the standard Seated Liberty motif used in regular-issue coinage in 1865. The reverse die consists of the familiar perched eagle design also used on circulation strikes and proofs of 1865, with the addition of a scroll above the eagle's head with the motto IN GOD WE TRUST. Struck in silver with a reeded edge.

The With Motto reverse die is the same physical die that appears on regular issue Seated dollars struck from 1866 to 1870. A prominent die line begins beneath the right serif of the N of IN, and passes through the G and O of GOD to the lower ribbon border beneath the D.

With the first regular use of the reverse die in 1866, a careful comparison of such regular issue proof dollars to the reverse of this piece may finally determine the answer to the question about the status of these patterns as originals struck in 1865, or restrikes struck at a later date. The question has been debated frequently in numismatic circles, with no conclusive answer. If it could be determined that the reverse of this pattern is an earlier die state than the 1866 proof dollars, then it would be proven that these patterns were struck before the proofs in 1866.

This gorgeous proof has faint lilac and gold toning over the deeply mirrored fields and frosty devices. It is not designated as a Cameo proof, although another examination by the grading service may change their opinion. Both sides have excellent design details and pristine surfaces. Census: 1 in 65, 0 finer (12/08).(#60619)

## Choice Proof Brown Judd-491 Copper 1866 Shield Nickel

2018 **1866 Shield Five Cents, Judd-491, Pollock-578, Low R.7, PR64 Brown PCGS.** Five-cent pattern with an obverse similar to the adopted Shield nickel design, but the reverse features a "Dutch" numeral 5 inside a laurel wreath. The date is divided in two by the ball of the date. Struck in copper or bronze with a plain edge. A well struck piece with deep lavender-brown patina. Devoid of contact, although a few specks of powdery verdigris are mentioned for accuracy. Certified in a green label holder.
*Ex: Pittsburgh Signature (Heritage, 8/2004), lot 7921; FUN Signature (Heritage, 1/2007), lot 1326.*(#60687)

## Richly Toned PR64 Red and Brown 1866 Shield Nickel in Copper, Judd-508

2019 **1866 Shield Five Cents, Judd-508, Pollock-592, High R.6, PR64 Red and Brown PCGS.** Similar to the issued 1866 Shield nickel, but the reverse lacks rays, a change made to the circulating design the next year. Struck in copper with a plain edge. The golden-brown surfaces display ruby-red, forest-green, and orange hues once rotated beneath a light. Exactingly struck and minimally abraded. Encapsulated in an old green label holder.(#70704)

## 1867 Longacre Five Cent Pattern, Judd-561, PR63

2020 **1867 Five Cents, Judd-561, Pollock-622, R.5, PR63 PCGS.** The central obverse device is a head of Liberty facing left, wearing a headdress of four large feathers and a ribbon inscribed UNION AND LIBERTY. Four large stars are in the hair in front of the ribbon. LONGACRE F. is at the truncation of the neck, with UNITED STATES OF AMERICA around and the date in exergue. The reverse features a Roman numeral V over an ornate shield, with IN GOD WE TRUST at the top. Struck in aluminum with a plain edge. The fields are lustrous, with a few flecks of powder-gray, good contrast, and minimal planchet problems.(#60771)

## Elusive 1867 Regular Dies Eagle, Judd-602, Copper, AU Details

2021 **1867 Ten Dollar, Judd-602, Pollock-667, High R.7—Scratched, Cleaned—ANACS. AU Details, Net PR30.** Regular die trails striking of the 1867 Liberty eagle. Struck in copper with a reeded edge. This piece was apparently passed off as a gold piece. It circulated briefly, acquired a few small marks, then was pinscratched on the obverse field to determine its metal content. It has unnatural olive and rose colors. An opportunity to acquire a rarely encountered pattern at an affordable price.(#60814)

## Brilliant PR66 1868 Cent, Judd-608

2022 **1868 One Cent, Judd-608, Pollock-673, R.4, PR66 NGC.** The design closely resembles the contemporary three cent nickel, but only a single pillar represents the denomination within the wreath, and the ribbon ends are more prominent. Struck in nickel with a plain edge. Pollock Variety 2 with the date centered over a denticle. A sharply struck and essentially brilliant Premium Gem with flashy fields and an undisturbed appearance.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#60820)

## Difficult PR63 Brown Judd-619 1868 Three Cent Nickel Pattern

2023 **1868 Three Cent Nickel, Judd-619, Pollock-688, Low R.7, PR63 Brown PCGS.** Much like the regular issue three cent nickel, but the wreath is further from the reverse rim, and the Roman numerals on the reverse are smooth and without ribs. Struck in copper with a plain edge. A well struck deep chocolate-brown specimen with pleasing surfaces. A rare variety, the last auction appearance listed in the Ninth Edition of Judd is from 1998.(#60835)

## Bright, Contrasted 1869 Standard Silver Dime Judd-697, PR63 Cameo

2024 **1869 Standard Silver Ten Cents, Judd-697, Pollock-776, High R.6, PR63 Cameo PCGS.** Standard Silver design, the head of Liberty is crowned with three large stars and the motto is placed beneath the bust. The reverse has 10 CENTS in the center, surrounded by a thick wreath of oak and laurel, at the upper periphery is STANDARD SILVER with the date below. Struck in silver with a plain edge. Nearly brilliant on each side with just a trace of peripheral color.(#60922)

## Gem Proof 1869 Standard Silver Ten Cent Judd-709, Ex: Harry Bass, Jr.

2025 **1869 Standard Silver Ten Cents, Judd-709, Pollock-788, High R.6, PR65 PCGS. CAC.** Ex: HW Bass, Jr. Collection. This Standard Silver design variety has only one star at the front of Liberty's head on the obverse. The reverse has 10 CENTS in the center, crowded by a wreath of oak and laurel, with STANDARD SILVER 1869 around the margin. Struck in silver with a plain edge, although the untoned surfaces and cameo contrast are reminiscent of an aluminum alloy. Flashy, nicely struck, and problem-free with excellent eye appeal.
*Ex: Waldorf Sale (Stack's, 4/1959), lot 1059; ANA Sale (Stack's, 8/1971), lot 396; Harry W. Bass, Jr. Collection, Part I (Bowers and Merena, 5/1999), lot 1091.*
*From The James Mossman Collection.*(#60934)

## Choice Proof Judd-721 1869 Standard Silver Quarter

2026 **1869 Standard Silver Quarter Dollar, Judd-721, Pollock-802, R.5, PR64 PCGS.** The obverse features a bust right of Liberty wearing a cap ornamented with three stars. A scroll bearing IN GOD WE TRUST is below. The reverse depicts 25 CENTS centered in a small wreath of oak and laurel leaves with STANDARD SILVER above and the date 1869 below. Struck in silver with a reeded edge. This well struck and satiny near-Gem has peripheral chestnut toning. A beautifully preserved specimen, distinguished by a shallow mint-made strike-through between the wreath ends. Population: 12 in 64, 0 finer (11/08).(#60948)

## 1869 Standard Silver Quarter Judd-727, PR64 Cameo

2027 **1869 Standard Silver Quarter Dollar, Judd-727, Pollock-808, R.5, PR64 Cameo PCGS.** Liberty's hair is bound, and she wears a diadem. The obverse exergue displays IN GOD WE TRUST within a scroll. A small oak and laurel wreath crowds the centrally placed 25 CENTS. STANDARD SILVER and the date complete the reverse legends. Struck in silver with a reeded edge. Almost brilliant in the centers with gradually deepening golden and blue toning around the margins. A lovely example of this popular Standard Silver pattern.(#60954)

## Exceptional 1869 Standard Silver Half Judd-742, PR66

2028 **1869 Standard Silver Half Dollar, Judd-742, Pollock-823, R.5, PR66 NGC.** A bust of Liberty faces right on the obverse with UNITED STATES OF AMERICA around and IN GOD WE TRUST is on a scroll below. Liberty wears a cap ornamented with two stars. The reverse depicts 50 CENTS within an oak and laurel wreath, STANDARD SILVER is above and 1869 is below. Struck in silver with a reeded edge. The centers are nearly brilliant, while the obverse margin is orange and apple-green and the reverse border is ocean-blue. The eye appeal is exceptional.(#60969)

## PR66 Brown Judd-745
## 1869 Standard Silver Half

2029 **1869 Standard Silver Half Dollar, Judd-745, Pollock-826, Low R.7, PR66 Brown NGC.** Liberty faces right, and wears a cap ornamented by two stars. The reverse features a wreath of oak and laurel leaves, with 50 CENTS tightly fit within the wreath and the date depicted below. The borders exhibit the usual legends for the Standard Silver series. Repunching is noted on the initial B, the L in LIBERTY, and the lower left reverse star. Struck in copper with a plain edge. Splendidly toned in sea-green and autumn-gold with blushes of navy-blue and cherry-red along the obverse margin. Satiny and beautiful.
*From The James Mossman Collection.*(#60973)

## 1869 Standard Silver Half in Copper
## Judd-745, PR64 Red and Brown

2030 **1869 Standard Silver Half Dollar, Judd-745, Pollock-826, R.7, PR64 Red and Brown PCGS.** Liberty faces right, and wears a cap ornamented by two stars. A scroll beneath the bust bears the inscription IN GOD WE TRUST. The reverse features a wreath of oak and laurel leaves, with 50 CENTS tightly fit within the wreath. The date is on the reverse, unusual for an issued large denomination silver coin but usual for the Standard Silver series. Struck in copper with a plain edge. Fire-red dominates the borders, while the fields are aquamarine and the portrait is brown. The front of the holder is scuffy, but the coin itself is well preserved. In a first generation holder.(#70973)

## PR63 1869 Standard Silver Half, Judd-748

2031 **1869 Standard Silver Half Dollar, Judd-748, Pollock-831, R.5, PR63 PCGS.** Standard Silver design with a bust of Liberty facing right on the obverse. Liberty is wearing a diadem inscribed LIBERTY, the legend is around the border, and the motto IN GOD WE TRUST is on a scroll at the bottom. The reverse exhibits the denomination 50 CENTS within a wreath of oak and laurel. STANDARD SILVER is at the periphery, the date 1869 is below the wreath. The left star is repunched. Struck in silver with a reeded edge. Deeply toned overall, steel-gray-blue color deepens to russet-brown at the borders. The reflectiveness is somewhat subdued by the depth of the patina. Certified in a green label holder. Population: 14 in 63, 16 finer (11/08).
*Ex: Long Beach Signature (Heritage, 2/2005), lot 9849.* (#60977)

## Deeply Reflective 1869 Standard Silver Half
## Judd-754, PR62

2032 **1869 Standard Silver Half Dollar, Judd-754, Pollock-838, R.5, PR62 PCGS.** Liberty wearing a headband inscribed LIBERTY and ornamented with a star faces right, the legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse has 50 CENTS centered in a wreath of oak and laurel with STANDARD SILVER above and the date 1869 below. Struck in silver with a reeded edge. Deeply mirrored and mostly brilliant with traces of color around the devices. (#60984)

## Finest PCGS Certified Judd-798 PR66 Red 1870 Three Cent Silver

2033 **1870 Three Cent Silver, Judd-798, Pollock-885, R.7, PR66 Red PCGS.** The obverse design, attributed to William Barber, features a seated figure of Liberty facing left and supporting a shield in her right hand, an olive branch in her left. A free-standing liberty pole is present behind the shield. The reverse is from a regular three cent silver die. Struck in copper with a plain edge. A gorgeous orange-red Premium Gem that has an exemplary strike and virtually flawless preservation. Encapsulated in an old green label holder. Population: 1 in 66 Red, 0 finer (11/08).(#81041)

## 1870 Pattern Quarter, Judd-883, PR63

2034 **1870 Quarter Dollar, Judd-883, Pollock-981, Low R.7, PR63 PCGS. CAC.** The obverse depicts a seated figure of Liberty facing left, with 13 stars around and the date below. The reverse is the regular Seated Liberty quarter. Struck in silver with a plain edge. This piece has lots of flash and luster over the champagne-pink surfaces, and only a few insignificant hairlines and reverse planchet roughness apparently limit a finer grade.(#61127)

## Lightly Toned PR63 Judd-888 1870 Standard Silver Quarter

2035 **1870 Standard Silver Quarter Dollar, Judd-888, Pollock-987, R.5, PR63 PCGS.** A bust of Liberty faces right and wears a cap ornamented with three stars. The legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse reads 25 CENTS 1870 in the center, and is surrounded by a wreath of cotton and corn. Struck in silver with a reeded edge. A lightly toned specimen with moderate field reflectivity and full detail on the major devices. Population: 9 in 63, 9 finer (11/08).(#61132)

## Rare 1870 Standard Silver Half in Copper Judd-941, PR65 Brown

2036 **1870 Standard Silver Half Dollar, Judd-941, Pollock-1054, 1068, Low R.7, PR65 Brown PCGS. CAC.** The obverse depicts a bust of Liberty wearing a cap ornamented with two stars and a ribbon across her shoulder that spells out LIBERTY in incuse letters. There are three varieties of this pattern, this one has LIBERTY incuse and the tip of Liberty's cap under the E in STATES. Struck in copper with a reeded edge. One of only two or three pieces known. Beautiful iridescent color is seen over each side of this deeply reflective Gem.
*From The James Mossman Collection.*(#61187)

## Beautiful 1870 Dollar Pattern Judd-1003, PR65

2037 **1870 Dollar, Judd-1003, Pollock-1135, Low R.7, PR65 NGC.** William Barber's design features a seated Liberty facing left, supporting a shield with her right hand and holding an olive branch in her left hand. A scroll inscribed LIBERTY crosses the shield and a pole stands freely behind, supporting a Liberty cap. The date is below and 13 stars are around. The reverse is the type of the regular With Motto Seated dollars. Struck in silver with a plain edge. One of perhaps a dozen pieces known of this spectacular design. The fields are deeply mirrored and each side has a light, even layer of golden toning. Fully struck.(#61250)

## Splendid 1870 Indian Princess Dollar, PR64 Brown, Judd-1011, Pollock-1144

2038 **1870 Standard Silver Dollar, Judd-1011, Pollock-1144, Low R.7, PR64 Brown PCGS.** James B. Longacre's Indian Princess design features Liberty seated beside a globe, wearing an Indian headdress. The word LIBERTY is inscribed across the center of the globe and Liberty is holding a pole topped with Phrygian cap. The reverse features the word STANDARD at the top with 1 DOLLAR encompassed by a wreath of cotton and corn. This design was apparently based on a sketch Longacre made prior to 1852, but it was not until 1870 that he made use of it and adapted it on a number of different pattern coins. Struck in copper with a plain edge.

The satiny proof surfaces show excellent field reflectivity with glossy devices. Both sides are a lovely mahogany color with traces of very faded mint red. This lovely piece has excellent eye appeal. Population: 1 in 64 Brown, 1 finer (12/08).
*Ex: Republic Coins, 2/72.*(#61259)

## Beautifully Toned PR63 Judd-1015 1870 Indian Princess Silver Dollar

2039 **1870 Dollar, Judd-1015, Pollock-1149, Low R.7, PR63 NGC.** Ex: Share Collection. The Indian Princess obverse shows Liberty seated, with her left hand resting on a globe and right hand holding a Liberty pole with cap on top. There are two conjoined flags behind her, one ornamented with twenty two stars. The reverse is the regular issue Seated Dollar design. Struck in silver with a plain edge. Beautifully toned in golden-brown and pearl-gray. Boldly struck and visually impressive despite a few trivial field hairlines. Per USpatterns.com, the Share Collection of pattern Liberty Seated dollars was referred to as a "renowned Florida collection" within the Pollock reference.
*Ex: Share Collection (American Numismatic Rarities, 9/2003), lot 68, which realized* $8,050.(#61263)

# Spectacular 1872 Amazonian Quarter Pattern
# Judd-1195, PR64

2040 **1872 Quarter Dollar, Judd-1195, Pollock-1335, Low R.7, PR64 PCGS.** William Barber's Amazonian design with Liberty seated, facing left, her right hand touching the head of a spread-wing eagle, sword in left hand. Thirteen stars are on the upper portion of that side with the date below. The reverse has a reversed variant of the eagle seen on the obverse, denomination below and UNITED STATES OF AMERICA around much of the perimeter on that side. Struck in silver with a reeded edge. According to USPatterns.com: "The Amazonian name dates to the 1890 New York Coin and Stamp auction of the Lorin G. Parmelee collection and was probably given by David Proskey."

The Amazonian design is one of the most popular and widely collected of all patterns. It is also certainly the epitome of William Barber's talents as an engraver. This design was issued in three-coin sets of quarter, half dollar, and silver dollar. In addition to silver, it was also struck in copper and aluminum. The surfaces are bright and reflective with an overlay of medium blue toning that lightens to pale yellow around the margins. There are at least seven separate specimens known of this pattern, plus two or three in complete silver sets. Two examples have an unclear pedigree and may represent that many additional examples on the roster of known specimens. This piece is listed as the # 5 coin. It is identifiable as the Heritage 2/84/Heifetz coin by the distinctive toning pattern and the presence of a light toning streak down from star 13.

*Ex: 1984 Mid-Winter Auction (Heritage, 2/1984), lot 579; Jascha Heifetz Collection (Superior, 10/1989), lot 3238.* (#61466)

# Celebrated 1872 Amazonian Quarter Pattern
# Judd-1196, PR65 Red

2041 **1872 Amazonian Quarter Dollar, Judd-1196, Pollock-1336, R.7, PR65 Red PCGS.** William Barber's Amazonian design with Liberty seated, facing left, her right hand touching the head of a spread-wing eagle, sword in left hand. Thirteen stars are on the upper portion of that side with the date below. The reverse has a reversed variant of the eagle seen on the obverse, denomination below and UNITED STATES OF AMERICA around much of the perimeter on that side. Struck in copper with a reeded edge. According to USPatterns.com: "The Amazonian name dates to the 1890 New York Coin and Stamp auction of the Lorin G. Parmelee collection and was probably given by David Proskey."

This design has always been considered one of the most beautiful and important patterns of the 19th century. Originally, the coins were offered as full sets, with examples of the quarter, half dollar, and dollar included. The lot referred to above in the Parmelee sale contained such a set. There are six examples of Judd-1196 traced today. One of these coins is impounded in the Durham Western Heritage Museum, and another is in the Connecticut State Library. USPatterns.com has a detailed census of Judd-1196 on the website.

The present specimen retains much of its original red color, with highlights of gold and lavender. Crisp detail is present on all design elements, and there is a high degree of contrast with the reflective fields. Overall eye appeal is stunning. The present offering represents an opportunity that occurs infrequently, and advanced collectors should bid accordingly. Population: 1 in 65 Red, 0 finer (12/08).

*Ex: River Oaks Collection (Bowers and Ruddy, 11/1976), lot 958.* (#81467)

# Memorable 1872 Amazonian Half Dollar
# Judd-1200, PR65

2042 **1872 Half Dollar, Judd-1200, Pollock-1340, Low R.7, PR65 NGC.** A representation of Liberty is seated left on the obverse with her right hand outstretched and resting on the head of an eagle. Her left hand holds a sword, and that arm is propped up on a shield. Thirteen stars encircle the border and the date 1872 is below. The reverse depicts an eagle with spread wings and three arrows in its right talon. The left talon supports a shield, in front of which is an olive branch and over which is draped a ribbon inscribed with the motto IN GOD WE TRUST. The legend UNITED STATES OF AMERICA is at the upper border and the denomination HALF DOL is at the lower border. Struck in silver with a reeded edge.

The Amazonian patterns of 1872 are attributed to William Barber. Long considered one of the most beautiful designs in U.S. coinage history, the term "Amazonian" appears to have originated with the Lorin G. Parmelee Collection Sale of June 1890. The catalogers for that sale, H. P. Smith and David Proskey, apparently likened Liberty to the mythical female Amazonian warriors because of her warlike pose with sword and shield. No more than 12 examples of the present variety are believed extant, some of which have been owned by such numismatic luminaries as William H. Woodin, Harry W. Bass, Jr., King Farouk of Egypt, and Byron Reed.

This important Gem is a well preserved example of this famous design. The reflective fields are highlighted by iridescent olive, gray, and cerulean-blue toning. All details of Barber's beautiful design are fully brought up. The overall eye appeal is excellent. This coin has a rare combination of high technical grade, visual appeal, and historic interest.

*Ex: The Simpson Collection.* (#61471)

# Classic 1872 Amazonian Dollar Pattern
# Judd-1206, PR65 Red and Brown

2043 **1872 Amazonian Dollar, Judd-1206, Pollock-1346, R.7, PR65 Red and Brown PCGS.** The obverse exhibits a seated figure of Liberty, her right hand above the head of an eagle, her left forearm resting on top of a shield, and her left hand holding a sword. Around, 13 stars with the date below. The reverse has an eagle with spread wings, clutching three arrows in its right claw, its left leg raised up with the talon supporting a shield with an olive branch in front. A scroll across the shield is inscribed IN GOD WE TRUST. Around is the legend UNITED STATES OF AMERICA with the denomination HALF DOL below. Struck in copper with a reeded edge.

This is one of several different designs that depict a full view of Liberty in a seated position, obviously intended to be an answer to Christian Gobrecht's design that had been in use since 1836. Although several different "Seated Liberty" designs were prepared, the initial design by Gobrecht remained in use until introduction of the Morgan dollar in 1878 and the Barber series of silver coins in 1892.

Both sides of this Gem have excellent contrast with fully mirrored fields visible beneath gold, blue, and sea-green toning. This pattern variety is an important rarity with just nine examples confirmed to exist, including two museum pieces, in the Durham Western Heritage Museum and the Connecticut State Library. This example has a tiny edge mark at 2:45, now mostly hidden by the holder. It has a pedigree back to the Andrew Zabriskie Collection.

*Ex: Andrew Zabriskie; Major Lenox Lohr; Bowers and Ruddy (11/1976), lot 998; Fairfield Collection (Bowers and Ruddy, 10/1977), lot 61.*(#71477)

## Extremely Rare Judd-1272 1873 No Arrows Seated Half in Copper Finest Known, PR66 Red

2044 **1873 Half Dollar, Judd-1272, Pollock-1414, High R.7, PR66 Red NGC.** From regular issue No Arrows Seated half dies, but struck in copper with a reeded edge. Often called dies trial pieces, but since examples are known for all denominations with this date, it seems likely that a few copper proof sets were struck for sale to collectors. Those sets were presumably broken up long ago. This is a precisely struck Premium Gem that appears immaculate aside from the infrequent minuscule carbon fleck. The rich orange-red color is seamless aside from a blush of russet and aqua along the lower left obverse border. Pollock was able to locate three pieces, with the other two from the Farouk and Eliasberg collections.
*Ex: Medio/Da Costa Gomez Collections (ANR/Stack's, 6/2004), lot 1675. Believed from the Lenox Lohr Collection, to Empire coin in 1961, later to R.E. Cox, Jr. Collection, auctioned by Stack's in April 1962.* (#71557)

## 1873 Trade Dollar, Judd-1276, PR65

2045 **1873 Trade Dollar, Judd-1276, Pollock-1418, R.5, PR65 NGC.** Thirteen stars surround the figure of Liberty, who wears a coronet eponymously inscribed; the date 1873 is below. The reverse has the statutory legend around a wreath; inside are TRADE / DOLLAR / (ornament) / 420 GRAINS / 900 FINE. The bottom of the wreath is tied by a ribbon reading IN GOD WE TRUST. Struck in silver with a reeded edge. This pretty Gem has lovely pinkish-gold patina with a complement of ice-blue at the rims on both sides. The strike is well-executed, and it is perhaps only a few faint reverse hairlines that preclude an even finer grade.(#61561)

## Judd-1293 1873 Trade Dollar PR64

2046 **1873 Trade Dollar, Judd-1293, Pollock-1435, R.4, PR64 NGC.** The design is similar to the issued Trade dollar, but Liberty's left hand rests on a globe, her right hand holds a staff, and plow handles sprout from behind the globe. On the reverse, the banner bearing E PLURIBUS UNUM is clutched by the eagle in its beak, and the eagle clutches a Federal shield in place of the usual olive branch. Struck in silver with a reeded edge. This prominently mirrored near-Gem has beautiful ocean-blue, rose-red, and straw-gold obverse patina. The reverse has similar shades in addition to a deeper blush of mauve along the left border.(#61578)

## 1874 Arrows Quarter in Aluminum Judd-1360, R.8, PR66

2047 **1874 Arrows Quarter Dollar, Judd-1360, Pollock-1505, R.8, PR66 PCGS.** From regular issue 1874 Arrows quarter dies, but struck in aluminum with a reeded edge. Per USPatterns.com, "Although these are described as regular die trial pieces in the standard references, it is more likely that the off-metal 'trials' of this year were deliberately struck for sale to collectors as part of complete off-metal sets." A well struck and essentially immaculate specimen with light tan toning and a minor retained lamination on the lower left obverse field. Certified in an old green label holder. PCGS has certified a PR64 and a PR66 (the present coin), and NGC has certified a third piece as PR67 Cameo (11/08).(#61664)

## Lively 1875 Twenty Cent, Judd-1407, PR63

2048 **1875 Twenty Cents, Judd-1407, Pollock-1550, Low R.6, PR63 PCGS.** The obverse is similar to the adopted die, but LIBERTY is incused rather than raised as on the regular issue coins. The reverse, however, is quite different, the famous 1/5 OF A DOLLAR design. Struck in silver with a plain edge. Probably just more than a dozen pieces are known in silver. Beautifully toned in shades of blue, rose, and purple. The rich shadings of color partially obscure the mirrored flash in the fields unless the coin is tilted just so; then the fields jump to life. Population: 2 in 63, 9 finer (12/08).
*Ex: 2001 FUN Auction (Heritage, 1/2001), lot 8554.*(#61714)

## Important 1876 Sailor Head Dollar, Judd-1465, Proof Silver-Plated Copper

2049 **1876 Sailor Head Dollar, Judd-1465, Pollock-1616, High R.7—Plated—NCS Proof.** The obverse depicts William Barber's Sailor Head, here with beads on the coronet and the motto IN GOD WE TRUST centered across the upper border. The reverse displays a wreath that divides the statutory legends. Struck in copper with a reeded edge. This piece has been silver-plated in an attempt to pass it as a silver dollar, or more likely as a rare silver pattern of the same design.
*Ex: Kosoff-Bowers & Ruddy (11/1985), lot 1105; Auction 86, lot 1246.* (#61787)

## Elegant Judd-1554, Pollock-1733
## 1878 Dollar Pattern, PR66 Cameo

2050 **1878 Dollar, Judd-1554, Pollock-1733, R.5, PR66 Cameo NGC.** The head of Liberty is large and faces left with IN GOD WE TRUST at the top and the date below, similar to the pattern fifty dollar gold pieces from 1877. The reverse has a spread-winged eagle with E PLURIBUS UNUM in Gothic lettering above. UNITED STATES OF AMERICA is at the top and ONE DOLLAR on the bottom rim. Struck in silver with a reeded edge. A rare pattern that enjoys considerable popularity due to the kinship in obverse design with the famous half union patterns. Light golden overtones drape the considerable mirrors and the modestly frosted devices. Census: 1 in 66 Cameo, 0 finer (11/08).(#61915)

## Proof Near-Gem Judd-1558
## Silver 1878 Goloid Dollar

2051 **1878 Goloid Dollar, Judd-1558, Pollock-1750, Low R.7, PR64 NGC.** Liberty faces left and wears a cap adorned with cereal grains. The reverse has GOLOID, the composition, and weight in grains in the center, surrounded by a circle of 38 stars, UNITED STATES OF AMERICA above and ONE DOLLAR below at the periphery. Struck in standard silver alloy with a reeded edge. Attractively toned in honey-gold, jade-green, and ocean-blue. The strike is penetrating, and the eye appeal is impressive for this rare pattern variety.(#61920)

## Exceptional 1879 Washlady Dime
## Judd-1584, PR64 Cameo

2052 **1879 Washlady Ten Cents, Judd-1584, Pollock-1777, Low R.6, PR64 Cameo PCGS. CAC.** The Washlady design is attributed to Charles Barber, with Liberty's hair bound behind the head. The obverse has UNITED STATES OF AMERICA around the border with the date below the bust. The reverse has a wreath around a beaded circle that contains ONE DIME with E PLURIBUS UNUM framed above. Struck in silver with a reeded edge. This is one of the popular pattern designs, more recently dubbed the "Society Lady" design by Dave Bowers. This wonderful, upper-end example has profound contrast between the fields and devices on each side. This is apparent even through the relatively thick rose and blue toning seen on each side.(#61961)

## Splendid George Morgan 1879 Pattern Dollar Judd-1613, PR67 Cameo

2053 **1879 Morgan Dollar, Judd-1613, Pollock-1809, Low R.7, PR67 Cameo NGC.** George Morgan's Liberty Head obverse design is usually known simply as the Morgan design. The reverse has a tall, erect eagle with UNITED STATES OF AMERICA and IN GOD WE TRUST above, and ONE DOLLAR below. Struck in silver with a reeded edge. George Morgan's eagle on the reverse was described as "scrawny." It at least appears ill-proportioned when compared to an actual eagle. This piece may well be the second finest known. According to Saul Teichman the finest is a PCGS PR68 that was plated in Wayne Miller's silver dollar book. The surfaces of this piece are magnificent. There are no obvious detracting marks on either side and both obverse and reverse have light rose and blue toning.
*From The Deb-Ann Collection.*(#61991)

## Brilliant Select Proof Judd-1617 1879 Metric Dollar

2054 **1879 Metric Dollar, Judd-1617, Pollock-1813, R.4, PR63 NGC.** This William Barber design features a bust left of Liberty on the obverse. She wears a coronet inscribed LIBERTY. The reveres displays an agricultural wreath and the uncommon motto DEO EST GLORIA within a scrollwork. The cumbersome goloid alloy is listed within a beaded circle. Struck in goloid with a reeded edge. Well struck, untoned, flashy, and only faintly hairlined.(#61995)

## PR64 Judd-1617 1879 Metric Dollar

2055 **1879 Metric Dollar, Judd-1617, Pollock-1813, R.4, PR64 NGC.** Liberty faces left and wears a coronet with a border of pearls. The ornate reverse takes advantage of the large diameter, and has a wreath of cotton and corn and a tablet engraved DEO EST GLORIA. The reverse also describes the metric alloy. Struck in silver with a reeded edge. This needle-sharp near-Gem has peripheral golden-brown toning. The centers are brilliant, and a few trivial obverse hairlines are present. Census: 10 in 64, 7 finer (11/08).(#61995)

## Gem Proof Judd-1617 1879 Metric Dollar

2056 **1879 Metric Dollar, Judd-1617, Pollock-1813, R.4, PR65 NGC.** William Barber's Metric Dollar with Liberty wearing a coronet with a border of pearls. The reverse is quite elaborate with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in silver with a reeded edge.

This pattern was struck in both standard silver and metric alloys, but NGC does not make this distinction on their inserts. However, for its 2001 Heritage auction appearance, the present piece was sent to the ANA, where their Authentication Plus service evaluated the planchet to be a metric alloy of 94% silver, 2% gold, and 4% copper. These percentages vary somewhat from the Mint's intended metric alloy of 89.58% silver, 0.42% gold, and 10% copper. Since gold is present in this planchet, however, it undoubtedly falls into the metric classification. For comparison, the Mint's standard silver alloy is 90% silver and 10% copper.

A beautiful Gem, the surfaces are uniformly mirrored beneath dappled sun-gold toning. Fully struck, and undisturbed aside from light horizontal marks on the central reverse.
*Ex: Atlanta Signature (Heritage, 8/2001), lot 8401.*
*From The James Mossman Collection.*(#61995)

## Exceptional PR67 ★ 1879 Metric Dollar, Judd-1617
## The Finest Example Certified

2057 **1879 Metric Dollar, Judd-1617, Pollock-1813, R.4, PR67 ★ NGC.** William Barber's Metric dollar with Liberty wearing a coronet with a border of pearls. The reverse is elaborately laid out with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in goloid or silver with a reeded edge. As pointed out in the USPatterns.com website "These, apparently, have never undergone metallurgical testing." So, it is uncertain if this piece (or any 1617s) were actually struck in goloid or if the Mint simply went for the simpler option, to strike the patterns in the silver planchets that were available and simply label them with the goloid content on the reverse. The Judd-1617 is the only possibility for an actual goloid composition as this design was also struck in copper, aluminum, white metal, and lead.

The website also makes the interesting observation that these pieces were sold in sets along with Judd-1626 and Judd-1635 (gold stella) to congressmen for $6.10. Later they were sold to collectors for $15! The first public offering of one of these sets was in Scott Stamp and Coin's July 1880 sale, lots 1258-1260. The obverse design is similar to the one used on the famous half union from 1877. The fields are brightly reflective and each side shows scattered streaks and dabs of multicolored iridescent toning. A splendid example of this popular pattern, this is the finest example certified by either of the major services.
*From The Deb-Ann Collection.* (#61995)

## Lovely Choice Proof
## Judd-1626 1879 Goloid Metric Dollar

2058 **1879 Goloid Metric Dollar, Judd-1626, Pollock-1822, R.4, PR64 NGC.** William Barber's design for the Goloid Metric dollar with a capped head of Liberty on the obverse, paired with a reverse that carries verbose statutory as well as elemental inscriptions. A circle of stars about the central inscriptions breaks the otherwise continuous wording. Struck in goloid with a reeded edge. Pastel powder-blue and gold toning visit this meticulously struck and flashy specimen. (#62004)

## Gorgeous 1879 Goloid Metric Dollar Judd-1632, Pollock-1829, PR66 Red and Brown

2059 **1879 Goloid Metric Dollar, Judd-1632, Pollock-1829, R.7, PR66 Red and Brown PCGS.** George Morgan's design for a goloid metric dollar with the bust of Liberty facing left on the obverse, hair braided and coiled at the back of her head, E PLURIBUS UNUM above and the date 1879 below, with stars on the left and right side. On the reverse, the elemental components are central to that side and surrounded by a small circle of stars, and two other circles of statutory requirements between the stars and the rim. Struck in copper with a reeded edge.

This incredible Premium Gem has splashes of deep orange mint color with amazing electric-blue, violet, and iridescent toning over the deeply mirrored obverse and reverse fields. The devices are fully lustrous with the frosty appearance subdued beneath the patina. Population: 3 in 66 Red and Brown, 0 finer (12/08).

*Ex: William Mitkoff, 2/75.*(#72010)

***See: Video Lot Description***

## 1879 Gilt Copper Stella, Judd-1639 Pollock-1839, PR62

2060 **1879 Coiled Hair Four Dollar, Judd-1639, Pollock-1839, Low R.7, PR62 NGC.** A head of Liberty faces left, her hair coiled in a bun atop her head, this coil held in place by a band inscribed LIBERTY. Around, the inscription * 6 * G * .3 * S * .7 * C * 7 * G * R * A * M * S * and below, the date 1879 is from a curved logotype. The reverse has a single large star that serves as the central motif, inscribed with incuse lettering ONE STELLA 400 CENTS. Around, in small letters, are the mottoes E PLURIBUS UNUM and DEO EST GLORIA. In large letters, around the border, the legend UNITED STATES OF AMERICA above, and the denomination FOUR DOL. below. Struck in gilt copper with a reeded edge.

The exact population of the 1879 Coiled Hair stellas in copper is unknown, although it is probably about eight to 10 pieces. The number of those that are gilt is also unknown. In his pattern reference, Andrew W. Pollock, III, listed six different specimens and went on to note that five of the six were gilt.

This example has a nice strike and pleasing, reflective yellow-gold surfaces. Both sides have splashes of orange toning. While a few surface marks are present, the overall quality is that of a desirable but affordable Stella. Census: 3 in 62, 5 finer (12/08).(#62017)

***See: Video Lot Description***

## Aluminum 1879 Coiled Hair Four Dollar
## Judd-1640, PR63 Cameo

2061 **1879 Coiled Hair Four Dollar, Judd-1640, Pollock-1840, High R.7, PR63 PCGS.** The current sale is a monumental event for many reasons, and the current offering is one of them. Five specimens of the Judd-1640 stella pattern in aluminum have been traced, and two are offered in this sale—the other piece being part of *The Lemus Collection, Queller Family Collection Part Two*. To illustrate the rarity of the Judd-1640 pattern, we make note of the fact that, until now, not a single example has crossed the auction block at Heritage since we started our online auction archives in 1993. That is significant in that we have had the privilege of handling multiple examples of the both the gold and copper 1879 Coiled Hair stella patterns, Judd-1638 and Judd-1639, respectively.

Of the Judd-1640 patterns that we have traced, with the aid of Andrew Pollock's treatise on the subject, we note that one of the extant specimens is gilt and, as such, will never accurately represent the issue. Perhaps that piece was plated to represent the more popular gold version, Judd-1638, or to be worn as jewelry. That leaves four non-gilt Judd-1640 patterns, but only three are "available," as the fourth specimen—the Maris-Garrett piece—is permanently impounded in the Harry W. Bass, Jr. Research Foundation core collection. It appears that the remaining three 1879 aluminum stellas now reside in NGC holders. The current offering is the PR63 Cameo piece and the other Judd-1640 in this sale is the sole PR66 Cameo representative. The final example documented in the NGC *Census Report* as of (12/08) is more than likely the Merkin pattern, which was last sold as lot 407 in Superior's August 2004 Pittsburgh sale, where it realized $89,125. At that time the same piece resided in an early generation PCGS PR66 holder without a Cameo designation. It is our qualified opinion that the Merkin specimen is now the PR67 Cameo listed in the NGC *Census Report*, as the PCGS *Population Report* no longer documents an example of Judd-1640 in any condition.

The last public appearance of this piece was in the October 2001 sale of the Dallas Bank Collection—a Sotheby's and Stack's collaboration—where it was described as follows:

> "Choice Brilliant Proof. A lovely example. A bright silver-gray in color. The obverse and reverse fields are full, deep mirrors against which the lightly frosted central devices stand out well. Some light horizontal scratches in the center of the obverse, and with a small mark near the rim at 9 o'clock. Extremely rare. Only five different specimens have been definitively traced and an additional two are unconfirmed. Weight: 1.26 grams. Judd 1640; Adams-Woodin 1580; Pollock 1840."

The "small mark" noted by the previous cataloger is actually a strike-through error. Closer examination reveals that the foreign material that was on the planchet actually extended around the periphery of the coin from the A of GRAMS at 3 o'clock, to star 4 at the 9 o'clock position. Most of the strike-through is barely discernible, with a void affecting the 3 of ★.3★ at the left obverse rim being the only noticeable remnant of the mint-produced anomaly. A similar, albeit smaller strike-through is observed on the reverse through MER of AMERICA. Here the foreign debris appears to be thread. Neither irregularity impacts the grade, which is more determined by five or six superficial scratches on the Liberty's cheek and myriad light abrasions in the delicately mirrored fields. Overall, this specimen is a pleasing representative of Judd-1640, and one of only three non-gilt specimens in private hands.
*Ex: Rare Coin List #10 (Paramount, 6/1975); Dallas Bank Collection (Sotheby's/Stack's, 10/2001), lot 369.*(#62018)

## 1881 Liberty Nickel, Judd-1671
## PR66 Cameo, Finest Certified

2062 **1881 Liberty Head Five Cents, Judd-1671, Pollock-1872, High R.6 PR66 Cameo NGC.** An early prototype for the Liberty nickel that was adopted two years later. This version differs in several ways from the regular design. On the obverse UNITED STATES OF AMERICA circles the rim in place of the stars. On the reverse, a large V is surrounded by a wreath with no statutory inscriptions around the periphery. Struck in nickel with a plain edge. This exactingly struck Premium Gem has delicate chestnut toning and attractive preservation. The sole PR66 at either major service with none finer. Census: 1 in 66 Cameo, 0 finer (11/08).(#62067)

## Brilliant PR67 Ultra Cameo
## 1882 Liberty Nickel, Judd-1690

2063 **1882 Liberty Head Five Cents, Judd-1690, Pollock-1892, R.5, PR67 Ultra Cameo NGC.** Similar to the adopted 1883 No Cents Liberty nickel, although the stars are positioned slightly differently. The S in PLURIBUS is widely repunched. Struck in nickel with a plain edge. The white-on-black contrast is compelling, particularly since Liberty's face and neck are as thickly frosted as her hair. An untoned and carbon-free Superb Gem that looks the same today as when it was first struck, more than 125 years ago. No hairlines are visible. Extremely popular as a transitional pattern. Census: 2 in 67 Ultra Cameo, 0 finer (11/08).(#62095)

## Desirable 1883 Liberty Nickel Pattern
## Judd-1714, PR66 Cameo

2064 **1883 Liberty Head Five Cents, Judd-1714, Pollock-1919, Low R.6, PR66 Cameo NGC.** The design is similar to the regular-issue 1883 No CENTS Liberty nickel, but LIBERTY is absent on the coronet, instead spread across the upper obverse rim. The stars are smaller and arranged 6 x 7. Struck in nickel with a plain edge. Intricately struck and unabraded with flashy fields and light golden toning. A solitary fleck above the jaw will identify this specimen. (#62131)

## Choice Proof Perforated
## 1884 Cent, Judd-1721

2065 **1884 One Cent, Judd-1721, Pollock-1929, R.5, PR64 PCGS. CAC.** Slightly wavy and holed at the center (all as made) with the perforation slightly out of round. These experimental pieces were intended to make small denomination coinage easier to distinguish by the blind, and thereby to "remedy the inconvenience of similarity in our small coin." The obverse bears the legend UNITED STATES OF AMERICA about the upper rim and the date at the bottom. The reverse shows the denomination ONE CENT at the top with an inverted shield and two laurel sprigs below. Struck in nickel with a plain edge. Although struck in 1884, this design dates back to the 1870s. Approximately two dozen of these pieces are known today in nickel, and the holes are slightly irregular on all we have seen, suggesting they were hand-cut. The surfaces are gray-brilliant with the occasional speck of carbon scattered over each side.
*Ex: FUN Signature (Heritage, 1/2004), lot 8510.*(#62150)

## 1896 Five Cent in Aluminum, Judd-1772, PR63

2066 **1896 Five Cents, Judd-1772, Pollock-1989, High R.6, PR63 PCGS.** A shield in the center obverse has an incuse LIBERTY, with crossed pole behind bearing a Liberty cap and an eagle. The Latin motto is at the top rim, with seven stars to the left and six to the right. On the reverse a large 5 fills the center, with a small CENTS below. A nearly closed olive wreath surrounds, with UNITED STATES OF AMERICA at the rim. Struck in aluminum with a plain edge. A few small marks and planchet flaws appear only under a loupe, but this lustrous coin has a lot more appeal than the PR63 grade might suggest.(#62226)

## 1942 'One Cent' Pattern, Judd-2054, PR60

2067 **1942 "One Cent" Pattern, Judd-2054, Pollock-2074, High R.7, PR60 PCGS.** On the obverse Liberty faces right—a design based on the Colombian two centavo coins—with LIBERTY at the left rim, JUSTICE at the right. The reverse features an olive wreath with berries and UNITED STATES MINT in the center. Struck in zinc-coated steel, one of the types apparently struck within the Mint in 1942. This piece, while strictly Mint State, has heavy diagonal gray toning striations on both sides. Population: 1 in 60, 1 finer (11/08).

## Extremely Rare 1942 Experimental Cent, MS63 Zinc-Coated Steel, Judd-2054, Pollock-2074

2068 **1942 "One Cent" Pattern, Judd-2054, Pollock-2074, High R.7, MS63 NGC.** The obverse depicts a bust right of Liberty, based on the KM-198 Colombian two centavos. The reverse features a wreath and a central legend. Struck in zinc-coated steel. The dies were engraved by John R. Sinnock, and used both inside and outside the Mint. The bronze, zinc-coated steel, manganese, and aluminum pieces were apparently struck at the Mint in the second half of 1942. All other pieces, in various plastic and related compositions were struck privately outside the Mint.

Essentially the same composition that was finally chosen for 1943 Lincoln cent production, this piece has deep gray surfaces with a few tiny spots and some barely detectable corrosion.

2069 **Uncertified Planchet for Judd-2060 Pattern Cent.** This brown plastic planchet has a raised rim, and is otherwise featureless except for a set of concentric circular grooves near the rim on each side. Judd-2060 was privately struck from mint dies in 1942. The intent was to provide a suitable substitute for the bronze cent, which used copper needed for the war effort. The Treasury eventually turned to a zinc-plated steel composition for the 1943 cent.

## Rare MS66 Judd-2060 1942 Cent

2070 **1942 "One Cent" Pattern, Judd-2060, Pollock-4035, Low R.7, MS66 NGC.** The obverse resembles the KM-198 Colombia two centavos, and the simple reverse has merely a wreath and the legend UNITED/STATES/MINT. Privately struck in brown plastic with a plain edge from dies provided by the U.S. Mint. The lustrous surfaces are chocolate-brown and strictly as made, without any indication of marks or spots.

## Choice Mint State Judd-2062 1942 Cent

2071 **1942 Cent, Judd-2062, Pollock-4045, Low R.7, MS64 NGC.** Copper was required by American forces during World War II, and the Treasury considered striking cents in plastic, glass, rubber, bakelite, fiber, and other non-essential materials. This led to Judd-2051 through Judd-2069, a series of pattern cents in exotic compositions. Dies similar in design to the Lincoln cent but bearing different types (a woman's bust and a wreath) were delivered to private contractors. Struck in red plastic with a plain edge from widely rotated dies. This is a dark brown near-Gem that boasts an exemplary strike and lustrous, seamless surfaces.

## Gem Proof Judd-2063 1942 Cent

2072 **1942 Cent, Judd-2063, Pollock-4035, Low R.7, PR65 NGC.** Chief Engraver John R. Sinnock is credited with the designs. The obverse resembles the Columbian two-centavo. The reverse has a peripheral wreath enclosing a three line legend. The types are similar in placement to the Lincoln cent. Struck in tan plastic with a plain edge. The dies have medal turn. Lustrous and sharply struck with a glossy mark-free light-brown appearance.

*End of Session Three*

## MINT SET

## MS66 to MS67 Five Piece 1909 Collection
## Includes Indian Cent, Nickel, Dime, Quarter and Half

2073 **1909 Denomination Set MS66 to MS67 PCGS.** Housed in old green label holders, four of which have consecutive serial numbers. The set includes:

**1909 Cent MS66 Red PCGS.** Boldly struck and beautiful with dazzling luster and exquisite surfaces. Nearly perfect aside from a single small spot on the T in CENT. PCGS has graded just four pieces finer (11/08).

**1909 Nickel MS66 PCGS.** Caramel-gold and steel-blue toning alternates across this lustrous and powerfully impressed Premium Gem. Practically devoid of marks, with the obverse especially nice. The borders have an orange peel texture, as made from long-in-use dies. Population: 22 in 66, none finer (11/08).

**1909 Dime MS67 PCGS.** Orange-red and sun-gold toning adorns the margins of this formidably lustrous Superb Gem. Intricately struck and remarkably unabraded. Available in typical Mint State, but very rare so close to perfect. Population: 3 in 67, none finer (11/08).

**1909 Quarter MS66 PCGS.** Sky-blue and olive-green are prevalent, although the peripheries offer golden-russet patina. Lustrous and meticulously struck with exemplary preservation. Seldom seen so nice. Population: 16 in 66, 2 finer (11/08).

**1909 Half Dollar MS66 PCGS.** The centers are only delicately toned, but the borders display rich forest-green, orange-gold, and rose-red. A blemish-free and lustrous Premium Gem that has an excellent strike and noteworthy eye appeal. Population: 10 in 66, none finer (11/08).(Total: 5 coins)

# EARLY HALF DIMES

## VF Details 1794 Half Dime, V-2, LM-2

2074 **1794—Improperly Cleaned—NCS. VF Details.** V-2, LM-2, R.5. The digit 4 in the date is awkward and ill-formed, appearing to lack its lower right portion. The digit 9 is close to a dentil, and star 1 connects to curls 1 and 2. On the reverse there are no outer berries under the left wing. The surfaces are medium gray with tinges of charcoal near the rims, and while there is slight evidence of cleaning, this is still an early American coin with lots of appeal, both aesthetic and numismatic.(#4250)

## Elusive 1794 Half Dime Variety V-1, LM-1, R.6, VF25

2075 **1794 VF25 NGC.** V-1, LM-1, R.6. The date is wide, with the 179 all well separated from each other. The tip of the 1 in the date is quite close to the dentils. On the reverse there are six berries left and six right, with two inner berries and no outer berries under the left wing. This is an example of the rarest of four known varieties for the 1794 half dimes, with a surviving population of less than 30 pieces in all grades. A single diagonal scratch on the reverse is the only blemish on this otherwise flawless Very Fine coin. Iridescent saffron, olive, and orange toning accents the medium gray surfaces. (#4250)

## AU Details 1794 Half Dime, V-3, LM-3

2076 **1794—Improperly Cleaned—NCS. AU Details.** V-3, LM-3, R.4. Iridescently patinated in sea-green, lemon-gold, ruby-red, and plum-mauve. This Flowing Hair half dime is luminous from a mild cleaning and likely has artificial toning, but the strike is sharp and consistent, and there are no noticeable marks.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#4250)

2077 **1795 VG10 PCGS.** V-5, LM-8, R.3. An early die state without the crack through the Y in LIBERTY. Toned deep autumn-brown and forest-green with glimpses of ruby-red. Well defined despite uneven wear on the left-side stars, and smooth save for a concealed mark or two on the eagle.(#4251)

## Vividly Toned 1795 Half Dime, VF25 Terminal Die State V-4, LM-10

2078 **1795 VF25 PCGS.** V-4, LM-10, R.3. The terminal die state with a heavy die break or cud above the TY in LIBERTY and star 9. Vibrant plum-mauve and pearl-gray embrace this richly toned Flowing Hair half dime. Faint obverse marks are of little concern. Sharply detailed for the designated grade.(#4251)

## Uncirculated 1795 Half Dime Difficult V-2, LM-3 Marriage

2079 **1795 MS61 NGC.** V-2, LM-3, R.5. The last year of the Flowing Hair half dime, which would be superseded the following year by the Draped Bust type. The rare LM-3 variety is identified by the prominent die crack that travels from the rim above the R in LIBERTY through most of Liberty's hair. This example shows deep charcoal-gray toning on each side with silver centers. The strike is bold, but the planchet was struck was struck from slightly misaligned dies with the obverse a bit weak at 9 o'clock on each side. A good opportunity for the specialist.
*Ex: Central States Signature (Heritage, 5/2007), lot 2051.* (#4251)

2080 **1796 Likerty —Improperly Cleaned—NCS. Fine Details.** V-1, LM-1, R.3. A glossy but lightly abraded Small Eagle half dime with steel-blue an tan toning. Much wing plumage detail remains, and abrasions are limited to minor marks on the right obverse field. Listed by NCS as a LIKERTY variety, although hair-thin crossbars are present on the B.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#4254)

2081 **1797 13 Stars—Environmental Damage—NCS. Fine Details.** V-1, LM-4, R.6. LM-4, the only marriage with 13 stars, is the rarest 1797 half dime variety. Light to medium gray surfaces reveal localized areas of moderate granularity. Generally well defined for the Fine Details grade. Really not a bad coin, as the environmental damage is not all that bad.(#4260)

### Attractive 1797 15 Stars Half Dime, XF45

2082 **1797 15 Stars XF45 NGC.** V-2, LM-1, R.3. 15 stars encircle the obverse periphery. A beautiful array of rainbow coloration adorns the obverse and reverse borders. The eagle is somewhat weakly defined, as usual; but the other design elements are quite bold. A few faint adjustment marks are noted across the obverse, and a handful of wispy planchet flaws reside on Liberty's jaw and upper neck, beneath and to the left of the ear. There are no remarkable abrasions on the reverse, but die clash marks are noted on the left side near the wing.(#4258)

2083 **1800—Bent, Improperly Cleaned—NCS. VF Details.** V-1, LM-1, R.3. A cream-gray half dime with deeper rose and aquamarine patina throughout the rims. Cloudy from a cleaning, and uneven wear is noted beneath UNUM and before OF due to a slight bend. The rims have a few minor dings. A richly detailed example of this scarce date.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#4264)

### Desirable 1800 Half Dime, V-1, LM-1, XF40

2084 **1800 XF40 NGC.** V-1, LM-1, R.3. The most common of the four varieties for the date, most easily attributed by the presence of a die break through the denticles below the last two digits of the date. This is a pretty, lightly circulated coin, slate-gray in color, and an ideal representative of the date in a collection of high grade circulated coins.
*From The Findley Collection.*(#4264)

### Beautiful 1800 Half Dime, V-1, LM-1, AU50

2085 **1800 AU50 NGC.** V-1, LM-1, R.3. All four digits in the date are equally spaced, and the large 8 in the date is made from two small "o" punches. The second 0 in the date nearly touches the bottom of the bust. On the reverse a leaf is joined to the left diagonal of the last A in AMERICA, and the upright of the last T in STATES is over the left edge of cloud 3. This piece shows beautiful patina in a mix of sage, cinnamon, and lavender, with considerable luster remaining and a few light scrapes that appear only under a loupe. A nice AU type coin of this most available variety for the year.(#4264)

## BUST HALF DIMES

### Lavishly Toned Prooflike Gem 1830 Half Dime, V-5, LM-9

2086 **1830 MS65 Prooflike NGC.** V-5, LM-9, R.4. A small die break fills the upper loop of the second S in STATES. This better variety example is dramatically toned in orange-red, aquamarine, and sun-gold. Penetratingly struck and gorgeously preserved. Census: 3 in 65 Prooflike, 1 finer as Prooflike (11/08).
*From The Deb-Ann Collection.*(#4277)

### Lushly Patinated Gem V-5, LM-5 1831 Half Dime

2087 **1831 MS65 NGC.** V-5, LM-5, R.1. Golden-tan and powder-blue alternate across this lustrous Gem. Only a couple of inconspicuous obverse field grazes deny perfection. Well struck aside from minor incompleteness on the eagle's neck and on the curls above the shoulder. Encased in a former generation holder.(#4278)

### Pretty Gem 1831 Half Dime, V-1, LM-6

2088 **1831 MS65 PCGS.** V-1, LM-6, R.1. The two 1s in the date are both centered over denticles, and the branch stem on the reverse protrudes slightly past the C in the denomination. This pretty coin has deep, mottled orange and aqua toning on the obverse, with lighter pinkish-gold color on the reverse. Despite the intense color, considerable luster percolates to the surfaces. The reverse shows moderate clash marks. An attractive and interesting coin. Certified in a green-label holder.(#4278)

### Exemplary MS66 1832 Half Dime, V-1, LM-3

2089 **1832 MS66 PCGS.** V-1, LM-3, R.1. Star 12 is repunched, and die cracks extend down from each wingtip. Light honey-gold toning visits this coruscating and refreshingly unabraded Premium Gem. The strike is unimprovable, and a finer type coin would be a challenge to secure. Population: 35 in 66, 8 finer (11/08).
*From The James Mossman Collection.*(#4279)

2090 **1834 MS64 NGC. CAC.** V-2, LM-1, R.2. Both sides of this pleasing near-Gem are deeply toned with steel-blue and iridescent surfaces. Only the slightest surface abrasions are visible with a glass. (#4281)

### Lovely 1834 Gem Half Dime, V-1, LM-2

2091 **1834 MS65 NGC.** V-1, LM-2, R.1. Later die state with a minor die crack from star seven to Liberty's cap, and the upper loop of the second S is filled. Electric-blue, lavender, and golden-brown patina bathes the lustrous surfaces of this lovely Gem. Sharply struck and nicely preserved throughout. Census: 58 in 65, 44 finer (11/08). (#4281)

### Bold 1836 Large 5C Half Dime, V-4, LM-3, MS65

2092 **1836 Large MS65 PCGS.** V-4, LM-3, R.1. This Large variety shows the 3 in the date punched over an inverted 3, and the U in UNITED is boldly repunched. A thick die crack extends from the upper obverse rim diagonally through the back of Liberty's cap and into her hair. Original lilac-gray and rose toning is seen over each side, along with vibrant satiny mint luster. The design elements show bold definition. A great Gem example of this conditionally scarce half dime variety.(#4287)

## SEATED HALF DIMES

### Beautiful MS66 1837 Half Dime
### No Stars, Large Date

2093 **1837 No Stars, Large Date (Curl Top 1) MS66 NGC.** Light gold toning enriches the borders of this highly lustrous and decisively struck Premium Gem. Essentially pristine aside from a delicate mark beneath the E in STATES. The sole date without stars, aside from a very scarce emission in 1838 at New Orleans.(#4311)

### MS66 1837 Seated Half Dime
### No Stars, Small Date

2094 **1837 No Stars, Small Date (Flat Top 1) MS66 PCGS. CAC.** Incorrectly designated on the PCGS insert as a Large Date variety. Of greater interest to most numismatists is the absence of stars, since 1837 is the only Philadelphia date of that design subtype. (New Orleans struck a small quantity of No Star half dimes in 1838, but that issue is uncollectible in MS66). The present intricately struck example has light caramel-gold and slate patina. It is unabraded and satiny with impressive eye appeal.
*From The James Mossman Collection.*(#4312)

2095 **1838 Large Stars, No Drapery MS65 NGC.** This lovely Gem has light chestnut-gold toning and a good strike. Marks are virtually absent, and the quality and eye appeal are imposing.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#4317)

### Generously Toned 1838 Half Dime
### MS66 ★, Large Stars, No Drapery

2096 **1838 Large Stars, No Drapery MS66 ★ NGC.** Exotic rose-red, aquamarine, straw-gold, and plum-mauve endow this shimmering and penetratingly struck Premium Gem. An attractively toned and minimally abraded representative of the briefly made No Drapery subtype. Census: 2 in 66 ★, 4 finer with a Star designation (11/08). (#4317)

## The Only Prooflike 1838 Large Stars Half Dime, MS64

2097 **1838 Large Stars, No Drapery MS64 Prooflike NGC.** This is the only 1838 Large Stars half dime in any grade to receive the Prooflike designation from NGC, out of nearly 500 coins graded in Mint State. Although the coin is deeply toned, iridescent color can be seen on smooth, lightly reflective fields, especially prominently on the reverse. The strike is not full, most notably in the upper left quadrant of the reverse, yet the overall effect is lovely.
*From The Findley Collection.*(#4317)

## Gorgeous MS66 1839 Half Dime
## Scarce No Drapery Subtype

2098 **1839 No Drapery MS66 PCGS.** A precisely struck Premium Gem that has delicate gold toning and a mark-free appearance. Potent luster further ensures the outstanding eye appeal. The Stars, No Drapery subtype was coined only between 1838 and 1840. Population: 19 in 66, 5 finer (11/08).
*From The James Mossman Collection.*(#4319)

2099 **1844 MS65 PCGS. CAC.** V-3. FS-301, formerly FS-000.063. VP-001. The date is repunched both north and south, most noticeably beneath the 8. The untoned surfaces of this lovely Gem are radiant, with intense mint frost creating a dazzling sheen across each side. The design elements are sharply struck, and even Liberty's head and hair are crisply rendered. The surfaces are well preserved, and nearly blemish-free. Population: 16 in 65, 28 finer (11/08).
*From The James Mossman Collection.*(#4333)

## Bold 1844 Half Dime, MS66

2100 **1844 MS66 PCGS.** Normal Date. Al Blythe comments that the 1844 Normal Date is much scarcer than the repunched date, although the latter brings more of a premium. This Premium Gem certainly ought to bring some recognition regardless. The mottled surfaces show powder-gray, jade, and copper-orange patina on the obverse, along with radiant luster and a bold strike. The reverse is a blend of aqua and jade. Population: 19 in 66, 9 finer (12/08).
(#4333)

## Stunning 1844 Half Dime, MS67

2101 **1844 MS67 PCGS.** Normal Date. Iridescent cobalt-blue toning on the lower obverse complements an upper segment of jade and lilac hues, while the reverse is a more consistent shade of aqua, with some sprinkles of charcoal-gray. A stunning, sharply struck, and thoroughly pleasing piece. There are none finer certified at either service (12/08).(#4333)

## Patinated MS66 1845 Half Dime
## Boldly Repunched Date, FS-302

2102 **1845 MS66 PCGS.** V-5. FS-302. All four date digits are clearly repunched. Fully shaded in original and attractive golden-brown and sea-green patina. A lustrous and minimally abraded example of this interesting Seated variety. Housed in a green label holder. Population: 10 in 66, 6 finer (11/08).(#4335)

2103 **1849 MS65 NGC.** A quick first glance at this stunning, brilliant Gem might suggest a proof strike, as the fields are fully reflective around boldly detailed and lustrous devices. Closer examination reveals that it is, in fact, a wonderful business strike. Census: 8 in 65, 11 finer (11/08).(#4341)

2104 **1852 MS66 NGC.** A razor-sharp, satiny, and mark-free Premium Gem with original russet, almond-gold, and lime-green toning. Encased in a prior generation holder. Census: 10 in 66, 4 finer (12/08).(#4349)

2105 **1853 No Arrows MS65 NGC.** Splashes of electric-blue, purple, and golden-brown exhibit deeper shades on the obverse of this Gem. The devices are well brought up. Nicely preserved throughout Census: 13 in 65, 11 finer (12/08).
*From The Deb-Ann Collection.*(#4351)

2106 **1853 Arrows MS65 PCGS.** Light golden-tan patina graces the lustrous surfaces of this Gem, and an attentive strike leaves strong definition on the design elements. A well preserved coin. Population: 50 in 65, 37 finer (12/08).(#4356)

### Wonderful MS66 1853 Arrows Half Dime

2107 **1853 Arrows MS66 PCGS.** Light golden-gray toning enriches this lustrous and penetratingly struck Premium Gem. Virtually void of contact, and an exceptional representative of the briefly issued Arrows subtype. The reverse is boldly clashed, but the obverse lacks any evidence of clashing. Population: 31 in 66, 6 finer (11/08).
*From The James Mossman Collection.*(#4356)

2108 **1857-O MS65 PCGS.** Splendid, bright mint luster swirls around each side of this sharply defined O-mint With Stars half dime. Refreshingly free from abrasions. Population: 21 in 65, 23 finer (12/08).(#4366)

### Dazzling MS66 1857-O Half Dime

2109 **1857-O MS66 NGC.** Struck from Longacre's retouched hub with added detail to the drapery near the pole. A moderately prooflike Premium Gem that boasts flashy golden-brown fields. Well struck except for portions of the obverse dentils, which are soft near 5 o'clock. A gorgeous piece certain to delight the Seated specialist. Census: 18 in 66, 3 finer (12/08).
*From The Deb-Ann Collection.*(#4366)

2110 **1859 MS66 NGC.** The strike is powerfully bold and the surfaces are clean and frosty with an icy sheen to them that is very pleasing. Several wisps of beige toning is seen on the obverse. The 1859 half dime is interesting for its hollow obverse stars, a hub used only this year aside from the rare "transitional" 1859 and 1860 patterns. Census: 17 in 66, 21 finer (12/08).(#4371)

### Exemplary 1864 Half Dime MS66

2111 **1864 MS66 PCGS.** A lustrous Seated half dime with light chestnut-gold toning and essentially immaculate preservation. Struck from multiply clashed dies. A scant 48,000 pieces were struck, and Uncirculated examples are very scarce. Premium Gems of this Civil War date are highly desirable. Population: 8 in 66, 1 finer (11/08). (#4384)

### Dynamic Superb Gem 1864 Half Dime

2112 **1864 MS67 NGC.** A lightly toned and pristine Superb Gem with minor incompleteness on the wreath opposite the left corner of Liberty's rock. Struck from prominently clashed dies. Because silver coins were widely hoarded during the Civil War, Philadelphia issued only 48,000 pieces in 1864. Census: 4 in 67, 0 finer (12/08). (#4384)

### Unsurpassed 1866 Half Dime, MS67

2113 **1866 MS67 PCGS.** Scintillating luster highlights the exquisite champagne, gold, and electric-blue toning that adorns the immaculately preserved surfaces of this conditionally rare Superb Gem half dime. All of the design features are crisply struck. A low mintage issue of just 10,000 pieces that is unknown any finer. Population: 3 in 67, 0 finer (11/08).(#4388)

2114 **1872-S Mintmark Below Bow MS65 PCGS.** A delightful Gem, this piece exhibits frosty mint luster beneath deep gold, blue, and iridescent toning on both sides.(#4401)

2115 **1872-S Mintmark Below Bow MS66 PCGS.** Mintmark placed near the border, below the ribbon bow. Others have the mintmark inside the wreath. Fully struck and highly lustrous with essentially untoned silver surfaces. The satiny obverse and reverse surfaces are virtually pristine without blemishes of any significance.(#4401)

## PROOF SEATED HALF DIMES

### Conditionally Scarce 1864 Seated Half Dime, PR65 Cameo

2116 **1864 PR65 Cameo NGC.** This is a scarce, low-mintage issue in the proof Seated half dime series. The deeply watery fields are starkly contrasted against frosted devices. A couple of curly lint marks (as made) are detected on the upper obverse, near Liberty's face; but contact marks and hairlines are absent. A conditionally scarce Premium Gem with the Cameo designation. Census: 5 in 65 Cameo, 7 finer (11/08).(#84447)

2117 **1867 PR66 PCGS.** Proof sparkle shines forcefully through uniform layers of aquamarine and golden-rose toning. There is considerable date pressure on proofs from this year, as the already low business strike mintage of 8,000 pieces was heavily melted. Population: 10 in 66, 5 finer (12/08).(#4450)

2118 **1870 PR65 Cameo NGC.** The bottom obverse and upper reverse are silver-colored, while the remaining portion has iridescent aqua tints with a complement of violet. The good field-device contrast and excellent eye appeal make this piece a serious contender for that empty slot.(#84453)

2119 **1871 PR65 PCGS.** This crisply struck Gem has watery fields and lovely blue-green toning. The obverse center exhibits mint-made die rust, and a tiny spot is noted beneath the A in HALF. Population: 20 in 65, 15 finer (12/08).(#4454)

## EARLY DIMES

2120 **1796 Good 4 NGC.** JR-1, R.3. A prominent die break beneath the first star identifies the variety. Mauve, gold, and powder-blue envelop this collectible first-year dime. The legends and stars are surprisingly crisp for the grade.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#4461)

### Historic 1796 Dime, JR-1
### Good 6

2121 **1796 Good 6 PCGS. CAC.** JR-1, R.3. This is the most available variety of 1796 dime, and a favorite of early type collectors. The variety is easily distinguished by the cud at the lower left rim. The present coin exhibits much original detail on the reverse, and the bust is fully outlined, with the date plain, and all stars visible on the obverse. Abrasions and wear a truly minimal for the grade. (#4461)

### Attractive 1798 Dime
### JR-4, VF25

2122 **1798 Large 8 VF25 PCGS.** JR-4, R.3. The most available variety of 1798 dime, characterized by the flat topped 1 in the date and the five berries on the reverse. This example shows honest even wear, with much detail remaining on the bust and eagle. The date is legible and all inscriptions are sharp. Population: 7 in 25, 39 finer (12/08).(#4466)

### Partly Lustrous AU55 JR-1 1800 Dime

2123 **1800 AU55 PCGS.** JR-1, R.4. On this variety, the obverse shows a die dot over curl #1, another between the 1 and the 8 in the date, and the reverse displays star 12 touching the motto ribbon, but not the eagle's beak. The deliveries of dimes in 1800 were made in two deliveries; 16,760 pieces on March 25, and 5,000 coins on March 26.
This Choice AU example displays semi-bright silver-gray surfaces imbued with wisps of light tan, and the retention of luster in the protected areas. Nice definition graces Liberty's hair and drapery and the eagle's wing feathers. Even the often-weak breast of the eagle shows fairly good delineation. The few light marks on the obverse do not distract. Population: 3 in 55, 11 finer (12/08).
*Ex: FUN Signature (Heritage, 1/2007), lot 2530; Beau Clerc Collection (Heritage, 9/2007), lot 919, which realized $10,925.*(#4470)

## Borderline Uncirculated JR-1 1800 Dime

2124 **1800 AU58 PCGS.** JR-1, R.4. The 1800 is a much better Heraldic Eagle date with only two die marriages, both of which are very scarce to rare. JR-1 usually has a slender cud that joins the left (facing) wingtip to the rim, which distinguishes it from JR-2. An example with considerable mint luster is a prize, since a majority of dimes from this era are well circulated. The present coin is also intricately struck, without any softness on the stars above the eagle. Liberty's cheek and shoulder display light wear, and the only remotely mentionable mark is a brief thin line above the branch stem. Moderately toned in gunmetal-gray shades that deepen slightly across the borders. Population: 5 in 58, 6 finer (12/08).(#4470)

## Rare Choice XF JR-2 1801 Dime

2125 **1801 XF45 PCGS. CAC.** JR-2, R.5. A much better Heraldic Eagle date with only two known die marriages. JR-2 is moderately rarer than JR-1. The present Choice XF example has impressive definition, and is attractively toned in autumn-gold, powder-blue, and lilac. Faint marks are noted beneath the chin and beneath OF. Population: 4 in 45, 9 finer (11/08).(#4471)

## Very Fine 1802 Dime, JR-4

2126 **1802 VF20 NGC.** JR-4, R.4. The eagle's lower beak is extended and needle-like, passing through two star points. Chestnut-tan and ocean-blue embrace this rare date Draped Bust dime. The centers are softly brought up, as made, but the eagle's wings have impressive feather definition. Unmarked aside from a pair of hair-thin marks on the left obverse field.(#4472)

## Challenging Fine Details 1804 Dime 13 Reverse Stars, JR-1

2127 **1804 13 Stars on Reverse—Genuine—PCGS.** JR-1, R.5. In-house graded Fine Details, Damaged. The right obverse field has a sunken area from a long-ago mark, and the reverse has a couple of tiny digs. Wear is uneven on the curls behind the neck and on the reverse border near AMERICA. Toned jade-green and gunmetal-gray. A challenging date.(#4474)

## Rare 1804 Dime, VF Details JR-1, 13 Reverse Stars

2128 **1804 13 Stars on Reverse—Improperly Cleaned—NCS. VF Details.** JR-1, R.5. Deep orange-red and blue-green toning envelops this well defined key date dime. About half of E PLURIBUS UNUM is readable, and Liberty's hair has pleasing detail. The dual color patina conceals a mild cleaning, and a few stars above the eagle are softly impressed. Void of relevant marks.(#4474)

### Key 1804 Dime, 13 Stars, JR-1, VF Details

2129 **1804 13 Stars on Reverse—Altered Surfaces—ICG. VF20 Details.** JR-1, R.5. The qualifier presumably refers to the fact that the coin has recolored after an old cleaning; the surfaces are also quite rough. Only two varieties were minted in 1804, and they are instantly distinguishable by the number of stars on the reverse. A pleasingly high degree of detail remains, except in the right reverse stars, as usual, and the coin presents well overall.
*From The Findley Collection.*(#4474)

### Charismatic 1804 Draped Bust Dime, JR-1, VF Details

2130 **1804—Improperly Cleaned—NCS, VF Details.** JR-1, R.5. From a small recorded mintage of 8,265 pieces, the 1804 dime is the least available date of the series. Sharing this date with the other rare denominations of 1804 has added to the dime's attraction. The present example shows the sharpness of a VF20, with much original detail remaining on all devices.(#4474)

2131 **1805 4 Berries XF45 NGC.** JR-2, R.2. **Misattributed by NGC as a JR-1, Five Berries.** The JR-2 is a more common variety and a popular type coin. This piece is softly defined on the eagle's shield, talons, and tail; and on UNI of UNITED. Light to medium-gray patina is intermingled over both sides. There are no disturbing abrasions, pinscratches, or planchet defects.(#4477)

### Toned Choice AU 1805 Dime
### Four Berries, JR-2

2132 **1805 4 Berries AU55 PCGS.** JR-2, R.2. Blended tobacco-brown and gunmetal-gray confirms the originality of this early silver type coin. Ample luster emerges from design recesses, and even a loupe fails to locate abrasions. Liberty's shoulder has light wear. Both sides display multiple sets of clashmarks, as made.
*From The Findley Collection.*(#4477)

2133 **1807—Improperly Cleaned—NCS. XF Details.** JR-1, R.2. Sea-green borders frame the slate-gray fields and devices. This mildly bright and minutely granular example has rich definition and only a single relevant mark, placed above the B in PLURIBUS.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#4480)

## BUST DIMES

### Lushly Toned Near-Gem JR-11
### 1820 Medium 0 Dime

2134 **1820 Medium 0 MS64 NGC.** JR-11, R.3. Dramatically toned in peach, straw-gold, cobalt-blue, and ruby-red. A powerfully struck and lustrous near-Gem with exemplary luster and no significant marks. The *Guide Book* lists only Large 0 and Small 0 varieties, but per the JR reference, a majority of the die marriages are Medium 0.(#4492)

### Smooth, Lustrous 1820 Dime, Small 0, JR-2, MS64

2135 **1820 Small 0 MS64 PCGS.** JR-2, R.3. Mislabeled on the holder as a Large 0 variety; however, the 0 is slightly but distinctly smaller than the preceding 2, whereas the Large 0 varieties have a 0 bigger than the 2. The reverse of this die pairing is known as the "Office Boy" reverse, after several instances of obvious and amateurish recutting of the letters. Thick luster envelops the smooth surfaces of this coin, mostly gray-gold, but lending an undertone of iridescence throughout. What little strike weakness there is appears to be limited to star 7 and the eagle's claw.
*From The Findley Collection.*(#4493)

### Impressive JR-4 1827 Dime, MS64

2136 **1827 MS64 NGC.** JR-4, R.2. Reiver state b. A later die state with a small die crack through RICA and a minor crack in the dentils below the 27. Substantially prooflike in appearance, to an extent that it is surprising that NGC did not grant this coin the PL designation. Even without the designation, this is an impressive coin, with full luster and light rose-gold toning. Typically struck, with the usual flatness in the obverse stars. This is the easily the highest graded coin of those certified by NGC as JR-4 and probably in the condition census for the variety.
*From The Findley Collection.*(#4504)

### Beautiful JR-6 1827 Dime, MS64

2137 **1827 MS64 NGC.** JR-6, R.2. Beautiful rainbow colors encircle this lustrous piece, which also brings full luster to this visual feast. Traces of prooflikeness are visible through the obverse periphery. Typically struck, with weakness through the stars and a number of the high points. Distracting surface marks are at a minimum.
*From The Findley Collection.*(#4504)

### Delightful Gem JR-13 1827 Dime

2138 **1827 MS65 NGC.** JR-13, R.3. The E in STATES is repunched, characteristic of the scarcer variety. Splashes of golden-brown deny full brilliance, but this lustrous Gem is nearly mark-free and has exemplary eye appeal. The stars are typically brought up, although the remainder of the design is well struck. Census: 23 in 65, 7 finer (11/08).
*From The James Mossman Collection.*(#4504)

### Colorful Near-Gem 1829 Dime JR-12, Medium 10C

2139 **1829 Medium MS64 PCGS. CAC.** JR-12, R.3. A precisely struck and satiny Choice Capped Bust dime. Autumn-gold, apple-green, and steel-gray enriches both sides, which appear pristine aside from faint contact on the portrait. A vertical die crack passes through the 8 in the date. The only other Medium 10C variety is the scarce JR-11. Population: 9 in 64, 10 finer (11/08).(#84511)

### Attractively Toned Near-Gem 1830/29 Dime, JR-4

2140 **1830/29 MS64 NGC.** JR-4, R.2. Sun-gold and olive-green embrace this semi-prooflike near-Gem. Well struck and unblemished with excellent eye appeal. The underdate is subtle, although the ball of a 9 is visible as a bulge from the lower left portion of the loop of the 0. Census: 3 in 64, 4 finer (11/08).
*From The Findley Collection.*(#4519)

### Lovely Gem 1831 Dime, JR-1

2141 **1831 MS65 NGC.** JR-1, R.1. This lustrous Gem appears brilliant upon first glance, but the borders exhibit a hint of olive-gold. The strike is needle-sharp, and the preservation is outstanding despite a slender mark through the B in LIBERTY. Census: 23 in 65, 15 finer (11/08).(#4520)

2142 **1833 MS63 NGC.** JR-5, R.1. The last 3 is higher than the remaining digits, and the last T in STATES is above RI in PLURIBUS. A nice silver-gray Select Mint State piece, with some light charcoal toning near the rims.
*From The Deb-Ann Collection.*(#4522)

### Scarce JR-6 1835 Bust Dime, MS64

2143 **1835 MS64 NGC.** JR-6, R.4. Visually compelling ice-green, rose, and golden toning inhabits the surfaces of this conditionally scarce near-Gem. Population figures for individual varieties are not available from NGC and PCGS, but the relative scarcity of the JR-6 would tend to suggest that no more than two dozen near-Gem examples have been graded, as of (11/08), making this a potentially important opportunity for the specialist.(#4527)

2144 **1836 MS63 NGC.** JR-2, R.2. A razor-sharp and only faintly toned example with unabraded surfaces and satin luster. A spindly die crack nearly bisects the obverse between 1 and 6 o'clock. A desirable early silver type coin. Census: 23 in 63, 40 finer (11/08).(#4528)

## SEATED DIMES

### Exquisite Gem 1837 Seated Dime Large Date, No Stars

2145 **1837 No Stars, Large Date MS65 PCGS. CAC.** Between Fortin-101a and 101b with a die crack near the foot, but no crack through the shield. A splendidly smooth example that possesses delicate honey toning and an impeccable strike. The base of the 7 in the date is lightly repunched. A popular short-lived type, rarely seen in Gem condition. Population: 23 in 65, 6 finer (11/08).
*From The James Mossman Collection.*(#4561)

### Eye-Catching 1837 No Stars Dime, Large Date, MS66

2146 **1837 No Stars, Large Date MS66 NGC.** This coin features an eye-catching combination of heavy luster and russet-gold toning throughout, with only the area within the wreath approaching white. A late and possibly terminal die state, as separate die cracks extend from either side of the date to meet at Liberty's knee. Sharply struck, with seemingly only a few trivial marks on the reverse separating this coin from an even finer grade.
*From The Findley Collection.*(#4561)

### Desirable No Stars, Small Date 1837 Dime, MS65

2147 **1837 No Stars, Small Date MS65 NGC.** Light gold and pink shadings visit the otherwise pale silver-gray surfaces of this marvelous Small Date No Stars dime. The strike is crisp, and the surfaces are pleasingly preserved. A wonderful Gem that would be a credit to almost any type collection. Conditionally rare so fine. (#4562)

### Lovely Large Stars 1838 Dime MS66

2148 **1838 Large Stars MS66 PCGS. CAC.** Fortin-113 with a squiggly die flaw above the M in DIME. Potent luster and moderate olive-gold toning confirm the originality of this pinpoint-sharp Premium Gem. Splendidly preserved, and desirable in such formidable quality. Population: 14 in 66, 2 finer (11/08).
*From The James Mossman Collection.*(#4568)

### Dramatically Toned MS66 ★ 1838 Small Stars Dime

2149 **1838 Small Stars MS66 ★ NGC.** FS-801, Fortin-101a. This very scarce variety is also noteworthy for its reverse die doubling, especially prominent on the D in DIME. Cobalt-blue and autumn-brown bands dominate the borders, but leave a window of brilliance on each side. Well struck and devoid of abrasions. Census: 1 in 66 ★, 1 finer with a Star designation (11/08).(#4569)

## 1838 Partial Drapery Dime, MS63

2150 **1838 Partial Drapery MS63 PCGS.** Brian Greer's *Complete Guide to Liberty Seated Dimes* calls this variety "scarce ... but examples can be cherrypicked with patience. Slightly scarcer than the 1838 Small Stars." The so-called partial drapery is actually the result of die clashing from the E in DIME. This silver-white piece shows a bold strike, but there is a small scrape noted left of the date. Some old clash marks appear in the reverse field. A nice piece for the Select grade.(#4570)

## Beautiful 1838 Partial Drapery Dime, MS64

2151 **1838 Partial Drapery MS64 PCGS.** The partial drapery referred to is a vertical line extending below Liberty's elbow to her leg. In truth this is not an example of drapery; rather, it is the result of a die clash, which is especially notable on the reverse of this coin. Actual drapery would not be added to the design until 1840, along with a number of other substantial hub changes. There is no question about this coin's eye appeal, with full luster and strike only adding to the effect produced by the beautiful golden-brown toning. Some tiny reverse abrasions determine the grade.
*From The Findley Collection.*(#4570)

## Colorful MS65 ★ 1841 Dime

2152 **1841 MS65 ★ NGC. CAC.** Fortin-102. The 1 in the date is lightly repunched. This precisely struck and lustrous Gem is attractively toned in tawny-gold, sky-blue, and ruby tints. As of (11/08), the present piece is the single finest certified 1841 half dime to receive a Star designation from NGC, although a total of six pieces have received higher grades without a Star designation.(#4579)

## Conditionally Rare Gem 1841-O Seated Dime

2153 **1841-O MS65 NGC.** At just a shade over 2 million coins, the 1841-O boasted the highest mintage of any dime issue up to that time, and it remained the second-highest mintage dime until the 1853 With Arrows came around. In grades as high as the current piece, however, this is a difficult coin to find; indeed, with only four pieces certified in any MS65 or higher grade by either major grading service, this coin would have to be considered a member of the Condition Census. Mostly gray in color, this coin has splashes of electric-blue and violet on the upper obverse and near the reverse peripheries. Well struck, with a bare minimum of surface marks. Census: 2 in 65, 1 finer (12/08).(#4580)

## Elusive 1842-O Dime, MS64

2154 **1842-O MS64 PCGS.** Breen-3240. Medium O mintmark. This remarkable near-Gem has luminous gold and iridescent toning over frosty and highly lustrous silver surfaces. It is an outstanding example and elusive in such remarkable preservation. Population: 2 in 64, 1 finer (12/08).(#4582)

2155 **1844 VF20 ANACS.** Evenly worn over both sides, with a bit more detail evident on the reverse. A deep coating of olive-green covers the fields, yielding to lighter salmon and steel-blue toning on the highpoints.(#4585)

2156 **1844 VF20 ANACS.** According to Breen, the "Little Orphan Annie" nickname was assigned to the 1844 Seated dime issue as a sales promotion by "the late Frank C. Ross, hack writer from the Kansas City area." LIBERTY is bold, but several pinscratches are evident higher up on the obverse. Dappled steel-blue, green, and brownish coloration covers both sides.(#4585)

2157 **1844 VF20 ANACS.** Perhaps lightly cleaned, at some point, this piece nevertheless exhibits astonishing clarity of detail on most of the remaining design elements (except for the highpoints ), for the grade. The famous "Little Orphan Annie" dimes remain a favorite among Seated Liberty collectors.(#4585)

2158 **1844 VF20 ANACS.** The surfaces have a muted appearance, with a layer of rather deep steel-blue patina noted across each side. Only the letter "Y" is worn away on LIBERTY.(#4585)

2159 **1844 VF20 ANACS.** Evenly worn across both sides, with the date and all of the legends still showing clearly; including LIBERTY. Tan and cobalt-blue toning adorns the unabraded surfaces. (#4585)

2160 **1844<10C>—Cleaned—ANACS. XF Details, Net VF35.** The smoky green and russet-tan patina presents a dappled appearance in the fields and near the peripheries. The piece is somewhat bright from improper cleaning, but there are no untoward marks on either side. This low mintage (72,500 pieces) issue is a perennial favorite among students of Liberty Seated coinage.(#4585)

### Pursued AU 1844 Seated Dime

2161 **1844 AU50 PCGS.** Walter Breen credits Frank C. Ross, a newspaper writer and coin speculator, with creating the "Little Orphan Annie" nickname for the low mintage 1844 dime. This is a steel-gray example that has peripheral orange-gold and emerald-green toning. Certified in an old green label holder. Population: 4 in 50, 13 finer (12/08).(#4585)

### AU 'Little Orphan Annie' 1844 Dime

2162 **1844 AU50 NGC.** The "Little Orphan Annie" dime, much promoted at one time. Only 72,500 pieces were produced at the Philadelphia Mint in 1844 and survivors are popular in all levels of preservation. This lightly circulated example has attractive golden-brown and lime-green toning. A loupe locates a few faint thin marks. In a former generation holder. Census: 1 in 50, 9 finer (12/08). (#4585)

2163 **1846 VF35 PCGS.** A lightly and evenly worn example of this low-mintage dime. Most of the surfaces are light gray but there is a significant presence of russet toning around the margins. (#4588)

### Eliasberg's MS66 1853 No Arrows Dime

2164 **1853 No Arrows MS66 PCGS. CAC.** Ex: Eliasberg. A fully struck and highly lustrous Premium Gem with dappled slate-gray and jade-green toning. Exceptionally void of marks. The obverse is die clashed, but the reverse is not. A low mintage issue, and the pedigree is unimprovable. Encapsulated in a green label holder. Population: 7 in 66, 8 finer (11/08).
*Ex: Harlan P. Smith Collection; S.H. and Henry Chapman, 5/1906; J.M. Clapp; Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 1146.*
*From The James Mossman Collection.*(#4599)

### Difficult Gem 1853 Arrows Dime

2165 **1853 Arrows MS65 PCGS. CAC.** Faint green-gold toning enriches this lustrous Gem. The strike is precise, with inexactness only on the left wreath ribbon and Liberty's hair. The reverse is nearly pristine, and the obverse is also well preserved. A briefly issued Seated type.
*From The James Mossman Collection.*(#4603)

### Original Gem Arrows 1853 Dime

2166 **1853 Arrows MS65 NGC.** Ex: Ashland City. After Congress passed the Mint Act of February 21, 1853 and the weight was reduced on subsidiary coinage, the Mint geared up for large-scale production of the new, lighter weight coins. About 50 pairs of dies were prepared for use in the Philadelphia Mint alone, and after production for dimes began in April more than 12 million pieces were eventually struck. This is a high-end Gem that has softly frosted mint luster. Just a touch of light golden toning is seen over each side. A lovely, problem-free type coin.(#4603)

## Marvelous 1853 Arrows Dime MS66

2167 **1853 Arrows MS66 PCGS.** Light streaks of tan-gold adorn this thoroughly lustrous and exquisitely preserved Premium Gem. The strike is exemplary save for a few dentils near 12 o'clock on the obverse and 5 o'clock on the reverse. A superior representative of this short-lived type. Population: 38 in 66, 18 finer (11/08).
*From The Findley Collection.*(#4603)

2168 **1853-O Arrows AU58 NGC.** Mottled copper, orange, gray, and sage toning graces the pretty surfaces of this near-Mint State example. As the first weight-reduced O-mint for the Arrows type, this issue is probably underrated in this grade, and indeed few are certified finer. Census: 11 in 58, 6 finer (12/08).
*From The Findley Collection.*(#4604)

## Colorful MS66 Arrows 1855 Dime

2169 **1855 Arrows MS66 NGC.** The light golden-brown fields and devices are surrounded by blushes of ruby-red, electric-blue, and peach. This splendid Premium Gem is delightfully toned. Flashy and mark-free with prooflike fields and an above average strike. Census: 6 in 66, 5 finer (11/08).
*From The Findley Collection.*(#4607)

2170 **1856-O MS62 PCGS.** This important dime remains in a first-generation PCGS holder. Both sides have frosty light silver-gray surfaces with iridescent toning. A scrape near star 13 and on the lower drapery folds accounts for the grade. Population: 5 in 62, 14 finer (11/08).(#4612)

2171 **1856-O MS63 PCGS.** Struck from worn dies and consequently showing incompleteness on the obverse design elements. Satiny and nicely preserved, with milky cream-gray patina that is intermingled with substantial sky-blue color. Population: 2 in 63, 12 finer (11/08). (#4612)

## Rare 1856-S Dime, XF45

2172 **1856-S XF45 NGC.** Breen-3301, with repunching evident on the mintmark. *The Complete Guide to Liberty Seated Dimes* (1992) states that the 1856-S dime is "...very scarce in any grade and rare above VF." Indeed, less than 60 examples, including resubmissions, have been graded by the major services in all grades combined. The surfaces are awash in mauve-blue color, tending to sea green in the reverse peripheries. As expected, light wear is noted on the design high points. Housed in an older NGC holder. Census: 4 in 45, 6 finer (11/08).
*From The Findley Collection.*(#4613)

2173 **1859-O MS64 NGC.** Essentially untoned surfaces exhibit well impressed motifs, along with pleasing luster. Nicely preserved.
*From The Deb-Ann Collection.*(#4620)

## Lovely Premium Gem 1859-O Dime

2174 **1859-O MS66 NGC.** Medium O. Fortin-103. This exactingly struck Premium Gem has vibrant luster and exemplary preservation. Delicate gold toning denies full brilliance. Clashmarks surround the denomination, but the fields are remarkably undisturbed by contact. Census: 13 in 66, 4 finer (11/08).(#4620)

## Rare AU Details 1860-O Dime

2175 **1860-O—Damaged—ICG. AU50 Details.** The obverse appears unimpaired, but the reverse field beneath DIME is sunken, the result of a repair and subsequent smoothing. Toned dove-gray and olive-green. Only 40,000 pieces were struck, and survivors are rare in all grades. 1860 was the first year of the Legend Obverse type, but New Orleans did not strike dimes again until 1891, the last year of the type.
*From The Findley Collection.*(#4632)

## Elusive VF 1871-CC Dime

2176 **1871-CC VF20 PCGS.** Deep steel-blue, sea-green, and golden-brown enriches this rare Carson City dime. LIBERTY is bold, and the few minor marks are limited to the upper reverse. From the first year of dime production at the legendary Western facility, and only 20,100 pieces were coined. Population: 1 in 20, 14 finer (11/08).
*From The Findley Collection.*(#4654)

## Very Fine 1873-CC Arrows Dime

2177 **1873-CC Arrows VF20 NGC.** An important survivor from an original mintage of just 18,791 pieces, most of which have been lost to circulation. This coin is moderately toned in speckled charcoal-gray shades over the obverse. Well defined over all features with some minor field roughness on the obverse. The diagnostic reverse die crack (as struck) through the CC mintmark is discernible under a loupe. After the 1874-CC Arrows and the first year 1871-CC, the 1873-CC Arrows is the rarest collectible Seated dime produced at the Carson City Mint. Census: 4 in 20, 9 finer (11/08).
*Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5673.*(#4666)

## Rare VF25 1873-CC Arrows Dime

2178 **1873-CC Arrows VF25 ANACS.** A formidable Carson City rarity. Most survivors from the mintage of 18,791 pieces are impaired and in lowly circulated grades. This example is blue-gray and tan. LIBERTY is sharp, and some cereal grains are visible. The seated Liberty has a couple of noticeable marks on the legs and shield. Struck from a misaligned obverse die, since the reverse is normal while the obverse has a wide rim at 5 o'clock and a narrow rim at 11 o'clock.(#4666)

## Worthy Gem 1874 Arrows Dime

2179 **1874 Arrows MS65 PCGS. CAC.** Aquamarine borders frame sun-gold fields and devices. This lustrous and powerfully struck Gem has impressively smooth surfaces. The Arrows type was coined for only two years, and signified a minor change in weight to correspond to the Metric Standard. Housed in a green label holder. Population: 24 in 65, 25 finer (11/08).
*From The James Mossman Collection.*(#4668)

## Impressive 1874-S Arrows Dime, MS66

2180 **1874-S Arrows MS66 NGC.** Greer 101, Micro S, the more common of the two mintmark varieties of the year. This is a later die state with the mintmark resembling a blob (or perhaps a late 1970s S mintmark). Impressively lustrous under light golden-brown color, with a bare minimum of notable surface contact. Decently, if not quite fully struck, with some weakness visible on the left arrow and wreath end.
*From The Findley Collection.*(#4670)

2181 **1875-CC Mintmark Above Bow MS64 PCGS.** A splendid and original Choice Mint State example from the Carson City Mint, with frosty luster and splendid iridescent toning. The obverse die is peripherally shattered with several die cracks through the date and legend.(#4673)

2182 **1877 MS66 PCGS. CAC.** An older green-label holder houses this Premium Gem, a lovely piece that has fully mirrored fields and lustrous devices beneath outstanding gold and iridescent obverse toning, and deep blue and iridescent reverse toning. Population: 9 in 66, 4 finer (11/08).(#4682)

2183 **1877-CC MS65 PCGS.** Type Two Reverse. This is an attractive Gem with sharply struck design features and natural champagne-gray toning. The unblemished surfaces are pleasingly lustrous and show just a smattering of flyspecks on each side. Population: 45 in 65, 26 finer (11/08).(#4683)

### Gorgeous Superb Gem 1880 Dime

2184 **1880 MS67 PCGS. CAC.** Dazzling luster and light golden-brown toning endow this pinpoint-sharp Superb Gem. Even a loupe fails to locate more than negligible contact. Only 36,000 business strike dimes were coined in 1880, undoubtedly due to ceaseless production of silver dollars at the four mints. Certified in a green label holder. Population: 12 in 67, 0 finer (11/08).
*From The James Mossman Collection.*(#4688)

### Important Choice AU 1885-S Dime

2185 **1885-S AU55 PCGS.** The key date among S-mint Seated dimes, seldom seen in so fine a grade, and rare in Mint State. A well-struck silver-gold piece with glints of russet near the rims, and excellent luster radiating forth. Unabraded and attractive. Population: 5 in 55, 10 finer (11/08).
*Ex: Stack's 71st Anniversary Sale (10/2006), lot 2683; Central States Signature (Heritage, 5/2007), lot 331, which realized $4,312.50.* (#4695)

### Brilliant Superb Gem 1887 Dime

2186 **1887 MS67 NGC.** A brilliant Superb Gem that has dazzling luster and outstanding eye appeal. Precisely struck and unabraded with Mint-made clashmarks near the raised elbow, lowered hand, and denomination. Both services combined have graded only five examples at the MS67 level, with only two finer (11/08).
*Ex: Central States Signature (Heritage, 4/2006), lot 1248, which realized $2,587.50.*(#4698)

2187 **1891 MS66 PCGS.** Rose, orange, and peach patina rings the silver-gray centers of this well struck and strongly lustrous Premium Gem. The 1891 issues marked the end of the Seated Liberty design, soon to be replaced by Charles Barber's creations. Population: 48 in 66, 6 finer (11/08).(#4706)

## PROOF SEATED DIMES

### Lushly Toned Gem Proof 1858 Dime

2188 **1858 PR65 NGC.** Dappled cobalt-blue, golden-brown, olive, and purple-red toning adorns the obverse. The reverse displays electric-blue and steel-gray patina. Sharply struck with reflective fields and well preserved surfaces overall, as expected for a Gem. The mintage figure for this issue is unknown, but the rarity of high grade survivors is certain. Census: 14 in 65, 12 finer (11/08).
*Ex: Long Beach Signature (Heritage, 2/2006), lot 765, which realized $3,450.*(#4747)

2189 **1868 PR65 PCGS.** A low mintage proof with only 600 pieces struck. The bright, reflective fields enhance the rich teal, golden, and charcoal-gray toning seen on each side.(#4761)

### Impressive 1869 Dime, PR66 Cameo

2190 **1869 PR66 Cameo NGC.** This amazing proof dime is tied with eight others for the finest that NGC has certified with cameo contrast, although there are seven others that are graded PR67 without such a designation. Mostly brilliant white surfaces have a touch of pale lilac on the reverse. The contrast is outstanding and is borderline Ultra Cameo.(#84762)

2191 **1870 PR65 PCGS.** Only 1,000 proofs were struck of the 1870 dime and just a few dozen are known today in Gem or better condition. This is an especially attractive example that shows deep blue toning on the obverse paired with nearly brilliant and pale rose color on the reverse. Population: 21 in 65, 6 finer (12/08).(#4763)

2192 **1871 PR65 Cameo NGC.** Rose and cinnamon accents grace both sides of this pretty Gem proof, with nice eye appeal and good field-device contrast. There is a small unstruck area on the reverse, as made, on the upper right inside wreath. Census: 7 in 65 Cameo, 5 finer (12/08).(#84764)

2193 **1873 No Arrows PR65 Cameo NGC.** Closed 3. An enticing Gem specimen from an issue of 1,100 pieces. This faintly hazy example sports strong contrast and the Closed 3 logotype, like all No Arrows proofs for the year. Census: 2 in 65 Cameo, 6 finer (12/08). (#84766)

## Delightful 1873 Arrows Dime, PR65

2194 **1873 Arrows PR65 NGC.** Colorful and captivating, a delightful Gem of an 1873 Arrows dime proof. The crisply detailed devices and powerful mirrors are carefully preserved beneath rich violet, blue-green, and rose patina. A great representative of this short-lived subtype. Census: 14 in 65, 11 finer (12/08).(#4769)

## Stunning 1875 Ten Cent PR66 Ultra Cameo

2195 **1875 PR66 Ultra Cameo NGC.** The field-device contrast is absolutely amazing, with stunning white devices and deeply mirrored fields. A few tiny ticks prevent a Superb Gem grade. Both sides have subtle champagne accents to enhance its overall eye appeal. Census: 1 in 66 Ultra Cameo, 0 finer (12/08).(#94772)

2196 **1879 PR64 Cameo PCGS. CAC.** Sharply struck with tremendous, watery reflectivity in the fields. Impressive cameo contrast is noteworthy on both sides. From an original mintage of just 1,100 pieces, and conditionally scarce with the Cameo designation. Population: 16 in 64 Cameo, 16 finer (11/08).(#84776)

## Toned Superb Gem Proof 1880 Dime

2197 **1880 PR67 NGC.** Dense shades of gold, rose, purple, and electric-blue adorn the impressively preserved surfaces of this Superb Gem. Crisply struck with the expected sharpness of a proof. The business strikes of this date are scarce, which increases the degree of market pressure on proof examples. Census: 11 in 67, 6 finer (12/08). (#4777)

2198 **1882 PR66 Cameo NGC.** The gleaming mirrors are essentially untoned, and the moderately frosted, boldly impressed devices supply noteworthy contrast. Carefully preserved with only a few tiny planchet flaws on either side of Liberty. Census: 15 in 66 Cameo, 16 finer (12/08).(#84779)

2199 **1884 PR66 PCGS.** Bright surfaces reveal a few speckles of milky and olive color. The prooflike fields establish good contrast with the well struck and frosty design elements. There are no marks worthy of mention. Population: 31 in 66, 15 finer (11/08).(#4781)

2200 **1885 PR65 Cameo NGC.** Satin-like cameo devices and deeply reflective mirrored fields create a stunning visual effect. The surfaces of this Gem proof example are fully brilliant. Just 930 proof examples of this issue were struck, and few remain as nice as this specimen. (#84782)

2201 **1888 PR66 PCGS.** Faint tan-gray freckles race over both sides of this fairly well struck, nicely preserved Premium Gem proof. Lightly frosted devices stand out against the mirrored fields. Population: 13 in 66, 4 finer (12/08).(#4785)

2202 **1888 PR66 NGC.** Exquisitely detailed and gleaming. The minimally toned mirrors are powerful, and the devices are lightly frosted, though the two factors do not combine for substantial contrast. Census: 24 in 66, 7 finer (12/08).(#4785)

## Silver-White 1888 Dime, PR67 Cameo

2203 **1888 PR67 Cameo NGC.** This is a wonderful silver-white Superb Gem Cameo example of this date, one seldom seen in so fine a condition as the present coin. There is a tiny planchet lamination in the left obverse field that appears under a loupe, but contact marks are virtually absent, and the field-device contrast verges on an Ultra Cameo designation. Census: 8 in 67 Cameo, 0 finer (12/08). (#84785)

## Charming PR67 Cameo 1888 Dime

2204 **1888 PR67 Cameo NGC. CAC.** Splashes of aquamarine and cherry-wine endow this impressively mirrored and immaculate Superb Gem. A good strike with minor inexactness on the upper cereal grains and the knot of the wreath ribbon. A mere 832 proofs were struck. Census: 8 in 67 Cameo, 0 finer (11/08). (#84785)

### Patinated PR66 1890 Dime

2205 **1890 PR66 NGC.** Ocean-blue dominates the fields and devices, while the peripheries are lighter olive-gold. A loupe fails to locate hairlines or carbon. A flashy and crisply struck specimen, one of only 590 proofs released. Encased in a former generation holder. Census: 21 in 66, 12 finer (11/08).(#4787)

## BARBER DIMES

### Peripherally Toned 1893 Dime MS66

2206 **1893 MS66 PCGS. CAC.** The untoned obverse fields and devices are framed by rich peripheral golden-brown toning. The reverse is autumn-gold with blushes of powder-blue and lilac across the border. A meticulously struck Premium Gem with immaculate fields and only faint grazes on the portrait. Population: 32 in 66, 2 finer (11/08). *Ex: Central States Signature (Heritage, 5/2005), lot 6598.* (#4800)

### Colorful Prooflike MS66 1894 Dime

2207 **1894 MS66 Prooflike NGC.** The reverse field is remarkably reflective, especially since that side is richly toned in aquamarine and cherry-wine. The lightly patinated golden-brown obverse has satin cartwheel sheen. Exactingly struck and beautifully preserved. A lower mintage Philly issue. Census: 1 in 66 Prooflike, 1 finer as Prooflike (12/08).(#4803)

### Important 1895 Barber Dime, MS66

2208 **1895 MS66 PCGS.** Aside from the extremely rare 1894-S, there are many other rare dates in the Barber dime series. Among them is the 1895, from a mintage that was limited to 690,000 coins. This amazing Premium Gem has exquisite surfaces with frosty luster on the devices, and satiny luster in the fields, creating mild cameo contrast on both sides. The devices are mostly medium tan, with vivid sea-green and gold toning at the peripheries. All of the design elements are boldly detailed. A remarkable piece, deserving a place in the cabinet of the true connoisseur. Population: 10 in 66, 2 finer (12/08).(#4806)

### Exceptional 1896-O Barber Dime, MS64

2209 **1896-O MS64 PCGS.** This boldly defined near-Gem has exquisite gold, lilac, steel, and iridescent toning on both sides with sharp design features and frosty luster. The 1896-O is one of the important low-mintage dates in the Barber dime series, seldom found in higher Mint State grades. Population: 17 in 64, 13 finer (12/08). (#4810)

2210 **1897-O MS64 PCGS.** A key-date Barber dime with a mintage of 666,000 pieces, the 1897-O is popular in all grades, even though the spread between Good and Mint State is surprisingly small. The obverse is silvery and brilliant, while the reverse boasts tinges of golden-brown near the rims. This piece shows some roller marks on Liberty's cheek from the small unstruck area present there, but otherwise there are no singular distractions.(#4813)

## Impressive 1897-S Dime, MS65

2211 **1897-S MS65 PCGS.** This is a lustrous, mostly lavender-gold coin, with an impressive array of sunset color peeking out from the peripheries. The strike is exacting, and all details are sharp. A search through a glass fails to turn up any significant abrasions, although two or three spindly die cracks (as struck) are evident in the peripheries. Tough to find this nice, as most mint state pieces are in the MS63-64 range. Population: 8 in 65, 6 finer (11/08).
*From The Findley Collection.*(#4814)

## Wonderful Superb Gem 1898 Dime

2212 **1898 MS67 PCGS. CAC.** This needle-sharp Superb Gem has booming luster and magnificently undisturbed surfaces. A hint of honey toning prevents full brilliance. An outstanding Barber dime, ideal for the finest quality 19th century silver type set. Population: 4 in 67, 0 finer (11/08).
*From The James Mossman Collection.*(#4815)

## Elusive 1899-O Barber Dime, MS64

2213 **1899-O MS64 PCGS.** Golden-brown and forest-green shades embrace the borders, while the lighter centers are pearl-gray. This pinpoint-sharp near-Gem has satiny luster and an unperturbed appearance. The mintage of 2.65 million pieces appears plentiful, but Mint State survivors of this popular O-mint are quite scarce. Population: 8 in 64, 12 finer (12/08).(#4819)

## Conditionally Scarce 1902-S Barber Dime, MS66

2214 **1902-S MS66 PCGS.** Terrific luster and variegated, mottled green and russet patina are hallmarks of this flashy Premium Gem. Generally well struck, save for portions of the lower reverse wreath. Minimally marked on both sides. An appealing, conditionally scarce example of this early 20th-century Barber dime. Population: 10 in 66, 1 finer (11/08).
*From The Findley Collection.*(#4829)

## Elusive Choice 1904-S Dime

2215 **1904-S MS64 PCGS.** Most specialists will agree that this issue is among the most elusive of all collectible Barber dimes. Just 800,000 of these were produced in San Francisco. High quality survivors are seldom encountered. In fact, the (11/08) PCGS population data indicates only 15 finer Gem quality examples have been certified by that service. A lightly toned and sharply struck example that displays satin luster. A few tiny ticks on each side limit the grade, preventing a Gem designation for this desirable numismatic property.
*Ex: Atlanta ANA Signature (Heritage, 4/2006), lot 437, which realized $3,220.*(#4834)

## Conditionally Scarce Gem 1907-D Barber Dime

2216 **1907-D MS65 NGC.** The '07-D is a much scarcer issue than its mintage of more than 4 million pieces would indicate. Only 12 examples have been certified as Gems by NGC, with another 10 in higher grades (11/08). Brilliant and sharply struck with frosty, untoned surfaces. A carefully preserved coin with exceptionally clean surfaces.(#4843)

### Lustrous Gem 1909-S Dime

2217 **1909-S MS65 NGC.** The 1909-S has a mintage of exactly 1 million pieces, and this lower production explains its rarity in Mint State. None are known above MS66. Lustrous and intricately struck with immaculate fields and only inconspicuous contact on the portrait. Census: 9 in 65, 3 finer (11/08).
*From The James Mossman Collection.*(#4853)

## PROOF BARBER DIMES

### Dazzling 1894 Dime, PR67

2218 **1894 PR67 NGC.** Fully white and brilliant with faint contrast between the chalky devices and lightly mirrored fields. The struck details are razor-sharp. A pinpoint blemish on Liberty's cheek appears to be all that separates this dazzling proof Barber from an even finer grade. Census: 26 in 67, 9 finer (11/08).(#4878)

### Attractively Toned 1897 Dime, PR67

2219 **1897 PR67 PCGS.** Medium intensity multicolored toning bathes both sides of this Superb Gem proof. An exacting strike brings out virtually full definition on the design elements. Both sides are impeccably preserved. Housed in a green-label holder. Population: 16 in 67, 3 finer (12/08).(#4881)

2220 **1897 PR66 Cameo NGC.** Blatant white on black contrast confirms the Cameo designation. Intricately struck and unabraded with glimpses of milk-white toning on the obverse field. Census: 18 in 66 Cameo, 21 finer (11/08).(#84881)

### Richly Toned PR67 ★ 1900 Dime

2221 **1900 PR67 ★ NGC.** Out of 205 proof 1900 dimes graded by NGC, the two pieces have received the Star designation (11/08). The luminous surfaces are undisturbed beneath dusky, elegant patina that contains green-gold, orange, rose, and aqua shadings. Sharply struck and delightful. Just 912 proofs were issued.(#4884)

### Vibrantly Toned PR67 1901 Dime

2222 **1901 PR67 NGC.** Lushly patinated in ocean-blue, orange-gold, and rose-red. A razor-sharp Superb Gem with undisturbed fields and devices. A marvelous representative that will surely soon grace the cabinet of the toned silver connoisseur. Only 813 proofs were struck. Census: 14 in 67, 2 finer (12/08).(#4885)

### 1905 Dime, PR66 Cameo

2223 **1905 PR66 Cameo NGC. CAC.** The contrast is excellent for this silver-white 20th century proof Barber issue. The intricately struck devices and gleaming, minimally toned fields are beautifully preserved. A nice Premium Gem Cameo proof for those who prefer their coins untoned. Census: 4 in 66 Cameo, 8 finer (12/08). (#84889)

2224 **1906 PR65 PCGS.** A radiant Gem proof with fully mirrored fields beneath beautiful gold and iridescent toning that is deeper on the reverse. Population: 24 in 65, 30 finer (11/08).(#4890)

### Bold 1908 PR66 Cameo Dime

2225 **1908 PR66 Cameo NGC.** A boldly impressed specimen that offers distinct contrast between the chromelike silver-white mirrors and the mildly frosted, pleasing central devices. Carefully preserved and attractive for this issue, which comes more often with brilliant surfaces than the cameo effect shown here. Census: 1 in 66 Cameo, 4 finer (12/08).(#84892)

### 1909 Barber Dime, PR67 ★ Cameo

2226 **1909 PR67 ★ Cameo NGC.** A brilliant Superb Gem with radiant devices and darkly mirrored fields. The cameo contrast is outstanding for this date. Nearly perfect aside from a tiny spot in the field near the nose. Only surpassed at NGC by two pieces certified as PR68 ★ Cameo.(#84893)

## MERCURY DIMES

2227 **1916-D VG10 PCGS. CAC.** A lightly toned, remarkably clean example of this key date. Well defined for the grade. A truly choice piece.(#4906)

2228 **1916-D—Cleaned—ANACS. VF20 Details.** Evenly worn over the high points, the surfaces show much brightness still from the cleaning but the peripheral areas show significant gray-lilac toning. An affordable example of this key with better details than one would expect.(#4906)

### VF Sharpness 1916-D Mercury Dime

2229 **1916-D—Improperly Cleaned—NCS. VF Details.** Both sides have the somewhat flat, lifeless luster of cleaned silver, more obvious on the reverse which shows just a crescent of gold along the rim. On the obverse the top half has begun to retone more attractively, with tinges of cinnamon and lilac complementing the gold. In terms of wear much pleasing detail remains, with nearly complete vertical fasces and diagonals on the reverse.(#4906)

2230 **1919-D MS65 PCGS.** Light golden-gray patina visits lustrous surfaces that have been well cared for. Well struck, save for softness on the lower middle fasces. Population: 17 in 65, 4 finer (12/08). (#4924)

2231 **1919-D MS65 NGC.** Deep rose and orange patina covers most of each side, while the reverse adds elements of forest-green and jade. Well-defined overall with a degree of separation on the bands. Census: 23 in 65, 5 finer (8/08).
*From The Calvin Collection.*(#4924)

### Sharply Struck 1920-D Dime MS65 Full Bands

2232 **1920-D MS65 Full Bands PCGS.** Mauve patination dominates the obverse of this Gem, but cedes to yellow-green and soft violet on the reverse. The design features are well brought up, culminating in Full Bands. The diagonal bands are also bold. Lustrous surfaces reveal a few grade-consistent reverse marks. Population: 43 in 65 Full Bands, 18 finer (12/08).(#4931)

2233 **1920-S MS64 Full Bands PCGS.** A lightly abraded example of this scarce early Mercury dime. The surfaces are bright and highly lustrous with a few dashes of light color. Fully defined in all areas. (#4933)

### Sharp 1921 Gem Full Bands Dime

2234 **1921 MS65 Full Bands PCGS.** Ex: Jay Eisenberg. Well struck, save for minor weakness on the tops of the upper reverse letters. This is a wonderfully preserved example of this key Mercury Dime issue. Only 1.23 million pieces were struck, with AU and better coins at a premium, and seldom encountered except in major auctions. Soft, frosted mint luster characterizes this lightly toned specimen. Close inspection with a magnifier shows that there are virtually no post-striking impairments on either side. Population: 59 in 65 Full Bands, 40 finer (11/08).
*From The Calvin Collection.*(#4935)

## White Full Bands Gem 1921 Dime

2235 **1921 MS65 Full Bands NGC.** This brilliant and fully lustrous Dime is virtually unabraded and provides outstanding eye appeal. The left border has a wire rim on both sides, evidence of the intricate strike. The dies are noticeably rotated clockwise. The low mintage 1921 and 1921-D Dimes are semi-keys to the series, since the mints were busy striking silver dollars to fulfill the Pittman Act. Census: 56 in 65 Full Bands, 24 finer (11/08).
*From The Plymouth Collection.*(#4935)

2236 **1921-D MS62 NGC.** Faint gold toning visits this lustrous and low mintage semi-key dime. A hidden mark on the wing is all that limits the grade. Although not fully split, the central bands approach that status, with one small 'bridge' present.(#4936)

## Appealing 1921-D Dime, MS66 PCGS

2237 **1921-D MS66 PCGS.** It is an ironic compliment to this issue's popularity that it is one of the few Mercury dime issues targeted by those who fraudulently alter coins. Fortunately for collectors and dealers, the style of digits in the date is different on the 1921-D than on either the 1931-D or 1941-D.

There is nothing questionable about this carefully preserved Premium Gem's eye appeal. The luster is strong and the golden-brown patina at the lower obverse and upper reverse adds a delightful affect. The fasces are soft on the reverse, but this is a trifling criticism. Population: 10 in 66, 0 finer (12/08).(#4936)

## Conditionally Scarce 1921-D Mercury Dime, MS65 Full Bands

2238 **1921-D MS65 Full Bands PCGS.** Bright and untoned, with an lovely satin sheen that encompasses both sides. This Gem is well struck and evinces full separation of the central reverse bands, as well as crisp definition on the diagonal bands. A scarce, low mintage issue that is highly appreciated by collectors. Population: 54 in 65 Full Bands, 15 finer (12/08).(#4937)

## Brilliant 1921-D Dime, MS66 Full Bands

2239 **1921-D MS66 Full Bands NGC.** The 1921 Mercury dimes, from Philadelphia and Denver, are the key issues next to the 1916-D and overdate dimes. Both are low-mintage issues, the 1921 with a mintage of 1,230,000 and the 1921-D with an even smaller production of just 1,080,000 coins. Few have survived in higher grades, especially with bold details like this example. It is fully brilliant with highly lustrous, satiny silver surfaces. Both sides are entirely untoned with pristine, unblemished surfaces. Census: 12 in 66 Full Bands, 2 finer (12/08).
*From The Plymouth Collection.*(#4937)

2240 **1924-D MS66 Full Bands PCGS.** Speckled aqua-marine and lavender shadings grace this magnificent Full Bands dime. Strongly lustrous with bold eye appeal. Population: 35 in 66 Full Bands, 9 finer (7/08).
*From The Calvin Collection.*(#4945)

## Impressive 1924-S Mercury Dime MS64 Full Bands

2241 **1924-S MS64 Full Bands PCGS.** The coinage of San Francisco Mercury dimes in 1924 was a slipshod affair. Fully struck, Full Bands specimens are seldom encountered, making the present offering an important opportunity. The surfaces are enhanced by wisps of gold and lilac toning, and the sharply struck devices exhibit crisp detail.
*From The Findley Collection.*(#4947)

2242 **1926-D MS65 Full Bands PCGS.** Splashes of purple and sky-blue toning visit the lustrous surfaces of this D-mint Gem. A few light grade-consistent marks do not disturb. Exquisitely struck, culminating in Full Bands. Population: 72 in 65 Full Bands, 20 finer (12/08).(#4957)

## Gem Full Bands 1926-S Dime

2243 **1926-S MS65 Full Bands PCGS.** This brilliant, lustrous, and penetratingly struck Gem has exemplary preservation and outstanding eye appeal. A halo of prooflike surface outlines the portrait. An exceptional example of this low mintage issue. Certified in a green label holder. Population: 20 in 65 Full Bands, 16 finer (11/08).(#4959)

2244 **1928-S MS65 Full Bands PCGS.** Large S. This beautiful Gem has dazzling luster and is essentially immaculate. Pale gold freckles confirm the originality. Well struck, particularly throughout the centers. Population: 59 in 65 Full Bands, 35 finer (11/08). (#4971)

## Lustrous 1928-S Dime MS66 Full Bands

2245 **1928-S MS66 Full Bands PCGS.** Champagne-gold patina is joined by wisps of violet blue on the obverse. Highly lustrous surfaces exhibit sharply struck design features, culminating in Full Bands. A few unobtrusive, grade-consistent marks do not disturb. Population: 28 in 66 Full Bands, 7 finer (11/08).
*From The Calvin Collection.*(#4971)

## Vibrant Gem Full Bands 1931-S Dime

2246 **1931-S MS65 Full Bands PCGS.** This beautiful Gem features pastel lilac and olive-green toning. Lustrous and well preserved with a sharp strike and an especially smooth obverse. The low mintage 1931-S proved to be the last dime issue struck at San Francisco prior to 1935. No mints at all struck dimes in 1932 or 1933, undoubtedly due to the Great Depression. Population: 49 in 65 Full Bands, 41 finer (11/08).
*From The Calvin Collection.*(#4987)

## Radiant 1939-S Dime MS67 Full Bands

2247 **1939-S MS67 Full Bands PCGS.** Ex: Dan Miller. Whispers of barely discernible gold and violet visit the reverse of this Superb Gem. A well executed strike imparts strong definition throughout, including the diagonal bands. This is a lovely, impeccably preserved, radiantly lustrous Full Bands specimen. Population: 29 in 67 Full Bands, 1 finer (11/08).(#5021)

2248 **1942/1-D AU55 Full Bands PCGS.** FS-101, formerly FS-010.8. Near-brilliant surfaces exhibit just a touch or two of light gold. Aside from the Full middle bands, the diagonal ones are also sharp. Some minor circulation marks do not detract.(#5041)

## Important 1942/1-D Dime, MS64 Full Bands

2249 **1942/1-D MS64 Full Bands PCGS.** We can see no reason why this coin should not be in a Gem holder. There are no distracting abrasions, and the strike is razor-sharp even at the borders. The all-important central cross bands are fully split and well rounded from end to end. Both sides are nearly untoned, save for some tinges of copper-gold near the obverse rim. The 1942/1-D is a rare issue at all Mint State levels. By the time this variety was widely recognized, most examples had entered circulation and received considerable wear. A near-Gem, therefore, represents an important bidding opportunity for the specialist, and the presence of Full Bands definition only enhances this coin's desirability. Population: 34 in 64 Full Bands, 28 finer (12/08).(#5041)

### Elusive 1945 Mercury Dime, MS64 Full Bands

2250 **1945 MS64 Full Bands PCGS.** This rare Full Bands 1945 piece is a delicate mélange of saffron, ice-blue, and lilac on both sides, with satiny, appealing luster throughout. The 1945 Mercury dime is an unexpected but elusive rarity in certified Full Bands. Here the bands are split all the way across, although a tiny abrasion interrupts the demarcation at one point. An attractive example for a Full Bands complete set.(#5057)

## PROOF MERCURY DIMES

2251 **1936 PR65 PCGS.** A decisively struck Gem specimen from the initial proof Mercury dime issue, impressively mirrored beneath subtle gold-gray patina. Strong eye appeal.
*From The Plymouth Collection.*(#5071)

### Scarce PR66 1936 Mercury Dime

2252 **1936 PR66 PCGS.** First year of the renewed proof coinage after a 20-year hiatus. A number of non-collectors ended up with all 1936 proofs and as a result many were cleaned or otherwise impaired. This is a bright, sparkling example that displays deeply mirrored fields. A few darker specks are present on each side (evident only with a loupe), this being the only color seen on the coin.(#5071)

### Stunning 1936 Mercury Dime, PR67

2253 **1936 PR67 NGC.** The 1936 proof Mercury dime issue consisted of just 4,130 pieces. This is a truly exceptional specimen that should admirably serve the needs of even the most demanding collector. Fully struck and impeccably preserved, with light frost on the devices and substantial reflectivity in the fields. The piece is also entirely free of toning. Census: 80 in 67, 2 finer (12/08).(#5071)

### Brilliant PR68 1937 Mercury Dime

2254 **1937 PR68 NGC.** This silver-white Superb Gem is almost completely devoid of contrast, as was the norm for proofs of the era, but its extreme brilliance and immaculate surfaces place it into a small minority of survivors. Among the finest pieces certified at each service (12/08).(#5072)

### Superlative 1938 Mercury Dime, PR68

2255 **1938 PR68 PCGS.** This amazing Superb Gem proof has fully mirrored surfaces and sharply detailed devices beneath a faint coating of light gold toning. Of the countless proof 1938 dimes that have been certified, NGC and PCGS have combined to grade just 39 examples as PR68 and only one piece in PR69 (12/08). (#5073)

### Gorgeous 1939 Mercury Dime, PR68

2256 **1939 PR68 PCGS.** Although by 1939 proof mintages had increased considerably over 1936 levels, in PR68, the grade of the present piece, there are precious few to distribute between date collectors, type proof coin collectors, and Registry Set collectors. This splendid piece is fully brilliant on both sides, with the expected absence of distractions. Population: 31 in 68, 0 finer (12/08).(#5074)

2257 **1941 PR68 NGC.** Subtle sky-blue color emerges upon close scrutiny, but this razor-sharp Superb Gem appears fully brilliant at first glance. Essentially perfect, and worthy of a top echelon Registry Set. The dies are moderately rotated clockwise. Census: 50 in 68, 0 finer (12/08).(#5076)

2258 **1941 PR68 NGC.** A stellar Superb Gem Proof that boasts iridescent peripheral rainbow-like toning on the obverse with brighter orange-gold and yellow toning on the reverse. Crisply struck throughout. As nice as this date ever comes, with none seen finer by either grading service. Census: 50 in 68, 0 finer (12/08).(#5076)

### Stunning 1942 Dime, PR68

2259 **1942 PR68 NGC. CAC.** The untoned reverse of this Superb Gem proof dime cedes to reddish-gold and mint-green peripheral toning on the obverse. An exacting strike leaves complete delineation on the design elements. Both sides are immaculately preserved, befitting the designated numerical grade.(#5077)

## PROOF ROOSEVELT DIMES

### Rare 1970 'No S' Roosevelt Dime, PR69 Cameo Tied for Finest-Certified

2260 **1970 No S PR69 Cameo NGC.** Collectors first reported the discovery of this mint error on January 6, 1971. Just shy of two months later, mint officials admitted that 2,200 1970 No S proof dimes had been produced from a single set of dies. As had happened two years prior with the No S 1968 proof dime, a mint worker neglected to punch a mintmark into the die. The die scratch beneath the right upright of the N in UNITED is diagnostic. This coin looks as fresh as the day it was struck 36 years ago. The fields go absolutely "black" when angled beneath a light, and the devices are nicely frosted—the combination of both providing a stark cameo contrast on each side. Census: 10 in 69 Cameo, 0 finer (11/08). (#85248)

### Amazing 1970 No S Dime, PR69 Cameo

2261 **1970 No S PR69 Cameo NGC.** When the San Francisco Mint began striking proof coins in 1968, a new type of variety was introduced that was never previously possible. Proof coins struck from dies without the S mintmark occurred periodically, beginning in the very first year with the 1968 No S dime. Similar varieties of dimes were produced in 1970, 1975, and 1983. This 1970 No S dime is an amazing example with excellent cameo contrast and pristine surfaces. It is tied for the finest that either NGC or PCGS have ever certified. Census: 10 in 69 Cameo, 0 finer (12/08).(#85248)

2262 **1983 No S PR69 Ultra Cameo NGC.** A five coin 1983 proof set with the No S dime is housed in a single five coin NGC proof set holder, with the cent graded PR68 Red Ultra Cameo, the nickel PR69 Ultra Cameo, **the No S dime PR69 Ultra Cameo,** the quarter PR68 Ultra Cameo, and the half dollar PR69 Ultra Cameo.(Total: 5 coins)(#95265)

## TWENTY CENT PIECES

2263 **1875-CC AU50 NGC.** A pleasing medium gray example with traces of underlying luster on each side. Subtle hints of gold toning are evident, especially near the borders.(#5297)

2264 **1875-S MS62 PCGS.** Ex: Larry Wyatt. MPD-003. The top of a misplaced digit lurks within the denticles beneath the 8 in the date. Suitably struck and minimally abraded with ample luster. (#5298)

### Colorfully Toned Select 1875-S/S Twenty Cent, FS-302

2265 **1875-S MS63 NGC.** FS-302, MPD-001. The mintmark is nicely repunched (the so-called dollar sign variety) and the top of a 5 or 7 is misplaced in the dentils beneath the 7. Lemon, apricot, and gunmetal-blue embrace this lustrous and meticulously struck 19th century silver type coin.(#5298)

### Pleasing 1875-S Twenty Cent Piece, MS63

2266 **1875-S MS63 NGC.** Both sides of this pleasing twenty-cent piece have light gold toning with excellent luster. The strike is somewhat soft, as often seen on these pieces, especially at the top of the left (facing) wing. As the most common date in the short-lived series, the 1875-S is often chosen by type collectors.(#5298)

2267 **1875-S MS64 NGC.** The pretty silver-gold satiny surfaces on this near-Gem are relatively unabraded and distraction-free. The strike is generally sharp save for minor softness on the S mintmark, and there are only a couple of tiny dark toning spots that perhaps preclude an even finer grade. A good candidate for a type set.(#5298)

### Dazzling Gem 1875-S Twenty Cent Piece

2268 **1875-S MS65 NGC.** MPD-003. Wisps of gold toning visit the borders of this lustrous and exceptionally preserved Gem. A good strike with some blending seen on the upper stars and the central chest feathers. A majority of 1875-S twenty cent pieces have a misplaced date, and several varieties are known. The best reference for this mint error category is the Kevin Flynn treatise, *Two Dates are Better Than One.*
*From The James Mossman Collection.*(#5298)

### Blundered 1875-S Twenty Cent, MS65

2269 **1875-S/S MS65 NGC.** FS-302. Repunched Date and Doubled Mintmark. The obverse has a repunched date with the top of a 7 clearly visible in the denticles below the 7 in the date. The reverse has a doubled mintmark, sometimes called the "$" variety. This wonderful Gem is fully lustrous with a wisp of gold toning over frosty surfaces.(#5298)

### Wonderful 1875-S Gem Twenty Cent

2270 **1875-S MS65 NGC.** MPD-003. The top of an 8 is misplaced within the denticles beneath the 8 in the date. This wonderful type Gem is mounted reverse-up in the holder, the better to display the vivid green-gold, azure, and magenta patina that graces that side. The subtle apricot and pearl-gray shadings of the obverse are also attractive. Satiny and nicely struck with blatant visual appeal. (#5298)

## PROOF TWENTY CENT PIECES

### Attractive 1875 Select Proof Twenty Cent

2271 **1875 PR63 NGC.** Iridescent golden-blue toning appears on each side, along with some light field haze on the obverse. A decently struck piece, with some light contact marks noted in the right obverse field. Only 2,790 pieces were struck of this first-year proof emission. Census: 46 in 63, 84 finer (12/08).(#5303)

### Appealing 1876 Twenty Cent Piece, PR63 Cameo

2272 **1876 PR63 Cameo PCGS.** This piece exhibits a remarkable degree of field-to-device contrast on both sides. The design elements are crisply struck, with obvious proof sharpness on the obverse stars and Liberty's head; as well as the eagle's talons and arrow fletchings. This issue is not generally found with noteworthy Cameo contrast, making this piece a somewhat conditionally elusive specimen. (#85304)

### Lovely Toned 1878 Twenty Cent, PR63

2273 **1878 PR63 PCGS. CAC.** This steel-blue toned proof is housed in a first generation PCGS holder, and is an excellent representative of the final twenty-cent piece, a proof-only issue from a mintage of only 760 pieces. Breen writes that just 600 of those were actually sold, and the rest were later melted. Each side of this piece has minor hairlines and abrasions consistent with the grade.(#5306)

### Legendary 1796 Quarter, Good Details, B-2

2274 **1796—Plugged—ANACS. Good 4 Details.** B-2, R.3. The "High 6" variety of this rare date. The 1796 is also important as the first date of the denomination, as the only 18th century date, and as the sole date with a Small Eagle reverse. This example is plugged through the O in OF and opposite on the obverse to the right of the date. Whizzed and hairlined with two small digs near the nose and chin. The obverse has Good to VG sharpness, while the reverse is unevenly worn with heavy wear on the UNI in UNITED. (#5310)

### Authentic Fine Details B-1 1796 Quarter

2275 **1796—Genuine—PCGS.** Certified Genuine by PCGS; our in-house grade Fine Details, Cleaned. B-1, R.4. The more elusive of the two 1796 quarter varieties, distinguished by a star 15 that is closer to the bust than on the B-2. The present coin, though substantially worn, retains pleasing detail on the obverse, though the reverse shows considerable weakness. The surfaces have retoned silver-blue and violet from a past cleaning, though a number of faint hairlines and scattered abrasions are present on each side, including one at the lowest right point of star 15 on the obverse.(#5310)
***See: Video Lot Description***

### Early State 1804 Quarter, Fine 12 Details

2276 **1804—Whizzed—ANACS. Fine 12 Details.** B-1, R.3. Unnaturally bright silver surfaces are the result of whizzing that is noted by ANACS. The surfaces have the typical pebbled look of such coins, with a few other minor scratches. The 1804 quarter is the first-year of issue for the Draped Bust, Heraldic Eagle design, and the rarest date of the four-year design type.(#5312)

### Scarce XF B-2 1805 Quarter

2277 **1805 XF40 NGC. CAC.** B-2, R.2. Tompkins Die State 2/2. Medium golden-tan, aqua, and cream-gray shades embrace this well defined and partly lustrous example. A loupe reveals a few distributed unimportant marks. Struck from rotated dies. Very scarce in problem-free XF. Census: 9 in 40, 73 finer (11/08).
*From The Scott Rudolph Collection.*(#5313)

### Colorful Choice AU 1805 Quarter, B-3

2278 **1805 AU55 PCGS. CAC.** B-3, R.1. Tompkins Die State 5/2. The E in LIBERTY is weak, as often seen on this die variety. Beautifully toned in forest-green, peach-gold, and fire-red. Luster dominates the boldly clashed surfaces. Smooth aside from moderate marks on the face. Population: 18 in 55, 34 finer (11/08).
*From The James Mossman Collection.*(#5313)

2279 **1806 Fine 15 PCGS.** B-3, R.1. A luminous example of this comparatively available variety. Violet and gold-gray peripheral patina of varying intensity surrounds silver-gray centers. (#5314)

2280 **1806—Obverse Improperly Cleaned—NCS. XF Details.** B-2, R.2. Tompkins Die State 2/4. This slate-gray and almond-gold Bust quarter has a faintly hairlined obverse, but considerable luster glints from the design, and the only consequential mark is an inconspicuous pinscratch beneath the chin.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#5314)

### Toned Borderline Uncirculated B-1 1807 Draped Bust Quarter

2281 **1807 AU58 PCGS.** B-1, R.2. Tompkins Die State 4/2. The reverse of this variety has just four berries, an instant attribution feature. Browning-2 quarter dollars have five berries in the branch and are slightly scarcer. This piece is a pleasing near-Mint example with ample luster and deep sea-green and autumn-gold toning. It is crisply struck aside from the stars, and the only noticeable mark is a thin pinscratch beneath the chin. Population: 12 in 58, 39 finer (11/08).
*From The Scott Rudolph Collection.*(#5316)

## BUST QUARTERS

### Significant Near-Gem 1818/5 Quarter, B-1

2282 **1818/5 MS64 NGC. CAC.** B-1, R.2. Tompkins Die State 3/5 with prominent reverse die cracks. The overdate feature is undesignated on the NGC holder. Dusky apple-green and ivory-gray compete for territory across this satiny and refreshingly mark-free near-Gem. The strike is bold save for softness on the eagle's head and opposite on the drapery clasp.
*From The Scott Rudolph Collection.*(#5323)

### Satiny Near-Mint 1818 Quarter, B-10

2283 **1818 AU58 PCGS.** B-10, R.3. Tompkins Die State 3/2. Golden-brown and dove-gray embrace this charming near-Mint Bust quarter. The strike is even aside from softness on star 10, and wear is limited to the highpoints of Liberty's curls, cap, and drapery. Struck from multiply clashed dies.
*From The Scott Rudolph Collection.*(#5322)

### Choice AU 1819 Quarter, Small 9, B-3

2284 **1819 Small 9 AU55 NGC.** B-3, R.1. Tompkins Die State 4/3 with a vertical die crack through the recut 5 in 25C. A lightly circulated tan-gray example that displays satin luster within design elements. A thin V-shaped mark is noted behind Liberty's cap, but the surfaces are generally smooth.
*From The Scott Rudolph Collection.*(#5325)

### Elusive AU55 Large 9 1819 Bust Quarter, B-2

2285 **1819 Large 9 AU55 NGC.** B-2, R.3. Tompkins Die State 3/1. The devices and borders are bathed with luster, and the virtually untoned surfaces lack any consequential marks. Sharply struck for the type with slight wear on the claws and curls. A few specks of debris are present near the E in AMERICA. The obverse periphery has several slender die cracks, as made.
*Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 622, which realized $4,025.*
*From The Scott Rudolph Collection.*(#5326)

### Near-Mint 1819 Large 9 Quarter, B-2

2286 **1819 Large 9 AU58 NGC.** B-2, R.3. The second S in STATES and S in PLURIBUS are aligned. The design elements are sharply defined and the surfaces are fully lustrous, with a light coating of lilac-gray toning in a somewhat dappled pattern over both sides. An attractive near-Mint example.
*From The Findley Collection.*(#5326)

## Lavishly Toned Choice AU 1820 Quarter, Small 0, B-4

2287 **1820 Small 0 AU55 NGC.** B-4, R.2. Richly toned in golden-brown, lilac, and ocean-blue. This briefly circulated representative shows light wear on Liberty's curls, but plentiful luster shimmers from the designs. Die rust left of the 2 in the denomination distinguishes B-4 from the rare B-5. Census: 11 in 55, 26 finer (12/08).
*From The Findley Collection.*(#5328)

## Patinated MS64 1821 Quarter, B-3

2288 **1821 MS64 NGC.** B-3, R.2. Tompkins Die State 2/1. Deep golden-brown and apple-green toning blankets this intricately struck and satiny representative. Prominent die lines near stars 2 and 3 are as made. Light marks beneath the eye will be missed by most. Struck from clashed and lightly rusted dies. Census: 17 in 64, 9 finer (11/08).
*From The Findley Collection.*(#5331)

## Conditionally Scarce 1821 Quarter, B-4, MS64

2289 **1821 MS64 NGC.** B-4, R.3. A trifle weak on most of the obverse stars, and on the eagle's right (facing) talons, with shimmering, soft luster across olive-silver surfaces. A pair of faint grease streaks are noted on the right side of the reverse, but they are not obvious or distracting. Surface marks are minimal, and nearly nonexistent. Census: 17 in 64, 9 finer (11/08).(#5331)

## Impressive 1822 Bust Quarter, AU58, B-1

2290 **1822 AU58 NGC.** B-1, R.2. Normal denomination on the reverse. The 1822 quarter sells for only a small premium, despite having a low mintage of 64,080 pieces, divided between two known die marriages. This is a truly impressive near-Mint example with deep gold, rose, and electric-blue toning that dominates the underlying gray patina over each side. Only traces of highpoint wear are noted on the highpoints of the design, and abrasions are nearly nonexistent.
*From The Findley Collection.*(#5332)

## Lushly Toned B-1 1822 Quarter MS62

2291 **1822 MS62 NGC.** B-1, R.2. Lavishly toned in deep powder-blue, apricot, and dove-gray shades. The glossy surfaces are smooth save for unobtrusive abrasions above the eagle's head and a solitary thin vertical mark on the cheek. Sharply impressed on the major devices, with a few stars incompletely brought up. Census: 4 in 62, 5 finer (11/08).
*From The Findley Collection.*(#5332)

2292 **1824/2 VG10 NGC.** B-1, R.3. A semi-key issue in the Capped Bust quarter series, the 1824 is known only by a single die variety. This splendid piece has considerable wear, but presents excellent contrast with light silver devices and deeper gray fields. A few mostly insignificant blemishes are expected at the grade level. (#5335)

2293 **1825/4/3 XF45 NGC.** B-3, R.3. Medium tan toning embraces the obverse, as well as the reverse margin. The central reverse is cobalt-blue. The eagle is well defined, and luster fills the peripheral legends. A loupe locates occasional moderate marks.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#5336)

2294 **1828 Normal Reverse AU53 NGC.** Ex: Jules Reiver Collection. B-2, R.4. AU53 NGC. Usual Die State. Star 7 repunched; Spine left from lowest arrow point. Dark silver and attractive for the grade. The surfaces are clean and show minimal signs of contact. This is the scarcest variety of the year, and a coin that any collector would be proud to own.
*Ex: J.J. Teaparty (1/1984).* Envelope Included.(#5342)

### Choice AU 1831 Small Letters Quarter, B-4

2295 **1831 Small Letters AU55 NGC.** B-4, R.1. Tompkins Die State 1/2. Lavender and russet-brown intermingle across this Choice AU Bust quarter. Luster shines from the stars, legends, shield, curls, and plumage. Smooth despite a couple of thin marks on the left obverse field, and wear is limited to the high points of the devices.
*From The Findley Collection.*(#5348)

### Pleasing Choice Mint State 1831 Quarter Small Letters, B-4

2296 **1831 Small Letters MS64 NGC.** B-4, R.1. Tompkins Die State 1/3. This fully lustrous and needle-sharp near-Gem has only a hint of golden toning. Only trivial marks are present, and although a small number of pieces are graded finer, even the demanding collector will be pleased. Census: 68 in 64, 31 finer (11/08).(#5348)

### Deeply Toned 1831 Quarter, MS64 Large Letters, B-5

2297 **1831 Large Letters MS64 NGC.** B-5, R.3. On this variety, the date features tall 1s repunched over small 1s. Aquamarine and sun-gold brighten the borders, while the fields are deep cream-gray and the devices are lavender-brown. An unmarked and unworn high grade representative of the Reduced Diameter subtype.(#5349)

### Colorful MS64 1837 Quarter, B-2

2298 **1837 MS64 NGC. CAC.** B-2, R.1. Sun-gold fills the margins of this Choice Bust quarter, while the fields are primarily ocean-blue and the devices are mostly olive-gray. This unblemished example has ample luster, and softness of strike is limited to the left side stars, the forehead curl, and the fletchings. Census: 26 in 64, 21 finer (11/08).
*From The Scott Rudolph Collection.*(#5356)

### Scarce Select 1838 Quarter, B-1

2299 **1838 MS63 PCGS. CAC.** B-1, R.1, the only known dies. Tompkins Die State 3/5. Vibrant luster and light cream-gray toning accompany this lovely Select type coin. Surprisingly smooth despite a faint graze near the O in OF. Well struck overall with the sole exception of star 6. Population: 20 in 63, 14 finer (11/08).
*From The Scott Rudolph Collection.*(#5357)

## SEATED QUARTERS

### Delicately Toned 1838 No Drapery Quarter, MS64

2300 **1838 No Drapery MS64 ICG.** Bluish-purple obverse patination cedes to yellow-green, orange, and sky-blue coloration on the reverse of this sharply struck near-Gem quarter. A couple of unobtrusive obverse marks accounts for the grade. Pleasing luster shows on both sides.
*From The Findley Collection.*(#5391)

## Pleasing Choice 1839 No Drapery Quarter

2301 **1839 No Drapery MS64 PCGS. CAC.** Briggs 1-A with a bold horizontal die crack across the eagle. Golden-brown, navy-blue, and ruby-red embrace the borders of this lustrous and carefully preserved early Seated type coin. Sharply struck at the centers, with softness noted on Liberty's foot and a few peripheral letters. One of only three No Drapery issues; the others are the 1838 and 1840-O. Population: 9 in 64, 2 finer (11/08).
*From The James Mossman Collection.*(#5392)

2302 **1840-O No Drapery MS61 ANACS.** Arcs of deep electric-blue and gold-brown visit the peripheries of each side, ceding to brilliant centers. The design elements are well impressed. A few small marks are visible.(#5393)

## Important MS62 1840-O No Drapery Quarter

2303 **1840-O No Drapery MS62 PCGS. CAC.** This satiny example offers a lovely blend of straw-gold and slate-gray patina. Well-defined with no trace of wear and only faint, wispy abrasions in the fields. A sharply impressed representative of this lower-mintage, conditionally rare New Orleans quarter. Population: 3 in 62, 4 finer (11/08).
*Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 629, which realized $4,312.50.*
*From The Scott Rudolph Collection.*(#5393)

2304 **1840-O Drapery MS62 NGC.** Small O, Briggs 2-C. This is quite a rare issue in Mint State, according to Larry Briggs' article in the December 2007 *Coin Dealer Newsletter Monthly Supplement*. The obverse of the Briggs 2-C shows a small die scratch through the lower part of the shield, and on the reverse the small O is centered over the R in QUAR. This piece has good luster, with deep olive toning on the obverse and a bit lighter olive and jade on the reverse.
*From The Findley Collection.*(#5398)

## Conditionally Rare 1841-O Quarter MS64

2305 **1841-O MS64 PCGS.** This antique-gold New Orleans near-Gem has shimmering luster and is smooth aside from a few moderate obverse marks, mostly near the knees and on the obverse exergue. The strike is crisp aside from minor incompleteness on the eagle's left (facing) leg. Housed in a green label holder. Population: 6 in 64, 0 finer (11/08).
*Ex: San Francisco ANA Signature (Heritage, 7/2005), lot 6004, which realized $2,300.*
*From The Scott Rudolph Collection.*(#5400)

## Patinated Gem 1843 Quarter

2306 **1843 MS65 NGC.** Emerald-green embraces the borders, while the centers are golden-brown with tinges of fire-red. This satiny Gem has a pleasing strike, and is free from any consequential marks. The 1843 is scarce in Mint State, and Gems are both rare and desirable. Census: 2 in 65, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#5404)

## Conditionally Rare MS65 1843 Seated Quarter

2307 **1843 MS65 NGC.** An impressive Gem example with sharp definition on all of the design elements, except for partial incompleteness on the first three obverse stars. The silver-gray centers yield to wisps of charcoal-gray and forest-green near the borders. The 1843 is known as a common date in circulated grades, but it becomes scare in Uncirculated condition and rare as a Gem. Census: 3 in 65, 1 finer (12/08).(#5404)

## Attractively Toned Choice 1845 Quarter

2308 **1845 MS64 PCGS. CAC.** Splashes of fire-red and apple-green patina endow this shimmering and meticulously struck near-Gem. Tiny marks on the fields and seated Liberty correspond to the grade. The 1845 is plentiful in Good through VF, but very scarce in Mint State. Encased in a green label holder. Population: 8 in 64, 4 finer (11/08).
*From The Scott Rudolph Collection.*(#5408)

2309 **1845 MS64 PCGS.** Generous luster radiates from the surfaces of this near-Gem coin, toned in delightful shades of green and yellow in the centers, with copper and sunset-orange near the rims. A bold strike completes the attractive package.(#5408)

2310 **1849 MS63 NGC. CAC.** Briggs 2-A. Stars 10 to 13 show heavy recutting, and the reverse is a "Compass Point" variety with a circular incomplete area atop the first vertical shield stripe. The 1849 is rare in Uncirculated, for which Larry Briggs (1981) assigns an R.5 rarity rating. Deep golden-tan patina shows blushes of lavender. Generally well struck, with nice luster and a few inconspicuous field marks. Census: 7 in 63, 6 finer (11/08).
*From The Scott Rudolph Collection.*(#5413)

## Seldom Seen AU 1849-O Quarter

2311 **1849-O AU50 ICG.** The 1849-O is the most elusive Seated quarter delivery from the New Orleans Mint, and is perhaps the rarest pre-1853 Seated quarter. Although no 1849-O quarters were listed with official mintage figures, researchers speculate that the New Orleans Mint's delivery of 396,000 quarters in 1850 included about 16,000 pieces dated 1849. Whatever the actual mintage figure may be, there is little doubt that heavy circulation and widespread melting during the peak of the California Gold Rush both took their toll on this extremely difficult issue. This is a minimally worn example with lustrous silver-gray surfaces and a touch of reddish-orange color about the peripheral devices.
*Ex: Atlanta Signature (Heritage, 8/2001), lot 5881.*(#5414)

## Sharp 1850 Gem Quarter
## Briggs 1-A, Extra 1 in Dentils

2312 **1850 MS65 NGC. Extra 1 in Dentils.** MPD-001. Briggs 1-A. The 1 was mispunched below and left of the date with the base and part of the upright clearly showing on the rim of the coin. This is one of the more dramatic mispunchings from the period, and this Gem may be one of the finest known of the variety, if not *the* finest. The surfaces are stark white with heavily striated fields that impart a bright, semi-reflective sheen on each side. The strike is sharp on the peripheral stars, but there is localized weakness on Liberty's lower curls and breast. As a date, the 1850 Seated quarter is elusive, as most of the original mintage was melted during the increase in silver prices caused by the California Gold Rush. Identifiable by a tiny nick on Liberty's left (facing) forearm. We also note a raised die lump on the chest near the neck. This is one of the finest examples certified by either NGC or PCGS. Census: 2 in 65, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#5415)

2313 **1850-O AU58 PCGS.** Briggs 1-A. The mintmark is left of center of the crotch. Nearly Uncirculated, with generous luster and silvery surfaces with light golden accents. The piece is somewhat softly struck on the upper obverse, and we note a scrape in the right reverse field above the eagle's wing.(#5416)

## Scarce Select Mint State 1850-O Quarter

2314 **1850-O MS63 PCGS. CAC.** Streaks of tobacco-brown color adorn the obverse of this satiny and nearly undisturbed example. Well struck in the centers, while the peripheral elements are slightly soft. The 1850-O has a healthy production of 412,000 pieces, but many of these were melted since their contemporary bullion value exceeded face value. Scarce in Uncirculated grades. Population: 6 in 63, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#5416)

## High-End 1852 Quarter, MS64

2315 **1852 MS64 NGC.** From a mintage of 177,060 pieces, the quarter of 1852 is scarce as a date, with many examples being melted after the weight change in 1853. The present coin is fully struck and lustrous, with minimal handling marks for the grade. Eye appeal is outstanding. Census: 6 in 64, 5 finer (12/08).(#5419)

## Rare Gem 1852 Seated Quarter

2316 **1852 MS65 PCGS.** Breen-3985. With a mintage of only 177,060 pieces, the 1852 quarter is elusive and can be considered rare in Mint State. It has been often noted that much of this mintage was melted. Most examples come in lower grades. On the reverse of this example there is a thin die crack through the top of ED of UNITED and the ST in STATES. This specimen is toned in light, attractive silver-gray color, with faint champagne accents. The surfaces are lustrous and well preserved. Population: 3 in 65, 3 finer (12/08). (#5419)

2317 **1853 Arrows and Rays MS62 PCGS. CAC.** The obverse has medium gold and steel toning over frosty luster, and the reverse is brighter with light champagne toning over similarly frosty luster. A single dark toning splash is visible at the top reverse border. (#5426)

2318 **1853 Arrows and Rays MS62 PCGS.** Sharply defined on each side, and attractively toned but with differing color schemes on the obverse and reverse. A series of shallow planchet voids in the right obverse field account for the MS62 grade.(#5426)

## Sharply Struck 1853 Arrows and Rays Quarter, MS64

2319 **1853 Arrows and Rays MS64 NGC. CAC.** The lustrous surfaces of this near-Gem display soft olive-tan patina, and an attentive strike imparts crisp definition to the design features. A handful of minute marks precludes full Gem classification. This will be an excellent choice for a high-grade type collection.(#5426)

## Choice 1853 Arrows and Rays Quarter

2320 **1853 Arrows and Rays MS64 PCGS.** A dusky silver-gray example of this one-year type, solidly struck and impressively devoid of abrasions. The weight of the half dime through half dollar was reduced in 1853 to return the denominations to circulation. Arrows and rays were added to distinguish the new-tenor quarters and halves from earlier 1853 strikes, though the latter feature was dropped for the 1854 and later issues.
*From The Scott Rudolph Collection.*(#5426)

## MS64 1853 Arrows and Rays Quarter

2321 **1853 Arrows and Rays MS64 PCGS. CAC.** Light to medium sun-gold toning graces this precisely struck near-Gem. Both sides are uncommonly devoid of abrasions, even for the appealing MS64 grade. The showy Rays reverse subtype was only coined in 1853, and along with the obverse arrows, denoted the reduction in tenor.
*From The James Mossman Collection.*(#5426)

## Deeply Toned Near-Gem 1853 Quarter, Arrows and Rays

2322 **1853 Arrows and Rays MS64 PCGS.** Deep cobalt-blue and plum-mauve patina envelops this lustrous and exactingly struck near-Gem. A well preserved representative of this widely collected single-year subtype. The rays were removed in 1854, but the arrows continued through 1855. A record number of quarters were struck in 1853, to replace hoarded and melted old tenor silver coinage.
*From The Findley Collection.*(#5426)

2323 **1854 Arrows MS62 NGC.** A pleasing example of this two-year design subtype with arrows by the date, but no rays on the reverse. Sharply struck and satiny with rich orange and lilac-gray toning.
*From The Scott Rudolph Collection.*(#5432)

2324 **1854-O Huge O Good 6 PCGS.** A significantly worn, yet pleasing example of this instantly recognizable O-mint variety. Generally gold-gray surfaces show elements of deeper green at the reverse margins. The obverse shows the BER of LIBERTY clearly with fragments of the I and T.(#5434)

## Famous Huge O 1854-O Quarter, Fine 15

2325 **1854-O Huge O Fine 15 PCGS. CAC.** FS-501, formerly FS-004. Briggs 1-A. Walter Breen (1988) writes about the 1854-O, Huge O: "This mintmark differs from all others in the series, being both larger and grossly thicker throughout, and fairly crude in shape ... Most likely this die was received at New Orleans without mintmark, and the O added by hand." He says the variety is "very rare." Natural medium gray toning darkens somewhat in the recesses of this Fine 15 example, and nice detail shows on the design elements. The scattered moderate field marks are expected of the grade. Population: 6 in 15, 17 finer (11/08).
*Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 635, which realized $3,450.*
*From The Scott Rudolph Collection.*(#5434)

## Scarce 1854-O Huge O Quarter, XF Details

2326 **1854-O Huge O—Improperly Cleaned—NCS. XF Details.** FS-004. Briggs 1-A. The famous Huge O variety, with a large misshapen mintmark. Larry Briggs rates this issue very scarce in XF, and extremely rare in AU grades. The present coin is an attractive example, in spite of being cleaned at some time in the past. The coin has the sharpness of detail one would expect in an XF coin, with only a moderate number of surface marks.(#5434)

2327 **1856 MS64 PCGS.** Medium gold toning lightens at the centers. A lustrous and attractively preserved near-Gem that has minor strike incompleteness on the lower half of the eagle and on the right side stars. Population: 50 in 64, 20 finer (11/08).
*From The Scott Rudolph Collection.*(#5438)

## Lushly Toned Gem 1856 Quarter

2328 **1856 MS65 PCGS.** Pleasing caramel-gold and aquamarine patina graces this precisely struck and lustrous Gem. Even with the aid of a loupe, one can only locate a few tiny obverse marks, localized to the legs of Liberty. Population: 11 in 65, 9 finer (11/08).
*Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 636, which realized $4,600.*
*From The Scott Rudolph Collection.*(#5438)

## Handsome Gem 1857 Quarter

2329 **1857 MS65 NGC.** Delicate gold toning adorns this lustrous and beautifully preserved Gem. A good strike, although faint mint-caused roller marks are present on the seated Liberty. A worthy representative of the No Motto subtype.
*Ex: Indiana Collection (Heritage, 5/2000), lot 7286.*
*From The James Mossman Collection.*(#5442)

## Attractively Toned 1857 Quarter

2330 **1857 MS66 PCGS.** Glowing luster radiates from smooth, clean surfaces that are covered with a medley of aqua-green, lilac, and grayish-beige patination. Except for softness on a couple of the star centrils, the design elements have been favored by a well executed strike. Originally toned, well preserved, and desirable. Population: 26 in 66, 4 finer (11/08).
*From The Scott Rudolph Collection.*(#5442)

## Coveted MS66 1857 Quarter

2331 **1857 MS66 PCGS. CAC.** This piece is brilliant silver with a tinge of golden-gray on each side. The reverse shows many diagonal die striations running from lower right to upper light in the fields, the result of zealous die polishing. A few stray ticks, seen under a loupe on the right obverse field, are of little import. Sharply struck, satiny, and certified in a green-label holder. Population: 26 in 66, 4 finer (11/08).
*Ex: Central States Signature (Heritage, 5/2007), lot 443, which realized $4,945.*
*From The Scott Rudolph Collection.*(#5442)

## Magnificent MS67 ★ 1857 Quarter

2332 **1857 MS67 ★ NGC.** Splashes of electric-blue and orange-gold color dominate this shimmering and carefully preserved Superb Gem. The stars and dentils are needle-sharp, although the fletchings and Liberty's chest shows moderate incompleteness of strike. Both sides show considerable reflectivity in the fields. Struck from clashed dies. Even though the 1857 quarter dollar is considered available, Superb Gems are seldom encountered.
*Ex: Central States Signature (Heritage, 5/2005), lot 6861, which realized $8,050.*
*From The Scott Rudolph Collection.*(#5442)

2333 **1857-O MS62 PCGS.** Gray-brown over the obverse and most of the reverse with crescents of pearl-gray at the upper left and lower right. Well struck with soft luster and lightly abraded surfaces. Population: 5 in 62, 11 finer (11/08).
*From The Scott Rudolph Collection.*(#5443)

## Desirable Select 1857-O Quarter

2334 **1857-O MS63 PCGS. CAC.** Well-defined with luminous surfaces beneath dusky olive-gold, silver-gray, and sage shadings. Select and pleasing for the grade with only pinpoint marks and wispy abrasions that account for the grade. This antebellum New Orleans issue was little-saved at the time of release, and any Mint State example is a rarity. Population: 6 in 63, 5 finer (12/08).(#5443)

## Worthy Gem 1858 Quarter

2335 **1858 MS65 PCGS.** This bright Gem is impressively preserved, and displays excellent sharpness save for the final few obverse stars and the area of the left reverse shield border. Light gold toning denies full brilliance. Population: 32 in 65, 13 finer (11/08).
*Ex: Portland Signature (Heritage, 3/2004), lot 5646; Dallas Signature (Heritage, 4/2007), lot 635, which realized $4,255.*
*From The Scott Rudolph Collection.*(#5445)

## Sharply Struck 1858 Quarter, MS66

2336 **1858 MS66 PCGS. CAC.** Although the 1858 quarter is considered common in terms of extant examples in all grades, high-end pieces are irrefutably challenging to locate. The public's motivation to hoard silver coinage diminished following a reduction in the silver content of minor denominations, commencing with the issues of 1853, and coinage of this era circulated freely. The finish on this piece is uncommonly lustrous for a coin from the 1850s. Mostly brilliant, a few streaks of grease (as made) are seen on the lower obverse, and there is a bit of light brown color on the reverse. Sharply struck. Population: 13 in 66, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#5445)

## Desirable AU53 1858-S Quarter

2337 **1858-S AU53 PCGS.** Sharply struck and satiny with clean walnut-tan and stone-gray surfaces. Although the mintage of 121,000 pieces should have left a number of quality survivors, such coins were necessary to commerce, and only a single Mint State example is known (an MS62 NGC). Population: 2 in 53, 0 finer (11/08). (#5447)

## Conditionally Scarce 1859 Seated Quarter, MS64

2338 **1859 MS64 PCGS. CAC.** The surfaces of this pleasing piece show glowing, satin luster and a paucity of distracting marks on either side. Prominent clash marks are noted near Liberty's right (facing) elbow. A bit softly struck on the highest points of the lower reverse; chiefly on the stem of the eagle's olive branch and the arrow fletchings directly above. Population: 24 in 64, 11 finer (11/08).
*From The Scott Rudolph Collection.*(#5448)

## Difficult 1859-S Quarter VF30

2339 **1859-S VF30 PCGS.** The 1859-S has a meager mintage of 80,000 pieces, presumably because the half dollar denomination was preferred by West Coast bankers. Perhaps no one collected by date in California until decades later, and it comes as little surprise that no Uncirculated 1859-S quarters are known. This collectible example has cream-gray and ocean-blue toning. Pleasing despite two thin marks that pass through the raised elbow. Population: 4 in 30, 15 finer (11/08).(#5450)

## Toned Gem 1861 Seated Quarter

2340 **1861 MS65 PCGS. CAC.** Type One Obverse and Type Two Reverse, with a convex eye on the eagle. Light gray toning dominates the obverse, accented with blushes of cobalt-blue, lilac, and apple-green, while slightly deeper hues of gray, cobalt-blue, and lilac are about evenly distributed over the reverse. Exquisite delineation characterizes the design elements, which are lightly frosted. The surfaces emit glowing luster, and reveal just a couple of minor marks well within the parameters of the grade designation. Great overall eye appeal. Population: 33 in 65, 13 finer (11/08).
*From The Scott Rudolph Collection.*(#5454)

## Rare Choice XF 1861-S Quarter

2341 **1861-S XF45 PCGS.** A meager mintage of 96,000 pieces ensures the rarity of the 1861-S. None have been certified as Mint State, although PCGS has graded one piece as Poor 1. The present Choice XF example is gunmetal-gray with tan and ice-blue tints. Sharply struck and free from consequential marks. Population: 4 in 45, 7 finer (11/08).(#5455)

2342 **1862 MS64 PCGS. CAC.** Apple-green, golden-brown, and cream-gray embrace this satiny and nicely preserved Civil War quarter. The strike is needle-sharp. Population: 42 in 64, 19 finer (11/08).
*Ex: Charlotte ANA Signature (Heritage, 3/2007), lot 645, which realized $1,265.*
*From The Scott Rudolph Collection.*(#5456)

2343 **1863 MS64 PCGS.** The walnut-brown and gunmetal-gray toning is rich on the obverse, and delicate across the reverse. This well struck Civil War near-Gem is well preserved and has the look of a higher grade, perhaps held back by slightly subdued obverse luster. A small strike-through depression (as made) rests beneath star 9. Population: 16 in 64, 22 finer (10/08).
*From The Scott Rudolph Collection.*(#5458)

## Challenging Near-Gem 1864 Quarter

2344 **1864 MS64 PCGS.** A brilliant and satiny example of this low mintage Civil War date. The strike is penetrating, and the surfaces are nearly pristine save for a single thin mark on the reverse exergue. Struck from lightly clashed dies. Only 93,600 pieces were coined. Population: 14 in 64, 20 finer (11/08).(#5459)

## Amazing 1866 Motto Seated Liberty Quarter, MS65

2345 **1866 Motto MS65 NGC.** The first year with the motto IN GOD WE TRUST. The Philadelphia Mint coined 16,800 quarters for circulation in 1866. This Gem representative exhibits partially prooflike fields, complete with heavy die polish lines, that highlight the frosty devices. Well struck at the peripheries, while the central elements reveal localized weakness. White surfaces display just a few trivial marks. Census: 13 in 65, 5 finer (12/08).(#5468)

## Partly Lustrous AU 1867-S Quarter

2346 **1867-S AU50 PCGS.** The mere 35 1867-S quarters that have been seen by PCGS and NGC attest to the rarity of this issue. The majority of pieces grade from VG to VF; AU coins are rare, and Mint State coins are nearly unobtainable. The current AU50 example displays light gray surfaces that are visited by speckles of deeper charcoal-gray in some of the border areas. The design elements are exceptionally well struck for the issue, with even the normally weak star centrils strong. A few faded marks on the right obverse field will help pedigree this example. Population: 1 in 50, 4 finer (11/08).
*Ex: Charlotte ANA Signature (Heritage, 3/2007), lot 652, which realized $9,200.*
*From The Scott Rudolph Collection.*(#5471)

## Richly Toned Select 1870 Quarter

2347 **1870 MS63 PCGS. CAC.** Golden-brown, olive-green, and dove-gray embrace this solidly struck and satiny Seated quarter. Evaluation beneath a lens can find only the infrequent and unimportant abrasion. From a low mintage of 86,400 pieces. Population: 3 in 63, 10 finer (11/08).
*From The Scott Rudolph Collection.*(#5476)

## Splendid Gem 1873 Arrows Quarter

2348 **1873 Arrows MS65 PCGS.** A sharply struck Gem with dusky chestnut toning. Virtually immaculate, since the sole identifier is a threadlike lintmark near Liberty's shield hand. The reverse field offers glimpses of prooflike luster, although both sides provide intense cartwheel sheen. A short-lived subtype. Population: 20 in 65, 3 finer (11/08).
*From The James Mossman Collection.*(#5491)

## Desirable 1873-CC Arrows Quarter, VF20 Details

2349 **1873-CC Arrows—Cleaned—ANACS. VF20 Details.** The 1873-CC No Arrows quarter is an extreme rarity with about five known, so most collectors desiring an example of the date and mintmark combination will necessarily need to pursue the With Arrows type. This attractive piece, despite being cleaned and recolored, has pleasing golden-brown and pewter-gray surfaces of excellent quality with only a few trivial abrasions..
*From The Findley Collection.*(#5492)

## Lustrous 1874-S Gem Quarter

2350 **1874-S Arrows MS65 PCGS.** A few whispers of nearly imperceptible gold-brown color attach themselves to the lustrous surfaces of this Arrows S-mint Gem. Both sides exhibit a frosty finish, and reveal just a few minor grade-consistent marks. A well directed strike leaves strong definition on the design elements. Housed in a green-label holder. Population: 49 in 65, 28 finer (11/08).
*From The Scott Rudolph Collection.*(#5495)

## Lustrous MS66 1875 Quarter

2351 **1875 MS66 PCGS.** Type Two Reverse. Both sides are highly lustrous with frosty silver surfaces that are enhanced by faint peripheral gold toning. Well struck at the borders with slight softness across portions of the devices. Population: 17 in 66, 2 finer (11/08).
*Ex: Long Beach Signature (Heritage, 5/2007), lot 883, which realized $2,415.*
*From The Scott Rudolph Collection.*(#5498)

## Charming Premium Gem 1876 Quarter

2352 **1876 MS66 NGC. CAC.** Type Two Reverse. Splendidly toned in aqua, yellow-green, auburn, and mint-green. Boldly struck and shimmering with remarkably unabraded surfaces. One of the finest survivors of this Centennial issue, since NGC has certified only seven coins finer (10/08).
*From The Scott Rudolph Collection.* (#5501)

## Gem 1876-CC Quarter

2353 **1876-CC MS65 NGC.** Type Two Reverse. The reverse die used to strike this coin is unlisted in the 1991 book *The Comprehensive Encyclopedia of United States Liberty Seated Quarters* by Larry Briggs. The first C in the mintmark is over the upper serif of the R in QUAR while the second C is over the right side of that letter. Both sides are satiny in sheen with hints of brightness in the fields and bold-to-sharp striking detail throughout. Silver-white in sheen with exceptional preservation and a few spindly die cracks (as struck) around the peripheries. Census: 16 in 65, 12 finer (11/08).
*Ex: Long Beach Signature (Heritage, 10/2000), which realized $2,415; Charlotte ANA Signature (Heritage, 3/2003), which realized $2,760.* (#5502)

## Desirable MS66 1876-CC Quarter

2354 **1876-CC MS66 NGC.** Type Two Reverse with small feet on the A in STATES. An extraordinarily well preserved coin whose thick mint frost is evident beneath the gray-lilac toning that enriches most of each side. The margins are surrounded by deep sea-green and russet patina. Well struck and attractive with several die cracks present around the peripheries. Census: 10 in 66, 2 finer (11/08).
*From The Scott Rudolph Collection.* (#5502)

## Elusive 1876-S Quarter, MS66

2355 **1876-S MS66 NGC.** A thoroughly lustrous and penetratingly struck Premium Gem that features exceptionally clean surfaces. This essentially brilliant Centennial year example is worthy of the finest quality silver type set. NGC and PCGS combined have certified 11 pieces in the MS66 grade with none finer (11/08).
*From The Scott Rudolph Collection.* (#5503)

## Untoned Superb Gem 1877 Quarter

2356 **1877 MS67 PCGS. CAC.** Type Two Reverse. Shimmering mint frost covers the impeccably preserved surfaces of this brilliant Superb Gem. The design elements are well struck, and several clash marks and die cracks are evident on each side. Simply a beautiful Seated Liberty quarter. Population: 41 in 67, 1 finer (10/08).
*From The Scott Rudolph Collection.* (#5504)

## Condition Rarity 1877 Quarter, MS68

2357 **1877 MS68 NGC.** Essentially untoned surfaces display notable field-motif contrast at certain angles. An attentive strike sharpens the design elements, and both sides are impeccably preserved. NGC and PCGS have graded only eight pieces in this lofty grade, and none finer.
*From The Scott Rudolph Collection.* (#5504)

## Conditionally Scarce Gem 1877-CC Quarter

2358 **1877-CC MS65 PCGS.** Rich jade-green and silver patina adorns this lustrous Gem. The design elements are crisply produced on both sides. Well preserved except for a few small marks on Liberty's right (facing) arm. A conditionally scarce example of this popular Carson City quarter issue. Population: 33 in 65, 16 finer (11/08).
*From The Scott Rudolph Collection.*(#5505)

2359 **1877-S MS65 NGC.** Caramel-gold toning aids the eye appeal of this lustrous and decisively struck Gem. Both sides appear unabraded. A plentiful issue, but very scarce in such exemplary quality. Census: 33 in 65, 9 finer (11/08).
*From The Scott Rudolph Collection.*(#5506)

## Flashy Premium Gem 1877-S Quarter

2360 **1877-S MS66 NGC.** Frosty devices contrast with moderately prooflike fields. Type Two Reverse, with short feet on the A in STATES. The 1877-S is the last large mintage quarter issue from San Francisco until 1888, because the mints were compelled to strike silver dollars instead. This untoned and well struck Premium Gem is a worthy addition to an eighteenth century silver type set. Census: 4 in 66, 5 finer (11/08).
*Ex: Long Beach Signature (Heritage, 6/2006), lot 1341, which realized $2,530.*(#5506)

## Rare Gem 1877-S S Over Horizontal S Quarter

2361 **1877-S Over Horizontal S MS65 NGC.** FS-501, Briggs 4-D, VP-001. The initial S mintmark was punched into the die horizontally, then corrected with an upright S mintmark. Vibrant luster enlivens stone-white surfaces, and sharp definition is noted on the design elements, though softness occurs on Liberty's hair. Small contact marks are visible on Liberty's cheek and in the obverse fields. A lovely Gem example of this fascinating overmintmark variety. Census: 4 in 65, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#5507)

2362 **1878 MS64 PCGS. CAC.** Both sides are originally toned in mottled sea-green and turquoise shades that appear chiefly near the border on the obverse. Well preserved with shimmering luster and only minor incompleteness of strike on the right-side stars. Population: 17 in 64, 15 finer (11/08).
*From The Scott Rudolph Collection.*(#5508)

## Lushly Toned MS67 1879 Quarter

2363 **1879 MS67 PCGS. CAC.** Gorgeous cherry-red, peach, and sea-green toning endows this highly lustrous and needle-sharp Superb Gem. The 1879 quarter comes from a mintage of only 13,600 business strikes, since the Mints concentrated on silver dollar production that year. Housed in a green label holder. Population: 22 in 67, 2 finer (11/08).
*Ex: Long Beach Signature (Heritage, 5/2007), lot 890, which realized $5,750.*
*From The Scott Rudolph Collection.*(#5511)

## Dazzling MS66 1880 Quarter

2364 **1880 MS66 NGC.** A splendid, nearly untoned example with boldly struck devices that stand out nicely from the shimmering fields. Only a tiny strike-through (as struck) to the left of Liberty's elbow precludes an even higher third party assessment. A mere 13,600 business strike quarters were produced this year, since the Philadelphia Mint concentrated on the striking of Morgan dollars. Census: 30 in 66, 12 finer (11/08).
*Ex: Long Beach Signature (Heritage, 5/2003), lot 5977.*
*From The Scott Rudolph Collection.*(#5512)

## Beautiful Premium Gem 1880 Quarter

2365 **1880 MS66 PCGS.** This charming better date quarter has sweeping luster and peripheral tan-gold toning. Die polish has weakened central portions of the seated Liberty, but the strike is unassailable. The obverse field has only inconsequential marks. A scant 13,600 pieces were struck, since the Federal mints neglected all silver denominations except dollars. Population: 32 in 66, 8 finer (11/08).
*From The James Mossman Collection.*(#5512)

## Colorful Superb Gem 1881 Quarter

2366 **1881 MS67 PCGS. CAC.** This sharply struck Superb Gem is adorned by electric-blue and copper-brown on the obverse, mainly near the periphery. The reverse is no less original, but the colors are markedly different, with much lighter mottled pastel green and antique-gold around the border. A virtually blemish-free representative of this ever-popular date, with a mintage of just 12,000 business strikes. Population: 5 in 67, 1 finer (11/08).
*Ex: Charlotte ANA Signature (Heritage, 3/2007), lot 662, which realized $6,900.*
*From The Scott Rudolph Collection.*(#5513)

## Extraordinary MS67 1882 Quarter

2367 **1882 MS67 PCGS. CAC.** Most of the quarters and halves from the 1880s have low mintages. Only 15,200 pieces of the 1882 quarter were struck, and unlike many business strikes from this decade, this piece shows no trace of prooflikeness in the fields. Highly lustrous with faint gold toning and nearly immaculate surfaces. Well struck save for the stars. Population: 16 in 67, 0 finer (11/08).
*Ex: Dallas Signature (Heritage, 11/2007), lot 559, which realized $8,050.*
*From The Scott Rudolph Collection.*(#5514)

## Fabulous MS66 1884 Quarter

2368 **1884 MS66 PCGS.** Always of interest to collectors, the 1884 has a low mintage of only 8,000 business strikes. This is an especially well-produced example for a circulation strike, highly lustrous with the bright, mildly reflective surfaces common to this minimally minted issue. Essentially brilliant with dazzling eye appeal. Population: 14 in 66, 7 finer (11/08).
*From The Scott Rudolph Collection.*(#5516)

## Lavishly Toned 1887 Quarter MS67

2369 **1887 MS67 PCGS. CAC.** Mottled rose-red, peach, and apple-green patina invigorates this lustrous and gorgeously smooth Superb Gem. Well struck except for the stars. Only 10,000 business strikes were issued, since Treasury policy favored silver dollar production. Population: 5 in 67, 0 finer (11/08).
*Ex: Dallas Signature (Heritage, 4/2007), lot 645, which realized $7,475.*
*From The Scott Rudolph Collection.*(#5519)

2370 **1888 MS64 NGC.** Delicate caramel-gold toning adorns this lustrous and mark-free quarter. A bold strike save for the upper stars. Small granular specks near the right (facing) wingtip define the grade. A mere 10,000 pieces were struck.(#5520)

## Memorable Superb Gem 1888 Seated Quarter

2371 **1888 MS67 PCGS.** This Superb Gem exhibits memorable technical quality and eye appeal for this low-mintage Seated quarter issue, being abundantly frosty with a distinctive arc of burnt-orange, crimson, and steel-blue toning across the upper obverse. A bit of normal softness is found on several of the obverse stars, otherwise the strike is boldly executed. Population: 10 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#5520)

## Splendid 1888 Quarter, MS67

2372 **1888 MS67 PCGS.** Delicate golden-brown toning visits the borders of this exceptionally lustrous and spectacularly preserved Superb Gem. The strike is intricate save for the centers of the upper stars. Although the San Francisco Mint struck more than 1.2 million quarters in 1888, the Philadelphia emission was limited to 10,001 business strikes and 832 proofs. Population: 10 in 67, 0 finer (11/08).
*Ex: November Signature (Heritage, 11/2007), lot 561, which realized $6,037.50.*
*From The Scott Rudolph Collection.*(#5520)

## Richly Toned MS67 1889 Quarter

2373 **1889 MS67 PCGS. CAC.** Pumpkin-gold toning enriches both sides of this lustrous Superb Gem. The lower reverse has a blush of rose-red. Precisely struck and gorgeously preserved. Formidable quality for this better date. A scant 12,000 pieces were produced. Population: 24 in 67, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#5522)

## Superb Gem 1889 Quarter

2374 **1889 MS67 NGC.** The 1889 is a well-known low mintage issue with only 12,000 business strikes produced. It is encountered in MS63-65 condition but it is seldom seen in Superb condition. Sharply struck throughout, the mint luster is heavily frosted and its cartwheel effects are abundantly clear as a result of its untoned appearance. Census: 30 in 67, 3 finer (11/08).
*Ex: FUN Signature (Heritage, 1/2006), lot 2328.*(#5522)

## Conditionally Scarce Superb Gem 1890 Seated Quarter

2375 **1890 MS67 NGC.** An intricately struck Superb Gem that possesses dazzling luster and essentially immaculate preservation. A whisper of gold toning denies absolute brilliance. From the final year of the reduced mintage Philadelphia Mint quarters. Only 80,000 business strikes were issued. Census: 23 in 67, 5 finer (11/08).
*From The Scott Rudolph Collection.*(#5523)

## Remarkable MS68 1890 Quarter

2376 **1890 MS68 NGC.** Cherry-red, powder-blue, and sea-green toning graces this thoroughly lustrous and nearly pristine Superb Gem. The strike is penetrating save for Liberty's hair and a few star centrils. Unimprovable quality for this scarce date. Once high mintages of Morgan dollars began in 1878, the production of other silver denominations was substantially reduced for years thereafter. Dime mintages were the first to return to normal levels, in 1882. Except for an anomalous 1888-S quarter issue, production of the Seated quarters and halves remained low until 1891. The 1890 quarter, with a mintage of 80,000 pieces, has approximately the same rarity in Mint State as the 1889, which had an even lower mintage of 12,000 pieces. Presumably, the same Philadelphia-area dealer (perhaps Haseltine) retained a similar quantity of both issues for stock. Census: 5 in 68, 0 finer (11/08).(#5523)
*From The Scott Rudolph Collection.*
***See: Video Lot Description***

### Richly Toned MS67 1891 Quarter

2377 **1891 MS67 NGC.** Forest-green, rose-red, and caramel-gold compete for territory across this lustrous and exquisitely struck Superb Gem. The 1891 was the first Philadelphia issue to exceed 100,000 pieces since 1878, but colorfully toned high grade pieces are desirable. Census: 14 in 67, 1 finer (11/08).(#5524)

### Lustrous 1891 Quarter, MS67

2378 **1891 MS67 PCGS. CAC.** This final year of issue is available in all grades through Gem, at which point it becomes more difficult to acquire. In MS67, the grade of the coin in this lot, only 17 pieces have been certified by PCGS and NGC, with a solitary coin grading higher. Highly lustrous surfaces are essentially untoned, and exhibit sharply defined motifs. A couple of minor marks in the left obverse field help to pedigree the piece. Population: 3 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#5524)

### Dazzling MS66 1891-S Quarter

2379 **1891-S MS66 PCGS.** This sharply struck Premium Gem has potent luster, and is untoned aside from small dark russet freckles relegated to 1 o'clock and 6:30 on the reverse. Minor shallow strike-throughs (as made) are concealed beneath both wings. Nearly devoid of contact, and desirable in such exemplary condition. Population: 4 in 66, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#5526)

## PROOF SEATED QUARTERS

### Sharply Struck 1857 Quarter, PR64

2380 **1857 PR64 PCGS.** Light gray patination with a slight golden cast resides on both sides of this near-Gem proof, and a modest amount of field-motif contrast appears at certain angles. A penetrating strike leaves strong delineation on the design elements. Nicely preserved throughout. Population: 10 in 64, 2 finer (12/08).(#5553)

### Marvelous PR64 Cameo 1858 Quarter

2381 **1858 PR64 Cameo PCGS.** A lovely example from this earliest of widely distributed proof Seated quarter issues, richly toned sunset-orange with glimpses of blue at the margins. Excellent contrast through the patina with only a few shallow disturbances in the fields accounting for the grade. Population: 3 in 64 Cameo, 1 finer (12/08).(#85554)

### Patinated Gem Proof 1859 Quarter

2382 **1859 PR65 NGC.** Type One Obverse, Type Two Reverse. This luscious Gem Seated quarter is one of only 800 pieces minted. It boasts iridescent blue, amber, and gold toning throughout the well struck surfaces. Parallel die polish lines above the eagle's beak are strictly as made. Census: 17 in 65, 17 finer (11/08).
*From The Scott Rudolph Collection.*(#5555)

## Exquisitely Struck 1859 Gem Proof Quarter

2383 **1859 PR65 PCGS.** A mixture of cobalt-blue, golden-brown, lavender, and greenish-blue patina bathes both sides of the Gem proof, and takes on somewhat deeper shades on the reverse. A penetrating strike delivers strong definition to the design elements. Surfaces on both sides have been well cared for.(#5555)

## Delightful Premium Gem Proof 1859 Seated Quarter

2384 **1859 PR66 NGC.** A stunning Premium Gem with rich gold toning on the obverse and deeper lilac and bluish-green on the reverse. The fields beneath the toning are deeply mirrored, and the design motifs are fully defined. Few survivors can equal the quality of this delightful piece. Census: 13 in 66, 4 finer (12/08).(#5555)

## Elusive Gem Cameo 1859 Seated Quarter

2385 **1859 PR65 Cameo PCGS.** While 1859 proof quarters are generally available, specimens with the Cameo designation are more elusive. Indeed, PCGS and NGC have graded only 33 Cameo coins at all levels of preservation. This Gem Cameo yields essentially untoned surfaces that exhibit boldly struck design features. A few unobtrusive handling marks are not bothersome. Population: 4 in 65 Cameo, 2 finer (12/08).(#85555)

## Handsome Gem Proof 1860 Quarter

2386 **1860 PR65 PCGS.** Type Two Obverse, Type One Reverse. Delicate pastel tan-gold patina, accented with whispers of cobalt-blue and lavender at the margins, dominates each side of the present Gem. The design elements are sharply struck, save for softness in some of the star centers. A few wispy marks are located near star 3. Of the 1,000 proof quarters struck in 1860, Larry Briggs, in his *The Comprehensive Encyclopedia of United States Liberty Seated Quarters*, mentions that 458 pieces were melted. Unexpectedly elusive, 1860 proofs are scarcer than those of subsequent dates. Population: 15 in 65, 7 finer (11/08).
*Ex: Dallas Signature (Heritage, 4/2007), lot 647, which realized $4,600.*
*From The Scott Rudolph Collection.*(#5556)

## Impressive PR66 1860 Seated Quarter

2387 **1860 PR66 NGC. CAC.** The main Mint in Philadelphia coined a round 1,000 proofs for this year, though numismatists speculate that not all were sold. Both sides of this Premium Gem offer exquisitely detailed central devices and beautiful color. Delicate rose and champagne toning with a crescent of blue graces the obverse, while the reverse exhibits similar, slightly deeper patina.
*From The Scott Rudolph Collection.*(#5556)

## Beautiful 1861 Quarter, PR64

2388 **1861 PR64 NGC.** This near-Gem proof is beautifully toned in sky-blue, purple, and yellow-tan hues, and a well executed strike imparts strong definition to the design elements. A few trivial marks preclude Gem status. The 1861 quarter comes from a mintage of 1,000 proofs, of which 600 or more were melted, according to Larry Briggs (1991). Census: 22 in 64, 22 finer (11/08).(#5557)

2389 **1862 PR63 PCGS.** Deep brownish-green patina covers each side of this sharply struck proof, turning into an array of iridescent colors near the peripheries. One of just 550 pieces produced. (#5558)

### Pleasing 1862 Quarter, PR64

2390 **1862 PR64 PCGS.** Wisps of barely discernible light tan-gold color show up under magnification, and rather pleasing field-motif contrast is apparent at most angles. A penetrating strike imparts bold delineation to the design features. A few wispy, inoffensive marks do not detract. Population: 34 in 64, 19 finer (12/08).(#5558)

### Bold 1862 Seated Quarter, PR65

2391 **1862 PR65 PCGS.** The obverse features splendid jade-green toning, but flip the coin over, and the reverse is virtually brilliant. Penetratingly struck and essentially immaculate. A couple of faint curved lines on the upper reverse field originated on the planchet. A scant 550 proofs were struck for this challenging Civil War date. Encased in an old green label holder. Population: 14 in 65, 5 finer (12/08).(#5558)

### Exquisite PR66 1862 Quarter

2392 **1862 PR66 NGC.** Ex: P. Kaufman. Beautiful sun-gold, plum-red, and powder-blue endow this exactingly struck Premium Gem. Inspection with a loupe fails to locate either carbon or contact. A mere 550 proofs were struck for this Civil War date. Census: 8 in 66, 0 finer (11/08).
*Ex: Philip Kaufman Collection (Heritage, 2/2003), lot 6649; FUN Signature (Heritage, 1/2007), lot 2963, which realized $6,900.*
*From The Scott Rudolph Collection.*(#5558)

### Gorgeous Gem Proof 1863 Seated Quarter

2393 **1863 PR65 PCGS. CAC.** This piece has an impressive combination of technical and visual attributes. Sharply struck, with the design elements showing all of the clarity expected in a proof specimen. A display of variegated, obviously original toning over the two sides incorporates elements of sea-green, lilac, russet-gold, and electric-blue. A couple of tiny marks are noted on the left side of the shield, above I in LIBERTY, but these are not bothersome. A lovely Gem example of this Civil War date. Population: 10 in 65, 9 finer (11/08).
*From The Scott Rudolph Collection.*(#5559)

### Toned Premium Gem Proof 1864 Quarter

2394 **1864 PR66 NGC. CAC.** The Philadelphia Mint struck just 470 proof quarters in 1864, but that level was an increase from the year before, and production would continue to rise as the United States emerged from the Civil War. This flashy, sharply struck specimen has dramatic patina, with aqua and cloud-gray toning over most of the obverse giving way to vibrant ruby and cerulean at the upper right. The reverse exhibits vivid sun-gold, crimson, and electric-blue toning. Census: 9 in 66, 5 finer (11/08).
*From The Scott Rudolph Collection.*(#5560)

### Flashy PR65 1865 Quarter

2395 **1865 PR65 NGC. CAC.** Luminous powder-blue, lemon-lime, and rose hues grace this flashy and fully struck Gem. Both undisturbed and beautiful. Just 500 proofs were struck for this final Civil War date, and the related business strike production was less than 60,000 pieces. QUAR DOL is lightly die doubled. Census: 18 in 65, 13 finer (11/08).
*Ex: Atlanta ANA Signature (Heritage, 4/2006), lot 551.*
*From The Scott Rudolph Collection.*(#5561)

## Untoned Cameo Gem Proof 1866 Quarter, Ex: Richmond Collection

2396 **1866 Motto PR65 Cameo NGC.** Both sides are blazing silver-white, lacking the faintest trace of patina. A beautiful and well struck coin from this issue of only 725 proofs, an appealing example of the initial With Motto issue. Census: 6 in 65 Cameo, 5 finer (11/08).
*Ex: Richmond Collection, Part Three (David Lawrence, 3/2005), lot 7838, which realized $4,600.*
*From The Scott Rudolph Collection.*(#85565)

## Toned 1867 Gem Proof Quarter

2397 **1867 PR65 PCGS.** Splashes of purple, inky-blue, and orange patination bathe both sides of this Gem proof, and a well executed strike completes the design features. No significant marks are apparent on the nicely preserved surfaces. Population: 15 in 65, 5 finer (12/08).(#5566)

## Beautiful PR67 ★ 1867 Quarter

2398 **1867 PR67 ★ NGC.** Magnificently toned in cobalt-blue, plum-red, and apricot. The strike is unimprovable, and inspection beneath a loupe reveals only a few wispy obverse field hairlines. Just 625 proofs were struck. Census: 2 in 67 ★, none finer with a Star designation(11/08).
*Ex: Dallas Signature (Heritage, 11/2007), lot 576, which realized $8,625.*
*From The Scott Rudolph Collection.*(#5566)

## Colorful Gem Proof 1868 Quarter

2399 **1868 PR65 NGC.** The proof quarter mintage of 1868 amounted to just 600 specimens, and of the pieces extant today, few have the blatant eye appeal of this beautifully toned piece. The obverse has an orange center with bands of powder-blue and olive-green near the rims, while the reverse has a blend of rose-red, ocean-blue, and lime-green patina. Crisply struck and well preserved. Census: 13 in 65, 11 finer (11/08).
*From The Scott Rudolph Collection.*(#5567)

## Attractive 1869 Quarter, PR66

2400 **1869 PR66 NGC.** Aqua-blue, lavender, and golden-brown patina occupies the obverse borders of this Premium Gem proof, leaving the centers essentially color free. A haze of sky-blue rests on the reverse center, framed by reddish-gold. A sharply struck, well preserved piece. Census: 10 in 66, 2 finer (12/08).
*From The Malibu Collection.*(#5568)

## 1871 Seated Quarter, PR64 Deep Cameo Single-Finest Deep Cameo Specimen at PCGS

2401 **1871 PR64 Deep Cameo PCGS. CAC.** Briggs 1-A. Writing in 1991, Larry Briggs (*The Comprehensive Encyclopedia of United States Liberty Seated Quarters*) states of this reverse die: "The folds of the scroll (carrying the motto 'IN GOD WE TRUST') are heavily polished and are very faint or missing." Close inspection of the present near-Gem offers a clue as to why Mint personnel polished this die so extensively. A loupe reveals numerous small pimples throughout the reverse field that point to what appears to be extreme die rust. The coinage staff in Philadelphia undoubtedly polished the dies in an effort to remove this rust.

This is the single-finest PCGS certified proof 1871 Seated quarter with a Deep Cameo designation (11/08). Both sides present as untoned at most angles, but delicate champagne-lilac shadings are seen toward the denticles. Rich mint frost overlays the devices, all of which are fully brought up from an obviously powerful striking impression. The fields are deeply mirrored, and both sides are free of hairlines, as expected for the PR64 level of preservation.
*From The Scott Rudolph Collection.*(#95570)

## Sharp PR66 1872 Quarter

2402 **1872 PR66 PCGS.** Dusky lilac and cream-gray embraces the obverse, and the reverse features deep forest-green and dove-gray toning. Well struck and undisturbed. A die scratch results in a raised line near the first vertical shield stripe, as seen on several proof dates from the 1870s. Encapsulated in a green label holder. Population: 7 in 66, 1 finer (11/08).
*Ex: Long Beach Signature (Heritage, 2/2002), lot 5603; The Dr. Robert Wharton Collection (Heritage, 1/2004), lot 5767.*
*From The Scott Rudolph Collection.*(#5571)

## Exemplary PR66 Cameo 1872 Quarter

2403 **1872 PR66 Cameo NGC. CAC.** A brilliant Premium Gem with mirrored fields and evenly frosted motifs. This gorgeous specimen is well struck and undisturbed, although a strong loupe reveals a die cut on the left shield border. This diagnostic, mentioned in the Breen proof *Encyclopedia,* is present on all proof quarters of this date. Gem business strikes of this issue are nearly nonexistent, so this piece should represent a great opportunity for the advanced Seated quarter specialist. Census: 9 in 66 Cameo, 6 finer (11/08).
*Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 679, which realized $2,875.*
*From The Scott Rudolph Collection.*(#85571)

## Gem Proof No Arrows 1873 Quarter

2404 **1873 No Arrows PR65 PCGS.** Attractive peach-gold and apple-green shades envelop this meticulously struck and splendidly undisturbed Gem. A meager 600 proofs were struck prior to the addition of Arrows. Population: 13 in 65, 5 finer (11/08).
*Ex: Atlanta ANA Signature (Heritage, 4/2006), lot 554.*
*From The Scott Rudolph Collection.*(#5572)

## Delightful PR65 Arrows 1873 Quarter

2405 **1873 Arrows PR65 NGC.** An intricately struck and impressively undisturbed piece. Light and consistent apricot-gray color does not conceal the modest white on black contrast, although this Gem is undesignated as Cameo. Only 540 proofs were struck, and high grade survivors of that low emission are desired to represent the two-year Arrows subtype. Census: 11 in 65, 15 finer (11/08).
*Ex: Long Beach Signature (Heritage, 6/2005), lot 5978.*
*From The Scott Rudolph Collection.*(#5574)

## Cameo Gem Proof 1875 Quarter

2406 **1875 PR65 Cameo NGC. CAC.** Type One Reverse. Larry Briggs (1991) writes: "Auction sales over the last decade show the 1875 proof quarter to be the rarest proof quarter of either the 1870's or 1880's proof quarters! Possibly the mintage being incorrect or many proofs of this year being melted. Regardless quite elusive and underrated." We would add that Gem-quality Cameos, such as the example in this lot, are especially difficult to locate, as the census figures below indicate. The pronounced field-motif contrast on this untoned example is evident at all angles, and the design elements are sharply struck, save for the usual weakness in most of the star centers. Census: 7 in 65 Cameo, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#85576)

## Lovely 1876 Seated Quarter, PR66

2407 **1876 PR66 NGC. CAC.** This centennial year quarter is a lovely Premium Gem proof with ivory surfaces that have gold, violet, blue, and iridescent toning, vibrant on the obverse and subtle on the reverse. It is a splendid piece with excellent cameo contrast. Census: 18 in 66, 7 finer (12/08).
*From The Scott Rudolph Collection.*(#5577)

## Pleasing PR64 Cameo 1876 Quarter

2408 **1876 PR64 Cameo PCGS. CAC.** A moderately contrasted example that shows little patina and light, smooth frost across the carefully struck central devices. A handful of faint hairlines on the mirrors show up only on close inspection, and this specimen has superior eye appeal to what the grade might suggest. Population: 8 in 64 Cameo, 6 finer (12/08).
*From The Scott Rudolph Collection.* (#85577)

## Premium Gem Proof 1879 Quarter

2409 **1879 PR66 NGC. CAC.** Type Two Reverse. Because the Philadelphia Mint was obligated to strike silver dollars in great quantity throughout 1879, the production of lesser silver denominations suffered. For the 1879 quarter, only 1,100 proofs and 13,600 business strikes were issued. This older holder example has lovely aquamarine, gold, and salmon-pink toning. It is well struck and splendidly preserved. Census: 22 in 66, 10 finer (11/08).
*Ex: Dallas Signature (Heritage, 4/2007), lot 652, which realized $4,025.*
*From The Scott Rudolph Collection.* (#5580)

## Splendid 1879 Quarter, PR66

2410 **1879 PR66 NGC.** The mirrored fields of this Premium Gem proof display mild contrast with the frosted motifs. Essentially untoned, except for some milky speckles in the right obverse field. A well executed strike imparts strong definition to the design elements, and each side is devoid of significant contacts. A few stray hairlines are noted in the obverse fields. Census: 22 in 66, 10 finer (12/08). (#5580)

## Elegant PR67 Cameo 1879 Quarter

2411 **1879 PR67 Cameo NGC.** Golden-brown patina fills the centers, while the obverse border offers lush ocean-blue and magenta colors. A lovingly preserved and meticulously struck Superb Gem. Proofs and commercial strikes combined for only 5,900 pieces, with minting emphasis turned to federally-mandated Morgan dollars. Census: 5 in 67 Cameo, 0 finer (11/08).
*From The Malibu Collection.* (#85580)

## Multicolor PR67 ★ 1880 Quarter

2412 **1880 PR67 ★ NGC.** Type One Reverse. An elegantly toned Superb Gem proof with distinct contrast on the obverse, though the blue-green reverse has toned over too much for such a designation. The obverse is predominantly golden-brown but has peripheral ocean-blue and rose-red bands. Carefully preserved beneath the toning and delightful to behold. A low mintage date due to ceaseless silver dollar coinage.(#5581)

## Gorgeous 1880 Seated Quarter, PR65 Cameo

2413 **1880 PR65 Cameo PCGS.** Type Two Reverse. A blazing, snow-white appearance is presented in conjunction with a sharp strike and deeply mirrored fields. The cameo contrast is nothing short of remarkable with deeply frosted devices. Worthy of a close look and a premium bid. Population: 5 in 65 Cameo, 19 finer (12/08). (#85581)

## Lovely PR66 Cameo 1880 Quarter

2414 **1880 PR66 Cameo PCGS.** Struck shortly after an extensive re-polishing of the dies, as evidenced by the weakness on the reverse scroll. Obverse frostiness is pleasing, and the watery, minimally toned fields are undisturbed save for a small sequence of fine marks just above Liberty's foot. Population: 13 in 66 Cameo, 6 finer (12/08). *From The Scott Rudolph Collection.*(#85581)

## Superlative 1880 Seated Quarter, PR66 Cameo

2415 **1880 PR66 Cameo NGC.** An absolutely stunning Premium Gem Cameo proof with brilliant silver surfaces. The fields are fully and deeply mirrored with few blemishes of any sort. The devices are frosty with exceptional luster. While many of the 13,600 business strikes were prooflike, and resembled proof strikes, there is no doubt that this piece is one of the 1,355 true proofs that were coined in 1880. Census: 16 in 66 Cameo, 20 finer (12/08).(#85581)

## Superb 1880 Quarter PR67 Cameo

2416 **1880 PR67 Cameo NGC.** Type One Reverse. This is a magnificent, completely untoned example that has heavily frosted devices set against deeply mirrored fields that go "black" as the coin is tilted away from the viewer. The boldly impressed design elements further add to the considerable eye appeal. Census: 14 in 67 Cameo, 6 finer (12/08).(#85581)

## Crisp 1881 Seated Liberty Quarter PR66 Cameo

2417 **1881 PR66 Cameo NGC.** The mintage of 975 proofs is under pressure because of the small mintage of only 12,000 business strikes. The present coin is a virtually flawless example, with liquid reflective fields and crisp detail on all the design elements. The contrast effect is strong enough to secure the vaunted Cameo designation from NGC. Census: 11 in 66 Cameo, 10 finer (12/08).(#85582)

## Pleasing 1882 Quarter, PR66

2418 **1882 PR66 PCGS.** A veneer of soft champagne-gold color adorns both sides of this Premium Gem proof, each of which exhibits modest field-device variance. A precision strike leaves strong detail on the design elements, and neither side reveals mentionable contact marks. Population: 14 in 66, 9 finer (12/08).(#5583)

## Gleaming PR66 Cameo 1882 Quarter

2419 **1882 PR66 Cameo NGC. CAC.** Icy devices rise above darkly mirrored fields. An intricately struck and virtually untoned Premium Gem that has just a wisp of golden-tan on the obverse rim near 3 o'clock. A low mintage date, as are most from this decade. Census: 7 in 66 Cameo, 11 finer (11/08).
*From The Scott Rudolph Collection.*(#85583)

## Stone-White 1882 Quarter
## Ultra Cameo PR67 ★, Among Finest Known

2420 **1882 PR67 ★ Ultra Cameo NGC.** A brilliant and fully struck Superb Gem that boasts exceptional eye appeal. Every individual design element, including the date, stars, and lettering, has intensive silver frost that provides a remarkable black and white appearance. Business strike mintage for this date was quite low, and today proof examples provide the vast majority of high quality pieces for date collectors. A PR68 Cameo example is the single finer proof representative of this date that has been certified by NGC (11/08).
*Ex: Central States Signature (Heritage, 5/2007), lot 2093, which realized $8,050.*
*From The Scott Rudolph Collection.*(#95583)

## Enchanting PR67 1883 Quarter

2421 **1883 PR67 NGC.** Significantly frosted across the boldly executed devices, though this coin's overarching patina annuls any past contrast. Liquid blue-green shadings dominate the fields, while the centers show small cores of rose and sunset-orange. Census: 19 in 67, 2 finer (12/08).
*From The Scott Rudolph Collection.*(#5584)

## Pleasing 1883 Quarter, PR67

2422 **1883 PR67 NGC.** The reflective fields of this Superb proof yield mild contrast with the satiny motifs, all of which have benefited from a solid strike. More or less concentric rings of electric-blue and purple toning cling to the margins, ceding to light golden-tan centers. Both sides are immaculately preserved. Census: 19 in 67, 2 finer (11/08).
*From The Malibu Collection.*(#5584)

## Lovely PR66 Cameo 1883 Quarter

2423 **1883 PR66 Cameo NGC. CAC.** Delicate almond-gold toning embraces this razor-sharp and virtually immaculate Premium Gem. An outstanding silver proof type coin. Only a minority of 1883 proofs display cameo contrast. Census: 10 in 66 Cameo, 5 finer (11/08).
*Ex: Long Beach Signature (Heritage, 5/2007), lot 901, which realized $3,450.*
*From The Scott Rudolph Collection.*(#85584)

## Magnificent 1885 Quarter
## PR66 ★ Cameo

2424 **1885 PR66 ★ Cameo NGC.** This Premium Gem quarter combines a high technical grade with outstanding eye appeal. The deeply mirrored fields contrast dramatically with the crisply delineated devices. From a proof mintage of 940 pieces, the present coin has been awarded two coveted designations, the star and Cameo. Census: 14 in 66 Cameo, 7 finer (12/08).(#85586)

## Charming PR67 Cameo 1885 Quarter

2425 **1885 PR67 Cameo NGC.** Minimally toned with fantastic contrast and eye appeal. The sharply struck devices exhibit snow-white frost, and though the bright silver-white mirrors are more flashy than deep, there is distinct contrast visible. Impressively preserved. Census: 5 in 67 Cameo, 2 finer (12/08).
*From The Scott Rudolph Collection.*(#85586)

## Splendid 1885 Quarter, PR67 Cameo

2426 **1885 PR67 Cameo PCGS.** Mauve-red and electric-blue colors dominate the peripheries, while the centers remain brilliant. This intricately struck Superb Gem possesses seamless mirrored fields and icy devices. Only a couple of minute, inoffensive contacts on the Seated Liberty denies perfection. Population: 6 in 67 Cameo, 0 finer (11/08).
*From The Malibu Collection.*(#85586)

## Patinated Gem Proof 1886 Quarter

2427 **1886 PR65 NGC.** Brilliant luster radiates beneath iridescent, light toning of pastel rose, electric-blue, and sea-green on this strictly Gem example. The strike is exacting throughout, and even the assistance of a loupe fails to locate any detractions. A low mintage date. Census: 33 in 65, 38 finer (11/08).(#5587)

## White PR67 ★ Cameo 1886 Quarter

2428 **1886 PR67 ★ Cameo NGC.** From both a technical and aesthetic perspective, a remarkable proof Seated Liberty quarter. Both sides are completely untoned, and exhibit intense reflective qualities in the fields that generate dramatic field-to-device contrast. When certified, NGC felt this coin worthy of the elusive and desirable Star designation. Census: 1 in 67 ★ Cameo, 1 finer (as PR67 Ultra Cameo) with a Star designation (11/08).
*Ex: FUN Signature (Heritage, 1/2004), lot 6047.*
*From The Scott Rudolph Collection.*(#85587)

## Charming PR66 1887 Quarter

2429 **1887 PR66 NGC.** Beautifully toned, if a trifle more softly struck than the norm, particularly on the stars. Watery mirrors offer gorgeous reflectivity at the sea-green margins on each side. The central obverse cedes to aquamarine and violet, while gold-orange is prevalent on the reverse. Census: 34 in 66, 11 finer (12/08).
*From The Scott Rudolph Collection.*(#5588)

## Enchanting PR66 Cameo 1888 Quarter

2430 **1888 PR66 Cameo NGC.** Ex: Jules Reiver Collection. An enchanting proof, richly frosted on the central devices with beautiful peripheral color. Bands of sapphire and gold-orange grace the obverse, while the reverse shows more subtle champagne-gray coloration. NGC has graded just two finer Cameo examples (11/08).
*From The Malibu Collection.*(#85589)

## Superb 1889 Quarter, PR67

2431 **1889 PR67 NGC.** The 1889 quarter is a scarce date, with only 12,000 business strike and 711 proof coins minted. The present coin is a spectacular example, sharply struck, with reflective fields under iridescent shades of crimson, gold, and cerulean-blue toning. Eye appeal is spectacular. Census: 10 in 67, 3 finer (12/08).
*From The Scott Rudolph Collection.*(#5590)

### Outstanding 1889 Quarter, PR66 Cameo

2432 **1889 PR66 Cameo NGC.** Outstanding cameo contrast appears on both sides of this Premium Gem proof, each of which is impeccably preserved. Cobalt-blue, purple, and golden-brown toning hugs the margins, ceding to untoned centers. A well directed strike leaves strong definition on the design features.
*From The Malibu Collection.*(#85590)

### Impressive 1890 Seated Liberty Quarter PR64 Ultra Cameo

2433 **1890 PR64 Ultra Cameo NGC. CAC.** The 1890 Seated Liberty quarter is a fairly scarce date in proof, with a recorded mintage of only 590 pieces. The present coin is an impressive Ultra Cameo proof, with eye popping contrast between the deeply mirrored fields and the frosty devices. Census: 2 in 64 Ultra Cameo, 26 finer (12/08).
*From The Scott Rudolph Collection.*(#95591)

### Ultra Cameo PR67 1890 Quarter

2434 **1890 PR67 Ultra Cameo NGC. CAC.** The radiant white devices display exceptional contrast with the flashy and seamless fields. A magnificent Superb Gem that is worthy of the finest specialized holding. Just 590 proofs were struck, and business strikes are also elusive due to a small production of 80,000 pieces. Census: 10 in 67 Ultra Cameo, 7 finer (11/08).
*Ex: Long Beach Signature (Heritage, 2/2008), lot 381, which realized $7,475.*
*From The Scott Rudolph Collection.*(#95591)

### Marvelous PR66 Cameo 1891 Quarter

2435 **1891 PR66 Cameo PCGS. CAC.** Delicate gold-orange tints visit parts of the rims, while the centers are minimally toned with a nearly black-and-white appearance. Considerable frost graces the exquisitely detailed devices. A high-end representative of this final-year proof Seated quarter issue. Population: 5 in 66 Cameo, 2 finer (12/08).
*From The Scott Rudolph Collection.*(#85592)

### Untoned 1891 Quarter PR64 Deep Cameo

2436 **1891 PR64 Deep Cameo PCGS.** The 1891 quarter saw 600 proofs made, a goodly number of which have apparently survived to the present day, at least according to the PCGS and NGC population/census data. Deep/Ultra Cameos are an entirely different story, as the two services have seen a mere 13 pieces, to date. This near-Gem exhibits frosty, well struck motifs that appear to glide over deep watery fields. A few minor handling marks do not disturb. Population: 4 in 64 Deep Cameo, 7 finer (12/08).(#95592)

## BARBER QUARTERS

2437 **1892 MS65 PCGS. CAC.** Type Two Reverse. Deep golden-brown and turquoise-green colors blend throughout this satiny and razor-sharp Gem. The obverse is spectacularly preserved. An interesting die break (as made) on the bust truncation above the 1 in the date.
*From The Plymouth Collection.*(#5601)

2438 **1892 MS66 PCGS.** Type Two Reverse. The apricot, lilac, and copper-gold shades are unquestionably original. An exceptionally attractive Gem that has lustrous semi-prooflike fields and a needle-sharp strike. The remarkably unblemished surfaces further contribute to the eye appeal. Population: 86 in 66, 21 finer (11/08). (#5601)

2439 **1892 MS66 PCGS.** Type Two Reverse, with the wingtip across most of the E in UNITED. This precisely struck Premium Gem is toned in rich tobacco-brown, cream-gray, and aquamarine shades. The surfaces appear immaculate. A first year type coin that provides excellent value.
*From The Scott Rudolph Collection.*(#5601)

## Lushly Toned Superb Gem 1892 Quarter

2440 **1892 MS67 PCGS. CAC.** Type One Reverse. Beautifully patinated in jade-green, cobalt-blue, and caramel-gold. Cartwheel luster sweeps across the undisturbed fields and devices. The strike is razor-sharp, even on such trouble spots as the right (facing) claw. The 1892 was set aside as a novel type, but examples of the present quality are rare. Population: 19 in 67, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#5601)

2441 **1892-O MS65 PCGS.** Type One Reverse. Aquamarine and dove-gray embrace this lustrous and undisturbed Premium Gem. An original and desirable example from the introductory year of the series. Population: 33 in 65, 8 finer (11/08).
*From The Scott Rudolph Collection.*(#5602)

2442 **1892-O MS65 PCGS.** Type One Reverse, with most of the E in UNITED visible. This pretty silver-white Gem is shows good luster, with just a touch of golden accents at the rims. A well-struck piece, as often seen for this first-year O-mint issue.
*From The Plymouth Collection.*(#5602)

2443 **1893 MS65 PCGS. CAC.** Well struck and lustrous, with mottled charcoal, green, blue, and rose toning on each side, which is heaviest near the borders. Carefully preserved and blemish-free, on obverse and reverse alike. A pleasing Gem. Population: 19 in 65, 4 finer (11/08).
*From The Plymouth Collection.*(#5604)

2444 **1893-O MS65 NGC.** Orange-gold patina fills the borders, while the fields and devices are cream-gray. Refreshingly void of contact, and the strike is above average for the New Orleans Mint. Census: 18 in 65, 11 finer (11/08).
*From The Scott Rudolph Collection.*(#5605)

2445 **1893-O MS65 NGC.** A pleasing Gem example of this early New Orleans Barber quarter, solidly struck and frosty with shimmering silver-gray color over each side. Unusually well-preserved with substantial visual appeal. Census: 18 in 65, 11 finer (11/08).
*From The Plymouth Collection.(#5605)*

## Conditionally Rare 1893-O Barber Quarter, MS66

2446 **1893-O MS66 PCGS.** In the second year of the Barber quarter series, nearly 3.4 million pieces were struck at the New Orleans Mint. Despite such a relatively high mintage, however, survivors are scarce in Uncirculated condition. Moreover, in high grades such as this, the number of known examples is minuscule. This exceptional Premium Gem is sharply struck throughout, with only the eagle's right (facing) claw remaining stubbornly incomplete, as usual. Essentially untoned, with a thin layer of creamy patina over the obverse. Population: 8 in 66, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#5605)

## Remarkable Gem 1893-S Barber Quarter

2447 **1893-S MS65 PCGS.** Ex: Friend Collection. Breen-4135. Mintmark Far Right. Writing in 1994 (The Complete Guide to Barber Quarters), David Lawrence states that the 1893-S is difficult to locate in all grades, especially Fine-XF and throughout the Mint State spectrum. Those Uncirculated coins known to NGC and PCGS are concentrated in the MS 62-64 grade range, and only 16 pieces that grade finer than Choice BU are shown on both current population reports (11/08). This remarkable Gem example is well struck, with rich original toning across each side, in pleasing shades of olive-gray, rose, and sea-green. A couple of minor marks on the eagle's shield are all that preclude an even finer grade assessment.
*From The Scott Rudolph Collection.*(#5606)

## Delicately Toned 1893-S Gem Quarter

2448 **1893-S MS65 PCGS.** A mixture of grayish-violet, greenish-gold, and olive-green coloration resides on the lustrous surfaces of each side, and an attentive strike delivers uniform, crisp detail to the design features. There are no marks worthy of individual mention. Population: 8 in 65, 4 finer (12/08).
*From The Plymouth Collection.*(#5606)

2449 **1894 MS65 NGC.** Light mauve, powder blue, and gold toning resides on lustrous surfaces. The design elements are boldly struck, and the reverse surfaces lovingly preserved. A few small marks are noted on Liberty's face. Census: 21 in 65, 6 finer (11/08).
*From The Plymouth Collection.*(#5607)

### Elusive 1894 Barber Quarter, MS66

2450 **1894 MS66 PCGS.** Frosty and delightful with just a touch of ice-blue patina at the margins. The strike is solid, and only a handful of trivial marks appear on each side. A single speck of charcoal-gray patina is noted between the eagle's wing and the arrowheads. PCGS has graded only one coin finer (11/08), a testament to how elusive this early issue can be in high grades.
*From The Scott Rudolph Collection.*(#5607)

2451 **1894-O MS65 NGC.** This is a wonderful Gem example of this better-date Barber quarter, with satiny silver surfaces complementing a bold strike. A slight hint of peripheral gold is noted, more prominent on the reverse. Light clash marks appear on each side. Pleasing, and high-end for the grade. Census: 7 in 65, 10 finer (11/08).
*From The Plymouth Collection.*(#5608)

### Colorful 1894-O Quarter, MS66

2452 **1894-O MS66 NGC.** Satiny with a full complement of cartwheel luster beneath natural gray-rose and crimson toning that gives way to peripheral flashes of blue-green iridescence. The underlying surfaces are nicely frosted and particularly well struck for an O-mint product. Census: 8 in 66, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#5608)

2453 **1894-S MS65 NGC.** Brilliant luster radiates from the surfaces of this marvelous silver-white Gem. A couple of faint marks on Liberty's cheek prevent a higher grade, but the strike is razor-sharp and the eye appeal is irrefutable. Census: 10 in 65, 3 finer (11/08).
*From The Scott Rudolph Collection.*(#5609)

2454 **1894-S MS65 PCGS.** Nice luster peeks through medium intensity electric-blue and orange-mauve toning, and the design elements are sharply struck throughout. A few minute marks on Liberty's cheek are consistent with the grade level. Rather elusive as a Gem despite a substantial original mintage of 2,648,821 pieces. Indeed, PCGS and NGC combined have certified 31 pieces as Gem, with just eight finer. This piece will make a handsome addition to a high-grade Barber quarter set. Population: 21 in 65, 5 finer (11/08).
*From The Plymouth Collection.*(#5609)

2455 **1895 MS65 NGC.** Medium golden-brown and gray lustrous surfaces display cobalt-blue and purple accents, and are well preserved. Nicely struck throughout. Housed in a prior generation holder. (#5610)

2456 **1895 MS65 NGC.** The obverse has an orange-gold field and a mostly untoned portrait. Dashes of navy-blue cling to the rim. The reverse has light plum and rose-gold toning. Lustrous, clean, and intricately struck. Census: 18 in 65, 12 finer (11/08).
*From The Plymouth Collection.*(#5610)

### Conditionally Rare 1895 Barber Quarter, MS66

2457 **1895 MS66 NGC.** The 1895, with its 4.44 million mintage, is a slightly better date, like the 1894 (David Lawrence, 1994). This is a highly appealing example that remains bright white on the obverse with a touch of peripheral gold color, while the reverse is evenly toned in blue-green and gold. A solid strike emboldens the design elements, and radiantly lustrous surfaces are devoid of significant marks. Only a few pieces are found in Premium Gem condition or better. Census: 7 in 66, 5 finer (11/08).
*From The Scott Rudolph Collection.*(#5610)

2458 **1895-O MS64 PCGS.** Lilac and chestnut-tan toning embraces the obverse, while the reverse displays only a hint of gold patina. Lustrous and well preserved with minor strike softness on the fletchings. Scarce in Mint State despite a generous mintage of more than 2.8 million pieces. Population: 36 in 64, 9 finer (11/08).
*From The Scott Rudolph Collection.*(#5611)

### Notable Gem 1895-O Quarter

2459 **1895-O MS65 NGC.** Most examples of Barber coinage are elusive in Gem or better grades, and the same holds true for pieces from New Orleans. The categories converge on this delectable Gem, which displays lovely amethyst, plum, and orange colors over subtly lustrous surfaces. Well-defined with a single horizontal flaw of note on the cheek. Census: 11 in 65, 7 finer (11/08).
*From The Scott Rudolph Collection.*(#5611)

2460 **1895-O MS65 NGC.** The satiny surfaces of this O-mint Gem reveal attractive luster and exquisitely struck motifs. Nearly imperceptible hints of incipient tan-gold color cling to the margins of this beautifully preserved, lovely specimen. Census: 11 in 65, 7 finer (11/08).
*From The Plymouth Collection.*(#5611)

2461 **1895-S MS64 NGC.** Lawrence-101. The mintmark is sharply repunched northwest. A delicately toned, exquisitely struck, and satiny near-Gem. Unabraded save for a solitary faint thin mark on the upper right obverse field. Census: 21 in 64, 12 finer (11/08).
*From The Scott Rudolph Collection.*(#5612)

## Exquisite Gem 1895-S Quarter

2462 **1895-S MS65 NGC.** Lawrence-101. The mintmark is obviously repunched. Brilliant save for glimpses of gold along the borders. This handsome Gem has clean surfaces and mildly prooflike fields. The strike is unimprovable, and only faint contact on the portrait prevents a higher grade. Census: 7 in 65, 5 finer (11/08).
*From The Plymouth Collection.*(#5612)

2463 **1896 MS65 NGC.** Fully detailed with a liberal amount of frostiness over the central devices, being accented on each side in lovely golden-orange patina. A tiny planchet streak above star 7 does not adversely affect the coin's solid Gem status. Census: 19 in 65, 9 finer (11/08).
*From The Plymouth Collection.*(#5613)

## Lightly Toned MS66 1896-O Quarter

2464 **1896-O MS66 NGC.** Sometimes overlooked in favor of its S-mint counterpart, the '96-O is an elusive, conditionally challenging issue in its own right. The currently offered Premium Gem is one of only nine pieces so graded by NGC and PCGS combined, with just two coins certified even finer, as of (11/08). The needle-sharp and nearly unabraded surfaces exhibit a soft, creamy texture that is highly attractive. Interesting clashmarks are present near Liberty's nose and opposite near the arrows.
*From The Plymouth Collection.*(#5614)

2465 **1896-S Good 6 PCGS.** While heavily worn, all of the design elements are entirely outlined and both sides have complete rims. The surfaces exhibit pale gray patina with hints of rose toning. (#5615)

## Elusive 1896-S Barber Quarter, F12

2466 **1896-S Fine 12 PCGS.** The 1896-S Barber quarter boasts the second lowest mintage of the series, with only 188,039 pieces coined. In *The Complete Guide to Barber Quarters*, David Lawrence states the coin is R.5 in F/VF grades. This example has moderate even wear distributed across all surfaces. Much original detail remains, and there are no major problems.(#5615)

2467 **1896-S—Corroded—ICG. VF20 Details.** A mid-range representative, generally silver-gray with areas of sage-violet at Liberty's chin and neck, as well as select areas of the margins; these zones also correspond with the light corrosion that accounts for the details grade.(#5615)

2468 **1897 MS65 NGC.** An exacting strike completes the design elements on this wonderful Gem. White surfaces exhibit full luster, and are devoid of significant marks. Census: 20 in 65, 8 finer (11/08).
*From The Scott Rudolph Collection.*(#5616)

## Vibrant 1897 Quarter, MS66

2469 **1897 MS66 NGC.** Both sides of this lovely Premium Gem Barber quarter possess a satiny finish with vibrant luster. A penetrating strike manifests itself in strong delineation on the motifs. Close inspection reveals the surfaces to be impeccably preserved. Census: 7 in 66, 1 finer (12/08).
*From The Plymouth Collection.*(#5616)

## Lush Gem 1897-O Quarter

2470 **1897-O MS65 PCGS. CAC.** Dramatic jade-green and golden-brown invigorate this satiny and unblemished Gem. Even the right shield corner is well struck, and any incompleteness of design is limited to the fletchings. A prize for the connoisseur of originally toned coinage. Population: 9 in 65, 7 finer (11/08).
*From The Plymouth Collection.*(#5617)

## Finest PCGS Graded 1897-O Quarter, MS66 Tied With Seven Others for Top Honors

2471 **1897-O MS66 PCGS.** The 1897 branch mint quarters are key issues in the series, although they are more plentiful than the "big three" of this design, the 1896-S, 1901-S, and 1913-S quarters. This boldly detailed piece has full satin luster beneath light gold toning with splendid bright blue and russet accents. Population: 8 in 66, 0 finer (12/08).
*From The Findley Collection.*(#5617)

## Pleasing Gem 1897-S Quarter

2472 **1897-S MS65 PCGS.** This razor-sharp and nearly brilliant Gem has booming luster and a pristine reverse. The obverse field is also immaculate, and even the portrait has only marginal grazes. Truly an exceptional example of this low mintage issue. Population: 11 in 65, 4 finer (11/08).
*From The Plymouth Collection.*(#5618)

2473 **1898 MS65 NGC.** Sparkling luster pokes through splashes of light gray and medium intensity electric-blue and purple toning. Impeccably preserved surfaces exhibit sharply struck design elements. Census: 23 in 65, 18 finer (11/08).
*From The Plymouth Collection.*(#5619)

2474 **1898 MS66 PCGS.** A nice, collectible Premium Gem example of this available Barber quarter issue, with silvery surfaces that are accented on the lower obverse by a ring of golden-orange. A well-struck and attractive piece.
*From The Findley Collection.*(#5619)

2475 **1898 MS66 PCGS.** Superior mint luster underlies the rich gray, olive, and yellow toning that is seen over each side of this well-balanced coin. Sharply defined in all areas. Population: 15 in 66, 4 finer (12/08).(#5619)

## Rare 1898-O Quarter, MS65

2476 **1898-O MS65 NGC.** The 1898-O quarter is rare simply because few were saved at the time of issue. This piece offers lustrous, frosty gold-tinged silver surfaces with excellent eye appeal. The strike is nearly full (showing as weakness only on the eagle's right [facing] claw) and quite extraordinary for an O-mint coin of the era. Census: 4 in 65, 4 finer (11/08).
*From The Scott Rudolph Collection.*(#5620)

## Elusive Gem 1898-S Quarter

2477 **1898-S MS65 NGC.** David Lawrence and John Feigenbaum in *The Complete Guide to Certified Barber Coinage* call the 1898-S "our new favorite date of the series," adding that it is R.6 in Mint State. This is a thoroughly lustrous and virtually brilliant Gem with exemplary eye appeal and remarkably clean fields. Census: 7 in 65, 5 finer (11/08).
*Ex: Southwest Collection (Heritage, 2/2008), lot 399, which realized $8,050.*
*From The Scott Rudolph Collection.*(#5621)

## Sharply Struck 1898-S MS66 Quarter

2478 **1898-S MS66 NGC.** A few whispers of nearly imperceptible light tan color gravitate to the margins of this conditionally rare example. The sharp strike is uncommon for an S-mint issue in this series, and the surfaces are devoid of even the most trivial distraction. Census: 3 in 66, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#5621)

2479 **1899 MS66 NGC.** Subtle olive-green toning visits the borders of this otherwise brilliant Premium Gem. Well struck with blazing luster and pristine fields. The cheek has only minuscule contact. Census: 7 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#5622)

## Well Struck 1899 Quarter, MS66

2480 **1899 MS66 PCGS.** The lustrous surfaces of this Premium Gem display a medley of medium gray, orange, yellow-gold, and olive-green patina. A well executed strike imparts sharp delineation to the design features, enhancing the coin's overall eye appeal. Nicely preserved. Population: 11 in 66, 1 finer (12/08).
*From The Plymouth Collection.*(#5622)

## Sparkling Gem 1899-O Quarter

2481 **1899-O MS65 PCGS. CAC.** The 1899-O is scarcer than its 2.644 million mintage implies, especially in the better grades of Mint State. The Gem presented in this lot exhibits sparkling luster and is essentially untoned. A well executed strike imparts sharp definition to the design elements, with the exception of weakness on the eagle's claws and the arrow feathers. Some minor handling marks are within the parameters of the grade designation. Population: 9 in 65, 5 finer (11/08).
*From The Scott Rudolph Collection.*(#5623)

## Dazzling MS65 1899-O Quarter

2482 **1899-O MS65 NGC.** For the Barber quarter dollar aficionado, this Gem Mint State example will be a pleasure to own. The surfaces are fully brilliant and, aside from the fletchings, the design detail is boldly defined. As of (11/08), just eight finer examples have been certified by PCGS and NGC combined, and we cannot imagine any with finer aesthetic appeal.
*From The Plymouth Collection.*(#5623)

## Satiny Gem 1899-S Quarter

2483 **1899-S MS66 PCGS. CAC.** This satiny-white example offers excellent sharpness over the liberally frosted devices and smooth surfaces. Whereas the 1899 has the highest mintage (12.6 million pieces) in the Barber quarter series, its S-mint counterpart was produced to the extent of only 708,000 coins. Despite this limited mintage, however, the 1899-S is occasionally found in better circulated grades after being repatriated from the Philippines. Uncirculated examples, however, are a challenge, and Premium Gems such as this almost never surface. Population: 8 in 66, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#5624)

2484 **1900 MS65 PCGS. CAC.** A terrific Gem type coin from this popular turn-of-the-century year. Crisply struck, much of each side is brilliant still, but almost as much of each side shows an accent of deep reddish-russet toning. Remarkably smooth over the cheek of Liberty and problem-free elsewhere. A lustrous example. Population: 28 in 65, 14 finer (11/08).
*From The Plymouth Collection.*(#5625)

## Highly Lustrous 1900-O Quarter, MS65

2485 **1900-O MS65 PCGS. CAC.** A faintly toned and thoroughly lustrous Gem with exceptionally smooth fields and devices. The right-side stars, the fletchings, and the right wingtip are typically struck, but the remainder of the design is bold. Rare as a Gem despite a plentiful mintage. Population: 8 in 65, 9 finer (11/08).
*From The Scott Rudolph Collection.*(#5626)

## Delightful Gem 1900-O Quarter

2486 **1900-O MS65 NGC.** Type One Obverse, Type Two Reverse. This expertly struck Gem has light olive-gold toning and booming cartwheel luster. Exceptionally free from marks, and an important example of this turn of the century New Orleans issue. Census: 8 in 65, 6 finer (11/08).
*From The Plymouth Collection.*(#5626)

## Pleasing 1900-S Quarter, MS65

2487 **1900-S MS65 NGC.** Type One Obverse, Type Three Reverse. This intricately struck and lustrous Gem is gorgeously preserved and offers light tawny-gold toning. An outstanding example of this underappreciated issue, which is very scarce in Mint State. Census: 2 in 65, 8 finer (11/08).
*Ex: Central States Signature (Heritage, 5/2005), lot 6928.*
*From The Plymouth Collection.*(#5627)

### Sharp 1900-S Quarter, MS67

2488 **1900-S MS67 NGC.** Type One Obverse, Type Two Reverse. A brilliant, lustrous, and well struck coin with virtually pristine fields. The obverse has at least a dozen separate die cracks (as struck) which together encircle the peripheries. The reverse has a perfect die state. Only a few faint grazes on the portrait deny perfection. Census: 4 in 67, 0 finer (11/08).
*Ex: Central States (Heritage, 4/2001), lot 387.*
*From The Scott Rudolph Collection.*(#5627)

2489 **1901 MS65 PCGS. CAC.** Blushes of light gray, sky-blue, and violet toning reside on the lustrous, minimally abraded surfaces. An attentive strike imparts relatively sharp definition to the design elements. Population: 34 in 65, 10 finer (11/08).
*From The Plymouth Collection.*(#5628)

### Well Struck 1901-O Gem Quarter

2490 **1901-O MS65 PCGS. CAC.** Ex: Friend Collection. Hints of barely discernible gold color gravitate to the margins of this Gem O-mint specimen, and an attentive strike leaves sharp definition on the design elements. Lustrous surfaces are devoid of significant contact marks. Some light peripheral cracks are visible on the reverse. Population: 5 in 65, 5 finer (11/08).
*From The Scott Rudolph Collection.*(#5629)

### Beautiful 1901-O Quarter, MS65

2491 **1901-O MS65 NGC.** The 1901-O Barber quarter issue is a well-known rarity in the series, and Gems are few and far between. This example offers silver centers with a wisp of olive-gold at the rims. A good strike with minor incompleteness limited to the right shield corner. Census: 6 in 65, 1 finer (11/08).
*From The Plymouth Collection.*(#5629)

### Lustrous 1901-O Gem Quarter

2492 **1901-O MS65 PCGS.** The lustrous surfaces of this Gem O-mint display splashes of violet, olive-green, and light tan. Relatively sharp definition shows on most of the design elements, except for the usual softness on the upper right corner of the shield. There are no marks of significant consequence. Population: 5 in 65, 5 finer (12/08). (#5629)

### Fair Series Key 1901-S Quarter

2493 **1901-S Fair 2 PCGS.** The key date of the Barber quarter series, despite strong competition from the 1896-S and 1913-S. 80 to 85% of the date is clear, and the mintmark is well outlined and distinct from the wide band of peripheral wear. On the obverse, the left-side stars are mostly bold, while the right-side stars are partly present. (#5630)

### Coveted Good 6 1901-S Quarter

2494 **1901-S Good 6 PCGS.** All peripheral stars and letters are completely separated from the rim. Stone-gray and olive-gold with deeper dove-gray along the borders and on portions of the reverse field. The eagle's neck and shield are slightly bright. A worthy example of this coveted key date. The 1913-S has a lower mintage, but by then, many more West Coast collectors were assembling mintmarked sets.(#5630)

## Desirable 1901-S Quarter, VG10 Details

2495 **1901-S—Scratched—ANACS. VG10 Details.** A few light scratches are visible on each side of this key-date Barber quarter. Otherwise, the surfaces are absolutely original with deep gray toning in the fields and light silver-tan on the devices. LI and TY of LIBERTY are complete, and the B and R are each about half visible. (#5630)

## Splendid 1902 Barber Quarter, MS66

2496 **1902 MS66 NGC.** All Premium Gem Barber quarters are elusive and important, even those from the highest mintage dates. This 1902 is entirely brilliant with satiny silver luster and exceptional design definition. Despite a mintage of more than 12 million coins, NGC and PCGS have combined to certified just 30 examples at this grade level, and only five finer. Census: 6 in 66, 2 finer (12/08). (#5631)

## Sharp Premium Gem 1902 Quarter

2497 **1902 MS66 PCGS. CAC.** Speckled sea-green and reddish-gold toning permeates the underlying frosty surfaces, gathering strength about the peripheral devices. The strike is reasonably sharp and there are few appreciable abrasions. Tough to find nicer than this Premium Gem. Population: 24 in 66, 3 finer (11/08).
*From The Scott Rudolph Collection.*(#5631)

2498 **1902 MS66 PCGS. CAC.** This pleasing turn-of-the-century piece has frosty surfaces accented with speckled olive-green and reddish-gold patina. Sharply struck with no mentionable flaws. PCGS has graded only three coins finer (10/08).
*From The Plymouth Collection.*(#5631)

## Attractive MS64 1902-O Quarter

2499 **1902-O MS64 PCGS. CAC.** Splendid arcs of peach, russet, orange, and blue adorn the periphery. This undisturbed near-Gem has booming luster and superior eye appeal. A good strike with only infrequent areas of minor incompleteness. Population: 13 in 64, 13 finer (11/08).
*Ex: Charlotte ANA Signature (Heritage, 3/2007), lot 687, which realized $2,300.*
*From The Scott Rudolph Collection.*(#5632)

## Scarce, Beautiful Premium Gem 1902-S Barber Quarter

2500 **1902-S MS66 NGC.** Ex: Richmond Collection. This exciting piece is noteworthy for having crystal-clear definition on all of the design elements, and flashy, intense mint luster across the fully brilliant silver-white surfaces. Impressively preserved and nearly pristine; a beautiful Premium Gem example of this conditionally scarce San Francisco Mint issue. Census: 5 in 66, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#5633)

## Outstanding 1902-S Quarter MS66

2501 **1902-S MS66 NGC.** Minted in smaller numbers than the 1902 Philadelphia and New Orleans issues, the 1902-S is a scarce coin in all grades, and a noteworthy rarity at the premium Gem level. Unmarked and vibrantly lustrous, the surfaces alternate between lilac and cobalt-blue iridescence, with additional mottled olive-russet patina on the obverse. The strike is seemingly as sharp as possible, for a business strike Barber quarter from the San Francisco Mint. One of just 11 coins to receive an MS66 grade, from NGC and PCGS combined, this lovely example is bettered by a total of only three others at both services (11/08).
*Ex: Portland Signature (Heritage, 3/2004), lot 5681.*
*From The Plymouth Collection.*(#5633)

## Lavish MS67 1902-S Quarter

2502 **1902-S MS67 NGC. CAC.** Mottled jade-green and salmon-pink endow this lustrous, exceptionally smooth, and exactingly struck Superb Gem. The 1902-S is very scarce in Mint State, even more so than its low mintage of 1.5 million pieces would suggest. Superb Gems rank among the finest certified examples. Housed in a prior generation holder. Census: 1 in 67, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#5633)

## Radiant 1903 Gem Quarter

2503 **1903 MS65 NGC.** Radiant luster exudes from the silver-white surfaces of this gorgeous Gem quarter, and an exacting strike leaves crisp detail on all of the design features. Both sides display a semi-frost finish, and are devoid of serious marks. Census: 3 in 65, 3 finer (12/08).
*From The Plymouth Collection.*(#5634)

## Vibrant 1903 Quarter MS66

2504 **1903 MS66 NGC.** A lovely Premium Gem with deep steel, olive, and blue toning on both sides. The design motifs are all bold, and the fields offer dazzling luster. Thorough evaluation beneath a loupe locates inconspicuous marks on the cheek. Tied for the finest that has been certified by either major grading company. Census: 3 in 66, 0 finer (11/08).
*Ex: Dallas Signature (Heritage, 11/2007), lot 596, which realized $5,175.*
*From The Scott Rudolph Collection.*(#5634)

## Splendid MS65 1903-O Quarter

2505 **1903-O MS65 PCGS. CAC.** Rich peach-gold, lime-green, and dove-gray embrace this shimmering Gem. Only the right (facing) claw and nearby fletchings lack an intricate impression. Splendidly preserved, and certain to be in demand for its quality and dramatic original toning. Population: 11 in 65, 5 finer (11/08).
*From The Plymouth Collection.*(#5635)

## Beautiful MS66 1903-O Quarter

2506 **1903-O MS66 PCGS.** A gorgeous Premium Gem representative of this 20th century O-mint Barber quarter issue, highly elusive in Mint State grades despite a mintage of 3.5 million pieces. The present example is profoundly lustrous beneath waves of dappled gold, forest-green, and sage patina. Beautiful striking definition and impressive preservation complete the immense eye appeal. With just four coins graded at this level by PCGS and only one coin finer (11/08), this is a condition rarity of the highest order.
*From The Scott Rudolph Collection.*
***See: Video Lot Description***(#5635)

## Fantastic MS66 1903-S Quarter

2507 **1903-S MS65 NGC.** Just over a million coins were struck for this issue, and Uncirculated examples are predictably quite scarce. When found, however, they are among the most attractive coins in the series. This piece exemplifies that statement, as the coin has thick, bright mint frost and a strong strike throughout. Essentially untoned and gorgeous. Census: 13 in 65, 3 finer (11/08).
*From The Scott Rudolph Collection.*(#5636)

## Original Gem 1903-S Quarter

2508 **1903-S MS65 PCGS.** This crisply struck Gem is draped in dusky tan-gold and cream-gray toning. Satin luster traverses surfaces unabraded save for subtle contact on the lower portion of the shield. The lower mintage 1903-S, one of just over 1 million pieces struck, is scarce and sought-after in grades of Fine or better. Certified in a green label holder. Population: 13 in 65, 10 finer (11/08).
*Ex: Long Beach Signature (Heritage, 6/2005), lot 6017.*
*From The Plymouth Collection.*(#5636)

2509 **1904 MS65 PCGS. CAC.** A high-mintage issue (9,588,143 business strikes) that becomes challenging in the better Uncirculated grades. Speckles of faint olive-tan are more pronounced on the obverse of this highly lustrous Gem. A solid strike left sharp definition on the design features, and close examination reveals no significant marks on either side. Great technical quality and aesthetic appeal. Population: 15 in 65, 9 finer (11/08).
*From The Plymouth Collection.*(#5637)

## Appealing Gem 1904-O Barber Quarter

2510 **1904-O MS65 PCGS.** This is an issue that has always appealed to collectors, since problem-free specimens are at a premium. Golden-gray highlights predominate on both sides of this example, with a small patch of russet toning appearing on the eagle's right (facing) wing. Interestingly, although the strike is nearly full on the usually weak spots—the hair above the forehead, the eagle's claw, the right shield corner—only star 11 on the obverse is mushy. A nice, attractive Gem.
*From The Scott Rudolph Collection.*(#5638)

## Dusky MS65 1904-O Quarter

2511 **1904-O MS65 PCGS.** More than 2.4 million quarters were produced at the New Orleans Mint this year, yet the 1904-O is a lesser-seen issue in circulated grades and is particularly elusive in Mint State. As befits the grade, the strike on this Gem representative is bold for an O-mint and there are no perceptible abrasions beneath a veil of golden-gray patina. Population: 11 in 65, 16 finer (11/08).
*From The Plymouth Collection.*(#5638)

2512 **1905 MS65 PCGS. CAC.** Golden-brown, aqua, olive, and lavender coloration blankets lustrous surfaces that display well struck design features. A few trivial obverse ticks are not in the least bothersome. Population: 17 in 65, 12 finer (11/08).
*From The Plymouth Collection.*(#5639)

## Pursued Gem 1905-O Quarter

2513 **1905-O MS65 NGC.** This better date New Orleans quarter has potent luster and a nearly untoned appearance. Surface imperfections are minimal, and the strike is bold save for some merging on the fletchings and right shield corner. Census: 2 in 65, 3 finer (11/08).
*From The Southwest Collection.*
*From The Scott Rudolph Collection.*(#5640)

## Richly Toned Gem 1905-O Quarter

2514 **1905-O MS65 PCGS.** Deep navy-blue and plum-red highlights frame the lighter tan centers of this extraordinary '05-O quarter. The strike is above average throughout and evidence of contact is limited to trivial grazes on the neck. Not only is this issue difficult to find well struck, but coins in the higher circulated grades are equally as scarce as Mint State survivors. Population: 8 in 65, 11 finer (11/08).
*From The Plymouth Collection.*(#5640)

2515 **1905-S MS64 NGC.** Light powder-blue and almond-gold alternate across this shimmering and impressively preserved near-Gem. A bold strike despite minor merging on the fletchings. Census: 17 in 64, 13 finer (11/08).
*From The Scott Rudolph Collection.*(#5641)

## Vibrant 1905-S Quarter MS65

2516 **1905-S MS65 NGC.** Hints of gold grace this lustrous stone-gray Gem. Only the fletchings lack a precise strike, and the reverse is essentially immaculate. The obverse is smooth save for a thin mark beneath Liberty's eye. Very scarce in any Mint State grade, and rare as Gem. Census: 6 in 65, 7 finer (11/08).
*From The Plymouth Collection.*(#5641)

2517 **1906 MS65 PCGS.** Frosty luster adorns the well cared for surfaces of this adequately struck Gem. Some light gray freckles visit each side. Population: 51 in 65, 16 finer (11/08).
*From The Plymouth Collection.*(#5642)

## Exceptional MS66 1906 Quarter

2518 **1906 MS66 PCGS.** Vibrant mint luster brightens this unmarked and precisely struck Premium Gem. Medium sun-gold toning enriches both sides. The quality is outstanding, and those in search of an exemplary Barber type coin need look no further. Population: 14 in 66, 2 finer (11/08).
*From The James Mossman Collection.*(#5642)

## Lustrous 1906-D Quarter, MS65

2519 **1906-D MS65 PCGS. CAC.** A lightly toned and lustrous quarter that has a clean obverse and a pristine reverse. Well struck, as only the arrow feathers lack full definition. Although readily available in lower circulated grades, this issue is tough to find as a Gem. Population: 17 in 65, 9 finer (11/08).
*From The Scott Rudolph Collection.*(#5643)

2520 **1906-D MS65 NGC.** Vibrant luster emanates from the minimally abraded surfaces of this gorgeous Gem, and a well directed strike leaves strong definition on the design features, save for a couple of obverse star centers and the arrow feathers. Hints of barely discernible tan color occur at the margins under magnification. Census: 18 in 65, 1 finer (11/08).
*From The Plymouth Collection.*(#5643)

2521 **1906-O MS65 PCGS. CAC.** Sharply struck with bright satin luster and nearly untoned silver-gray surfaces. The reverse appears pristine, and the obverse has a few nearly imperceptible grazes on the portrait. Population: 33 in 65, 25 finer (11/08).
*Ex: New York Signature (Heritage, 6/2005), lot 5533; Summer FUN Signature (Heritage, 7/2007), lot 759, which realized $1,725.*
*From The Scott Rudolph Collection.*(#5644)

2522 **1906-O MS65 NGC.** Luminous beneath rich violet-gray, peach, and rose patina. A well struck and suitably preserved survivor from the last years of the New Orleans Mint. Census: 22 in 65, 12 finer (11/08).
*From The Plymouth Collection.*(#5644)

## Worthy Premium Gem 1906-O Quarter

2523 **1906-O MS66 PCGS. CAC.** Shades of color ranging from burnt orange to burgundy to cobalt blue awash the lustrous surfaces of this desirable piece. The surfaces bear a minimum of contact marks. The obverse border displays a few deep russet freckles. 1906 saw the opening of the Denver Mint, an event which undoubtedly hastened the demise of the New Orleans Mint three years later. Population: 20 in 66, 5 finer (11/08).
*From The Scott Rudolph Collection.*(#5644)

2524 **1907 MS65 PCGS.** Lightly toned in golden-tan on each side and refreshingly free from significant marks. The design elements are quite well defined. Population: 35 in 65, 16 finer (11/08).
*From The Plymouth Collection.*(#5645)

## Pleasing 1907 Quarter, MS66

2525 **1907 MS66 PCGS. CAC.** Light gold-beige toning enhances the visual effect of the smooth satin surfaces of this coin. The strike is strong, if not full, and those few marks visible to the naked eye do not detract. Although by no means a rare date, the 1907 quarter is tough to find with this quality and rare nicer. Population: 15 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#5645)

## Attractive Gem 1907-D Quarter

2526 **1907-D MS65 PCGS. CAC.** Circulated and lower Mint State 1907-D quarters are readily available, but higher Uncirculated coins are more elusive. Just 15 Gems have been certified by PCGS and NGC combined, and a mere six coins are graded finer. This issue is often weakly struck, but the present MS65 example displays relatively good definition. Only a couple of the obverse star centers, and the eagle's left (right facing) claw and adjacent arrow feathers are weak. Occasional splashes of lavender, cobalt-blue, and golden-tan patina visit well preserved and radiantly lustrous surfaces. Population: 9 in 65, 3 finer (11/08).
*Ex: Central States Signature (Heritage, 4/2006), which realized $2,300.*
*From The Plymouth Collection.*(#5646)

2527 **1907-O MS65 PCGS.** Highly lustrous and boldly struck, this attractive Gem displays a light coating of speckled tan color over the obverse, while the reverse remains brilliant. A good strike despite minor softness on the claws. The reverse appears pristine, and the obverse has only faint marks on the cheek and a fingerprint trace near 9 o'clock. Population: 19 in 65, 11 finer (11/08).
*Ex: Denver Signature (Heritage, 8/2006), lot 1215.*
*From The Scott Rudolph Collection.*(#5647)

2528 **1907-O MS65 PCGS. CAC.** Whispers of russet and electric-blue visit the borders of this highly attractive Gem, being somewhat deeper in hue on the reverse. Lustrous surfaces exhibit well struck design elements, and are nicely preserved. Population: 19 in 65, 11 finer (11/08).
*From The Plymouth Collection.*(#5647)

## Splendid MS65 1907-S Quarter

2529 **1907-S MS65 NGC.** Forest-green, plum-red, and golden-brown toning dominates the borders, but both centers are brilliant. An impressively mark-free Gem that has a good strike despite minor blending on the mintmark, claws, and right shield corner. Census: 6 in 65, 5 finer (11/08).
*Ex: Belle Glade Collection, Part Two (Heritage, 8/2007), lot 711, which realized $4,887.50.*
*From The Scott Rudolph Collection.*(#5648)

## Patinated Gem 1907-S Quarter

2530 **1907-S MS65 PCGS.** The 1907-S had a modest mintage of 1.3 million pieces. However, it is a challenging issue to locate in problem-free XF and AU condition, indicating the vast majority of the mintage was dropped into circulation shortly after production. Gems are rare, and PCGS has only certified 10 others as MS65 with eight finer (10/08). This originally toned example displays gray-rose on the central reverse and rich sea-green toning around the outer portions of each side. Well preserved, and the strike is good save for typical blending on the right shield corner.
*Ex: Portland Signature (Heritage, 3/2004), lot 5683, which realized $2,817.50.*
*From The Plymouth Collection.*(#5648)

2531 **1908 MS65 PCGS.** Olive-gray and russet patina become deeper in hue at the margins of this lustrous Gem. Nicely struck and minimally abraded. Population: 27 in 65, 16 finer (11/08).
*From The Plymouth Collection.*(#5649)

2532 **1908-D MS65 PCGS.** Ex: Dale Friend Collection. Light tan-gold graces the obverse center, framed by sea-green toning. The reverse is primarily aquamarine with narrow bands of orange and gold throughout the periphery. Well struck and lustrous with pleasing surfaces. Population: 17 in 65, 11 finer (11/08).
*From The Scott Rudolph Collection.*(#5650)

2533 **1908-D MS65 PCGS.** Pleasing luster radiates from both sides of this lovely Gem, each of which displays a few light gray speckles. Nicely preserved surfaces are well impressed, except for the usual minor softness on the arrow feathers and adjacent claw. Population: 17 in 65, 11 finer (11/08).
*From The Plymouth Collection.*(#5650)

2534 **1908-O MS65 PCGS.** Autumn-gold and emerald-green endows the borders of this lustrous and attentively struck Gem. The fields and devices are pearl-gray. The reverse is practically pristine, and the obverse exhibits only the faintest grazes. Population: 28 in 65, 9 finer (11/08).
*From The Scott Rudolph Collection.*(#5651)

2535 **1908-O MS65 PCGS. CAC.** Toned with light blue with flashy gold highlights in the fields. The strike is sharp for the date, and we note some scattered grade-consistent ticks on Liberty's face and hair.
*From The Plymouth Collection.*(#5651)

## Fabulous Gem 1908-S Quarter

2536 **1908-S MS65 NGC.** Subtle plum, lilac, and orange peripheral shadings frame minimally toned centers that show strong strikes and impressive luster. This lower-mintage issue, though not so elusive as the S-mint Barber quarter keys, is nonetheless highly elusive at the Gem level. Census: 12 in 65, 9 finer (11/08).
*From The Scott Rudolph Collection.*(#5652)

## Impressive 1908-S Quarter MS66

2537 **1908-S MS66 PCGS.** A scarcer Barber quarter issue with a mintage of slightly more than three-quarters of a million pieces. This lustrous Premium Gem exhibits a light dusting of orange-gold at the margins. The strike is essentially full, and there are no singular abrasions save for two hair-thin vertical marks on the portrait. Population: 4 in 66, 2 finer (11/08).
*Ex: Southwest Collection (Heritage, 2/2008), lot 433, which realized $7,475.*
*From The Scott Rudolph Collection.*(#5652)

2538 **1909 MS65 PCGS.** Satiny and well frosted, with delicate pastel gray, powder-blue, and gold patina on the obverse and specks of reddish-brown and aqua toning on the reverse. A uniform strike characterizes this lovely Gem. Population: 57 in 65, 18 finer (11/08).
*From The Plymouth Collection.*(#5653)

2539 **1909-D MS65 PCGS.** Freckles of light tan and gray run over the lustrous surfaces of this Gem D-mint representative. The design elements are well impressed, except for softness in a couple of the star centers. Both sides are devoid of significant marks. Population: 25 in 65, 18 finer (11/08).
*From The Plymouth Collection.*(#5654)

## Challenging 1909-D Barber Quarter, MS66

2540 **1909-D MS66 PCGS.** Thick, frosty luster, a bold strike, and a near-total absence of contact marks are all hallmarks of this exceptional Gem. The centers are toned a delicate gray-pink, while rich gold and sea-green patina clings to the edges. An extremely attractive example of this challenging issue, stuck when the Denver Mint was just a few years old. Population: 15 in 66, 3 finer (11/08).
*From The Scott Rudolph Collection.*(#5654)

## Well Struck 1909-O Gem Quarter

2541 **1909-O MS65 NGC.** The low-mintage 1909-O is elusive in AU as well as Mint State, and NGC and PCGS combined have certified only eight coins in Gem condition, with six finer. This silvery example has light grayish-gold highlights, with a small tick on Liberty's jawline determining the grade. The strike is better than usually seen on this issue. A planchet lamination above the right wing is as made. Census: 5 in 65, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#5655)

## Wonderful Gem 1909-O Barber Quarter

2542 **1909-O MS65 PCGS.** The obverse has a bold strike with a few insignificant marks hidden under an olive-brown toning. The reverse is well struck as well with the same colored toning covering a lustrous surface beneath. Great "O" mint quarter for a year set or type coin. Only six coins graded higher by either NGC or PCGS (11/08).(#5655)

2543 **1909-S MS64 PCGS.** Medium golden-gray toning. Well struck save for the base of the fletchings, and the satiny surfaces are uncommonly clean, particularly on the reverse. The upper half of the mintmark is repunched. Boldly clashed beneath Liberty's ear. Population: 28 in 64, 36 finer (11/08).
*Ex: Dallas Signature (Heritage, 4/2007), lot 663, which realized $1,380.*
*From The Scott Rudolph Collection.*(#5656)

2544 **1909-S MS65 NGC.** Scintillating luster embraces both sides of this impressively struck S-mint Gem, and whispers of light gold color cling to the margins. A few grade-consistent marks do not detract from the exquisite eye appeal.
*From The Plymouth Collection.*(#5656)

### Original 1910 Quarter MS66

2545 **1910 MS66 PCGS. CAC.** Like many Barber issues of the 20th century, Premium Gem examples of the 1910 half are condition rarities, since few collectors saved examples of the utilitarian coinage. Speckles of olive-green and gray patina run over highly lustrous surfaces. Sharply struck, and unabraded aside from faint marks on the shield. Population: 17 in 66, 3 finer (11/08).
*From The Scott Rudolph Collection.*(#5657)

2546 **1910 MS66 NGC.** Mottled silver-gray patina graces each side of this Premium Gem, an example from an unexpectedly low mintage of 2.24 million pieces, the lowest of any P-mint Barber quarter except 1913. The strike is decent and the eye appeal is good. Census: 12 in 66, 0 finer (11/08).
*From The Plymouth Collection.*(#5657)

2547 **1910-D MS65 PCGS. CAC.** A bold Gem with frosty silver surfaces and exceptional brilliance. A hint of light gold toning can be seen on the obverse, while the reverse is entirely white. Population: 20 in 65, 11 finer (11/08).
*From The Scott Rudolph Collection.*(#5658)

2548 **1910-D MS65 NGC.** Potent luster issues from the essentially untoned frosty surfaces of this magnificent Gem. A solid strike manifests itself in complete definition on the design elements. A couple of trivial marks fail to detract in the least. Census: 17 in 65, 8 finer (11/08).
*From The Plymouth Collection.*(#5658)

2549 **1911 MS65 NGC.** Blazing luster adorns silver-gray surfaces that are visited by wisps of light tan patina. Well struck, except for portions of the shield. A few minute marks on Liberty's face and neck are mentioned for accuracy. Census: 20 in 65, 4 finer (11/08).
*From The Plymouth Collection.*(#5659)

### Beautiful, Brilliant MS66 1911 Quarter

2550 **1911 MS66 PCGS. CAC.** Surprisingly few high grade 1911 quarters were preserved out of the mintage of 3.72 million pieces. This is a beautiful, fully brilliant example that has either thick satiny or softly frosted mint luster, depending upon how one views such matters. Fully struck on the reverse, there is only the most trivial softness noted (with magnification) on the obverse. The surfaces are exceedingly smooth with no obvious abrasions on either side. Population: 9 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#5659)

### Conditionally Scarce Gem 1911-D Quarter

2551 **1911-D MS65 PCGS.** A thin veil of silver-gray patina overlays both sides of this softly frosted Gem. The 1911-D was long overlooked in the series of Barber quarters, but now is correctly recognized as one of the true scarcities among 20th century issues in Mint State; and a standout rarity as a Gem. Population: 5 in 65, 3 finer (11/08).
*From The Scott Rudolph Collection.*(#5660)

### Lustrous Gem 1911-D Quarter

2552 **1911-D MS65 PCGS.** This lustrous caramel-gold Gem is sharply struck and offers unabraded fields. Only faint contact on the portrait denies a finer third party assessment. Like most branch mint Barber quarters, the 1911-D is seldom encountered in grades above Fine. Population: 5 in 65, 3 finer (11/08).
*From The Plymouth Collection.*(#5660)

### Delightful 1911-S Quarter, MS67

2553 **1911-S MS67 NGC.** Blended gold, gray, yellow, and lime-green runs over the obverse, while the reverse takes on rich forest-green and autumn-brown. Vibrant luster sweeps both sides of this lovely Superb Gem. Sharply struck on all of the design features, with exceptionally cared for surfaces. Census: 7 in 67, 1 finer (11/08).
*Ex: West Palm Beach Signature (Heritage, 7/2007), lot 763, which realized $9,775.*
*From The Scott Rudolph Collection.*(#5661)

2554 **1912 MS65 PCGS.** Whispers of ice-blue and gold patina grace this highly lustrous Gem, which has a good strike despite unimportant softness on the right shield corner and fletchings. A loupe reveals faint marks above the jaw. Population: 73 in 65, 15 finer (11/08).
*Ex: Dallas Signature (Heritage, 4/2007), lot 664, which realized $1,265.*
*From The Scott Rudolph Collection.*(#5662)

2555 **1912 MS65 PCGS.** Boldly struck, save for the eagle's right (facing) talon and upper right shield corner, and lightly toned, with glowing satiny luster and a few minor surface blemishes. Gem quality throughout.
*From The Plymouth Collection.*(#5662)

### Impressive 1912 Quarter MS66

2556 **1912 MS66 PCGS.** Radiant cartwheel luster emanates from the almond-gold surfaces of this minimally abraded Premium Gem. The strike is sharp save for the base of the arrow feathers, and the eye appeal is considerable. A desirable example of this classic and conditionally rare silver type. Population: 14 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#5662)

### Worthy Gem 1912-S Quarter

2557 **1912-S MS65 PCGS.** Dappled autumn-gold and gunmetal-gray enrich this lustrous and nicely struck Gem. Though overshadowed by the two S-mints that follow it, the 1912-S has a comparatively low mintage of its own and requires patience to secure in Mint State. Population: 19 in 65, 11 finer (11/08).
*Ex: Dallas Signature (Heritage, 4/2007), lot 665, which realized $2,530.*
*From The Scott Rudolph Collection.*(#5663)

2558 **1912-S MS65 PCGS.** Lustrous surfaces display faint hints of tan-gold color, and are nicely preserved. Sharply struck, except for softness in the lower right obverse stars and the upper right corner of the shield. Population: 19 in 65, 11 finer (11/08).
*From The Plymouth Collection.*(#5663)

2559 **1912-S MS65 PCGS.** Lots of luster radiate from both sides of this Gem, with good contrast a plus. The coloration is powder-gray, with some areas of deeper charcoal and a couple of hazy areas.
*From The Findley Collection.*(#5663)

### Scarce Gem 1913 Quarter

2560 **1913 MS65 PCGS.** Light to medium straw-gold toning visits this refreshingly mark-free Barber Gem. Only the right shield corner has any indication of incompleteness of strike. A lower mintage Philadelphia date overshadowed by its famous San Francisco counterpart. Population: 40 in 65, 6 finer (11/08).
*From The Plymouth Collection.*(#5664)

2561 **1913-D MS65 PCGS. CAC.** Dappled olive-green and burnt-orange patina is more extensive and deeper in hue on the reverse. A nicely struck piece, devoid of mentionable contacts. Population: 27 in 65, 10 finer (11/08).
*From The Plymouth Collection.*(#5665)

### Gorgeous MS66 1913-D Quarter

2562 **1913-D MS66 PCGS.** A bold striking with numerous die striations surrounding the major devices. Abrasions are virtually non-existent, with just a few incidental ticks on the portrait of Liberty visible under magnification. Generally silver-gray surfaces are immensely lustrous with occasional tan elements. Population: 10 in 66, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#5665)

2563 **1913-S Good 6 PCGS.** Apple-green, lemon-gold, and rose-red invigorate the margins of this otherwise stone-gray key date quarter. All peripheral legends are bold, and two letters of LIBERTY show. Famous for its ultra-low mintage of 40,000 pieces, a lesser production than the coveted 1901-S.(#5666)

2564 **1914 MS65 PCGS.** Tawny-gold and gunmetal-gray embrace this splendidly lustrous and well preserved Gem. The strike is typical on the claws and fletchings, but sharp everywhere else. Population: 63 in 65, 21 finer (11/08).
*From The Plymouth Collection.*(#5667)

2565 **1914 MS66 PCGS.** Silver-gray lustrous surfaces display delicate blushes of lime-green and apricot-tan. The reverse is essentially immaculate, and the obverse has only distributed wispy contact. Population: 19 in 66, 2 finer (11/08).
*Ex: Long Beach Signature (Heritage, 2/2005), lot 6630.*
*From The Scott Rudolph Collection.*(#5667)

2566 **1914-D MS65 PCGS.** Satiny with subtle sky-blue patina over the well-preserved surfaces. A lovely example of this later branch mint quarter, attentively struck save for softness on the eagle's talons and the right shield corner. Population: 46 in 65, 10 finer (11/08).
*From The Scott Rudolph Collection.*(#5668)

2567 **1914-D MS65 PCGS. CAC.** Occasional speckles of light gray visit the lustrous surfaces of this Gem. Well struck, except for the upper right shield corner and the right (facing) claw. Just a few grade-consistent marks are noted. Population: 46 in 65, 10 finer (11/08).
*From The Plymouth Collection.*(#5668)

### Gorgeous Premium Gem 1914-D Barber Quarter

2568 **1914-D MS66 PCGS.** A gorgeous example of a Premium Gem Denver Mint Barber quarter. Fields are vibrant and near-perfect with just a hint of golden toning gracing the surfaces. The devices are mostly well struck with no marks or distractions. This piece would make a fine addition to a high quality collection, or even a top-notch Registry Set. Population: 8 in 66, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#5668)

### Lightly Toned 1914-S Quarter, MS64

2569 **1914-S MS64 PCGS. CAC.** Generally well struck, except for the typical localized softness on the reverse. Lustrous surfaces display degrees of greenish-gold and violet patina, which is somewhat more extensive and deeper in hue on the reverse. A handful of ticks on the portrait barely preclude a Gem grade. Population: 17 in 64, 17 finer (11/08).
*From The Scott Rudolph Collection.*(#5669)

### Exquisite Gem 1914-S Quarter

2570 **1914-S MS65 PCGS.** This lustrous Gem has light caramel-gold toning that is more prevalent on the obverse. Marks are essentially absent, and the luster is comprehensive. Boldly struck save for the usual inexactness on the fletchings. The 1914-S is considerably scarcer in Mint State than other issues from the final two years of the series. Population: 12 in 65, 5 finer (11/08).
*From The Plymouth Collection.*(#5669)

2571 **1915 MS65 PCGS.** A highly lustrous and attractive Gem example of this late-date Barber quarter, untoned save for shades of russet at the periphery. Decisively struck, and only a handful of trivial obverse marks deny a higher grade. Population: 87 in 65, 13 finer (11/08).
*Ex: Charlotte ANA Signature (Heritage, 3/2007), lot 694, which realized $1,121.25.*
*From The Scott Rudolph Collection.*(#5670)

2572 **1915 MS65 PCGS.** Golden-tan surfaces display splashes of gray. Sharply struck and lustrous, with minimal marks. Population: 87 in 65, 13 finer (11/08).
*From The Plymouth Collection.*(#5670)

2573 **1915 MS66 PCGS. CAC.** A nearly flawless representative whose satiny, well frosted surfaces are highlighted in speckled golden-gray toning. Close examination reveals a small spot by star 6. Population: 13 in 66, 0 finer (11/08).
*Ex: Long Beach Signature (Heritage, 9/2005), lot 2753.*
*From The Scott Rudolph Collection.*(#5670)

2574 **1915-D MS65 PCGS.** Light golden-gray patina adheres to the lustrous, well cared for surfaces of this D-mint Gem. The usual softness is visible on portions of the shield and on the arrow feathers and adjacent talon.
*From The Plymouth Collection.*(#5671)

2575 **1915-D MS66 PCGS.** Delicate tan-gold and steel-blue toning embraces this lustrous Barber type coin. The reverse is splendidly preserved, and the obverse has only scattered wispy marks. A good strike despite typical indistinctness near the right (facing) claw.
*Ex: Dallas Signature (Heritage, 7/2006), lot 2271, which realized $1,725.*
*From The Scott Rudolph Collection.*(#5671)

### Rare Premium Gem 1915-S Barber Quarter

2576 **1915-S MS66 NGC.** Lustrous and brilliant with a crisp strike and clean fields. The 1915-S is the final S-mint Barber quarter, and one would expect it to be somewhat plentiful, similar to the 1916-D. But the '15-S is scarce in all Mint State grades, and decidedly rare as a Premium Gem. Census: 9 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#5672)

### Colorful 1915-S Quarter MS66

2577 **1915-S MS66 NGC.** Autumn-gold dominates this lustrous Premium Gem, but ocean-blue and olive-gold hug the borders. Sharply struck and minimally abraded. A popular lower mintage issue. Preparations began in 1915 to replace the Barber dime, quarter, and half with designs by private New York artists. Census: 9 in 66, 1 finer (11/08).
*From The Plymouth Collection.*(#5672)

2578 **1916 MS65 PCGS.** The strike is nice and the reverse is nearly devoid of flaws with a touch of peach patina. The obverse has a golden tint with patches of steel-blue peripheral toning and a few light contact marks. Population: 46 in 65, 24 finer (11/08).
*From The Plymouth Collection.*(#5673)

### Shimmering 1916 Barber Quarter, MS66

2579 **1916 MS66 PCGS. CAC.** Sharply struck with shimmering luster and well-preserved surfaces. Olive, tan, russet, and pale gray patina covers both sides. A great example from the last year of issue of the type; the new Standing Liberty design would not be produced until December 16. Population: 21 in 66, 3 finer (11/08).
*From The Scott Rudolph Collection.*(#5673)

2580 **1916-D MS65 PCGS. CAC.** An average strike with full luster beneath light sea-green patina. Close examination reveals a few small marks that do not detract from the pleasing, original appearance.
*From The Plymouth Collection.*(#5674)

### Peripherally Toned 1916-D Quarter MS66

2581 **1916-D MS66 PCGS. CAC.** Dappled tobacco-brown and forest-green toning endows the borders of this lustrous and attractive Premium Gem. Crisply struck save for the fletchings. The reverse is close to immaculate, and obverse preservation is also exceptional. PCGS has graded only six coins finer (11/08).
*From The Scott Rudolph Collection.*(#5674)

## PROOF BARBER QUARTERS

### Extraordinary 1892 Barber Quarter Tied for Finest Certified PR68 Cameo

2582 **1892 PR68 Cameo NGC.** Type Two Reverse, the usual reverse hub for proofs. This is a simply beautiful coin to behold whose mostly untoned surfaces display a shimmering silver-white sheen. There is some light iridescence over the right reverse, but the dominant feature on both sides is the stark contrast between icy devices and glassy fields. There is not a single distracting blemish, as one should expect for the PR68 level of preservation. Crisply struck and desirable. Census: 4 in 68 Cameo, 0 finer (12/08).
*Ex: Trane Collection (Heritage, 1/2003), lot 6787, which realized $7,475.*(#85678)

### Amazing 1893 Barber Quarter PR67 Cameo

2583 **1893 PR67 Cameo PCGS. CAC.** This piece is an absolutely gorgeous coin. The specimen possesses chromium mirrored fields and sharply delineated devices, resulting in a beautiful Cameo effect. The combination of high technical grade and stunning eye appeal makes this coin worthy of a place in the most advanced collection. Population: 11 in 67 Cameo, 3 finer (12/08).
*From The Scott Rudolph Collection.*(#85679)

## Lovely PR68 Cameo 1893 Quarter

2584 **1893 PR68 Cameo NGC.** Only 792 proofs were produced in 1893, quite a fall from the substantial mintage of 1,245 pieces struck in the previous (and first) year. Beautiful golden-brown and apricot colors invigorate the peripheries, while the suitably frosty devices are generally untoned. A sharply struck and well preserved specimen. A faint handling mark on the chin is of little consequence. An exemplary proof Barber type coin. Census: 9 in 68 Cameo, 0 finer (11/08).
*Ex: Central States Signature (Heritage, 5/2005), lot 6964.*
*From The Scott Rudolph Collection.*(#85679)

## Attractive PR66 1894 Quarter

2585 **1894 PR66 PCGS.** With a mintage of 972 pieces, the 1894 quarter is a popular choice for the proof type collector. This gorgeous Premium Gem is exquisitely detailed with deep sea-green, sapphire, and amethyst shadings over the entire obverse. The reverse shows similar peripheral colors around a champagne-gray center. Population: 21 in 66, 10 finer (12/08).
*From The Scott Rudolph Collection.*(#5680)

## Impressive Superb Proof 1894 Quarter

2586 **1894 PR67 NGC.** An impressive Superb Proof with light contrast on each side. Both sides have brilliant silver surfaces with no evidence of toning other than the slightest champagne color limited to the extreme rims along the border. In our opinion, this lovely Gem is deserving of a Cameo designation. Census: 24 in 67, 4 finer (11/08).(#5680)

2587 **1895 PR65 PCGS.** Deeply mirrored and flashy fields on both obverse and reverse serve to highlight the pale overlay of golden and rose toning. A splendid type coin. Population: 31 in 65, 36 finer (12/08).(#5681)

## Spectacular 1895 Barber Quarter, PR67

2588 **1895 PR67 PCGS.** The 1895 Barber quarter is one of the most available issues in proof, making it extremely attractive to type collectors. The present coin is a stunning example, with attractive shades of lavender and gold toning. The frosty devices complement the mirrored fields to produce extraordinary eye appeal. Population: 16 in 67, 1 finer (12/08).(#5681)

## Fabulous 1895 Barber Quarter PR66 Cameo

2589 **1895 PR66 Cameo NGC.** From a proof mintage of 880 pieces, the 1895 date is prized by type collectors, as well as Barber specialists. The present coin is a beautiful representative of this popular date. Deeply mirrored fields flash from silver to black as the coin is rotated. The reflective surfaces contrast boldly with the frosty devices to create the prestigious Cameo effect.(#85681)

## Cameo PR67 1895 Quarter

2590 **1895 PR67 Cameo PCGS.** The frosty devices and glassy fields exhibit light golden toning. A few tiny gray flecks are seen near the second S in STATES. Exactingly struck and exquisitely preserved. The memorable proof obverse die with the curious raised lintmark (as made) southeast of Liberty's eye. Population: 4 in 67 Cameo, 2 finer (12/08).
*From The Scott Rudolph Collection.*(#85681)

2591 **1896 PR65 NGC.** An impressive, fully brilliant Gem with deeply reflective fields and frosty white devices. Although not designated as such, both sides exhibit considerable contrast between the fields and devices. Census: 32 in 65, 76 finer (11/08).(#5682)

## Superb 1896 Barber Quarter PR67 Cameo

2592 **1896 PR67 Cameo NGC.** With a proof mintage of 762 pieces, the 1896 Barber quarter is fairly available. This piece is a Superb Gem, with deeply mirrored fields that complement the strongly delineated devices. The element of contrast is particularly dramatic on this specimen, and NGC has awarded it the coveted Cameo designation. Census: 21 in 67 Cameo, 7 finer (12/08).(#85682)

## Deep Cameo PR67 1896 Quarter

2593 **1896 PR67 Deep Cameo PCGS.** An exquisite Superb Gem. The fields are deeply reflective, and the exactingly struck devices have remarkable frost. A small frosting break appears on the left part of the neck, and a slender luster graze affects the cheek, yet the sheer magnitude of the overall eye appeal makes these tiny quibbles eminently forgivable. Population: 9 in 67 Deep Cameo, 3 finer (11/08).
*Ex: Long Beach Signature (Heritage, 5/2007), lot 943, which realized $7,475.*
*From The Scott Rudolph Collection.*(#95682)

## Delightful PR66 1897 Quarter

2594 **1897 PR66 NGC.** This needle-sharp Premium Gem appears brilliant at first glance, but has wisps of milk-gray across the obverse field. The devices offer moderate cameo contrast with the reflective fields, although this feature is undesignated on the holder. Census: 31 in 66, 18 finer (11/08).
*Ex: Trane Collection (Heritage, 1/2003), lot 6795.*
*From The Scott Rudolph Collection.*(#5683)

## Spectacular 1897 Barber Quarter, PR67 Ultra Cameo

2595 **1897 PR67 Ultra Cameo NGC.** The white-on-black contrast on both sides is spectacular, as the intensely frosted snow-white devices seem to float above the dramatically mirrored, jet-black fields. The devices are crisply produced, with repunching noted on the first A in AMERICA, and the surfaces are immaculate. Amazingly high quality for this late 19th-century proof Barber quarter issue.
*From The Scott Rudolph Collection.*(#95683)

## Gorgeous PR67 Cameo 1898 Quarter

2596 **1898 PR67 Cameo NGC. CAC.** A multicolored assemblage of gold-brown, cobalt-blue, lavender, and olive-green ensures the eye appeal of this beautiful Superb Gem. The devices are consistently frosty and demonstrate pleasing contrast with the reflective fields. The design features are exquisitely struck, and only faint hairlines on the field near the chin deny perfection. Census: 21 in 67 Cameo, 9 finer (11/08).
*From The Scott Rudolph Collection.*(#85684)

2597 **1899 PR64 PCGS.** Vivacious peach, electric-blue, and sea-green colors dominate the reverse, while the obverse exhibits radiant sky-blue, olive, and rose patina. A crisply struck and well preserved specimen. Only 846 pieces were issued.
*Ex: Central States Signature (Heritage, 5/2004), lot 7053.*
*From The Scott Rudolph Collection.*(#5685)

2598 **1900 PR64 NGC.** Bold design elements exhibit frosty luster beneath faint champagne toning. This Choice proof is an attractive cameo piece, despite the lack of such a designation by NGC. (#5686)

## Conditionally Scarce 1900 Barber Quarter, PR66 Cameo

2599 **1900 PR66 Cameo NGC.** Strong field-to-device contrast is the hallmark of this conditionally scarce specimen. Sharply struck and near-pristine, with mostly untoned surfaces that exhibit a slight degree of gold color near the margins. Some wispy die lines on Liberty's jaw and cheekbone fail to harm the eye appeal of this lovely Premium Gem. Census: 10 in 66 Cameo, 18 finer (11/08).
*From The Scott Rudolph Collection.*(#85686)

## Superb Gem Cameo Proof 1901 Quarter

2600 **1901 PR67 Cameo PCGS.** This nicely struck Superb Gem has deeply reflective fields. The obverse displays only light almond-gold patina, although deep olive-green toning covers most of the reverse. The cameo contrast is more pronounced on the obverse. Both sides of the coin seem pristine, even upon close inspection with a magnifier. A mere 813 proofs were struck. Population: 3 in 67 Cameo, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#85687)

2601 **1902 PR64 PCGS. CAC.** Splashes of sun-gold toning visit this nicely mirrored and precisely struck Choice specimen. The fields are unperturbed by hairlines, spots, or other visible flaws. A meager 777 proofs were struck. Housed in a green label holder.
*From The Scott Rudolph Collection.*(#5688)

2602 **1903 PR64 NGC.** Splashes of golden-brown, lime-green, and fire-red endow this boldly impressed and mark-free near-Gem. A scant 755 pieces were struck. Housed in a former generation holder. (#5689)

## Fantastic PR67 Cameo 1903 Quarter

2603 **1903 PR67 Cameo NGC. CAC.** Impressive contrast for this brilliant-era proof issue, with particularly laudable frost on the snow-white central devices. Essentially untoned and especially potent mirrors greatly enhance the visual appeal. Census: 8 in 67 Cameo, 11 finer (12/08).
*From The Scott Rudolph Collection.*(#85689)

## Colorful 1904 Barber Quarter, PR66

2604 **1904 PR66 PCGS.** Unusual but attractive dappled jade, olive, and ice-blue toning covers the obverse, while the reverse is patinated in copper-orange and saffron. Much luster remains under the moderately intense coloration, adding further to the appeal. Population: 27 in 66, 10 finer (12/08).(#5690)

## Delightful PR66 Cameo 1904 Quarter

2605 **1904 PR66 Cameo PCGS. CAC.** Crisply detailed and bright with distinct contrast, though not so much as one might see on a pre-1902 proof Barber quarter. Powerfully mirrored with only occasional glimpses of silver-gray patina present at parts of the obverse fields. Population: 6 in 66 Cameo, 3 finer (12/08).
*From The Scott Rudolph Collection.*(#85690)

## Elegant PR68 1906 Quarter

2606 **1906 PR68 NGC.** Satin luster sweeps this brilliant and beautiful Superb Gem. The devices display moderate contrast with the dazzling fields, although the piece is undesignated as Cameo. There are no noticeable hairlines, and sharply struck design features prevail throughout. A tiny fleck in the left obverse field identifies the coin. Census: 8 in 68, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#5692)

## Stone-White PR68 ★ 1906 Quarter

2607 **1906 PR68 ★ NGC.** A brilliant and penetratingly struck Superb Gem. Both sides display noticeable white on black contrast, although NGC has yet to certify *any* 1906 quarter as Cameo or Ultra Cameo. NGC has encapsulated eight pieces as PR68, but among those, only the present piece has a Star designation (11/08).
*From The Scott Rudolph Collection.*(#5692)

## Richly Toned PR65 1907 Quarter

2608 **1907 PR65 NGC.** A dramatically toned proof Barber quarter that exhibits iridescent mottled electric blue, lime-green, indigo, and lemon-yellow on the obverse, and similar multi-color hues on the reverse. The fields are flashy beneath the toning. An above average strike with minimal incompleteness on the right (facing) claw. Census: 26 in 65, 61 finer (11/08).
*Ex: Central States Signature (Heritage, 4/2006), lot 1588.*
*From The Scott Rudolph Collection.*(#5693)

## Exemplary PR68 1907 Quarter
## Ex: John C. Hugon Collection

2609 **1907 PR68 NGC.** Ex: Hugon. This is a splendid Superb Gem example with rich cobalt-blue color accented with magenta and antique-gold over glassy surfaces on each side. Even close examination with a loupe fails to disclose any spots or mentionable post-striking defects. This one is certainly in the running for the finest known 1907 proof quarter. Population by both services combined: 14 in 68, none are finer (11/08).
*Ex: John C. Hugon Collection (Heritage, 1/2005), lot 4189, which realized $8,050.*
*From The Scott Rudolph Collection.*(#5693)

## Impressive Cameo PR66 1907 Quarter

2610 **1907 PR66 Cameo PCGS.** Contrast is obvious between the frosty devices and the glassy fields. The reverse is brilliant, and the obverse is nearly so despite a glimpse or two of milk-gray on the field. A good strike with limited softness on the right (facing) claw. Population: 10 in 66 Cameo, 5 finer (11/08).
*Ex: New York Signature (Heritage, 7/2004), lot 6168; Long Beach Signature (Heritage, 2/2005), lot 6650.*(#85693)

## Vibrant PR67 Ultra Cameo 1907 Quarter

2611 **1907 PR67 Ultra Cameo NGC. CAC.** Delicate glimpses of gold supply the only color on this otherwise black-and-white Superb Gem, beautifully contrasted with ample frost across the sharply struck devices and glassy, gorgeous mirrors. Amazing eye appeal. Census: 4 in 67 Ultra Cameo, 1 finer (12/08).
*From The Scott Rudolph Collection.*(#95693)

## Delightful 1909 Barber Quarter, PR66

2612 **1909 PR66 PCGS.** Both sides of this delightful Premium Gem proof are deeply toned in a blend of gold, lilac, and blue, with underlying mirrored fields and lustrous devices. The existing field-device contrast is perhaps sufficient to garner a Cameo designation, although the toning masks the effect.
*From The Scott Rudolph Collection.*(#5695)

## Low Mintage 1910 Barber Quarter PR66 Cameo

2613 **1910 PR66 Cameo PCGS. CAC.** The 1910 Barber quarter boasts a small proof mintage of only 551 pieces, the fifth lowest mintage of the series. This issue is often overlooked by collectors, who concentrate on the earlier dates. The coin offered here is an outstanding example, with chromium fields and fully detailed, frosty devices. The coveted Cameo designation is richly deserved. Population: 8 in 66 Cameo, 5 finer (12/08).
*From The Scott Rudolph Collection.*(#85696)

## Better Date 1911 Barber Quarter, PR67

2614 **1911 PR67 NGC.** From a tiny mintage of only 543 pieces, third smallest in the series, the 1911 Barber quarter is an elusive date in proof. The coin offered here is a extremely attractive specimen, with reflective fields under beautiful lilac, gold, and blue toning. Census: 15 in 67, 15 finer (12/08).
*From The Scott Rudolph Collection.*(#5697)

## Amazing 1912 Quarter, PR67 Cameo

2615 **1912 PR67 Cameo NGC.** Only a faint trace of peripheral gold toning is evident on either side of this Superb Gem Cameo proof quarter. The fields have exceptionally deep, nearly unlimited mirrors, and they surround the frosty and highly lustrous devices. Census: 7 in 67 Cameo, 2 finer (12/08).
*From The Scott Rudolph Collection.*(#85698)

## Gorgeous 1913 Quarter, PR68

2616 **1913 PR68 NGC.** This is an absolutely stunning example of the date, and it is important not only for its high quality and amazing eye appeal, but also for the rarity of the associated business strike examples. While the 1913 Philadelphia Mint quarters are certainly not as rare as the San Francisco Mint coins of the same date, they are substantially rarer than common date pieces. This gorgeous Superb Gem example has noticeable contrast between the fields and devices at most angles. Near concentric rings of rainbow-like color graces both sides. Census: 5 in 68, 1 finer (12/08).(#5699)

## Flashy PR68 Cameo 1913 Quarter

2617 **1913 PR68 Cameo NGC.** The PR68 Cameo offered in this lot displays just the slightest hint of incipient yellow-gold color at the margins. Frosted design elements reveal an exacting strike, and offer a pronounced contrast with deeply mirrored fields. As one would expect, close inspection shows no marks, not even pedigree identifiers. A mere 613 proofs were struck in 1913, and the associated business strike production was also low at only 484,000 pieces. Census: 4 in 68 Cameo, 0 finer (11/08).
*Ex: Central States Signature (Heritage, 5/2007), lot 209, which realized $9,775.*
*From The Scott Rudolph Collection.*(#85699)

## Toned Superb Gem Proof 1914 Barber Quarter

2618 **1914 PR67 NGC.** Orange-gold and rose-red centers are bounded by iridescent ocean-blue and plum toning. This exquisitely struck and splendidly unperturbed Superb Gem will satisfy even the most demanding specialist. The mintage of 380 pieces is easily the lowest of the proof type. Census: 17 in 67, 7 finer (11/08).
*From The Scott Rudolph Collection.*(#5700)

# STANDING LIBERTY QUARTERS

## Very Good 1916 Standing Liberty Quarter

2619 **1916 VG8 PCGS.** Every Standing Liberty collector knows that the honor of lowest mintage goes to the 1916. The issue is also important as the introductory date of the type. This stone-gray example has bold legends except for the top of the date and the VS in TRVST. All date digits are readable by the unaided eye. There are no relevant marks or other detractions.(#5704)

## Pleasing 1916 Quarter, Fine 15

2620 **1916 Fine 15 NGC.** Light gray patina darkens slightly in the recesses of this key-date quarter. The design elements retain considerable detail for a moderately circulated coin. Close inspection reveals remarkably clean surfaces. This is a great piece for a mid, and probably even high-grade collection.(#5704)

## Middle-Grade 1916 Standing Liberty Quarter, VF30

2621 **1916 VF30 PCGS.** A moderately worn piece, this quarter had light gray surfaces with hints of pale blue and lilac toning on both sides. While a magnifier reveals a few faint scratches and hidden abrasions, the overall quality is clearly better than expected. This piece should prove to be one of the most affordable 1916 quarters in the current sale.(#5704)

## Classic 1916 Type One Standing Liberty Quarter The Most Sought-After Date, VF30

2622 **1916 VF30 PCGS. CAC.** A moderately worn, mid-grade example of this key issue. The surfaces are medium gray overall with darker accents around some of the devices. The only detracting element on the surfaces of this piece is a scratch vertically bisecting Liberty's midsection. The date and all details are well defined.(#5704)

## Sharp 1916 Standing Quarter, AU55 Details

2623 **1916—Cleaned—ANACS. AU55 Details.** Although it was once cleaned, this important key quarter dollar has pleasing light blue and pale gold toning over silvery-gray surfaces. The strike on this example is sharper than on many we have handled. The 2009 FUN auction provides collectors with quite a choice of 1916 quarters in varying grades and price ranges. If this date is on your want list, the present opportunity is remarkable.(#5704)

## Admirable 1916 Standing Liberty Quarter, MS62

2624 **1916 MS62 NGC.** Hermon MacNeil's famous 1916 Standing Liberty quarter was part of the extensive coinage redesign project of the early 20th century that was begun by President Theodore Roosevelt during the previous decade.

Although the head and shield of this deeply toned quarter are somewhat weak, the remaining details on both sides are nicely brought up. The strike is typical of nearly all survivors from the limited 52,000 coin mintage. Underneath the thick gold, lilac, and iridescent toning is a full quota of frosty luster. The surfaces have a few typical marks that are consistent with the grade.(#5704)

2625 **1917 Type One MS66 Full Head NGC.** Icy-white brilliance encompasses the obverse of this conditionally elusive Premium Gem; the reverse is mostly white, but some faint, milky toning streaks are detected in the upper reverse field. Impressively preserved, with a pair of trivial marks observed on the upper reverse, below VS in PLVRIBVS.
*From The Plymouth Collection.*(#5707)

2626 **1917 Type One MS66 Full Head PCGS.** Sharply struck with full satin luster and radiant honey-gold surfaces. A few tiny contact marks are scattered over the upper half of each side.(#5707)

2627 **1917 Type One MS66 Full Head PCGS.** A jazzy Premium Gem example of this popular type coin, with frosty silver-white surfaces and undoubted Full Head details. The reverse shows a bit of reddish color on the eagle's forward wing and some charcoal patina on the lower reverse. The strike is full throughout.(#5707)

## Immaculate Superb Gem 1917 Type One Quarter

2628 **1917 Type One MS67 Full Head NGC.** The glittering surfaces of this Superb Gem display immaculate preservation and distinctly matte-like, fine-grain textures in the fields. The design elements are crisply and fully rendered, including Liberty's head, exposed breast, and shield; as are the eagle's head, wings, and breast feathers. The bright, satiny surfaces are essentially untoned, except for hints of ice-blue color in the fields and faint gold accents along the rims. Census: 57 in 67 Full Head, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#5707)

2629 **1917-D Type One MS65 Full Head PCGS.** Lustrous surfaces reveal touches of light olive color, and boldly impressed design elements. Tiny nicks are seen on Liberty's cheek and neck, and a couple of minute milling marks occur on the chest. A lovely, satiny Gem.
*From The Plymouth Collection.*(#5709)

## Radiant 1917-D Type One Quarter, MS66 Full Head

2630 **1917-D Type One MS66 Full Head NGC.** Untoned surfaces display a characteristic matte-like texture, although with greater radiance than is normally seen. Both sides of the piece are amazingly clean. As with many high grade survivors, pinpoint detailing embodies all the design elements of this first-year Denver Mint issue. Census: 73 in 66 Full Head, 20 finer (11/08).
*From The Scott Rudolph Collection.*(#5709)

## Magnificent MS66 Full Head Type One 1917-D Quarter

2631 **1917-D Type One MS66 Full Head PCGS. CAC.** Tan-gold freckles congregate along the margins of this razor-sharp Premium Gem. Gorgeously devoid of marks, and the strike displays this briefly issued type in full detail. A lustrous and beautiful representative. The lowest mintage of the three 1917 Type One PDS issues.
*From The James Mossman Collection.*(#5709)

## Bold 1917-S Type One Quarter, MS65 Full Head

2632 **1917-S Type One MS65 Full Head NGC.** This highly lustrous Type One quarter has exceptional silver brilliance with frosty surfaces beneath a dusting of light gold and iridescent toning. In his Encyclopedia, Walter Breen notes that the 1917-S Type One quarters are usually softly struck. This Full Head piece also has a full and complete shield, and is boldly defined on both sides. (#5711)

## Exquisite MS66 Full Head 1917-S Type One Quarter

2633 **1917-S Type One MS66 Full Head NGC.** The centers vary from pale gold-gray to pearl-silver, while the margins show arcs of substantially deeper patina, cerulean on the obverse and russet-orange on the reverse. Boldly impressed and carefully preserved, a gorgeous survivor from this lone San Francisco Type One issue.
*From The Plymouth Collection.*(#5711)

## Important MS67 Full Head Type One 1917-S Quarter

2634 **1917-S Type One MS67 Full Head NGC.** The 1917-S is the scarcest of the Type One quarters, and this essentially immaculate piece displays absolute full detailing in all areas. Moderate golden-brown, sun-gold, fire-red, and lime-green toning further extends the eye appeal. Census: 17 in 67 Full Head, 0 finer (11/08).
*Ex: New York Signature (Heritage, 11/2003), lot 6279; Long Beach Signature (Heritage, 5/2007), lot 965, which realized $9,200.*
*From The Scott Rudolph Collection.*(#5711)

2635 **1917 Type Two MS66 Full Head PCGS.** Excellent strike definition prevails over the design elements, with the only areas displaying a touch of softness being the digits of the date, the lower rivets, and portions of the eagle's torso. Lustrous surfaces yield a golden-gray appearance with freckled toning spots, which are more numerous on the reverse. Some light marks are visible on Liberty's torso. Population: 61 in 66, 7 finer (11/08).
*From The Plymouth Collection.*(#5715)

## Rare Full Head Superb Gem 1917 Type Two Quarter

2636 **1917 Type Two MS67 Full Head NGC.** Type One 1917 quarters with full heads are plentiful, although cherished as examples of a short-lived design. Full head Type Two 1917 pieces are significantly scarcer, and are rare at the MS67 level. Liberty's head, waist, and shield rivets are fully struck, and only the date and the reverse legend near 12 o'clock show even a hint of weakness. Brilliant, lustrous, and essentially immaculate. Census: 10 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#5715)

## Interesting 1917-D Type Two Quarter, MS65 Full Head

2637 **1917-D Type Two MS65 Full Head PCGS.** The Type Two issues are notably more elusive than their Type One counterparts in Full Head Mint State, particularly the mintmarked ones. This Gem is impressively detailed with subtle gold-orange tints over parts of the otherwise silver-white surfaces. Gleaming luster throughout. PCGS has graded 17 finer Full Head coins (11/08).
*From The Plymouth Collection.*(#5717)

## Splendid Full Head Superb Gem Type Two 1917-D Quarter

2638 **1917-D Type Two MS65 Full Head PCGS.** Golden-brown and honey tints enrich this lustrous and virtually immaculate Superb Gem. Only a tiny proportion of Uncirculated survivors approach the present quality. The strike is full aside from slight softness on the two shield rivets near the waist. Population: 52 in 65 Full Head, 17 finer (11/08).(#5717)

## Vibrant 1917-D Type Two Quarter, MS66 Full Head

2639 **1917-D Type Two MS66 Full Head PCGS. CAC.** Unlike their Type One counterparts, the Type Two quarters of 1917 rarely appear with Full Head details. This boldly impressed survivor shows only a trace of weakness at the rivets of the shield, and the peach-inflected fields offer vibrant luster. Exquisitely preserved and delightful. PCGS has graded just two finer Full Head coins (11/08).
*From The Scott Rudolph Collection.*(#5717)

## Conditionally Elusive 1917-S Type Two Quarter, MS65 Full Head

2640 **1917-S Type Two MS65 Full Head NGC.** This Type Two quarter is extremely well struck on Liberty's head, even if the sash across her midsection and a couple of the shield rivets are soft. Both sides exhibit a slight degree of gold color over the essentially silver surfaces; this golden overlay is more pronounced on the reverse and is quite appealing. Well preserved and free of distractions. A lovely Gem. Census: 18 in 65 Full Head, 12 finer (11/08).
*From The Scott Rudolph Collection.*(#5719)

## Beautiful 1917-S Quarter, Type Two, MS66 Full Head

2641 **1917-S Type Two MS66 Full Head NGC.** Sharply struck with fantastically bright silver-white surfaces that show only the faintest echo of gold at the obverse rims. Only a handful of scarcely perceptible marks are visible to the unaided eye. Fantastic eye appeal for this perpetually challenging Type Two issue.
*From The Plymouth Collection.*(#5719)

2642 **1918 MS66 NGC.** Well struck with complete shield rivets and nearly complete detail on Liberty's head. Intense mint frost glistens over both sides. Mostly white, with a small degree of gold color on the lower obverse, and a few freckles of russet patina on the upper reverse. Surface marks are virtually nonexistent. Census: 28 in 66, 4 finer (11/08).
*From The Plymouth Collection.*(#5720)

## Captivating MS66 1918-D Quarter

2643 **1918-D MS66 NGC.** Striking, frosty luster dominates the eye appeal of this Premium Gem. The vibrant silver-white surfaces extend all the way to the rims, where a hint of golden-tan finally appears. Softly struck at the head, but well-defined elsewhere. Census: 14 in 66, 3 finer (12/08).
*From The Plymouth Collection.*(#5722)

2644 **1918-D MS64 Full Head PCGS.** Lustrous and mostly untoned with dapples of deep russet at 6 and 12 o'clock on each side. Nicely struck with a few small marks that restrict the grade.
*From The Plymouth Collection.*(#5723)

## Conditionally Scarce 1918-D Quarter, MS66 Full Head

2645 **1918-D MS66 Full Head NGC.** J.H. Cline says of the 1918-D quarter in his Standing Liberty quarter reference that "... there are many that have good strikes, but most fall into average or poor strikes." The Premium Gem example in this lot is obviously one of the better struck. In addition to the Full Head classification, the chain mail and stripes of the inner shield are sharp. Both sides are awash in bright luster, and are essentially untoned. Census: 11 in 66 Full Head, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#5723)

2646 **1918-S MS66 NGC.** A radiant and brilliant Premium Gem, with minor striking softness noted on a few areas of the design. Well preserved and nearly blemish-free, save for a tiny milling mark on the upper left reverse, just below N in UNITED. Census: 25 in 66, 5 finer (11/08).
*From The Plymouth Collection.*(#5724)

## Choice Full Head 1918-S Quarter

2647 **1918-S MS64 Full Head PCGS.** This lustrous golden-brown near-Gem is devoid of remotely noticeable marks, and although the strike is indistinct near Liberty's waist, the earhole is clear and the sprigs are delineated. Struck in sizeable numbers, but full head examples are nonetheless very scarce.
*From The Plymouth Collection.*(#5725)

## Gorgeous Full Head Gem 1918-S Quarter

2648 **1918-S MS65 Full Head NGC.** A highly elusive issue with Full Head details, though this frosty silver-blue and champagne Gem meets the criteria. Two small spots of astonishing die-polished brilliance are visible to either side of E PLURIBUS UNUM on the reverse. NGC has graded just four finer Full Head examples (11/08). (#5725)

2649 **1919 MS66 PCGS. CAC.** A lustrous and smooth Premium Gem that has a hint of peripheral russet toning. Generally boldly struck, though the sprigs on Liberty's helmet are incomplete. Population: 75 in 66, 15 finer (11/08).
*Ex: Long Beach Signature (Heritage, 9/2006), lot 1658, which realized $920.*
*From The Scott Rudolph Collection.*(#5728)

2650 **1919 MS65 Full Head PCGS.** Remarkably well preserved surfaces display scintillating luster, colored with splashes of lavender and mauve toning on the obverse, and speckled olive and russet on the reverse. The design elements are exquisitely struck, displaying not just fullness on Liberty's head, but sharpness on the rivets and vertical stripes of the inner shield as well.
*From The Plymouth Collection.*(#5729)

2651 **1919 MS65 Full Head PCGS.** Solidly detailed with surprising eye appeal, even by Gem standards. The surfaces are essentially untoned with uncommonly vibrant luster. Finer Full Head coins are elusive. (#5729)

## Vibrant 1919-D Quarter, MS64

2652 **1919-D MS64 NGC.** Vibrant luster exudes from both sides of this near-Gem. The inner shield displays strong vertical stripes; Liberty's head and the eagle's torso, however, are weak. The surfaces are devoid of mentionable contact marks. Census: 44 in 64, 43 finer (12/08).
*From The Plymouth Collection.*(#5730)

## Pretty Gem 1919-D Standing Liberty Quarter

2653 **1919-D MS65 PCGS.** The satiny silver-gray surfaces are awash with potent luster on this pretty Gem example, which shows not the slightest trace of color. While the head is short of full—as indeed almost all examples of this issue are—the strike is well detailed save for a couple of shield rivets. Certified in a green-label holder. Population: 40 in 65, 23 finer (12/08).(#5730)

## Outstanding Premium Gem 1919-D Standing Liberty Quarter

2654 **1919-D MS66 PCGS.** The surfaces are unusually clean, even for a Premium Gem, and display lovely, satin luster. Well struck on most of the design elements, save for minor softness on Liberty's head, a couple of shield rivets, and the eagle's breast feathers. Blemish-free on both sides, and housed in an older PCGS holder with a green label. Population: 23 in 66, 0 finer (11/08).
*From The Plymouth Collection.*(#5730)

## Singular MS67 1919-D Quarter

2655 **1919-D MS67 NGC.** Exceptionally smooth, well-defined surfaces offer frosty originality and light, mottled splashes of reddish-gold and sea-green toning at the borders. Excellent strike with dynamic luster. This D-mint issue of under 2 million pieces is rarely seen so fine; in fact, this is the lone highest-graded non-Full Head example in the combined certified population (11/08).
*From The Scott Rudolph Collection.*(#5730)

2656 **1920 MS66 NGC.** Dappled olive-gold, burgundy, and sky-blue patination adorns the lustrous surfaces, and the design features are well impressed. A couple of minute marks on the upper part of Liberty's right (facing) leg and arm are mentioned for accuracy. Census: 56 in 66, 13 finer (11/08).
*From The Plymouth Collection.*(#5734)

## Exciting Superb Gem 1920 Quarter

2657 **1920 MS67 PCGS. CAC.** Even though the 1920 has the highest mintage of the Standing Liberty quarter series, its availability in the better grades of Uncirculated is no greater than later dates with significantly lower mintages. Whispers of golden-brown, cobalt-blue, and lavender patination grace parts of the shining surfaces. Well-defined overall, though kept from a Full Head designation by minor blending on the sprig. Population: 2 in 67, 0 finer (10/08).
*From The Scott Rudolph Collection.*(#5734)

2658 **1920 MS65 Full Head PCGS.** Highly appealing with attractive luster and full definition on Liberty's head and the shield rivets. Reddish-gold patina covers much of the surfaces, though the toning thins at the center of the obverse.
*From The Plymouth Collection.*(#5735)

## Intensely Lustrous 1920 Quarter, MS66 Full Head

2659 **1920 MS66 Full Head PCGS. CAC.** The intense silver luster provides exceptional eye appeal and the sharp strike ensures that this piece will be an object of desire when it crosses the auction block. Both sides are fully brilliant with speckled iridescent toning limited to the extreme obverse and reverse borders. Perhaps this is the coin that J.H. Cline was looking at when he said: "Some real mind blowers exist of this date." Population: 16 in 66, 3 finer (11/08).
*From The Scott Rudolph Collection.*(#5735)

## Elegant MS66 Full Head 1920-D Quarter

2660 **1920-D MS66 Full Head NGC.** The post-World War I mintmarked issues are among the most challenging Standing Liberty quarters to find with Full Head details, and the 1920-D is hardly an exception. In fact, at the Premium Gem level, NGC has graded just four Full Head pieces with only five numerically finer (11/08). This gorgeous example is crisply detailed on both head and shield with effusive luster that bubbles through delicate, vibrant patina. Subtle blue-violet peripheral tints and tan-gold centers grace each side, with the obverse color slightly deeper than that of the reverse.
*From The Plymouth Collection.*(#5737)

2661 **1920-S—Obverse Die Break—AU53 PCGS.** A 'Teardrop' die break is present beside Liberty's right (facing) thigh. This die break is seen on certain 1920-S, 1926-S, and 1928-S quarters. That portion of the obverse die was prone to die chips, similar to those that emerged within the IBE in LIBERTY on 1960s Lincoln cents. Satiny and slightly glossy with light highpoint wear and rich lilac, apricot, and ice-blue toning.

### Striking MS66 1920-S Quarter

2662 **1920-S MS66 PCGS.** Though Liberty's head shows typical softness, the rest of the piece is sharp, including on the often-troublesome rivets of the shield. Gorgeous luster, as befits a Premium Gem, with subtle gold-gray shadings over much of each side and elements of deeper mustard and orange present at parts of the margins. Population: 14 in 66, 1 finer (12/08).
*From The Plymouth Collection.*(#5738)

### Glowing Premium Gem 1920-S Quarter

2663 **1920-S MS66 PCGS.** The 1920-S is an issue that is notorious for being among the most weakly struck in the entire Standing Liberty quarter series, a trait that also appears on the other S-mint minor coins for the year. This piece shows weakness on the head, some of the shield rivets and stripes, on Liberty's left (facing) arm, and on the eagle's lower breast. On the other hand, the lustrous silver-gray surfaces are virtually free of other distractions, and the softly glowing luster adds to the overall appeal. A small die crack runs through the upper portions of the date digits, with a second reverse crack from the rim through the right upright of the U in UNITED and to a feather tip. Population: 14 in 66, 1 finer (12/08).(#5738)

### Exquisite Superb Gem 1920-S Quarter

2664 **1920-S MS67 PCGS. CAC.** The '20-S is unexpectedly scarce in Mint State, considering its relatively large mintage of 6.38 million pieces. The current example is stunning. The cartwheel luster is dazzling, and both sides are brilliant save for infrequent blushes of apricot patina. Only two of the shield rivets and the center of Liberty's head are a trifle weak. Expertly preserved, the piece is virtually pristine. Population: 1 in 67, 0 finer (10/08).
*From The Scott Rudolph Collection.*(#5738)

### Underrated 1920-S Quarter Full Head, MS63

2665 **1920-S MS63 Full Head NGC.** In *Standing Liberty Quarters, 4th Edition*, J.H. Cline reports, "The 1920-S is a very rare item in true Full Head. It should be valued many times over *Red Book* price. I rate it second or third in value for the entire series." The piece offered here displays the all important Full Head details combined with full mint luster, and outstanding eye appeal. Census: 12 in 63, 30 finer (12/08).(#5739)

### Choice Full Head 1920-S Quarter

2666 **1920-S MS64 Full Head PCGS.** Exquisite peach and caramel-gold toning adorns the obverse. The reverse is mostly brilliant but has streaks of russet-brown near the eagle's body. This well preserved near-Gem has a good strike despite minor incompleteness on the top of the date. Population: 30 in 64 Full Head, 21 finer (11/08).
*From The Scott Rudolph Collection.*(#5739)

### Full Head Near-Gem 1920-S Quarter

2667 **1920-S MS64 Full Head PCGS.** The gunmetal-gray surfaces display glimpses of tobacco-brown and sun-gold toning. Satiny and nicely struck with a problem-free appearance. This little-saved date is seldom encountered with full head detail. Population: 30 in 64 Full Head, 21 finer (12/08).
*From The Plymouth Collection.*(#5739)

## Boldly Struck 1920-S Quarter MS64, Full Head

2668 **1920-S MS64 Full Head NGC.** Uncommonly bold detail for this often-weak San Francisco issue. Both sides offer soft, pleasing luster beneath delicate, dappled peach-gold and silver-blue patina. Modest flaws in the fields preclude a finer designation. NGC has certified a mere eight finer Full Head pieces (12/08).(#5739)

## Fantastic 1921 Quarter, MS64

2669 **1921 MS64 PCGS.** An attentive strike imparts strong definition to the design elements, including Liberty's head, which is a tad short of "Full." Medium gray patination reveals soft golden undertones, and lustrous surfaces are only lightly marked. This is actually a fantastic near-Gem.(#5740)

## Dynamic Gem 1921 Quarter

2670 **1921 MS65 NGC.** Similar to its dime and half dollar counterparts, the 1921 is low mintage, undoubtedly because of unprecedented silver dollar coinage that year. This is a lustrous and faintly toned Gem, well preserved despite the occasional faint surface graze. The center of the head is incomplete, but the strike is generally crisp. Struck from moderately rotated dies.
*From The Plymouth Collection.*(#5740)

## Noteworthy MS65 Full Head 1921 Quarter

2671 **1921 MS65 Full Head PCGS. CAC.** Delicate golden tints visit the fields, while the rest of this sharply struck Gem is essentially silver-white. Gorgeous eye appeal for this challenging lower-mintage issue, a condition rarity any finer with Full Head details. Population: 46 in 65 Full Head, 20 finer (12/08).
*From The Plymouth Collection.*(#5741)

## Amazing MS65 Full Head 1921 Quarter

2672 **1921 MS65 Full Head NGC.** Excellent definition on both head and shield with intriguing eye appeal. Deep olive-gold, forest-green, and crimson shadings give the piece a dusky appearance, but the luster that pierces the thick patina makes this Gem all the more impressive. Census: 22 in 65 Full Head, 10 finer (12/08).
*From The Plymouth Collection.*(#5741)

2673 **1923 MS67 NGC. CAC.** Brilliant surfaces are virtually unabraded, and the design features are well struck up, including the stripes of the inner shield. Wonderful eye appeal exudes from this piece. Census: 44 in 67, 0 finer (11/08).
*From The Plymouth Collection.*(#5742)

## Attractive 1923-S Quarter, AU55

2674 **1923-S AU55 ANACS.** A haze of smoky-gray patina rests on both sides of this Choice AU S-mint, being slightly deeper in shade on the obverse. The design elements are sharply detailed, except for the usual weakness on the rivets near Liberty. Lightly marked surfaces display a fair amount of luster.(#5744)

2675 **1923-S AU58 PCGS.** Though a trace of friction crosses the high points, this near-Mint piece retains virtually intact luster. Dots of golden-tan and russet peripheral toning frame silver-gray centers. (#5744)

## Choice Full Head 1923-S Quarter

2676 **1923-S MS64 Full Head PCGS.** The lower mintage 1923-S is a scarce item in Choice condition with full head definition. This satiny near-Gem exhibits original almond-gold and silver-gray toning. Marks are difficult to find, and only a couple of shield rivets are incompletely brought up. Housed in a green label holder. (#5745)

## Key Date Near-Gem 1923-S Standing Liberty Quarter

2677 **1923-S MS64 Full Head NGC.** Sharply defined for this lower-mintage key date, with faint mottled peripheral toning on the upper obverse, and an especially vibrant reverse that is framed in subtle champagne and gold coloration. We do note a touch of softness on a couple of Liberty's shield rivets, and on the eagle's breast feathers, but the overall quality and eye appeal here is substantial for the grade.
*From The Findley Collection.*(#5745)

## Impressive 1923-S Quarter, MS64 Full Head

2678 **1923-S MS64 Full Head PCGS.** This frosty and highly lustrous 1923-S quarter had one of the sharpest strikes of any Standing Liberty quarter, let along of this particular date. Even all of the shield rivets are completely visible, and that almost never happens on any date. The surfaces are fully brilliant with a touch of light champagne toning.(#5745)

## Terrific MS65 Full Head 1923-S Quarter

2679 **1923-S MS65 Full Head PCGS.** An elegant, pleasingly detailed Gem with soft, attractive luster beneath rich, dappled patina. Dots of blue, gold-orange, and russet prevail at the obverse margins and across the reverse. Smooth surfaces are generally pale gold-gray elsewhere. Housed in a green label holder. Population: 45 in 65 Full Head, 31 finer (12/08).
*From The Plymouth Collection.*(#5745)

## Fabulous MS65 Full Head 1923-S Quarter

2680 **1923-S MS65 Full Head NGC.** Hints of gold-orange rim the obverse and reverse, but the interiors are essentially unturned silver-white. Delightfully detailed, if a trifle soft at the usual trouble-spot on the shield, and carefully preserved with every justification for the grade assigned. Census: 22 in 65 Full Head, 30 finer (12/08).
*From The Plymouth Collection.*(#5745)

## Glorious 1924 Standing Liberty Quarter, MS67 Full Head

2681 **1924 MS67 Full Head NGC.** What a pleasure it is to examine this beautiful and conditionally scarce Superb Gem quarter. The obverse striking details are beyond reproach, and the reverse is nearly as well detailed, only showing slight weakness on the eagle's breast feathers. The matte-like surfaces are completely brilliant, highly lustrous, and, except for a small milling mark on the eagle's right (facing) wing, virtually pristine. Census: 12 in 67 Full Head, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#5747)

2682 **1924-D MS64 Full Head PCGS. CAC.** A scarce Standing Liberty quarter with complete head detail. Weak strikes are the norm for this issue. This piece is intricately detailed on the head of Liberty, and the lustrous fields and devices display only inconspicuous abrasions. Pinpoint ebony freckles overlie delicately toned golden-gray surfaces.
*Ex: FUN Signature (Heritage, 1/2006), lot 2501; Long Beach Signature (Heritage, 2/2006), lot 1068.*
*From The Scott Rudolph Collection.*(#5749)

2683 **1924-D MS64 Full Head PCGS.** Subtle blue, violet, and gold tints lend this strongly lustrous Choice coin delightful eye appeal. Well-defined with only a few light ticks on Liberty that preclude Gem status.(#5749)

## Gem Full Head 1924-D Quarter

2684 **1924-D MS65 Full Head NGC. CAC.** Glints of aqua toning occur throughout the lustrous surfaces of this pretty Gem. Nicely struck despite softness on the usual culprit trio of shield rivets. Well preserved, and a desirable addition to an advanced holding. Census: 28 in 65 Full Head, 10 finer (11/08).
*From The Scott Rudolph Collection.*(#5749)

## Conditionally Challenging 1924-D Quarter, MS65 Full Head

2685 **1924-D MS65 Full Head PCGS.** One of the more challenging Standing Liberty quarters to locate with full obverse definition. This outstanding representative is intricately detailed on the head of Liberty, and boasts four full digits on the date. The shimmering, lightly golden-toned surfaces are virtually unaffected by any signs of coin-to-coin contact. Population: 45 in 65 Full Head, 17 finer (11/08).(#5749)

## Desirable Full Head MS64 1924-S Quarter

2686 **1924-S MS64 Full Head PCGS. CAC.** Liberty's head is needle-sharp, and the date is also exactingly defined. Only the two shield rivets near the waist lack absolute detail. This brilliant and highly lustrous near-Gem has an outstanding obverse, and is limited in grade only by minor grazes beneath the left (facing) wing. Population: 59 in 64 Full Head, 37 finer (10/08).
*From The Scott Rudolph Collection.*(#5751)

## Needle-Sharp 1924-S Quarter, MS65 Full Head

2687 **1924-S MS65 Full Head PCGS. CAC.** Pale silver-gray overall with subtle arcs of gold-orange present at the upper obverse and reverse. Notably well-defined for this challenging S-mint issue, including both Liberty's head and the rivets of the shield, all of which are sharp. Population: 27 in 65 Full Head, 10 finer (12/08).
*From The Plymouth Collection.*(#5751)

## Lovely Gem Full Head 1924-S Quarter

2688 **1924-S MS65 Full Head NGC.** Honey-gold and powder-blue enrich this coruscating and unabraded Gem. The strike is precise save for softness on the cheek and a couple of shield rivets. Seldom encountered in such exceptional quality. Census: 28 in 65 Full Head, 4 finer (11/08).
*From The James Mossman Collection.*(#5751)

## Conditionally Scarce 1925 Quarter, MS66 Full Head

2689 **1925 MS66 Full Head NGC.** Nearly thirteen million pieces were produced, but survivors are scarce at the MS65 grade level or finer. Ice-blue, honey-gold, and speckled russet-red patina adorns this lustrous and beautiful Premium Gem. The strike is exceptional on the date and head, and even the two shield rivets near the waist have decent detail. Census: 33 in 66 Full Head, 11 finer (11/08).
*From The Scott Rudolph Collection.*(#5753)

2690 **1925 MS66 Full Head NGC.** Nearly full on all of the design elements, including Liberty's head, with weakness noted on just a couple of shield rivets. Satiny and highly lustrous, with a pleasingly effulgent sheen across both sides. Well preserved and nearly mark-free. Census: 34 in 66 Full Head, 11 finer (11/08).
*From The Plymouth Collection.*(#5753)

## Gorgeous MS67 Full Head 1925 Quarter

2691 **1925 MS67 Full Head NGC.** This date marks the beginning of a new era in the Standing Liberty quarter series, called by some the Type Three design. Only slight modifications were made, the most important being the recessed date. Both sides have splendid satin luster with light ivory color enhanced by peripheral iridescence. Census: 11 in 67 Full Head, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#5753)

2692 **1926 MS65 Full Head NGC. CAC.** Nicely struck, with bright lustrous surfaces that are virtually untoned. A couple of minute marks on Liberty's legs are not at all bothersome. Census: 45 in 65 full Head, 16 finer (11/08).
*From The Plymouth Collection.*(#5755)

## Near-Gem Full Head 1926-D Quarter

2693 **1926-D MS64 Full Head NGC.** Delicate autumn-gold toning enriches this attractively preserved and lustrous near-Gem. This lower mintage branch mint issue is infrequently encountered in such pleasing quality. The waist is inexactly impressed, but the date and sprigs are fully defined. Census: 17 in 64 Full Head, 8 finer (11/08). (#5757)

## Elusive 1926-D Quarter, MS64 Full Head

2694 **1926-D MS64 Full Head PCGS.** The 1926-D is extremely elusive in Full Head. David Lawrence states the ratio of Full Head coins to flat heads is roughly 150 to 1, and Full Heads should be worth at least 25 times *Coin Values* prices. The present coin is fully struck, with lustrous surfaces, and Liberty's head is fully detailed. This piece is worthy of a place in an advanced collection of Standing Liberty quarters. Population: 30 in 64 Full Head, 29 finer (12/08). (#5757)

## Elegant MS66 1926-S Quarter

2695 **1926-S MS66 NGC.** Pleasing overall detail for the issue, though the usual softness is noted at the head and lower shield. Impeccable eye appeal with well-preserved and highly lustrous surfaces that shine beneath layers of gold-orange patina that allow for patches and slivers of silver-white. Census: 8 in 66, 2 finer (12/08).
*From The Plymouth Collection.*(#5758)

## Delightful 1926-S Quarter, MS67

2696 **1926-S MS67 NGC.** Well struck overall with strong, delightful luster. While the centers are minimally toned, the fields offer a degree of peach patina, and deeper gold-green, blue-violet, and rose shadings are prominent at the margins. One of just two Superb Gems graded by NGC, with none finer (12/08).(#5758)

## Lovely 1927 Quarter, MS65 Full Head

2697 **1927 MS65 Full Head PCGS.** This lustrous gunmetal-gray and honey Gem is magnificently preserved, and exhibits impressive definition on the obverse highpoints. Certified in a green label holder. PCGS has graded 50 finer Full Head examples (11/08).
*Ex: Central States Signature (Heritage, 4/2006), lot 1674.*(#5761)

## Dazzling MS66 Full Head 1927 Quarter

2698 **1927 MS66 Full Head PCGS. CAC.** Satiny and lightly toned, this lovely Premium Gem displays sharply defined design elements that are complete on Liberty's head and nearly full on the shield rivets. An essentially pristine type coin that will delight even the most jaded specialist. Population: 45 in 66 Full Head, 5 finer (10/08).
*From The Scott Rudolph Collection.*(#5761)

## Impressive 1927-D Standing Liberty Quarter MS65 Full Head

2699 **1927-D MS65 Full Head PCGS.** Though hardly as notorious as its S-mint counterpart, the 1927-D is the second most elusive of the Type Three Standing Liberty quarters, particularly in Mint State grades. This suitably impressed Gem has pleasing luster beneath hazy blue-gray patina. Small spots of crimson toning appear intermittently at the periphery. Of interest is a die crack that passes through Liberty's head. Population: 67 in 65 Full Head, 13 finer (11/08).
*From The Plymouth Collection.*(#5763)

## Difficult Near-Gem 1927-S Quarter

2700 **1927-S MS64 PCGS.** Famous for its low mintage, the 1927-S is the key date of the Recessed Date subset of the Standing Liberty series. While pursued in all grades, examples with full luster and light original toning are particularly in demand. The head is slightly dished, but the strike is otherwise good, and the sole mark of consequence is relegated to the reverse at 9 o'clock. Encapsulated in a green label holder.(#5764)

2701 **1928 MS65 Full Head NGC.** An originally toned example with a deep layer of purple-rose patina over the reverse, where cobalt-blue accents reside near the margins. Mottled russet-gold color adorns the obverse peripheries. Well struck, carefully preserved, and nearly blemish-free. Census: 47 in 65 Full Head, 23 finer (11/08).
*From The Plymouth Collection.*(#5767)

## High-End 1928 Quarter MS66 Full Head

2702 **1928 MS66 Full Head PCGS.** The 1928 Standing liberty quarter is one of the most available dates of the series, making it a favorite with type collectors, as well as quarter specialists. This specimen displays vibrant mint luster, with a touch of gold toning at the peripheries. Of course, the important Full Head details are strongly impressed. Population: 24 in 66 Full Head, 4 finer (12/08).
*From The Malibu Collection.*(#5767)

## Conditionally Elusive 1928 Standing Liberty Quarter MS67 Full Head

2703 **1928 MS67 Full Head NGC.** Faint streaks of honey color overlay the pastel rose and sky-blue surfaces of this highly lustrous Superb Gem. The strike is precise aside from the usual pair of shield rivets near the waist. A splendidly preserved representative of this conditionally elusive issue. Census: 9 in 67 Full Head, 2 finer (11/08).
*From The Scott Rudolph Collection.*(#5767)

## Bold 1928-D Quarter, MS66 Full Head

2704 **1928-D MS66 Full Head NGC.** Glints of pearl-gray and coral grace each side of this exemplary Premium Gem coin. The strike is pleasingly bold, save for the exception of the lowest star and the mintmark. Radiant luster emanates from the pristine surfaces, and the eye appeal is high. An elusive issue in MS66 Full Head, the 1928-D has a population of only 11 pieces so graded at NGC, with one coin finer, while there are 16 at PCGS, and two finer (11/08). (#5769)

2705 **1928-S MS66 Full Head NGC.** Brilliant and highly lustrous, with a bright satiny sheen that emanates from well preserved surfaces. The design elements are crisply reproduced, and just a couple of the shield rivets show typical softness of definition. The mintmark does not appear to match either of the normally-seen Large S or Small S varieties.
*From The Plymouth Collection.*(#5771)

2706 **1928-S MS66 Full Head NGC.** Accents of champagne-pink, ice-blue, and heather grace the peripheral regions, while the centers are still silvery on this attractive and lustrous Premium Gem, a well-struck piece throughout.(#5771)

## Fantastic 1928-S Quarter MS67 Full Head

2707 **1928-S MS67 Full Head NGC.** Large Mintmark. The more frequently encountered of the two mintmark sizes known for this issue. This is a highly lustrous, brilliant example that is nearly flawless. In addition to the Full Head, strong detail is evident on the vertical stripes of the inner shield. An exceptional Standing Liberty quarter. Census: 28 in 67 Full Head, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#5771)

## Pleasing MS67 Full Head 1928-S Quarter

2708 **1928-S MS67 Full Head NGC. CAC.** Light gold toning enriches this thoroughly lustrous Superb Gem. Remarkably close to pristine, and the head and date are well struck. The two shield rivets close to the waist lack absolute detail, characteristic of the type. Census: 27 in 67 Full Head, 1 finer (11/08).
*From The Scott Rudolph Collection.*(#5771)

## Full Head Superb Gem 1928-S Quarter

2709 **1928-S MS67 Full Head NGC.** The Small S variety, a mintmark variant scarcer than the usually seen Large S, with the mintmark placed further from the adjacent star. Superb overall quality, the surfaces are brilliant, lustrous, and immaculate throughout. The strike is full aside from the usual two incomplete shield rivets. Census: 28 in 67, 1 finer (12/08).(#5771)

2710 **1929 MS66 Full Head PCGS.** Decisively detailed with powerful, slightly frosty luster. Occasional whispers of golden peripheral patina yield to light silver-cream at the centers. PCGS has graded seven finer Full Head coins (11/08).(#5773)

## Conditionally Unsurpassed 1929 Standing Liberty Quarter MS67 Full Head

2711 **1929 MS67 Full Head NGC.** The Standing Liberty quarter is known for strong eye appeal when found in high grades. This piece takes that concept to another level. Mostly brilliant, the surfaces exude a shimmering, satin-like mint luster and are virtually unaffected by post-striking impairments, save for an inconsequential group on the eagle's left (facing) wing. Exceptional quality and well worth the premium this coin will surely bring. Census: 10 in 67 Full Head, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#5773)

## Exceptional MS66 Full Head 1929-D Quarter

2712 **1929-D MS66 Full Head NGC.** The obverse is virtually untoned and brilliant, with just a light silver-gold cast, but the reverse offers lovely lilac-gold coloration. This issue is extremely underrated and undervalued with full head details: Standing Liberty quarter expert Jay Cline says that less than 2% of the coins have full heads. This piece not only has full head details, but the shield rivets are all struck up, and the details elsewhere are bold. An extremely eye-appealing piece that fully merits Premium Gem status. Census: 10 in 66 Full Head, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#5775)

2713 **1929-S MS67 NGC.** About 80% of the head details remain on this delightful Superb Gem example. Both sides are essentially brilliant with intense luster and unabraded surfaces. Census: 21 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#5776)

### Virtually Unimprovable 1929-S Quarter, MS67 Full Head

2714 **1929-S MS67 Full Head NGC.** Ex: Chicagoland Collection. Blazing white luster throughout and a coin that is as fresh in appearance as the day it was struck. The strike is sharp throughout, with full definition on Liberty's head, enough so to earn the desired Full Head designation from NGC. Excellent quality as expected for this grade, with no noteworthy surface marks. As nice as this date is ever found, and a coin that would be hard to beat either for technical merit or eye appeal. Census: 22 in 67 Full Head, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#5777)

### Bold Superb Gem Full Head 1929-S Quarter

2715 **1929-S MS67 Full Head NGC.** Both sides of this remarkable, sharply struck Superb Gem have frosty luster beneath a thin layer of lovely champagne toning. The only design weakness that is evident will be seen at the lower left part of the shield, where three rivets are poorly defined, but the same can be said for nearly every surviving Standing Liberty quarter, regardless of the date. Census: 22 in 67, 0 finer (12/08).(#5777)

2716 **1930 MS66 Full Head NGC.** Fantastic luster, and just a few touches of olive color on the reverse. Crisply struck, with no significant contact marks. A marvelous Premium Gem example of this conditionally scarce, final-year Standing Liberty quarter issue from the Philadelphia Mint.
*From The Plymouth Collection.*(#5779)

### Frosty 1930 Quarter, MS67 Full Head

2717 **1930 MS67 Full Head PCGS.** Philadelphia coined slightly over 5.6 million quarters in 1930, the last year of the design. The Superb Gem offered here is an exemplary survivor from that final issue. Speckles of russet appear at the left obverse and parts of the frosty and boldly struck reverse. Tied for the finest Full Head example certified by either NGC or PCGS (11/08).
*From The Scott Rudolph Collection.*(#5779)

2718 **1930-S MS66 Full Head NGC.** Despite a comparatively small mintage of under 1.6 million pieces, this San Francisco issue often appears in type collections. The representative offered here displays wonderful, frosty luster and delightful wisps of ice-blue and peach color. Carefully preserved with pleasing detail.
*From The Scott Rudolph Collection.*(#5781)

2719 **1930-S MS66 Full Head NGC.** The 1930-S was at one time a key issue in the Standing Liberty quarter series, until a hoard was dispersed some 25+ years ago. Now it is one of the more frequently encountered later-date coins in the series. This is a brilliant example, as they almost always are, that shows the usual strong mint luster, and, of course, no mentionable abrasions.
*From The Plymouth Collection.*(#5781)

### Lavishly Toned Superb Gem Full Head 1930-S Standing Liberty Quarter

2720 **1930-S MS67 Full Head PCGS. CAC.** The 1930-S often comes softly struck, especially on Liberty's head and the shield. J.H. Cline, in his Fourth Edition of *Standing Liberty Quarters*, says that one percent or less of this date is struck with Full Heads. This Superb Gem displays Full Head definition and has strong detail on most of the other design features, except for the usual softness on the third and fourth rivets on the shield and on the eagle's torso. Both sides are awash in radiant luster, and enriched with splashes of red, apple-green, and yellow patina around the borders. Population: 17 in 67 Full Head, none finer (11/08).
*Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 771, which realized $4,600.*
*From The Scott Rudolph Collection.*(#5781)

## WASHINGTON QUARTERS

2721 **1932-D MS62 PCGS.** Light gold toning graces the minimally abraded surfaces of this crisply struck key date quarter. An good value relative to higher grades. Encapsulated in a green label holder.
*From The Scott Rudolph Collection.*(#5791)

### Desirable Select 1932-D Quarter

2722 **1932-D MS63 PCGS.** Both the bold details of Washington's portrait and the fine feathers on the eagle's breast are pleasingly executed. This shining Select coin is minimally toned save for hints of golden-brown that visit the margins. Excellent eye appeal despite a handful of wispy abrasions visible on and near the central devices.
*From The Scott Rudolph Collection.*(#5791)

## Key Date 1932-D Quarter, MS64

2723 **1932-D MS64 PCGS.** The key to the Washington quarter series, the toughest date in all grades, the 1932-D is also from the first date of issue, and claims the second lowest mintage of the series. This specimen would be hard to improve upon, with a sharp strike, attractive gold toning, and minimal handling marks for the grade. (#5791)

2724 **1932-S MS64 PCGS.** Caramel-gold, lime-green, and sky-blue adorn this lustrous and well impressed Choice key date quarter. Outstanding for the grade aside from a thin mark or two on the eagle's breast.
*From The Scott Rudolph Collection.*(#5792)

2725 **1934 Doubled Die Obverse Medium Motto MS62 NGC.** FS-101, formerly FS-009. Doubling is prominent on the obverse motto. Frosty surfaces yield grayish-gold color that becomes slightly more intense on the reverse margins. Nicely struck, with just a few minor marks.(#5795)

## Lustrous 1934 Doubled Die Obverse Quarter, MS64

2726 **1934 Doubled Die Obverse MS64 PCGS.** FS-101, formerly FS-009. Doubling is visible on the E of LIBERTY as well as the motto. Highly lustrous surfaces show traces of champagne-gold toning, along with sharply struck design elements. A few minute marks preclude Gem status. Population: 26 in 64, 27 finer (12/08).(#5795)

## Popular 1934 Doubled Die Obverse Quarter, MS64

2727 **1934 Doubled Die Obverse MS64 PCGS.** FS-101, formerly FS-009 with prominent doubling on the obverse motto. Bill Fivaz and J.T. Stanton comment in *The Cherrypicker's Guide that* this is "one of the strongest and most popular of all Washington quarter varieties." Both sides have frosty silver luster with traces of peripheral gold toning. Population: 26 in 64, 27 finer (12/08).(#5795)

2728 **1934-D Heavy Motto MS66 NGC.** This semi-key quarter has dazzling luster and light chestnut-gold toning. Well struck and minimally abraded. Both the Medium Motto and Heavy Motto are known on 1934-D quarters, but the Light Motto was only struck on the three 1932 issues and the 1934 Philadelphia.
*From The Scott Rudolph Collection.*(#85796)

2729 **1935-S MS67 NGC.** Dappled olive-gold and pale plum enrich this lustrous, precisely struck, and exquisitely preserved Superb Gem. All 1935-dated quarters have Medium Mottos, but the reign was short-lived, since the Heavy Motto subtype took over in 1936. Census: 29 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#5799)

2730 **1936 Doubled Die Obverse MS66 NGC.** FS-011. A bold doubled die that is most easily seen at IN GOD WE TRUST. Both sides are highly lustrous and frosty with light gold and iridescent toning. (#5800)

2731 **1936-D MS66 PCGS.** Fully struck with lovely pink and gray coloration over strong, satiny luster. Elegant eye appeal with no individually mentionable flaws. PCGS has graded nine coins finer (11/08).(#5801)

## Colorful Superb Gem 1936-S Quarter

2732 **1936-S MS67 PCGS.** Bands of apple-green and fire-red endow this beautiful Superb Gem. Potent luster sweeps the exquisitely smooth fields and devices. Lower mintage than the much heralded 1936-D. A delight for the competitive Registry Set collector. Population: 26 in 67, 0 finer (11/08).(#5802)

## Appealing 1936-S Quarter, MS67

2733 **1936-S MS67 PCGS.** With 3.8 million pieces coined, the 1936-S can claim the ninth lowest mintage of the series. The present coin is sharply struck, with fine detail on the hair strands and feathers. The silver centers yield to lovely golden-brown toning at the rims. Overall eye appeal is excellent. Population: 26 in 67, 0 finer (12/08). (#5802)

2734 **1938 MS67 NGC.** A lustrous and solidly struck piece luminous silver-gray toning and a streak of cherry-red near the date. NGC has graded just one numerically finer example (11/08).(#5806)

2735 **1939-D MS67 PCGS.** A shining Superb Gem, minimally toned save for a hint of gold-gray at the margins. Powerfully lustrous and tied for finest known to PCGS (11/08).(#5809)

2736 **1940-D MS67 NGC.** Gleaming and carefully preserved. This remarkable Superb Gem offers grand eye appeal with minimal patina. Census: 37 in 67, 1 finer (11/08).(#5812)

## Conditionally Scarce 1942 Washington Quarter, MS67

2737 **1942 MS67 PCGS.** An even layer of green-gray patina covers each side of this Superb example, yielding to accents of rose near the obverse borders. Well struck with lustrous, immaculately preserved surfaces. A conditionally scarce example of this Washington quarter issue from the World War II era. Population: 23 in 67, 0 finer (12/08).(#5817)

2738 **1942-D MS67 NGC.** Fantastically lustrous and minimally toned. This well-defined Superb Gem is housed in an older-generation holder. NGC has graded just two numerically finer pieces (11/08). (#5818)

## Choice Doubled Die Obverse 1942-D Quarter, FS-101

2739 **1942-D Doubled Die Obverse MS64 PCGS.** FS-101, formerly FS-015. An obvious double die with extremely thick letters on all obverse legends. The 1942-D is collectible in circulated grades, but Choice Mint State examples are formidable rarities. Sharply struck and unblemished with vibrant luster and light golden toning. NGC and PCGS combined have certified two pieces as MS64 with none finer (11/06).(#95818)

2740 **1942-S MS67 NGC.** Shining silver-white with strong definition and impressive preservation. This lovely S-mint Superb Gem quarter is tied for the finest graded by NGC (11/08).(#5819)

2741 **1942-S MS67 NGC.** Subtle rose, orange, and lavender peripheral shadings embrace each side, while the centers approach brilliance. A fantastically lustrous S-mint Washington quarter. Census: 54 in 67, 0 finer (11/08).(#5819)

2742 **1943-S Doubled Die Obverse MS64 PCGS.** FS-101, formerly FS-017. The date, motto, legend, and initials reveal strong doubling. Whispers of yellow-gold, purple, orange, and blue gravitate to the margins of this highly lustrous specimen. A well executed strike leaves crisp definition on the motifs. Some light marks preclude gem status. Population: 48 in 64, 20 finer (12/08).(#5823)

2743 **1943-S Doubled Die Obverse MS64 NGC.** FS-101, formerly FS-017. Very dramatic doubling is evident on LIBERTY, IN GOD WE TRUST, the designer's initials, and the date. Soft gold color visits the highly lustrous surfaces of this near-Gem. Sharply struck throughout. A few minute marks define the grade.(#5823)

## Gem 1943-S Quarter, Doubled Die Obverse, FS-101

2744 **1943-S Doubled Die Obverse MS65 PCGS.** FS-101, formerly FS-017. Bold doubling is visible on LIBERTY, IN GOD WE TRUST, and the date. Cartwheel luster emanates from both sides, and there are few mentionable abrasions on either obverse or reverse, save for one on the eagle's lower right (facing) leg. The mintmark is especially sharp. Population: 16 in 65, 4 finer (11/08).(#5823)

2745 **1952-D MS67 W NGC.** Fantastically brilliant with amazing eye appeal. The strike is crisp, and the surfaces are beautifully preserved. NGC has graded one numerically finer example (11/08). (#5850)

2746 **1952-S MS68 NGC.** Strongly lustrous and colorful, the obverse dappled tan-orange, russet, and silver-blue with the last color dominant on all but the rims of the reverse. Well-defined and beautifully preserved. Census: 9 in 68, 0 finer (11/08). (#5851)

2747 **1955-D MS67 NGC.** No finer examples are known in the combined certified population (11/08). Impressively lustrous fields and well-defined devices exhibit light golden-tan shadings.(#5859)

2748 **1959-D MS67 NGC.** This lustrous Superb Gem is untoned aside from peripheral glimpses of russet. Sharply struck except for the leftmost letters in the motto. Surprisingly scarce in such exceptional grade. Certified in a former generation holder. Census: 25 in 67, 0 finer (11/08).(#5867)

2749 **1960-D MS67 NGC.** Despite a mintage of just over 63 million pieces, this issue is unavailable any finer, according to the combined certified population (11/08). Shining, sharply struck centers yield to gold-orange and russet near the rims.(#5869)

## Impressive 1961-D Washington Quarter, MS67 Tied for Finest Certified

2750 **1961-D MS67 NGC.** This piece exhibits full mint luster under iridescent shades of gold and lilac toning. The sharp strike imparts crisp detail to all design elements, especially the hair and facial features of the bust. This specimen is tied with eight other coins for the honor of finest certified at both NGC and PCGS. Census: 7 in 67, 0 finer (12/08).(#5871)

## PROOF WASHINGTON QUARTERS

2751 **1936 PR65 NGC.** This nearly untoned Gem has a precise strike and exemplary preservation. The earliest and lowest mintage of the many proof dates of the series.(#5975)

### Superior 1936 Washington Quarter, PR66

2752 **1936 PR66 PCGS.** The obverse is lightly toned in amber hues, mainly near the edges, while the reverse is fantastically patinated in lime-green and lilac. This technically superior piece has bright, underlying chrome-like surfaces, and nary a contact mark appears, even under a high-powered loupe. PCGS has graded only eight coins finer from this first year of post-World War I proof coinage (11/08). (#5975)

### Appealing 1936 Quarter, PR66

2753 **1936 PR66 NGC.** A delicate blend of light golden-brown, powder-blue, and rose patination imbued with russet freckles does not impede the brilliance exuding from both sides of this Premium Gem proof. Impeccably preserved surfaces exhibit sharply struck design features. Great overall eye appeal.(#5975)

### Shining PR67 1936 Quarter

2754 **1936 PR67 NGC.** This enchanting Superb Gem is essentially brilliant and undeniably appealing. Full design definition complements sublime technical excellence. A wonderful example from this popular initial proof Washington quarter issue, tied for numerically finest certified by either NGC or PCGS (11/08). (#5975)

2755 **1937 PR67 PCGS. CAC.** An extraordinary Superb Gem proof, exhibiting amazing gold, lilac, and blue toning around a brilliant proof center on the obverse. The reverse is similarly toned, covering the entire surface. Population: 77 in 67, 2 finer (11/08). (#5976)

2756 **1940 PR68 NGC.** A perennially undervalued and underappreciated proof series, the Washington quarter in PR68 is a seldom-seen type coin. This piece has bright fields and there are irregular patches of russet scattered over each side. Census: 20 in 68, 0 finer (12/08). (#5979)

### Splendid PR68 ★ 1942 Quarter

2757 **1942 PR68 ★ NGC. CAC.** Cherry-red and sun-gold endow this flashy and immaculate Superb Gem. A sharply struck specimen with exceptional eye appeal. Among the finest certified examples of this conditionally challenging date. The final proof issue prior to 1950, due to wartime demands on the Mint. Census: 3 in 68 ★, 1 finer (11/08).(#5981)

2758 **1956 PR69 Deep Cameo PCGS.** Intense, deeply frosted devices starkly contrast the nearly bottomless mirrors. Virtually flawless, this specimen possesses simply magnificent visual appeal. Population: 40 in 69 Deep Cameo, 0 finer (11/08).(#95988)

### Gorgeous 1974-S Quarter PR70 Deep Cameo

2759 **1974-S PR70 Deep Cameo PCGS.** From a proof mintage of 2.6 million pieces, this specimen is literally the perfect coin. Liquid mirror fields contrast boldly with the strongly impressed devices to produce a memorable Deep Cameo effect. The present coin is simply unimprovable. Population: 1 in 70 Deep Cameo, 0 finer (12/08). (#96006)

2760 **1981-S Type Two PR70 Deep Cameo PCGS.** An exceptionally deep white-on-black cameo proof. Flawless and brilliant throughout. Population: 23 in 70 Deep Cameo (12/08).(#96017)

## STATEHOOD QUARTER

2761 **2004-D Wisconsin Extra Leaf Low MS65 PCGS.** Lustrous surfaces exhibit occasional traces of light tan-gold color. A nicely struck coin with just a couple of minuscule grade-consistent marks. The more prominent of the two "extra leaf" Wisconsin varieties, both of which are highly desirable.(#814033)

# EARLY HALF DOLLARS

## Fine Details O-104 1794 Half

2762 **1794 O-104, R.5—Improperly Cleaned—NCS. Fine Details.** O-104, R.5. Golden-brown fields accompany gunmetal-blue devices. Mildly cloudy from a cleaning, but relatively unmarked for the grade aside from minor abrasions near the profile. Faint roller marks (as produced) are noted near the final two stars.(#6051)

## Border Toned 1795 Half Dollar, O-116 Two Leaves Reverse, VG10

2763 **1795 2 Leaves VG10 PCGS. CAC.** O-116, R.4. Rich peripheral blue-green, rose, and golden-brown toning suggests long-term past storage in a coin album. The eagle's wings and Liberty's hair display partial definition, and the slate-gray fields lack consequential marks. Die cracks and clashes are noted at the left obverse border.(#6052)

2764 **1795 2 Leaves—Scratched, Cleaned—ICG. Fine 15 Details.** O-117, R.4. Golden-tan borders suggest the cleaning took place many years ago. Evenly granular, and thin abrasions are scattered, most noticeable on the left obverse field and before the O in OF. Ample hair and plumage details remain. (#6052)

2765 **1795 2 Leaves—Obverse Scratched—NCS. VF Details.** O-122, R.5. A mid-range slate-gray example of this rare die pair. Save for a scratch at Liberty's lower face and the field below, a pleasing coin.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#6052)

## Popular 1795 Flowing Hair Half, O-110, VF Details

2766 **1795 2 Leaves—Genuine—PCGS.** In-house graded VF Details Cleaned. O-110, R.4. From the legendary complete Bust half die variety collection of Charlton E. Meyer. Bright from a cleaning, and the yellow-gold and powder-blue toning may be unnatural. Nonetheless, a richly detailed and only moderately abraded example with pleasing detail.(#6052)

## Bold 1795 Flowing Hair Half VF25 Two Leaves, O-102, R.5

2767 **1795 2 Leaves VF25 NGC.** O-102, R.5. Deep chestnut and aquamarine tones embrace this impressive second year half dollar. Attractive definition is present within Liberty's hair and the eagle's wings and tail. Close examination only locates one minor abrasion, a pinscratch concealed on the back of the lower curls. Although 1795 half dollars are always available for a price, they are often collected by variety, and demand is ceaseless from type set assemblers. (#6052)

## Choice XF 1795 Flowing Hair Half O-115, Two Leaves Reverse

2768 **1795 2 Leaves XF45 PCGS.** Ex: Meyer Collection. O-115, R.5. The obverse die is shared with the more available O-116, but the reverse die is unique to O-115. Toned steel-gray with shades of golden-brown and forest-green near the borders. Close evaluation reveals moderate field marks. From Charlton (Swampy) Meyer's legendary complete collection of Bust half die varieties.(#6052)

## Pleasing Fine 1801 Draped Bust Half, O-102

2769 **1801 Fine 12 PCGS.** O-102, High R.4. The rarer of the two known varieties for this challenging date. O-102 is identified by the *absence* of die blobs near the arrowheads. Cream-gray at the centers with golden-brown along the peripheries. Liberty's neck has a diagonal mark, but the remainder of the piece is unblemished.(#6064)

## Attractive Fine 15 1801 Half, O-101

2770 **1801 Fine 15 NGC.** O-101, R.3. The usual dies for this rare date. O-101 is identified by small die lumps near the arrowheads. The uppermost stars on the reverse and the clouds beneath OF are softly brought up, but the major devices show ample detail. E PLURIBUS UNUM is fully readable, and Liberty's hair has pleasing definition. A faded mark near the mouth is suitable for the grade.(#6064)

## Bold Choice VF 1801 Half, O-101

2771 **1801 VF35 PCGS.** O-101, R.3. One of only two die marriages known for this low mintage Draped Bust date, O-101 is attributed by the presence of raised die defects near the arrowheads. This is a well detailed piece that has glimpses of luster and the sharpness of a higher grade. The deep cream-gray toning conceals a few noticeable reverse abrasions.(#6064)

2772 **1802—Altered Surfaces—ICG. VG10 Details.** O-101, R.3, the only dies for this challenging date. Slate-gray devices contrast slightly with the steel-gray fields. A granular piece that has a few minor hair-thin marks on each side.(#6065)

## Choice XF Small 3 1803 Half, O-104

2773 **1803 Small 3 XF45 PCGS. CAC.** O-104, R.3. Dusky golden-brown, sky-blue, and sea-green endows this pleasing and problem-free Choice XF example. Luster emerges from all design crevices. Scarcer than the Large 3 1803, whose O-101 and O-103 marriages are relatively available. Population: 10 in 45, 8 finer (12/08). (#6067)

## Early-State 1805/4 O-103 Half, VF25

2774 **1805/4 VF25 NGC.** O-103, High R.5. A light die crack from Liberty's nose identifies this challenging overdate variety and the absence of the usually seen triangular break at the lower left obverse identifies it as an early die state. Numismatist Bryce Brown studied this issue in detail, and published his findings in the December 2007 issue of the *John Reich Journal*. The present piece is Die State I in Brown's article. Although the O-103 die marriage is rated High R.5, the early die state examples are considered High R.6, with only 12 or 13 pieces known. Brown indicates the early die state is about twice as rare as the later die states.

In his *Auction & Mail Bid Prices Realized* reference, Stephen Herrman records 10 recent auction appearances of early die state 1805/4 O-103 half dollars, all between 1996 and 2008. The first five of those ten listings are all for reappearances of a single coin.

The hair and wing plumage are surprisingly detailed, although the breast feathers are worn. The E in LIBERTY is weak, a characteristic peculiar to O-103. A desirable example that just might cause a bidding commotion when it crosses the auction block.

*Ex: Wayne S. Rich Sale (Bowers and Merena, 3/2002), lot 2379* .(#6070)

## Late-State 1805/4 Half, O-103a, VF25

2775 **1805/4 VF25 PCGS.** Ex: Meyer Collection. O-103a, High R.5. Of the two known overdated 1805/4 obverses, this piece is the more obvious O-103 variant, with a bold 4 protruding from beneath three sides of the 5. In this later but not-terminal O-103a die state, a large triangular retained cud has formed from the rim through stars 1 and 2 toward a point just behind a lower curl of Liberty's hair. In the terminal state, this area has fallen out of the die and obliterated all of star 1 and most of star 2. A bold die crack runs from the tip of Liberty's nose to the rim between Y and star 8, another sign of the failing die. This piece has moderate, grade-consistent wear with pinkish-gray surfaces. All star centrils on the obverse show evidence of reengraving, and the initials HL are faintly evident on Liberty's neck.(#6070)

## Rare O-103 1805/4 Half Dollar XF40

2776 **1805/4 XF40 NGC.** O-103, R.5. Three die marriages exhibit an 1805/4 overdate, but the obverse die for O-101 and O-102 shows less of the underdigit 4 than the rare O-103. Apparently, no attempt was made at the mintage to efface the offending 4. The present piece displays deep orange, plum-red, cream-gray, and violet patina. The obverse field and the reverse shield have scattered small marks. *From The Findley Collection.*(#6070)

## Difficult AU 1805 Half, O-112

2777 **1805 AU50 PCGS.** Ex: Meyer Collection. O-112, R.2. From the legendary complete Bust half die variety collection of Charlton E. Meyer. Lovely orange-red toning clings to the obverse margin. The reverse is untoned save for glimpses of peripheral tan-gold. Struck from boldly clashed dies. Unabraded aside from some inconspicuous straightening lines around the eagle's head and nearby stars. Population: 14 in 50, 18 finer (12/08).(#6069)

## Elusive Choice XF O-104b 1806/5 Half

2778 **1806/5 XF45 NGC.** Attributed as O-104b on the NGC holder, although this coin might more accurately be characterized as an intermediate die state between O-104a and O-104b (both varieties are R.5). The cud over UN is obvious, as is the advanced die break on the obverse, but no cud has yet developed over ITE. Desirable for its combination of quality and advanced die state in any event, and very possibly the finest known in such an advanced state, bettering every O-104b coin listed in Herrman and indeed finer than every listed O-104a specimen except for the earlier die state AU55 example we offered earlier this year at FUN. Lightly worn, with an area of weak strike below O on the reverse. A good deal of luster is visible in recessed areas.(#6077)

## Scarce 1806/5 Half Dollar, O-103

2779 **1806/5 AU50 ANACS.** O-103, R.2. Dove-gray patina dominates the centers, while the margins are charcoal-gray. Substantial luster shimmers across protected areas. A boldly detailed and untroubled representative of this popular *Guide Book* overdate. A few small marks near Liberty's neck barely merit mention.(#6077)

2780 **1806 Knobbed 6, Large Stars XF40 PCGS.** O-105, R.2. Although this is misattributed by PCGS as a Knob 6, Small Stars, in reality it is a Knob 6, Large Stars. The T in LIBERTY and star 10 are recut, and on the reverse there are six berries, two of them here quite faint. The bottoms of AME are solidly joined. There are die lines from the right upper corner of the shield and the arrow shaft to the tail feathers. This piece has moderate luster remaining with charcoal, powder-gray, and gold accents along with scattered field abrasions on both sides.(#6074)

2781 **1806 Pointed 6, No Stem XF40 PCGS.** O-109, R.1. A stone-gray and almond-gold example of this popular variety. The engraver neglected to add a stem to the branch, which makes it appear to be growing out of the eagle's claw. Subtle luster beckons from protected areas.(#6073)

## Condition Census 1806 O-109a Half Dollar, R.4, AU55

2782 **1806 Pointed 6, No Stem AU55 PCGS. CAC.** O-109a, R.4. The popular Pointed 6, No Stem variety is R.1 without the die break, but it is R.4 with the diagnostic die break from star 12 to the juncture of Liberty's throat and neck. This piece has much luster remaining, with centers that are still silver and deepening to cinnamon, ochre, and deep blue near the rims. An attractive example of this *Guide Book* variety. This piece would be squarely atop the Condition Census according to Stephen Herrman's autumn 2008 price guide, with the next four pieces in (53, 53, 50, 45).(#6073)

### Extremely Rare O-127a 1806 Half
### VF Details, Pointed 6, Stem

2783 **1806 Pointed 6, Stem—Graffiti—NCS. VF Details.** O-127a, R.7. A radial die crack passes through the lower two points of obverse star 6, confirming the later die state of this extremely rare variety. The distinctive Obverse 12 shows the Y in LIBERTY misshapen and higher than the T. A moderately circulated example that shows hints of gold and silver-blue over otherwise gray surfaces. The present coin has three X's scratched into the surfaces; on Liberty's neck, above the arrowheads, and above the M in UNUM.(#6071)

### Lovely Choice XF 1806 Half
### Pointed 6, Stem, O-116

2784 **1806 Pointed 6, Stem XF45 PCGS.** O-116, R.3. Bold die cracks along the date and left-side stars make attribution easy. Glimmers of bright luster emerge from design crevices of this attractive Choice XF Draped Bust half. The golden-gray surfaces are smooth aside from a pair of faded thin marks near the forehead.(#6071)

### AU 1806 Half, Pointed 6, Stem
### Rare Late Stage O-120a, R.5

2785 **1806 Pointed 6, Stem AU50 ANACS.** O-120a, all breaks, R.5. Likely the terminal die state with prominent die breaks atop four and a half vertical stripes of the shield. In addition, both sides have prominent die cracks. The surfaces retain much luster beneath vivid turquoise and burnt-orange toning. A collection of 1806 die varieties and states would provide a monumental challenge to the specialist.
*Ex: Central States Signature (Heritage, 4/2006), lot 1928, which realized $3,450.*(#6071)

2786 **1807 Draped Bust—Cleaned—ICG. VG10 Details.** O-110a, R.3. Stone-gray at the centers with dusky deep gray toning near the rims. Granular and hairlined from cleaning, but a collectible example of this scarcer variety.(#6079)

### Golden-Brown 1807 Half Dollar
### Draped Bust, O-110a, AU55

2787 **1807 Draped Bust AU55 NGC.** O-110a, R.3. Readily identified by the slender peripheral die cracks on both sides. Exquisite golden-brown and pearl-gray toning endows this partly lustrous and refreshingly unabraded Choice AU half. The final year of the Draped Bust Left type, replaced with the John Reich Capped Bust Right design.
*From The Findley Collection.*(#6079)

## BUST HALF DOLLARS

### Famous Bearded Goddess 1807 Half
### O-111b, Large Stars, 50/20, VF20

2788 **1807 Bearded Goddess, Large Stars, 50/20 VF20 PCGS. CAC.** O-111b, R.5. The prominent die break from chin to chest identifies the coveted "Bearded Goddess" die state of Overton-111. One of the few die states listed in the *Guide Book*, it is well known to every Bust half collector. This example is toned deep cream-gray and has pleasing detail, particularly on the eagle's plumage. The obverse field has a couple of unmemorable marks.(#6086)

2789 **1807 Bearded Goddess, Large Stars, 50 Over 20—Improperly Cleaned—NCS. VF Details.** O-111b, R.5. The famous variety with a slender die break between Liberty's chin and cleavage. One of the few die states of any denomination listed in the *Guide Book*. Pearl-gray overall with olive-green clinging to the margins. Mildly cleaned with trivial environmental granularity here and there.(#6086)

2790 **1807 Large Stars, 50 Over 20 VF35 PCGS.** O-112, R.1. The surfaces are light gray and olive with aqua-blue accents. Well struck with minor to moderate wear over the highpoints and a thin mark noted near Liberty's temple.
*Ex: New York Signature (Heritage, 7/2004), lot 6450; Long Beach Signature (Heritage, 2/2007), lot 3366.*(#6086)

## Desirable 50 Over 20, Large Stars
## 1807 Capped Bust Half, O-112, AU50

2791 **1807 Large Stars, 50 Over 20 AU50 PCGS.** O-112, R.1. Jade-green and caramel-gold enrich the margins. A lightly circulated example with more than its share of remaining mint luster. Faint pinscratches beneath the right scroll end and beneath Liberty's chin fail to deny the eye appeal.
*From The Malibu Collection.*(#6086)

## Elusive AU 1807 Capped Bust Half
## O-112, 50 Over 20, Large Stars

2792 **1807 Large Stars, 50 Over 20 AU50 NGC.** O-112, R.1. Lightly toned pearl-gray with hints of rose and cobalt-blue at the margins. Luster emerges from protected areas, and the surfaces have only faint marks. The more available of two die marriages that share the popular blundered denomination reverse.(#6086)

## Pleasing AU53 1807 Half Dollar, O-112
## Capped Bust, Large Stars, 50 Over 20

2793 **1807 Large Stars, 50 Over 20 AU53 NGC.** O-112, R.1. The bidder has an unusual number of O-112 1807 halves to choose from in the present auction. The advantage of the present piece is that it has sharp design details, yet provides excellent value relative to higher grades. This Capped Bust half is toned deep walnut-brown, but luster glimmers from the borders. Moderate marks above the eagle's neck are concealed beneath the patina.(#6086)

## Interesting AU55 1807 Capped Bust Half
## Large Stars, 50 Over 20, O-112

2794 **1807 Large Stars, 50 Over 20 AU55 PCGS. CAC.** O-112, R.1. Golden-brown and ocean-blue adorn the reverse margin, while the obverse is comprehensively toned in gunmetal-blue and cream-gray. A slender strike-through (as made) reaches the S in PLURIBUS, but actual marks are minor and hard to locate. Population: 26 in 55, 42 finer (12/08).(#6086)

## Choice AU 1807 Capped Bust Half
## Large Stars, 50/20, O-112

2795 **1807 Large Stars, 50/20 AU55 NGC.** O-112, R.1. Golden-brown and emerald-green patina encompasses the margins of this partly lustrous first-year Capped Bust half. A problem-free and desirable piece with only moderate wear on the portrait and the eagle's plumage. O-112 is popular for its blundered denomination. The die engraver entered a 2 in the place of where the 5 in 50 should be, as if it were a die for a quarter, before the error was discovered.
*From The Findley Collection.*(#6086)

## Toned Near-Mint Capped Bust 1807 Half
## 50 Over 20, Large Stars, O-112

2796 **1807 Large Stars, 50 Over 20 AU58 PCGS. CAC.** O-112, R.1. Bands of apple-green, orange, and canary-gold adorn the borders, while the fields and devices are principally cream-gray. Luster is particularly prominent across the stars and legends. A few faint thin marks in the fields merit passing mention. Population: 18 in 58, 24 finer (12/08).(#6086)

2797 **1808/7—Improperly Cleaned—NCS. XF Details.** O-101, R.1. Subdued from a long ago dip, but noticeable luster remains and the margins have partially retoned golden-brown. A nicely detailed example of this obvious overdate.(#6091)

### Near-Mint 1808/7 Half, O-101

2798 **1808/7 AU58 NGC.** O-101, R.1. Gunmetal-gray and walnut-brown embrace this satiny and momentarily circulated representative. The remnants of the underdigit 7 are obvious once inspected beneath a loupe. Multiple peripheral die cracks and flowlines (as made) attest to the long production life of the present die pair. Census: 21 in 58, 15 finer (12/08).(#6091)

2799 **Group Lot Four Capped Bust Half Dollars, 1811-1836.** The lot includes: **1811 Small 8, O-111, R.1., XF45 ICG,** extremely well detailed for the grade, with few marks and a deep coating of variegated patina over both sides; **1825 O-115, R.3., XF40 ICG,** deeply toned across the two sides in shades of electric-blue, orange-gold, and purple-red, boldly detailed with even wear and a few scattered field marks; **1827 Square Base 2, O-132, R.3., AU58 ICG,** lustrous and visually alluring, with rich golden-brown toning that yields to electric-blue iridescence near the peripheries, only a hint of wear near Liberty's ear denies a Mint State designation; and an **1836 Lettered Edge, O-111, R.3., AU58 ICG,** a gorgeous piece with minimal wear and few marks, natural rose-gray and turquoise toning adorns the two sides.
(Total: 4 coins)(#6097)

### Choice 1811 Small 8 Bust Half, O-110

2800 **1811 Small 8 MS64 NGC.** O-110, R.1. This desirable half dollar has golden-brown borders and dove-gray fields and devices. The strike is exacting, and the few faint marks on the left obverse are of little consequence. Vibrant luster sweeps both sides. An important example of this conditionally rare date.(#6097)

2801 **1812 MS61 ICG.** O-109, R.2. This example lacks the usually-seen die lump near obverse star 10, but shows the diagnostic "mound" between the second and third groups of vertical stripes in the lower reverse shield. This is an impressive Mint State example of this die marriage, which may be scarcer than indicated in the Overton reference work on early half dollars, based upon the small number of examples seen by Heritage over the past 15 years or so. Boldly struck with shimmering luster and appealing russet, gold, and olive patina near the borders. Minimally marked for the grade.(#6100)

### Brilliant MS62 1812 Half Dollar, O-108

2802 **1812 MS62 PCGS.** O-108, R.2. Lustrous and essentially brilliant with a precise strike and imposing eye appeal. There are no noticeable marks. Later dies with clashmarks, cracks, and a slight orange peel texture near the borders. The reverse qualifies as O-108a, but there is no die crack at the date.(#6100)

### Desirable MS64 50C Over UNI 1813 Half Dollar, O-101

2803 **1813 Over UNI MS64 PCGS.** O-101, R.2. The engraver was sufficiently absent-minded to enter the UNI in UNITED on the wrong location of the reverse die. The error was detected, and the letters partly effaced before coinage from the die commenced. This lovely near-Gem has comprehensive satin luster and original cream-gray and olive-green toning. Population: 3 in 64, 0 finer (12/08). (#6104)

### Colorful MS62 1814 Half, O-104a

2804 **1814 MS62 PCGS.** O-104a, R.2. The low second 1 in the date, the center dot on crossbar 5, and the low 50 C. confirm the variety, while the obverse and reverse cracks affirm the later die state. Soft luster emanates from silver-gray surfaces that yield cobalt-blue, lavender, and gold-tan peripheral patination. A solid strike brings out bold detail on the motifs. A small mark on the cheekbone is of only minor consequence.
*Ex: Long Beach Signature (Heritage, 9/2007), lot 1475, which realized $3,450.*(#6105)

## Exquisite MS64 1814 Half, O-103

2805 **1814 MS64 NGC.** O-103, R.1. The heavy vertical die line beneath the left scroll provides immediate attribution. Bands of forest-green and chestnut-brown grace the margins of this lustrous and unmarked Choice half. A few right-side stars are softly brought up. Struck from multiply clashed dies.
*From The Findley Collection.*(#6105)

2806 **1815/2 AG3 PCGS.** O-101, High R.2. The only known die variety. A delightful coin for the grade with attractive light to medium gray surfaces. While both sides have a quota of tiny handling marks, only a single fresh mark by the date is of any significance. Otherwise, this piece presents excellent eye appeal for such a low grade. (#6108)

## VF Sharpness 1815/2 Half, O-101

2807 **1815/2—Improperly Cleaned—NCS. VF Details.** O-101, R.2. The curve of the underdigit 2 is faint but evident. This slate-gray piece has been dipped and has slightly bright fields. The obverse rim has a minor ding at 10:30, and the reverse rim is abraded at 11:30. Nonetheless a nicely detailed representative of this key date. The only known 1815-dated half dollar die variety.(#6108)

## Desirable 1815/2 Half Dollar, XF Sharpness, O-101

2808 **1815/2—Improperly Cleaned—NCS. XF Details.** O-101, High R.2. The overdate instantly identifies this variety. Deep patina envelops both sides because of a prior cleaning, but the surfaces are remarkably unabraded. Several clash marks are noted on the reverse. The strike is crisp, and a small blemish near star 13 is barely worthy of mention. Still a lovely example of this popular variety. (#6108)

## Challenging AU 1815/2 Half, O-101

2809 **1815/2 AU50 NGC.** O-101a, R.3. Jade-green and stone-gray alternate across this lightly circulated key date half. Luster glimmers from the margins and devices. A few minor obverse marks are of little import. At least four sets of clashmarks are visible on the field beneath the scroll.
*From The Findley Collection.*(#6108)

2810 **1819/8 Large 9 AU58 PCGS.** O-102, R.2. The date shows a large 9, with the underdigit 8 apparent as a curved line closing the 9. All three Ts on the reverse are defective at the right bases. Russet-brown, olive, and electric-green coloration is prominent near the peripheries. Modest highpoint wear and a few wispy hairlines are evident on both sides.(#6119)

2811 **Group Lot Two Capped Bust Halves, 1821-1826, and an 1895-S Morgan Dollar.** This lot includes: **1821 O-106, R.1., VF35 NGC,** a nicely detailed Choice VF specimen with natural gray-brown toning and typical wear for the grade; **1826 O-108a, R.1., AU53 PCGS,** highly lustrous with lovely gold-gray, golden-brown, reddish-brown coloration, some wispy hairlines in the fields; and an **1895-S Morgan Dollar, VF30 NGC,** moderately worn with mostly silver-gray surfaces that show light toning specks on each side.
(Total: 3 coins)(#6128)

2812 **1821 MS61 NGC.** O-105a, R.1. Orange-gold and aquamarine endow this lustrous and unblemished Mint State half. An original, sharply struck, and attractive example that should see spirited auction floor bidding.(#6128)

## Toned 1823 Half Dollar MS65, O-106a

2813 **1823 MS65 NGC.** O-106a, R.2. Cobalt-blue and purple toning gravitate to the obverse margins of this Gem, leaving the center light silver-gray. Uniform grayish-orange covers the reverse. A well executed strike brings out sharp definition on the design elements. Devoid of significant marks.(#6131)

## Select Ugly 3 1823 Half, O-110a

2814 **1823 Ugly 3 MS63 PCGS.** O-110a, R.3. Perhaps the same novice die engraver produced all three famously curious 1823 varieties: the Broken 3, Patched 3, and Ugly 3. This satiny example is notable for its high grade, and also for its prominently doubled profile on Liberty. Medium golden-brown graces the semi-prooflike surfaces, although a blush of ocean-blue is noted near the C in AMERICA. The lower left obverse field has a few minor marks.
*From The Findley Collection.*(#6134)

## Near-Mint 1824/1 Half Dollar, O-102

2815 **1824/1 AU58 PCGS.** O-102, High R.5. This Overton variety shares the same obverse die with the 'common' O-101, and has the same reverse die as the 'common' O-104. But this particular die combination, O-102, is quite rare. Perhaps the obverse die failed suddenly after a brief production. This lovely near-Gem has full mint bloom, but the cheek and cleavage show light friction. Golden-brown toning deepens toward the rims.
*From The Findley Collection.*(#6139)

2816 **1825 AU55 PCGS.** O-109, R.5. A rare variety distinguished by the heavily curled 2 in the date and the I in PLURIBUS sitting under the narrow gap between (ST)AT(ES). Modestly worn with green-gold, blue, and violet patina over still-lustrous fields.(#6142)

## Choice Mint State 1825 Bust Half, O-112

2817 **1825 MS64 NGC.** O-112, R.3. Recutting on the 2 in the date identifies this slightly better Overton variety. This lustrous near-Gem is attractively toned in light almond-gold and stone-gray. Well struck aside from the stars, and impressively devoid of contact. Census: 48 in 64, 42 finer (11/08).
*From The Findley Collection.*(#6142)

2818 **1826 MS61 NGC.** O-112a, R.2, with die chipping above the diagonal in the N in UNITED. Medium pumpkin-orange fields and devices are encompassed by peripheral navy-blue toning. Satiny and unmarked with a good strike and a pleasing appearance.
*From The Findley Collection.*(#6143)

## Lovely MS64 O-109 1826 Bust Half

2819 **1826 MS64 NGC.** O-109, R.1. Honey-gold and gunmetal-gray encompass this lustrous and pleasing near-Gem. The fields are virtually void of contact, and the portrait is only lightly abraded. Well struck save for the uppermost stars. A desirable and imposing silver type coin in such quality.
*From The Findley Collection.*(#6143)

## Peripherally Toned Near-Gem 1826 Bust Half, O-118a Overlapping Edge Lettering Mint Error

2820 **1826—Overlapping Edge Lettering—MS64 PCGS.** O-118a, R.1. Designated as O-118 on the PCGS insert, but reverse peripheral die cracks identify the later die state. Orange-gold borders frame the untoned fields and devices. A sharply struck and thoroughly lustrous near-Gem that has exemplary eye appeal. The holder obscures the edge lettering, but apparently the piece made a partial second pass through the Castaing machine.
*From The Findley Collection.*(#6143)

## Patinated 1826 Bust Half, O-108, MS64

2821 **1826 MS64 PCGS.** O-108, R.1. Close to O-108a, but there is no die crack through AM. Glenn Peterson notes that the obverse is identified by a vertical die line on the drapery fold above the lowest hair curl. Lavish sea-green, orange-red, and dove-gray toning drapes this well defined and minimally abraded Capped Bust half. The high points are cream-gray, and luster fills design elements. (#6143)

## Scarce O-133 1827 Half Dollar Square Base 2, MS62

2822 **1827 Square Base 2 MS62 ANACS.** O-133, R.4. Rich golden-brown embraces the fields and devices, while navy-blue beckons from the obverse periphery. A satiny and blemish-free example of this scarce die pairing, identified by a die line above the right (facing) claw. 1827 is the most prolific year for die marriages, with 49 different varieties presently known.(#6144)

## Select Mint State 1827 Bust Half, Square Base 2, O-114

2823 **1827 Square Base 2 MS63 NGC.** O-114, R.3. On the obverse a hair strand touches the bottom of the R in LIBERTY, and the base of the 7 is recut. A shallow planchet streak (as made) is noted in the left obverse field, just to the right of stars 2 and 3. The richly toned surfaces exhibit deep electric-blue, purple-red, and amber coloration. Both sides are devoid of any significant abrasions. The design features are sharply defined, except that most of the obverse stars are typically flat in the centers.
*From The Findley Collection.*(#6144)

## Gorgeous Near-Gem 1827 Bust Half, O-117

2824 **1827 Square Base 2 MS64 PCGS. CAC.** O-117, R.3. The upper, outer edge of the 8 in the date is prominently recut, as is the the 5 in the denomination, along the left edge of the upright. Highly lustrous with gorgeous, deep gold and purple-red coloration on the obverse, and only hints of gold color on the silver reverse. Generally well struck, but stars 12 and 13 on the obverse are weak in the centers, and RI in PLURIBUS are essentially unstruck. A gorgeous, minimally marked example of this scarcer 1827 variety. (#6144)

## Choice 1827 Square Base 2 Half, O-107

2825 **1827 Square Base 2 MS64 PCGS.** O-107, R.3. Apple-green and golden-tan intermingle throughout this lustrous near-Gem. Boldly struck and beautiful with a well preserved reverse and only a couple of inconspicuous obverse marks. 1827 is the most prolific date of the series in terms of die varieties: 49 are known so far.
*From The Findley Collection.*(#6144)

## Patinated Gem 1827 Half Dollar Square Base 2, O-106

2826 **1827 Square Base 2 MS65 PCGS.** O-106, R.2. Similar in layout to several other varieties for the year, O-106 is identified by the specific pattern of overlapping between the vertical and horizontal shield stripes. Magnificently toned in golden-brown, forest-green, and dove-gray. This Capped Bust half has refreshingly unabraded surfaces, and luster fills the designs. Population: 14 in 65, 4 finer (12/08).(#6144)

## Richly Toned Gem 1828 Bust Half Curl Base 2, Knob, O-107

2827 **1828 Curl Base 2, Knob MS65 NGC.** O-107, R.2. One of only two Curl 2, Knob varieties, the other (O-106) has a slightly different location for star 13 relative to the curl. Toned ocean-blue and caramel-gold with satiny luster and a needle-sharp strike. Careful inspection beneath a loupe is required to locate even faint abrasions. Surely among the finest survivors of its die marriage.
*From The Findley Collection.*(#6149)

## Splendid Choice 1829/7 Bust Half, O-102

2828 **1829/7 MS64 PCGS.** O-102, R.2. This gorgeous near-Gem exhibits vibrant luster and an exquisite strike. Pumpkin-gold toning near the rims ensures the originality. No apparent marks are located on either side. Although PCGS has certified a few pieces finer, it is unlikely that those could surpass the eye appeal of the present piece. Population: 9 in 64, 5 finer (11/08).(#6155)

## MS64 1829 Small Letters Half, O-105

2829 **1829 Small Letters MS64 NGC.** O-105, R.1. This precisely struck Choice Bust half is toned in cream-gray, russet, and forest-green shades. The satin luster is especially vivacious throughout the borders. Smooth save for a few faint marks clustered near star 5. *From The Findley Collection.*(#6154)

## Gem 1830 Small 0 Half, O-119

2830 **1830 Small 0 MS65 NGC.** O-119, R.1. The 0 in the date is recut along its upper left curve, which confirms the die variety. This lustrous and splendidly preserved Gem is originally patinated with autumn-gold centers and sea-green peripheries. The eagle's wing is clashed behind Liberty's head, as made. Census: 32 in 65, 12 finer (12/08). *From The Findley Collection.*(#6156)

## Lustrous Near-Gem 1830 Large 0 Half, O-123

2831 **1830 Large 0 MS64 PCGS.** O-123, R.1. Golden-brown and cream-gray toning blankets this shimmering and sharply impressed near-Gem. A beautifully smooth and highly pleasing example. Overton assigned the final four 1830 variety numbers (O-120 to O-123) to the Large 0. Most 1830 halves are Small 0. *From The Findley Collection.*(#6157)

## Lushly Toned Gem 1831 Half, O-119

2832 **1831 MS65 PCGS.** O-119, R.3. Golden-brown and powder-blue dominate this shimmering and exceptionally preserved Gem. Peripheral elements show inexactness of strike, but the major devices are well defined. Desirable in such quality, and housed in a green label holder. Population: 47 in 65, 4 finer (11/08). *From The Findley Collection.*(#6159)

2833 **Group Lot Three 1832 Bust Half Dollars, AU58.** This lot includes: **O-106, R.1, AU58 PCGS,** well struck with minimal highpoint wear, a great deal of luster for the grade, lovely mottled golden-tan and champagne coloration; **O-113, R.2, AU58 NGC,** deeply lustrous with rich red-brown and turquoise-green toning near the borders; and an **O-121, R.3, AU58 NGC,** satiny-gray with orange-gold luster near the devices and traces of electric-blue iridescence at the margins. (Total: 3 coins)(#6160)

## Select Mint State 1832 Half, O-110

2834 **1832 Small Letters MS63 NGC.** O-110, R.1. A tiny die spike from the top of Liberty's cap identifies this familiar 1832 marriage. Golden-brown toning enriches the peripheries and visits the centers. A few stars and the URI in PLURIBUS are softly brought up, but the major devices are precisely struck. Well preserved save for a solitary vertical hairline on the cheek.(#6160)

2835 **1832 Small Letters MS63 PCGS.** O-103, R.1. Principally cream-gray, although the borders provide generous glimpses of peach-gold. Lustrous and boldly stuck with smooth surfaces and excellent eye appeal.(#6160)

2836 **1833 MS62 NGC.** O-103, R.2. This variety shows Liberty's forecurl tripled. On the reverse, line 2 of stripe 3 extends far below the shield, and the upper left corner of the shield is broken. Generally well struck, if slightly weak on some of the obverse stars and on the eagle's right (facing) talons. Deeply lustrous with lovely sea-green, cobalt-blue, and golden color. There are a few minor marks on the obverse, including a pair of side-by-side nicks directly above the 8 in the date, but the reverse is nearly blemish-free.(#6163)

## Choice 1833 Half Dollar, O-113

2837 **1833 MS64 PCGS.** O-113, R.2. The silver-gray centers gradually cede to golden-brown borders. Sweeping cartwheel luster illuminates the undisturbed fields and devices. Sharply struck and highly attractive. A popular 19th century silver type. Population: 71 in 64, 19 finer (11/08).
*From The Findley Collection.*(#6163)

## Splendid Gem 1833 Half, O-108

2838 **1833 MS65 PCGS.** O-108, R.1. Golden-russet shades dominate the borders but gradually cede to ivory-gray centers. Well struck except for a couple of star centers. An impressive Gem that will never require an upgrade. O-108 can be identified by a diagonal die line within the lower portion of the shield, although Glenn Peterson chose a different diagnostic for his handy reference. Population: 16 in 65, 3 finer (12/08).
*From The Findley Collection.*(#6163)

## Attractive Gem 1834 Half Dollar
## Large Date, Small Letters, O-104

2839 **1834 Large Date, Small Letters MS65 NGC.** O-104, R.2. The first two vertical shield lines in the fourth stripe penetrate far below the shield. Dusky sea-green and mauve-gray patina embraces this well struck and shimmering Gem. The cheek and reverse field have only faint marks. Although Overton states that "stars are relatively flat," this piece has sharp stars aside from the center of star 13.
*Ex: New York Signature (Heritage, 7/2002), lot 8108; Santa Clara (Heritage, 11/2002), lot 1011; Fred Miller Collection (Heritage, 3/2004), lot 5816.*(#6165)

2840 **1834 Small Date, Small Letters MS61 NGC.** O-111, R.1. Golden-brown and navy-blue embrace this satiny and intricately struck Uncirculated Capped Bust half. No marks merit mention aside from a minor tick on Liberty's neck.
*From The Findley Collection.*(#6166)

## Colorful 1834 Half, O-113, MS63
## Small Date, Small Letters

2841 **1834 Small Date, Small Letters MS63 PCGS.** O-113, R.1. Curiously similar in layout to O-114, the dies can be distinguished by recutting on the final star's lower right point. Splashed of golden-brown and sea-green endow this lustrous example. The centers are well brought up, although selected stars are soft. Thorough examination finally locates a few unimportant hair-thin field marks. (#6166)

### Wildly Toned Choice O-108 1835 Half

2842 **1835 MS64 NGC.** O-108, R.3. The slender curved die crack above Liberty's cap identifies this slightly better variety. Lavishly toned in tobacco-brown, navy-blue, olive-green, and plum-mauve. A moderately prooflike near-Gem with minimal marks and imposing eye appeal. Well struck along the borders, with hints of incompleteness near the centers.
*From The Findley Collection.*(#6168)

### Vibrant O-113 Lettered Edge 1836 Half, MS63 ★

2843 **1836 Lettered Edge MS63 ★ NGC.** O-113, R.2. The inner points of the first four stars are recut, diagnostic for the variety. The peach-gold, lavender, and navy-blue patina is sufficiently intense to coax a Star designation from NGC. This sharply struck and satiny final-year Lettered Edge half lacks mentionable marks beneath the toning. Census: 1 in 63 ★, 3 finer with a Star designation (12/08). (#6169)

### Lustrous 1836 Lettered Edge Half, MS64, O-102

2844 **1836 Lettered Edge MS64 PCGS.** O-102, R.3. Refinished obverse die; 5 in denomination curved at top, crossbars 2 and 3 extend into the left (facing) wing. The eagle of this piece is well-defined, though a degree of softness is noted at the upper curls of the portrait. Strong, swirling luster shines beneath attractive gold-orange and silver-gray patina. Both sides are nicely preserved. Population: 52 in 64, 13 finer (12/08).(#6169)

## REEDED EDGE HALF DOLLARS

### CAC Gold VF30 Reeded Edge 1836 Half

2845 **1836 Reeded Edge VF30 PCGS. Gold CAC.** The green label holder bears a seldom seen *gold* CAC sticker, which indicates that CAC believes the coin meets the requirements of a finer grade. Only 1,200 pieces were reported struck for this introductory Reeded Edge issue. This is a moderately circulated example with medium tan and powder-blue toning. Minor marks on the fields near the mouth and eagle's neck merit only passing mention.(#6175)

### Pleasing XF 1836 Reeded Edge Half

2846 **1836 Reeded Edge XF40 PCGS.** Even emerald-green toning envelops this minimally abraded and moderately worn example. The traditional mintage for this issue is 1,200 pieces, although if so, there are more VF to AU survivors than expected for such a brief production. Nonetheless, the Reeded Edge variety is highly popular, undeniably scarce, and has historical significance as the first steam engine-produced half dollar issue.(#6175)

### Striking AU Details Reeded Edge 1836 Half

2847 **1836 Reeded Edge—Improperly Cleaned—NCS. AU Details.** A minimally circulated example of this historic and much hoarded low mintage issue. Brilliant and overly bright, but luster fills design elements and partly extends into the open fields. No marks are apparent, and the strike is crisp save for the left (facing) claw.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#6175)

## Interesting Reeded Edge 1836 Half Dollar, AU58

2848 **1836 Reeded Edge AU58 PCGS.** A blend of medium intensity bluish-gray, greenish-orange, and violet patination bathe both sides of this near-Mint half. An attentive strike imparts strong delineation to the design features, with the exception of softness in a couple of the star centers. A few light circulation marks do not distract.
*From The Findley Collection.*(#6175)

## Scarce 1836 Reeded Edge Half MS62

2849 **1836 Reeded Edge MS62 NGC.** Toned deep orange and gray with peripheral glimpses of ruby-red. The cheek has a diagonal mark. The traditional mintage of the 1836 Reeded Edge is 1,200 pieces. In recent years, the Guide Book has placed a plus sign following the mintage, since the number of survivors suggests a higher emission. Although available for a price in VF to AU, the issue is truly rare in Uncirculated condition. Census: 11 in 62, 10 finer (11/08).
*From The Findley Collection.*(#6175)

2850 **1837 MS61 NGC.** Dappled green-gold, orange, blue, and violet patina embraces each side. Crisply detailed and minimally marked for the grade assigned, a gorgeous Reeded Edge coin.(#6176)

## Well Struck 1837 Select Half Dollar

2851 **1837 MS63 NGC.** Aqua-blue patination concentrates at the rims of this Select half, leaving most of the central areas grayish-orange. A well executed strike emboldens the design elements, except for softness in a couple of star centers. Lustrous surfaces reveal just a few minor marks.(#6176)

## Colorful Choice 1837 Half Dollar

2852 **1837 MS64 NGC.** Dappled golden-brown and russet toning enriches this lustrous and surprisingly well struck silver type coin. The fields are remarkably smooth, and only moderate contact near the chin prevents an even higher grade. Second and final year of the 50 CENTS reverse.
*From The Findley Collection.*(#6176)

## Lushly Toned Near-Gem 1838 Half

2853 **1838 MS64 NGC.** Green-gold and ocean-blue bands surround apricot-gray centers. The major devices are well struck, while the left borders exhibit only minor softness. Nicely preserved and attractive. A rare type in Mint State, as it was struck for just two years and few pieces were set aside. Census: 61 in 64, 23 finer (11/08).
*Ex: FUN Signature (Heritage, 1/2007), lot 4446, which realized $7,187.50.*(#6177)

## Stunningly Original 1839 Half Dollar, MS64

2854 **1839 MS64 PCGS. CAC.** Beautiful original toning in shades of copper-orange, sage, and jade are the hallmark of this stunning near-Gem Reeded Edge half dollar. While there are many low-grade examples of the 1839 Reeded Edge in the numismatic marketplace, precious few are numerically finer or aesthetically more pleasing than the present example. PCGS has graded six pieces in higher grade (12/08).(#6179)

## SEATED HALF DOLLARS

2855 **1843 MS63 PCGS.** Aside from dabs of rose and tan at the obverse margins, this Select piece is minimally toned. Well-defined with attractive eye appeal. Population: 18 in 63, 7 finer (12/08). (#6243)

2856 **1843-O MS62 PCGS.** Subtle tan overtones visit the generally silver-gray surfaces of this unworn O-mint half. Solid detail for the issue with fewer overt faults than the grade might suggest. Population: 7 in 62, 17 finer (11/08).(#6244)

### Select Mint State 1844 Half

2857 **1844 MS63 PCGS.** The crossbar of the first 4 in the date is repunched. Faint peripheral die cracks are evident on both sides. Well struck with light golden toning and shimmering mint luster in the fields. Clash marks and faint die lines are noted just above and beneath Liberty's elbow. Population: 21 in 63, 14 finer (12/08). (#6245)

### Impressively Struck 1844 Select Half Dollar

2858 **1844 MS63 PCGS.** Sky-blue and silver-gray coloration in the obverse center transitions to deep olive-brown and purple at the margins, while mostly purplish-brown, light blue, and violet adhere to the reverse. Generally well preserved, save for a couple of faint linear marks on the lower reverse field. The design elements are impressively struck up. Population: 21 in 63, 14 finer (12/08). (#6245)

### Near-Gem 1846 Medium Date Half
### Conditionally Rare WB-102 Errant 6

2859 **1846 Medium Date MS64 NGC.** WB-102, their 'errant 6' variety listed as High R.7 in Mint State. This shimmering near-Gem has rich peach-gold toning and a penetrating strike. Pleasing for the grade despite a few wispy marks on the obverse field. Census: 11 in 64, 7 finer (12/08).
*From The Findley Collection.*(#6251)

2860 **1846-O Medium Date MS61 NGC.** Delicate sea-green peripheral elements cede to deeper blue, violet, and rose at the centers. Well-defined with strong eye appeal despite faint, scattered abrasions. Census: 7 in 61, 9 finer (12/08).
*From The Malibu Collection.*(#6255)

2861 **1847 MS63 PCGS.** Sharply defined in all areas, this is one of the few No Motto Seated halves that is occasionally available in the better grades of mint condition. Deep violet and blue toning on each side.(#6257)

2862 **1849/1849—Obverse Scratched—NCS. AU Details.** WB-102. Remnants of all four date digits are west of the prominent date. The left obverse field has a vertical scratch, and the field near the eagle's head is mildly granular. A scrape is concealed near the left border of Liberty's shield, and the obverse rim is abraded near 7 o'clock. Listed as R.6 in all grades in the classic Wiley-Bugert reference. (#6262)

### Marvelous MS64 1853 Seated Half
### Arrows and Rays Design

2863 **1853 Arrows and Rays MS64 PCGS. CAC.** Dove-gray enriches much of the obverse, although the periphery is golden-brown. The reverse is primarily pearl-gray but displays sun-yellow throughout the border. Satin luster encompasses this well struck one-year type coin. Smooth aside from an occasional concealed graze on the obverse field.
*From The James Mossman Collection.*(#6275)

### Choice 1853 Arrows and Rays Half

2864 **1853 Arrows and Rays MS64 NGC.** Dusky chestnut-gold embraces the obverse, while the reverse features blends of emerald-green and caramel-tan. Cartwheel luster sweeps across clean surfaces. This crisply struck single-year type coin can be identified by a mint-made strike-through over the B in LIBERTY.(#6275)

2865 **1854-O Arrows—Artificial Toning—NCS. Unc Details.** Carefully dipped and retoned, the obverse of this piece has gold, rose, and violet toning while the reverse is brilliant with only slight champagne color.(#6280)

### Magnificent 1855-O Arrows Half, MS64

2866 **1855-O Arrows MS64 PCGS.** Astonishing eye appeal for this O-mint Arrows half dollar issue. The luster is impressive beneath warm orange, violet, and gold-gray shadings. Sharply struck and Choice with impressive preservation for the grade. With just 21 finer examples known to PCGS (11/08), this issue is a condition rarity any finer.(#6283)

2867 **1858 MS64 PCGS.** Type One Reverse. A lovely satin representative with hints of lilac and champagne toning on both sides. A nicely detailed piece. Population: 56 in 64, 15 finer (12/08).(#6293)

## CONFEDERATE STATES OF AMERICA

### Choice AU CSA Obverse 1861-O Confederate Half, FS-401

2868 **1861-O CSA Obverse AU55 NGC.** FS-401, formerly FS-007. Wiley-11a. The telltale die crack running from the rim to Liberty's nose identifies the CSA Obverse variety. That obverse die was paired with the CSA reverse to strike the prohibitively rare (four known) original Confederate States of America halves. Toned dark golden-brown with pleasing definition and smooth surfaces save for faint marks above HALF DOL.(#6303)

### AU55 Scott Restrike 1861 Confederate Half

2869 **1861 Scott Restrike AU55 PCGS.** Breen-8002. In 1879, J.W. Scott obtained the reverse die for the Confederate half dollar from coin dealer Ebenezer Locke Mason, Jr. Scott then located 500 1861-dated Seated halves, machined off the reverses, and restruck them with the Confederate reverse die. This is a dusky charcoal-gray representative with pleasing sharpness and only a hint of granularity. Listed on page 389 of the 2009 *Guide Book*.(#340402)

## SEATED HALF DOLLARS

### Scarce, Alluring Near-Gem 1867 Seated Half

2870 **1867 MS64 PCGS.** WB-101. Normal Date. Gorgeous, deep multicolored toning adorns each side of this visually alluring near-Gem. The design elements are sharply struck, and even the hair detail on the top of Liberty's head is crisply rendered. An abrasion on Liberty's upper chest and a few faint hairlines in the right obverse field limit the grade. Wiley and Bugert (1993) assigned this variety a Low R.6 rarity ranking, in Mint State, in their *Complete Guide to Liberty Seated Half Dollars*. Population: 9 in 64, 7 finer (11/08). (#6321)

### Difficult 1870-CC Half Dollar

2871 **1870-CC—Genuine—PCGS.** In-house graded VF30 Details, Minor Environmental Damage. The obverse has moderately granular charcoal toning near Liberty's raised elbow and on the lower portion of her shield. Although the 1870-CC half has a considerably higher mintage than the 1870-CC silver dollar, the former is rarer, particularly in better circulated grades.(#6328)

## Remarkable VF30 1870-CC Half Dollar

2872 **1870-CC VF30 PCGS.** Medium gray fields highlight lighter silver-gray devices. A nicely defined coin, with LIB RTY showing, as well as all the letters in the reverse motto. The surfaces on both sides are remarkably clean. Very scarce overall. Population: 5 in 30, 32 finer (12/08).(#6328)

## Rare Near-Gem 1870-S Seated Half Dollar

2873 **1870-S MS64 PCGS.** Deep amber, gold, and blue-gray coloration adorns each side of this lustrous near-Gem. Sharply struck with surprisingly few marks for the grade, all of which are small and non-distracting. The 1870-S half dollar had a mintage of one million pieces, but high grade survivors are rare. Housed in an early PCGS holder with a green label. Population: 2 in 64, 2 finer (11/08). (#6329)

2874 **1871-CC VG10 PCGS.** A deep cream-gray representative of this scarce early Carson City emission. Two-thirds of IN GOD WE TRUST is legible, and noticeable drapery and plumage detail remains. The right obverse field has several swirling faint abrasions, concealed by the toning.(#6331)

## Choice XF 1871-CC Seated Half

2875 **1871-CC XF45 PCGS.** This moderately circulated early CC-mint half is richly toned in golden-brown and sea-green. A few small field marks are noted, but are of little import. Scarcer than suggested by its mintage of 153,950 pieces. The issue was needed by the Western economy, and only five pieces have been certified as Mint State by the combined forces of NGC and PCGS. Population: 12 in 45, 21 finer (11/08).(#6331)

## Pleasing XF45 1871-CC Half Dollar

2876 **1871-CC XF45 PCGS.** Slate-gray overall with gunmetal-gray and chestnut-tan toning near the rims. An impressively detailed example of this little saved issue from the early years of the Carson City Mint. The near-absence of abrasions assures the eye appeal. Population: 12 in 45, 21 finer (11/08).(#6331)

## Desirable XF45 1873-CC No Arrows Half

2877 **1873-CC No Arrows XF45 PCGS.** Small CC. A pleasing Choice XF representative of this elusive issue. Satin luster encompasses the borders and devices, and both sides are essentially unabraded. A small obverse lamination at 3 o'clock identifies this attractive example. Population: 5 in 45, 25 finer (11/08).(#6338)

## Charming Select 1873 Arrows Half

2878 **1873 Arrows MS63 PCGS.** WB-106. Large arrows. Delicate gold and pearl-gray toning visits this lustrous and attractively preserved Select Seated half. A good strike overall, with some incompleteness noted on Liberty's hair and the two uppermost stars. The Arrows subtype was struck only in 1873 and 1874.(#6343)

## Lustrous 1875-S Half Dollar, MS65

2879 **1875-S MS65 PCGS.** Soft, variegated gold and sky-blue patination graces both sides of this Gem S-mint, each of which exudes marvelous luster. An attentive strike leaves strong definition on the design features. Nicely preserved throughout. Population: 51 in 65, 11 finer (12/08).(#6351)

## Beautiful Gem 1876-CC Half

2880 **1876-CC MS65 PCGS.** Ex: Battle Born Collection. WB-102, Medium CC. Caramel-gold and dove-gray embrace this satiny and remarkably unabraded Gem. An intricate strike, fully brought up save for trivial incompleteness on the eagle's left (facing) ankle. An outstanding Carson City type coin. Population: 8 in 65, 4 finer (12/08).(#6353)

2881 **1877 MS64 PCGS. CAC.** An impressive near-Gem, showing brilliant silver luster and faint iridescent toning over satiny surfaces. Both sides show evidence of central weakness. Population: 49 in 64, 30 finer (11/08).(#6355)

## Delightful Near-Gem 1877-CC Half

2882 **1877-CC MS64 PCGS. CAC.** Apricot and stone-gray toning graces this lustrous and meticulously struck Carson City type coin. The right obverse field has a few wispy marks, but the preservation is otherwise exemplary. The advent of the Morgan dollar in 1878 put an end to Carson City coinage of other silver denominations. Population: 39 in 64, 19 finer (12/08).(#6356)

## Lush Gem 1877-CC Half Dollar

2883 **1877-CC MS65 PCGS.** Type Two Reverse. Richly toned in dusky cream-gray, peach-gold, and apple-green. The satiny surfaces appear unabraded, and the strike is intricate throughout. Ideal for an exemplary quality Carson City silver type set. Population: 16 in 65, 3 finer (11/08).(#6356)

## Attractive 1879 Half Dollar, MS66

2884 **1879 MS66 PCGS. CAC.** Cobalt-blue at the margins grades into purple and then to golden-tan in the centers of this Premium Gem, and an exacting strike delivers strong delineation to the design elements. Close examination reveals no significant marks on either side. Population: 45 in 66, 15 finer (12/08).(#6361)

## Colorful 1879 Seated Half MS66

2885 **1879 MS66 PCGS.** Fire-red, lemon-gold, and lime-green endow this lustrous and pinpoint-sharp Seated half. The reverse appears pristine, while the obverse field has only unimportant contact. Only 4,800 business strikes were coined, since the Mint struggled to comply with the Bland-Allison Act. Housed in an old green label holder. Population: 45 in 66, 15 finer (12/08).(#6361)

# PROOF SEATED HALF DOLLARS

## Originally Toned Select Proof 1857 Half

2886 **1857 PR63 PCGS. CAC.** The 1857 is an important, early proof Seated half that was struck the year prior to the larger commercial mintages that began in earnest in 1858. The proof quantity issued of the 1857 has been estimated at 50 pieces, although the number of proofs extant, according to Wiley and Bugert in their 1993 *The Complete Guide to Liberty Seated Half Dollars*, is less than 25 coins. The present specimen is a deeply mirrored coin that has sharply struck design elements and attractive peripheral aquamarine and apricot toning. Close examination reveals a few wispy hairlines, and a minute as-made lint mark in the right (facing) obverse field. Housed in a first generation PCGS holder. Population: 16 in 63, 13 finer (12/08).
*Ex: Ken Arnold Collection (Heritage, 9/2005), lot 3267, which realized $4,887.50.*
*From The Malibu Collection.*(#6411)

## Delightful Choice Proof 1857 Half Dollar

2887 **1857 PR64 NGC.** Proof coinage minted before 1858 is always desirable and usually quite rare, with a mystique brought about in part because mintage figures are simply unavailable. As such, we are left to speculate as to the number of survivors. Wiley-Bugert suggest that 15-25 proof 1857 half dollars survive, while Breen's figure was 20-25. The advent of census figures from the major grading services suggests that these figures were too low, and, taking resubmissions into account, that there may be 50 or so distinct survivors. The current piece is a heavily mirrored coin with delightful peripheral toning, and it exactly fits Breen's characteristics for proofs of the date, including an unpolished area between the eagle's left (facing) wing and leaves. The strike is not full, with weakness noted on the eagle's leg, claw, and arrowheads, yet the overall effect is more than pleasing.
*From The Findley Collection.*(#6411)

## Rare Cameo PR63 1857 Half

2888 **1857 PR63 Cameo PCGS.** Nicely struck and flashy with light to medium golden toning. The obverse field has a few faint vertical hairlines. The base of the 8 is lightly recut. Proof mintages were not recorded until 1859, and pre-1858 proofs are extremely scarce. PCGS has certified just 41 specimens across all proof grades. Imagine what a proof Seated dollar of similar rarity would bring. Population: 2 in 63 Cameo, 0 finer (11/08).
*From The Findley Collection.*(#86411)

## Colorful Choice Proof 1858 Half

2889 **1858 PR64 PCGS.** Sea-green and autumn-gold enrich this flashy and penetratingly struck Choice proof. A pair of minor strike-throughs (as made) are noted near star 13. All pre-1859 proof halves have an unrecorded (but low) emission. Encapsulated in a green label holder. Population: 18 in 64, 4 finer (12/08).(#6412)

## Splendid PR65 1861 Half Dollar

2890 **1861 PR65 NGC. CAC.** Intense bands of navy-blue and cherry-red fill the margins, but the fields and devices are golden-tan. Boldly struck and refreshingly devoid of hairlines. A popular Civil War date, much scarcer than its printed mintage of 1,000 pieces due to melting of surplus sets. Census: 14 in 65, 8 finer (12/08).
*From The Malibu Collection.*(#6415)

## Appealing 1862 Gem Proof Fifty Cent

2891 **1862 PR65 PCGS. CAC.** The devices stand out against the mirrored fields of this Gem proof. Cobalt-blue, lavender, and golden-tan patina assumes a random pattern on both sides, with the obverse displaying a somewhat streaked appearance. Sharply struck and well cared for surfaces add to the coin's overall eye appeal. Population: 16 in 65, 3 finer (11/08).(#6416)

## Crisp 1863 Half Dollar, PR65

2892 **1863 PR65 PCGS.** The reflective fields of this Gem proof highlight the devices when the coin is tilted slightly beneath a light source. A melange of cobalt-blue, lavender, golden-orange, and yellow-green patina bathe each side of this Gem proof. A precision strike emboldens the design features, and the surfaces are devoid of mentionable marks. Population: 11 in 65, 2 finer (12/08). (#6417)

## Sharp 1863 PR63 ★ Cameo Half Dollar

2893 **1863 PR63 Cameo NGC.** Cobalt-blue, purple, and golden-brown patina gravitate to the margins of this Select proof Cameo, leaving the central areas untoned. A well directed strike sharpens the design elements. Some light field hairlines limit the numerical grade. Census: 1 in 63 ★ Cameo, 10 finer (12/08).
*From The Malibu Collection.*(#86417)

## Exquisite 1863 Half Dollar, PR64 Cameo

2894 **1863 PR64 Cameo PCGS. CAC.** An untoned reverse cedes to bluish-purple at the obverse margins that frame the champagne-silver central area. An exquisitely struck piece, with just a few unobtrusive handling marks that preclude Gem classification. Population: 6 in 64 Cameo, 4 finer (12/08).
*From The Malibu Collection.*(#86417)

## Marvelous 1865 Half Dollar PR66 ★ Cameo

2895 **1865 PR66 ★ Cameo NGC.** Satiny motifs appear to be suspended over the deep watery fields of this Premium Gem proof. Concentric rings of electric-blue, lavender, and gold-tan concentrate at the margins. Exquisitely struck and marvelously preserved. Census: 2 in 66 ★ Cameo, 1 finer (12/08).
*From The Malibu Collection.*(#86419)

## Attractive 1866 Motto Half Dollar, PR66

2896 **1866 Motto PR66 NGC.** Vivid iridescent hues of gunmetal-blue, purple, and sunset-gold gravitate to the margins on each side of this first-year With Motto issue, leaving the centers a soft champagne-gold. Sharply struck and nicely preserved. Certainly one of the finest survivors from a mintage of 725 proofs. Census: 7 in 66, 1 finer (12/08).
*From The Malibu Collection.*(#6424)

## Vividly Toned Gem Proof 1867 Half

2897 **1867 PR65 NGC.** Cobalt-blue and peach-gold envelop this penetratingly struck and unblemished Gem. The flashy fields and iridescent patina combine to provide exceptional eye appeal. Perusal beneath a loupe fails to find any noticeable hairlines. A meager 625 proofs were struck. Census: 25 in 65, 6 finer (12/08).(#6425)

## Colorful 1867 Gem Proof Half Dollar

2898 **1867 PR65 PCGS.** A well executed strike leaves crisp definition on the design elements of this Gem proof. A melange of cobalt-blue, purple, and gold-tan patination bathes both sides, and exhibits slightly deeper hues on the reverse. This is a well preserved piece, revealing no significant marks. Population: 12 in 65, 5 finer (11/08). (#6425)

2899 **1867 PR65 Cameo NGC.** Delicate sea-green and ocean-blue peripheral tints yield to champagne and gold-gray at the margins. Boldly impressed with distinct contrast that shines through the toning. Census: 9 in 65 Cameo, 7 finer (12/08).
*From The Malibu Collection.*(#86425)

## Breathtaking 1868 Fifty Cent PR66 ★ Cameo

2900 **1868 PR66 ★ Cameo NGC.** Whispers of gunmetal-blue, purple, and golden-brown toning cling to the rims, and an attentive strike emboldens the design features. Deep mirrored fields highlight the devices, generating breathtaking eye appeal. Devoid of significant marks. Census: 3 in 66 ★ Cameo, 1 finer (12/08).(#86426)

## Attractive 1869 Half Dollar PR64 Cameo

2901 **1869 PR64 Cameo PCGS. CAC.** Ocean-blue, apricot, and cherry-red endow this flashy and sharply impressed near-Gem. Each side displays a few nearly imperceptible roller marks, as produced. A tiny lintmark is visible beneath the lowest arrowhead. Scarce, as only 600 proofs were struck. Population: 5 in 64 Cameo, 4 finer (12/08). (#86427)

2902 **1872 PR63 NGC.** A remarkable Select proof with rich violet and gold toning on the obverse and lighter silver with peripheral rainbow toning on the reverse. Both sides have fully mirrored fields and satiny devices.(#6430)

## Ultra Cameo PR63 1872 Half

2903 **1872 PR63 Ultra Cameo NGC.** Dazzling field reflectivity and snow-white devices combine to confirm the Ultra Cameo designation. Brilliant save for rose-red patina along the margins. A well struck specimen that has a few delicate obverse field hairlines. Only 950 proofs were coined. Census: 1 in 63 Ultra Cameo, 2 finer (12/08).(#96430)

## Boldly Struck 1875 Gem Proof Half Dollar

2904 **1875 PR65 NGC.** A melange of yellow-gold, green, violet, and bluish-gray patina runs over both sides of this Gem proof, and an exacting strike leaves bold delineation on the design elements. Both faces are devoid of significant marks.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#6436)

2905 **1876 PR63 Cameo PCGS.** Sharply struck on Liberty's head and all of the obverse stars, with slight weakness noted on the eagle's left (facing) talons. Lovely russet, gold, and cobalt-blue toning adorns the peripheries. Noteworthy cameo contrast is evident on both sides. A few wispy hairlines in the fields limit the grade. Population: 11 in 63 Cameo, 16 finer (11/08).(#86437)

## Extraordinary 1879 Seated Liberty Half Dollar PR66 Cameo

2906 **1879 PR66 Cameo NGC.** Type One Reverse. An exceptionally reflective and practically untoned Premium Gem. Thick mint frost is consistent throughout the devices and legends. An unobtrusive fingerprint is noted on AMERICA. Great overall appeal. Census: 9 in 66 Cameo, 13 finer (12/08).(#86440)

## Lovely Premium Gem Proof 1880 Type Two Seated Half

2907 **1880 PR66 NGC.** Type Two Reverse. Jade-green, rose, and steel-blue toning predominate on each side. This boldly struck Premium Gem proof reveals only a few trivial hairlines in the fields, but the overall eye appeal is extremely high for this low-mintage date for both proofs and business strikes. Census: 24 in 66, 9 finer (12/08). (#6441)

## Desirable 1880 Seated Half, PR65 Cameo

2908 **1880 PR65 Cameo PCGS.** Type Two Reverse. Both sides of this lovely Gem proof are impressively mirrored with frosty luster on the devices. The central obverse and reverse have light ivory color that is framed by peripheral gold and iridescent toning. Despite a relatively large proof production, few survivors can match the overall quality and eye appeal of this piece. Population: 14 in 65 Cameo, 7 finer (12/08).(#86441)

## Sumptuous Gem Proof 1882 Half

2909 **1882 PR65 PCGS.** A rich endowment of antique-copper and dove-gray patina yields to iridescent apricot-orange and electric-blue hues at direct angles. As befits a specimen striking of this low mintage date, the devices are crisply detailed with no areas of bothersome weakness. A find for the high grade type collector who desires originality for their collection.
*Ex: Long Beach Signature (Heritage, 9/2002), lot 6874.*(#6443)

2910 **1882 PR64 Cameo NGC.** Brilliant throughout and heavily cameoed with strong field-to-device contrast. Just a few light contact marks account for the grade. A low, total-mintage issue from the 1880s.(#86443)

## Impressively Toned PR66 1884 Half

2911 **1884 PR66 PCGS.** Impressive forest-green and plum-red toning dominates the borders, but leaves a window of brilliance at the center of each side. The devices are nicely frosted where toning is absent, and the strike shows only a trace of softness on Liberty's forehead. Housed in an old green label holder. Population: 8 in 66, 3 finer (12/08).
*Ex: FUN Signature (Heritage, 1/2007), lot 4543, which realized $4,312.50.*
*From The Malibu Collection.*(#6445)

## Silver-White 1885 Half Dollar, PR64

2912 **1885 PR64 PCGS.** The year 1885 was another in the late 19th century that saw a minuscule production of half dollars, as all else was subordinate to the demand to produce millions of Morgan silver dollars, aka "Bland" dollars, under the terms of the Bland-Allison Act of 1878. This pretty near-Gem proof is one of only 930 struck, with a complement of 5,200 circulation strikes. There is only the barest hint of gold around the rim, with radiant silver-white surfaces. A few trivial contact marks and a dotlike planchet lamination between stars 1 and 2 are all that appear to limit an even finer grade, but there is much appeal present.(#6446)

2913 **1885 PR64 Cameo PCGS.** Impressively contrasted with mirrors that shine through thin cloud-gray patina. The strike is sharp, and hints of twinkling frost drape the central devices. Faint hairlines account for the grade. Population: 13 in 64 Cameo, 12 finer (12/08). (#86446)

## Sharp 1885 Seated Half Dollar, PR66 Cameo

2914 **1885 PR66 Cameo NGC.** The silver-white surfaces show just a trace of gold patina at the rims, with good contrast on each side and a premium appearance. A sharp and appealing example, one of just 930 proofs coined in this era of low business strike mintages. Census: 13 in 66 Cameo, 10 finer (12/08).(#86446)

## Original PR66 1886 Half

2915 **1886 PR66 NGC.** Frosty devices contrast mildly with the reflective fields, although no Cameo designation is present. This may because of the older holder generation, or because of the rich cream-gray, apple-green, and honey-gold toning. Exquisite despite a small spot near the U in UNITED. Only 886 proofs were struck. Census: 20 in 66, 7 finer (11/08).(#6447)

## Lovely PR65 Cameo 1886 Seated Half Ex: Benson

2916 **1886 PR65 Cameo PCGS. CAC.** Ex: Benson. Beautiful pumpkin-gold, lime-green, electric-blue, and plum-red invigorate this sharply struck Gem. Icy devices provide exemplary contrast with the deeply mirrored fields. An aesthetic numismatic treat. Population: 5 in 65 Cameo, 3 finer (12/08).
*Ex: James G. Macallister, 10/1944; Benson Collection, Part II (Ira & Larry Goldberg, 2/2002), lot 1049.*
*From The Malibu Collection.*(#86447)

2917 **1888 PR64 PCGS.** Deep, seemingly opaque patina reveals electric reflectivity in the mirrors when tilted. Blocks of blue, violet, sea-green, and mauve grace the smooth, minimally hairlined surfaces. Population: 46 in 64, 34 finer (12/08).(#6449)

## Gorgeous Gem Proof 1888 Half

2918 **1888 PR65 NGC.** Sharply struck and exquisitely toned. Outer bands of blue-green and sapphire yield to tan and gold-orange closer to the centers. Carefully preserved, even by the standards of the grade, with stirring eye appeal. Census: 22 in 65, 22 finer (12/08).
*From The Malibu Collection.*(#6449)

2919 **1888 PR63 Cameo PCGS.** A boldly defined Select beauty that has exceptionally deep mirrors and light champagne toning over the reverse. Light, scattered hairlines do not take away from this specimen's remarkable contrast. Population: 5 in 63 Cameo, 24 finer (12/08).(#86449)

## Vibrantly Toned PR66 ★ 1889 Half

2920 **1889 PR66 ★ NGC.** Ex: Richmond Collection. As of (11/08), the present piece is the only proof 1889 half dollar that has received the coveted Star designation from NGC. Undoubtedly, it was awarded for the lavish electric-blue, cherry-red, orange, and forest-green toning that dominates both sides. This exquisite Superb Gem also benefits from a razor-sharp strike and an undisturbed appearance.
*Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1834.*
*From The Malibu Collection.*(#6450)

## Charming 1890 Half Dollar, PR65 Cameo

2921 **1890 PR65 Cameo NGC.** A hint of champagne toning resides on the obverse and reverse surfaces of this delightful Gem Cameo proof. The field-device contrast is exceptional, created through a combination of deeply mirrored fields and wonderfully lustrous devices. Census: 7 in 65 Cameo, 13 finer (12/08).(#86451)

# BARBER HALF DOLLARS

## Impressive MS65 1892 Barber Half

2922 **1892 MS65 NGC.** This first-year Barber Gem exhibits dazzling luster throughout the light to medium silver-gray and cobalt-blue toning. An exquisite strike imparts sharp definition to the design elements, save for minor characteristic softness in the upper right part of the shield.(#6461)

2923 **1892-O MS63 NGC.** Ex: Richmond Collection. The satiny pearl-gray surfaces show definite golden highlights near the periphery. Well struck and nicely preserved overall, even though a few stray marks keep it from a finer grade. An appealing Select Uncirculated example from the first year of Barber type coinage. Census: 34 in 63, 44 finer (11/08).
*From The Plymouth Collection.*(#6462)

## Reflective Gem 1892-O Barber Half, MS65

2924 **1892-O MS65 PCGS.** Although the mintage of Barber half dollars at New Orleans in 1892 was limited to just 390,000 coins, it is usually considered a readily available date. While that may be true in lower circulated grades, and perhaps even up to about MS60, examples in Gem quality are extremely rare, as the PCGS population data reveals. In our past auctions, we have only handled eight PCGS MS65 examples, along with a couple higher-grade NGC coins.

The Dale Friend Specimen is a remarkable Gem that exhibits brilliant silver luster with light splashes of gold toning on the obverse. The reverse is bright and untoned. Particularly desirable is the satiny, reflective field luster that surrounds fully frosted devices, imparting a wonderful cameo appearance. A minor skirmish on Liberty's neck is the only imperfection of any note. While the top edge of the right (facing) wing is a little ill-defined, the balance of the design elements on both sides are bold and crisp. Population: 12 in 65, 4 finer (10/08).
*Ex: Heritage Galleries.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6462)

## Scarce 1892-S Barber Half MS64 ★, Ex: Richmond Collection

2925 **1892-S MS64 ★ NGC.** A brilliant and mildly prooflike near-Gem that has a needle-sharp strike and gorgeously smooth fields. Only minor facial grazes preclude an even higher grade. A desirable example of this better date. Census: 1 in 64 ★, 10 finer (12/00).
*Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1839.*
*From The Plymouth Collection.*(#6464)

## Excellent Gem 1892-S Half

2926 **1892-S MS65 NGC.** While most coinage designs receive a "savings" bonus from the first year of issue, the Barber design found few fans, particularly on the West Coast; thus, the 1892-S half is a rarity so fine. Minimally toned with a crisp strike and lovely preservation. Census: 7 in 65, 3 finer (11/08).
*From The Plymouth Collection.*(#6464)

## Gorgeous 1893 Barber Half, MS66 Tied for Finest PCGS Certified

2927 **1893 MS66 PCGS.** This is only the ninth time we have offered an MS66 PCGS certified example of the date since the beginning of our auction archive records 15 years ago. The previous eight auction appearances represent just two different coins that were each offered four times! Much as individual examples are offered in multiple auction events, it is certain that individual coins are submitted on multiple occasions to PCGS for certification. It is highly likely that the 11 MS66 examples appearing in the *PCGS Population Report* may only represent four or five different coins.

The Dale Friend Collection boasts an amazing PCGS MS66 example that possesses delightful and original bluish-green toning on the obverse, with iridescent accents. The reverse has a blend if ivory and sky-blue toning. The surfaces are nearly flawless, and the strike is exceptional. We fully expect this piece to set a new record price. Currently, the high auction price for any Mint State 1893 Barber half dollar is $5,940 for an example that we sold in November 1989. Population: 11 in 66, 0 finer (10/08).
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6465)

## Scintillating Choice 1893-O Half Dollar

2928 **1893-O MS64 PCGS.** The 1893-O, with a mintage of 1,389,000 pieces, is available in MS63 and MS64 with a little searching and patience. Full Gem examples, however, are rare. Like many New Orleans issues, the 1893-O often comes weakly struck. The current lovely near-Gem is generally well defined. The only areas of softness are on the upper right (facing) part of the shield and on the eagle's left talons and adjacent arrow feathers. The lustrous surfaces offer original shades of golden-orange and purple, with flashes of turquoise at the margins. Minute abrasions on Liberty's cheek are all that limit the grade. Population: 41 in 64, 7 finer (12/08).
*Ex: FUN Signature (Heritage, 1/2006), lot 2805.*(#6466)

## Elusive 1893-O Barber Half, MS65

2929 **1893-O MS65 PCGS.** The 1893-O is a surprisingly difficult issue to find in Gem or finer quality, especially with bold design definition. Compare this piece to the Thaine Price coin, for example, a coin that David Akers called "possibly the finest known specimen." While the Price coin has marginally finer surfaces, the strike of that coin is extremely weak, especially on the reverse. The specimen that Dale Friend chose for his collection possesses one of the sharpest strikes of any example we have seen or handled.

An incredible example with fully brilliant and frosty surfaces, white at the centers and toned in gold, blue, green, and lilac closer to the borders. Both dies have interesting clash marks and several die cracks. Population: 4 in 65, 3 finer (10/08).
*Ex: Larry Shepherd.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6466)

## Extraordinary 1894 Barber Half, MS66

2930 **1894 MS66 PCGS.** Ex: Duckor. From the Dr. Duckor Collection of Barber half dollars, this fully brilliant silver example has subtle hints of ivory luster. While the mintage exceeded 1 million coins, the date is extremely difficult to locate, especially in Mint State grades, and it is virtually impossible to find in MS65 or finer grades. Only two finer examples of the date are known, and few are even as nice as this piece.

The specimen in the Dale Friend Collection is a stunning Premium Gem with brilliant silver surfaces and faint ivory toning. The strike is bold and complete in every facet of the design. This piece is just one example of what can be accomplished with a desire to own exceptional coins and the patience to wait for just the right piece. Minute doubling is evident on several of the legend and denomination letters, and on other parts of the design, probably machine doubling as opposed to a doubled die. Population: 7 in 66, 2 finer (10/08).
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6468)

## Captivating 1895 Barber Half, MS65

2931 **1895 MS65 PCGS.** Like most of the P-Mint Barber half dollars of the gay-90's, the 1895 has a mintage of less than 2 million coins, and Gem survivors are infrequently encountered. In all of our auctions since 1993, we have handled just one finer PCGS example of the date. At or about the time they were issued, collectors preferred proof coins, and didn't bother with the business strikes. As a result, high-grade business strikes are few and far between. This is true in general for all Philadelphia Mint Barber halves.

For his collection, Dale Friend chose this amazing, fully original Gem, with exceptional design definition. Every individual element of the design motifs is full and crisply detailed. The surfaces are exceptionally lustrous and frosty, beneath outstanding steel-blue, violet, and rose toning, with some lighter ivory on the obverse. Population: 16 in 65, 6 finer (10/08).
*Ex: Heritage (9/2003), lot 7129.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6471)

## Satiny 1895-S Barber Half, MS65

2932 **1895-S MS65 PCGS.** The typical 1895-S Barber half dollar is sharply struck and highly lustrous, usually with satiny or prooflike surfaces, although they are quite rare above MS64. In the Thaine Price catalog, David Akers wrote: "In Gem condition, the 1895-S Barber Half Dollar is one of the rarest issues in the series, certainly in the upper third of the 74 total issues."

A wonderful coin, the Dale Friend specimen is boldly detailed on both sides, with only a few scattered abrasions that prevent an even higher grade. The surfaces are highly lustrous, brilliant, and satiny, with slightly reflective fields. The obverse and reverse each have outstanding ivory patina, accented with hints of pale gold toning. Among others, the reverse has a faint die crack from the center arrow feather through the lower curve of the mintmark. Population: 9 in 65, 3 finer (10/08).

*Ex: U.S. Coins (Houston, Texas).*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6473)

2933 **1896-S AU55 PCGS.** A nice Choice AU example of this key-date Barber half, with lots of luster remaining and powder-gray patina on both sides, with accents of pink and blue. Certified in an old-style small PCGS holder.(#6476)

## Incredible 1897 Barber Half Dollar, MS65

2934 **1897 MS65 PCGS.** Ex: Duckor. The amazing Gem from the Dr. Duckor Collection is a delightful representative of a date that is often considered common, yet much scarcer than many of the later P-Mint issues, especially in Gem condition. Many years ago, the *Coin Dealer Newsletter* listed the key-date Barber coins with individual prices, and then grouped all the remaining coins into a single "common date" listing, typically starting with 1897 as the first of the so-called common dates. For that reason, dealers and collectors became used to calling such coins common, even though in many cases they were not so common. In July 1991, that publication's "Monthly Summary" was renamed "Monthly Supplement" and listings were expanded to include every issue. While current population data helps dispel the common date myth of certain issues, old habits remain, especially among the more experienced collectors.

An amazing strike and frosty mint luster are the attributes that first garner attention on this gorgeous coin from the Dale Friend Collection. Both sides have an impeccable strike with virtually full detail in every aspect of the design motifs. Faint die cracks and minor clash marks add to its overall desirability. Population: 17 in 65, 23 finer (10/08).

*Ex: Dr. Steven Duckor.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6477)

## Elusive Choice 1897-S Half

2935 **1897-S MS64 PCGS. CAC.** Pearl-gray with tan freckles and coruscating silver luster. A boldly struck and attractive near-Gem with impressive eye appeal. A better date coin that is likely headed to an outstanding date collection of Barber halves. Population: 15 in 64, 14 finer (12/08).(#6479)

## Amazing Gem 1899 Barber Half Dollar

2936 **1899 MS65 PCGS.** More than 5 million Barber half dollars were coined at Philadelphia in 1899, the highest mintage of any issue in the 74 coin set, and survivors are typically well detailed with excellent frosty luster. Despite the high mintage, Gems are elusive as the population data indicates.

The Dale Friend Collection boasts a wonderful Gem with bold central and peripheral detail on both sides. The surfaces are frosty and fully brilliant, with ivory luster, faint gold toning, and wispy blue accents. Population: 15 in 65, 8 finer (10/08).

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6483)

## Exquisite 1901 Barber Half, MS66

2937 **1901 MS66 PCGS.** A new obverse hub was introduced in 1901 and it is easily identified by the modifications within Liberty's ear. Breen suggested the possible existence of 1901 half dollars from the old hub, or 1900 half dollars from the new hub. Another of the so-called "common dates," the 1901 half dollar is elusive in Gem or finer preservation.

For his collection, Dale Friend chose this gorgeous Premium Gem that exhibits impressive design definition on the obverse and reverse motifs. Both sides have wonderful ivory luster that gradually changes to rose, violet, blue, and green closer to the border. The surfaces are smooth and mark-free, nearly perfect in their preservation.

In 1998, the Dr. Thaine Price specimen realized $6,050 in David Akers' auction of the Price Collection, and that price remains the highest price ever realized for a business strike 1901 Barber half dollar. We expect the present piece to set a new auction record for the issue. Population: 5 in 66, 1 finer (10/08).

*Ex: Pinnacle Rarities.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6489)

## Brilliant 1902 Half Dollar, MS65

2938 **1902 MS65 PCGS.** A common date, the 1902 is usually well struck and fully lustrous, but like many of the high mintage Philadelphia Mint issues from the early 20th century, Gem quality specimens are elusive, despite high mintages. With a total production of 4.9 million coins, the 1902 has the third highest mintage of any Barber half dollar. NGC and PCGS have combined to certify just 31 examples in MS65 or finer grades, an extremely low population for the substantial mintage.

An amazing Gem, the Friend Collection specimen is entirely brilliant with frosty silver luster. It has exceptional design definition on both sides. Only a faint trace of champagne toning adheres to Liberty's cheek and neck. Population: 13 in 65, 4 finer (10/08).
*Ex: Harry Laibstain Rare Coins.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6492)

## Conditionally Rare Gem 1902-O Half

2939 **1902-O MS65 PCGS.** Sharply defined on the obverse, the reverse shows just a bit of softness in the usual areas. The right obverse field has noticeable die polishing marks, which give the coin additional brightness through the golden toning seen on each side. Population: 3 in 65, 3 finer (12/08).(#6493)

## Pleasing 1903-S Gem Half Dollar

2940 **1903-S MS65 NGC.** This is a brilliant Mint State example of this elusive issue. Walter Breen stated that "part of the demand for this date has been influenced by the fame of the dollar, quarter, and dime." The rest of the demand for this date has been influenced by its low survival rate in high grades. Only 12 Gem examples have been certified by the major grading services, five by PCGS and seven by NGC. This example is sharply struck with brilliant and satiny silver luster, graced by faint champagne and powder-blue toning. Diagonal roller marks are noted over the reverse.(#6497)

## Elusive 1904 Barber Half, MS65

2941 **1904 MS65 PCGS.** Surprisingly rare in Gem quality for an issue with a mintage approaching 3 million coins, the 1904 is normally found with sharp design details and satiny luster. David Lawrence comments: "Pick this coin off in MS if you can. Most dealers will sell it as a common date."

Dale Friend selected this incredible Gem for his collection, exhibiting bold design details and exceptional satin luster beneath light gold toning that is slightly deeper on Liberty's cheek. It is a wonderful representative with few peers. Population: 7 in 65, 5 finer (10/08).
*Ex: U.S. Coins (Houston, Texas).*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6498)

## Lovely Toned 1905 Half, MS65

2942 **1905 MS65 PCGS.** The 1905 Barber half seems to contradict most other Philadelphia Mint issues, with a low mintage of just 662,000 coins, but a higher availability, yet it is every bit as difficult to find in Gem condition as any other issue in the P-Mint lineup. In the Dr. Thaine Price catalog, David Akers wrote that the 1905 is "not as rare as the 1903 and 1904, but its very low mintage has gained it a greater measure of fame."

The Friend Collection has one of the most beautiful Gem 1905 half dollars imaginable, with nearly mark-free surfaces and frosty luster beneath gorgeous gold, tan, and pale blue toning intermingled across the obverse and reverse. The design definition is above average, with slight central weakness, especially on a few of the leaves on the obverse, and eagle's feathers on the reverse. Population: 11 in 65, 7 finer (10/08).
*Ex: Delaware Valley Rare Coins.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6501)

## Appealing 1905 Half Dollar, MS66

2943 **1905 MS66 PCGS.** Freckles of light gray race over the highly lustrous surfaces of this Premium Gem Barber half. A well executed strike leaves uniformly crisp delineation on the design features. A nicely preserved coin with great technical quality and aesthetic appeal. Population: 6 in 66, 2 finer (12/08).(#6501)

2944 **1905-S MS63 PCGS.** This boldly detailed specimen has brilliant and frosty silver surfaces with tiny specks of dark toning on the obverse. Population: 10 in 63, 29 finer (11/08).(#6503)

## Difficult 1906 Barber Half, MS65

2945 **1906 MS65 PCGS.** Philadelphia coined 2.6 million Barber half dollars in 1906, and in this case the mintage actually provides an indication of availability today. Despite availability, the patience required to acquire Gem business strikes of the Philadelphia issues is generally known only to specialists. Decades ago, collectors chose the far easier route of collecting proofs for these issues, explaining the rarity of business strikes today. Both sides of Dale Friend's sharply struck 1906 half exhibit frosty silver luster beneath moderate toning. The obverse is predominately golden-brown, while the reverse is orange-gold and champagne. Population: 21 in 65, 5 finer (10/08).
*Ex: Superior Galleries.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6504)

## Desirable 1906-D Barber Half Dollar, MS65

2946 **1906-D MS65 PCGS.** Ex: Price/Duckor/Friend. Half dollars were one of several different denominations that were coined in the opening year of operations at the Denver Mint. The facility also produced dimes, quarters, half eagles, eagles, and double eagles during the year. This bold Gem has satiny luster that shines through delicate gold and heather toning, with deeper blue-green and gold at the borders.

Dale Friend's 1906-D half dollar was previously part of the Dr. Thaine Price Collection, and also part of the Dr. Steven Duckor Collection. That pedigree means that it has been chosen by three of the top Barber half dollar collectors of all time. Who will be next to add their name to the pedigree? Will it be you? Population: 15 in 65, 8 finer (10/08).
*Ex: Dr. Thaine B. Price Collection (David Akers, 5/1998), lot 167; Dr. Steven Duckor Collection.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6505)

## Sensational 1907 Barber Half Dollar, MS66

2947 **1907 MS66 PCGS.** For such a common, high-mintage issue, the 1907 Barber half has an extremely low population in Premium or Superb Gem quality. The mintage of nearly 2.6 million coins ranks 59th of 74 issues, but its PCGS MS66 or finer population ranks 24th. The Friend Collection boasts this splendid Premium Gem with frosty ivory luster, enhanced by lilac and rose at the upper left obverse, and with additional iridescent splashes. The reverse is a trifle weak at the junction of the right (facing) wing and the shield, a point of weakness on many different issues, perhaps because it is exactly opposite the highest point of Liberty's cheek. Population: 3 in 66, 1 finer (10/08).
*Ex: U.S. Coins, Inc.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6508)

## Beautiful 1907-O Half Dollar, MS66

2948 **1907-O MS66 PCGS.** Nearly 4 million Barber half dollars were coined in New Orleans during the course of 1907, and more than 5 million were struck there in the following year. There was no other year in the history of the Barber series from 1892 to 1909 that the New Orleans Mint struck as many as 3 million half dollars. Despite the high mintage, few Gem or finer examples survive. PCGS has graded 13 MS65 coins, six MS66 pieces, and just one finer MS67 example.

Dale Friend chose this amazing MS66 for his collection, and it should certainly fit the need of nearly every other Barber collector. Both sides have frosty silver luster hidden beneath wonderful light green toning with accents of gold and pale lilac. It is exceptionally well defined for any Barber half dollar. Population: 6 in 66, 1 finer (10/08).
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6510)

## Scarce Gem 1908 Barber Half Dollar

2949 **1908 MS65 PCGS.** At all the mints combined, 1906, 1907, and 1908 were the highest production years for Barber half dollars. Of course, those are also the only three years that Barber halves were coined at four different mints, rather than three for most remaining years. However, in 1908, production at Philadelphia actually slackened, with only 1,354,000 half dollars minted. With just 22 Gem or finer submissions certified by PCGS, finding a suitable example is hardly a piece of cake.

The obverse of the Dale Friend Gem is essentially brilliant with bold design details, light ivory in the fields, and gold and subtle blue on the devices. The reverse, also sharply defined, has wispy gold and lilac-gray toning. The Friend specimen will improve three of the next five PCGS Registry sets. PCGS Population: 13 in 65, 9 finer (10/08).
*Ex: Larry Shepherd.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6512)

## Attractive Gem 1908 Half

2950 **1908 MS65 PCGS.** A seldom-offered Gem example, well-defined with a subtle hint of olive-gold peripheral color over satiny surfaces. Only a few wispy facial disturbances rule out an even higher grade. This little-saved Philadelphia issue is a condition rarity in MS65 and better. Population: 13 in 65, 9 finer (11/08).(#6512)

## Fully Brilliant 1908-D Half, MS66

2951 **1908-D MS66 PCGS.** More than 200 1908-D Barber halves are PCGS certified in Mint State grades, making it one of the most available issues, but only 10 Premium Gems have been certified, with just four finer Superb Gems. Dale Friend's Premium Gem is far finer than the Pryor coin, about equal to the Eliasberg and Norweb-Price coins, and only a little lower quality than the Hugon MS68 example.

The Dale Friend coin is a delightful example with fully brilliant silver surfaces and a full quota of satiny mint luster. A couple tiny ticks on the cheek and neck are about the only marks on otherwise pristine surfaces. Population: 10 in 66, 4 finer (10/08).
*Ex: U.S. Coins, Inc.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6513)

## Splendid 1908-O Half, MS65

2952 **1908-O MS65 PCGS.** With a mintage of 5.36 million coins, this issue has nearly double the mintage of the 1907-O, the second highest New Orleans production in the Barber half dollar series. In fact, only the 1899, with a mintage of 5.5 million coins, has a higher mintage among all 74 Barber issues. The high mintage leads collectors to believe that Gem examples are easily obtained. In fact, there is no Barber half dollar issue that is easily obtained in Gem or finer grades.

Dale Friend chose this lovely Gem to represent the 08-O in his collection because of its remarkable aesthetic appeal. Both sides have frosty luster with champagne toning and a frame of gold, blue, and lilac. Slight weakness is evident as usual just right of the shield. Population: 29 in 65, 28 finer (10/08).
*Ex: Larry Whitlow.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6514)

## Striking Gem 1908-S Half

2953 **1908-S MS65 PCGS.** The obverse is minimally toned save for a degree of gold and violet peripheral toning, while the reverse shows ample orange central patina with a shift to lavender close to the rims. Striking quality and luster are uniformly high, as is the eye appeal. Population: 8 in 65, 5 finer (11/08).(#6515)

## Stunning 1909 Half Dollar, MS66 Tied for Finest PCGS Certified

2954 **1909 MS66 PCGS.** Although PCGS has certified more than 300 Mint State 1909 half dollars, only 10 are certified MS66, and none have ever been graded finer. NGC has also never certified a finer example. While the Eliasberg Collection had a proof, Dale Friend's Premium Gem is finer than the Price and Pryor coins, and every bit the equivalent of the Hugon example.

This amazing piece has brilliant silver surfaces with reflective fields around satiny devices. Both sides have lovely gold, russet, and iridescent peripheries. It is boldly struck with full design details on both sides. Population: 10 in 66, 0 finer (10/08).
*Ex: Heritage.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6516)

## Magnificent MS65 1909-O Half Dollar

2955 **1909-O MS65 PCGS.** The final New Orleans Mint issue, before that facility permanently shut off its coin presses. The three Barber denominations were coined there in 1909, as were Indian half eagles, the only issue of that design struck in New Orleans.

The central obverse device exhibits a trace of champagne toning, surrounded by pale lilac in the fields. The reverse is mostly brilliant with frosty silver surfaces and traces of similar pale lilac, more intense at the lower right. Slightly weak right of the shield but otherwise boldly detailed. Population: 6 in 65, 3 finer (10/08).
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6517)

## Conditionally Rare Gem 1909-O Barber Half

2956 **1909-O MS65 NGC.** Produced in limited numbers (925,400 pieces) and well known as a condition rarity, the 1909-O is also desirable due to its status as the final half dollar produced in the New Orleans Mint. This is a solidly graded Gem with shimmering mint luster and a bold, essentially sharp strike that is anything but common for an O-mint product in this series. A little bit of swelling is seen on Liberty's neck, as is often noted on examples of this issue. A brilliant snow-white appearance adorns the obverse and reverse, neither of which reveals any singularly bothersome abrasions. Census: 19 in 65, 2 finer (11/08).(#6517)

## Delightful Gem 1909-O Half

2957 **1909-O MS65 PCGS.** Since the New Orleans Mint closed in 1909, it is unsurprising that the 1909-O has a much lower mintage than the 1906 through 1908 O-mint issues. This lustrous and evenly struck Gem has a smooth cheek and an immaculate reverse. Lovely golden-brown, apple-green, and ice-blue toning further contributes to the eye appeal. Housed in an old green label holder. Population: 6 in 65, 3 finer (12/08).(#6517)

## Desirable Gem 1909-S Half

2958 **1909-S MS65 PCGS.** A minimally toned, impressively lustrous representative of this little-saved S-mint Barber half issue. Well struck overall with slight softness noted at the eagle's right (facing) claw. Only a wispy flaw on the cheek keeps this Gem from an even finer designation. In a green label holder. Population: 12 in 65, 10 finer (11/08).(#6518)

## Attractive 1911 Half Dollar, MS65

2959 **1911 MS65 PCGS.** The Dale Friend 1911 Barber half is a delightful Gem with frosty silver luster beneath ivory toning with peripheral iridescence. It is boldly defined and possesses only a few trivial surface marks that keep it from a higher grade. It is similar to the Pryor and Price coins, and only a step below the Hugon specimen. Population: 41 in 65, 9 finer (10/08).
*Ex: Heritage Galleries.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6521)

## Appealing 1912 Half, MS65

2960 **1912 MS65 PCGS.** This 1912 Barber half is a lovely Gem from the Dale Friend Collection. It has radiant and frosty silver luster with highly appealing gold and iridescent toning on both sides. Although a common date, the 1912 is conditionally rare, with only two finer examples certified by PCGS. Population: 18 in 65, 2 finer (10/08).
*Ex: Dennis Nagy.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6524)

## Outstanding 1912-D Half Dollar

2961 **1912-D MS66 PCGS.** While it may surprise some that PCGS has certified 15 Premium Gem MS66 examples of this issue, even more surprising is the realization that they have yet to certify a finer quality piece. The obverse of Dale Friend's Premium Gem is boldly defined, while the reverse has weakness right of the shield, and at the arrow feathers and tail feathers. Both sides have light silver-gray luster with fully brilliant mint frost. The surfaces are accented through pale champagne toning and peripheral iridescence. Population: 15 in 66, 0 finer (10/08).
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6525)

## Worthy MS64 1912-S Half

2962 **1912-S MS64 PCGS.** Honey-gold and pearl-gray enrich this shimmering and intricately struck Choice Barber half. A few faint obverse luster grazes are all that prevent classification as a full Gem. Significantly scarcer than the 1916-S in Mint State. Population: 62 in 64, 26 finer (12/08).(#6526)

## Brilliant and Bold 1912-S Half, MS66 Tied for Finest PCGS Certified

2963 **1912-S MS66 PCGS.** Here is another entry in the lineup of conditionally rare Barber half dollars that are easy to locate in circulated grades, and only moderately scarce in lower Mint State grades through MS64. However, Gem examples are difficult to locate, and Premium Gems like Dale Friend's coin are true rarities. A brilliant silver Premium Gem, this piece exhibits traces of subtle champagne toning over satiny surfaces. Minor blemishes on the cheek and chin are probably all that have kept this from a Superb Gem MS67 rating. It is sharply defined on both sides. Population: 7 in 66, 0 finer (10/08).
*Ex: U.S. Coins, Inc.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6526)

## Key 1913 Barber Half Dollar, MS65

2964 **1913 MS65 PCGS.** Like the 1910, 1914, and 1915 half dollars, the 1913 is a key-date in the Barber series, from a low mintage of only 188,000 coins. Although a single point below the Hugon coin, Dale Friend's 1913 half dollar is equal to the Price coin and finer than the Pryor coin. Eliasberg had a proof.

The Gem Dale Friend coin is brilliant and lustrous with frosty silver surfaces and only a trace of pale gold toning on each side. It is a bold strike with weakness right of the shield and at the arrow feathers, usual locations of weakness on nearly every Barber half dollar. Population: 16 in 65, 6 finer (10/08).
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6527)

## The Eliasberg 1913-D Half Dollar, MS66

2965 **1913-D MS66 PCGS.** Ex: Eliasberg. From the Louis E. Eliasberg, Sr. Collection, and called "possibly the very finest known" in that offering. Although it is a relatively plentiful date, all 1913 half dollars are elusive, regardless of its Mint. Only a little over 1 million half dollars were coined at all three mints combined. Only 534,000 pieces were coined in Denver during the year.

The Eliasberg-Dale Friend specimen is boldly defined, with strong, almost complete detail right of the shield, and elsewhere. The surfaces are bright with silver luster and a full quota of mint frost. In the Eliasberg catalog, Dave Bowers wrote: "The connoisseur seeking to combine high numerical grade with excellent aesthetic quality may have to wait years for a coin of close comparable quality to appear." Population: 3 in 66, 0 finer (10/08).
*Ex: Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 2130.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6528)

## Splendid 1913-S Barber Half, MS65

2966 **1913-S MS65 PCGS.** A scarce issue with a mintage of 604,000, actually the highest mintage of any 1913 issue, behind the Denver production. The Dale Friend example is a highly appealing Gem with pleasing gold toning on the obverse and greenish patina on the reverse. It is sharply defined, as are most of the Friend coins, with exceptional detail on all the intricate design elements. Population: 14 in 65, 4 finer (10/08).
*Ex: U.S. Coins, Inc.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6529)

## Challenging Gem 1913-S Half

2967 **1913-S MS65 PCGS.** The pearl-gray centers are framed with delicate tawny-gold. This carefully preserved representative has remarkably smooth fields, and the strike is above-average, since the right shield corner and fletchings have only moderate softness. A scarcer date with a mintage of 604,000 pieces. Population: 14 in 65, 4 finer (11/08).(#6529)

## Marvelous 1914-S Barber Half, MS65

2968 **1914-S MS65 PCGS.** Here is another extremely important condition rarity among the later Barber half dollars, easy to obtain in all grades through Choice Mint State, but virtually impossible to obtain in Gem grades. The opportunity to acquire any of Dale Friend's coins, from 1892 to 1915, coins of incredible quality, should be viewed as one of the most important numismatic events of the present generation.

While slightly weak right of the shield as usual, this is an amazing example with otherwise bold design definition, satiny luster, and medium gold toning on the obverse, lighter green on the reverse. Population: 12 in 65, 4 finer (10/08).
*Ex: Dennis Nagy.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6531)

## The Final Key Barber, 1915, MS65

2969 **1915 MS65 PCGS.** Only 138,000 Barber half dollars were coined in Philadelphia during the year, and survivors are scarce or rare in all grades, especially Gem or finer. Dale Friend's coin is equal to both the Hugon and Price coins, and finer than the Pryor specimen. Louis Eliasberg had a proof.

The fields are fully lustrous with satiny surfaces and light silver luster around frosty devices. It is almost prooflike in appearance and presents excellent contrast. Population: 17 in 65, 1 finer (10/08).
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6532)

## Rainbow 1915-D Half, MS66

2970 **1915-D MS66 PCGS.** Dale Friend's 1915-D half dollar is tied for the finest that PCGS has certified, while NGC has grade one numerically superior example. This Premium Gem has sensational multi-colored toning on both sides, with frosty underlying luster. The central motifs stand out due to their lighter silver appearance. Pristine surfaces and bold design elements are the additional features of this splendid specimen. Population: 13 in 66, 0 finer (10/08).
*Ex: U.S. Coins, Inc.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6533)

## Attractive 1915-S Gem Half Dollar

2971 **1915-S MS65 PCGS.** Soft bluish-gray patina resides on the obverse of this S-mint Gem, underlain with light gold, while the reverse assumes a champagne-gold appearance. The design elements are generally sharply struck, though the upper right corner of the shield and adjacent wing feathers reveal the usual softness. A few grade-consistent marks do not detract. Population: 36 in 65, 8 finer (12/08).(#6534)

### Satiny 1915-S Half Dollar, MS66

2972 **1915-S MS66 PCGS.** An amazing finish to the offering of Dale Friend's Barber half dollar collection. Mr. Friend invested more than mere money when he formed this collection. He invested countless hours pursuing these coins, studying them, and enjoying them. He hopes that each of you who have acquired examples from his collection will enjoy and appreciate them as much as he has.

This incredible Premium Gem has brilliant silver luster with excellent design features, reflective, nearly prooflike fields, and subtle champagne and heather toning only visible upon close inspection. It approaches the finest examples certified. Population: 6 in 66, 2 finer (10/08).

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.*(#6534)

## PROOF BARBER HALF DOLLARS

### Sharp 1892 Fifty Cent
### PR64 Deep Cameo

2973 **1892 PR64 Deep Cameo PCGS.** The satiny devices of this near-Gem proof half appear to ride over the deep watery fields. Generally well struck, except for the usual softness in the upper right corner of the shield and adjacent wing feathers. Whispers of reddish-gold and purple toning make occasional visits to each side. Population: 2 in 64 Deep Cameo, 8 finer (12/08).(#96539)

### Attractive 1895 Barber Half Dollar, PR65

2974 **1895 PR65 PCGS.** With a fairly high proof mintage of 880 pieces, the 1895 Barber half dollar is extremely popular with type collectors. This piece shows an attractive golden patina over brightly reflective fields, complemented by sharply delineated design elements. Population: 30 in 65, 29 finer (12/08).(#6542)

### Crisp 1895 Half Dollar, PR66 Cameo

2975 **1895 PR66 Cameo NGC.** Sharply struck with beautiful light-gold toning across some of the highpoints, and lovely, watery depths of reflectivity in the fields. The devices are frosted and the resulting cameo contrast is noteworthy. There is no indication of contact or improper handling on either side of this visually alluring Premium Gem. The 1895 proof Barber half had a typically small mintage of 880 pieces, and few of those coins remain in such exemplary condition. Census: 18 in 66 Cameo, 19 finer (12/08).(#86542)

### High-End 1896 Barber Half
### PR66 Cameo

2976 **1896 PR66 Cameo NGC.** This sharply struck Premium Gem is close to brilliant, although the portrait edges show hints of tan patina. Both major devices are suitably frosted, and, as expected for the PR66 grade level, the highly reflective fields are smooth and essentially void of hairlines. Census: 12 in 66 Cameo, 12 finer (12/08).(#86543)

### Wonderful 1897 Fifty Cent
### PR64 Deep Cameo

2977 **1897 PR64 Deep Cameo PCGS.** Although some faint hairlines in the obverse fields just barely prevent a higher grade, this is a wonderful example with impressive contrast between the fields and devices on each side. Both sides are sharply struck, and there is no evidence of toning. Population: 2 in 64 Deep Cameo, 24 finer (12/08).(#96544)

## Remarkably Colorful PR67 1898 Half

2978 **1898 PR67 PCGS.** Diverse cherry-red, powder-blue, sun-gold, and plum-mauve toning alternates across this sharply struck and attractive Superb Gem. The originality and nearly perfect technical quality are undeniable. Housed in a green label holder. Population: 14 in 67, 0 finer (5/08).
*Ex: Franklin Sale (Kingswood, 10/2001), lot 310, where it realized $7,590.*(#6545)

## Sharply Struck 1898 Half Dollar, PR65 Cameo

2979 **1898 PR65 Cameo NGC.** Deeply mirrored fields establish strong contrast with frosty motifs on this lovely Gem proof half dollar. A well executed strike delivers crisp, uniform definition to the design elements, and untoned surfaces are devoid of significant marks. Census: 10 in 65 Cameo, 34 finer (12/08).(#86545)

## Gleaming PR66 Cameo 1900 Half

2980 **1900 PR66 Cameo NGC.** A gorgeous and essentially brilliant Premium Gem. The thickly frosted devices and darkly mirrored fields appear to merit an Ultra Cameo designation, although NGC has conservatively assessed the piece merely as Cameo. A razor-sharp specimen with exceptional eye appeal. Census: 20 in 66 Cameo, 13 finer (12/08).(#86547)

## Untoned 1900 Half Dollar, PR67 Cameo

2981 **1900 PR67 Cameo NGC.** This piece should be of great interest to type collectors as it has so many positive attributes: full, medal-like striking details, brilliant throughout, deeply mirrored fields, generous amounts of mint frost on the devices, pronounced contrast on each side, and the always-popular 1900 date for type purposes. Very scarce also with cameo contrast as well. Census: 11 in 67 Cameo, 2 finer (11/08).(#86547)

2982 **1903 PR63 PCGS.** Silver-gray centers cede to rich, dappled lemon-gold, blue, violet, and mauve in the fields. Faintly hairlined with minor contact, yet eminently pleasing.(#6550)

## Magnificent 1907 Barber Half Dollar PR65 Cameo

2983 **1907 PR65 Cameo PCGS.** Both sides are virtually untoned, adding drama to the cameo contrast that separates the devices from the reflective fields. A few faint hairline scratches are noted on the obverse, including a parch of light hairlines in the right obverse field, but the overall look is every bit Gem, and a Cameo Gem to boot. Population: 5 in 65 Cameo, 5 finer (12/08).(#86554)

## Brilliant 1910 Barber Half, PR67 Cameo

2984 **1910 PR67 Cameo NGC.** One of the scarcer proofs in the series, especially in high grade. A mere 551 pieces were struck and very few are known today with any cameo effect. This is a magnificent proof that has deeply mirrored fields and frosted devices that create noticeable contrast. Brilliant throughout with essentially pristine surfaces. Census: 13 in 67 Cameo, 1 finer (12/08).(#86557)

*End of Session Four*

## EARLY DOLLARS

### Rare VF B-12, BB-26
### 1795 Flowing Hair Dollar
### Three Leaves, Ex: Luebke Collection

4242 **1795 Flowing Hair, Three Leaves VF20 NGC.** B-12, BB-26, High R.5. Lowest curl sharply pointed to right; paired berries below first T of STATES. Die State I with perfect obverse die, and rarer than the later die states. Reiver State a. Medium grayish-gold surfaces with considerable gunmetal-blue color around the devices, primarily on the reverse. A few slight adjustment marks are seen inside the left branch on the reverse. Both sides have slight imperfections, and evidence remains of light cleaning long ago. Most specialists agree that less than 40 examples of this die marriage are known today, and they appear at auction infrequently. Apparently unknown in Mint State, the finest known examples grade in the XF range. The Jules Reiver Collection included two examples representing the early and late die states, both similar to this piece, or marginally finer.
*Ex: Stack's (1/2002); William Luebke Collection of Early Dollars (Heritage, 1/2007), lot 4954.*(#6852)

### VF Details 1795 Flowing Hair Dollar
### Three Leaves, B-5, BB-27

4243 **1795 Flowing Hair, Three Leaves—Obverse Scratched—NCS. VF Details.** B-5, BB-27, R.1. Bowers-Borckardt Die State II. The portrait has bright hair-thin slide marks, and two brief pinscratches are in the vicinity of stars 2 and 8. The reverse has a minor pinscratch above the left wreath stem. A few dull gray spots are present near the eagle. Otherwise, this olive-green and almond-gold example will agreeably help fill a challenging slot within an early silver type set.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#6852)

4244 **1795 Flowing Hair, Three Leaves—Altered Surfaces—ANACS. VF20 Details.** B-5, BB-27, R.1. The surfaces appear to have been lightly whizzed and retoned an even, dark gray color, possibly to cover a few scrapes visible on the lower hair curls and the profile of Liberty, with a few others on the lower eagle's feathers. A pleasing level of deep detail remains, however, on this most common Flowing Hair variety.(#6852)

4245 **1795 Flowing Hair, Three Leaves—Repaired, Whizzed—NCS. VF Details.** B-5, BB-27, R.1. Bowers-Borckardt Die State II. Plugged near star 14, which is re-engraved. A granular slate-gray example of this briefly coined and widely coveted design type.(#6852)

### Popular 1795 Flowing Hair Dollar
### VF25, Three Leaves, B-5, BB-27

4246 **1795 Flowing Hair, Three Leaves VF25 PCGS.** B-5, BB-27, R.1. Bowers-Borckardt Die State II. Tan-brown devices contrast with dark gray fields. Surprisingly free from abrasions, given its stint in early American commerce. The eagle's left (facing) wing retains most of its initial definition. In effect a single-year type, since the rare 1794 exceeds all but the most generous budgets.(#6852)

## Desirable 1795 Flowing Hair Dollar, B-6, BB-25, VF30 Details

4247 **1795 Flowing Hair, Three Leaves—Scratched, Cleaned—ANACS. VF30 Details.** B-6, BB-25, R.3. This nicely detailed ivory-gray type coin may have had an encounter with baking soda, and a cluster of unimportant, faint, hair-thin marks crosses the field beneath the chin. The portrait also has a few minor hairlines. (#6852)

4248 **1795 Flowing Hair, Two Leaves Fine 15 PCGS.** B-1, BB-21, R.2. This light gray dollar is housed in a green label PCGS holder. The surfaces exhibit faint champagne patina with splashes of darker toning. This plentiful variety is popular with collectors for its blundered obverse with the 7 punched over a previous 1.(#6853)

## Problem-Free 1795 Flowing Hair Dollar VF30, B-1, BB-21

4249 **1795 Flowing Hair, Two Leaves VF30 ANACS.** B-1, BB-21, R.2. A lovely Flowing Hair dollar that is well detailed, shows attractive multicolored patina, and seems mostly free of adjustment marks; except for a couple in the upper left obverse field that connect stars 6 and 7 to Liberty's hair tresses. This problem-free piece would make an ideal type coin.(#6853)

## Difficult B-3, BB-11 VF30 1795 Flowing Hair Dollar Two Leaves, Ex: Warren Miller

4250 **1795 Flowing Hair, Two Leaves VF30 NGC.** Ex: Miller. B-3, BB-11, R.5. The only die marriage with 16 berries on the reverse, evenly distributed with eight berries on each side of the wreath. Believed to be the first 1795 die marriage struck. B-3 is rare. The usually seen Two Leaves varieties are B-1, B-2, and B-4. This example has dappled golden-brown and cream-gray toning. The obverse border has a few trivial adjustment marks, as issued, but examination beneath a loupe fails to locate any distractions. The curls near the neck are richly detailed, as are the eagle's tail feathers. Dr. Warren Miller's collection of early silver dollars was certified by NGC in 2002, and included virtually every known die variety. (#6853)

## Pleasing 1795 B-1, BB-21 Dollar, XF45 Details

4251 **1795 Flowing Hair, Two Leaves—Tooled, Cleaned—ANACS. XF45 Details.** B-1, BB-21, R.2. The portrait and right obverse field display numerous wispy pinscratches. These are made less evident by a rich coating of golden-brown and sky-blue patina. Luster emerges from the legends and devices, and the piece is inoffensive to the unaided eye.(#6853)

## Choice VF Centered Bust
## 1795 Draped Bust Dollar, B-15, BB-52

4252 **1795 Draped Bust, Centered VF35 PCGS.** B-15, BB-52, R.2. Bowers-Borckardt Die State V. Stone-gray overall with a blush of steel-blue on the ground beneath the eagle. Luster shimmers within the lower hair curls and on the centers of the wings. The reverse has a couple of unimportant rim nicks, and a few adjustment marks of mint origin pass through the hair and the rim near the bust tip. (#6858)

4253 **1795 Draped Bust, Off Center—Obverse Rim Damage, Improperly Cleaned—NCS. VF Details.** B-14, BB-51, R.2. The right obverse field was smoothed, and the piece was then whizzed and artificially toned a dark green-gray. The obverse rim thins near 1:30, but shows no readily observed damage.(#96858)

## XF45 Sharpness B-14, BB-51
## 1795 Draped Uncentered Bust Dollar

4254 **1795 Draped Bust, Off Center—Damaged, Cleaned—ANACS. XF45 Details.** B-14, BB-51, R.2. The obverse is hairlined, both sides are somewhat glossy, and the bright sun-gold toning is probably unnatural. However, no damage is readily evident, and the major devices are exquisitely detailed.(#96858)

## Scarce Choice VF 1796 Dollar
## Small Date, Large Letters, B-4, BB-61

4255 **1796 Small Date, Large Letters VF35 NGC.** B-4, BB-61, R.3. Bowers-Borckardt Die State I. Lavender and stone-gray alternative across this mid-grade dollar. Some inner wing and hair detail remains despite 25 points of wear. Refreshingly unabraded save for a thin marks near the C in AMERICA and a small nick on the reverse rim at 3 o'clock.(#6860)

## Important 1796 B-4, BB-61 Dollar, XF40

4256 **1796 Small Date, Large Letters XF40 ANACS.** B-4, BB-61, R.3. The B-4 variety is quickly recognized by the die chip over the 1 in the date and the Large Letters reverse. Light gold toning is evident on both sides of this pleasing, nicely detailed early dollar. The strike is nicely centered with full obverse and reverse borders. (#6860)

4257 **1796 Large Date, Small Letters—Repaired, Improperly Cleaned—NCS. VF Details.** B-5, BB-65, R.4. The die lump from the I in AMERICA is relatively large, but has yet to reach the letter C. This example was once cleaned, repaired, and retoned. The fields are steel-blue and the devices are pewter-gray. Both sides have extensive tooling marks in the fields.(#6861)

## Attractive 1796 Dollar, B-5, BB-65, VF25

4258 **1796 Large Date, Small Letters VF25 PCGS.** B-5, BB-65, R.4. Bowers-Borckardt Die State IV with a large die break joining the IC in AMERICA. This Small Eagle dollar has deep olive-brown toning and pleasing definition on the eagle's wings and Liberty's hair. The obverse rim has a minor mint-produced flaw at 10:30, and the reverse rim has unimportant dings at 7 and 11 o'clock.(#6861)

## VF Sharpness 1797 Dollar
## 9x7 Stars, Large Letters, B-1, BB-73

4259 **1797 9x7 Stars, Large Letters—Improperly Cleaned—NCS. VF Details.** B-1, BB-73, R.3. Bowers-Borckardt Die State III. This chestnut-tan and slate-gray dollar has been lightly cleaned, and the fields display a few unimportant marks. However, glimpses of mint luster persist, and ample design definition is present.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#6863)

## Popular 1797 B-2, BB-72 Small Letters Dollar, VF30

4260 **1797 9x7 Stars, Small Letters VF30 PCGS.** B-2, BB-72, R.4. The elusive 1797 Small Letters variety was once considered a major rarity in the series, but now it is only a scarce variety. However, it is still highly popular and very much in demand in all grades. This pleasing pewter-gray example has deeper toning on the obverse. (#6866)

## 1798 Small Eagle Dollar VG10
## 13 Stars, B-1, BB-82

4261 **1798 Small Eagle, 13 Stars VG10 PCGS.** B-1, BB-82, R.3. Bowers-Borckardt Die State II. This cream-gray Small Eagle dollar displays chestnut-gold tints when rotated beneath a light. The U in UNITED is weak, but the remainder of the legends are bold. Generally smooth, and a trio of small obverse rim dings merits only passing mention.(#6867)

4262 **1798 Small Eagle, 13 Stars Fine 15 NGC.** B-2, BB-81, R.3. Die State II, as most often encountered. This 1798 Small Eagle dollar possesses much originality and eye appeal with deep violet and gray-gold patina. The original auction flip from 1990 shall accompany the coin to its new home.(#6867)

## XF Details Small Eagle 1798 Dollar
## B-1, BB-82, 13 Reverse Stars

4263 **1798 Small Eagle, 13 Stars—Improperly Cleaned—NCS. XF Details.** B-1, BB-82, R.3. Bowers-Borckardt Die State III. Medium silver-gray with slightly granular surfaces. Sharply detailed, and luster still clings the legends, wreath, and Liberty's hair. B-1 is the only Small Eagle, 13 Stars marriage, and examples are in demand from *Guide Book* variety collectors.(#6867)

## VF30 1798 Small Eagle Bust Dollar
## 15 Stars, B-2, BB-81

4264 **1798 Small Eagle, 15 Stars VF30 NGC.** B-2, BB-81, R.3. Bowers-Borckardt Die State II. Chestnut-brown peripheries encompass the silver-gray fields and devices. Thorough inspection locates faint marks through the beak, the nose, and beneath the chin, but these are suitable for the grade. No adjustment marks are present. (#6868)

4265 **1798 Large Eagle, Pointed 9 VF25 NGC.** B-14, BB-122, R.3. A mid-range piece with luminous silver-gray and slate surfaces. Well struck with scattered light to moderate marks on and near the portrait.(#6873)

4266 **1798 Large Eagle, Pointed 9 VF30 NGC.** B-25, BB-123, R.4. Bowers-Borckardt Die State IV. The obverse die is shattered with extensive cracks around the entire periphery. An attractive light gray piece with wispy blue toning.(#6873)

## Choice VF 1798 Heraldic Eagle Dollar
## Pointed 9, B-15, BB-112

4267 **1798 Large Eagle, Pointed 9 VF35 PCGS.** B-15, BB-112, R.3. Traces of luster linger at the borders and within Liberty's hair, while the central reverse displays wear consistent with the grade. The minutely granular surfaces are toned gunmetal-blue and caramel-gold. A few tiny obverse field marks are of little consequence. (#6873)

## Fascinating XF 1798 Heraldic Eagle Dollar
## Pointed 9, B-15, BB-112

4268 **1798 Large Eagle, Pointed 9 XF40 NGC.** B-15, BB-112, R.3. Bowers Die State II. A fascinating coin that will appeal to the error enthusiasts as much as to the early dollar specialists. Stars 6 and 7, as well as LI in LIBERTY are absent on the obverse, with all but the first and last letters of UNITED on the reverse missing. The missing design details are the result of improper metal flow. The coin was struck on an attenuated planchet, and the resulting anomaly is not to be confused with postmint damage. NGC agreed and certified this piece as XF40, an accurate determination in our opinion. Medium gray toning reveals subtle hues of rose and gold when viewed at various angles. A couple of small rim ticks on the reverse at 12 o'clock are the only problems that are worthy of mention.(#6873)

## XF 1798 Heraldic Eagle Dollar
## Close Date, Pointed 9, B-27, BB-113

4269 **1798 Large Eagle, Pointed 9, Close Date XF40 PCGS.** B-27, BB-113, R.2. The reverse has moderate adjustment marks (as made) near OF and on the eagle's shield and tail. Powder-blue, slate-gray, and pale tan toning embraces the unblemished fields and devices. The first of seven marriages (BB=113 to BB-119) eventually struck by the hardy obverse die.(#6873)

## Extraordinary 1798 B-11, BB-111 Dollar, XF45
## Possibly the Finest Known 1798 B-11

4270 **1798 Large Eagle, Pointed 9 XF45 NGC.** B-11, BB-111, R.3. Bowers-Borckardt Die State III to IV. When RARCOA offered this piece in Auction '86, they described it as: "Bold Extremely Fine to About Uncirculated, with underlying luster and attractive tone. Perfect die state, listed as R-6, though R-5 would probably be more accurate. The only example of similar quality was the Bergen specimen, which was a later die state, so this may possibly be the finest known of the variety." In fact, it is the very first piece listed in the Notable Specimens section of the Bowers-Borckardt reference.

Although not the "perfect die state" that RARCOA claimed, it is one of the earliest die states we have seen. A bulge is evident in the lower right obverse, and a crack extends part way along the bulge, beginning at the border and crossing three points of star 13, ending midway to Liberty's chin. This die marriage is known in a number of different die states, from perfect to extensively cracked. This early intermediate die state will be of considerable interest to specialists.

*From The Deb-Ann Collection. Ex: Auction '86 (Rarcoa, 7/1986), lot 729.*(#6873)

4271 **1798 Large Eagle, Pointed 9—Plugged, Repaired—ANACS. XF45 Details.** B-24, BB-124, R.2. An oval hole near 11:30 has been crudely plugged. Toned deep sea-green and golden-tan. A few moderate marks are noted on the obverse field. Softly struck on the right-side reverse stars, as is characteristic of the Bolender variety. (#6873)

## Distinctive 1798 B-8, BB-125 Dollar, AU Details

4272 **1798 Large Eagle, Pointed 9, 4 Vertical Lines—Improperly Cleaned—NCS. AU Details.** B-8, BB-125, R.2. Only four berries in the branch is the only identification needed to attribute this *Guide Book* variety. This piece has sea-green, violet, and gold toning applied to both surfaces. Despite being cleaned and retoned, it is still an attractive example.(#6873)

## Impressive Choice AU 1798 Large Eagle Dollar
## Four Berries, Pointed 9, B-8, BB-125

4273 **1798 Large Eagle, Pointed 9, Four Berries AU55 NGC.** B-8, BB-125, R.2. The only 1798 marriage with four berries. Cream-gray and slate shades embrace this impressive Choice AU early dollar. Evenly struck save for softness on the hair ribbons and opposite near the wing juncture with the left shield border. Generally minimally abraded despite a few inconspicuous marks near Liberty's shoulder. An important example of this popular variety.(#6873)

## 1798 Heraldic Eagle Dollar VF25
## Knob 9, Five Stripes, B-6, BB-96

4274 **1798 Large Eagle, Knob 9, Five Stripes VF25 NGC.** B-6, BB-96, R.3. Forest-green, stone-gray, and chestnut-brown enrich this attractive early silver type coin. E PLURIBUS UNUM is bold throughout, and substantial wing plumage is present. Light adjustment marks on the reverse are as made and do not distract. (#6874)

## Choice XF 1798 Dollar
## 5 Stripes, Knob 9, B-6, BB-96

4275 **1798 5 Stripes, Knob 9 XF45 PCGS. CAC.** B-6, BB-96, R.3. Bowers-Borckardt Die State V with interesting obverse die cracks. A few faint adjustment marks (as produced) are concealed within Liberty's hair. Steel-blue, tan-brown, and cream-gray embrace this satiny, richly detailed, and untroubled Draped Bust dollar. (#6874)

## Important 1798 B-4, BB-92 Dollar, XF Details

4276 **1798 Knob 9—Improperly Cleaned—NCS. XF Details.** B-4, BB-92, R.5. Highest wave incomplete, R slightly high; Five vertical shield lines, branch points toward tail feathers. Reiver die state a. Bowers-Borckardt die state I. The Reiver plate coin for the obverse and reverse of this variety. This coin has some minor mottled gray tones over luster but the cleaning did precious little to harm the surfaces. A difficult die pairing to find in high grades, this coin boasts a strong strike on Liberty and the stars, and the reverse is well defined, with no missing or weak stars over the eagle's head. Slight weakness is found on the right shield lines and upper corner, but this is quite minor. Identifiable by a short scratch to the right of the final S in STATES, and a small edge nick below the lowest curl on Liberty. Examination with a loupe will find some minor handling marks, but no adjustment lines or other detractions warrant description. *Ex: Ostheimer; Lester Merkin (9/1968), lot 247.*(#6875)

4277 **1798 Large Eagle, 10 Arrows VG10 PCGS. CAC.** B-13, BB-108, R.3. The light tan devices are framed by deep gray fields, with a small smudge at the center of the reverse.(#6876)

## B-13, BB-108 1798 Large Eagle Dollar 10 Arrows, Pointed 9, VF30

4278 **1798 Large Eagle, Pointed 9, 10 Arrows VF30 NGC.** B-13, BB-108, R.3. Bowers-Borckardt Die State II. The lavender-gray and olive-green toning is moderately deeper on the reverse. The wings and hair have pleasing definition. Close inspection fails to locate any marks remotely worthy of mention. A charming example certain to delight its next owner.(#6876)

## Choice VF 1798 Dollar, B-13, BB-108 Large Eagle, Pointed 9, 10 Arrows

4279 **1798 Large Eagle, Pointed 9, 10 Arrows VF35 ANACS.** B-13, BB-108, R.3. Bowers-Borckardt Die State IV. This lightly toned Bust dollar has pleasing detail and attractive surfaces. Most letters in E PLURIBUS UNUM are readable. A few adjustment marks (as made) are noted on the central obverse.(#6876)

## Scarce 1798 B-19, BB-106 Dollar, VF30

4280 **1798 Large Eagle, Wide Date, Pointed 9 VF30 PCGS.** B-19, BB-106, R.5. The date is widely spaced and stars 1, 8, and 13 are distant from the devices. Star 7 is closer to L. The reverse has a die chip near the upper point of star 4. This scarce variety is usually found in lower grades. The present example has delightful light gray surfaces with silvery-gray on the devices.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#6877)

4281 **1799 7x6 Stars—Improperly Cleaned—NCS. VF Details.** B-7, BB-156, R.4. Lightly cleaned surfaces with pale silver-gray color on both sides. When NCS examined this piece, they obviously failed to notice the large tooled punch mark on the reverse between the final S and O.(#6878)

4282 **1799 7x6 Stars VF25 PCGS.** B-7, BB-156, R.4. Bowers-Borckardt Die State II-III with a faint die crack between the TA in STATES. This walnut-brown Heraldic Eagle dollar retains ample hair and plumage detail, although most of PLURIBUS is worn. Thorough evaluation fails to locate any remotely mentionable abrasions. (#6878)

4283 **1799 7x6 Stars VF30 ICG.** B-22, BB-168, R.3. Die State III. A prominent horizontal die crack bisects the reverse, a diagnostic for this comparatively scarce variety. Identified on the ICG holder as "H-22," a reference to the Haseltine variety numbers of the 19th century. A lavender-gray representative, Liberty's cheek and the field above the eagle are lightly but not unduly marked. Bolender-22 is a conditional rarity; Bowers in 1993 was not able to track down any auction appearances above XF40.(#6878)

4284 **1799 7x6 Stars—Tooled, Cleaned—ANACS. VF30 Details.** B-10, BB-163, R.2. The upper right obverse field has been tooled, and both sides are glossy from cleaning. A few pinscratches are concealed here and there beneath the deep powder-blue and caramel-gold toning. (#6878)

## Splendid 1799 B-14, BB-167 Dollar, VF30

4285 **1799 7x6 Stars VF30 PCGS. CAC.** B-14, BB-167, R.3. Bowers-Borckardt Die State IV with the crack through the tops of AM now extending faintly to the E. Attractive two-tone surfaces with deep gray patina in the fields and lighter pewter-gray on the devices. A tiny rim nick over the M is the only distinctive characteristic. (#6878)

## Off Center 1799 B-16, BB-158 Dollar, VF35

4286 **1799 7x6 Stars—Struck 5% Off Center—VF35 PCGS.** B-16, BB-158, R.2 Bowers-Borckardt Die State III with clash marks but no visible die cracks. Struck off center at 3 o'clock. This wonderful error has medium gray fields with lighter gray devices, and splashes of deep steel toning through the legend on the reverse.(#6878)

## Toned Choice XF 1799 Dollar
## 7x6 Stars, B-12, BB-160

4287 **1799 7x6 Stars XF45 NGC.** B-12, BB-160, R.3. Bowers-Borckardt Die State III. Deep golden-brown and gunmetal-gray toning encompasses this pleasing Draped Bust dollar. Luster glimmers from design elements, and wear on the portrait and eagle is moderate. There are no distracting marks, and any collector would be proud to possess this problem-free piece.(#6878)

4288 **1799 7x6 Stars—Cleaned—ANACS. XF45 Details.** B-8, BB-165, R.3. Bowers-Borckardt Die State I-II. Light gold toning visits this predominantly ice-blue 1799 dollar. Cloudy from faint hairlines, but delightfully detailed, particularly on the wings and hair. E PLURIBUS UNUM is clear, and the shield lines are bold. The rims are problem-free, although a cluster of tiny marks is noted on each side of Liberty's jaw.(#6878)

## Delightful Choice XF 1799 Dollar
## 7 x 6 Stars, B-19, BB-155

4289 **1799 7x6 Stars XF45 NGC.** B-19, BB-155, R.4. Bowers-Borckardt Die State IV with heavy die cracks emanating from each of the first three obverse stars. Substantial bright luster sweeps the stone-gray surfaces. Only a couple of the reverse stars lack a crisp strike. A problem-free and desirable Choice XF example.(#6878)

## 1799 Dollar, 7x6 Stars, B-8, BB-165, AU50

4290 **1799 7x6 Stars AU50 PCGS.** B-8, BB-165, R.3. Die State II. Star 7 is slightly closer to T than star 8 is to Y, and stars 10 and 11 are closer than any other pair. Liberty's highest hair curl is centered under the right half of the E. On the reverse the die flaws inside and right of the last S in STATES cement the union of the dies. The die crack through the LIB in LIBERTY attributes the die state, along with the absence of the later progression through the TY. This piece has much luster remaining, with pretty pinkish-silver centers and daubs of ice-blue at the rims.(#6878)

## Attractively Toned AU 1799 Dollar
## 7 x 6 Stars, B-16, BB-158

4291 **1799 7x6 Stars AU50 PCGS.** B-16, BB-158, R.2. Original forest-green, golden-brown, and slate toning embraces this handsome early dollar. Liberty's cheek, shoulder, and the hair above her ear show moderate wear, but luster emerges from design elements. Lightly abraded over despite minor contact on the eagle's breast. (#6878)

## Scarce VF30 1799/8 Dollar
## 15 Stars Reverse, B-3, BB-141

4292 **1799/8 15 Stars Reverse VF30 PCGS.** B-3, BB-141, R.3. Bowers-Borckardt Die State III. The tan-gold and ivory-gray centers are bounded by deep gunmetal-gray. This middle grade Bust dollar shows even wear and has only one remotely noticeable mark, near the right shield corner. A popular variety due to the overdate, the blundered reverse star count, and the engraver's awkward attempt to set things right.(#6883)

# Select Uncirculated 15 Stars 1799/8 Dollar
# B-3, BB-141

4293 **1799/8 15 Stars Reverse MS63 NGC.** B-3, BB-141, R.3. Toned in dark golden-gray hues over the entire surface, with darker flecks on the reverse. The mint luster is present but generally overwhelmed by the toning. Close examination of the obverse shows crisscrossing adjustment marks on Liberty's face, neck, and hair, some of which extend into the surrounding fields. There is also an excellent pedigree marker in the form of a shallow nick which extends horizontally behind Liberty's eye into the nearby curl. The strike is fairly sharp for this variety. The devices on this variety are often found weakly impressed. Clean surfaces as expected for the grade, with no noteworthy bumps or nicks.

This variety is always a favorite to examine. First off, the overdate feature is bold, as no effort was made to hide the underdigit 8 beneath the second 9 of the date. For the mint engraver, a less than perfect day unfolded. Without thinking, he placed 15 stars over the eagle's head and then noticed the mistake. Rather than discard the die, or simply strike coins with it, he decided to "hide" two of the stars. Dies are difficult to erase errors from (thankfully for die variety collectors today), so the engraver decided to cover two of the stars by extending the clouds down over them, figuring no one would notice. Perhaps no one noticed until decades later, since coinage continued using this pair of dies until they failed in the normal course of events. However, *two little star points peek out from the enlarged cloud on the left, and one and a fraction star points extend from the enlarged cloud on the right.* The engraver's bad day, and his attempt to obscure, are recalled by collectors today. Certainly one of the finer examples known of this important and popular overdate. Census: 6 in 63, 7 finer (9/08).
*From The Jack Lee Estate, Inventory.*(#6883)

4294 **1799/8 13 Stars Reverse Fine 15 PCGS.** B-2, BB-143, R.4. A very scarce variety, represented here by a pleasing, moderately worn violet and gray-gold example. Minor abrasions are of little consequence. (#6884)

## Middle State 1799/8 B-1, BB-142 Dollar, XF45

4295 **1799/8 13 Stars Reverse XF45 PCGS.** B-1, BB-142, R.4. The die scaling between R and I of AMERICA identifies this 13 Star reverse. Bowers-Borckardt Die State II with minor reverse die cracks at ES and OF. A wonderful example with rich gold and iridescent toning over satiny surfaces.(#6884)

4296 **1800—Scratched, Damaged, Improperly Cleaned—NCS. VF Details.** B-12, BB-184, R.3. This glossy and hairlined representative has deep jade-green toning. The right obverse field and upper left obverse field display scratches, and Liberty's cleavage is lightly pitted.(#6887)

## Collectible VF25 1800 Dollar, B-13, BB-193

4297 **1800 VF25 NGC.** B-13, BB-193, R.4. Impressively defined for the VF25 level. A mildly granular example with powder-blue, golden-tan, and stone-gray toning. The upper reverse has an area of charcoal-gray, and a planchet flaw is noted near Liberty's mouth. The demand for early silver U.S. coins has grown considerably over the past two decades, with the early dollars particularly popular. (#6887)

## Choice XF 1800 Dollar, B-12, BB-184

4298 **1800 XF45 PCGS.** B-12, BB-184, R.3. The gunmetal-gray fields and devices are bounded by narrow peripheral bands of aquamarine and golden-brown. Luster glimmers from the design crevices, and the few small marks on the right obverse are of little relevance. A problem-free example of this moderately scarce variety.(#6887)

## Patinated Choice AU 1800 Dollar B-13, BB-193

4299 **1800 AU55 NGC.** B-13, BB-193, R.4. Bowers-Borckardt Die State III with heavy clashmarks through the F in OF. Deep golden-brown and ocean-blue encompasses this lightly circulated better variety early silver dollar. Ample luster shimmers across the legends and devices, although the cloud centers and Liberty's cheek confirm brief circulation.(#6887)

## Uncirculated Details 1800 Dollar Very Rare B-2, BB-182 Marriage

4300 **1800 B-2, BB-182, R.6—Damaged—NCS. Unc. Details.** B-2, BB-182, R.6. Die State II. Fine die cracks on the reverse connect the first A in AMERICA to the border and the wing, and join OF to the wing.

The surfaces of this essentially Mint State coin exhibit small ticks, nicks, and punch marks. A large blemish is near the upper leaf on the reverse. Otherwise, it would be far and away the finest known, with full luster, a sharp strike, excellent centering, and lovely toning. Both sides have pleasing ivory-brown color with peripheral steel and pale blue toning on both sides. It may still qualify as finest known, depending on how much is deducted for the problems.

The authors of the Bowers-Borckardt reference claim that there are no uncirculated pieces known, and certainly at the time that reference was published, this example was unknown to them.

Stack's described this coin in their catalog as:

"1800 B.2. Brilliant Uncirculated. An amazing coin for many reasons. Both sides are brightly reflective, with hints of gold, rose, and pearl gray toning. The strike is sharp, as well, with good definition in Liberty's hair and the eagle's breast feathers. Original mint lustre can be seen on the obverse and reverse. In terms of technical and sharpness grade this piece far exceeds any previously known, including even the French Family coin (Choice Extremely Fine). Both sides of this piece show many scattered nicks and tics and there is one small deep flaw on the reverse. Moderate die states."

*Ex: Stack's (12/1998), lot 1410.*(#6887)

4301 **1800 Dotted Date Fine 15 PCGS.** B-4, BB-194, R.3. A scarce variety that warrants its own *Guide Book* listing. Gray-gold and silver-blue shadings show occasional rose-violet accents. For the variety, Population: 4 in 15, 53 finer (11/08).(#6889)

## Pursued XF 1801 Dollar, B-3, BB-213

4302 **1801 XF40 NGC.** B-3, BB-213, R.3. Bowers-Borckardt Die State II. This Jefferson Administration silver dollar has even tan-gray toning and attractive surfaces. The reverse rim has a small mint-made flaw at 2:30, and the patient observer will eventually locate two minuscule rim nicks elsewhere. The eagle's breast has partial feather definition.(#6893)

## Sharp 1801 B-4, BB-214 Dollar, AU Details

4303 **1801—Harshly Cleaned—NCS. AU Details.** B-4, BB-214, R.3. Both sides are fully white with prooflike obverse surfaces, perhaps a result of light cleaning. The matte-like reverse has faint corrosion with dull white surfaces. Design elements are bold. The 1801 dollar is slightly scarcer than other dates of this design.(#6893)

## Peripherally Toned B-4, BB-232 AU 1802/1 Narrow Date Dollar

4304 **1802/1 Narrow Date AU50 ANACS.** B-4, BB-232, R.3. Bowers-Borckardt Die State II. The underdigit 1 is obvious beneath the 2 in the date. Bright silver-gray surfaces are essentially untoned in the centers, although the peripheries display cobalt-blue, magenta, and yellow-gold. The dentilation is bold, as are most of the other design elements. Relatively clean surfaces reveal no significant abrasions. All in all, an attractive early dollar.

*Ex: Dallas Signature (Heritage, 11/2006), lot 1090.*(#6898)

## Pleasing AU 1802/1 Dollar Narrow Date, B-4, BB-232

4305 **1802/1 Narrow Date AU50 NGC.** B-4, BB-232, R.3. Bowers-Borckardt Die State II. Golden-gray patina becomes slightly deeper on the reverse. Well struck on the design features. Horizontal adjustment marks (as made) are visible in the central obverse. An impressive example of this obvious overdate variety.(#6898)

4306 **1802 Narrow Date Fine 12 PCGS.** B-6, BB-241, R.1. Bowers-Borckardt Die State I. Lavender-gray at the centers and across much of the fields, with peripheral swaths of cobalt-blue and occasional glimpses of chestnut-gold and sea-green. A few thin marks on the left obverse field are customary for the grade.(#6895)

4307 **1802 Narrow Date—Obverse Graffiti, Improperly Cleaned—NCS. Fine Details.** B-6, BB-241, R.1. Bowers-Borckardt Die State I. This sea-green and sky-blue Draped Bust dollar has a bullet-shaped strike-through on the obverse at 10 o'clock. Both sides are glossy, and the right obverse field displays the pinscratched letters JKOO. (#6895)

## 5% Off Center 1802 Dollar Narrow Date, B-6, BB-241, XF40

4308 **1802 Narrow Date—Struck 5% Off Center—XF40 PCGS.** B-6, BB-241, R.1. Struck noticeably off center toward 11 o'clock. The tops of a few letters in UNITED and LIBERTY are off the flan, and the denticles are uncommonly lengthy opposite near 5 o'clock. Toned light walnut-brown and deep gunmetal-gray. Hints of luster emerge from protected areas, and both sides are void of remotely relevant marks.(#6895)

## Dappled AU Narrow Date 1802 Silver Dollar, B-6, BB-241

4309 **1802 Narrow Date AU50 NGC.** B-6, BB-241, R.1. Richly toned in olive-gold, sky-blue, apricot, lilac, and cream-gray shades. A well detailed Heraldic Eagle dollar that has ample luster and undisturbed, unblemished surfaces. The Narrow Date variety is always available for a price, but examples of the present quality are undeniably elusive.(#6895)

4310 **1803 Small 3—Repaired, Improperly Cleaned—NCS. VG Details.** B-4, BB-254, R.3. Dashes of golden-brown and cobalt-blue overlie this glossy gunmetal-gray early dollar. Cleaned to conceal careful smoothing of the open fields.(#6900)

## Lustrous XF40 1803 Small 3 Dollar, B-5, BB-252

4311 **1803 Small 3 XF40 PCGS.** B-5, BB-252, R.3. The 3 in the date is small, too high, and out of alignment with the remaining digits. The 1 is near the lowest curl, and the 3 near the bust. Stars 6 and 7 are noticeably wider-spaced than any other pair. On the reverse the leftmost arrow point is under the left upright of the N in UNITED, and a star point touches the upper eagle's beak just above the point. This piece has a lot of luster and flash for an XF40 coin. The mottled copper, cobalt-blue, and plum toning is completely original, and a definite plus that attests to this coin's untampered-with surfaces. (#6900)

## AU 1803 Small 3 Dollar, B-5, BB-252

4312 **1803 Small 3 AU50 NGC.** B-5, BB-252, R.3. Caramel-gold and pearl-gray toning embrace this partly lustrous and lightly circulated Bust dollar. Tiny marks are distributed, but none singularly distract. Struck a couple of degrees off center toward 2:30, with a wider rim present on the left than on the right.(#6900)

4313 **1803 Large 3—Repaired, Improperly Cleaned—NCS. Fine Details.** B-6, BB-255, R.2. Bowers-Borckardt Die State II. This charcoal-gray Heraldic Eagle dollar is evenly granular and has subtle field repairs near obverse stars 1 and 10. Nicely detailed. A minor obverse rim ding at 1 o'clock is of little import.(#6901)

### Pleasing 1803 B-6, BB-255 Large 3 Dollar, VF30

4314 **1803 Large 3 VF30 NGC.** B-6, BB-255, R.2. The single Large 3 variety is rather common, but it is also a *Guide Book* variety, adding substantial additional demand. This piece has light to medium gray surfaces with considerable peripheral iridescence on the obverse. The reverse is more evenly toned. Traces of luster are still evident beneath the toning.(#6901)

### Charming VF30 1803 Dollar
### Large 3, B-6, BB-255

4315 **1803 Large 3 VF30 PCGS.** B-6, BB-255, R.2. Stone-gray with glimpses of honey on the fields and deeper russet toning near design crevices. All letters in E PLURIBUS UNUM are readable. Attractive for the grade despite a few hair-thin lines near the ribbons and tiny reed marks on the portrait. Struck from moderately rotated dies. (#6901)

### Popular 1803 B-6, BB-255 Large 3 Dollar, VF35 Details

4316 **1803 Large—Scratched—ANACS. VF35 Details.** B-6, BB-255, R.2. Among 1803 dollars, the Large 3 variety is the ideal choice for a type collection, as it is more plentiful than all other varieties combined. This Large 3 dollar has pleasing light gray surfaces with a few minor reverse scratches between S and O.(#6901)

### Desirable AU 1803 Dollar
### Large 3, B-6, BB-255

4317 **1803 Large 3—Lamination Obverse at 8:00—AU50 PCGS.** B-6, BB-255, R.2. Bowers-Borckardt Die State III. Luster brightens the design of this lightly toned and partly lustrous tan-gray Draped Bust dollar. The lamination is charcoal-gray and affects the lower half of star 1. A few faint field marks are of little import. Choice AU early dollars are enthusiastically contested on the auction floor. Population: 10 in 50, 20 finer (12/08).(#6901)

### Partly Lustrous AU 1803 Dollar
### Large 3, B-6, BB-255

4318 **1803 Large 3 AU50 NGC.** B-6, BB-255, R.2. Bowers-Borckardt Die State III. This deeply toned Heraldic Eagle dollar displays gold, aqua, and plum-mauve shades when rotated beneath a light. Splendidly detailed, and luster shimmers from design elements. Abraded near the O in OF, but otherwise a delightful example of this formidable and coveted type.(#6901)

### Bright 1803 B-6, BB-255 Dollar, AU Details

4319 **1803 Large 3—Improperly Cleaned—NCS. AU Details.** B-6, BB-255, R.2. The obverse is bright silver with smooth, mildly reflective surfaces with evidence of minor rim bruises. The reverse is cleaned, corroded, and scratched with adjustment marks. This would make a nice display piece to exhibit the obverse design. (#6901)

4320 **1842 AU58 NGC.** Gold-orange, rose, and violet patina overall with substantial luminosity beneath the toning. Strong eye appeal with only slight friction across the well-defined devices.(#6928)

### Elusive 1842 Seated Dollar MS62

4321 **1842 MS62 NGC.** Dusky golden-brown and powder-blue embrace this satiny No Motto type coin. The strike is sharp at the borders but shows softness on the eagle's neck and upper left (facing) wing. Smooth aside from a couple of bagmarks on the right obverse field. Housed in a prior generation holder. Census: 23 in 62, 27 finer (11/08).(#6928)

4322 **1843 MS61 NGC.** A shimmering silver-gray and almond-gold silver dollar that has a good strike and moderately abraded fields. The obverse has a hair-thin mark near the first two stars and a tiny rim nick at 6 o'clock. The 1843 has a plentiful mintage by No Motto Seated dollar standards, yet remains very scarce in Mint State. Census: 21 in 61, 31 finer (12/08).(#6929)

4323 **1845—Improperly Cleaned—NCS. AU Details.** Low intensity multicolored toning covers semibright, lightly cleaned surfaces. Generally well defined, with scattered minute marks.(#6931)

### Stone-White 1845 Silver Dollar AU58

4324 **1845 AU58 NGC.** An untoned Borderline Uncirculated representative of this low mintage date. Field marks are few, and the devices are sharply struck aside from Liberty's hair and the eagle's left (facing) ankle. A mere 24,500 pieces were struck. Census: 27 in 58, 17 finer (12/08).(#6931)

### Deeply Toned MS62 1846 Seated Dollar

4325 **1846 MS62 PCGS. CAC.** An uncommonly difficult Seated dollar in Uncirculated in spite of a mintage of 110,600 pieces. In 1982, Bruce Amspacher wrote in the *Coin Dealer Newsletter* that a really nice Uncirculated coin turned up at the rate of one coin every five to 10 years. This is a deeply toned example that has strong underlying mint luster. A few abrasions that account for the grade are seen on each side, but the most obvious one is in the field to the right of the eagle's head.(#6932)

4326 **1846-O XF45 NGC.** Deep violet and rose shadings drape still-luminous surfaces. Though light wear crosses the high points, the surfaces are remarkably mark-free. A great example of this antebellum issue.(#6933)

### Uncirculated 1846-O Seated Dollar

4327 **1846-O MS61 ANACS.** The New Orleans Mint waited until 1846 to strike their first silver dollars. The mintage was just 59,000 pieces, compared to the 2.3 million half dollars struck by the facility that year. The present 1846-O dollar is unworn and exhibits ocean-blue and peach-gold toning. The reverse is particularly colorful. Satiny and slightly glossy with no mentionable marks.(#6933)

4328 **1847 AU58 NGC. CAC.** This piece is close to Mint State, with almost all of its original luster present. There are smoky gray toning stripes on the obverse, along with accents of gold. A few light abrasions consistent with a short spate in circulation appear under a loupe, and the strike on Liberty's upper torso is somewhat soft. Nonetheless an appealing coin, with a choice reverse.(#6934)

### Mint State 1847 Seated Dollar

4329 **1847 MS60 PCGS.** This piece is apparently graded MS60 due to the numerous bagmarks and chatter that appear in the fields on both sides, although none of them are overtly distracting. Much luster is also present on the surfaces, which are silver and lightly accented with tinges of plum and gold.(#6934)

4330 **1848—Improperly Cleaned—NCS. AU Details.** Medium brown toning remains in the recesses, while the remaining surfaces are bright and finely hairlined. Well struck, and minimally abraded. (#6935)

4331 **1848—Improperly Cleaned—NCS. AU Details.** Light to medium gray surfaces are lightly marked, and exhibit fairly well defined design elements. The cleaning is not all that bad.(#6935)

## Elusive 1848 Silver Dollar AU53

4332 **1848 AU53 PCGS.** Pastel golden-brown, aquamarine, and powder-blue enrich this sharply struck and briefly circulated representative. Ample luster sweeps the borders and devices. The seated Liberty has a few concealed abrasions, and the obverse rim has a small ding at 11:30. A scant 15,000 pieces were struck for this challenging date. Population: 14 in 53, 59 finer (11/08).(#6935)

## Near-Mint 1848 Silver Dollar

4333 **1848 AU58 PCGS.** An essentially brilliant representative of this very low mintage issue. The devices and legends shimmer with luster, and no marks are of consequence. The reverse rim has an interesting strike-through (as made) at 4:30. Just 15,000 pieces were struck, the lowest mintage of the Seated series during the 1840s. *Ex: Baltimore Signature (Heritage, 7/2003), lot 8219.*(#6935)

4334 **1849 AU58 NGC.** Though light wear visits the uppermost parts of the design, the slate-gray and gold-orange fields offer considerable luster through patina. Elegant eye appeal.(#6936)

4335 **1850—Whizzed—NCS. AU Details.** Lightly whizzed, bright surfaces are retoning a low-intensity golden-tan, and display traces of luster remaining in the recessed areas. A sharply defined coin. A noticeable scratch traverses the upper reverse.(#6937)

## Notable Low-Mintage 1850 Seated Dollar, AU53

4336 **1850 AU53 PCGS.** Open 5. A low mintage Seated dollar with only 7,500 pieces produced. The decade of the 1850s was full of low mintage dates, but the 1850 is a notable one as fewer high grade pieces were set aside of this date. This is a mostly brilliant coin with occasional patches of russet at the rims. The strike is a tad soft, and there are a few handling marks in the fields.(#6937)

## Low Mintage Choice AU 1850 Seated Dollar

4337 **1850 AU55 PCGS.** Golden-brown and pearl-gray blend throughout this briefly circulated No Motto dollar. The devices exhibit a wealth of detail, and the surfaces are only lightly abraded despite a thin mark near UNITED. A mere 7,500 pieces were struck, the lowest business strike production of the series up to that time. Population: 33 in 55, 48 finer (11/08).(#6937)

4338 **1850-O—Improperly Cleaned—NCS. AU Details.** Light gold-tan and violet patina is somewhat deeper on the reverse of this O-mint specimen. Semireflective fields establish modest contrast with nicely defined motifs. The light cleaning does not significantly detract. (#6938)

## Choice AU 1850-O Silver Dollar

4339 **1850-O AU55 NGC.** This lovely choice AU example exhibits bright silvery surfaces with just the slightest hint of light hazy gold-tan color. Traces of luster cling to the design elements, which are relatively well defined, save for softness on the eagle's neck. No abrasions merit mention save for a small roundish mark right of the date. Census: 19 in 55, 32 finer (11/08).(#6938)

## Amazing 1850-O Seated Dollar, MS62

4340 **1850-O MS62 NGC.** A sensational example of the elusive 1850-O Seated dollar, one of just four Seated dollar issues coined at the New Orleans Mint. While the 1859-O and 1860-O issues are commonly seen in all grades, including Mint State, the issues of 1846-O and 1850-O are seldom seen in Mint State grades.

This golden-brown toned specimen is fully lustrous and nicely detailed, the obverse accented with lilac, rose, blue, and olive-green color. While the surfaces have a few grade consistent abrasions, there are no significant defects. Census: 4 in 62, 4 finer (12/08). (#6938)

4341 **1853—Improperly Cleaned—NCS. XF Details.** Light to medium gray toning imbued with traces of purple covers both sides, each of which reveals a few small circulation marks, and well defined design features. The cleaning is not all that bad.(#6941)

## Rare AU Details 1854 Silver Dollar

4342 **1854—Improperly Cleaned—NCS. AU Details.** Golden-brown and slate-grate envelop this well defined albeit lightly circulated No Motto Seated dollar. The fields are subdued and hairlined beneath the toning. No marks merit individual mention. Only 33,140 pieces were struck, and given the rarity of survivors, many were apparently melted by bullion speculators.(#6942)

## Mint State Sharpness 1855 Silver Dollar

4343 **1855—Improperly Cleaned—NCS. Unc. Details.** A moderately hairlined example of this challenging low mintage No Motto issue. Orange-gold and powder-blue embrace the unworn and slightly glossy surfaces. A small planchet flaw affects the E in AMERICA, and the seated Liberty has a few inconspicuous marks.(#6943)

4344 **1856—Improperly Cleaned—NCS. XF Details.** The light silver-gray surfaces reveal fine hairlines under magnification. Portions of Liberty and the eagle exhibit the typical softness seen on this issue. Minimally abraded for a coin that has seen some circulation. (#6944)

4345 **1856—Improperly Cleaned—NCS. AU Details.** Light gray surfaces display traces of luster in the protected areas. A well defined piece, except for softness in the centrils of the stars along the right border. A few faint hairlines are visible under magnification.(#6944)

4346 **1857—Improperly Cleaned—NCS. AU Details.** Silver-gray surfaces reveal nearly imperceptible, fine hairlines, along with hints of luster in some of the recessed areas. Evenly struck throughout. A few minute surface and rim marks are noted, more so on the obverse. (#6945)

4347 **1859-S—Cleaned—ANACS. AU Details, Net XF45.** A challenging Seated dollar issue, represented here by a piece with only minor wear. Generally gold-gray and reddish-orange surfaces have retoned from a past cleaning.(#6948)

4348 **1859-S XF45 NGC.** A nice Choice XF Seated dollar from early in the life of the San Francisco Mint, this piece shows pretty purple and blue patina along with considerable remaining luster and lots of eye appeal. The initial mintage of only 20,000 coins makes the subsequent survival all the more challenging.(#6948)

## Elusive Choice XF 1859-S Silver Dollar

4349 **1859-S XF45 PCGS.** Gunmetal-blue and golden-brown encompasses this well defined and moderately abraded example. In its first 15 years of operation, the San Francisco Mint struck silver dollars only in 1859. Half dollars were the preferred denomination for silver depositors, presumably because they contained less silver per face value. Only 20,000 pieces were struck, and many were exported to the Orient.(#6948)

4350 **1859-S—Improperly Cleaned—NCS. AU Details.** Semibright surfaces are retoning medium gray at the peripheries of this S-mint representative. The design features are well defined. Minimally abraded.(#6948)

## Lustrous MS62 1860-O Seated Dollar

4351 **1860-O MS62 PCGS.** The 1860-O is generally not available any finer than MS62. This is one of the great numismatic finds of the 20th century. Bag quantities had been in Treasury Department vaults for 100 years and then they were released to the general public beginning in 1962. The release of these coins created some great "war stories" for dealers such as Harry Forman and John Love. This piece has the usual strong mint luster associated with this issue. The devices are sharply struck throughout, and there is just a bit of light golden toning intermixed with the original brilliance on each side.(#6950)

## Brilliant 1860-O Seated Dollar, MS62

4352 **1860-O MS62 PCGS.** The 1859-O and 1860-O Seated dollars are the two issues that are frequently available in Mint State grades, although usually only at the MS60 level. This Select piece has fully brilliant and frosty silver luster with faint splashes of champagne toning. The surfaces are modestly abraded, consistent with the grade. PCGS has only certified 90 finer examples of the date, mostly from the early 1960s Treasury release of silver dollars.(#6950)

## Challenging 1860-O Select Dollar

4353 **1860-O MS63 ICG.** The 1860-O dollar is obtainable in the lower Mint State grades of MS60 to MS62. Select pieces are more challenging to acquire, and higher-grade examples are scarce to rare. The lustrous surfaces of this MS63 coin display occasional wisps of light gold-tan color. The design features are well impressed, save for the hair atop Liberty's head and her foot, and some of the star centers.(#6950)

4354 **1861—Improperly Cleaned—NCS. AU Details.** Light gray surfaces exhibit well defined design elements. Lightly cleaned, and showing a scattering of small circulation marks.(#6951)

## Patinated Choice AU 1861 Silver Dollar

4355 **1861 AU55 PCGS.** After relatively high mintages in 1859 and 1860, silver dollar business production fell to 77,500 pieces in 1861. Survivors are rare regardless of grade. This briefly circulated example is well struck and displays iridescent lavender, apricot, lemon, and lime shades. Small marks are scattered, but none merit mention save for an abrasion near the first A in AMERICA.(#6951)

4356 **1862—Improperly Cleaned—NCS. AU Details.** Semibright, minimally marked silvery surfaces display occasional blushes of light violet under magnification. The motifs are evenly defined, and traces of luster are visible in the recesses.(#6952)

## Desirable 1862 Dollar, MS64

4357 **1862 MS64 NGC.** An uncommonly fine survivor from this elusive Civil War-era issue, well struck overall with a subtle streak of gold-orange patina across the center of the otherwise silver-gray obverse. Impressively lustrous and highly desirable with only trivial faults in non-focal areas. NGC has graded only two numerically finer examples (12/08).(#6952)

4358 **1865—Scratched, Improperly Cleaned—NCS. AU Details.** Light golden-tan color adheres to both sides, each of which is finely hairlined. The design elements are sharp and uniformly defined. A few curly, fine pinscratches are located in the field under the C in AMERICA, but are not bothersome. This is a rather nice coin, despite the NCS disclaimers.(#6955)

4359 **1866—Improperly Cleaned—NCS. AU Details.** Bright surfaces exhibit traces of purple toning in the protected areas, and are finely hairlined. Generally well defined, and showing a few minor marks associated with brief circulation.(#6959)

4360 **1867 AU55 NGC.** Both sides offer considerable reflectivity despite a degree of wear. Luminous gold-orange and silver-lilac shadings drape the fields and the well-defined devices. Census: 6 in 55, 34 finer (11/08).(#6960)

4361 **1870-CC—Scratched, Improperly Cleaned—NCS. XF Details.** Cleaned surfaces are retoning golden-brown, more extensively and deeper on the reverse. A fine diagonal staple scratch extends from star 9 to the bottom of the shield, and numerous small abrasions are scattered about, especially on the obverse.(#6964)

## Important 1870-CC Seated Dollar, AU50

4362 **1870-CC AU50 ANACS.** The Carson City Mint began coinage production in 1870 with several silver and gold denominations, including the Seated dollar, the most plentiful issue of the type from the Nevada Mint. This predominantly silver piece has light peripheral gold toning with a few splashes of iridescence. (#6964)

## Bold 1870-CC Dollar Uncirculated Details

4363 **1870-CC Improperly Cleaned—NCS. Unc. Details.** Variety 2-A. The first-year Carson City issue of any denomination. Fully struck with all devices boldly defined. The notation on the NCS label correctly refers to an unnatural lack of luster, especially considering the Uncirculated details. However, signs of the cleaning do not include excessive hairlines like many others with the same designation. Some of the lines observed on both sides are actually die polish lines and are not the result of the impairment. This pale-gray piece represents an attractive alternative for a collector seeking a well defined example at a reasonable price.(#6964)

## Elusive 1872-S Seated Dollar, AU Details

4364 **1872-S—Improperly Cleaned—NCS. AU Details.** The San Francisco Mint only produced four Seated dollar issues, and only two are collectible. The 1859-S is the only No Motto Seated dollar produced on the West coast, while the extremely rare 1870-S, the elusive 1872-S, and the unknown 1873-S were the With Motto issues. Although cleaned and now with subdued pewter-gray surfaces, this sharp piece has smooth surfaces with hints of underlying luster. (#6970)

# PROOF SEATED DOLLARS

## Low Mintage Proof 1858 Seated Dollar

4365 **1858 PR60 PCGS.** Jade-green patina enriches the margins, while the remainder of the piece is pearl-gray. The devices exhibit substantial frost, and the fields have faint hairlines consistent with the grade. An estimated 300 proofs were struck in 1858, fewer than produced for each of the subsequent dates of the series. Encapsulated in an old green label holder. Population: 8 in 60, 66 finer (12/08). (#7001)

4366 **1859—Obverse Scratched—NCS. Proof AU Detail.** Light to medium gray toning bathes both sides of this Seated Liberty proof dollar, and the design elements are well defined throughout. The NCS disclaimer refers to a patch of very fine scratches in the right obverse field. These are really only apparent under magnification, and should not dissuade the interested bidder, as they do not detract all that much from the coin's appearance.(#7002)

## Toned 1859 Dollar, PR60

4367 **1859 PR60 NGC.** Splashes of gunmetal-blue and lavender toning concentrate at the margins of this PR60 dollar, leaving the central areas blushed with light golden-tan coloration. An exacting strike emboldens the design elements. Some faint hairlines are visible in the fields under magnification. Eight hundred dollars were struck in proof format in 1859, of which 350 are estimated by David Bowers (2006) to have been melted.(#7002)

## Sharp 1859 Dollar, PR63 Cameo

4368 **1859 PR63 Cameo PCGS.** 1859 was the first year during which proof Seated dollars were publicly offered, although proofs are known of all P-mint issues in the series. Despite a comparatively generous mintage of 800 pieces, proofs with any sort of cameo contrast are scarce and bring a nice premium over their uncontrasted counterparts. This is a sharply struck proof, with light splashes of burgundy color over mirrored fields, tending toward indigo at the rims, and a degree of contrast more pronounced on the reverse. The few marks noted on the surfaces are trivial and do not affect the eye appeal in the slightest.
*From The Findley Collection.*(#87002)

## Pleasing 1862 Select Proof Dollar

4369 **1862 PR63 PCGS.** A pleasing and Select proof, this Seated dollar blends cobalt-blue and medium gold, with pale heather on the reverse. It is an attractive and sharply struck specimen that survives from a mintage of just 550 pieces. Despite the modest grade, the PCGS population is still rather limited. Population: 47 in 63, 38 finer (12/08).(#7005)

4370 **1863—Improperly Cleaned—NCS. Proof.** This intricately struck and untoned specimen has hairlined surfaces and a change in texture on the field near the beak. Light marks are clustered beneath the first A in AMERICA. A mere 460 proofs were struck for this challenging Civil War date.(#7006)

## Attractive 1863 Seated Dollar, PR62

4371 **1863 PR62 NGC.** The smooth, clean appearance of this piece is perhaps its most noteworthy single attribute; but add a firm striking impression with uniformly crisp design elements and a nice degree of glassy reflectivity in the fields. Pleasing accents of gold and champagne toning appear over each side, and only faint, wispy hairlines restrict the grade. An attractive and conservatively graded specimen.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7006)

## Rarely Encountered 1867 Dollar, PR64

4372 **1867 PR64 PCGS.** Light beige-gold and ice-blue color resides on both sides of this near-Gem proof. A well executed strike emboldens the mildly frosted design elements, that offer a measure of contrast with the mirrored fields. Seemingly devoid of mentionable abrasions. Population: 66 in 64, 18 finer (12/08).(#7015)

## Lightly Toned PR62 1868 Silver Dollar

4373 **1868 PR62 PCGS.** This precisely struck specimen has milk-gray and pale gold toning. Much nicer than customary for the PR62 level, since the fields have only the faintest hairlines. The 1 in the date is lightly repunched, and STATES OF is minutely die doubled toward the rim. Only 600 proofs were struck. Certified in a green label holder.(#7016)

## Sharp 1868 Select Proof Dollar

4374 **1868 PR63 PCGS.** Cobalt-blue and golden tan patina runs over both sides of this Select proof, and is joined by splashes of purple and golden-orange on the reverse. An attentive strike leaves strong delineation on the design elements. Nicely preserved for the designated grade.(#7016)

## Lovely Gem Proof 1868 Seated Dollar
## Ex: Pittman

4375 **1868 PR65 NGC.** Pittman. A lovely, deeply reflective Gem proof that is characteristic of the type coin favored by John Pittman. While not an especially rare date, although the mintage of 600 proofs might belie it, this is superior example. The devices show pinpoint definition, and each side has mottled rose and blue toning. Just a bit of cameo contrast is seen on both obverse and reverse.
*Ex: Herdegen Sale (Hans Schulman, 12/1973), lot 999, where it brought $900; Pittman II (Akers, 5/1998), lot 1696, where it brought $7,700.*
(#7016)

## Solidly Struck 1869 Dollar, PR61 Cameo

4376 **1869 PR61 Cameo NGC.** Traces of light golden-tan patina become slightly more noticeable on the reverse of this Cameo dollar, and a solid strike leaves exquisite definition on the design elements. Fine hairlines in the fields limit the grade.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#87017)

## Choice Cameo Proof 1869 Seated Dollar

4377 **1869 PR64 Cameo PCGS.** Original streaks of light autumn-gold toning enrich this penetratingly struck and well preserved near-Gem. Flashy mirrors and attractive patina ensure the exquisite eye appeal. A scant 600 proofs were struck. Population: 11 in 64 Cameo, 3 finer (12/08).(#87017)

4378 **1871 PR58 NGC.** Though minor rub is noted on the high points, the visual appeal of this piece is largely unaffected. The faintly hairlined mirrors are as strong as ever beneath ample gold-gray and claret patina. An interesting and comparatively affordable proof Seated dollar.(#7019)

### Exquisite PR64 1871 Silver Dollar

4379 **1871 PR64 ANACS.** Beautifully toned with pale lilac at the centers, and bands of navy-blue and straw-gold near the rims. This intricately struck Choice proof dollar has clean fields and exceptional eye appeal. High grade specimens from the mintage of 960 pieces are under ceaseless demand from both series and type set collectors.(#7019)

### Attractively Toned PR61 Cameo 1873 Seated Dollar

4380 **1873 PR61 Cameo PCGS.** Sun-gold iridescence enriches this nicely mirrored Seated dollar. The intricately struck devices provide noticeable contrast with the hairlined fields. One of only 600 proofs struck. A glut of Western-mined silver caused the demise of the Seated dollar in 1873, in favor of the new William Barber Trade dollar.(#87021)

### Cameo PR62 1873 Seated Dollar

4381 **1873 PR62 Cameo PCGS.** Beautiful peach-gold, apple-green, ruby-red, and electric-blue patina endows this sharply struck final-year Seated specimen. Delicate hairlines on the right obverse field determine the technical grade, but the eye appeal is formidable. IN GOD WE TRUST is die doubled, also seen on other proof dates of the Motto type.(#87021)

## TRADE DOLLARS

### Key Date 1873-CC Trade Dollar, AU58

4382 **1873-CC AU58 PCGS.** The recorded mintage of 1873-CC trade dollars was a small 124,500 pieces. The great majority of these coins was shipped to the orient to fulfill their intended purpose. Today this issue is rare in Mint State. The present coin is a pleasing example, with barely a touch of friction on the highest points. Much original luster and detail remain, with hints of green and gray toning. Eye appeal is impressive for the grade.(#7032)

### 1874-CC Trade Dollar With Prooflike Obverse, MS60

4383 **1874-CC MS60, Obverse Prooflike, ANACS.** A strange grade, but the ANACS holder states "MS60 Obv Pl." The obverse indeed is considerably prooflike, but there is deep copper-bronze toning in portions of the otherwise-silver obverse field, along with some minor scuffs. On the reverse there is generous pinkish-gold patina that, while not prooflike, makes that side more appealing.(#7035)

### Low Mintage Choice 1875 Trade Dollar

4384 **1875 MS64 PCGS.** Type One Obverse, Type Two Reverse. An attentively struck near-Gem example of this lower-mintage Philadelphia Trade dollar issue, softly lustrous beneath delicate cream-gray and sea-green shadings. A small depression on Liberty's extended forearm appears to be of mint origin. Population: 18 in 64, 3 finer (12/08).(#7037)

4385 **1875-CC—Improperly Cleaned—NCS. Unc Details.** Type 1 Obverse, Type 1 Reverse. The luster is somewhat flat and there are moderate hairlines on both sides. There are also a few moderate scrapes in the upper obverse above Liberty's head, but elsewhere there are few mentionable abrasions. The strike is well executed. (#7038)

## Conditionally Scarce 1875-CC Trade Dollar, MS61

4386 **1875-CC MS61 PCGS.** Mint State Trade dollars are scarce from any issue, because of their primary role as bullion pieces that were extensively exported to China. This example from the Carson City Mint is brilliant, with stone-white surfaces that exhibit good luster and the usual scattered marks and shallow luster grazes that are common for the MS61 grade level.(#7038)

## Beautiful Gem 1875-S Trade Dollar

4387 **1875-S MS65 NGC.** Type Two Reverse. Large S. Magnificent cartwheel luster sweeps this attractively toned Gem type coin. Orange and sky-blue shades dominate. The strike is decidedly above average, and noticeable marks are relegated to the left (facing) wing. Census: 35 in 65, 5 finer (12/08).
*Ex: Queller Family Collection of Silver Dollars (Heritage, 4/2008), lot 2177.*(#7039)

4388 **1876-CC AU55 ANACS.** Type 1 Obverse, Type 2 Reverse, Tall CC. This briefly circulated Carson City Trade dollar is evenly struck with subtle gold-gray toning. The left obverse border is mildly granular. Housed in a small-format ANACS holder.(#7042)

4389 **1876-S MS62 ICG.** Breen-5802, Type I Obverse, Type II Reverse, Minute S. The end of the scroll points left on the obverse, while on the reverse there is no berry under the eagle's claw. The Minute S, as here, with this combination (or Type II/Type II) is more available than the Large S with Type II reverse. The surfaces show golden-gray coloration with good luster, but there are a few rim hits noticeable from 1 to 2 o'clock, and the soft strike makes numerous roller marks on both sides prominent.(#7043)

## Lustrous 1876-S Trade Dollar, MS63

4390 **1876-S MS63 PCGS.** Type One obverse and reverse. This Select Mint State Trade dollar is fully lustrous and nicely detailed with hazy champagne toning on the obverse and darker speckled toning on the reverse. Although it is relatively plentiful at the MS63 grade level, PCGS has only certified 95 higher grade pieces in 22 years of coin certification.(#7043)

## Lushly Toned 1876-S Trade Dollar MS63

4391 **1876-S MS63 NGC.** Type One Obverse and Reverse. Large S. Orange-gold and olive-gray compete for territory across this satiny and crisply struck Centennial year Trade dollar. Both sides are generally free from the noticeable small marks usually associated with the MS63 level. An elusive type with rich original toning. (#7043)

4392 **1877 MS62 PCGS.** Ivory luster is accompanied by slightly deeper gold toning on both sides. Liberty's head and the adjacent stars are extremely weak, as usual for this date.(#7044)

## Elusive 1877-CC Trade Dollar, MS60

4393 **1877-CC MS60 ANACS.** The 1877-CC Trade dollar is one of the important condition rarities in the series. The mintage was only 534,000 pieces, the seventh lowest non-proof mintage, and few have survived in full Mint State grades. This frosty and fully lustrous piece has exceptional eye appeal with faint gold toning that is deeper on the reverse.(#7045)

4394 **1877-S MS62 PCGS.** Large S. Splashes of orange-red endow this exactingly struck and lustrous type coin. Moderately abraded beneath the PL in PLURIBUS and near the stem of Liberty's olive branch.(#7046)

## Gorgeous Gem 1877-S Trade Dollar

4395 **1877-S MS65 PCGS. CAC.** Marvelous visual appeal for this popular Trade dollar type issue. Carefully preserved with crisp detail and impressive luster beneath thin layers of swirling, iridescent patina with pink, champagne-orange, and turquoise shadings dominant. Population: 25 in 65, 7 finer (11/08).(#7046)
***See: Video Lot Description***

4396 **1878-S MS61 NGC.** An unexpectedly nice example with unencumbered cartwheel sheen, unblemished fields, an impeccable strike, and an absence of highpoint friction. Nearly bereft of toning.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7048)

## Fully Struck 1878-S Dollar, MS64

4397 **1878-S MS64 NGC.** Fully struck and highly lustrous with bright prooflike fields on the obverse and reverse. The luster, prooflikeness, and striking details are all fully evident as there is a snow-white appearance over each side. A few minor rim bumps are seen at the top of the reverse. A lovely type coin for the serious collector. (#7048)

## Elusive Gem 1878-S Trade Dollar

4398 **1878-S MS65 PCGS. CAC.** Our consigner tells us that this is the Eliasberg coin, and it appears to match the plate except that the lightly mottled delicate golden toning described in the catalog is no longer evident. Nevertheless, it is an elusive Gem specimen of the otherwise plentiful 1878-S Trade dollar, with brilliant silver surfaces and exceptional eye appeal. Population: 17 in 65, 18 finer (12/08). (#7048)

# PROOF TRADE DOLLARS

## Rare 1873 Trade Dollar PR60 Cameo

4399 **1873 PR60 Cameo NGC.** Untoned surfaces display strong field-device contrast. A well executed strike sharpens the design elements, except for the usual softness in the eagle's left (facing) leg. David Bowers (2006) writes that the 1873 is thought to be the rarest of all dates in the 1873 to 1883 span. NGC has assigned the Cameo designation to just 21 1873 proof dollars.(#87053)

4400 **1877 PR62 ANACS.** Moderately reflective beneath dusky blue, violet, and gold patina. The devices are boldly impressed, as always, though faint hairlines in the fields preclude a finer designation. (#7057)

## Impressive PR64 Cameo 1878 Trade Dollar

4401 **1878 PR64 Cameo PCGS.** First of the proof-only years for Trade dollars from Philadelphia, only 900 pieces were struck. Obviously most were not cameo proofs, but this remarkable coin is. Most likely it is one of the first coins from the dies, struck before the mint frost diminished and the contrast was lost. Each side shows a light layer of golden-brown patina that deepens slightly around the margins. The fields are highly reflective and shine forcefully through the toning. Population: 14 in 64 Cameo, 9 finer (12/08).(#87058)

4402 **1879 PR60 PCGS.** This is a glassy, quicksilver proof with silver-white surfaces throughout that at first glance appears considerably nicer than a PR60 grade. And at second glance, as well. Certified in a green-label holder, the piece does show some faint contact and hairlines in the field, but nonetheless much appeal is still present. (#7059)

4403 **1879 PR62 NGC.** Fully struck with watery, deeply toned silver-blue fields and lightly frosted devices. A pinscratch on the upper right obverse, from the rim to the back of Liberty's head, and a few wispy field hairlines limit the grade. The first proof-only year for the series.(#7059)

## Contrasted Near-Gem Proof 1879 Trade Dollar

4404 **1879 PR64 NGC.** The cameo contrast is so obvious on both sides of this near-Gem proof that we assume it was encapsulated in the days before NGC began including Cameo or Deep Cameo designations. Sharply struck with watery reflectivity in the fields and occasional areas of deep patina near the peripheries. A tiny contact mark to the left of U in UNITED limits the grade, along with minimal hairlines. (#7059)

## Colorfully Toned PR66 1880 Trade Dollar

4405 **1880 PR66 NGC.** The 1880 was the third year the Mint produced only proof examples of the Trade dollar design. Only 1,987 coins were struck and this is surely among the most appealing pieces that are known. Deeply mirrored fields enhance and enliven the speckled gray-lilac toning seen in the center of each side with deeper cobalt-blue around the margins. Fully struck in all areas with no apparent contact marks on the obverse or reverse. Census: 44 in 66, 18 finer (12/08).
*Ex: Melrose Bay Collection (Heritage, 7/2005), lot 6687.*(#7060)

## Brilliant Choice Cameo Proof-Only 1880 Trade Dollar

4406 **1880 PR64 Cameo NGC.** Icy devices provide obvious contrast with the glassy fields. This proof-only Choice Trade dollar has a well preserved reverse and only incidental contact on the right obverse field. A bold strike across most design elements, with Liberty's hair and the right-side stars slightly incomplete.(#87060)

## Gorgeous 1881 Trade Dollar, PR65

4407 **1881 PR65 NGC.** The proof mintage of 960 Trade dollars in 1881 was one of just three proof-only dates that had mintages below 1,000 pieces (of course we are not including the 1884 or 1885 in this discussion). Examples are usually frequently seen in the market place, even in Gem grades, but few have the eye appeal of this example, created through an incredible display of iridescent toning over fully mirrored fields. Census: 37 in 65, 27 finer (12/08). (#7061)

## Outstanding 1882 Trade Dollar, PR64 Cameo

4408 **1882 PR64 Cameo NGC.** A stunning Cameo proof, this near-Gem is fully brilliant without evidence of toning on either side. Both sides have incredibly deep mirrored fields and brilliant, frosty devices. The only blemish is mint-made, a curly lint mark above Liberty's thigh. Census: 35 in 64 Cameo, 46 finer (12/08).(#87062)

### Deep Cameo PR64 1882 Trade Dollar
### Remarkable White-on-Black Deep Cameo Contrast

4409 **1882 PR64 Deep Cameo PCGS.** A stunning coin and undoubtedly one of the most attractive representatives of this proof-only date, regardless of grade. The depth of fields is unfathomable. Contrasted against these fields are the heavily frosted devices that yields a strong cameo contrast. The surfaces are brilliant throughout and there are no mentionable contact marks on either side. Population: 10 in 64 Deep Cameo, 12 finer (12/08).(#97062)

### Flashy PR66 1883 Trade Dollar

4410 **1883 PR66 NGC.** The flashy fields contrast with the moderately frosted motifs, but the NGC insert lacks a Cameo designation, perhaps due to the age of its small hologram holder. An essentially untoned proof-only Premium Gem with seamless, glassy fields and a precise strike. Census: 25 in 66, 13 finer (12/08).(#7063)

## MORGAN DOLLARS

4411 **1878 8TF MS65 PCGS.** Both sides show substantial reflectivity and flash, though the green label holder does not list a Prooflike designation. Thin crescents and arcs of gold-orange peripheral toning yield to essential brilliance in the centers.(#7072)

### Lovely 1878 Eight Tailfeathers Morgan Dollar, MS66

4412 **1878 8TF MS66 PCGS.** Excellent detail for this earlier first-year Morgan dollar variety. The luster is strong, and aside from a hint of obverse patina, the surfaces are essentially brilliant. This pleasing Premium Gem shows a single mentionable flaw, this appearing at the hair over Liberty's ear. Population: 29 in 66, 2 finer (11/08).
*From The Sanderson Family Collection.*(#7072)

### Boldly Impressed 1878 8TF Dollar, MS66

4413 **1878 8TF MS66 PCGS.** Ex: PCGS Tour-NFL Set. This 8 tailfeathers variety has a blunt upper beak on the eagle. An exacting strike delivers bold definition to the design features, including separation of the hair over Liberty's ear. Untoned surfaces yield coruscating luster, and are devoid of mentionable marks. Population: 29 in 66, 2 finer (11/08).
*From The Arno Collection.*(#7072)

### Popular Variety 1878 Morgan Dollar
### 8TF, VAM-21, MS66

4414 **1878 8TF MS66 PCGS, CAC.** VAM-21. An extraordinary 8TF Morgan, both in a technical sense and in terms of its superlative eye appeal. Minimally abraded surfaces offer radiant cartwheel luster and are untoned, save for an occasional dash of peripheral color on each side. Population: 29 in 66, 2 finer (12/08).(#7072)

## Mirror Like 1878 8 Tailfeathers Dollar
## MS64 Deep Mirror Prooflike

4415 **1878 8TF MS64 Deep Mirror Prooflike NGC.** VAM-2. A brilliant and well struck Eight Tailfeather dollar with dramatic depth of reflectivity in the fields, a characteristic often associated with the VAM-2 marriage. Moderate field marks are seen here and there, but the portrait is unblemished.(#97073)

## Famous VAM-44 Tripled Blossoms
## 1878 7/8TF Morgan, XF45, Top 100

4416 **1878 7/8TF Strong XF45 ANACS.** VAM-44. A Top 100 Variety. The cotton blossoms and leaves are tripled, and the eagle's legs are die doubled. This key 7/8TF variety is scarce in all grades, and is categorized as R-7 at vamworld.com and in the fourth edition of the VAM *Encyclopedia*. Slate-gray with generous glimpses of tan toning. Minimally marked and well detailed.

## Coveted VAM-44 Tripled Blossoms
## 1878 7/8TF Morgan Dollar AU58

4417 **1878 7/8TF Strong AU58 NGC.** VAM-44. A Top 100 Variety. According to the Top 100 guide book, VAM-44 is "considered by most specialists to be the Number One Morgan dollar variety." It is famous for its dramatic die tripling on the leaves and blossoms within Liberty's hair. In addition, the eagle's legs are die doubled. Lightly toned and generally lustrous with a few unimportant field marks.

4418 **1878 7/8TF Strong MS65 ANACS.** VAM-38. Seven over five tailfeathers. The brilliant silver-white surfaces show no trace of coloration and possess excellent eye appeal. Radiant cartwheel luster emanates from both sides of this pleasing Gem. Attributed by the tailfeathers, the overpolished area separating the eagle's leg and wing, the doubled LIBERTY shifted to the left, and the broken bottoms on RIB in PLURIBUS.(#7078)

4419 **1878 7/8TF Strong MS65 PCGS.** VAM-37, R.4. The satiny surfaces show flashy luster and a slight degree of champagne toning on both sides. Four underlying feather tips are easily seen on the lower reverse. Boldly struck with a few mild marks that preclude an even finer grade.(#7078)

4420 **1878 7/8TF Strong MS65 PCGS.** VAM-37, R.4. Untoned and well preserved for this popular first-year issue, with frosty luster and four underlying tail feathers clearly visible on the reverse. On the obverse, E and P have bulges at the top right, while B in LIBERTY is doubled on the lower half.(#7078)

## Strongly Contrasted MS64 Deep Mirror Prooflike
## 1878 7/8 Tailfeathers, Strong

4421 **1878 7/8TF Strong MS64 Deep Mirror Prooflike PCGS.** VAM-37. The doubled tailfeathers on this piece are quite bold with strong tips visible. Deeply mirrored fields establish pronounced contrast with the frosty motifs that exhibit crisp delineation. Untoned surfaces reveal just a few minor luster grazes that preclude this lovely piece from full Gem classification. Population: 29 in 64 Deep Mirror Prooflike, 2 finer (12/08).(#97079)

4422 **1878 7TF Reverse of 1878 MS65 PCGS.** An appealing Gem with creamy-white surfaces and radiant, satiny mint frost. Well struck and free of any distracting blemishes. This was the first year of the series, and the first reverse design subtype to be introduced into mass circulation.(#7074)

## Fantastic MS66 1878 Morgan Dollar
## Seven Tailfeathers, Reverse of 1878

4423 **1878 7TF Reverse of 1878 MS66 PCGS. CAC.** This charming Premium Gem, housed in a green label holder, offers impressive detail and noteworthy preservation. Occasional hints of silver-gray patina drape immensely lustrous surfaces. This issue of 4.9 million pieces is highly elusive in Premium Gem. Population: 18 in 66, 0 finer (11/08).
*From The Sanderson Family Collection.*(#7074)

## Sharp 1878 7 Tailfeathers Dollar
## Reverse of 1878, MS66
## Ex: NFL Set

4424 **1878 7TF Reverse of 1878 MS66 PCGS.** Ex: NFL Set. The 7 Tailfeathers reverse occurs with the Reverse of 1878 that shows a concave eagle's breast and parallel arrow feathers. The lustrous surfaces of this Premium Gem exhibit a trace or two of light gold-tan color, along with well struck design features. A few minute grade-consistent marks do not disturb. Population: 18 in 66, 0 finer (11/08).
*From The Arno Collection.*(#7074)

## Gem 1878 Silver Dollar
## Reverse of 1879, Seven Tailfeathers

4425 **1878 7TF Reverse of 1879 MS65 PCGS.** A blush of lemon toning visits the reverse exergue, but most observers would regard the present Gem as brilliant. The reverse is close to immaculate, and the left obverse has only a few wispy marks. Light die doubling is present on DOLLAR and the hair above the ear.(#7076)

## Brilliant 1878 7 Tailfeathers Dollar Reverse of 1879, MS65

4426 **1878 7TF Reverse of 1879 MS65 PCGS.** The coruscating luster across brilliant surfaces, and the splendidly defined features—including a fully rounded cheek—are special attributes of this impressive first-year Gem. Surface marks are minimal, making this piece seem conservatively graded.(#7076)

## Scarce 1878 Reverse of 1879 Dollar
## MS64 Deep Mirror Prooflike

4427 **1878 7TF Reverse of 1879 MS64 Deep Mirror Prooflike NGC.** A fully brilliant silver Morgan, this piece exhibits deeply mirrored fields around lustrous and frosty devices. Some scattered surface marks are evident on both sides, and they are also reflected in the mirrored fields, making them look worse than they really are. Few examples of this variety exist with full mirrors on both sides, and the present specimen is highly desirable for that reason.(#97077)

## Scarce 1878 Reverse of '79 Dollar
## MS64 Deep Mirror Prooflike
## Ex: Larry Shapiro

4428 **1878 7TF Reverse of 1879 MS64 Deep Mirror Prooflike PCGS.** Larry Shapiro. Seldom seen in the better grades of Uncirculated simply because the Convex Reverse coins are much scarcer than their Second Reverse, Convex counterparts. These pieces are also rarely seen with a prooflike finish, and the few that are generally do not display much contrast. This is a brilliant and highly contrasted example and one of the few Deep Mirror Prooflikes known in high grade. Sharply defined in all areas. Population: 20 in 64, 4 finer (12/08).(#97077)

4429 **1878-CC MS65 PCGS.** Intense mint frost over essentially brilliant, icy-white surfaces gives this Gem a dazzling, flashy appearance. A few wispy marks on each side are of little concern. The percentage of Gem '78-CC dollars is lower than that of other common Carson City issues from the 1880s.(#7080)

4430 **1878-CC MS65 PCGS.** Lilac-rose surfaces ringed in cobalt-blue accent the obverse, while the reverse gives us a creamy-white eagle surrounded by the same color combination. Fully struck and well preserved. A beautifully toned and technically impressive Gem. (#7080)

4431 **1878-CC MS65 PCGS.** A vividly toned piece with an outer layer of dark bluish-violet that encircles a scarlet and ruby center. The silver-gray hair and eagle sharply contrast against the toned perimeter. A fully struck and minimally abraded example of this first year of issue.(#7080)

4432 **1878-CC MS65 NGC.** A nice silver-white Gem of this always-popular issue, here with radiant cartwheel luster radiating from the satiny surfaces. Sharply struck save on the lower right reverse, and with relatively few luster grazes or other mentionable abrasions. (#7080)

### Frosty 1878-CC Morgan, MS66

4433 **1878-CC MS66 PCGS.** This is a well-struck and frosty untoned specimen of this popular first-year Carson City issue, one that has few distractions of any kind that appear, even under a loupe. A few wispy peripheral die cracks are not at all unusual. PCGS has certified only four pieces finer (12/08).(#7080)

### Frosty Premium Gem 1878-CC Morgan

4434 **1878-CC MS66 NGC.** After the Trade dollar passed into history, the Carson City Mint turned much of its attention to the new Morgan dollar. The premier issue from this fabled frontier mint, the 1878-CC was produced to the extent of 2.2 million coins—a respectable total for a CC-mint Morgan, but the 1878-CC is less common than one might assume. Enough coins survive in the lower Mint State grades to satisfy some collectors, but it is above the Gem threshold that the 1878-CC shows its true condition rarity.

This is a simply beautiful coin whose essentially untoned surfaces shimmer with frosty luster. The strike is full in all areas, and the surfaces are as smooth as one should expect for the MS66 level. NGC has certified only nine coins in higher grade (12/08).(#7080)

### Blazing 1878-CC Morgan Dollar, MS66

4435 **1878-CC MS66 PCGS.** Wayne Miller stated the 1878-CC issue was "one of the most consistently well struck of all Morgan Dollars." The present coin is certainly no exception to that rule, and exhibits a truly remarkable strike. The coin's extraordinary eye appeal is further enhanced by radiant, cartwheel mint luster on both sides. Only 13 coins have been certified finer at NGC and PCGS combined (12/08).(#7080)

### Lustrous Premium Gem 1878-CC Dollar

4436 **1878-CC MS66 PCGS.** Light gold toning visits this exceptionally lustrous and meticulously struck Premium Gem. A beautifully smooth representative of the introductory Carson City Morgan issue, which becomes scarce in such outstanding preservation. PCGS has certified just four pieces finer (11/08).(#7080)

### Classic 1878-CC Morgan Dollar, MS66

4437 **1878-CC MS66 NGC.** This exquisitely struck Carson City Mint specimen displays smooth silver-gray surfaces that exude glowing luster. Nicely preserved, with just one minor mark on the jaw. David Bowers (2006) estimates that a little less than one-half of the 2.212 million-piece mintage was melted under the Pittman Act. (#7080)

### Brilliant Gem Prooflike 1878-CC Dollar

4438 **1878-CC MS65 Prooflike PCGS. CAC.** This borderline Deep Mirror Prooflike first-year piece has fully brilliant mirrored surfaces with outstanding cameo contrast. The surfaces have a few tiny marks, but are otherwise pristine. Only 12 finer Prooflike examples have been certified by PCGS (12/08).(#7081)

4439 **1878-CC MS61 Deep Mirror Prooflike PCGS.** Housed in a green-label PCGS holder, with fully brilliant silver surfaces that exhibit light cameo contrast between the frosty devices and the deeply mirrored fields.(#97081)

4440 **1878-CC MS63 Deep Mirror Prooflike PCGS.** VAM-2A, R.5. The prominent die chip on Liberty's nostril attributes the variety, along with the doubling visible along the left sides of B, R, T in LIBERTY. This is an exuberant, lustrous, deeply mirrored example of this first-year CC-mint issue, and of course the rare VAM variety just provided added cachet to what is already an immensely appealing coin. Certified in a green-label holder.(#97081)

## Frosty 1878-CC Dollar MS64 Deep Mirror Prooflike

4441 **1878-CC MS64 Deep Mirror Prooflike PCGS.** Thickly frosted devices contrast with minimally toned mirrors that are reflective even at arm's length. A few scattered abrasions, but nothing outside the scope of the grade.(#97081)

4442 **1878-S MS66 PCGS. CAC.** Profoundly lustrous and minimally toned with elegant, twinkling frost across much of the central devices, which sport razor-sharp detail. Outstanding eye appeal, even by Premium Gem standards.(#7082)

## Shining Superb Gem 1878-S Morgan Dollar

4443 **1878-S MS67 NGC.** A flashy and immensely lustrous representative of this popular first-year issue, reflective though not to the degree required for a Prooflike designation. Thick mint frost drapes the exquisitely detailed devices, and hints of gold and brown patina appear intermittently at the rims. Census: 29 in 67, 0 finer (11/08).
*From The Sanderson Family Collection.*(#7082)

## Elegant MS66 1879 Morgan Dollar

4444 **1879 MS66 PCGS.** The second year of a coin design is rarely saved in the same numbers as the first, and the 1879 Morgan dollar is no exception; in fact, PCGS has graded only one example finer than this Premium Gem (11/08). Excellent strike and luster with subtle lilac-gray and gold-orange elements that visit the margins.
*From The Sanderson Family Collection.*(#7084)

## Well Struck 1879 Dollar, MS66

4445 **1879 MS66 PCGS.** Ex: Jack Lee. The silvery surfaces of this Premium Gem dollar possess full luster, and reveal just a few minor grade-consistent marks. An attentive strike leaves strong definition on the design elements, including the breast feathers, that are often weak. Population: 83 in 66, 1 finer (11/08).
*From The Arno Collection.*(#7084)

## Dazzling 1879 Morgan Dollar, MS66

4446 **1879 MS66 PCGS.** With a mintage of 14.8 million pieces, the 1879 Morgan dollar is a common date, and a favorite of type collectors. The present coin is an especially attractive example, with a sharp strike and fully lustrous surfaces. Only six coins have been certified finer by NGC and PCGS combined. Population: 83 in 66, 1 finer (12/08).(#7084)

## Sharp Premium Gem 1879 Morgan Dollar

4447 **1879 MS66 PCGS.** Despite a mintage of nearly 15 million pieces, the 1879 Morgan dollar was little saved, and coins that rate better than Gem are elusive. The present piece is solidly struck with strong luster and occasional whispers of tan-tinged toning over otherwise silver-white surfaces. This popular Philadelphia issue is essentially unavailable any finer, with only one such piece certified by PCGS (12/08).(#7084)

4448 **1879-CC AU53 PCGS.** Evidence of high point wear is evident on both sides of this light silver example. Considerable luster is still visible on both sides, along with minor handling marks from its brief stay in circulation.(#7086)

## Lustrous 1879-CC Dollar, MS62

4449 **1879-CC MS62 PCGS.** Pleasing luster emanates from the satiny surfaces of this MS62 example. Essentially untoned, though we note the light remnants of a fingerprint in the right obverse field. The central areas are incompletely brought up, as is usual for the issue. Encapsulated in a first generation holder.(#7086)

## Better Date 1879-CC Morgan Dollar, MS63

4450 **1879-CC MS63 PCGS.** Wisps of pale lilac patina decorate the peripheral areas on each side. A mostly brilliant and semi-prooflike representative that has a very smooth reverse. The cheek has a few tiny contact marks that are entirely appropriate for the grade. One of the scarcest Carson City dates of the series, the 1879-CC did not turn up in vast quantity in the GSA hoard, unlike the lower mintage 1881-CC and 1885-CC issues.(#7086)

## Early Key 1879-CC Morgan Dollar, MS63

4451 **1879-CC MS63 NGC.** In *A Guide Book of Morgan Silver Dollars*, Q. David Bowers states, "... the 1879-CC is the first key or rare variety in the Morgan dollar series, and is the second rarest (after 1889-CC) of all Carson City Morgans." The present coin is an attractive specimen, with a sharp strike and lustrous surfaces. Scattered handling marks are consistent with the grade.(#7086)

## Flashy Near-Gem 1879-CC Morgan

4452 **1879-CC MS64 PCGS.** An especially attractive key date example that is brilliant throughout. The fields show a faint glimmer of semi-reflectivity, and the striking details are nicely brought up in all areas. The fields are beautifully preserved, and Liberty's cheek has only moderate contact.(#7086)

## Appealing 1879-CC Near-Gem Dollar

4453 **1879-CC MS64 PCGS.** Mild prooflikeness occurs in the fields of this near-Gem Carson City representative, highlighting somewhat the design features. Both sides yield a faint silver-gold cast, and are generally well struck. Some minor grazes preclude Gem classification, yet the coin exhibits nice overall appeal.(#7086)

## Lustrous 1879-CC Morgan, MS64

4454 **1879-CC MS64 PCGS.** The fully brilliant silver surfaces of this Choice Mint State piece are exceptionally free of blemishes for the grade. Both sides are sharply detailed with strong hair definition over the ear, and full breast feathers on the eagle. The luster is frosty and attractive, with slight reflectivity in the obverse field. Although PCGS has certified quite a number of these in MS64, only 91 submissions have received a higher grade (11/08).(#7086)

4455 **1879-CC Capped Die—Improperly Cleaned—NCS. AU Details.** VAM-3. A Top 100 Variety. A still appealing coin, nearly silver-white, despite the somewhat diffuse luster present. There are a few stray, sprinkled contact marks, none individually significant, that indicate a short stay in circulation long ago. Popular and in demand as the first of the Big Three CC-mint key Morgan dollars. (#7088)

### 1879-CC Capped Die Morgan, AU58

4456 **1879-CC Capped Die AU58 NGC.** VAM-3. A Top 100 Variety. Smoky golden and charcoal-gray patina passes over surfaces that are still mostly lustrous, with a few light abrasions in the obverse left field indicating a short stay in circulation. A nice choice for a Mint State set at a lesser price.(#7088)

### Uncirculated 1879-CC Dollar Capped Die, VAM-3, Top 100

4457 **1879-CC Capped Die MS61 PCGS.** VAM-3. A Top 100 Variety. Generally untoned, but glimpses of straw-gold visit the peripheries. A lustrous semi-key Carson City dollar with good eye appeal despite the moderate marks expected of the grade. Silver dollar specialists know the 'Capped Die' is actually a Medium over Small Mintmark, accompanied by die chips from a Mint attempt to conceal the undermintmark.(#7088)

### Lustrous 1879-CC Capped Die Morgan, MS62

4458 **1879-CC Capped Die MS62 PCGS.** VAM-3. A Top 100 Variety. A wonderful Mint State example, this 1879-CC Capped Die Morgan dollar has brilliant and frosty silver luster with few minor surface marks on either side. The so-called Capped Die variety is actually a doubled mintmark, where a Mint workman attempted to remove evidence of the first mintmark before adding the new mintmark. (#7088)

### Solid Capped Die 1879-CC Dollar, MS63

4459 **1879-CC Capped Die MS63 PCGS.** VAM-3. A Top 100 Variety. A lightly toned and lustrous key date Carson City dollar that has minimally abraded fields and a solid strike. Minor marks on the cheek account for the grade. The "Capped Die" is now recognized as a Medium CC over Small CC, although mint-made chipping removed most of the evidence of the Small CC.(#7088)

### Attractive 1879-O Morgan Dollar, MS65

4460 **1879-O MS65 PCGS.** Apparently a large percentage of the mintage of the 1879-O was paid out into circulation shortly after striking. High grade examples, and especially those with minimal abrasions, are extremely elusive, and the issue is decidedly rare in Gem condition. This brilliant coin has glowing mint luster and is well defined overall. The cheek of Liberty is especially clean, with a few minor abrasions and luster grazes in the left obverse field. (#7090)

### High-End 1879-O Morgan Dollar, MS65

4461 **1879-O MS65 PCGS.** The 1879-O is available in lower grades, but in the context of Morgan dollars, the date is rare at the Gem level. The present coin is sharply struck, with impressive mint luster and a minimum of handling marks. Excellent eye appeal makes this coin an appropriate choice for any high grade collection of Morgan dollars. (#7090)

## Pleasing 1879-O Dollar MS64 Deep Mirror Prooflike

4462 **1879-O MS64 Deep Mirror Prooflike NGC.** Both sides of this near-Gem are essentially color free, and exhibit pronounced contrast between deeply mirrored fields and mildly frosted devices. The design features are well impressed, including the central areas. Minor grazes preclude Gem status.(#97091)

## Gorgeous MS68 1879-S Dollar

4463 **1879-S MS68 NGC.** Sharply struck and shining with mint frost that is smooth and virtually unblemished. Liberty's cheek is clean, as is the rest of the coin; one must scrutinize each side to find even the most trivial of faults. Subtle peach blushes in the centers add color to the otherwise silver-white surfaces. Tied for numerically finest known to NGC or PCGS (11/08).
*From The Sanderson Family Collection.*(#7092)

## Exquisite 1879-S Dollar, MS68

4464 **1879-S MS68 PCGS.** The 1879-S comes in two major varieties. The 2nd Reverse Variety has a parallel top arrow feather, and the 3rd Reverse has a slanting top arrow feather. This exquisite MS68 coin is of the latter variety. Faint reddish-tan gravitates to the peripheries of this highly lustrous example, and an exacting strike imparts crisp delineation to the design elements. Immaculate preservation characterizes both sides. Population: 73 in 68, 0 finer (11/08).
*From The Arno Collection.*(#7092)

4465 **1879-S Reverse of 1878 MS64 PCGS.** Ex: Wayne Miller. A Top 100 Variety. A textbook example of this popular variant, fantastically lustrous with considerable flash to the fields. Sharply struck and minimally toned save for a touch of peach at the upper obverse rim. PCGS has graded 46 finer Reverse of 1878 examples (11/08).
*From The Arno Collection.*(#7094)

## Highly Lustrous 1880 Dollar, MS66

4466 **1880 MS66 PCGS.** Whispers of orange-gold, purple, and electric-blue patina cling to the margins of this highly lustrous Premium Gem, leaving the central areas brilliant. The design elements are well struck, except for softness in the hair over Liberty's ear. A few light grade-consistent marks do not detract from the coin's eye appeal. Population: 79 in 66, 0 finer (11/08).(#7096)

## Splendid 1880 Morgan Dollar, MS66

4467 **1880 MS66 PCGS.** The 1880 Morgan dollar is an available date, quite popular with type collectors. The present coin is fully struck, with outstanding mint luster. Hints of champagne toning enhance the obverse surfaces, while the reverse remains untoned. No coin has been certified finer at either NGC or PCGS.(#7096)

## Pleasing 1880 Morgan Dollar, MS66

4468 **1880 MS66 PCGS.** The 1880 was a massively produced issue with more than 12 million pieces struck. And yet, it is one of the great condition rarities among Philadelphia coins. This is an exceptionally pleasing and attractive piece that has bright, frosted surfaces. Just a bit of central striking softness is noted, typical of this issue. Brilliant throughout with none of the often-seen abrasions of this date. Population: 79 in 66, 0 finer (12/08).(#7096)

## Impressive MS66 Prooflike 1880 Dollar

4469 **1880 MS66 Prooflike NGC.** Excellent striking definition, particularly on the lightly frosted high points, with impressively reflective, essentially silver-white fields. Minimally marked with remarkable eye appeal. Among Prooflike coins, this is tied with six others for finest in the combined certified population (11/08).
*From The Sanderson Family Collection.*(#7097)

## Sharp 1880 Dollar MS66 Prooflike

4470 **1880 MS66 Prooflike PCGS.** Prooflike fields establish strong contrast with the mildly frosted motifs of this Premium Gem. Occasional wisps of cobalt-blue, purple, and golden-brown patina grace the peripheries, and the design features are well brought up. Some light grazes do not disturb. Housed in a green-label holder. Population: 2 in 66 Prooflike, 0 finer (12/08).(#7097)

## Appealing 1880-CC Dollar, MS66

4471 **1880-CC MS66 PCGS.** Hints of light tan-gray color make appearances on both sides of this Premium Gem, each of which displays partially prooflike fields. The design features exhibit the typical softness in the central areas. A few grade-consistent grazes do not disturb. Very difficult to obtain any finer.(#7100)

## Premium Gem 1880-CC Dollar, VAM-3A

4472 **1880-CC MS66 PCGS.** VAM-3A. Light die chips near the mintmark are reminiscent of the "Capped Die" 1879-CC VAM-3. Lustrous and lightly toned with a magnificently preserved obverse and only trivial reverse contact. The 1880-CC is significantly scarcer than its 1882-CC through 1884-CC successors. Struck from boldly clashed dies.(#7100)

## Lovely 1880-CC 8 Over High 7 Dollar MS66, VAM-5

4473 **1880-CC 8 Over High 7 MS66 PCGS.** Ex: Wayne Miller Collection. VAM-5. A Top 100 Variety. An obvious 8 over 7 variety with the crossbar, downstroke, base, and "horns" of the 7 visible. Hints of reddish-gold patina are barely visible on the upper obverse margin. Crisply struck and lovingly preserved. Population: 66 in 66, 5 finer (11/08).
*From The Arno Collection.*(#7102)

## Impressive 1880-CC Morgan Dollar 8 Over High 7, MS64 Deep Mirror Prooflike Slanted Arrow Feathers

4474 **1880-CC 8 Over High 7 MS64 Deep Mirror Prooflike PCGS.** VAM-5. A Top 100 Variety. The 1880-CC comes in two major varieties, the parallel arrow feather, and the slanted arrow feather. This piece is an example of the more available slanted arrow feather, with an estimated mintage of 466,000 pieces. This coin is also an overdate, with the remains of a 7 visible under the second 8 in the date. This coin is an attractive example, with deeply reflective fields. PCGS has awarded this specimen the coveted Deep Mirror Prooflike designation. Population: 20 in 64 DMPL, 7 finer (12/08). (#97103)

4475 **1880/79-CC Reverse of 1878 MS64 PCGS.** VAM-4. A Top 100 Variety. A lustrous and lightly abraded olive-gray near-Gem, housed in a green label holder. Struck from a left-over reverse die, probably early in the year before a new shipment of coinage dies arrived from Philadelphia.(#7108)

### Bold 1880/79-CC Dollar, Reverse of '78, MS65

4476 **1880/79-CC Reverse of 1878 MS65 PCGS.** VAM-4. A Top 100 Variety. The boldest of the overdated obverses is paired with a Reverse of 1878 die. This fully struck and highly appealing Gem offers incredible eye appeal with whispers of frost on the rose-inflected devices. Minimally toned otherwise. PCGS has certified 50 finer examples (1/08).(#7108)

4477 **1880-CC 8/7 Reverse of 1878 MS64 NGC.** VAM-7. Golden-brown freckles enrich the borders of this lustrous Choice Carson City dollar. The fields are gorgeously preserved, and only a subtle mark on the chin limits the grade.(#7110)

### Charming 1880-CC 8/7, Reverse of 1878 Dollar, MS66

4478 **1880-CC 8/7 Reverse of 1878 MS66 PCGS. CAC.** VAM-7, PCGS Number 7110; the holder states 7108 but this is misleading. What remains of the 7 is a dash below the second 8. This exquisitely detailed and impressively preserved Premium Gem is generally silver-white with glints of pink visible in the fields. On the reverse, a small abrasion affects the lower fletchings of the arrows. Housed in a green label holder. Population: 22 in 66, 2 finer (11/08).
*From The Sanderson Family Collection.*(#7110)

4479 **1880-O MS64 PCGS.** Micro O. Wisps of sun-gold patina visit the impeccably struck and lustrous Choice O-mint dollar. Marks are surprisingly few, and the value is excellent relative to the seldom seen Gems.(#7114)

4480 **1880-O MS64 PCGS.** Micro O. Bright and satiny, with essentially untoned surfaces that show trace amounts of milky gold color behind and just above Liberty's head. A few wispy marks keep it from a Gem holder.(#7114)

4481 **1880-O MS64 PCGS.** Subtle lavender and rose accents invigorate the otherwise pale silver-gray surfaces of this sharply struck Choice example. Impressive eye appeal despite a handful of scattered abrasions. PCGS has graded 21 finer examples (11/08). (#7114)

### Exquisite 1880-O Dollar MS64 Deep Mirror Prooflike

4482 **1880-O MS64 Deep Mirror Prooflike PCGS.** Ex: Wayne Miller Collection. Frosty devices stand out against the deeply mirrored fields of this near-Gem. A precise strike leaves crisp delineation on the design elements. This is an essentially color-free coin that is kept from Gem classification by a few inoffensive grazes and contact marks. Population: 38 in 64 Deep Mirror Prooflike, 1 finer (11/08).
*From The Arno Collection.*(#97115)

### Excellent 1880/79-O Dollar MS63 Deep Mirror Prooflike Micro 'O' Reverse, VAM-4

4483 **1880/79-O MS63 Deep Mirror Prooflike PCGS.** VAM-4. A Top 100 Variety. The New Orleans "crossbar overdate" obverse, paired with the "Micro O" reverse with tiny mintmark. Fantastically reflective with only occasional elements of tan, gold, and claret patina at the margins. Housed in a green label holder. Population: 8 in 63, 4 finer (12/08).(#97117)

### Marvelous 1880-S Morgan Dollar, MS68

4484 **1880-S MS68 NGC.** Among early dates, the 1880-S is the second most available Morgan dollar, trailing only the 1881-S. The coins are typically high quality, making the issue a favorite with type collectors. The present coin is a truly spectacular example, with marvelous mint luster and a fully detailed strike. Only nine coins have been certified finer at NGC and PCGS combined (12/08). (#7118)

## Remarkable MS68 1880-S Morgan

4485 **1880-S MS68 PCGS. CAC.** Ex: R. Dier Collection. Medium S. This virtually immaculate silver type coin has faint golden patina and dazzling cartwheel shimmer. The strike is sharp, with barely a hint of merging seen on the central breast feathers. Only a handful of examples have been certified finer.
*From The James Mossman Collection.*(#7118)

4486 **1880-S MS66 Prooflike NGC.** Fantastic flash and considerable reflectivity grace the essentially brilliant fields. Sharply struck central devices exhibit characteristically thick mint frost.(#7119)

4487 **1880-S MS67 Prooflike NGC.** Swirling cartwheel luster and stunning silver-white surfaces more than merit both the Superb Gem and Prooflike ratings assigned from NGC. Seldom seen finer, as NGC has certified only nine coins in MS68 Prooflike (12/08). (#7119)

## Condition Scarcity 1881 Dollar, MS66

4488 **1881 MS66 PCGS.** Ex: NFL Set. The 1881 is readily available through the near-Gem level of preservation. Gems can be located with patience and searching. Premium Gems are quite scarce, and higher-grade coins are rare. Brilliant surfaces display radiant luster, and exhibit sharply struck design elements. Both sides are devoid of significant abrasions. Population: 59 in 66, 2 finer (11/08).
*From The Arno Collection.*(#7124)

## Spectacular 1881 Dollar, MS66

4489 **1881 MS66 PCGS.** The 1881-P, like other early P-mint issues in the series, is elusive in Gem condition and scarce any finer. This creamy, lightly frosted example is not only expertly preserved for this issue, but it has a spectacular display of coppery-orange and pale blue toning over the obverse, as well as a fainter crescent of color at the upper part of the reverse. Population: 59 in 66, 2 finer (12/08). (#7124)

## Popular 1881 Morgan Dollar, MS66

4490 **1881 MS66 PCGS.** While the 1881 Morgan dollar is an available date in general, Premium Gems, such as the present coin, are challenging. The coin offered here is sharply struck, with crisp detail on all design elements. The surfaces are untoned and fully lustrous, with spectacular eye appeal. Only six coins have been certified finer by NGC and PCGS combined.(#7124)

## Lustrous 1881 Morgan Dollar, MS66

4491 **1881 MS66 PCGS.** This piece is sharply struck and remarkably lustrous, with outstanding eye appeal. While the date is fairly common in lower grades, Premium Gems with full luster can be challenging. This specimen would be a fine choice for a type set or a high grade Morgan dollar collection. Population: 59 in 66, 2 finer (12/08).(#7124)

## Singular MS66 Prooflike 1881 Dollar

4492 **1881 MS66 Prooflike NGC.** Well struck with substantially prooflike fields and beautiful pale ice-blue color in the fields. There are a few trivial luster grazes on each side, but these are inoffensive with none worthy of individual mention. Substantial frost graces the carefully preserved, crisply struck devices. The single highest-graded Prooflike example of this issue in the combined certified population (11/08).
*From The Sanderson Family Collection.*(#7125)

4493 **1881-CC MS65 ★ NGC.** VAM-2. Magnificent blushes of golden-brown, ocean-blue, and olive-gold dominate most of the reverse. The obverse is brilliant save for a peripheral wisp of lemon toning. Highly lustrous and meticulously struck with exemplary preservation. (#7126)

4494 **1881-CC MS66 PCGS.** A frosty and boldly struck Premium Gem with largely untoned, sparkling surfaces and outstanding eye appeal. A popular Carson City issue due to its low mintage and availability in quality Mint State.(#7126)

## Superb 1881-CC Morgan Dollar, MS67

4495 **1881-CC MS67 PCGS.** The 1881-CC Morgan dollar has a recorded mintage of 296,000 pieces, one of the smallest in the series. This fact, and the charismatic Carson City mintmark make the issue one of the most sought-after dates among Morgan dollar collectors. The present coin is a particularly desirable specimen, with sharply detailed devices complementing spectacular mint luster. Only six coins have been certified finer by NGC and PCGS combined. (#7126)

## Interesting VAM-2 1881-CC Dollar, MS67

4496 **1881-CC MS67 PCGS.** VAM-2, an interesting variety with die fill suggestive of repunching within the upper loops of the 8s. This precisely struck and well-preserved representative has vibrant luster and is completely brilliant throughout. Among the CC-mint issues, only the 1885-CC has a lower mintage.(#7126)

4497 **1881-CC MS64 Deep Mirror Prooflike NGC.** VAM-2. The magnificent field reflectivity and noticeable cameo contrast are certain to draw the attention of specialist bidders. Intricately struck and well preserved with pleasing peripheral sun-gold toning. (#97127)

## 1881-CC Dollar, MS65 Deep Mirror Prooflike

4498 **1881-CC MS65 Deep Mirror Prooflike PCGS.** VAM-2, R.4. The 88 in the date shows remnants of doubling within both upper loops. A thin die scratch between the upper arrow feather and the olive branch—as well as light doubling of STATES OF AMERICA—confirms the variety. The outstanding condition of this Gem makes attribution easier. Light golden toning over deep, watery fields. The frosty devices result in a pleasing cameo affect.(#97127)

4499 **1881-O MS65 PCGS.** Both sides offer strong detail and shining luster. While the obverse is minimally toned, the reverse shows ample swaths of gold-orange patina. PCGS has graded 12 finer pieces (11/08).(#7128)

## Striking MS66 1881-O Dollar

4500 **1881-O MS66 NGC.** Solid detail for the issue with only a hint of softness at the uppermost parts of the devices. Surfaces are remarkably untoned with only occasional hints of pale silver-gray patina. This Premium Gem is tied for numerically finest certified by NGC or PCGS and a condition rarity at this level (11/08). (#7128)

4501 **1881-S MS65 ★ NGC.** This interesting Gem has a highly prooflike obverse. The reverse is satiny, and features rich lilac and ocean-blue toning along with a narrow band of golden-brown. This toning pattern is commonly associated with coins at the end of a roll. Intricately struck and lightly abraded, with a faint fingerprint near the nose.(#7130)

## Amazing 1881-S Dollar, MS68

4502 **1881-S MS68 PCGS.** Fully struck and intensely lustrous, with amazingly well preserved surfaces that are nearly pristine. Tantalizing accents of pale gold occur near the obverse and reverse borders, and a couple of faint, milky beige streaks appear on the upper right quadrant of the reverse. The 1881-S is perhaps the most common of pre-1921 Morgan dollar issues, and several million pieces still survive in Uncirculated condition. At MS68, however, even the ubiquitous '81-S is scarce. Population: 84 in 68, 2 finer (12/08).(#7130)

## Vibrant MS68 1881-S Dollar

4503 **1881-S MS68 PCGS.** The 1881-S is a popular Morgan dollar, common in most grades, even reaching into the upper echelons of Mint State. While the 1881-S is a readily available type coin in MS67, at the MS68 level it becomes a worthy quarry without being so elusive as to continually frustrate the collector. This fantastically lustrous example has essentially brilliant fields with bold cartwheel luster. Decisively detailed central devices show whispers of frost on the high points.(#7130)

### Marvelous MS68 1881-S Silver Dollar

4504 **1881-S MS68 NGC.** The 1878 through 1882 S-mint Morgans are among the miracles of U.S. numismatics, coins that simply defied long odds to emerge as far and away finer than the most optimistic expectations. Clearly there were unheralded and now mostly forgotten Mint workers who ensured that the yearly productions were the extraordinary boon that they are today. This is one such product, with shimmering cartwheel luster, satin-smooth surfaces, and a bold strike that are further enhanced by loving post-strike preservation. Liberty's cheek is pristine, and the light gold, plum, and blue rim toning completes a marvelous package. Certified in an old-style NGC holder.(#7130)

### Blazing 1881-S Morgan Dollar, MS68

4505 **1881-S MS68 PCGS.** In *A Guide Book of Morgan Silver Dollars*, Q. David Bowers writes, "If you desire a single coin for a type set to illustrate the 1878 through 1921 Morgan dollar design, the 1881-S is an ideal candidate." The present coin is a spectacular example of this popular date. Fully struck, with luminous mint luster on both sides, this specimen has fantastic eye appeal. Population: 84 in 68, 2 finer (12/08).(#7130)

### Superlative 1881-S Morgan, MS68 ★

4506 **1881-S MS68 ★ NGC.** Cherry-red, lemon, lime-green, and sky-blue coloration endows the reverse, while the obverse is mostly untoned aside from a blush of peach toning near 2 o'clock. Crisply impressed, as customary for the 1881-S, and the sweeping satin luster locates only minor imperfections.(#7130)

4507 **1882 MS66 NGC.** Thick mint frost covers both sides of this essentially brilliant Premium Gem. Crisply struck on all of the design elements. The highly lustrous surfaces are remarkably preserved and free of distractions. NGC has only graded nine finer pieces, as of (12/08).(#7132)

4508 **1882 MS66 PCGS.** Ex: NFL Set. Softly frosted across the high points of the obverse with impressive luster in the fields. Generally pale pearl-gray with distinct pink and peach accents. PCGS has graded six finer pieces (11/08).
*From The Arno Collection.*(#7132)

4509 **1882 MS66 PCGS.** Hints of peach visit the obverse, while the reverse is nearly untoned. Both sides share a sharp strike and potent luster, as well as notable preservation. PCGS has graded just six finer pieces (11/08).(#7132)

4510 **1882 MS66 PCGS.** Immensely lustrous with a hint of pink as the only color on the otherwise silver-white surfaces. Boldly impressed devices are carefully preserved. PCGS has graded a mere six finer pieces (11/08).(#7132)

### Fantastic MS67 1882-CC Dollar

4511 **1882-CC MS67 NGC.** An astonishingly beautiful Carson City Morgan dollar, virtually untouched despite what must have been nearly a century in government storage. Delicate pink and ice-blue tints visit otherwise silver-white surfaces that are immensely lustrous. NGC has graded no numerically finer examples (11/08).
*From The Sanderson Family Collection.*(#7134)

4512 **1882-CC MS65 Deep Mirror Prooflike PCGS.** An absolutely reflective silver-white beauty, boldly detailed on the central devices. A tiny splash of patina is noted to the left of the chin, but this has little impact on the mirrors.(#97135)

### Sharp 1882-CC Dollar
### MS66 Deep Mirror Prooflike

4513 **1882-CC MS66 Deep Mirror Prooflike PCGS.** Ex: Jack Lee Collection. David Bowers (2006) indicates that Prooflike 1882-CC dollars are seen with frequency. Deep Mirror Prooflike examples in the higher numerical Mint State grades are much more difficult to locate. The deeply mirrored fields of this Premium Gem highlight the well struck motifs. Untoned surfaces are nicely preserved. Population: 60 in 66 Deep Mirror Prooflike, 1 finer (11/08).
*From The Arno Collection.*(#97135)

## Bright 1882-O Dollar, MS66

4514 **1882-O MS66 PCGS.** The 1882-O is common through near-Gem, Gems are more challenging, and finer-grade pieces are rare. Bright luster radiates from both sides of this Premium Gem example, each of which displays a light dusting of gold-tan patina, more so on the reverse margins. Well struck and nicely preserved. Population: 16 in 66, 3 finer (11/08).
*From The Arno Collection.*(#7136)

## Interesting 1882-O Morgan Dollar, MS64

4515 **1882-O/S MS64 PCGS.** In *A Guide Book Of Morgan Silver Dollars, 3rd Edition*, Q. David Bowers states that MS64 is the Optimal Collecting Grade for this issue, because specimens at the Gem level or above are nearly impossible to find. The present coin is fully lustrous and the mintmark undertype is easily detectable. Only a few scattered handling marks limit the grade.(#7138)

## Beautifully Toned 1882-O/S Morgan Dollar, MS64

4516 **1882-O/S MS64 NGC.** The present coin features lovely gold, lavender, and gunmetal-blue toning, with lustrous surfaces, and a full strike. MS64 is Bowers' Optimal Collecting Grade for this issue, because higher grades are prohibitively rare. Only 13 coins have been certified finer at both leading grading services combined. (#7138)

## Lightly Toned 1882-O/S Dollar MS64, VAM-4

4517 **1882-O/S MS64 PCGS.** VAM-4. A Top 100 Variety. Identified by parallel die polish lines within the confines of Liberty's ear, and by two short lines from the edge of Liberty's hair below the upper end of the cap band. A sharply struck and carefully preserved near-Gem, this specimen displays a lovely and rarely seen pinkish-gray color near the centers of each side. Some silver toning streaks travel diagonally across the middle of the obverse surface, from northeast to southwest. A small number of trivial abrasions limit the grade. (#7138)

## Desirable 1882-O/S VAM-4 Dollar, MS64

4518 **1882-O/S MS64 PCGS.** VAM-4. The recessed S under the O is characteristic of VAM-4, one of three different die varieties of the 1882-O/S mintmark variety. This brilliant specimen is just shy of the Gem category. It is well defined with frosty white luster and wispy toning. PCGS has only certified a single finer example (11/08). (#7138)

4519 **1882-S MS67 NGC. CAC.** Golden-orange, crimson-red, and turquoise-blue tones overlay the obverse in a rather mottled fashion, combined with a brilliant, untoned reverse. Both sides are fully struck up. Superior quality throughout.(#7140)

4520 **1882-S MS67 NGC.** The reverse is brilliant silver-white and somewhat prooflike, while the obverse is more frosty and shows a charming wash of pink-champagne patina. Swirling luster emanates from both sides of this pretty Superb Gem.
*From The Deb-Ann Collection.*(#7140)

## Spectacular MS68 1882-S Dollar

4521 **1882-S MS68 PCGS. CAC.** This popular S-mint issue, though not quite so available as its 1880-S and 1881-S counterparts, nonetheless enjoys immense popularity as a Morgan dollar type issue. This shining piece is essentially brilliant save for a hint of gold visible at the lower obverse rim. Population: 32 in 68, 0 finer (11/08).
*From The Sanderson Family Collection.*(#7140)

## Exquisite, Condition Scarcity 1882-S Dollar, MS68

4522 **1882-S MS68 PCGS.** The 1882-S is one of the most plentiful early Morgan dollars in Mint State, evidenced by the tens of thousands certified through Premium Gem. This issue is scarce to rare in the lofty grade of MS68, the grade of the current offering. Highly lustrous surfaces exhibit occasional whispers of champagne color at the margins, and are immaculately preserved. An attentive strike leaves exquisite definition on the design elements. Population: 32 in 68, 0 finer (11/08).
*From The Arno Collection.*(#7140)

4523 **1882-S MS65 Deep Mirror Prooflike PCGS.** Deeply mirrored fields and free of toning throughout. A few natural planchet laminations—realistically visible only with the aid of magnification—are observed above and below the obverse's E in E PLURIBUS UNUM and above MERI of AMERICA on the reverse. Under the same loupe, a couple of minor specks are noted in the left obverse field.(#97141)

## Well Struck 1883 Dollar, MS67

4524 **1883 MS67 PCGS.** Ex: NFL Set. This Superb Gem displays a somewhat better strike than often seen on coins of this date, especially on the eagle's breast. Whispers of light gray -tan patina reside on the highly lustrous, impeccably preserved surfaces. Population: 51 in 67, 3 finer (11/08).
*From The Arno Collection.*(#7142)

## Effulgent 1883 Dollar, MS67

4525 **1883 MS67 PCGS.** A common-date Morgan dollar in a scarce state of preservation. Amazingly clean surfaces and effulgent cartwheel luster define the Superb Gem grade. Untoned and well struck for the issue, which typically shows softness on the reverse and above Liberty's ear. Population: 51 in 67, 3 finer (12/08).(#7142)

## Outstanding Superb Gem 1883 Morgan

4526 **1883 MS67 NGC.** Intense mint frost illuminates the brilliant, ice-white surfaces of this outstanding example. Sharply struck and nearly immaculate. This Philadelphia Mint issue is quite common in lower grades, but Superb Gems are scarce.(#7142)

## Pleasing 1883-CC Dollar, MS67

4527 **1883-CC MS67 PCGS.** Ex: R. Dier Collection. A plethora of 1883-CC dollars are available through the Premium Gem level. The certified MS67 population drops significantly. A wisp or two of light tan color occurs on both sides, each of which displays partially prooflike fields. Sharply impressed, and nicely preserved. PCGS has graded a mere three examples finer, and NGC has seen none higher.
*From The Arno Collection.*(#7144)

## Lovely 1883-CC Morgan Dollar, MS67

4528 **1883-CC MS67 PCGS.** The 1883-CC Morgan dollar is one of the more available Carson City issues, making it an appropriate choice for type collectors. The present specimen is fully struck, with awe-inspiring mint luster. Only three coins have been certified finer at NGC and PCGS combined (12/08).(#7144)

4529 **1883-CC MS65 Deep Mirror Prooflike PCGS.** Distraction-free, watery fields define the grade and Deep Mirror Prooflike designation of this Gem dollar. A few delicate die breaks are noted about the obverse and reverse legends.(#97145)

## Exquisite Superb Gem 1883-O Dollar

4530 **1883-O MS67 NGC.** Remarkable detail, even on the often-weak fine details at the hair over Liberty's ear. The strongly lustrous surfaces are minimally toned, save for an arc of orange at the left reverse. This carefully preserved coin is tied for numerically finest certified by either NGC or PCGS (10/08).
*From The Sanderson Family Collection.*(#7146)

## Sharply Struck 1883-O Dollar, MS67

4531 **1883-O MS67 PCGS.** Ex: Bodway-Jack Lee-NFL Set. A solid strike leaves strong definition on the design features, including the centers, which are often weak on this issue. Lustrous surfaces reveal occasional hints of barely discernible light tan color, and are nicely preserved throughout. Population: 28 in 67, 0 finer (11/08).
*From The Arno Collection.*(#7146)

4532 **1883-S MS62 PCGS.** This issue becomes challenging in grades above MS62, making this pleasing specimen and attractive alternative for those seeking an Uncirculated piece without the substantial premium. Untoned save for a dapple of light amber coloration at the 7 o'clock obverse and 2 o'clock reverse rims. (#7148)

## Elusive 1883-S Morgan Dollar, MS63

4533 **1883-S MS63 NGC.** The 1883-S is a better date in the Morgan dollar series. In *A Guide Book of Morgan Silver Dollars*, Q. David Bowers notes "... the 1883-S is very difficult to find, especially at higher Mint State levels." The present coin is an attractive example, with a sharp strike and full mint luster. Scattered handling marks are consistent with the grade.(#7148)

## Lustrous 1883-S Morgan Dollar, MS64

4534 **1883-S MS64 PCGS.** Sharply struck and fully lustrous with no evidence of toning on either side. The surfaces are not pristine, however, the handling marks are not individually distracting, consistent with the grade. Overall eye appeal is excellent. This is a lovely example, and seldom seen any finer.(#7148)

## Scarce 1883-S Morgan, MS64

4535 **1883-S MS64 PCGS.** Although clearly less elusive than some other issues, such as the 1884-S, the '83-S is a scarce date Morgan dollar, especially in the higher Mint State grades. Indeed, PCGS has only certified 18 finer examples of this issue (11/08). The present specimen is highly lustrous with fully brilliant satin surfaces and excellent design details.(#7148)

## Pristine 1884 Dollar, MS67

4536 **1884 MS67 PCGS.** Ex: Jackson Hole Collection. This coin's chief attribute is its satiny luster, complementing near-pristine surfaces. Only a single abrasion is noted, on Liberty's chin. The surfaces are untoned, save for some dark toning flecks in the date area and a tiny arc of steel-blue coloration on the reverse above CA. If this were an 1884-S, it would be a half-million-dollar coin. As an 1884-P, it is one of 28 so graded at PCGS, with a single coin finer (11/08). (#7150)

## Shimmering 1884-CC Dollar, MS67

4537 **1884-CC MS67 PCGS. CAC.** VAM-9, R.4. A small dash under the second 8 in the date confirms the variety. A stunning coin that displays shimmering luster throughout, but also an undeniable semiprooflikeness when held at just the right angle. The resulting combination is a dazzling coin with intense eye appeal. Population: 54 in 67, 3 finer (12/08).(#7152)

## Fantastic 1884-CC Dollar MS67 Prooflike

4538 **1884-CC MS67 Prooflike NGC.** While the 1884-CC dollar is relatively common with a Prooflike finish, locating one in this lofty grade is extremely difficult. Both sides of this Superb Gem exhibit fantastic field-motif contrast, and are entirely color free. A well executed strike emboldens the design features, and the surfaces are immaculately preserved. Census: 6 in 67 Prooflike, 0 finer (12/08). (#7153)

## MS66 Deep Mirror Prooflike White on Black 1884-CC Morgan

4539 **1884-CC MS66 Deep Mirror Prooflike PCGS.** The snow-white devices have stunning depth of contrast with the darkly mirrored fields. A razor-sharp premium Gem that has a well preserved reverse and a couple of unimportant luster grazes on the portrait. PCGS has certified just three pieces finer as Deep Mirror Prooflike (11/08). *Ex: Dallas Signature (Heritage, 12/2005), lot 2376.*(#97153)

4540 **1884-O MS65 PCGS.** Mounted reverse-up in the holder, the better to display this coin's crazy-quilt of peach, gold, lime, teal, mauve, and orange patina. The well struck obverse of this Gem, by contrast, is minimally toned.(#7154)

## Condition Scarcity 1884-O Dollar, MS67

4541 **1884-O MS67 PCGS.** Ex: NFL Set. The 1884-O was minted in quantity (9,730,000 pieces), and examples are readily available today in all Mint Sate grades through MS65. Premium Gems become a bit more easier to locate, and MS67 specimens are very challenging. The finest certified '84-O is a PCGS MS68.

The radiantly lustrous surfaces of this Superb Gem display just a wisp or two of light gold color under magnification. Sharp definition characterizes the design features, including most of the detail in the hair over liberty's ear. A couple of inoffensive, grade-consistent marks do not disturb. Housed in a green label holder. Population: 53 in 67, 1 finer (11/08).
*From The Arno Collection.*(#7154)

4542 **1884-S AU58 PCGS. CAC.** An amazing example that shows a trace of high point rub beneath attractive gold toning. The underlying surfaces are lustrous and reflective.(#7156)

4543 **1884-S AU58 PCGS.** Both sides of this frosty near-Mint specimen are highly lustrous. The obverse has modest gold and violet toning while the reverse is lighter gold.(#7156)

4544 **1884-S AU58 PCGS.** Untoned surfaces retain considerable luster, and display sharply defined motifs. We note just a few minor marks. (#7156)

## Scarce VAM-8 1884-S Dollar, MS60

4545 **1884-S MS60 NGC.** VAM-8, R.5. The tops of an errant 18 are visible within the dentils below the first 8 of 1884. A die chip that resembles a short spike extends from Liberty's lower neck and a thin, barely discernible die break connects the point of the bust to the lower left base of the 1 in the date. Beyond the variety, this piece is pleasing for the assigned grade, with lustrous surfaces and relatively few surface distractions. Subtle russet toning on the obverse with an untoned reverse.(#7156)

## Colorful Superb Gem 1885 Morgan

4546 **1885 MS67 NGC. CAC.** Golden-brown and powder-blue bands grace the obverse border. The portrait and the reverse are close to brilliant. Exactingly struck, even on the eagle's breast and the hair above the ear. The fields are practically pristine, and Liberty's cheek has only trivial grazes.(#7158)

4547 **1885 MS67 PCGS.** Ex: NFL Set. This Superb Gem boasts lustrous surfaces with occasional golden toning near the margins, increasing the strong eye appeal of the piece. Well struck and nearly pristine, a great example of this Philadelphia Mint issue. Population: 70 in 67, 1 finer (11/08).
*From The Arno Collection.*(#7158)

4548 **1885 MS67 PCGS.** The lower-right obverse and upper-right reverse show thin crescents of sunset-orange patina, the only readily perceptible color on this otherwise virtually brilliant Superb Gem. PCGS has graded only one finer example (11/08).(#7158)

## Gorgeous 1885 Dollar, MS68

4549 **1885 MS68 NGC.** Both sides of this amazing piece are beautiful, but the sharp strike and powerful luster are the lone commonalities. The obverse is minimally toned save for a touch of gold-orange near the rims, while the reverse shows broad areas of champagne and peach toning with strikes of blue-green across the upper eagle. Census: 5 in 68, 0 finer (11/08).
*From The Sanderson Family Collection.*(#7158)

4550 **1885-CC MS65 PCGS.** A lustrous Gem with frosty surfaces beneath deep gold, rose, and iridescent toning. A low-mintage issue, the 1885-CC Morgan is usually encountered in Mint State grades, as nearly the entire mintage was stored for many decades in the Treasury vaults.(#7160)

4551 **1885-CC MS66 PCGS. CAC.** Gorgeous striking definition and undeniable eye appeal. This faintly toned silver-gray beauty offers amazing luster with whispers of frost across the highest parts of the devices. PCGS has graded 38 finer examples (11/08).(#7160)

4552 **1885-CC MS66 PCGS.** Subtle peach-tinged cloud-gray patina drapes much of the carefully preserved surfaces. This sharply struck Premium Gem displays powerful luster and winning eye appeal. (#7160)

## Superb Gem 1885-CC Morgan Dollar

4553 **1885-CC MS67 NGC.** This Superb Gem has a beautiful frosty sheen across each side, with faint accents of champagne over the icy-gray surfaces that further increase the coin's visual allure. Fully struck and exquisitely preserved, the piece only has a couple of unimportant marks, and none that distract the viewer. A few light toning streaks are noted on the reverse. This is a conditionally scarce representative, and nearly unimprovable in terms of overall quality. Census: 56 in 67, 5 finer (12/08).(#7160)

4554 **1885-CC MS64 Deep Mirror Prooflike PCGS.** Surprisingly clean considering the assigned grade. The fields are dark and deep, resulting in a light cameo contrast on both sides. A subdued beige tone covers both sides, although some would simply label this piece as "white."(#97161)

## Beautiful MS65 Deep Mirror Prooflike 1885-CC Dollar

4555 **1885-CC MS65 Deep Mirror Prooflike PCGS.** This is a gorgeous Gem with deep mirror fields that establish outstanding contrast with frosted, sharply struck design elements. Essentially untoned, except for a few speckles of milky-tan color scattered about. (#97161)

## Low-Mintage 1885-CC Dollar MS66 Deep Mirror Prooflike

4556 **1885-CC MS66 Deep Mirror Prooflike PCGS.** Ex: Flanagan Collection. The 1885-CC dollar is a low-mintage issue of 228,000 pieces. This Premium Gem displays untoned surfaces that yield strong field-motif variance. The design elements are sharply struck, save for minor softness in the obverse center. Devoid of significant contacts or grazes. Population: 40 in 66 Deep Mirror Prooflike, 2 finer (11/08).
*From The Arno Collection.*(#97161)

## Exceptional 1885-O Dollar, MS67

4557 **1885-O MS67 PCGS.** Ex: NFL Set. With more than 9 million pieces minted, the 1885-O is one of the most common Morgan dollars in Mint State. PCGS and NGC have certified tens of thousands through Premium Gem. The population takes a nosedive in Superb Gem. Sparkling luster graces the color free surfaces of this MS67 coin, and the design elements exhibit much better detail than usually seen, especially in the central areas. Both sides are impeccably preserved. PCGS has seen none finer. Encapsulated in a green-label holder.
*From The Arno Collection.*(#7162)

4558 **1885-O MS67 PCGS. CAC.** Strong, almost creamy luster with a hint of silver-gray patina that adds "seasoning" to each side. A marvelous Superb Gem, sharply struck and eminently appealing, and tied for the finest certified by PCGS (11/08).(#7162)

4559 **1885-O MS67 PCGS.** Delightfully lustrous with a creamy effect over the sharply struck, impeccably preserved central devices. This smooth Superb Gem is tied for numerically finest known to PCGS (11/08).(#7162)

## Wonderful MS68 1885-O Dollar

4560 **1885-O MS68 NGC.** Richly frosted central devices offer razor-sharp detail and impressive frost. The luster of the carefully preserved fields is powerful and dramatic for this often-mediocre O-mint issue. One of just nine MS68 coins graded by NGC, with none at that level known to PCGS and none finer (11/08).
*From The Sanderson Family Collection.*(#7162)

4561 **1885-O MS66 Deep Mirror Prooflike NGC.** This high-mintage issue was well produced, and tens of thousands of examples have been certified at the Gem and Premium Gem grade levels by NGC and PCGS. In Deep Mirror Prooflike condition, by contrast, there are only a few hundred graded at MS65 and MS66. This piece exhibits amazingly deep reflectivity in the fields. Well struck and nicely preserved, it only shows a few small marks on either side. (#97163)

4562 **1885-S MS65 PCGS.** Brightly lustrous with occasional suggestions of gold and peach peripheral toning. Sharply struck with fabulous eye appeal and few flaws. PCGS has graded 27 finer pieces (11/08).
*From The Arno Collection.*(#7164)

4563 **1885-S MS65 PCGS.** The silver-white surfaces of this immensely appealing Gem exhibit tremendous cartwheel flash in the fields. Typically well struck, as are most examples of this San Francisco Mint issue. Faint milkiness is noted on each side, and a reed mark on Liberty's cheek prevents an even loftier grade assessment. (#7164)

## Premium Gem 1885-S Morgan Dollar

4564 **1885-S MS66 PCGS.** After the dispersal of LaVere Redfield's holdings, this issue became relatively easy to acquire. However, that availability is generally limited to lower Uncirculated pieces with Gem and finer examples presenting a real challenge for collectors. This is a sufficiently struck, mostly brilliant coin that has just the slightest accent of peripheral golden color on each side. Liberty's cheek is uncommonly clean for this normally heavily abraded issue. Population: Population: 25 in 66, 2 finer (12/08).(#7164)

4565 **1886 MS67 PCGS.** A mostly brilliant Superb Gem with a light amount of antique-golden patina circling the borders on each side. Accents of cobalt-blue are seen at selected obverse locations. Fully defined and virtually unsurpassable in grade.(#7166)

4566 **1886 MS67 PCGS.** Elegant gold and orange peripheral shadings appear in thin bands near the rims, while the centers are essentially pale silver-gray. Crisply struck with noteworthy eye appeal and the carefully preserved surfaces demanded of the grade. PCGS has graded three finer pieces (11/08).
*From The Arno Collection.*(#7166)

4567 **1886 MS67 PCGS. CAC.** Rich, pleasing cartwheel luster. Even with the aid of a loupe, we do not find abrasions worthy of mention, as one would expect with an MS67 Morgan dollar. Clash marks—some quite bold—are observed on both sides of this CAC approved Superb Gem.(#7166)

4568 **1886 MS67 PCGS. CAC.** Decisively struck central devices are beautifully preserved, as are the smooth and shining fields. Essentially brilliant and undeniably appealing. PCGS has graded a mere three finer pieces (11/08).(#7166)

4569 **1886 Doubled Arrows MS67 NGC.** VAM-17. A Top 100 Variety. The arrows shafts and feathers of this doubled reverse die variety show slight doubling on the lower edge of that design element. This brilliant and sharply defined Superb Gem has satiny silver surfaces with a trace of pale gold toning.(#133904)

## Magnificent 1886 Dollar MS66 Deep Mirror Prooflike

4570 **1886 MS66 Deep Mirror Prooflike PCGS. CAC.** Whispers of sunset-gold patina make appearances on both sides of this Premium Gem, each of which exhibits exquisitely struck design elements that stand out against the deeply mirrored fields. Impeccably preserved, save for a few minor grazes. Population: 23 in 66 Deep Mirror Prooflike, 0 finer (12/08).(#97167)

## Toned 1886 Dollar, MS66 Deep Mirror Prooflike

4571 **1886 MS66 Deep Mirror Prooflike PCGS. CAC.** A stunningly beautiful Premium Gem dollar. Deeply mirrored fields grace both sides of this seemingly distraction-free exemplar. The obverse displays an even champagne hue whereas the reverse is richly toned throughout. Fiery sunset-orange iridescence occupies the upper and lower quadrants, with intense electric-blue and lavender coloration elsewhere. Population: 23 in 66, 0 finer (12/08).(#97167)

4572 **1886-O MS61 PCGS.** Well struck, fully lustrous, and only faintly toned. The reverse has the look of a finer grade, while the obverse has only distributed wispy grazes. Conditionally scarce in Mint State, and prohibitively rare as a Gem.(#7168)

4573 **1886-O MS61 NGC.** VAM-1A. A Top 100 Variety. One set of clashmarks inside the upper right portion of the wreath. The E in LIBERTY is dramatically clashed beneath the eagle's tail, but any Mint State 1886-O is desirable. Lustrous and nicely struck with nearly untoned surfaces and the expected faint grazes on the left obverse. MS63 examples of this scarce VAM variety are difficult to locate and valued accordingly.(#7168)

4574 **1886-O MS62 PCGS.** A brilliant Mint State example with bright silver luster, frosty surfaces, and traces of peripheral gold toning. Both sides have a few scattered marks that are consistent with the grade.(#7168)

4575 **1886-O MS62 PCGS.** This untoned piece is nicely struck and shows surprisingly few marks for the grade. An even, satiny sheen flows across both sides.(#7168)

## Condition Rarity 1886-O Morgan Dollar, MS63

4576 **1886-O MS63 PCGS.** In the 1970s, the 1886-O was regarded as the rarest Morgan dollar in strict Gem condition. Fast forward three decades, and it is still considered as such today, although MS63 examples are more available than such notable conditional rarities as the 1884-S, 1896-O, and 1901. This lustrous and lightly toned representative is sharply struck for the issue, and only a couple of faint facial marks determine the grade.(#7168)

## Amazing Near-Gem 1886-O Dollar

4577 **1886-O MS64 PCGS.** In terms of condition, the 1886-O is one of the most challenging issues within the Morgan dollar series. Price guides indicate that the 1886-O dollar increases 20-fold between the MS64 and MS65 levels—more than any other date between 1878 and 1921. This exemplar displays satiny luster and only a few scattered abrasions that are completely commensurate with the accurately assigned grade. The coloration is mostly silver-gray with a few light blushes of russet toning at the peripheries. Overall, the current offering represents an 1886-O dollar that is as good as it gets for those collectors not able to handle a six-figure price tag. (#7168)

## Gem 1886-S Morgan Dollar

4578 **1886-S MS65 PCGS.** A pleasing Gem that boasts dazzling luster and a good strike. The coin appears brilliant at first glance, but each side has traces of tan toning. Field marks are few and far between. This lower mintage issue is very scarce at the MS65 level. Encapsulated in an old green label holder.(#7170)

## Top 100 VAM-2 1886-S Dollar, MS65

4579 **1886-S MS65 PCGS. CAC.** VAM-2. PCGS did not acknowledge the Top 100 variety status on the label, although the attribution is unmistakable; the mintmark is boldly repunched and die chips are observed within the 6 of the date. Attractive cartwheel luster with a hint of semiprooflikeness in the fields. This untoned Gem dollar offers an interesting variety and ample eye appeal. As of (12/08), PCGS has certified only 33 pieces finer.(#7170)

## Toned 1886-S MS66 Dollar

4580 **1886-S MS66 PCGS.** Splashes of bluish-gray, orange-gold, and purple toning roll over the highly lustrous surfaces of this Premium Gem, and an attentive strike leaves relatively sharp definition on the design elements. Both faces are impeccably preserved. Up to 400,000 of the 750,000-piece mintage were probably melted under the Pittman Act (David Bowers, 2006).(#7170)

## MS66 1886-S/S Dollar, A Top 100 Variety

4581 **1886-S MS66 PCGS.** VAM-2. A Top 100 Variety, although not designated as such on the PCGS insert. The mintmark serifs are repunched and die chips are visible within the recesses of the 6 in the date. Lustrous and only faintly toned, with boldly struck and suitably smooth surfaces. A lower mintage issue rarely encountered in such a state of preservation. The PCGS *Population Report* has increased by only one example of this date in MS66 over the past few years—a strong indication of this issue's status as a condition scarcity. Population: 29 in 66, 4 finer (12/08).(#7170)

4582 **1887 MS62 ★ NGC.** Talk about a "technicolor dream coat!" A 10-mm diagonal band from 1 o'clock to 6 o'clock on the reverse cordons three distinct areas of toning. The band is mostly golden while the right sector comprises plum coloration. The balance of the reverse is bathed in a stunning array of sapphire, emerald, electric-blue and amber iridescence. The surfaces of this eye-appealing coin springs to life when viewed at various angles and is fully worthy of the ★ designation granted by NGC.(#7172)

4583 **1887 MS67 NGC.** A precisely struck and virtually brilliant Superb Gem with exceptionally mark-free surfaces. A magnificent example of this plentiful issue. NGC and PCGS combined have certified just three pieces finer (11/08).
*From The Sanderson Family Collection.*(#7172)

## MS67 1887 Dollar With Superior Luster Characteristics

4584 **1887 MS67 PCGS. CAC.** This could be a trick coin. Without looking at the insert or the mintmark ask a dollar expert which mint this was struck in. The answer would probably be Carson City. The luster is what leads one to this erroneous conclusion. It is bright and rolls around each side in a cartwheel manner, just as one would expect of a CC dollar. The surfaces are exceptionally clean also with no reportable marks on either side. The only "defect" is slight softness of detail in the centers. Population: 57 in 67, 1 finer (12/08).(#7172)

4585 **1887 MS67 PCGS.** Fantastic detail and luster. Occasional touches of gold-gray peripheral toning are present on the obverse, but the rest of the piece remains subtle pearl-silver. PCGS has graded only finer example (11/08).(#7172)

4586 **1887 MS67 PCGS.** VAM-12, Alligator Eye. A Top 100 Variety. Radiant luster and mark-free surfaces define the grade of this untoned Superb Gem. According to the PCGS *Population Report*, the majority of certified Alligator Eye dollars reside at the MS63 to MS64 level. Population: 2 in 67, 0 finer (12/08).(#133910)

## Exceptional, Condition Rarity 1887 Dollar MS67 Prooflike

4587 **1887 MS67 Prooflike PCGS.** Ex: PCGS Tour/NFL Set. David Bowers (2006) writes that: "In Mint State grades the 1887 is the commonest silver dollar dated prior to 1921. Millions survive." Prooflike coins, however, are a different matter. While a few hundred have been certified through MS65, higher-grade Prooflikes, such as the present Superb Gem, are rare. An attentive strike delivers virtually complete definition to the design features, an unusual characteristic for this issue. A trace or two of light tan color shows under magnification. Impeccably preserved throughout. Housed in a green-label holder. Population: 3 in 67 Prooflike, 0 finer (11/08).
*From The Arno Collection.*(#7173)

4588 **1887 MS66 Deep Mirror Prooflike NGC.** This is a relatively common issue in the Morgan dollar series, but Deep Mirror Prooflike examples are scarce; and none of the DMPLs graded as such by NGC and PCGS have been rated any higher than MS66. This piece is sharply struck and impressively preserved, with a lovely cameo effect produced by the combination of white frosted devices and dark, deep mirror fields. NGC Census: 12 in 66 DPL, 0 finer (11/08). (#97173)

## Pleasing 1887/6 Overdate Dollar, MS65

4589 **1887/6 MS65 PCGS.** VAM-2. A Top 100 Variety. A shining and pleasingly detailed representative of this popular overdated variant, generally bright silver with occasional glimpses of cloud-white and tan. The underdigit is faint to the sharp unaided eye but readily perceptible with magnification. PCGS has graded a mere seven finer examples (11/08).(#7174)

## Sharply Struck 1887-O Dollar, MS65

4590 **1887-O MS65 PCGS.** Two unusual characteristics seen on this coin are a stronger strike than usually seen in the centers, and bright semiprooflike fields. In fact, the striking details are almost complete on the reverse with just a touch of softness over the ear of Liberty. Brilliant throughout and showing no mentionable abrasions. (#7176)

## Shining Gem 1887-O Morgan

4591 **1887-O MS65 PCGS.** Shining silver-white with only the slightest trace of rose-orange over parts of the centers. Well struck for this O-mint issue, if softly detailed to a certain extent in the centers. PCGS has graded eight finer examples (11/08).(#7176)

## Pleasing 1887-O Gem Prooflike Dollar

4592 **1887-O MS65 Prooflike NGC. CAC.** Whispers of electric-blue, purple, and golden-brown patina cling to the marginal areas of this Gem, and its Prooflike fields establish mild variance with the devices. A better-than-average strike leaves strong definition on the design features, though the centers reveal minor softness. This is a well cared for coin. Census: 3 in 65 Prooflike, 2 finer (12/08). (#7177)

## Rare Prooflike MS66 1887-O Dollar

4593 **1887-O MS66 Prooflike NGC.** This is a dazzling, brilliant coin that has excellent reflectivity in the fields and smooth features on Liberty's cheek. Softly defined over the ear of Liberty, but the strike is above average for this usually weakly struck New Orleans issue. In MS66 Prooflike condition, this is one of only two certified as such by NGC (with none finer), and PCGS has only certified one in MS66 (again, none are finer) (11/08).
*Ex: Dr. Hoffnagle Collection of Morgan Dollars (Heritage, 1/2005), lot 30310, which realized $7,475.*
*From The Sanderson Family Collection.*(#7177)

4594 **1887-O MS64 Deep Mirror Prooflike PCGS.** Thickly frosted on the modestly abraded central devices with crisp detail. Powerful mirrors are minimally toned, save for arcs of reddish-orange on the obverse and a thin ring of salmon-pink around the reverse. PCGS has graded seven finer Deep Mirror Prooflike pieces (11/08). (#97177)

## Appealing 1887/6-O Dollar, MS64

4595 **1887/6-O MS64 PCGS.** VAM-3. A Top 100 Variety. The New Orleans overdate of 1887 is generally difficult to see without a magnifier, but this sharply detailed piece has fully visible overdate details. It is fully brilliant with frosty silver luster and exceptional eye appeal. Population: 91 in 64, 1 finer (12/08).(#7178)

### Sharp 1887-S Morgan, MS65

4596 **1887-S MS65 NGC.** This is a well-struck and attractive Gem example of this issue, like most of its ilk in Gem condition. The surfaces are untoned, and bountiful luster radiates from both sides. A few light roller marks on the lower jaw do not detract. NGC has certified only eight coins in higher grade (12/08).(#7180)

### Seductive 1887-S Morgan Dollar, MS65

4597 **1887-S MS65 PCGS.** The 1887-S is a relatively scarce date for a Morgan dollar, but it is not one of the difficult "stoppers." The present coin is a particularly attractive example, with a sharp strike and unbelievable mint luster. This date becomes extremely elusive above the Gem level. Population: 326 in 65, 19 finer (12/08). (#7180)

### Scintillating Gem 1887-S/S Dollar VAM-2, Top 100

4598 **1887-S/S MS65 PCGS.** VAM-2. A Top 100 Variety. A sharply struck Gem of this interesting repunched mintmark variety. Much of the initial mintmark remains within both loops of the prominent S. Delicate chestnut-gold toning visits this impressively unabraded high grade example.(#7180)

### Exceptional 1887-S Gem Dollar

4599 **1887-S MS65 PCGS.** Streaks of light tan-gold color are visible on the cheek, and dapples of the same color gravitate to the reverse margin. An attentive strike leaves better-than-average definition on the design features, evident by virtual completeness in the hair over Liberty's ear and the eagle's breast feathers, areas that are usually weak. Lustrous surfaces are minimally abraded.(#7180)

### Satiny 1887-S Dollar, MS65

4600 **1887-S MS65 PCGS.** A fully brilliant and attractive Gem with frosty silver devices and satiny fields, imparting a hint of contrast. San Francisco dollars from the late 1880s, beginning in 1885-S, fall into the condition rarity category, as they are generally available in lower Mint State grades, elusive in MS65, and nearly impossible any finer. For example, PCGS has certified just 20 finer examples of this date as of (1/08).(#7180)

### Shining MS66 1887-S Dollar

4601 **1887-S MS66 PCGS.** Razor-sharp striking definition with a subtle hint of frostiness that enlivens the central devices. Carefully preserved with essentially brilliant fields. This lower-mintage San Francisco issue is a condition rarity above the Gem level. Population: 20 in 66, 0 finer (11/08).
*From The Sanderson Family Collection.*(#7180)

### Bright 1887-S Dollar, MS66

4602 **1887-S MS66 PCGS.** The bright surfaces of this Premium Gem display semiprooflike fields, and are visited by hints of reddish and light gold color. A well directed strike results in somewhat better detail than ordinarily seen on this date, especially in the central areas. This is a nicely preserved specimen. Population: 20 in 66, 0 finer (11/08). *From The Arno Collection.*(#7180)

### Lustrous MS66 1887-S/S Dollar VAM-2, Top 100 Variety

4603 **1887-S/S MS66 PCGS.** VAM-2. A Top 100 Variety. The serif of a second mintmark is visible within the upper loop of the prominent S. A sizeable percentage of Uncirculated examples are VAM-2, but *any* 1887-S dollar in MS66 is highly desirable due to the issue's conditional rarity. This lovely Premium Gem has booming luster and peripheral golden-tan toning. Crisply struck and nicely preserved. (#7180)

4604 **1888 MS66 PCGS.** Ex: R. Dier. Excellent strike with correspon dingly pleasing luster. The generally silver-gray surfaces show only occasional hints of patina. PCGS has graded 11 finer examples (11/08).
*From The Arno Collection.*(#7182)

4605 **1888 MS66 PCGS. CAC.** Light dustings of cloud-white patina drape each side of this shining Premium Gem. Well struck save for a trace of softness on the pleasingly preserved central devices. PCGS has graded 11 finer pieces (11/08).(#7182)

### Superb 1888 Morgan Dollar

4606 **1888 MS67 NGC.** The 1888 Morgan dollar is an available date, and a favorite of type collectors. The present specimen is a magnificent example of this issue. The coin is fully struck, with exquisite detail on Liberty's hair and the eagle's breast. Full cartwheel mint luster is present on both sides. Only one coin has been certified finer at NGC and PCGS combined. Census: 41 in 67, 1 finer (12/08). (#7182)

### Exceptional 1888 Dollar, MS67

4607 **1888 MS67 PCGS.** Both the luster and the strike exhibit better-than-average qualities than ordinarily seen on this issue. A few wisps of very light tan color show up under magnification. Impeccably preserved throughout. Great overall eye appeal. Population: 11 in 67, 0 finer (12/08).(#7182)

### Famous 'Scarface' 1888-O Dollar VAM-1B, MS61

4608 **1888-O Scarface MS61 PCGS.** VAM-1B. A Top 100 Variety. A diagonal die break across the cheek immediately identifies this well known VAM variety. Per the *Top 100* guide, "VAM-1B is the most dramatic die break in the Morgan dollar series." VAM-1B also features a bearded eagle (from clash marks) and an obverse rim die break at 5:30. Lustrous with light gold toning and a typical strike at the centers. A thin horizontal mark is noted above IN GOD WE TRUST.

## 'Scarface' 1888-O Morgan, MS62

4609 **1888-O Scarface MS62 PCGS.** VAM-1B. A Top 100 Variety. The long die break across the cheek immediately diagnoses the variety. This piece has deep olive and bronze patina on each side that somewhat subdues the luster, but there are relatively few abrasions visible on either side of this well-known and sought-after Morgan dollar variant.(#7184)

4610 **1888-O MS66 PCGS.** Ex: Jack Lee/NFL Set. Marvelous strike and luster with excellent eye appeal. As well-preserved an 1888-O as a collector is ever likely to see, and tied for finest graded by PCGS (11/08).
*From The Arno Collection.*(#7184)

4611 **1888-O MS66 PCGS.** Impressively lustrous with substantially above-average detail for this New Orleans issue. Occasional gold and gray tints drape otherwise brilliant surfaces. Tied for finest graded by PCGS (11/08).(#7184)

4612 **1888-O MS66 PCGS.** Subtly gold-tinged on the obverse with an impressively lustrous and largely brilliant reverse. Excellent strike and preservation for the issue; this coin is tied for finest graded by PCGS (11/08).(#7184)

4613 **1888-O MS66 PCGS.** This vibrantly lustrous Premium Gem is tied for finest certified by PCGS (12/08). Crisply struck and essentially untoned with great eye appeal.(#7184)

## Exquisite Prooflike MS66 1888-O Morgan

4614 **1888-O MS66 Prooflike PCGS.** Round O. This essentially brilliant New Orleans dollar has dazzling luster and a remarkable unabraded appearance. Well struck despite its O-mint origin, with nearly full detail at the centers. Housed in a green label holder. Population: 8 in 66 Prooflike, 0 finer (11/08).
*From The Sanderson Family Collection.*(#7185)

## Gorgeous 1888-S Morgan Dollar, MS65

4615 **1888-S MS65 PCGS.** The 1888-S is an elusive issue in Gem quality, and virtually unavailable any finer. This lovely example has full frosty silver luster with attractive peripheral gold toning that is light on the obverse and deeper on the reverse. PCGS has only graded 20 finer submissions.(#7186)

## Better Date 1888-S Morgan Dollar, MS65

4616 **1888-S MS65 PCGS.** In the context of Morgan dollars, the 1888-S is a scarce date. The recorded mintage was only 657,000 pieces. This piece is a particularly attractive specimen, with full mint luster and a sharp strike. Eye appeal is outstanding, and handling marks are minimal. Population: 215 in 65, 20 finer (12/08).(#7186)

## Scarce 1888-S Dollar, MS66

4617 **1888-S MS66 PCGS.** Ex: California Collection. Whispers of lavender and electric-blue patina gravitate to the margins of this lovely Premium Gem. Both sides present semiprooflike fields, and each is nicely preserved. The design elements are generally well struck. This is a relatively scarce issue. Population: 18 in 66, 2 finer (11/08).
*From The Arno Collection.*(#7186)

## Richly Toned 1888-S Dollar, MS66

4618 **1888-S MS66 PCGS. CAC.** We have offered few MS66 examples of this issue, and for good reason. There are very few 1888-S dollars known in high grades. Liberty's cheek is smooth and unblemished. In fact, the only noticeable abrasions on this piece are located on the reverse, and they are light. Richly toned in varying shades of golden, rose, blue, and citrine on the obverse, the reverse shows a light, even golden patina. Population: 18 in 66, 2 finer (12/08).(#7186)

4619 **1889 MS66 PCGS.** The luminous surfaces of this lovely Premium Gem are essentially untoned, save for hints of yellow-gold color near the peripheries. Well struck and minimally marked. The 1889 business strike Morgan dollar issue was the largest of the series, except for the gargantuan emissions of 1921.(#7188)

4620 **1889-CC VF20 PCGS.** A picture-perfect VF example of this key-date Morgan dollar. The pleasing dove-gray surfaces show only normal wear with no distractions worthy of mention. Although available at this grade level, not all examples share the same degree of eye appeal. The current offering is aesthetically pleasing and will likely see spirited bidding on auction day.(#7190)

4621 **1889-CC—Improperly Cleaned—NCS. XF Details.** This pleasing piece is finer than the description suggests. While it does show evidence of careful cleaning, the surfaces retain considerable luster and the details seem closer to AU50 than to XF40.(#7190)

4622 **1889-CC—Rim Filed, Improperly Cleaned—NCS. XF Details.** Despite a past cleaning, this lightly abraded, modestly worn coin retains original luster at the silver-gray margins. Rim filing is difficult to detect within the holder, but a few visible bumps suggest why a former owner might have performed said filing.(#7190)

## Appealing XF40 1889-CC Dollar

4623 **1889-CC XF40 PCGS. CAC.** That fact that the 1889-CC dollar tends to double is value from one grade level the next makes this pleasing example even more appealing. The design devices retain traces of luster and a light rose hue blankets both sides. A CAC green label confirms the accurate grade assigned by PCGS.(#7190)

## Rare Date 1889-CC Morgan Dollar, XF45

4624 **1889-CC XF45 PCGS.** A most attractive specimen of the rarest Carson City Morgan dollar. Both sides exhibit even wear, with a scattering of abrasions consistent with the grade. The coin is sharply struck, with much original detail left on the devices. The surfaces have toned an attractive gunmetal-gray.(#7190)

## Morgan Dollar Key Date 1889-CC, AU Details

4625 **1889-CC—Rim Filed, Improperly Cleaned—NCS. AU Details.** This example is almost fully detailed, and both sides are free of severe marks. A minimal degree of wear exists on the highpoints. Tiny hairlines are noted in the fields, along with a slight degree of milkiness. An affordable, mildly impaired example of this important Morgan dollar key date.(#7190)

## Famous 1889-CC Dollar AU53

4626 **1889-CC AU53 PCGS.** Freckles of golden-brown toning adorn the peripheries of this briefly circulated key date Carson City dollar. Luster fills the borders and devices, and the bright surfaces are devoid of consequential contact. Thousands of collectors aspire to complete the run of CC-mint Morgans, and the 1889-CC dollar is the most formidable stopper.(#7190)

## Attractive 1889-CC Key-Date Dollar, Choice AU

4627 **1889-CC AU55 PCGS.** The 1889-CC is a key issue even in worn grades (David Bowers, 2006). This Choice AU example displays traces of luster in the protected areas. Light silver-gray surfaces show an occasional blush of light tan, and are minimally marked. This piece will fit comfortably into a high-grade Morgan collection. (#7190)

## Essentially Untoned 1889-CC Dollar, AU55

4628 **1889-CC AU55 PCGS. CAC.** Just the slightest evidence of friction is seen over the devices and in the more exposed areas of the fields. Still, generous portions of original mint luster remain around the devices. Silvery surfaces are essentially untoned, and exhibit a few minute marks on the obverse. The design elements are well defined except for weakness in the hair over Liberty's ear. A cost-cutting alternative for the serious Morgan Dollar collector in search of a suitable example of this prized Carson City issue.(#7190)

## Key Date 1889-CC Morgan Dollar, AU55

4629 **1889-CC AU55 PCGS.** From a small mintage of 350,000 pieces, the 1889-CC Morgan dollar is the most elusive Carson City date in the series. The present example is an attractive piece, with just a touch of wear on Liberty's hair keeping it from a Mint State grade. This specimen has reflective fields with a few visible hairlines and a minimum of abrasions. Eye appeal is outstanding for the grade. (#7190)

## Lustrous 1889-O Gem Dollar

4630 **1889-O MS65 PCGS.** Freckles of nearly indiscernible gray-tan color make occasional visits to both sides of this Gem O-mint representative. The strike is typical, in that the centers are softly impressed, but the luster is much better than ordinarily seen. Contact marks are few and far between, and are light.(#7192)

## Wonderful Gem 1889-O Morgan Dollar

4631 **1889-O MS65 PCGS.** Although it is a common issue from a mintage of nearly 12 million coins, the 1889-O is elusive in Gem grade. This piece is a remarkable Gem with frosty silver luster and only a trace of toning on either side. The surfaces are excellent and the strike is above average for a New Orleans issue. PCGS has only certified nine finer examples of this issue (12/08).(#7192)

4632 **1889-S MS65 NGC.** A flashy, impressively lustrous Gem representative of this lesser-known San Francisco issue, pleasingly detailed and attractive. NGC has graded only 24 numerically finer pieces (8/08).
*From The Calvin Collection.*(#7194)

4633 **1889-S MS65 PCGS.** Light silver-gray at the centers with deep, dusky patina across the rest of the surfaces. Green-gold is dominant, though elements of fuchsia are also present at the margins. Notably appealing patina.(#7194)

4634 **1889-S MS65 PCGS.** Gorgeously detailed with fantastic luster. This Gem has remarkable eye appeal for the grade, though a handful of small marks pepper the portrait near Liberty's hair. Housed in a green label holder.(#7194)

4635 **1889-S MS65 PCGS.** Excellent definition, particularly at the central hair and feathers, and a hint of frostiness graces the eagle's breast. Minimally toned and well-preserved, even by Gem standards. (#7194)

## Charming 1889-S Dollar, MS66

4636 **1889-S MS66 NGC.** The cheek of Liberty is smooth and problem-free, and each side shows a lovely mixture of champagne and lilac toning with strong underlying mint frost. Highly elusive so fine. This issue is commonly associated with the Redfield Hoard, but the overall quality and striking characteristics apparent here are inconsistent with those coins. Census: 24 in 66, 0 finer (11/08).
*From The Sanderson Family Collection.*(#7194)

## Crisply Defined 1889-S Dollar, MS66

4637 **1889-S MS66 PCGS.** Wisps of faint tan-gold color are occasionally visible on both sides of this Premium Gem. An exacting strike manifests itself in crisp delineation on the motifs, and the surfaces yield pleasing luster. A few minor grazes might preclude an even finer grade. Population: 60 in 66, 1 finer (12/08).(#7194)

## Charming 1889-S MS66 Dollar

4638 **1889-S MS66 PCGS.** Scintillating cartwheel luster is the hallmark of this fresh and pristine Morgan dollar. A light patina of rose and russet covers each side, but fails to diminish either the intense luster or the superlative eye appeal. Liberty's cheek is exceptionally clean, and the strike is generous save for a bit of flatness just above the ear. A beautiful coin. Population: 60 in 66, 1 finer (12/08). (#7194)

## Attractive 1890 Gem Dollar

4639 **1890 MS65 PCGS.** Ex: NFL Set. Silver-gray surfaces possess attractive luster, and exhibit well struck design elements, except for the typically-seen softness in the centers. A few minute marks are consistent with the grade designation. PCGS has seen just one piece finer, and NGC has certified three in higher grades.
*From The Arno Collection.*(#7196)

4640 **1890 MS65 PCGS.** Light golden-tan and orange patina appears intermittently across each side. A well-defined Gem with lovely luster beneath the toning. PCGS has graded just one finer example (11/08).(#7196)

## Scintillating 1890 Gem Dollar

4641 **1890 MS65 PCGS.** Scintillating luster across untoned surfaces. Without the aid of magnification we find no distractions worthy of mention. Overall, this specimen exhibits the qualities of a coin grading even finer. Astonishingly, as of (12/08) PCGS has certified only two 1890-P dollars finer—both at the MS66 level. (#7196)

## Delightful 1890 Dollar, MS66

4642 **1890 MS66 NGC.** Despite a mintage of over 16.8 million pieces, this Philadelphia is an extreme rarity above the Gem level, with just five pieces in the combined certified population at MS66 and none finer (11/08). This Premium Gem, one of four certified by NGC, is strongly lustrous and generally silver-white with just a touch of coral-pink over parts of the centers. Solidly struck around the centers, though a touch of softness visits the central portrait and the eagle's breast. Carefully preserved, as expected for the grade, with only trivial faults on the devices.
*From The Sanderson Family Collection.*(#7196)

4643 **1890-CC MS64 PCGS.** An outstanding near-Gem with frosty silver luster and lovely pale gold toning along the borders. A few scattered marks prevent a higher grade.(#7198)

### High-End 1890-CC Morgan Dollar, MS65

4644 **1890-CC MS65 NGC.** With a mintage of nearly 2.4 million coins, the 1890-CC dollar has a larger emission than any other CC-mint Morgan. It remains elusive at the Gem level and above, however. NGC has certified only two pieces finer than the present Gem example (12/08). This piece is brilliant throughout, and it shows the coruscating mint luster usually seen on Carson City coinage. (#7198)

### Desirable Gem 1890-CC Morgan

4645 **1890-CC MS65 PCGS.** VAM-3 with light repunching on the 90 in the date. This splendidly preserved Gem has dynamic luster and delicate chestnut-gold patina. The strike is attentive despite the usual slight blending of detail at the centers. PCGS and NGC combined have certified just 12 pieces finer (11/08).(#7198)

### Frosty Gem 1890-CC Dollar

4646 **1890-CC MS65 PCGS.** A very scarce date in full Gem condition. This coin has excellent eye appeal for a Morgan dollar. Particularly frosty on Liberty's hair and ear, although a small nick is found just below and behind her mouth. Obtaining an MS65 example of this date has always been a significant challenge for a date collector, and this is as nice an example as anyone could hope to obtain without a substantial increase in cost. In the past three years, only one additional 1890-CC dollar has been certified above the Gem level by PCGS, bringing the total to just nine pieces in MS66 and none finer (12/08).(#7198)

### Conditionally Rare 1890-CC Morgan, MS65

4647 **1890-CC MS65 PCGS.** A conditionally rare Morgan dollar issue, with only nine finer PCGS certified coins (12/08). Both sides have frosty silver luster that exhibits exceptional mint brilliance. The strike is bold with fully detailed design motifs on each side. A few tiny bagmarks are evident on the obverse, while the reverse, if graded separately, would qualify for a higher grade.(#7198)

### Appealing 1890-CC Morgan MS64 Deep Mirror Prooflike

4648 **1890-CC MS64 Deep Mirror Prooflike PCGS.** The fields are decidedly prooflike and extremely deep-mirrored on this silvery near-Gem piece, perhaps kept from Gem territory by a couple of scuffy contact marks in the left obverse field. The strike is somewhat light above the ear and on Liberty's high points, where faint roller marks appear under a loupe. A nonetheless appealing piece, with the reverse even nicer. PCGS has certified only 19 Deep Mirror Prooflikes finer (12/08).(#97199)

4649 **1890-O MS65 PCGS.** Aside from a touch of softness at the high points, this pearl-gray Gem is pleasingly detailed. Vibrant luster is wholly intact, and the eye appeal is strong. PCGS has certified 19 finer pieces (11/08).
*From The Arno Collection.*(#7200)

4650 **1890-O MS65 PCGS.** This New Orleans Mint issue is very common in grades between MS61 and MS64, but is surprisingly scarce at the Gem level of preservation. This is a flashy, brilliant example that features a smooth, clean cheek and minimal marks overall. Typically a bit weak on the hair detail just above Liberty's ear, but decisively struck otherwise.(#7200)

4651 **1890-O MS65 PCGS. CAC.** An attractive Gem, well-defined with strong luster on each side, though the similarities stop there. The obverse has rich, dappled gold-orange, green, fuchsia, and silver-gray patina, while the reverse shows only a few echoes of mustard-tan at the margins.(#7200)

4652 **1890-O MS65 PCGS.** A vibrant, wholly original example, typically softly struck in the centers and virtually untoned, with very few marks on either side. This issue is surprisingly scarce at the Gem grade level, considering how many thousands of coins are known at MS63 and MS64.(#7200)

### Outstanding 1890-O Morgan Dollar, MS66

4653 **1890-O MS66 NGC.** The 1890-O Morgan dollar is a common date, extremely popular with type collectors. The present coin is sharply struck in all areas, an issue Q. David Bowers cautions collectors about in *A Guide Book of Morgan Silver Dollars*. The extraordinary eye appeal of this specimen is further enhanced by the fully lustrous, untoned surfaces. Population: 19 in 66, 0 finer (12/08).(#7200)

### Exemplary 1890-O Dollar, MS66

4654 **1890-O MS66 PCGS.** Wayne Miller, in his *Morgan and Peace Dollar Textbook*, comments of the 1890-O dollar issue: "Gems with full strike and luster and minimum abrasions are still available, but not nearly so readily as in the past." His comment was written about Gem-quality examples in the early 1980s. Today, finding a certified Premium Gem 1890-O dollar is exceedingly challenging. Counting one Prooflike and one Deep Mirror Prooflike example, PCGS has certified 21 pieces at the MS66 level with none finer (11/08).(#7200)

### Shining MS66 Prooflike 1890-O Dollar

4655 **1890-O MS66 Prooflike NGC.** Both sides enjoy considerable reflectivity with only a hint of gold-white patina that leaves the mirrors essentially undimmed. The strike is sharp, and the devices offer ample frost. One of just two MS66 Prooflike pieces in the combined certified population, one each graded by NGC and PCGS, with no Prooflikes finer (11/08).
*From The Sanderson Family Collection*.(#7201)

4656 **1890-S MS65 PCGS. CAC.** Both sides of this satiny Gem have fully brilliant silver luster and impressive aesthetic appeal. The date is scarce at this grade level and elusive in any finer grade. (#7202)

### Premium Gem 1890-S Morgan Dollar

4657 **1890-S MS66 PCGS.** Commanding luster establishes the grade of this Premium Gem dollar. MS66 is the barrier for this issue. Those seeking a finer example have few from which to choose. For example, as of (12/08) PCGS has certified a mere six pieces finer than the current representative. Untoned save for a dapple of sepia coloration on Miss Liberty's hair and cap.(#7202)

### Near-Pristine 1890-S Dollar, MS66

4658 **1890-S MS66 PCGS.** Ex: Ray George Collection. A near-pristine, brilliant Premium Gem of this generally well-produced issue. Radiant cartwheel luster blasts forth from both sides, and the strike is bold, even on the hair over the ear. Liberty's cheek is free of all but the most trivial flaws. In sum, a remarkable example. PCGS has graded six finer pieces (12/08).(#7202)

### Highly Lustrous 1891 Gem Dollar

4659 **1891 MS65 PCGS.** This high-mintage issue of more than 8 million coins is readily available through the near-Gem level, after which there is a precipitous drop in the certified population. The deeply lustrous surfaces of this Gem example exhibit a better-than-average strike, including partial definition in the hair over Liberty's ear. Nearly untoned surfaces display just an occasional wisp of gold-tan color, and are well preserved for the designated grade. Population: 96 in 65, 3 finer (11/08).
*From The Arno Collection*.(#7204)

### Shining Gem 1891 Dollar

4660 **1891 MS65 PCGS.** A gleaming piece, mildly reflective with occasional wisps of cloud-white toning over otherwise brilliant silver surfaces. The well-defined and carefully preserved surfaces display considerable frostiness. Impressive eye appeal for the issue. Encased in an old green label holder. PCGS has certified three coins finer (11/08).(#7204)

### Gleaming 1891 Dollar, MS65

4661 **1891 MS65 PCGS.** Untoned, distraction-free surfaces that are reminiscent of a piece grading finer. The strike is bold for the issue, although we do note a touch of softness above Liberty's ear, as usual. Wayne Miller opined in his *Textbook* that "the 1891-P is rare in fully Gem condition." Population: 97 in 65, 3 finer (12/08). (#7204)

### Lustrous 1891 Morgan Dollar, MS65

4662 **1891 MS65 PCGS.** Abraded Mint State 1891 dollars are plentiful, but despite an emission of nearly 8.7 million pieces, this issue is surprisingly rare as a Gem. The present example easily meets the threshold of that coveted level, since the cartwheel luster is effusive and the surfaces are nearly void of contact. Sharply struck and lightly toned. Population: 97 in 65, 3 finer (12/08).(#7204)

4663 **1891-CC MS64 PCGS.** A lightly toned Carson City near-Gem that has exuberant luster and attractive preservation. Scarcer than the 1882-CC through 1884-CC issues.(#7206)

### Elusive 1891-CC Morgan Dollar, MS65

4664 **1891-CC MS65 ICG.** The 1891-CC is less available than Carson City issues from the mid-1880s, but it only becomes really elusive at the Gem level. The present coin is fully struck, which is sometimes a concern with this issue. The surfaces are fully lustrous, and eye appeal is excellent. A few handling marks on the cheek prevent a higher grade.(#7206)

### Pleasing Gem 1891-CC 'Spitting Eagle' VAM-3 Dollar

4665 **1891-CC MS65 ANACS.** VAM-3. A Top 100 Variety. The "Spitting Eagle," named for the die gouge visible to the left of the eagle. An attractive Gem representative of this popular variety, boldly executed with minimally toned centers. Peripheral patina ranges from barely perceptible gold-gray to orange.(#7206)

### High Grade 1891-CC Dollar, MS65

4666 **1891-CC MS65 PCGS.** According to Miller, fewer than 6,000 1891-CC dollars were included in the great Treasury hoard of the early 1960s. Apparently, most of those examples suffered from heavy bagmarks, as PCGS has certified only 45 pieces finer than MS65 as of (12/08), and all but two of those coins are at the MS66 level. (#7206)

## Spitting Eagle 1891-CC Morgan, MS65

4667 **1891-CC MS65 PCGS.** VAM-3. A Top 100 Variety. Delicate gold patina endows this lustrous and sharply struck Carson City Gem. A thin dash of dark gray toning on the right eagle's wing is of little concern, and the preservation is exemplary. VAM-3 is best known as the "Spitting Eagle" because of the die gouge beneath the beak, but the VAM also features a repunched mintmark.(#7206)

## Appealing 1891-CC Dollar MS63 Deep Mirror Prooflike

4668 **1891-CC MS63 Deep Mirror Prooflike PCGS.** Deeply mirrored fields accentuate the motifs on this Select Carson City representative. An impressive strike delivers relatively strong definition to the design elements. A few small contact marks scattered about limit the grade. Still, nice overall appeal.(#97207)

## Impressive Gem 1891-O Dollar

4669 **1891-O MS65 PCGS.** The obverse offers excellent detail, though the fine details of the eagle's breast are indistinct. Powerfully lustrous and minimally marked with occasional golden overtones visible near the rims. Essentially brilliant otherwise, and tied for the finest certified by PCGS (11/08).
*From The Sanderson Family Collection.*(#7208)

## Solid Gem 1891-O Morgan Dollar

4670 **1891-O MS65 PCGS.** Although the hair details over Liberty's ear and the eagle's breast feathers are not fully defined, both characteristics are much sharper than usually seen for the issue. The obverse and reverse surfaces of this Gem have frosty silver luster with attractive amber iridescent toning at the peripheries. As of (12/08), PCGS has yet to certify a single 1891-O dollar above the MS65 level.(#7208)

## Splendid Gem 1891-O Morgan

4671 **1891-O MS65 PCGS.** The splendid luster and lightly toned surfaces, with a touch of pink-champagne along the left borders of each side, contribute to the great appeal of this coin. While the strike on this strike-challenged issue is here only a bit above the norm, the relative absence of other distractions and the good overall surface preservation make this piece a keeper. PCGS has never certified a numerically finer example (12/08).(#7208)

## Lovely Gem 1892 Dollar

4672 **1892 MS65 ICG.** Impressively lustrous with minimal patina save for the occasional hint of cloud-white in the fields. The strike is solid overall, if a trifle soft at the uppermost parts of the obverse, and the general visual appeal is immense. A solid Gem example of this popular issue with just over 1 million pieces struck.
*From The Sanderson Family Collection.*(#7212)

## Toned 1892 Gem Dollar

4673 **1892 MS65 PCGS.** The highly lustrous surfaces of the present Gem display a medley of apple-green, crimson, grayish-brown, golden-orange, and forest-green on the obverse, while the reverse shows a thin layer of light greenish-yellow with orange-brown accents. Devoid of serious contact marks. Lightly struck in the centers, as often the case.(#7212)

## Desirable 1892 Morgan, MS65

4674 **1892 MS65 PCGS.** The 1892 silver dollars show wide variance in luster and strike, but on both counts, this desirable Gem trumps the norm. The central devices show excellent definition, and the essentially untoned fields offer powerful luster. Marvelous visual appeal in every respect. PCGS has certified a mere two finer pieces (12/08).(#7212)

## Brilliant Gem 1892 Morgan Dollar

4675 **1892 MS65 PCGS.** Slightly over one million silver dollars were minted in 1892 as production slowed during the mid-1890s. This splendid Gem has frosty silver luster with untoned surfaces and exceptional design definition. Only the hair over Liberty's ear shows slight weakness as usual. PCGS has only certified two finer examples of the date (11/08).(#7212)

## Well Struck, Condition Rarity 1892 Gem Prooflike Dollar

4676 **1892 MS65 Prooflike PCGS.** Ex: R. Dier Collection. The mirrored fields of the Gem offering in this lot highlight the motifs at certain angles. A well executed strike sharpens the design elements, including nearly full definition in the hair at Liberty's ear and on the eagle's breast feathers. This is a real plus for the coin, as most are poorly struck. Essentially color free, save for a light toning streak in the upper left obverse margin. Nicely preserved throughout. Population: 3 in 65 Prooflike, 0 finer (11/08).
*From The Arno Collection.*(#7213)

4677 **1892-CC MS61 NGC.** The mintmark is lightly repunched. A lustrous and lightly toned Uncirculated Carson City dollar with faint obverse grazes and a typical central strike. A much better date.
*From The Omaha Collection.*(#7214)

4678 **1892-CC MS62 ANACS.** A pleasing piece with gold and sunset-orange color near the obverse periphery. Well struck with satin luster and relatively few marks, for the grade. A scarce Carson City date for the Morgan dollar series.(#7214)

4679 **1892-CC MS63 ANACS.** This boldly detailed Select Mint State piece has satiny fields with frosty devices that create a pleasing contrast beneath subtle champagne toning.(#7214)

4680 **1892-CC MS63 PCGS.** This flashy scarce date CC-mint dollar has booming luster and only a wisp of golden toning. The reverse is nicely preserved, and the portrait has the expected number of delicate marks.(#7214)

4681 **1892-CC MS63 PCGS.** Delicate golden tints visit the obverse periphery, while the centers are either minimally toned or cloud-white. Well struck with light, scattered abrasions that are consistent with the Select grade.(#7214)

## Delicately Toned 1892-CC Dollar, MS64

4682 **1892-CC MS64 PCGS.** This attractive near-Gem possesses strong luster, and is toned light grayish-blue with greenish-yellow accents on the obverse, while the reverse displays a mixture of light green, orange-gold, and red. The design elements are adequately brought up, with just the typical minor softness in the centers. A nicely preserved coin.(#7214)

### Pleasing 1892-CC Dollar, MS64

4683 **1892-CC MS64 PCGS.** A lightly toned near-Gem with well defined features throughout. Both sides display a pleasing degree of semiprooflikeness in the fields. 1893-CC dollars become more challenging above the MS64 level and the popularity of this issue places further pressure on the limited supply.(#7214)

### Elusive 1892-CC Morgan Dollar, MS64

4684 **1892-CC MS64 PCGS.** This scarcer date Carson City dollar has dazzling luster and only a wisp of golden patina. The centers display a few faint roller marks, as made, but the strike is generally bold. Well preserved except for a thin mark on the field near the chin. Encapsulated in a green label holder.(#7214)

### Brilliant 1892-CC Morgan Dollar, MS64

4685 **1892-CC MS64 PCGS.** A remarkable example of the scarce 1892-CC Morgan dollar, with highly lustrous and frosty silver surfaces and few blemishes on either side. All of the obverse and reverse design motifs are boldly defined. Both dies show numerous peripheral die cracks on this late die state piece.(#7214)

### Exciting Gem 1892-CC Dollar

4686 **1892-CC MS65 PCGS. CAC.** Light tan toning visits the centers, but many would regard this lustrous Gem as brilliant. A good strike save for slight incompleteness on the eagle's breast and the hair above the ear. A scarce Carson City issue that was excluded from the GSA sales of the 1970s.
*From The James Mossman Collection.*(#7214)

### Well Struck 1892-O Dollar, MS65

4687 **1892-O MS65 PCGS.** This frosty Gem survivor is actually well struck for the 1892 New Orleans Mint issue. The surfaces are essentially untoned and quite lustrous, resulting in undeniable eye appeal. A minor luster break in the right obverse field is probably all that precludes an even higher grade designation. As of (12/08), PCGS has graded a mere five pieces finer than MS65. (#7216)

### Highly Lustrous MS65 1892-O Dollar

4688 **1892-O MS65 PCGS.** Though the 1892-O Morgan dollar is available in grades through Gem, anything finer is highly elusive, with just nine such pieces in the combined certified population (12/08). This strongly lustrous survivor offers pleasing overall detail, though the high points are a trifle soft, as expected. Pleasingly detailed with delicate, pale silver-white toning across most of each side.(#7216)

4689 **1892-S AU50 ICG.** Silvery surfaces reveal traces of luster in the recesses, and the design elements exhibit fairly sharp detail. The reverse is remarkably clean, while the obverse reveals a few minor marks.(#7218)

4690 **1892-S AU50 PCGS.** Light wear is concentrated in the centers, leaving the broad, minimally toned fields attractively lustrous. Abrasions on and near the portrait account for the grade. (#7218)

4691 **1892-S AU53 PCGS. CAC.** Briefly circulated, yet immensely lustrous beneath dappled gold-gray patina. Light wear is concentrated largely at the high points, and marks are wispy and scattered. (#7218)

4692 **1892-S AU53 PCGS. CAC.** An important key date in Mint State, the '92-S Morgan dollar is somewhat more available and therefore less expensive in circulated grades; although it is still elusive in AU. This piece is essentially untoned, with slight wear across the central highpoints and some wispy hairlines in the fields.(#7218)

## Nicely Defined 1892-S Dollar, AU55

4693 **1892-S AU55 NGC.** Both sides of this Choice AU S-mint example display bright silvery surfaces that retain luster in the recessed areas. Fairly strong detail is visible on the design features. An occasional light mark is noted, none of which seriously detracts. The '92-S is rare in Mint State grades.(#7218)

## Lustrous MS63 1893 Dollar

4694 **1893 MS63 PCGS.** A light layer of green-gold toning is seen over this essentially brilliant coin. The surfaces are moderately abraded on this softly lustrous, low-mintage dollar. The strike shows minor incompleteness on the hair above the ear, but the definition is stronger than seen on many pieces of this issue. Housed in an old green label holder.(#7220)

## Desirable 1893 Dollar, MS64

4695 **1893 MS64 PCGS.** Dabs of dusty-rose peripheral toning yield to effective brilliance in the centers. Strongly lustrous and well-defined, a great Choice example of this lower-mintage issue.(#7220)

## Bowers' Optimal Collecting Grade 1893 Dollar Attractive MS64

4696 **1893 MS64 PCGS.** With a small recorded mintage of 378,000 pieces, the 1893 Morgan dollar is a better date. Q. David Bowers says MS64 is the Optimal Collecting Grade for this issue. On the present coin, the canary-gold margins surround the cream-gray fields and devices. The reverse appears immaculate, since a couple of coarse roller marks beneath the eagle's belly are strictly of mint origin. (#7220)

## Well Struck 1893 Gem Dollar

4697 **1893 MS65 PCGS.** The fields of this 1893 Gem dollar are partially prooflike, especially on the reverse. Hints of light tan-gray color are occasionally seen, and a well directed strike manifests itself in strong definition on the design elements. Smooth surfaces are nicely preserved. Difficult to locate any finer; PCGS and NGC have seen a mere three higher-grade coins each.
*From The Arno Collection.*(#7220)

## Low Mintage 1893 Morgan Dollar, MS65

4698 **1893 MS65 NGC.** From a low mintage of 378,000 pieces, Mint State 1893 Morgan dollars are scarce in the context of the series. The present coin is fully struck and exhibits delightful, vibrant mint luster. Above the Gem level, this date is prohibitively rare, with only six coins certified by both leading grading services combined. Census: 72 in 65, 3 finer (12/08).(#7220)

## Gem 1893 Morgan Silver Dollar

4699 **1893 MS65 PCGS. CAC.** A frosty Gem, this 1893 Morgan dollar has full silver brilliance on both sides, with partial peripheral patina. A scarce low mintage issue, the 1893 garners considerable attention due in part to the fame of its branch mint cousins. It is the logical choice for the collector who seeks a single 1893 Morgan dollar for a date set. PCGS has only certified three finer examples of this issue. (#7220)

## Bright 1893-CC Dollar, AU58

4700 **1893-CC AU58 PCGS.** Bright silver surfaces show occasional blushes of grayish-tan color, and retain a generous amount of luster. The centers are relatively well struck up, considering this date is often weak in these areas. Both sides are quite clean for a coin that has seen brief circulation.(#7222)

## Important 1893-CC Morgan Dollar, MS62

4701 **1893-CC MS62 PCGS.** With a small mintage of 677,000 pieces, the 1893-CC Morgan dollar is a key date in the series. The present coin is lightly struck at the centers, as usually seen on this issue, with lustrous surfaces and some unobtrusive handling marks that define the grade. Eye appeal is above average for this tougher issue. (#7222)

## Pleasing Select 1893-CC Dollar

4702 **1893-CC MS63 PCGS.** A lovely Select representative of the last Carson City Morgan dollar issue, housed in a first-generation PCGS holder. The surfaces are generally silver-gray with russet toning around the peripheral devices, this effect being stronger on the reverse than the obverse. No individually mentionable abrasions. (#7222)

## Lovely 1893-CC Morgan, MS63

4703 **1893-CC MS63 PCGS.** Although the strike is typical, with considerable weakness over Liberty's ear and on the eagle's breast, all other aspects of this attractive Carson City Morgan dollar are clearly above average. The surfaces are fully brilliant with excellent luster, satiny in the fields and frosty on the devices. Both sides have few marks of any significance. And a first glance suggests eye appeal that is far finer than the grade suggests.(#7222)

### Lightly Toned 1893-CC Select Dollar

4704 **1893-CC MS63 NGC.** Golden-yellow color clings to the obverse of this Select Carson City representative, replaced on the reverse margins with electric-blue, purple, and golden-brown. Lustrous surfaces exhibit the usually-seen softness in the central areas. Some light marks occur over each side.(#7222)

### Resplendent 1893-CC Morgan, MS63

4705 **1893-CC MS63 PCGS.** At first glance, this lovely dollar has the aesthetic appeal of a Gem Mint State piece, although it is the considerable weakness noted at the centers on each side that prevents a much higher grade. The fields are satiny and reflective with excellent eye appeal.(#7222)

### Appealing 1893-CC Dollar, MS64

4706 **1893-CC MS64 PCGS.** This is a lovely Choice Mint State example with amazing eye appeal. Most examples of the 1893-CC dollar are heavily bagmarked, but this is a wonderful exception. Both sides have bright silver luster and are sharply struck. The obverse fields have a hint of reflective surface. PCGS has certified only nine pieces at the next grade level (12/08).(#7222)

### Elegant 1893-CC Dollar, MS64

4707 **1893-CC MS64 PCGS.** Coming at the end of Carson City's silver dollar dream, the 1893-CC is a challenging issue that was not saved in the same quantities as middle dates. As a result, better Mint State survivors from among the 677,000 pieces struck are elusive. This Choice coin is attentively struck with considerable frostiness on the rose-touched eagle. The surfaces are minimally toned otherwise with small, scattered ticks that account for the grade. PCGS has certified just nine coins finer (11/08).(#7222)

### Near-Gem 1893-CC Morgan Dollar

4708 **1893-CC MS64 PCGS.** The swan song of the Carson City Mint, the 1893-CC Morgans were unfortunately mostly bagmarked from being tossed around roughly. This piece shows few such mentionable abrasions, and the silver-gray and copper-orange mottled patina adds to its attractions. PCGS has certified only nine pieces finer—eight in MS65, one in MS66 (12/08).(#7222)

### Splendid Near-Gem 1893-CC Morgan Dollar

4709 **1893-CC MS64 PCGS.** In his 2004 book *The Official Red Book of Morgan Dollars*, Bowers notes that the 1893-CC dollars are well known for being extensively bagmarked, resulting in the majority of Mint State pieces being in lower MS grades. He states: "A piece MS63 or finer, with minimum bagmarks is a numismatic find and is very special." The Choice BU example we offer here has extremely well preserved surfaces including clean fields and a clean cheek. Each side is snow-white and completely untoned. The strike is the grade-limiting factor, being somewhat soft at the center of the obverse and reverse.(#7222)

4710 **1893-O—Improperly Cleaned—NCS. AU Details.** Lightly cleaned with considerable remaining luster on both sides. The central obverse and reverse design elements are extremely weak. (#7224)

### Attractive 1893-O Morgan, MS61

4711 **1893-O MS61 NGC.** An attractive, fully brilliant and lustrous Morgan dollar, with excellent surfaces for the grade. Both sides have satiny luster with slight weakness over Liberty's ear, but with the remaining definition boldly brought up by the dies. This date is always in demand, regardless of its quality.(#7224)

### Pleasing 1893-O Morgan Dollar, MS62

4712 **1893-O MS62 PCGS.** Glimpses of honey toning adorn the borders. The fields and devices are brilliant. Characteristic of this low mintage O-mint dollar, the centers are incompletely brought up, but the luster is unbroken and the reverse has the look of a finer grade. Encased in an old green label holder.(#7224)

### Desirable 1893-O Morgan, MS63

4713 **1893-O MS63 PCGS.** The 1893-O Morgan is an extremely important condition rarity in the series, seldom encountered in any Mint State grade. This example has satiny luster beneath pale champagne toning. Other than typical central weakness, the strike is bold. PCGS has only certified 95 finer examples of this issue. (#7224)

4714 **1893-S—Obverse Scratched—NCS. Good Details.** Well detailed for the grade with LIBERTY, the date, and the mint mark complete. A shallow scratch is noted across Liberty's cheekbone. An affordable light-to-charcoal-gray example of this key date.(#7226)

### Good 4 1893-S Morgan Dollar

4715 **1893-S Good 4 PCGS.** This coin will probably fill some collector's want list quite nicely, as a certified Good 4 example of this popular key-date issue. While only the deep detail remains on both sides, there are few abrasions noted, and the rims are still close to full on each side, with only a couple of letters of the Latin motto merging with the rim.(#7226)

### VF Details Key 1893-S Morgan

4716 **1893-S—Improperly Cleaned—NCS. VF Details.** This slate-gray key date dollar displays traces of its initial mint luster, although a mild cleaning has slightly subdued the surfaces. Both well-known diagnostics are clear; a die dot within the left foot of the R in LIBERTY, and a brief diagonal line inside the top of the upright of the neighboring T.(#7226)

### Series Key VF Sharpness 1893-S Dollar

4717 **1893-S—Improperly Cleaned—NCS. VF Details.** This coin has seen a rather harsh cleaning that leaves the surfaces unnaturally white and flat. A tiny rim is also noted at 9:30 on the obverse. The details grade is accurate, however, and while there are a couple of contact marks in the center obverse, the reverse shows few abrasions. (#7226)

## Choice Very Fine 1893-S Morgan

4718 **1893-S VF35 PCGS.** The surfaces are silver-gray in the centers, with charcoal-gray accents at the borders on both sides, but the details approach full XF on this nice key-date example. There are of course a few minor abrasions sprinkled around, none too distracting, and a couple of light rim marks are noted on the reverse, at 9:30 and 12:15.(#7226)

## Bright 1893-S Dollar, XF40

4719 **1893-S XF40 NGC.** Traces of luster reside in the protected areas of this key-date Morgan. Bright silver surfaces exhibit whispers of light gray. The design elements retain good detail, despite high-point wear. There are a few small marks, as expected for the grade designation.
*Ex: RARCOA (7/1986), lot 806.*
*From The Deb-Ann Collection.*(#7226)

## Original Toned 1893-S Morgan, XF45

4720 **1893-S XF45 ANACS.** This original dark gray piece, with deeper toning at the borders, enhancing the exceptional surfaces of this lightly circulated 1893-S Morgan dollar. The vast majority of survivors are impaired in some way, from light cleaning to heavy damage. Fortunately, this piece is the exception, and it is certainly destined to help complete some collector's Morgan set. (#7226)

## Desirable 1893-S Dollar, AU Details

4721 **1893-S—Improperly Cleaned—NCS. AU Details.** Fine hairlines are visible under high magnification, but do not unduly affect this coin's eye appeal. Whispers of apple-green and reddish-purple coloration cling to the rim areas of this AU Details example, and traces of luster reside in some of the protected areas. Both sides are minimally abraded. (#7226)

## AU Sharpness 1893-S Morgan

4722 **1893-S—Obverse Damage, Improperly Cleaned—NCS. AU Details.** A couple of deep gouges are seen on the obverse of this lightly cleaned key-date Morgan dollar: one in the left field before Liberty's eye, a second on her brow. The details grade is accurate, however, and the surfaces elsewhere retain much appeal. This coin might provide a tempting alternative for a high-grade set. (#7226)

4723 **1894 AU53 NGC.** Luminous and lightly circulated with silver-gray, rose, lavender, and green-gold shadings across much of each side. A few wispy abrasions have little influence on the eye appeal. (#7228)

## Choice AU 1894 Morgan Silver Dollar

4724 **1894 AU55 PCGS.** A well struck example of this scarce issue from the mid-1890s. Most of the original mint luster still remains and there is just a slight overlay of silver-gray color on each side. The 1894 ranks as the most desirable business strike Morgan dollar produced in Philadelphia.
*From The Dr. John L. Pellegrini Collection.*(#7228)

4725 **1894—Cleaned—ICG. MS60 Details.** Unworn with pleasing detail on the reverse, though the obverse shows slight softness. The silver-gray surfaces have a dulled appearance with scattered hairlines from a past cleaning.(#7228)

## Low-Mintage 1894 Dollar, MS61

4726 **1894 MS61 NGC.** Silver-gray surfaces yield soft luster, and an attentive strike delivers strong definition to the design elements, except that the hair above Liberty's ear is soft. A few minute contact marks are visible over each side. The 1894 is a low-mintage issue (110,000 pieces).(#7228)

## Fully Struck 1894 Dollar, MS61

4727 **1894 MS61 NGC.** The 1894 is one of the premier rarities in the Morgan dollar series in mint condition. Striking definition varies widely for this issue, from soft to complete detailing. This is one of the fully struck examples with complete hair over the ear of Liberty and full feather definition on the eagle. The luster is a bit thin, and the mostly brilliant surfaces show just a touch of light magenta toning.(#7228)

## Boldly Struck 1894 Dollar, MS61

4728 **1894 MS61 NGC.** This issue had the second-lowest circulation strike mintage of the entire series, at 110,000 pieces. Only the 1893-S business strike production of 100,000 coins was even smaller. This example is boldly struck with fine satin luster and typical marks for the grade, on the obverse. The reverse shows a partial layer of mottled green and tan patina, with a fingerprint fragment noted above the eagle's head.(#7228)

## Lustrous 1894 Dollar, MS63

4729 **1894 MS63 PCGS.** A key-date Philadelphia Mint issue, this 1894 is highly lustrous with frosty silver surfaces and no evidence of toning on either side. The strike is lacking only slightly at the center, with the hair over Liberty's ear and the eagle's breast feathers showing weakness. All other design features are bold and desirable. Only 110,000 silver dollars were coined in Philadelphia throughout the course of the year, and today survivors are seldom encountered outside of major numismatic auctions.(#7228)

4730 **1894-O MS61 NGC.** Nicely lustrous and untoned, with a smooth satin sheen in the fields. Somewhat softly struck on the central highpoints: especially on the eagle's breast feathers. The usual number of small abrasions are noted, for the grade.(#7230)

4731 **1894-O MS62 NGC.** Slightly soft on the hair detail above Liberty's ear, but reasonably bold on the eagle's breast feathers. Lustrous and untoned, with radiant stone-white surfaces. A shallow mark beside Liberty's eye, and another on the eagle's abdomen limit the grade. (#7230)

## Semi-Key 1894-O Dollar, MS63

4732 **1894-O MS63 PCGS.** In his silver dollar *Encyclopedia*, published in 1993, Bowers wrote: "In Mint State, the 1894-O is rare. In MS-65 grade only a few exist, and the issue is one of the prime landmarks in the Morgan series." This Select Uncirculated representative is highly lustrous, and only shows minor bagmarks that seem typical for the grade. Striking softness is noted on the hair detail just above Liberty's ear, and a splash of champagne toning appears on the upper left portion of the obverse.(#7230)

## Lustrous 1894-O Morgan Dollar, MS64

4733 **1894-O MS64 PCGS.** This is an attractive, silver-colored example of this date, one that is strike-challenged. The strike on this piece is about average, with softness over the ear and in the center eagle's breast. There are relatively few abrasions noted, however, save for a single tick on Liberty's midcheek. Abundant luster and eye appeal further enhance this coin's desirability.(#7230)

## Exceptional 1894-O Dollar, MS64

4734 **1894-O MS64 PCGS.** Ex: NFL Set. David Bowers (2008) says of the 1894-O dollar: "Mint State examples ... are often wretched in appearance." The basis for this comment is that the issue is chronically poorly struck with subpar luster. The current near-Gem, while not fully struck in the centers, displays pleasing bright luster. Moreover, fewer marks are seen than what might be expected for the grade designation. A hint or two of light gold color is visible on each side. An exceptional piece.
*From The Arno Collection.*(#7230)

## Conditionally Elusive Near-Gem 1894-O Morgan Dollar

4735 **1894-O MS64 PCGS.** Ex: Cajun Collection. An conditionally elusive issue this nice, and virtually unobtainable any finer, with just 13 Gems recognized as such by NGC and PCGS combined (12/08). This near-Gem is somewhat softly struck in the centers, with cream-gray surfaces that display slight, mottled russet-tan patina near the peripheries. Lightly abraded on the obverse.(#7230)

## Satiny, Lightly Toned MS65 1894-S Dollar

4736 **1894-S MS65 PCGS.** This is simply a splendid example of an issue that is usually well-made, lustrous, and attractive. The golden rim toning accentuates silver centers, and the strike is equally bold, if a trifle short of full. The surfaces are on the satiny side, and there are few contact marks of any significance. PCGS has certified only 11 coins finer (12/08).(#7232)

## Challenging Gem 1894-S Morgan Dollar

4737 **1894-S MS65 PCGS.** Aquamarine, tan, and cherry-pink shades enrich the borders of this crisply struck and satiny Gem. Both sides are surprisingly free from abrasions, and Liberty's cheek is particularly smooth. The low mintage 1894-S is collectible in MS62 through MS64 grades, but becomes a significant challenge at the MS65 level. (#7232)

## Lustrous Gem 1894-S Dollar

4738 **1894-S MS65 PCGS.** This piece offers superlative cartwheel luster over silver-white surfaces that are free of all but minute abrasions, with nary a hint of toning on either side. The only potential distraction are some faint roller marks, as made, that appear on Liberty's lower chin, and even those appear only with the aid of a loupe but are mentioned in the interest of complete disclosure. Nonetheless a charming and lustrous Gem that should appeal to the many lovers of untoned Morgans. PCGS has graded 11 pieces finer (12/08).(#7232)

4739 **1895-O AU55 PCGS.** Subtle licks of lemon-gold grace the margins, while the centers remain light silver-white. Just a trace of wear crosses the high points of this well struck Choice AU coin. (#7236)

## Desirable Near-Mint 1895-O Morgan Dollar

4740 **1895-O AU58 NGC.** One of the impossible show-stoppers in the Morgan dollar series in Mint State grades, the 1895-O dollar in the near-Mint State grade of the present piece makes a more than viable alternative for many Morgan dollar aficionados. In fact, even though Bowers *Guide Book of Morgan Silver Dollars* picks MS63 as his "Optimal Collecting Grade," that is a coin that is well into the five-figure range. For less-stout hearts, this lustrous, silver-gold, near-Uncirculated example should fill the bill nicely.(#7236)

## Near-Mint 1895-O Dollar

4741 **1895-O AU58 PCGS.** One of the semi-key dates in the Morgan dollar series, in a condition far above the usually encountered VG or Fine. This example has a nice strike, light even wear, and scattered trivial marks. It also retains a high degree of mint luster for the grade. Bright, untoned, and attractive.(#7236)

## Brilliant Near-Mint 1895-O Dollar

4742 **1895-O AU58 PCGS. CAC.** Only a slight trace of highpoint wear on the obverse separates this lovely near-Mint coin from others that are full Mint State. It has brilliant silver surfaces with frosty luster and only a slight number of tiny surface marks, certainly less than usual. Highly desirable and destined for an excellent Morgan dollar collection.(#7236)

4743 **1895-S XF45 PCGS.** Both sides of this lightly worn piece have dark champagne toning with deeper gold toning. A key-date that is elusive in any grade, yet it is the most easily obtained Morgan dollar bearing the 1895 date.(#7238)

## Appealing Near-Mint 1895-S Morgan

4744 **1895-S AU58 PCGS.** Only a mere whisper of circulation separates this stunning silver-white piece from Mint State, and almost all of the original radiance is still present. A couple of small roller marks appear on the lower cheek, but they fail to distract from the obvious appeal on this elusive issue.(#7238)

## Attractive 1895-S Morgan Dollar, AU58

4745 **1895-S AU58 NGC.** VAM-4. A Hot 100 Variety. The 'S over Horizontal S' blundered mintmark variety. Boldly detailed with strong prooflikeness in the fields; and essentially untoned, save for a bit of mottled russet patina in the upper left obverse field. There are no heavy or unsightly abrasions on either side of the piece, merely some wispy hairlines in the fields and a few small, scattered contact marks. An attractive near-Mint example of this scarce S-mint issue. (#7238)

## Attractive 1895-S Morgan Dollar, AU58

4746 **1895-S AU58 PCGS.** The 1895-S Morgan dollar has a mintage of just 400,000 pieces, small by the standards of this series. The present coin features lustrous surfaces and a sharp strike. Surface marks are minimal for this grade. Only the slightest friction on the hair over the ear prevents a Mint State grade for this attractive specimen. (#7238)

## Brilliant 1895-S Morgan, MS63

4747 **1895-S MS63 PCGS.** Although both sides have a few typical surface marks that are consistent with the grade, the overall eye appeal is usually associated with a much higher grade. This frosty and lustrous example has a hint of gold toning over brilliant silver surfaces. Only the hair over Liberty's ear is weak, with all other details sharply defined.(#7238)

## Exceptional 1895-S Dollar, MS64

4748 **1895-S MS64 PCGS. CAC.** Although the centers are a little weak, this amazing near-Gem Morgan has exceptional surfaces for the grade. It is an old-time "semi-prooflike" piece with reflective obverse and reverse surfaces that create slight cameo contrast. PCGS has only certified 28 finer pieces (12/08).(#7238)

## Quality MS67 1896 Dollar

4749 **1896 MS67 NGC.** Strongly lustrous with generally silver-white fields that show occasional glimpses of gray and champagne. Excellent strike and surface quality. Though this issue of nearly 10 million pieces is readily available in most Mint State grades, MS67 pieces are scarce and none finer appear in the combined certified population (11/08).
*From The Sanderson Family Collection.*(#7240)

## Exquisite 1896 Dollar, MS67

4750 **1896 MS67 PCGS.** Ex: NFL Set. Coruscating luster invigorates both sides of this Superb Gem, and an exacting strike manifests itself in bold delineation on the design elements, including the hair above Liberty's ear and the eagles breast feathers. Untoned surfaces are impeccably preserved. Encapsulated in a green-label holder. Population: 24 in 67, 0 finer (11/08).
*From The Arno Collection.*(#7240)

## Enchanting Superb Gem 1896 Dollar

4751 **1896 MS67 NGC.** Of the nearly 10 million pieces struck for this issue, the present survivor is tied for the finest extant, according to the combined certified population (11/08). Impressively lustrous surfaces show subtle pearl-gray toning with occasional hints of pink. Well-defined and pleasing.(#7240)

## Delightful 1896-O Dollar, MS61

4752 **1896-O MS61 PCGS.** The obverse shows luminous tan-gray shadings, while the reverse is close to brilliant. This O-mint Morgan issue is highly elusive in pleasing Mint State, and while the present example is softly struck with wispy, grade-defining abrasions, the overall visual appeal is rock-solid.(#7242)

## Appealing 1896-O Morgan Dollar, MS62

4753 **1896-O MS62 NGC.** To quote Wayne Miller, "No other Morgan dollar is as consistently deficient in luster, strike, and degree of surface abrasions as the 1896-O." The present offering is an important opportunity to acquire a specimen with a full strike, unbroken luster and a minimum number of handling marks for the grade.(#7242)

## Wonderful 1896-O Morgan, MS62

4754 **1896-O MS62 PCGS.** A fully brilliant example, this 1896-O has satiny silver luster with no evidence of toning on either side. The surfaces are exceptional for the grade, and the strike is well above average for the issue. This particular piece would easily fit the bill in an otherwise MS63 or MS64 collection.(#7242)

## Elusive 1896-S Morgan, MS63

4755 **1896-S MS63 PCGS.** This better date Morgan dollar has dazzling luster and a bold strike. The fields are well preserved, and the cheek has only minor contact. The mintage of the 1896-S is relatively close to the 1897-S, but due to the vagaries of distribution, the latter is many times more plentiful in Mint State.(#7244)

## Moderately Toned 1896-S Near-Gem Dollar

4756 **1896-S MS64 PCGS.** Soft orange-gold patination accented with sky-blue on the obverse cedes to splashes of deeper violet, green, sky-blue, and grayish-orange on the reverse. The design elements are generally well struck, save for often-seen minor softness in the center areas. Both sides exhibit nice luster, along with handful of minute marks that preclude Gem status.(#7244)

## Lovely Superb Gem 1897 Dollar

4757 **1897 MS67 NGC.** Sharply struck and striking, a paragon among 1897 dollars. The immensely lustrous surfaces shine beneath delicate lilac tints with a hint of gold that visits the rims. Powerful eye appeal for this issue of just over 2.8 million pieces. Tied for finest known to NGC or PCGS (11/08).
*From The Sanderson Family Collection.*(#7246)

## Highly Lustrous 1897 Superb Gem Dollar

4758 **1897 MS67 PCGS.** Ex: Jack Lee Collection. This Superb Gem displays excellent definition on the design features. Highly lustrous surfaces reveal just a touch or two of barely discernible color, and are devoid of mentionable contact marks. Population: 16 in 67, 0 finer (11/08).
*From The Arno Collection.*(#7246)

4759 **1897-O MS61 NGC.** With 4 million struck, one is tempted to call it a common date, but nearly all examples went into circulation, leaving few true Mint State coins like this one for collectors to acquire. Both sides of this fully brilliant, untoned Morgan dollar are sharply detailed with few marks for the grade.(#7248)

4760 **1897-O MS62 PCGS.** An impressive example of the scarce and popular 1897-O Morgan dollar that has frosty and lustrous surfaces with light gold toning along the borders.(#7248)

## Bright 1897-O Dollar, MS63

4761 **1897-O MS63 PCGS.** Scarce in Mint State, and especially so in the better grades from MS63 on up. This piece has bright, satiny luster and the striking details are almost complete, lacking only high point definition on the eagle's breast. Brilliant throughout, there are a few grade-consistent marks and a shallow planchet flaw at the end of the eagle's left (facing) wing.(#7248)

## Conditionally Rare 1897-O Morgan, MS63

4762 **1897-O MS63 PCGS.** An important condition rarity, the 1897-O is elusive in full Mint State grades. This Select piece is fully lustrous with frosty silver surfaces. Faint gold toning on the reverse seems to cover a few tiny areas of surface roughness, probably accounting for the grade. The strike is somewhat weak, especially over Liberty's ear. (#7248)

## Nearly Flawless MS67 1898 Dollar

4763 **1898 MS67 PCGS.** While the 1898 was one of many hoard coins dispersed by the Treasury Department through the 1950s, few are high grade such as this piece. The soft, frosted mint luster flows over each side uninterrupted by the abrasions normally encountered. The obverse is brilliant and the reverse displays a wide swath of pale golden color on the left portion of that side. Population: 24 in 67, 0 finer (12/08).(#7252)

## Sharp 1898 Dollar
## MS66 Deep Mirror Prooflike

4764 **1898 MS66 Deep Mirror Prooflike PCGS.** The 1898 is readily available in various Mint State grades. Deeply mirrored pieces at the Premium Gem level are more difficult to locate, however. An attentive strike sharpens the design elements, and traces of light tan color are visible under magnification. A nicely preserved piece. Population: 11 in 66 Deep Mirror Prooflike, 1 finer (11/08).
*From The Arno Collection.*(#97253)

4765 **1898-O MS67 NGC.** Gold-orange and champagne peripheral shadings cede to near-brilliance at the centers. Excellent striking definition and luster for this New Orleans issue. NGC has graded only one numerically finer example (11/08).(#7254)

## Extraordinary 1898-O Dollar, MS67

4766 **1898-O MS67 PCGS. CAC.** An extraordinarily smooth representative that is layered in golden-orange toning, save for a beacon of brilliance across the obverse. A precision strike manifests itself in strong delineation on the design features. Scarce combination of character and Superb quality. Housed in a green-label holder.(#7254)

4767 **1898-O MS67 PCGS. CAC.** Aside from trifling softness at the hair over Liberty's ear, this Superb Gem is surprisingly close to faultless. Minimally toned with an absolutely smooth cheek. Tied for finest graded by PCGS (11/08).(#7254)

4768 **1898-O MS67 PCGS.** Well struck with smooth, almost creamy luster that invigorates carefully preserved pearl-gray surfaces. Amazing quality for this O-mint issue, and tied for the finest graded by PCGS (11/08).(#7254)

4769 **1898-S MS65 PCGS.** Attractively detailed with uncommonly vibrant luster that shows certain prooflike elements. Carefully preserved, a captivating Gem housed in a green label holder. (#7256)

4770 **1898-S MS65 PCGS.** A well-defined and shining Gem, minimally toned in the centers with hints of cloud-white patina at the peripheries. The left reverse shows a tiny dot of deeper toning. (#7256)

## Crisply Defined 1898-S Dollar, MS66

4771 **1898-S MS66 PCGS.** Ex: NFL Set. The surfaces of this Premium Gem radiate satiny brilliance with a few hints of orange-gold color. Crisp striking definition is apparent on the design features, including virtual completeness in the centers, areas that are often weak. Both sides are smooth with a decided lack of abrasions. Population: 65 in 66, 2 finer (11/08).
*From The Arno Collection.*(#7256)

### Frosted, Sharply Struck 1898-S Dollar, MS66

4772 **1898-S MS66 PCGS.** Wisps of gold-tan color around the margins show under high magnification, and pleasing luster emanates from well-cared for surfaces. Strongly struck on each side, with only the characteristic minor softness is apparent on the hair over Liberty's ear. Population: 66 in 66, 2 finer (12/08).(#7256)

### Attractive MS66 1899 Morgan Dollar

4773 **1899 MS66 PCGS. CAC.** Any serious Morgan collector knows the mintage of the 1899 Philadelphia Mint issue, at 330,000 coins. Its low mintage has ensured its popularity, even though it is not a rarity except in the highest Mint State levels. This piece offers attractive silvery surfaces lightly tinged with gold, and there are few contact marks on either side. PCGS has certified only 17 examples finer (12/08).(#7258)

### Important 1899 Morgan, MS66

4774 **1899 MS66 PCGS.** Golden-brown and sea-green invigorate the peripheries of this lustrous and needle-sharp Premium Gem. The obverse field is particularly unabraded. Among Philadelphia Mint Morgan dollar issues, only the 1894 and 1895 have lower mintages than the 1899. PCGS has only certified 17 finer examples (12/08). (#7258)

### Amazing Superb Gem 1899 Dollar

4775 **1899 MS67 PCGS.** Delicate golden tints appear in vertical columns at the centers, while the immensely lustrous margins are pale silver-gray. A solidly struck representative of this often-underrated lower-mintage issue, one with under a third of a million pieces struck. Population: 17 in 67, 0 finer (11/08).
*From The Sanderson Family Collection.*(#7258)

### Condition Rarity 1899 Dollar, MS67

4776 **1899 MS67 PCGS.** Ex: Jack Lee. Despite its low mintage of 330,000 circulation strikes, the 1899 is plentiful in the lower to mid Mint State grades, as is evident from perusal of the PCGS/NGC population data. The present Superb Gem is an important condition rarity, with fewer than 20 examples in this grade seen by the two services, and none finer. A dusting of light grayish-tan color adheres to lustrous, impeccably preserved surfaces. The motifs are sharply impressed.
*From The Arno Collection.*(#7258)

### Memorable 1899-O Morgan Dollar, MS67

4777 **1899-O MS67 NGC.** This marvelous Superb Gem is tied with several dozen examples for the finest certified by NGC (12/08). Warm silver-pink and champagne toning graces the highly lustrous fields and solidly struck devices. Overall eye appeal is truly spectacular. Only one coin has been certified finer at PCGS and NGC combined.(#7260)

## Pleasing 1899-O MS67 Dollar

4778 **1899-O MS67 PCGS.** Ex: R. Dier Collection. Whispers of faint purple and tan-gold color make occasional visits to the margins of this lustrous Superb Gem. The design elements show nice definition, including the hair detail at Liberty's ear, and both sides are well preserved throughout. Population: 84 in 67, 1 finer (11/08).
*From The Arno Collection.*(#7260)

## Exquisite 1899-O Dollar, MS67

4779 **1899-O MS67 PCGS.** Radiant luster exudes from the surfaces of this lovely Superb Gem. The obverse features a melange of orange, green, gold, and violet hues, while orange, purple, and electric-blue are confined to the margins of the reverse. Sharply struck, and exquisitely preserved. Population: 84 in 67, 1 finer (12/08). (#7260)

## Splendid 1899-O Morgan, MS67

4780 **1899-O MS67 PCGS.** A lustrous and brilliant Superb Gem with impressive luster and exquisite surfaces. The centers are slightly soft in strike, while the often-weak bow of the wreath has excellent detail. By no means a rare issue, it would take an exhaustive search to find another any finer. Population: 84 in 67, 1 finer (12/08). (#7260)

4781 **1899-S MS65 PCGS.** A brilliant and lustrous Gem with frosty silver surfaces in a green-label PCGS holder. Traces of pale gold toning are splashed on each side.(#7262)

4782 **1899-S MS65 PCGS.** Completely untoned and brilliant across both sides. Well struck with minimal surfaces marks and great, flashy mint luster.(#7262)

4783 **1899-S MS65 PCGS.** Aside from trifling softness at the hair over Liberty's ear, this Gem is gorgeous with strongly reflective and watery fields, though no Prooflike designation is forthcoming on the green label holder. Minimally toned and gorgeous.(#7262)

4784 **1899-S MS65 PCGS.** Strongly struck with generally silver-white surfaces that show occasional hints of pale gold and blue. This is a noteworthy Gem for the collector keen on eye appeal. (#7262)

## Important 1899-S Dollar, MS66

4785 **1899-S MS66 PCGS.** An amazing Premium Gem with reflective obverse and reverse surfaces, fully white obverse brilliance, and faint traces of gold toning splashed on the reverse. Aside from typical weakness over the ear, the strike is exceptional for the issue. Population: 95 in 66, 8 finer (12/08).(#7262)

## Vibrant 1900 Dollar, MS67

4786 **1900 MS67 PCGS.** Ex: Jack Lee Collection. Vibrant luster radiates from the essentially untoned surfaces of this Superb Gem, and a well directed strike imparts relatively strong definition to the design features. Both sides are devoid of significant marks. Population: 17 in 67, 0 finer (11/08).
*From The Arno Collection.*(#7264)

4787 **1900-O MS66 PCGS.** R. Dier Collection. Essentially untoned with a well-executed strike on the central devices. Smooth fields are particularly worthy of the Premium Gem designation. PCGS has certified 29 finer pieces (11/08).
*From The Arno Collection.*(#7266)

## Impressive MS67 1900-O Dollar

4788 **1900-O MS67 PCGS.** Both sides offer impressive luster that shines through only slight layers of silver-gray patina. The strike is solid, particularly at the often-weak centers, and both the central devices and the fields show outstanding preservation for this New Orleans issue. Tied for numerically finest known to either NGC or PCGS (11/08).
*From The Sanderson Family Collection.*(#7266)

### Superb Gem 1900-O Morgan Dollar

4789 **1900-O MS67 NGC.** A lovely Superb Gem example of this available issue, one seldom, however, seen in so fine a grade. Splendid luster and near-pristine, silver-white surfaces complement the bold strike and over-the-top eye appeal. NGC and PCGS together have certified several dozen in this grade, but there are none finer (12/08). (#7266)

### Fully Struck 1900-O Morgan Dollar, MS67

4790 **1900-O MS67 NGC.** The 1900-O Morgan dollar is a fairly common date, but many Mint State examples have a flat strike. The present coin is fully struck, with crisp detail on all devices. The coin possesses extraordinary mint luster, as well as a high technical grade. Overall eye appeal is outstanding. Census: 56 in 67, 0 finer (12/08). (#7266)

### Lustrous MS67 1900-O Dollar

4791 **1900-O MS67 PCGS. CAC.** The 1900-O is an available and well-produced O-mint issue, but few indeed ever approach the Superb Gem grade. This MS67 piece boasts lovely silver-white toning with cherry and gold accents near the rim. The cartwheel luster is abundant, and neither side reveals more than the most minute abrasions. Population: 29 in 67, 0 finer (12/08).(#7266)

### Ebullient 1900-O Morgan, MS67

4792 **1900-O MS67 PCGS.** Even though many 1900-O Morgan dollars are well produced, there are relatively few that ever attain the Superb Gem ranking. This piece has silver-white surfaces on both sides that display the barest tinge of color. Liberty's cheek is remarkably pristine, as indeed the surfaces are throughout. Ebullient cartwheel luster completes the appeal. Population: 29 in 67, 0 finer (12/08). (#7266)

4793 **1900-O/CC MS65 PCGS.** VAM-12. A Top 100 Variety. A well struck and nearly brilliant piece with vibrant luster and uncommonly smooth surfaces. Among the five different O/CC reverse dies, VAM-12 features the most prominent undermintmark. The serifs and bases are evident for both Cs. A great Gem example of this popular variety.(#7268)

4794 **1900-O/CC MS65 PCGS.** The 1900-O/CC Morgan is sometimes collected along with the regular 1878 to 1893 series of Carson City Morgan dollars. Obviously an old reverse die, complete with CC mintmark, was sent to New Orleans for use several years later. In fact, the VAM reference shows seven different reverse dies that are all labeled O/CC. The present Gem is a remarkable, fully lustrous example that any collector would be proud to own.(#7268)

### Untoned, Lustrous 1900-O/CC Dollar MS66, VAM-8

4795 **1900-O/CC MS66 PCGS.** Ex: PCGS Tour/NFL Set. VAM-8. A Top 100 Variety. Remnants of the partially effaced CC mintmark are clearly visible under a glass. Essentially untoned, lustrous surfaces exhibit well struck design features. There are no marks worthy of individual mention. Population: 74 in 66, 2 finer (11/08). *From The Arno Collection.*(#7268)

## Pleasing 1900-S Dollar, MS66

4796 **1900-S MS66 PCGS.** Ex: Eliasberg. Effusive luster radiates from both sides of this Premium Gem S-mint, and each displays a few wisps of light tan-gold color. The design features are well struck throughout, and both faces are nicely preserved. Faint roller marks show on Liberty's portrait. Population: 91 in 66, 1 finer (11/08).
*From The Arno Collection.*(#7270)

## Satiny 1900-S Silver Dollar, MS66

4797 **1900-S MS66 PCGS.** A well-produced example, silver-white, of this generally nicely executed issue. Bounteous cartwheel luster emanates from both sides, and there are few mentionable marks on either side. (One diagonal scrape that appears to be on the eagle's upper breast is actually on the slab.) PCGS has graded only a single example finer (12/08).(#7270)

## Lovely 1900-S Morgan Silver Dollar, MS66

4798 **1900-S MS66 PCGS.** A gorgeous Premium Gem example of this S-mint dollar issue, with mildly reflective fields and only trivial obverse grazes that prevent an even higher grade. The coin is generally well struck, although the hair above Liberty's ear lacks definition. All S-mint dollars from the 1900s are scarce. Population: 91 in 66, 1 finer (12/08).(#7270)

4799 **1900-S MS65 Prooflike PCGS.** A boldly struck example of a scarcer date in the series. Brilliant and untoned with flashy reflectivity in the fields and a handful of small marks that are appropriate for the grade. Population: 24 in 65 Prooflike, 6 finer (11/08).(#7271)

## Elusive 1901 Morgan Dollar, MS61

4800 **1901 MS61 PCGS.** A solid Mint State example of this scarce Morgan dollar. This piece has bright satiny luster that is, thankfully, a departure from the often-seen drab-gray surfaces that typify most extant 1901 Morgans. Some russet color is noticed about the borders. There are numerous abrasions and marks on the obverse that account for the grade, but each side shows above-average definition. A coin that should be seriously considered by any Morgan dollar date collector.(#7272)

4801 **1901 Doubled Die Reverse XF45 ANACS.** VAM-3. A Top 100 Variety. This prominent doubled die, part of an already-elusive issue, is among the most sought-after VAM varieties. The present piece, housed in a pre-Amos Press ANACS holder, has light reddish-orange and pearl-gray patina overall. An abrasion is noted near the doubled tailfeathers.(#7302)

## Frosty Gem 1901-S Dollar

4802 **1901-S MS65 PCGS.** Although the 1901-S is relatively common in lower grades, the certified population drops rapidly above the MS64 level. PCGS has currently certified only 27 examples in higher grade (12/08). This piece displays frosty white surfaces that are essentially untoned. The design features are well brought up, though minor softness is noted in the hair overlying Liberty's ear. A few inconsequential marks on Liberty's cheek and neck are well within the parameters of the MS65 grade level.(#7276)

## Vibrant MS66 1901-S Dollar

4803 **1901-S MS66 PCGS.** With fewer than 2.3 million pieces struck, the 1901-S dollar is a challenging issue in most grades, and anything above the Gem level is a condition rarity. This delightful piece, minimally toned with only a few inoffensive luster grazes, offers shining surfaces and crisply detailed central devices. Population: 26 in 66, 1 finer (11/08).
*From The Sanderson Family Collection.*(#7276)

## Sharp MS66 1901-S Morgan Dollar

4804 **1901-S MS66 PCGS.** Apparently a large number of 1901-S dollars were released to the public in the early years of the 20th century. But MS66 and better examples are elusive. As with all Uncirculated 1901-S dollars, this piece has thick, frosted mint luster. But on this coin the surfaces are virtually unaffected by abrasions of any size, which allows the cartwheel luster to roll around each side unimpeded by the marks that usually plague this issue. This piece is brilliant throughout, with striking details strongly defined and almost bold enough to be considered fully struck. Population: 26 in 66, 1 finer (12/08).(#7276)

## Beautiful MS67 1902 Dollar

4805 **1902 MS67 PCGS.** A Superb Gem example of this popular 20th century Philadelphia Morgan dollar issue, which has a mintage of just under 8 million pieces. This piece has satiny silver luster with pale golden accents that visit the obverse and reverse borders. Housed in an older green-label PCGS holder. Population: 18 in 67, 0 finer (11/08).
*From The Sanderson Family Collection.*(#7278)

## Challenging 1902 Superb Gem Dollar

4806 **1902 MS67 PCGS.** Ex: NFL Set. The 1902 is common through MS65. Premium Gems are more difficult to locate, and anything finer is elusive. Hints of faint gold color reside in some of the peripheral areas, and potent luster emanates from both sides. Impeccably preserved surfaces exhibit sharply struck design elements. Population: 18 in 67, 0 finer (11/08).
*From The Arno Collection.*(#7278)

4807 **1902-O MS66 PCGS.** Ex: Bodway/NFL Set. A whisper of gold-gray patina visits the upper obverse of this otherwise minimally toned example. Boldly struck and beautifully preserved. PCGS has graded six finer pieces (11/08).
*From The Arno Collection.*(#7280)

## Striking MS67 1902-O Dollar

4808 **1902-O MS67 NGC.** Light golden overtones visit the obverse, while the reverse is generally silver-gray. A well-defined and captivating Superb Gem that sports immense luster and an uncommonly solid strike for this 20th century New Orleans issue. Neither NGC nor PCGS has graded a numerically finer representative (11/08).
*From The Sanderson Family Collection.*(#7280)

## Fantastic 1902-O Morgan Dollar, MS67 Rare So Fine

4809 **1902-O MS67 NGC.** Wayne Miller and Q. David Bowers both observe that 1902-O Morgan dollars are typically weakly struck, with muted luster. The present example is a rare exception to this rule, and it is exceptional ,indeed. This specimen is fully struck and exhibits fantastic mint luster to go with its high technical grade. This piece is simply on of the finest 1902-O Morgan dollars known. Census: 20 in 67, 0 finer (12/08).(#7280)

## Enchanting Gem 1902-S Dollar

4810 **1902-S MS65 PCGS.** "Centers" on each side are generally pale silver-gray, while outer areas show rich bands of blue, green, and gold-orange. An attractive 20th century Morgan dollar Gem, solidly struck for its San Francisco issue. PCGS has certified 31 numerically finer representatives (11/08).(#7282)

## Lustrous Gem 1902-S Morgan Dollar

4811 **1902-S MS65 PCGS. CAC.** Curiously, the 1902-S is a late date Morgan dollar that is almost as scarce in circulated grades as it is in the finer conditions of Mint State. Most Uncirculated examples had entered collectors' hands by the 1950s, after which time the issue's rarity has grown in appreciation among students of the Morgan dollar series. This piece is a solidly graded Gem; both sides are untoned, with pronounced frosted mint luster. Slight striking incompleteness in the centers is typical of the date, but smooth, minimally abraded features are definitely not. A coin for the most discriminating specialist.(#7282)

## Sharp Gem 1902-S Dollar

4812 **1902-S MS65 PCGS.** Satiny luster radiates from both sides of this splendid Gem, which offers silver-white surfaces with the merest touches of amber-gold near the rims. This piece is better-struck than most examples of the issue, and Liberty's cheek and most other areas are free of mentionable distractions.(#7282)

## Conditionally Scarce 1902-S Morgan Dollar, MS63 Prooflike

4813 **1902-S MS63 Prooflike NGC.** The light silver-gray surfaces are essentially free of toning, with a slight degree of cloudiness noted in the fields. Boldly struck with faint roller marks that extend across Liberty's ear and lower cheek. Scattered minor bagmarks on each side are no more than expected, for the MS63 grade level. The Prooflike designation is very rare for examples of this San Francisco Mint issue. Census: 19 in 63 Prooflike, 4 finer (11/08).(#7283)

## Stunning Superb Gem 1903 Dollar

4814 **1903 MS67 NGC.** The 20th century Morgan dollars can prove surprisingly challenging in the finer Mint State grades, and the 1903, though perhaps more available than some of its peers, is scarce in Superb Gem nonetheless. This well-defined coin, lightly toned cloud-white in dots over each side with a touch of ebony patina near the rims, is a sharply struck and carefully preserved survivor.
*From The Sanderson Family Collection.*(#7284)

## Well Struck 1903 Dollar, MS67

4815 **1903 MS67 PCGS.** Ex: Bodway-NFL Set. Barely discernible hints of yellow-gold color appear in localized areas of this radiantly lustrous Superb Gem, and an attentive strike leaves strong delineation on the motifs. A couple of grade-consistent, unobtrusive marks do not detract. Population: 61 in 67, 0 finer (11/08).
*From The Arno Collection.*(#7284)

## Lovely Superb Gem 1903 Morgan Dollar

4816 **1903 MS67 PCGS.** The 1903 Philadelphia issue is a well-made emission overall, and this piece is at the top of the pack of certified survivors. The silver-white surfaces are satiny with good luster, and Liberty's cheek is exceptionally smooth and pristine. A well-struck, lovely Superb Gem. Population: 63 in 67, 0 finer (12/08). (#7284)

## Amazing 1903 Morgan Dollar, MS67

4817 **1903 MS67 NGC.** This piece is exemplary in every way, with remarkably pristine, silvery surfaces that show a near-total lack of distractions, large or small. Radiant cartwheel luster careens around the surfaces, unimpeded by the slightest hint of toning. The strike on the eagle's breast is the only potential objection, for elsewhere the details are pleasingly articulated. Census: 85 in 67, 2 finer (12/08). (#7284)

## Vibrant MS67 1903-O Dollar

4818 **1903-O MS67 NGC.** A shining Superb Gem, generally pale silver-gray with a single streak of deeper color between the R and I of PLURIBUS. The strike is excellent, as is the eye appeal. With no numerically finer examples known to NGC or PCGS (11/08), this is a top-of-the-line New Orleans dollar.
*From The Sanderson Family Collection.*(#7286)

## Extraordinary 1903-O Dollar, MS67

4819 **1903-O MS67 PCGS.** PCGS Tour Coin. This was the representative coin for the 1903-O in the complete set of Morgan dollars that toured major coin shows in 1990-91. It is not only a sharply struck example with extraordinarily clean surfaces, but it is also the paradigm of originality with its smoky golden-rose toning that takes on a bit of translucent blue color around the margins. Housed in a green-label holder. Population: 58 in 67, 0 finer (11/08).
*From The Arno Collection.*(#7286)

## Desirable 1903-O Dollar, MS67

4820 **1903-O MS67 PCGS.** Before the massive release of silver dollars in the early 1960s, the 1903-O Morgan was a key rarity in the series. Prior to that time, the number of thousand coin bags of the date that were held in Treasury vaults was unknown. The total may have been as high as 300 bags, or 300,000 coins. Most were in lower Mint State grades, with only a few Gem survivors. This example is an amazing Superb Gem that exhibits brilliant mint frost with silver white surfaces. Population: 58 in 67, 0 finer (12/08).(#7286)

## Scarce 1903-S Morgan, MS61

4821 **1903-S MS61 ICG.** Close to the end of the Morgan dollar series, the San Francisco Mint produced few pieces, including about 1.2 million in 1903. This survivor is fully brilliant and lustrous with a trace of faint toning along the borders. The obverse and reverse surfaces are remarkably well preserved for the grade.(#7288)

## Lustrous 1903-S Morgan, MS62

4822 **1903-S MS62 NGC.** An important date from the early 20th century San Francisco coinage, the 1903-S is usually found in moderate to higher circulated grades, and seldom in Mint State grades. This piece, with a nice strike on both sides, has satiny silver luster with splashes of gold and iridescent toning.(#7288)

## Sharp 1903-S Morgan, MS63

4823 **1903-S MS63 PCGS.** The 1903-S is one of the lower mintage issues that is difficult to find in Mint State grades. A boldly defined and fully brilliant piece, this Morgan has satiny luster on the obverse and prooflike reflectivity on the reverse. Slight traces of pale gold toning can be seen on close inspection.(#7288)

## White Near-Gem 1903-S Dollar

4824 **1903-S MS64 PCGS.** The surfaces are blinding silver-white on this pretty near-Gem coin, an issue that is in demand and elusive in all Mint State grades. Considerable prooflikeness is present throughout, although unacknowledged at PCGS. A couple of tiny scrapes—only on Liberty's neck, one between the 0 and 3 in the date—are perhaps all that preclude an even finer grade.(#7288)

## Outstanding 1904 Morgan, MS65

4825 **1904 MS65 PCGS.** An inauspicious introduction to this issue is taken from Bowers' silver dollar book, page 2656: "The typically encountered 1904 dollar will win no awards for quality. Many have indifferent luster, and the striking is apt to be average (even after allowing for the normal feathers on the C-4 reverse)." However, that statement makes one appreciate just how special this Gem 1904 dollar really is. The mint luster on this piece is thick and satiny, unusually so for the issue. The striking definition is uncommonly strong also with prominent breast feathers on the eagle and above average detailing over Liberty's ear. Mostly brilliant, there is just a hint of golden toning present over the denticles on each side. (#7290)

## Brilliant Gem 1904 Morgan Dollar

4826 **1904 MS65 PCGS.** An extremely important date that is rarely seen in Gem quality, and almost never in the finer grades. PCGS has only certified 13 finer pieces (1/08). This Gem has brilliant and highly lustrous silver surfaces with a trace of faint gold toning on the obverse. PCGS has only certified 13 finer examples (12/08). (#7290)

## Popular 1904 Morgan Dollar, MS65

4827 **1904 MS65 PCGS.** Production of Morgan dollars was suspended for many years after 1904, and the typical coin of this date was poorly produced. Happily, the present coin is not typical in this respect, and represents one of the few really attractive specimens of this issue. The coin is sharply struck and fully lustrous, with pleasing golden accents at the periphery. Eye appeal is outstanding.(#7290)

## Captivating MS66 1904 Dollar

4828 **1904 MS66 NGC.** Morgan specialists know that the primary deterrents to finding high quality 1904-P dollars are drab luster and abundant abrasions. That is certainly not the case with this coin, however. The mint luster is soft and frosted but much thicker than usually seen on this issue. Minimally marked with special eye appeal, and tied for numerically finest known to NGC or PCGS (11/08). *From The Sanderson Family Collection.*(#7290)

## Charming 1904-O Dollar, MS67

4829 **1904-O MS67 PCGS.** When coinage of silver dollars stopped in 1904, New Orleans had struck slightly over 3.7 million pieces; they would be the last dollar coins struck by that Southern Mint. This Superb Gem is among the finest survivors, immensely lustrous and essentially silver-white with just a touch of peripheral patina. Population: 27 in 67, 0 finer (11/08).
*From The Sanderson Family Collection.*(#7292)

## Sumptuous Superb Gem 1904-O Dollar

4830 **1904-O MS67 NGC.** An amazing example of this final New Orleans dollar issue with frosty silver luster on both sides. This is one of the finest existing pieces from nearly 4 million coins that were originally struck. Both sides are fully brilliant with creamy white surfaces. Tied for numerically finest known to NGC or PCGS (11/08).(#7292)

## Satiny Superb Gem 1904-O Morgan Ex: Jackson Hole

4831 **1904-O MS67 PCGS.** Ex: Jackson Hole. This is an incredible 1904-O Morgan silver dollar, tied for finest certified by PCGS. This issue is seldom encountered in Superb Gem quality, despite its status as one of the five most common Morgan dollar issues. The satiny surfaces are fully brilliant and lustrous with only a trace of milky patina on each side. The fields, especially on the reverse, are slightly prooflike. Population: 27 in 67, 0 finer (12/08).
*Ex: Jackson Hole Collection, Dallas Signature Auction (Heritage, 4/2007), lot 115.*(#7292)

4832 **1904-O MS66 Prooflike PCGS.** Ex: NFL Set. Largely untoned with distinct reflectivity, though contrast is minimal as usual for this final-year O-mint Morgan dollar issue. Excellent preservation. Population: 56 in 66 Prooflike, 0 finer (11/08).
*From The Arno Collection.*(#7293)

## Lustrous 1904-S Select Dollar

4833 **1904-S MS63 ANACS.** Orange-gold, crimson, and aqua-blue patina concentrates around the obverse margin, but covers the entire reverse. Fully lustrous, and generally well struck, with just a tad of softness in the central areas. A scattering of small marks prevents the attainment of a higher grade.(#7294)

## Enchanting Choice 1904-S Dollar

4834 **1904-S MS64 PCGS.** This well struck Choice coin has strong luster as perhaps the only common ground between the sides. The obverse shows minimal central patina with glimpses of lemon-gold and orange at the margins, while deep sunset, blue-green, and mauve shadings drape the entire reverse. Charming eye appeal. (#7294)

## Radiant 1904-S Dollar, MS64

4835 **1904-S MS64 NGC.** This near-Gem S-mint representative displays dapples of barely discernible gold color on its radiantly lustrous surfaces. The design elements are relatively well struck, including partial definition in the hair over Liberty's ear. A scattering of minute marks precludes Gem classification.(#7294)

## Lovely 1904-S Morgan Dollar, MS64

4836 **1904-S MS64 PCGS.** Untoned with excellent sharpness in the centers for this late-date condition rarity. There are a few relatively minor abrasions on Liberty's nose and cheek, otherwise the bright, satiny surfaces are especially clean. Well defined but not quite full, with slight weakness limited to the central obverse and reverse. (#7294)

## Near-Gem 1904-S Dollar

4837 **1904-S MS64 PCGS.** An elusive and in-demand S-mint issue in the Morgan series, the 1904-S's demand far outstrips the available supply, particularly in the higher Mint State grades. This piece offers a copper-gold reverse with the same hues along the obverse rim, and a silver obverse center. Bountiful luster is present, and a few stray contact marks on the cheek determine the grade. The reverse is rotated clockwise a few degrees with respect to the obverse. A nice near-Gem.(#7294)

## Fabulous 1921 Morgan Dollar MS64 Deep Mirror Prooflike

4838 **1921 MS64 Deep Mirror Prooflike PCGS.** Ex: Wayne Miller Collection. The 1921 is the commonest of all Morgan dollars in Mint State. Prooflike, and especially Deep Mirror Prooflike examples, however, are considerably scarcer. This near-Gem DMPL specimen exhibits fabulous field-motif contrast. Moreover, a precision strike leaves exquisite definition on the design elements. A few minute contact marks preclude Gem status. Population: 6 in 64 Deep Mirror Prooflike, 1 finer (11/08).
*From The Arno Collection.*(#97297)

## Sharply Struck 1921 Dollar MS64 Deep Mirror Prooflike

4839 **1921 MS64 Deep Mirror Prooflike NGC.** While the typical 1921 Morgan dollar is poorly struck (David Bowers, 2006), this near-Gem is nicely detailed. This includes excellent definition in the hair over Liberty's ear, and fairly strong impressions on the eagle's breast. Untoned surfaces reveal just a few minute grade-defining marks. Census: 54 in 64 Deep Mirror Prooflike, 8 finer (12/08). (#97297)

## Excellent MS67 1921-D Dollar

4840 **1921-D MS67 NGC.** The beginning Morgan dollar issue struck at Denver was also the last, and few examples come so fine as this gorgeous Superb Gem. Rich, frosty luster dominates the silver-white surfaces. The strike is substantially above-average on the portrait, and the devices and fields are equally well-preserved. Census: 5 in 67, 1 finer (11/08).
*From The Sanderson Family Collection.*(#7298)

## Sharp, Lustrous 1921-S Dollar, MS66

4841 **1921-S MS66 NGC.** The 1921-S is an issue that was formerly little distinguished, if at all, from its P- and D-mint counterparts. In the last couple of decades, however, it has come to the fore as a condition rarity in the higher Mint State grades. This satiny piece has splendid surfaces with plum and gold accents near the rims. A sharp and pleasing Premium Gem.(#7300)

# PROOF MORGAN DOLLARS

## 1878 Reverse of 1878 Dollar, PR64 Cameo

4842 **1878 7TF Reverse of 1878 PR64 Cameo PCGS.** Only 200 proofs were officially struck of the Second Reverse dollars (with concave breast). All were apparently produced on March 26, 1878; however, Bowers believes the number of extant proofs indicates that there may have been another striking period. The fields are unfathomably deep on this lovely proof and the devices noticeably frosted, which yields strong cameo contrast on each side of this impressive proof. Brilliant throughout and problem-free. Population: 4 in 64 Cameo, 1 finer (12/08).
*From The Good Morgan Sunshine #3 PCGS Registry Set of Proof Morgan Dollars.*(#87312)

## Beautiful Choice Cameo Proof 1882 Dollar

4843 **1882 PR64 Cameo PCGS.** This is a beautiful, highly reflective proof, white with just the slightest hint of gold toning at the peripheries. The contrast between the mirrored fields and frosted devices is full, although apparently just short of meriting a Deep Cameo designation. Surface marks are of only minor importance, as is a planchet impurity near Liberty's mouth.
*From The Findley Collection.*(#87317)

## Champagne-Toned 1882 Dollar, PR66 Cameo

4844 **1882 PR66 Cameo NGC.** An attractive Premium Gem exemplar from this popular early Morgan dollar issue, boldly struck with light champagne and orange patina that shows subtle haziness over parts of the fields. Despite the toning, the coin offers distinct contrast between the moderately frosted devices and the powerful mirrors. Immensely appealing. Census: 13 in 66 Cameo, 13 finer (12/08). (#87317)

## Impressive Cameo PR66 1883 Morgan Dollar

4845 **1883 PR66 Cameo PCGS.** The 1883 is one of the better produced early Morgans in proof format. It is also one of the more available dates with a production run of 1,039 pieces. All proofs are from a single die pairing that shows a "wart" on the cheek of Liberty (actually a small pit mark in the die). This piece is brilliant throughout and has bright, frosted devices that contrast sharply against the illimitable depth of reflectivity in the fields. Population: 5 in 66 Cameo, 0 finer (12/08).
*From The Good Morgan Sunshine #3 PCGS Registry Set of Proof Morgan Dollars.*(#87318)

## Wonderful 1884 Dollar PR66 Cameo

4846 **1884 PR66 Cameo NGC.** Wonderfully preserved with just a hint of rose-gray and golden patina seen at the margins. The fragile fields are deeply reflective and there is a significant amount of frost on the devices which creates a strong cameo contrast on each side. Census: 13 in 66 Cameo, 10 finer (12/08).(#87319)

## 1885 PR66 Cameo Dollar Ex: JFS Collection

4847 **1885 PR66 Cameo PCGS.** JFS Collection. This is a lovely Premium Gem, with full, undisputed Cameo contrast on obverse and reverse alike. Both sides are fully detailed over even the highest points of the design. Richly frosted, the devices contrast against the deep, glassy fields. We can find no mentionable hairlines, and a moderate overlay of golden patina rounds out the list of positive attributes. Worthy of inclusion in a Gem quality proof type set. Population: 12 in 66 Cameo, 0 finer (12/08).
*From The Good Morgan Sunshine #3 PCGS Registry Set of Proof Morgan Dollars.*(#87320)

## Bright 1887 Morgan Dollar, PR65 Cameo

4848 **1887 PR65 Cameo PCGS.** The bright silver-white surfaces show just a glint of gold, with highly reflective mirrors and moderate contrast between them and the devices. A couple of tiny slide marks on Liberty's cheek are perhaps all that separate this coin from an even finer grade. Population: 7 in 65 Cameo, 2 finer (12/08).
*From The Good Morgan Sunshine #3 PCGS Registry Set of Proof Morgan Dollars.*(#87322)

## Splendid 1888 Silver Dollar, PR66 Cameo

4849 **1888 PR66 Cameo PCGS.** This is a splendid silver-white Premium Gem with wonderful field-device contrast that appears to verge on a Deep Cameo designation. Neither side reveals much in the way of perturbance beyond a random mark here and there. A nice candidate for a high-grade set. Population: 2 in 66 Cameo, 0 finer (12/08).
*From The Good Morgan Sunshine #3 PCGS Registry Set of Proof Morgan Dollars.*(#87323)

## Elegant Choice Proof 1890 Dollar

4850 **1890 PR64 PCGS.** Beautifully detailed with prominent mirrors. Only a few faint hairlines are visible beneath the rich gold-orange and blue-green peripheral patina that surrounds the narrow light silver-gray centers. Overall, a remarkably appealing Choice proof. Population: 46 in 64, 39 finer (11/08).(#7325)

## Intriguing PR63 1892 Dollar

4851 **1892 PR63 PCGS.** Enchanting violet, blue-green, emerald, and sage shadings surround pearl-gray centers. A crisply struck Select Proof that offers powerful mirrors through the patina, though the fields also show a number of grade-limiting hairlines. Still, an attractive piece for the designation.(#7327)

## Pristine 1893 Morgan Dollar, PR67 Cameo

4852 **1893 PR67 Cameo PCGS.** The well-mirrored surfaces are remarkably free of even the most minuscule contact marks on this Superb Gem proof, and the moderate field-device contrast, deeper on the reverse, is duly noted by PCGS. Both sides are still silver, with golden accents more obvious on the obverse. A nice potential acquisition for a top-grade set, and nearly the single finest Cameo certified at PCGS, save one (12/08).
*From The Good Morgan Sunshine #3 PCGS Registry Set of Proof Morgan Dollars.*(#87328)

## Delightful 1894 Morgan Dollar, PR63

4853 **1894 PR63 PCGS. CAC.** This amazing proof Morgan has a full quota of cameo contrast between the deeply mirrored fields and silver-white devices. Housed in a green label PCGS holder, it was certified before PCGS began adding the Cameo designation. Both sides are essentially brilliant, with a thin gold toning line on the reverse.(#7329)

4854 **1896 PR62 PCGS.** This sharply struck specimen has rich olive-gold toning throughout the obverse, while the reverse displays dappled russet-brown and aquamarine. A mere 762 pieces were struck.(#7331)

## Choice Proof 1897 Morgan

4855 **1897 PR64 PCGS.** Milky golden patina lightens to near-brilliance at the centers of each side. The strike is well executed, and noticeable contrast results from moderately frosted central devices. Housed in a green label holder. Population: 39 in 64, 50 finer (12/08).
*Ex: Jerry Bagne Collection of Proof Morgan Dollars (Heritage, 1/2005), lot 11993.*(#7332)

## Outstanding PR66 Cameo 1897 Dollar

4856 **1897 PR66 Cameo PCGS.** One of the most attractive survivors from the mintage of 731 proofs from this well-produced year. (Also one of three exceptional proofs in this auction). The surfaces are brilliant throughout and the devices show significant mint frost which contrasts noticeably against the unfathomable depth of reflectivity in the mirrored fields. Population: 4 in 66 Cameo, 5 finer (12/08).
*From The Good Morgan Sunshine #3 PCGS Registry Set of Proof Morgan Dollars.*(#87332)

## Imposing PR66 1899 Morgan Dollar

4857 **1899 PR66 NGC.** Although no Cameo designation is present, the motifs display considerable frost, particularly within Liberty's hair but also on the eagle and wreath. The darkly mirrored fields lack reveal faint golden toning when tilted beneath a light. Well struck and close to immaculate. Census: 24 in 66, 16 finer (12/08). (#7334)

## Gorgeous PR66 Cameo 1899 Dollar

4858 **1899 PR66 Cameo NGC.** A gorgeous Premium Gem, elegantly toned subtle champagne-gray with the patina not dimming the contrast in the slightest. The amply frosted devices are sharply struck. The obverse's cameo effect is impressive, and that of the reverse is even more so. Census: 10 in 66 Cameo, 18 finer (12/08). (#87334)

## Excellent PR66 1900 Dollar

4859 **1900 PR66 NGC.** The devices are frosty and exhibit undeniable cameo contrast, although the older generation holder lacks a Cameo notation. The strike is essentially full, without the usual blending at the centers. Delicate orange and forest-green patina clings to the peripheries. Just 912 proofs were issued. Census: 18 in 66, 16 finer (11/08).(#7335)

## Exquisitely Defined 1900 Dollar PR66 Cameo

4860 **1900 PR66 Cameo NGC.** Both sides of this Premium Gem proof are untoned, and each displays pleasing field-device contrast. An exacting strike leaves exquisite delineation on the design features, which is often inadequate on 1900 proof dollars. The surfaces are smooth and devoid of mentionable marks.(#87335)

4861 **1901 PR64 NGC.** This impressively preserved near-Gem is brilliant aside from a trace of honey toning. Due to the rarity of quality Mint State 1901 dollars, demand for the proof 1901 is higher than neighboring proof dates. Like most proof 1901 Morgans, this specimen is die doubled, a feature apparent on ONE DOLLAR and nearby leaves.(#7336)

## 1901 Morgan Dollar, PR65 Cameo

4862 **1901 PR65 Cameo NGC.** The beautiful light toning near the rims on this coin is just the barest tinge of champagne-pink, complementing the palest ice-blue at the extreme rims. Scattered gold and amber accents further enhance the appeal, as do the bold strike, relative absence of contact, and surfaces with considerable field-device contrast. Census: 5 in 65 Cameo, 9 finer (12/08). (#87336)

## Pretty 1901 Morgan, PR66 Cameo

4863 **1901 PR66 Cameo PCGS.** The proof 1901 Morgan dollars do double duty, also filling in the Mint State sets from collectors unable to find (or afford) a sufficiently high-grade business strike of the issue. This pretty Premium Gem proof offers contrast that is somewhat deeper on the reverse, with silver-white patination and a tinge of champagne at the rims. Among the finest certified Cameos. Population: 6 in 66 Cameo, 0 finer (12/08).
*From The Good Morgan Sunshine #3 PCGS Registry Set of Proof Morgan Dollars.*(#87336)

## Pristine Gem Proof 1902 Morgan Dollar

4864 **1902 PR65 PCGS.** There is almost no contrast on this Gem proof Morgan dollar, but the surfaces are blinding-white with the exception of a couple of stray spots of color. The surfaces seem unperturbed, save for a single tiny spot of dark toning in the left obverse field, and examination under a loupe merely serves to reconfirm that impression.
*From The Good Morgan Sunshine #3 PCGS Registry Set of Proof Morgan Dollars.*(#7337)

## Fully Struck 1903 Morgan Dollar, PR64

4865 **1903 PR64 PCGS.** Only 755 proof Morgan dollars were struck in 1903. The present coin is notable for its sharp strike, which is unusual with this issue. The fields are deeply mirrored, but there is little contrast with the devices. Apparently, the dies were polished in the device areas, as well as the fields. A few handling marks are consistent with the grade.(#7338)

## Vividly Toned 1903 PR66 Dollar

4866 **1903 PR66 PCGS.** Splashes of cobalt-blue, yellow-gold, orange, crimson, and forest-green patination display deeper shades on the obverse of this Premium Gem proof. An exacting strike emboldens the design elements, including the hair over Liberty's ear and the eagle's breast feathers. There are no mentionable marks on the well preserved surfaces. Population: 23 in 66, 8 finer (12/08). (#7338)

## Boldly Impressed 1904 Dollar, PR65

4867 **1904 PR65 NGC.** This boldly impressed specimen is uniformly brilliant in finish with a dusting of pale golden iridescence in evidence. Pleasingly smooth, as one should expect for a Morgan Dollar at the PR65 level, this is an important Gem quality representative of an issue that is difficult to find at this level as a business strike.(#7339)

### Brilliant PR66 1904 Morgan

4868 **1904 PR66 PCGS.** Just the palest touch of lilac patina is visible on the brilliant surfaces of this pretty Premium Gem proof, with perhaps a suggestion of faint jade color on the high points of Liberty. Moderate contrast appears on both sides, along with lots of eye appeal. Population: 14 in 66, 4 finer (12/08).
*From The Good Morgan Sunshine #3 PCGS Registry Set of Proof Morgan Dollars.*(#7339)

### Sharply Struck 1904 Dollar, PR66

4869 **1904 PR66 PCGS.** The luminous surfaces of this Premium Gem proof, like most 1904 dollars with proof format, have a partially polished portrait, rather than cameo-like or frosty. Freckles of light golden-tan are scattered over both sides, each of which is devoid of mentionable marks. Sharply struck throughout. Population: 14 in 66, 4 finer (12/08).(#7339)

## PEACE DOLLARS

4870 **1921 MS65 PCGS.** This nearly untoned and thoroughly lustrous Gem has excellent eye appeal, and the cheek and fields are beautifully smooth. A trifle softly struck in the centers, but this is a typical, minor fault.(#7356)

### Satiny Premium Gem 1921 Peace Dollar

4871 **1921 MS66 PCGS.** The 1921 Peace dollar is popular both for its status as a one-year subtype and also due to its aesthetic appeal as the (nearly) sole High Relief issue of the series. This piece boasts mellow luster over the copper-gold and amber-toned surfaces on both sides, which reveal only a couple of stray ticks in out-of-the-way places. A satiny and pleasing Premium Gem.(#7356)

### Impressive MS66 1921 Peace Dollar

4872 **1921 MS66 PCGS. CAC.** Pastel ice-blue and caramel-gold hues grace this lustrous and exceptionally unabraded Premium Gem. As is customary for this high relief issue, the centers lack a complete impression from the dies. A single year subtype, and low mintage as well. Just six pieces have been certified finer by PCGS (11/08).
*From The James Mossman Collection.*(#7356)

### Rare 1921 VAM-3 Peace Dollar, MS66
### The 'Ray Through L' Variety

4873 **1921 MS66 NGC.** VAM-3. A Top 50 Variety. The "Ray Through L" variety. The reverse die was modified by hand by a mint worker to extend the ray over the first L in DOLLAR. This is a scarce and desirable VAM, particularly in the MS66 grade. In fact, as of (6/07), the present lot is the single finest example of VAM-3 certified by NGC. Lustrous and carefully preserved with delicate almond-gold and ice-blue toning. The centers are somewhat soft, nearly always the case for this high relief date.(#7356)

### Stunning 1921 Peace Dollar, MS66

4874 **1921 MS66 NGC.** This stunning Premium Gem 1921 High Relief Peace dollar has mostly brilliant luster at the center of the obverse, with an intense frame of deep russet and iridescent toning. The central hair details are a trifle soft as usual, but the overall eye appeal is exceptional. The reverse is similarly amazing with a deep gold and iridescent display across nearly the entire surface. NGC has only certified six finer examples (12/08).(#7356)

## Dazzling MS66 1921 Peace Dollar

4875 **1921 MS66 PCGS.** Amazingly bright, swirling mint frost races around each side of this one-year, high-relief dollar. A few speckles of gold can be seen on each side of this otherwise dazzling white coin. Remarkably sharp for a 1921 Peace dollar with almost complete definition in the centers.(#7356)

## Highly Lustrous MS66 1921 Peace Dollar

4876 **1921 MS66 PCGS.** An outstanding example of this one-year issue whose importance transcends the Peace dollar series. Struck in high relief, and the only dollar to have been, the centers are predictably a bit soft. Exceptionally lustrous, the mostly brilliant surfaces have just the slightest overlay of pale golden patina.(#7356)

4877 **1922-D MS66 NGC.** The fine-grain surfaces have a rich, satiny sparkle, especially in the fields. Well struck with a minimal number of faint, barely noticeable surface blemishes. A conditionally scarce issue at this advanced grade level, and rare any finer.(#7358)

4878 **1922-S MS65 PCGS.** Premium quality for the grade. This Gem Peace dollar is well struck with few abrasions. The surfaces emit a soft radiance and the color is mostly white with the reverse revealing a light rose-violet hue. An exceptionally tough piece to locate in higher grades; PCGS has graded just six such coins (11/08). (#7359)

4879 **1922-S MS65 PCGS.** Well-defined with vibrant luster and immense eye appeal. The strike is pleasing, and only a few shallow flaws are visible in the left obverse field. PCGS has graded six finer coins (11/08).(#7359)

## Superb Gem 1923 Peace Dollar, MS67

4880 **1923 MS67 NGC.** Countless millions were struck, thousands of bags were spared from commerce, and yet at this outstanding grade level the lowly 1923 Peace Dollar emerges as a difficult issue. Both sides of this snow-white, nearly blemish-free example display remarkable luster qualities. Census: 50 in 67, 0 finer (12/08).(#7360)

## Condition Rarity 1923-D Peace Dollar, MS66

4881 **1923-D MS66 PCGS.** The 1923-D is one of the overlooked and unsung rarities in the Peace dollar series. It is a condition rarity that is seldom seen above the MS64 level. This is an astonishing, high-end MS66 coin that has virtually unscathed features. Each side has moderate reddish-golden and blue toning with exceptionally strong underlying, satiny mint luster. Population: 71 in 66, 0 finer (12/08).
*Ex: Long Beach Signature Sale (Heritage, 6/2002), lot 6282; JFS Collection, Pittsburgh Signature Sale (Heritage,8/2004), lot 4193.* (#7361)

## Pleasing 1923-S Peace Dollar, MS65

4882 **1923-S MS65 PCGS.** The 1923-S dollar typically has good mint luster but it is invariably weakly struck on the eagle's wing. It is also generally heavily abraded. This is one of the most appealing 1923-S dollars we have seen, and it is a perfect match for the assigned MS65 grade. As expected, the mint luster is frosted. What is unexpected is how clean both sides are on this coin. Also surprising is the strength of strike, with notably good definition on the eagle's lowest row of feathers and on Liberty's hair curls. Pale golden-brown and sea-green toning is seen around the margins with lighter, almost untoned centers.(#7362)

## Spectacular 1924 Peace Dollar, MS67

4883 **1924 MS67 NGC.** One of the more underrated Peace dollars, especially among Philadelphia issues. This piece is atypical in several respects from the usually encountered '24-P. The striking details leave nothing to be desired with complete design details throughout, even if they are not fully brought up like, say, a '22-P or '23-P. The surfaces are unblemished and covered with smooth, frosty mint luster. Heavy metal flow gives the coin a somewhat granular appearance in the fields which lends an "orange-peel" surface to the coin.(#7363)

## Gorgeous 1924-S Gem Dollar

4884 **1924-S MS65 PCGS.** Superbly toned, with patches of olive-green, lilac, and quicksilver alternating on both sides, this piece is definitely a standout in the crowd. Gorgeous luster manages to escape from beneath the moderately intense patina, and there are no mentionable abrasions visible, save for a couple of marks well-hidden on the cheek. Nicely struck. Population: 68 in 65, 5 finer (12/08).(#7364)

## Appealing 1924-S Peace Dollar, MS65

4885 **1924-S MS65 PCGS.** The 1924-S Peace dollar is one of the least available dates of the early part of this series. The present coin is sharply struck, with fine detail on the hair and eagle's feathers. The surfaces are lustrous, under wisps of gold and lilac toning. Only six coins have been certified finer by NGC and PCGS combined (12/08).(#7364)

## Elegant MS67 1925 Peace Dollar

4886 **1925 MS67 NGC.** Bright, frosty luster with excellent sharpness over the major design elements. What really makes this coin so special is the uncommon lack of surface marks, although the almond-gold toning is also compelling. Liberty's cheek and the surrounding fields are as smooth as any collector could hope to find. Census: 44 in 67, 1 finer (11/08).
*Ex: Robert Moreno Collection (Heritage, 7/2005), lot 7040.* (#7365)

## Superb 1925 Peace Dollar, MS67

4887 **1925 MS67 PCGS. CAC.** This is one of the finest existing 1925 Peace dollars with frosty luster beneath pale gold and iridescent toning. It is sharply struck and exhibits only a few tiny surface marks, including a slight abrasion on Liberty's cheek. Although the mintage of this issue, exceeding 10 million coins, is far less than the 1922 or 1923 issues, it is still considered a common date in all grades through MS65. Even examples that grade MS66 are plentiful; however, Superb Gem MS67 and finer pieces are nearly impossible to locate. Population: 67 in 67, 1 finer (12/08).(#7365)

## Remarkable MS67 1925 Peace Dollar

4888 **1925 MS67 PCGS.** The 1925 is one of the most common issues in the Peace dollar series, making it one of the premier type coins. This is truly a remarkable Peace dollar. The surfaces are virtually free from abrasions of any size. Fully struck, as one would expect of this issue, the surfaces show the light golden-rose color that is often seen on these coins. Population: 67 in 67, 1 finer (12/08).(#7365)

4889 **1926 MS66 PCGS.** Shining and sharply struck, a gorgeous Premium Gem that shows occasional hints of gold-gray patina. Smooth surfaces are delightful. Tied for the finest certified by PCGS (11/08). (#7367)

4890 **1926-D MS65 PCGS.** This first generation PCGS holder houses an amazing 1926-D Peace dollar with brilliant silver surfaces and excellent design definition.(#7368)

4891 **1926-D MS66 PCGS.** A highly lustrous and incredibly appealing representative, silver-white save for a single spot of reddish-brown patina at the top of the 6 in the date. Well-defined for this mid-date issue, carefully preserved with only faint, scattered grazes. PCGS has graded just eight pieces finer (11/08).(#7368)

4892 **1926-D MS66 PCGS.** Lightly toned gold-gray at the margins with subtle silver-slate coloration noted at the centers. Pleasingly detailed and well-preserved for a Premium Gem. Housed in a green label holder.(#7368)

4893 **1926-D MS66 PCGS.** Sharply struck with bright, radiant silver-white surfaces. Only a handful of wispy flaws are visible on Liberty's portrait and in the nearby fields.(#7368)

4894 **1926-D MS66 PCGS.** Noteworthy strike on this Premium Gem, with rich, sculptural detail on the lustrous locks of Liberty. Largely untoned with grand eye appeal. PCGS has graded eight finer representatives (11/08).(#7368)

### Satiny 1926-S Peace Dollar, MS66

4895 **1926-S MS66 NGC.** The satiny surfaces are silver-white with no discernible trace of color, but there are also almost no mentionable contact marks or other distractions on this lovely Premium Gem, beyond a stray reeding mark or two. Among the finest certified at NGC, while PCGS has graded two MS67 examples (12/08). (#7369)

### Vivacious 1926-S Dollar MS66

4896 **1926-S MS66 PCGS.** This is a virtually snow-white Gem with clean surfaces, blazing luster, a sharp strike, and good eye appeal. 1926 was the last high mintage year for the Peace dollar series, since the Pittman Act melts were largely replaced by this time. Population: 65 in 66, 2 finer (12/08).
*Ex: New York Signature (Heritage, 7/2004), lot 7410.*(#7369)

### White Premium Gem 1926-S Dollar

4897 **1926-S MS66 PCGS.** A brilliant and thoroughly lustrous Premium Gem that has clean fields and a pristine cheek. Peripheral elements are fully struck, while the centers show only slight blending of high point detail. An exemplary example of the final high mintage issue. Population: 65 in 66, 2 finer (12/08).(#7369)

### Dazzling 1927 Peace Dollar, MS65

4898 **1927 MS65 NGC.** Dazzling luster radiates from the untoned surfaces of this Gem Peace dollar. Sharply struck design features further add to the coin's eye appeal. A few minuscule surface marks are visible, as are some light rim cuts. Census: 78 in 65, 2 finer (7/08).(#7370)

## Stunning 1927 Peace Dollar, MS65

4899 **1927 MS65 PCGS.** A strong, sharp strike is immediately noted, as even the central devices show bold relief and impressive detail. The exceptionally smooth and lustrous surfaces are essentially unabraded, with only light, trivial chatter on the obverse and a single milling mark in the left field on the reverse. Commingled softly glowing lilac-rose and shimmering vivid pastel green-gold hues are equally represented on both sides. Housed in a green label holder. NGC and PCGS combined have certified only seven finer examples to date (11/08).(#7370)

## Sharp Gem 1927 Peace Dollar

4900 **1927 MS65 PCGS.** The bright silver surfaces are essentially untoned. Better struck than most examples of its type, this Gem displays essentially full detailing on Liberty's hair and on the eagle's back and leg feathers. Surface blemishes are relatively minor, especially for a Peace dollar. A popular low-mintage issue of only 848,000 coins. PCGS has certified only five pieces finer (12/08). (#7370)

## Satiny 1927-D Peace Dollar, MS65

4901 **1927-D MS65 PCGS. CAC.** The 1927-D is one of the show-stopper pieces in the Peace dollar series in Gem condition or finer, and many collectors accordingly opt out for a nice near-Gem. This MS65 example brooks no compromise, however, with distraction-free silver-white satiny surfaces that have a small complement of plum toning. Abundant brilliant luster radiates from each side. A stunning Gem example.(#7371)

## Lightly Toned Gem 1927-D Dollar

4902 **1927-D MS65 PCGS.** This pleasing Gem provides potent luster and clean surfaces. Brilliant aside from a faint splash of gold on the reverse. The design elements are bold, especially at the centers. PCGS has only certified nine finer examples, with three better ones in NGC holders (11/08).(#7371)

## Beautiful 1927-D Peace Dollar, MS65

4903 **1927-D MS65 PCGS.** Even though the mintage for the 1927-D is the highest of the three issues from that year, the production of 1.2 million pieces is highly misleading when assessing the rarity of this Peace dollar in high grade. This issue is quite elusive above the Gem level This is a remarkably clean coin that has glowing, satiny surfaces that are untoned and sharply struck throughout. The only noticeable "flaw" is a small fleck of grease that was struck into the left obverse field at the time of manufacture.(#7371)

## Worthy Gem 1927-D Dollar

4904 **1927-D MS65 PCGS. CAC.** Delicate golden-brown toning congregates along the margins of this nicely struck Gem. Sweeping luster illuminates the minimally abraded fields. The cheek is particularly smooth. This lower mintage silver dollar issue is nearly unobtainable any finer.(#7371)

## Dazzling MS65 1927-D Dollar

4905 **1927-D MS65 NGC.** Delicate tan-gold patina visits this highly lustrous and meticulously struck Gem. The occasional wispy graze is all that separates this piece from an even finer grade. The dies are lightly rotated counterclockwise. The lowest mintage Denver Mint issue, aside from the phantom 1964-D. Census: 77 in 65, 3 finer (12/08).(#7371)

## Exemplary Gem 1927-S Peace Dollar

4906 **1927-S MS65 PCGS.** The 1927-S Peace Dollar is, along with the 1925-S and 1928-S, the key to this popular series in Gem grades. A look at the population figures immediately gives some insight into why, as PCGS has certified only 58 1927-S dollars in MS65, with only two finer (11/08). Bright satiny luster combines with a pale splashes of gold-olive toning to present a pleasing appearance. Splendidly smooth, since a single mark on Liberty's hair over the ear is all that precludes an even higher grade.
*Ex: The Arnold & Harriet Collection (Heritage, 8/2007), lot 2584, which realized $8,050.*(#7372)

## Lustrous Gem 1927-S Peace Dollar

4907 **1927-S MS65 NGC.** The rather deep, mottled purple and russet patina that appears on each side of this lustrous Gem is quite attractive and obviously original. With excellent striking definition and minimal marks, this piece is impressive from both technical and visual perspectives. This San Francisco Mint issue is very scarce at the MS65 grade level, and rare any finer; in fact NGC and PCGS together have certified only three coins at the next level (12/08). (#7372)

## Better Date 1927-S Peace Dollar, MS65

4908 **1927-S MS65 NGC.** The 1927-S Peace dollar has a small recorded mintage of 866,000 pieces. Q. David Bowers believes this issue is one of the rarest varieties in the series at the Gem level. The present coin is a pleasing Gem specimen, with a sharply detailed strike, and lustrous surfaces. Lovely golden toning is in evidence at the rim. Census: 68 in 65, 1 finer (12/08).(#7372)

## Gorgeous 1928 Peace Dollar, MS65

4909 **1928 MS65 NGC.** Most 1928 Peace dollars were released in Western Pennsylvania, if they were released at all. The mintage was a mere 360,649 coins, by far the lowest mintage of any issue in the Peace dollar series. This nicely defined Gem is essentially brilliant, with faint traces of champagne and iridescent toning. Census: 79 in 65, 2 finer (12/08).(#7373)

## Gem Key-Date 1928 Peace Dollar

4910 **1928 MS65 PCGS.** A moderate coat of champagne toning is evident on both sides of this impressive Gem. A single luster graze on the obverse and a couple minuscule marks on the reverse are all that prevent an even higher grade for this rare issue. PCGS has only certified 11 better examples of this date.(#7373)

4911 **1928-S MS64 PCGS. CAC.** A remarkable piece for the grade, and on the border of the next grade level, with highly lustrous and frosty silver surfaces that are enhanced by speckles of gold toning. (#7374)

4912 **1928-S MS64 PCGS.** One of the great condition rarities in the Peace dollar series, this example has satiny and highly lustrous surfaces. PCGS has only certified 47 finer pieces of the date. (#7374)

4913 **1928-S MS64 PCGS.** Only a few slight surface scrapes keep this piece from the higher Gem grade level. Both sides are lustrous with brilliant ivory frost that is accented by a few toning splashes. (#7374)

4914 **1928-S MS64 PCGS.** A highly attractive near-Gem that some observers might consider to be undergraded. Flashy and essentially brilliant, save for faint hints of peripheral toning. A small reed mark is noted on Liberty's cheekbone.(#7374)

### Lustrous MS66 1934 Peace Dollar

4915 **1934 MS66 PCGS.** A softly frosted example of this scarce, low mintage year. The surfaces are remarkably clean with a fully brilliant, snow-white appearance overall. The devices are sharply struck throughout, with all these attributes giving the piece an appearance that would be nearly impossible to improve upon.(#7375)

### Vibrant 1934 Peace Dollar MS66

4916 **1934 MS66 PCGS.** Medium honey-gold toning adorns this alertly struck and prominently shimmering Premium Gem. Void of noticeable marks, and the cheek is especially undisturbed. One of the few issues in the series with a mintage of less than 1 million pieces. PCGS and NGC combined have certified only four examples finer (12/08).(#7375)

4917 **1934-D MS65 PCGS.** Crisply struck, for the type, with an especially sharp mintmark. Essentially brilliant, save for faint golden peripheral accents. Nicely preserved, with a few faint slide marks on Liberty's cheek, and a couple of stray field marks on each side. A challenging D-mint Peace dollar issue in Gem condition.(#7376)

### Pastel Toned MS66 1934-D Dollar

4918 **1934-D MS66 NGC.** Micro D. Apricot-gold and sky-blue compete for territory across this thoroughly lustrous and boldly struck Premium Gem. As expected of its lofty grade, neither side displays any distracting marks. A wonderful example of the final *collectible* Denver Mint issue. Census: 23 in 66, 2 finer (11/08).
*From The James Mossman Collection.*(#7376)

### Wonderful 1934-D Peace Dollar, MS66

4919 **1934-D MS66 PCGS.** While the 1934-D is rather plentiful in lower Mint State grades, Premium Gem or finer examples are extremely rare, as the PCGS population data indicates. This example has satiny luster with a hint of champagne toning. Population: 60 in 66, 2 finer (12/08).(#7376)

### Satiny 1934-D Peace Dollar, MS66

4920 **1934-D MS66 PCGS.** Small D. This scarcer mintmark variant is seldom seen in the better grades of Uncirculated. This is a uniformly brilliant example that has sparkling, satin-like mint luster and sharp definition throughout. An exceptionally attractive '34-D and probably unexcelled as a Small D variant, even though three pieces have been graded finer (we assume those coins are the more common Large D variety). Population: 60 in 66, 2 finer (12/08). (#7376)

## Key 1934-S Peace Dollar MS62

4921 **1934-S MS62 PCGS.** Light honey-gold toning adorns this fully lustrous and nicely struck representative. Marks are surprisingly minor, with noticeable contact limited to the DOL in DOLLAR. The 1934-S is the key to the series in most Mint State grades, including MS62. In a green label holder.(#7377)

## Select Mint State 1934-S Dollar VAM-3, Top 50, Doubled Tiara

4922 **1934-S MS63 PCGS.** VAM-3. A Top 50 Variety. The rays of Liberty's tiara are lightly die doubled. Of course, *any* 1934-S dollar is desirable in Mint State, as it is the key date of the series. This Select representative offers light olive-gold toning and has a bold strike. Minor scattered grazes fail to deny the eye appeal.(#7377)

## Sought-After Gem 1934-S Peace Dollar

4923 **1934-S MS65 PCGS.** Long sought after as a key date among Peace dollars, the 1934-S is elusive in Gem grades. Both sides of this specimen have frosty silver surfaces, with ivory luster and a trace of iridescent toning. PCGS has only graded 23 finer examples, most of them, as expected, a single point finer (12/08).(#7377)

## Royal 1934-S Peace Dollar, MS65

4924 **1934-S MS65 PCGS.** The '34-S is the undisputed "King" of the Peace Dollar series in Uncirculated grades up to and including the MS65 level of preservation. Surprisingly, this issue's original mintage of 1.01 million coins is not the lowest in the series, nor is it even among the five lowest mintage productions. The 1921, 1927, 1927-S, 1928, and 1934 all have lower mintages. However, the 1934-S does not appear to have been preserved in significant numbers, and most examples probably entered circulation in the 1930s. This fortunate survivor is bursting with bright mint luster that is mostly satiny in texture. The striking quality is relatively bold, and only a few of the central features exhibit light softness of detail. The only mentionable toning is pale, dappled gold in color, and largely confined to the obverse. There are no mentionable abrasions on either side. Population: 171 in 65, 23 finer (12/08).(#7377)

## Coveted Gem 1934-S Peace Dollar

4925 **1934-S MS65 PCGS.** The 1934-S is the key-date Peace dollar in Mint State. This was not always the case. For example, David Bowers writes that: " ... there was a time in the early 1940s when the 1925 Philadelphia dollar ... was priced higher, considered to be rarer, and was in greater demand than the 1934-S." The 1925 is now considered to be among the most common Philadelphia dollars in Mint State. The '34-S Gem in this lot has a good strike and dynamic luster. Light golden-gray toning visits here and there. The obverse is remarkably preserved.
*Ex: Summer FUN Signature (Heritage, 7/2007), lot 1916, which realized $9,200.*(#7377)

4926 **1935 MS66 PCGS.** Light golden tints overall, these being more prominent on the obverse than on the reverse. A shining Premium Gem from the final year of issue, tied for finest certified by PCGS (11/08).(#7378)

### Splendid 1935-S Dollar, MS66

4927 **1935-S MS66 PCGS.** Blushes of pale apple-green color grace the centers, while the margins are essentially brilliant. This imposing premium Gem has booming cartwheel luster and a good strike. The surfaces are magnificently preserved. A splendid example from the final year of regular issue. Housed in a green-label holder. (#7379)

## EISENHOWER DOLLAR

### Condition Scarcity 1976-D Type Two Dollar, MS67

4928 **1976-D Type Two MS67 PCGS.** The Type Two Bicentennial dollar has thin reverse letters, and the second U in UNUM is centered below the letter I. The highly lustrous surfaces of this Superb Gem display just a wisp or two of light gold color, and exhibit crisply defined design elements. Impeccably preserved throughout. Readily available through Gem, with even MS66 pieces not that difficult. MS67s, however, are elusive, and represent the finest certified. Housed in a green-label holder. Population: 23 in 67, 0 finer (11/08). (#7421)

## PROOF SUSAN B. ANTHONY DOLLARS

4929 **1979-S Type Two PR70 Deep Cameo PCGS.** Absolutely contrasted and flawless. An utterly unimprovable representative of this popular proof SBA dollar variant. One of just 70 pieces assigned this ultimate grade by PCGS (11/08).(#99590)

### Perfect 1981-S Type Two Dollar PR70 Deep Cameo

4930 **1981-S Type Two PR70 Deep Cameo PCGS.** The present coin is a representative of the Type Two variety, with the clear mintmark. This coin is literally perfect. The fields are liquid, deeply reflective pools, with the crisply detailed, frosty devices floating on top. The coveted Deep Cameo designation is richly deserved. Obviously, this coin is unimprovable.(#99595)

*End of Session Seven*

## GOLD DOLLARS

### First Year 1849 Open Wreath Gold Dollar, MS64

5122 **1849 Open Wreath MS64 NGC. CAC.** Open Wreath. Boldly detailed with typically vibrant luster, green-gold toning, and subtle orange accents near the peripheries. A few small abrasions on the reverse and a pinscratch on the obverse, over Liberty's neck, rule out an even higher rating. The first year of the new gold dollar type, and therefore immensely popular with collectors.(#7502)

### Borderline Uncirculated 1849-D Dollar

5123 **1849-D AU58 NGC.** Variety 1-A. Open Wreath subtype, as always for this initial Dahlonega issue. This sun-gold example has ample luster and smooth fields. The devices are well brought up and show little evidence of wear. Although the fields show a hint of friction, this is a lovely example that will please any Southern gold collector. *From The Peter J. Adasek, M.D. Collection.*(#7507)

### Bright 1849-D Gold Dollar MS61, Variety 1-A

5124 **1849-D MS61 NGC.** Variety 1-A. The mintmark is slightly left of center below the ribbon knot. The bright yellow-gold surfaces of this D-mint gold dollar give off a slight greenish cast, and exhibit sharply struck design elements. Both sides display a fair amount of luster, the most potent of which resides in the recessed areas. A couple of minute contacts exist on the reverse. The holder is lightly scratched on the top.(#7507)

### Stunning Gem 1850 Gold Dollar

5125 **1850 MS65 PCGS. CAC.** This is a stunning, frosty Gem from the second year of federal gold dollar production, an impetus that was quite late in coming from the Philadelphia Mint. This example displays pretty canary-yellow coloration, with a better-than-expected strike and a relative absence of contact marks. A good choice for a type or year set. Population: 13 in 65, 3 finer (12/08). (#7509)

### Near-Mint 1850-C Gold Dollar

5126 **1850-C AU58 NGC.** Variety 3-C, the usual variety although another extremely rare die marriage exists. A well struck sun-gold Borderline Uncirculated example that has substantial luster and no obvious marks. A rare Charlotte issue with a meager mintage of 6,966 pieces. Census: 27 in 58, 22 finer (11/08).(#7510)

## Popular MS61 1850-C Gold Dollar

5127 **1850-C MS61 NGC.** Variety 3-C. An earlier Charlotte gold dollar issue that can pose a challenge to the Southern gold collector, though it does have limited availability even at the Mint State level. This example has radiant yellow-gold surfaces that show fewer abrasions than the grade might suggest. Census: 15 in 61, 6 finer (12/08).(#7510)

## Low-Mintage 1850-O Gold Dollar, MS61

5128 **1850-O MS61 NGC.** All of the O-mint Type One gold dollars have plentiful mintages, with one exception. The 1850-O has a meager production of 14,000 pieces, perhaps because Seated dollars were also struck at New Orleans that year. This is a well struck and satiny example with original khaki-gold toning. Faint vertical marks near the profile limit the grade, but are difficult to see with the unaided eye. Census: 36 in 61, 30 finer (12/08).(#7512)

## Scarce Borderline Uncirculated 1851-C Gold Dollar

5129 **1851-C AU58 PCGS.** Variety 5-E. Pale yellow-gold overall with accents of orange-red near the borders. A needle-sharp Borderline Uncirculated C-mint gold dollar. Impressively smooth despite a few faint marks left of the prominent 1. Encapsulated in a green label holder. Population: 33 in 58, 62 finer (11/08).(#7514)

## Charming MS61 1851-C Dollar

5130 **1851-C MS61 ICG.** Variety 4-D. Brightly lustrous and attractive with radiant sun-gold surfaces that show glimpses of peach and orange. Strongly struck for the issue with only slight softness at the hair below the coronet. Though wispy abrasions are present on each side, overall eye appeal is far better than the MS61 designation might suggest.
*From The Peter J. Adasek, M.D. Collection.*(#7514)

5131 **1851-O MS62 PCGS.** Dramatically toned in salmon-pink, lemon-gold, and orange shades. The left obverse is particularly colorful. Lustrous and unmarked with minor strike incompleteness on the hair above the ear.(#7516)

## Mint State 1852-C Gold Dollar

5132 **1852-C MS61 NGC.** Variety 7-H with light repunching beneath the 1 in the date. This straw-gold Charlotte example has satin luster and unblemished surfaces. The strike is good aside from softness on the A in DOLLAR. A mere 9,434 pieces were struck. Census: 14 in 61, 45 finer (11/08).(#7518)

## Elusive 1852-D Gold Dollar, MS61

5133 **1852-D MS61 NGC.** Variety 4-F, the only known variety from a mintage of 6,360 coins. This date is rare in all grades, and seldom available in Mint State. It is boldly detailed with lustrous light yellow surfaces that display traces or splashes of lilac toning. Census: 15 in 61, 12 finer (12/08).(#7519)

5134 **1852-O MS62 PCGS.** An intricately struck Type One gold dollar with rich luster and attractive surfaces. A vertical die crack spans the coronet and reaches the rim at 12 o'clock. Population: 17 in 62, 22 finer (12/08).
*Ex: Long Beach Signature (Heritage, 2/2006), lot 2522.*(#7520)

## Mint State 1853-C Gold Dollar

5135 **1853-C MS61 NGC.** Variety 8-I. This sharply defined representative has unabraded fields and radiant canary-gold luster. The hair above the ear and the bust truncation exhibit a hint of tan toning. A beautiful example worthy of an advanced Southern gold collection. From a scant production of 11,515 pieces. Census: 11 in 61, 28 finer (11/08).(#7522)

## Charming MS62 1853-C Gold Dollar

5136 **1853-C MS62 NGC.** Variety 8-I. Easily attributable by the mintmark not being doubled. Only 11,515 pieces were struck of this Type One gold dollar. Of that number it is estimated that only 130-140 examples are known today in all grades. Of course, most are VF-XF with a generous number of AU pieces included also, but coins in mint condition are rarely encountered. The surfaces are lightly abraded, as one would expect from a coin in this grade, but the fields are surprisingly clean and show the often-seen semireflective sheen seen on many C-mint gold coins. Just a bit softly struck on Liberty's hair curls; otherwise, well defined throughout.(#7522)

## Popular 1854-S Gold Dollar, MS62

5137 **1854-S MS62 PCGS.** Struck during the first year of operations, the gold dollar is a reasonably available representative of the new San Francisco Mint, and the gold fields of that region. A boldly defined example, both sides exhibit soft, frosty luster with hints of rose toning over the greenish-gold surfaces. Population: 11 in 62, 14 finer (12/08).(#7527)

5138 **1854 Type Two AU58 NGC.** This attractive yellow-gold piece has frosty luster and bold design features, including a fully defined date. Both sides have a trace of high point rub and minuscule surface marks.(#7531)

## Lustrous MS63 1854 Type Two Gold Dollar

5139 **1854 Type Two MS63 PCGS. CAC.** Peach and straw-gold hues enrich this lustrous and friction-free gold type coin. Marks are trivial and difficult to find. Clearly a high end example certain to please its fortunate next owner. The ephemeral Small Indian Head type was only coined in 1854 and 1855, aside from a meager latecomer emission in 1856 at San Francisco.
*From The James Mossman Collection.*(#7531)

5140 **1855-C—Plugged—NCS. XF Details.** Variety 9-K with the second 5 in the date centered under the right half of the A in DOLLAR. This Type Two Charlotte gold dollar was once affixed to jewelry, but mounts have been removed from the reverse at 6 and 12 o'clock. Those areas are crudely tooled. Glossy, bright, and slightly wavy. A rare C-mint design subtype.(#7533)

## Vibrant Choice AU 1855-C Gold Dollar

5141 **1855-C AU55 NGC.** Variety 9-K, with date shifted toward right and prominent shelf-like doubling on the reverse devices. The obverse of this slightly worn yellow-orange example shows numerous prominent clash marks in the fields, as well as substantial weakness at the word UNITED. Despite its foibles, this is a high-end representative of this lower-mintage issue, impressively lustrous for the grade with few post-striking flaws visible. As noted by Garrett and Guth, "High-grade examples of the 1855-C are rarely seen, with well-worn pieces being the norm." Census: 28 in 55, 62 finer (12/08).(#7533)

5142 **1855-O—Damaged, Mount Removed—NCS. VF Details.** A bit bright from cleaning, but this straw-gold example has no obvious marks or repairs. The damage may be to the edge, which is concealed by the holder. The only Type Two New Orleans issue. Just 55,000 pieces were struck.(#7535)

5143 **1855-O XF40 PCGS.** Both sides exhibit deep green-gold with hints of rose and iridescent toning. For collectors of New Orleans coins by design, this is the only issue for the Type Two gold dollar. (#7535)

### Attractive 1855-O Gold Dollar, AU55

5144 **1855-O AU55 NGC.** The brassy-gold surfaces of this Choice AU O-mint gold dollar display traces of luster in the recessed areas. An attentive strike leaves relatively good definition, save for the usual weakness in the 8 of the date. Both sides are devoid of mentionable contact marks. The 1855-O is difficult to locate in Mint State. (#7535)

### Interesting 1856-S Type Two Gold Dollar, AU55

5145 **1856-S Type Two AU55 NGC.** Brass-gold surfaces display hints of luster in the recessed areas, and an attentive strike leaves strong delineation on the design elements, except for the typical softness on portions Liberty's hair. A few expected light marks do not detract. Popular as the only Type Two design produced in this year. (#7536)

### Smooth Choice AU 1857-C Gold Dollar

5146 **1857-C AU55 NGC.** Variety 10-L. The date was entered with a steep downward slant, an example of the difficulty of performing die preparation for such a small diameter coin. This lightly circulated Charlotte gold dollar lacks relevant marks, although a slender mint-made strike-through is present near each side of the headdress. Census: 38 in 55, 49 finer (11/08).(#7545)

5147 **1859-S AU50 NGC.** Hints of violet toning are visible on the light yellow surfaces of this pleasing gold dollar. Just 15,000 were coined, and today examples are hard to locate in any grade.(#7554)

### Rare 1859-S Gold Dollar, MS60

5148 **1859-S MS60 NGC.** The 1859-S (15,000 pieces) is very rare in Mint State. The peach-gold surfaces of this MS60 example display the most potent luster in the recessed areas. Generally well defined, except for softness on Liberty's hair. A few light handling marks are scattered about each side. Census: 5 in 60, 9 finer (12/08). (#7554)

### Popular 1862 Gem Dollar

5149 **1862 MS65 PCGS. CAC.** Its huge mintage of more than 1 million coins makes the 1862 a popular type coin. glowing luster emanates from both sides of this lovely Gem. The yellow-gold surfaces show traces of light tan, and have a frosty finish. A couple of small, inoffensive marks do not disturb. Housed in a green-label holder. (#7560)

## Excellent Choice 1863 Gold Dollar

5150 **1863 MS64 NGC.** With just 6,200 business strikes coined during this year at the height of the Civil War and few of those pieces saved, it is little wonder that the 1863 gold dollar is a condition rarity at this level. Excellent striking definition and warm yellow-gold luster combine for winning eye appeal on this near-Gem. Census: 11 in 64, 2 finer (12/08).(#7562)

## Low Mintage 1870-S Gold Dollar MS62

5151 **1870-S MS62 PCGS.** Sharply struck and smooth with bright luster throughout the legends and devices. A lovely canary-gold representative of the final San Francisco issue of the denomination prior to the 1915 Panama-Pacific Exposition. Only 3,000 pieces were struck. Population: 14 in 62, 15 finer (11/08).(#7570)

## Prooflike 1872 Gold Dollar, MS64

5152 **1872 MS64 PCGS.** This coin is, unsurprisingly but delightfully, fully prooflike on both sides. Since the mintage amounted to only 3,500 coins, both dies likely remained fully prooflike for much of the production run. This piece shows pretty peach-gold color with only a few of the most minor contact marks.(#7572)

## Richly Toned MS66 1876 Gold Dollar

5153 **1876 MS66 PCGS. CAC.** As is the case with most Philadelphia Mint gold denominations from that year, the 1876 gold dollar has a minuscule mintage. Just 45 proofs and 3,200 business strikes were coined. The patient and assiduous collector can locate examples in MS62 to MS64 grades, but those few in MS66 rank highly within the condition census for the issue. As one should demand from its lofty grade, the present Premium Gem has enormous eye appeal. The orange-red and olive-green toning is beautiful, and the obverse appears immaculate. An outstanding representative of this Centennial year date. Population: 2 in 66, 0 finer (12/08). (#7577)

## Vibrant MS66 1880 Gold Dollar

5154 **1880 MS66 PCGS.** The 1,600 business strikes for this issue were heavily saved, and as a result, even Gems are readily available, though Premium Gem and better coins are scarce. This moderately reflective sun-yellow representative is sharply detailed and exquisitely preserved with winning eye appeal.(#7581)

### Appealing 1881 Gold Dollar, MS66

5155 **1881 MS66 NGC.** Potent luster blasts from both sides of this Premium Gem, each of which displays yellow-gold and apricot coloration. The design elements are frosted, and exhibit sharp delineation. This is a nicely preserved coin, with great technical quality and aesthetic appeal.(#7582)

### Gorgeous MS68 1881 Gold Dollar

5156 **1881 MS68 NGC.** As one should expect with an MS68 coin, the current piece is marvelously preserved and visually exhilarating. Thanks to the foresight of contemporary dealers and collectors, the 1881 gold dollar was saved in uncommonly high numbers, offsetting its modest mintage. Blazing luster and delicate, peach-gold coloration combine with mark-free surfaces to define this stunning example. NGC has certified a mere three numerically finer pieces (12/08).(#7582)

### Flawless MS67 1883 Gold Dollar

5157 **1883 MS67 PCGS. CAC.** Dramatic fire-red, peach, and lime shades confirm that even the 90% gold, 10% copper alloy can tone in original and aesthetically pleasing colors. One of only 10,800 pieces struck, since silver halves and dollars were more convenience in commerce than the small and easily lost gold dollar. This highly lustrous and undisturbed Superb Gem is surpassed in grade at PCGS by only 8 pieces (11/08).
*From The James Mossman Collection.*(#7584)

### Exquisite MS66 1886 Gold Dollar

5158 **1886 MS66 PCGS.** By the time this diminutive dollar was coined in 1886, the gold dollar denomination was something of a niche product for the Mint, popular for gifts but not for commerce. The gleaming yellow-gold example offered here is among the best-preserved survivors from the original mintage of 5,000 pieces. Vibrant luster and bold detail are the most recognizable features of this lovely coin. Population: 15 in 66, 3 finer (11/08).(#7587)

### Frosty 1889 Gold Dollar, MS66

5159 **1889 MS66 NGC.** A Premium Gem representative of the last year for the gold dollar denomination. Although the mintage is a relatively scant 28,950, high grade pieces are available due to a few small hoards—presumably because people saved the final-year gold dollars as souvenirs. This khaki-gold piece possesses stunningly rich luster over well preserved surfaces. A small area of dark toning is noted on the reverse's wreath at the 3 o'clock position.
*From The Findley Collection.*(#7590)

## PROOF GOLD DOLLARS

### Stunning 1884 Gold Dollar PR64 Cameo

5160 **1884 PR64 Cameo NGC.** Gold-on-black variance appears when this near-Gem proof dollar is viewed from a direct angle. Peach-gold surfaces exhibit sharply struck design elements, and reveal just a few wispy marks. Repunched on the 18 of the date, as are most, if not all, proofs of this date (Jeff Garrett and Ron Guth (2006).
*From The Peter J. Adasek, M.D. Collection.*(#87634)

5161 **1885 Gold Dollar—Bent—NCS. Proof.** An attractive example with highly reflective fields and rich, original coloration. Neither side displays any signs of contact, but NCS designates the piece as "Bent."
*From The Peter J. Adasek, M.D. Collection.*(#7635)

### Well Struck 1886 Dollar, PR62

5162 **1886 PR62 NGC.** Rich orange-gold patina bathes both sides of this PR62 gold dollar, and an attentive strike leaves strong definition on the design features. A modicum of faint handling marks does not disturb. This is a nice coin for the designated grade.
*From The Peter J. Adasek, M.D. Collection.*(#7636)

## EARLY QUARTER EAGLE

### Mint State Sharpness
### 1832 Two and a Half, BD-1

5163 **1832—Improperly Cleaned—NCS. Unc. Details.** Breen-6135, BD-1, R.4. The sole dies for this rare date. Just 4,400 pieces were struck, and most were promptly exported overseas and melted. This exactingly struck tan-gold example is only lightly cleaned, and luster shimmers throughout the peripheries and devices.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7672)

## CLASSIC QUARTER EAGLES

### Uncirculated Small Head
### Classic 1834 Two and a Half

5164 **1834 Classic MS60 NGC.** Breen-6138, Small Head, R.1. This nicely struck first-year type coin is straw-gold save for a small russet area above the 1 in the date. Bright luster dazzles the margins and devices, and the few obverse field marks are of little import. A devaluation of the dollar in gold allowed the Classic quarter eagle to circulate, unlike its much-melted predecessors.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7692)

### Popular Select 1835 McCloskey-1 Quarter Eagle

5165 **1835 MS63 PCGS.** McCloskey-1, R.2. The only readily collectible die variety for this issue, plainly distinguished by the gap between the first A and M of AMERICA; the other two are rare. Though the present coin shows significant striking weakness at Liberty's central curls and the upper left corner of the eagle's shield, the details elsewhere are sharp. Yellow-gold surfaces offer considerable radiance with only scattered, wispy field abrasions to account for the grade. A high-end example for the series enthusiast with an eye for surface quality. Population: 8 in 63, 4 finer (12/08).(#7693)

5166 **1837 AU55 NGC.** McCloskey-B, R.2. Each vertical stripe of the shield has three distinct lines, and the lowest arrowhead touches the second A in AMERICA, identifying this variety. The stars and Liberty's hair are soft, as typically seen, but there are no noteworthy marks. Plenty of luster remains in the fields and enhances the eye appeal. An excellent type coin.(#7695)

### Lustrous 1838 Quarter Eagle, AU58

5167 **1838 AU58 PCGS.** Only one quarter eagle die variety was coined at Philadelphia in 1838. This representative has attractive medium yellow luster with excellent design details. The obverse has a minor rim bruise at 3 o'clock, but the remaining surfaces are nicely preserved. Population: 12 in 58, 28 finer (12/08).(#7696)

### Bright AU 1839-C Two and a Half

5168 **1839-C AU50 PCGS.** Recut 39, Winter 3-C, McCloskey-C, Breen-6150. Formerly considered an 1839/8-C variety by numismatic authorities such as Breen. An intermediate die state without the die crack through the chin. The bright green-gold and apricot surfaces lack relevant marks, and the crisply struck major devices display only slight wear.(#7699)

### Scarce 1839-C Quarter Eagle, AU53

5169 **1839-C AU53 NGC.** McCloskey-B, Breen-6149, R.4. The C mintmark is over the left half of the 3 in the date, the lowest arrowhead is joined to the inside of the right serif of the final A of AMERICA, and there is no berry to the stem. This is only the second quarter eagle coined in Charlotte, and one of just two C-Mint pieces to feature the Classic Head design. A nicely struck piece, the surfaces have bright green-gold color with few trivial marks.(#7699)

### High Demand 1839-C Quarter Eagle, AU55

5170 **1839-C AU55 NGC.** Breen-6149, McCloskey-B, Winter-2B, R.4. The 1839-C is a scarce issue, and enjoys high demand from collectors of Southern gold. The present coin is a desirable example, with a full strike, and satiny mint luster. Abrasions are minimal for the grade. Census: 37 in 55, 88 finer (12/08).(#7699)

### AU53 1839-O Quarter Eagle High Date, Wide Fraction

5171 **1839-O AU53 NGC.** High Date, Wide Fraction, Breen-6152, McCloskey-A, R.3. This was the first year of issue for quarter eagles at the New Orleans Mint. This AU53 specimen retains traces of luster in its recesses. The reverse is sharply struck, while the obverse star centers are somewhat soft. Minute circulation marks are visible under magnification.(#7701)

### Popular 1839-O Two and a Half, AU58

5172 **1839-O AU58 NGC.** High Date, Wide Fraction, Breen-6152, McCloskey-A, R.3. Only two New Orleans Mint issues display the O-mintmark on the obverse: 1839-dated Reeded Edge Capped Bust half dollars and quarter eagles. Of course one could make an argument for the 1838-O half dollar, but that would be like including a hole for an 1804 dollar in one's Dansco album for Bust dollars. This orange-gold survivor boasts ample luster and pleasing surface quality. Adding to the interest level is a prominent die break extending from the 6 o'clock reverse rim, through the large 2 in the denomination, across the uppermost olive leaf, and exiting through the I in UNITED to the rim.(#7701)

### Elusive 1840-D Two and a Half AU53

5173 **1840-D AU53 PCGS.** Variety 1-B. Attractive orange toning drapes this rare date Dahlonega quarter eagle. The strike is precise aside from the shield lines. Thin marks beneath the chin and on the portrait suggest personal inspection. Just 3,532 pieces were struck. Population: 3 in 53, 4 finer (11/08).
*From The Malibu Collection.*(#7719)

### Rare Date 1840-D Quarter Eagle, AU55

5174 **1840-D AU55 PCGS, CAC.** The Liberty Head design made its first appearance in 1840, and the mintage of quarter eagles at the Dahlonega Mint was a paltry 3,532 pieces. In the *Encyclopedia of U.S. Gold Coins*, Jeff Garrett and Ron Guth report, "The 1840-D quarter eagle is one of the rarest dates from this mint, if not from the entire Liberty Head quarter eagle series." The present coin is an extremely attractive example, with a decent strike, and only slight wear on the eagle's leading leg. The surfaces are lustrous and abrasions are minimal. Only nine coins have been certified finer than this example at NGC and PCGS combined. Population: 2 in 55, 3 finer (12/08).(#7719)

### Challenging 1840-O Quarter Eagle, AU55

5175 **1840-O AU55 PCGS.** Large Mintmark. A challenging early O-mint issue both in terms of total numbers and from a condition perspective. The original mintage of 33,580 pieces includes both small and large mintmark varieties. This solid AU example combines green-gold alloy with natural reddish patina. The strike is expectantly deficient over the central devices and a few of the obverse stars. Population: 8 in 55, 17 finer (12/08).(#7720)

### Attractive AU55 1840-O Quarter Eagle

5176 **1840-O AU55 NGC.** Rich violet overtones visit the generally orange-gold obverse, while the reverse shows only a trace of the former color. A pleasing, briefly circulated representative of this challenging quarter eagle issue, one that hails from the early history of the New Orleans Mint. Census: 19 in 55, 49 finer (11/08). (#7720)

5177 **1841-D—Scratched—ANACS. VF30 Details.** Variety 2-C. A mid-range mustard-gold example, softly struck as usual. Several digs and scratches appear in the obverse fields, but the reverse displays beautifully.(#7722)

### Desirable AU53 1841-D Two and a Half

5178 **1841-D AU53 NGC.** Variety 2-C. The 1841 Quarter Eagle struck at the Dahlonega Mint is among the most elusive of all dates in this series, especially in XF and finer grades. The mintage was 4,164 coins, and few of those have survived to this day. The actual survival rate is probably between 1% and 2%, or between 40 and 80 coins. The generally accepted figure is 55 coins known in all grades. Although moderately abraded, this is a lustrous example with lovely greenish-yellow gold color and hints of orange toning. The strike is typical with some central weakness, although most of the design elements are nicely defined. Census: 4 in 53, 19 finer (12/08).
*Ex: New York Signature (Heritage, 6/2005), lot 6307, which realized $9,487.50.*(#7722)

## Elusive 1842-C Quarter Eagle, XF45

5179 **1842-C XF45 NGC.** Variety 3-B, the only known dies. Quarter eagle production at the Charlotte Mint amounted to just 6,729 coins in 1842. As one might surmise from this figure, the '42-C is one of the rarest gold coins struck at this branch mint. It is actually the third rarest C-mint quarter eagle after the 1843-C Small Date and 1855-C, and it is *the* rarest in high grade (AU and finer). One of just 55-65 coins believed extant (per Winter), this is an obviously important representative with dominant green-gold color. The strike is typical of the date, but the wear is minimal and evenly distributed. The scattered abrasions include a moderate reeding mark in the obverse field behind the bun at the back of Liberty's head.(#7724)

## Lovely AU50 1842-C Quarter Eagle

5180 **1842-C AU50 NGC.** Variety 3-B. Dusky yellow-orange surfaces retain pleasing luster despite light wear, and the devices are well-defined by the standards of the issue. Wispy flaws are present on each side, though the surfaces are devoid of any singularly distracting abrasions. Overall, a better example of this earlier Charlotte quarter eagle issue. Census: 2 in 50, 27 finer (12/08).(#7724)

## Pleasing MS61 1843 Two and a Half

5181 **1843 MS61 NGC.** This challenging earlier Coronet quarter eagle issue has gone under-the-radar for decades, though the few who attempt complete sets of the long-running series are well aware of its condition rarity. This shining piece is generally yellow-gold with occasional tints of green-gold and sunset-orange. Well-defined and pleasing despite wispy flaws. Census: 9 in 61, 11 finer (12/08). (#7727)

## Uncirculated 1843-C Quarter Eagle Large Date, Plain 4 Variety

5182 **1843-C Large Date, Plain 4 MS61 PCGS.** Variety 5-D. Both the date and the mintmark are lightly repunched. This lovely peach-gold representative is surprisingly unabraded save for minor marks near star 6. the strike is generally sharp, apart from the usual slight incompleteness at the centers. Struck from widely rotated dies. Population: 3 in 61, 5 finer (11/08).(#7728)

## AU 1843-C Quarter Eagle Rare Small Date, Crosslet 4 Variety

5183 **1843-C Small Date, Crosslet 4 AU50 PCGS.** Variety 4-C. The dates on Gobrecht's Coronet Head design (1840-1907) were small in the years 1840-1843, changing later that year to a larger size. The 1843-C Small Date, with a mintage of just 2,988 pieces, is the rarer of the two 1843 Charlotte varieties. In fact, in terms of the number of survivors, the 1843-C Small Date is believed to be the rarest quarter eagle issue from the Charlotte Mint. The present crisply struck lemon-gold representative is void of abrasions visible with the naked eye, although a few faint hairlines are present on the upper reverse field.
*Ex: Dallas Signature (Heritage, 12/2005), lot 1103, which realized $6,612.50.*(#7729)

### Pleasing 1843-D Small D Quarter Eagle, XF40

5184 **1843-D Small D XF40 PCGS.** Variety 4-D. Still-luminous orange-gold surfaces lighten slightly at the centers. Strong striking definition despite the degree of wear present. Though scattered marks contribute to the grade, this Dahlonega quarter eagle displays attractively. Housed in a green label holder.(#7730)

### Popular Choice AU 1843-D Small D Two and a Half

5185 **1843-D Small D AU55 NGC.** Variety 4-D. Moderately abraded greenish-gold surfaces display nearly full satin luster. Hints of pale orange patina add to the impressive aesthetic appeal of this Choice AU quarter eagle. Both sides show a degree of central striking weakness, but nothing beyond the norm for the issue. (#7730)

### Lustrous 1843-D Quarter Eagle, AU55

5186 **1843-D Small D AU55 NGC.** Variety 4-D. A nicely struck example that has only minor blending near the centers. Luster dominates design recesses, and the pumpkin-gold surfaces are undisturbed aside from a slender mint-made strike-through near the O in OF. A quality candidate for a Dahlonega type set.(#7730)

### Condition Rarity 1843-D Small D Quarter Eagle, MS61

5187 **1843-D Small D MS61 NGC.** Variety 4-F. The mintmark is high above the fraction bar. The late die state of this variety is confirmed by a die crack that runs from the rim through F in OF. The 1843-D is quite rare in Mint State. The yellow-gold surfaces of this MS61 specimen contain a good amount of luster. Well struck and lightly abraded. Census: 10 in 61, 5 finer (11/08).(#7730)

### Rare, Low-Mintage 1844 Quarter Eagle, Uncirculated Details

5188 **1844—Improperly Cleaned—NCS. Unc Details.** The design details are uniformly crisp, except for a bit of softness on the eagle's neck and left (facing) leg feathers. The light green-gold surfaces are somewhat bright from improper cleaning. Faint hairlines are noted in the fields, but there are no severe marks on either side. A rare low-mintage issue: only 6,784 pieces were struck.(#7734)

### Desirable 1844-C Quarter Eagle, XF40

5189 **1844-C XF40 PCGS.** Variety 6-E, the only known dies. The surfaces of this example have deep green-gold coloration with peripheral rose toning on both sides. Featuring an average strike, the surfaces are typically abraded. Still a respectable example of the low mintage date, surviving from a production of just 11,622 coins. Population: 13 in 40, 54 finer (12/08).(#7735)

## Elusive 1844-C Quarter Eagle, AU55

5190 **1844-C AU55 PCGS.** Variety 6-E. All coins seen of this issue are softly struck, making wear difficult to assess. This specimen shows just a touch of friction on the high points, with much detail remaining on the devices. The surfaces are lustrous, with minimal abrasions. Population: 6 in 55, 18 finer (12/08).(#7735)

## Near-Mint 1844-C Quarter Eagle

5191 **1844-C AU58 NGC.** Variety 6-E. The 1844-C is mainly found in lower grades, because it saw heavy circulation. By 1844, public confidence in Bechtler gold coins decreased, and a July 28, 1844 fire in the Charlotte Mint halted production until 1846. Pressure was placed on the already small mintage of 11,622 pieces, and few high-grade coins survived. In fact, only 30 survivors have been certified at AU58 by both services combined, and a mere 17 examples finer (11/08). The present coin displays bright brass-gold surfaces that retain considerable luster. The design elements are well brought up, and small marks are confined to the left obverse field.(#7735)

## Condition Census 1844-D Quarter Eagle MS61, Variety 5-I

5192 **1844-D MS61 PCGS.** Variety 5-I, and considerably rarer than variety 5-H. The left base of the mintmark joins the top of the 1, and the upper right curve is distant from the stem. This impressive piece has exceptional green-gold luster with bold design details on both sides. It is fully brilliant with exceptional mint frost.

Doug Winter records several examples of the 1844-D quarter eagle that grade MS61, recorded as tied for fifth finest at the time he revised his reference in early 2003. We have examined plates of 15 different examples listed in Doug Winter's enumeration, including 10 examples of Variety 5-H and five examples of Variety 5-I. Those examples of the 5-I die combination grade MS63 PCGS, MS62 PCGS, MS61 PCGS, and MS61 NGC (2). In addition, the present piece also grades MS61 PCGS. Population: 4 in 61, 11 finer (12/08). (#7736)

## Popular 1845-D Quarter Eagle, XF40

5193 **1845-D XF40 PCGS.** Variety 6-I. Deep golden-green coloration is imbued with strong elements of rose color in the fields. A nicely detailed specimen overall, although the lower half of the eagle seems somewhat softly struck. This Dahlonega issue had a scant mintage of 19,400 pieces, but survivors are reasonably available to diligent collectors.(#7738)

## Attractive 1845-D Quarter Eagle, XF45

5194 **1845-D XF45 NGC.** Variety 6-I. The only known variety for this issue. This Choice XF example displays partially prooflike fields that establish mild variance with the devices. Fairly strong definition is noted on the design features, except for minor softness on portions of Liberty's hair and on the eagle's neck. Both faces are brassy-gold with a faint greenish cast, and are devoid of mentionable marks. (#7738)

## Pleasing 1845-D Quarter Eagle, AU53

5195 **1845-D AU53 PCGS.** Variety 6-I, as always for the 1845-D quarter eagles. The mintage was just 19,400 coins, all from a single die pair. Central weakness on each side is typical of the date, but the present piece exhibits above average surfaces for the 1845-D, with considerable remaining green-gold luster. Population: 8 in 53, 35 finer (12/08).(#7738)

5196 **1845-O—Scratched, Cleaned—ANACS. AU55 Details.** The 18 in the date is boldly repunched, as always for this rare date. Just 4,000 pieces were struck, and there are probably fewer than 200 survivors. This piece is somewhat bright, and has a few wispy marks near the ear and profile that hardly merit the "Scratched" designation.(#7739)

## Extremely Rare 1846-D Quarter Eagle, AU55 Variety 8-L

5197 **1846-D AU55 PCGS.** Variety 8-L, and apparently the rarest of four different die combinations for the 1846-D quarter eagles. There is noticeable repunching in the date, although it is jumbled and nearly impossible to diagnose. Doug Winter writes: "An example of this variety was discovered in the Pittman collection and sold as Lot 1753 in May 1998. It appears to be very rare." This piece is far finer than the unplated Pittman coin that was described as "Fine to Very Fine. Harshly cleaned and heavily hairlined."

The present Choice AU piece may rank as one of the finest known of this rare variety. It is fully lustrous with light greenish-gold surfaces, above average design definition, and minimal surface marks. Population: 17 in 55, 17 finer (12/08).(#7742)

## 1847-C Two and a Half AU58

5198 **1847-C AU58 NGC.** Variety 8-F. A yellow-gold near-Mint Charlotte type coin with smooth surfaces and ample mint luster. A sharp strike with only minor merging on the fletchings. Surprisingly unabraded, and the obverse is particularly attractive. The lower left reverse has a few speckles of die rust, as made. Census: 40 in 58, 33 finer (11/08).(#7745)

5199 **1847-D—Damaged—NCS. AU Details.** Variety 9-M. Several surface gouges affect the still-lustrous orange-gold surfaces. Of the two sides, the obverse is less disturbed and displays well.(#7746)

## Lustrous 1847-D Quarter Eagle, AU58

5200 **1847-D AU58 NGC. CAC.** Variety 9-M is the only die pair identified from survivors of the 15,784 coin quarter eagle mintage in Charlotte during 1847. This boldly defined near-Mint example has highly lustrous and frosty yellow-gold surfaces with a trace of green coloration. Census: 43 in 58, 17 finer (12/08).(#7746)

5201 **1847-O AU55 NGC. CAC.** A delightful Choice AU example with considerable luster on the bright yellow surfaces. The obverse has a bisecting die crack and both sides have clash marks. The left base of the 1 is buried in a dentil.(#7747)

## High Grade 1848 Quarter Eagle, MS62

5202 **1848 MS62 NGC.** A sufficiently struck, well preserved, green-gold two and a half. Typical for the issue, the fields have a pleasing semiprooflikeness that show myriad die polish lines. When inspected with a loupe a minor planchet lamination is observed between stars 9 and 10, otherwise this mint-produced anomaly is not noticeable. Census: 6 in 62, 3 finer (12/08).
*From The Findley Collection.*(#7748)

## Lovely AU53 1848-C Two and a Half

5203 **1848-C AU53 NGC.** Variety 9-F. A pumpkin-gold and sun-yellow example of this elusive Charlotte issue. Luster fills protected areas, and both sides are refreshingly free from marks. Nicely struck for the remote branch mint. Just 16,788 pieces were produced. Census: 15 in 53, 72 finer (11/08).(#7750)

## Bold AU58 1848-C Two and a Half

5204 **1848-C AU58 NGC.** Variety 9-F. A partly lustrous and lightly abraded example. Liberty's curls and the eagle's lower body shows slight softness in strike, but the stars, wings, and neck feathers are bold. A seldom seen Charlotte issue, since only 16,788 pieces were struck. Census: 36 in 58, 16 finer (11/08).(#7750)

5205 **1848-D—Cleaned—ICG. XF45 Details.** Variety 10-N is slightly scarcer than the other variety known for this date. The obverse has deep orange toning over the yellow surfaces, and the reverse is light green-gold with evidence of cleaning.
*From The Findley Collection.*(#7751)

## Wonderful 1848-D Quarter Eagle, AU58

5206 **1848-D AU58 PCGS. CAC.** Variety 10-M is the more common of two known varieties for the date. This piece has lustrous and fully brilliant green-gold surfaces with exceptional eye appeal. A few tiny marks are evident on each side, and they are entirely trivial in nature. Population: 25 in 58, 18 finer (12/08).(#7751)

5207 **1849 AU58 PCGS.** A wonderful quarter eagle struck just after gold began to arrive at the Philadelphia Mint from the California gold fields. Only 23,294 of these quarter eagles were coined, and survivors are elusive. This piece has nearly full luster with excellent eye appeal. Population: 4 in 58, 13 finer (12/08).
*From The Findley Collection.*(#7752)

## Near-Mint 1849-C Two and a Half

5208 **1849-C AU58 NGC.** Variety 11-G. This bright yellow-gold representative displays pleasing sharpness in the centers and keeps glimmers of reflective luster in the protected areas. The luminous fields are only lightly abraded. A stingy 10,220 pieces were struck. Census: 18 in 58, 8 finer (11/08).(#7753)

## Elusive 1849-D Quarter Eagle, AU50

5209 **1849-D AU50 PCGS.** Variety 11-M, the more plentiful of two known varieties, has the date high in the field, nearly touching the bust. The other variety has the date low with the 1 touching the border. A lustrous yellow-gold example that features bold design elements, the reverse has a small scrape near the final A. Population: 17 in 50, 44 finer (12/08).(#7754)

5210 **1849-D—Cleaned—ICG. AU53 Details.** Variety 11-M, the more plentiful of two known die combinations. Lightly cleaned but with attractive green-gold surfaces and few marks on either side.
*From The Findley Collection.*(#7754)

## Desirable 1849-D Quarter Eagle, AU55

5211 **1849-D AU55 PCGS, CAC.** Only 10,945 quarter eagles were minted at the Dahlonega Mint in 1849, making this issue much rarer than other dates in the late 1840s. The present coin is sharply struck, and shows only a touch of wear on the highest points of the design. Mint luster is full and attractive, and abrasions are minimal for the grade. Population: 14 in 55, 13 finer (12/08).(#7754)

## AU58 1850-C Two and a Half

5212 **1850-C AU58 PCGS.** Variety 12-G. Two different reverse dies were used for the coinage of 1850-C quarter eagles, and they are easily distinguished by a quick glance. The mintmark is centered over the digit 1 in the fraction on this variety with reverse G. The other reverse has the mintmark centered over the top of the fraction bar. This is a sharply struck representative of the variety with brilliant sun-yellow gold surfaces and prooflike fields. Population: 10 in 58, 5 finer (11/08).(#7756)

## Choice AU 1850-D Two and a Half

5213 **1850-D AU55 NGC.** Variety 13-M—the only die marriage used. Due to the condition rarity of the 1850-D quarter eagle issue, even the best collections through the years have settled for near-Mint State pieces. For example, the specimen in the Harry W. Bass, Jr. collection was graded AU58 by PCGS, and the Smithsonian Institution coin is also classified as an AU58, although it is not certified. For this reason, the current Choice AU exemplar is sure to receive aggressive bidding activity when this lot is called. Pleasing surfaces with a reasonable retention of luster in the protected areas.
*From The Findley Collection.*(#7757)

## Near-Mint 1850-D Quarter Eagle

5214 **1850-D AU58 PCGS.** Variety 13-M. This precisely struck yellow-gold Dahlonega quarter eagle possesses a band of bright luster across the borders. The major devices also shimmer with luster. Marks are surprisingly few and unimportant. Only 12,148 pieces were struck. Ideal for a high quality Southern gold type set. Population: 14 in 58, 6 finer (11/08).(#7757)

## Appealing 1850-D Quarter Eagle, AU58

5215 **1850-D AU58 PCGS.** Variety 13-M, the only known dies. An absolutely stunning coin for the grade, with highly lustrous and frosty yellow-gold surfaces that have mostly bold design details, except at the centers. The fields exhibit slight reflectivity that adds to the overall eye appeal. Population: 15 in 58, 6 finer (12/08). (#7757)

## Elusive 1851-C Quarter Eagle AU58

5216 **1851-C AU58 NGC.** Variety 13-G. A nicely struck Charlotte example with crisp detail save for blending on the shield lines. The pale gold surfaces reveal glints of luster, and a few field marks on the reverse merit only passing mention. Only 14,923 pieces were coined. Census: 19 in 58, 16 finer (11/08).(#7760)

## Interesting Near-Mint 1851-C Quarter Eagle

5217 **1851-C AU58 NGC.** Variety 13-G. The Charlotte Mint specialist can often identify the 1851-C quarter eagle by the obverse alone. This is because the issue usually comes with a couple of prominent strike-throughs on the lower obverse field. These are present on this unmarked and nicely struck example, but have no effect on the technical grade, and are seen more often than not on the '51-C. Mint workers were negligent in cleaning the die during the issue's production. Bright yellow-gold surfaces with the usual softness in the centers. Only 14,923 pieces were struck. Census: 20 in 58, 16 finer (11/08).
*From The Plymouth Collection.*(#7760)

5218 **1851-O AU55 NGC.** This Liberty Head quarter eagle shows slight wear on the high points of the design. The attractive surfaces are lustrous and exhibit no distracting abrasions. Full Mint State coins of this date are quite rare, making this coin an appropriate choice for any nice collection.(#7762)

## Rare Choice AU 1852-C Quarter Eagle

5219 **1852-C AU55 PCGS.** Variety 14-I. Both sides display smooth surfaces that are minimally marked, with a modest degree of even highpoint wear. A solitary nick is located just to the right of the date, and the usual minor striking weakness is noted on the eagle's leg feathers and talons. Population: 9 in 55, 9 finer (11/08). (#7764)

## Challenging Borderline Uncirculated 1854-C Two and a Half

5220 **1854-C AU58 NGC.** Variety 15-I. This straw-gold Charlotte Mint representative has luminous luster and a minutely granular appearance. Marks are essentially absent save for a hair-thin line on the jaw. A mere 7,295 pieces were struck, and only a small portion of the mintage have survived. Census: 21 in 58, 18 finer (11/08). (#7770)

## Conditionally Rare 1854-O Quarter Eagle, MS61

5221 **1854-O MS61 NGC.** In the *Encyclopedia of U.S. Gold Coins 1795-1933*, Jeff Garrett and Ron Guth say, "In Mint State the 1854-O quarter eagle can be considered a rare coin." The present coin is sharply struck, with fine detail discernable in the hair and eagle's head. The surfaces are fully lustrous, with hints of emerald toning in the fields. Census: 21 in 61, 7 finer (12/08).(#7772)

## Choice AU 1856-C Quarter Eagle

5222 **1856-C AU55 NGC.** Variety 17-J, the only known dies. As expected from an issue with a mere 7,913 coins produced, only one die variety is known among survivors. This example has rich green-gold surfaces. It is weakly struck as usual, and has a few trivial surface marks on each side. Census: 15 in 55, 36 finer (12/08). (#7778)

## Better Struck 1856-C Quarter Eagle, AU58

5223 **1856-C AU58 NGC.** Variety 17-J is the only known die combination for the 1856-C quarter eagle. The large C mintmark fills nearly the entire space above the fraction at the bottom on of the reverse. This lustrous piece exhibits typical planchet flaws that are almost always seen, but only a trace of wear is evident on either side. Light yellow surfaces are framed by pale orange toning along the borders. Better struck than usual, save for softness on the eagle's legs. Census: 23 in 58, 13 finer (12/08).(#7778)

## Solidly Struck AU58 1856-C Quarter Eagle

5224 **1856-C AU58 NGC.** Variety 17-J. As far as 1856 C-mint quarter eagles go, this piece is fairly attractive. Garrett-Guth comment on the issue: "The quality of striking for the 1856-C Liberty Head quarter eagle is one of the worst for the entire series from the Charlotte Mint. The coins were struck on very rough planchets and are usually weak in the central portions of the obverse." The strike of the current offering is solid and the overall eye appeal above average for the issue. *From The Findley Collection.*(#7778)

## Near-Mint 1856-C Quarter Eagle

5225 **1856-C AU58 NGC.** Variety 17-J. Only the slightest trace of wear is evident on either side of this near-Mint piece, although the strike is typically weak with blunt details. The lightly abraded surfaces still retain nearly full bright yellow luster with a hint of rose toning on the reverse. Census: 23 in 58, 13 finer (12/08).(#7778)

## Outstanding 1856-S Quarter Eagle, MS61

5226 **1856-S MS61 NGC.** The San Francisco Mint produced 246 quarter eagles in 1854, none in 1855, and 72,120 in 1856, making the latter date the first collectible example from that Mint. Both sides are fully lustrous with rich orange patina over medium yellow-gold surfaces. Census: 10 in 61, 10 finer (12/08).(#7781)

## Elusive 1858-C MS60 Quarter Eagle

5227 **1858-C MS60 NGC.** Variety 18-J. The only variety for the year. Despite its low mintage of 9,056 pieces, the 1858-C quarter eagle issue is available to collectors across most grades, even About Uncirculated. Still, Mint State examples are elusive and face added demand from branch mint gold type collectors. This lemon-gold and sun-gold example has crisply detailed devices and lustrous fields. Though a number of wispy abrasions affect each side, the overall eye appeal is better than the MS60 designation would suggest. Resubmissions affect the population listing. Census: 8 in 60, 32 finer (12/08).(#7787)

## Rarely Encountered 1859 Quarter Eagle Old Reverse, Type One MS64

5228 **1859 Old Reverse, Type One MS64 NGC.** The Old Reverse hub of the Liberty Quarter Eagle, sometimes called the First Reverse, was introduced along with the type in 1840. This hub is identifiable by the close proximity of the lowest arrowhead to the CA in AMERICA and the closed talons on the eagle. Although replaced by a new reverse hub in 1859, the Old Reverse hub continued in use, albeit in a limited fashion, through 1861. The first 1859 Old Reverse Quarter Eagle was not discovered until the 1960s. Today, this variety is well respected as a significant rarity in all grades. This is one of the two finest examples known to NGC and PCGS (12/08), and it is a lovely orange-gold representative. The finish is mostly frosty in texture, and the strike is sharp with the exception of the often seen lack of detail on the eagle's left (facing) leg feathers. There are only a few small abrasions here and there, with a pair of toning spots at the lower obverse rim that should serve as useful pedigree markers. A significant 19th century gold rarity at an unrivalled level of preservation.(#97788)

## Impressive 1859 Quarter Eagle Type Two Reverse, MS63

5229 **1859 New Reverse, Type Two MS63 PCGS.** Green-gold with occasional splashes of peach. Meticulously struck and fully lustrous. A couple of faint marks on the left obverse field deny an even higher grade. The small arrowheads are separated from each other, characteristic of the Type Two subtype. Housed in a green label holder. Population: 10 in 63, 5 finer (11/08).(#7788)

## Lustrous 1859-D Quarter Eagle, AU58

5230 **1859-D AU58 PCGS.** Variety 21-M, the only known dies. Just 2,200 quarter eagles were minted in Dahlonega in 1859, and few have survived in high grades. This was the final quarter eagle struck in Dahlonega. Winter recorded nine Mint State examples as the finest known to him, and several of those are in well established collections. The present piece is highly lustrous with brilliant yellow surfaces and splashes of subtle rose toning. Population: 16 in 58, 9 finer (12/08).(#7789)

## Low Mintage 1859-S Quarter Eagle, AU53

5231 **1859-S AU53 NGC.** The 1859-S is from a small mintage of 15,200 pieces, and is a fairly scarce coin. The present coin shows light wear, primarily on the reverse. Mint luster remains strong on the devices, and in sheltered areas. There are no abrasions of any note. Census: 4 in 53, 56 finer (12/08).(#7790)

## Desirable 1859-S Quarter Eagle, AU58

5232 **1859-S AU58 NGC.** A lovely near-Mint example, this 1859-S quarter eagle has medium yellow luster with splashes of orange toning on each side. Although quite a number of survivors are known, most grade just VF or XF. Those that are Mint State, or nearly so, are quite rare. Census: 30 in 58, 10 finer (12/08).(#7790)

## Scarce 1860 Old Reverse, Type One Quarter Eagle, AU55

5233 **1860 Old Reverse, Type One AU55 PCGS.** Relatively few of the 22,563 quarter eagles produced by the Philadelphia Mint in 1860 were struck from the older reverse hub type of pre-1859; which featured larger reverse letters and arrow heads than the newer reverse design. The exact numbers are unknown, however; and in fact the Old Reverse (Type One) quarter eagle variant was not even discovered until the 1990s (per Garrett and Guth). This is a fresh-looking Choice AU representative with boldly defined motifs and a couple of minor pinscratches on the reverse. Only the faintest degree of highpoint wear seems evident on the eagle's head, neck feathers, and wing tips. Population: 3 in 55, 11 finer (12/08).(#97791)

## Prooflike 1860 Quarter Eagle, AU58 Old Reverse Type

5234 **1860 Old Reverse, Type One AU58 PCGS.** Fully reflective obverse and reverse fields remain with bold design features and excellent yellow-gold luster. Traces of peripheral violet and rose toning is evident on both sides. The Old Reverse coins were once thought to be a rarity, but now they are considered scarce. Population: 3 in 58, 8 finer (12/08).(#97791)

## Appealing 1860-C Quarter Eagle, AU58

5235 **1860-C AU58 NGC.** Variety 19-J. Sharply struck for a Charlotte quarter eagle. The fields show a hint of semiprooflikeness and the resulting eye appeal is high. Garrett-Guth opine that the 15 or so Mint State examples documented in the combined NGC and PCGS population data are the result of "grade inflation and resubmissions." Census: 33 in 58, 12 finer (12/08).(#7792)

5236 **1861 Old Reverse, Type One XF45 PCGS.** Splashes of peach-gold overlie this original olive-green example. The Type One reverse is identified by its thick arrowheads, and is substantially scarcer on 1861 quarter eagles than the slender arrowheads Type Two. The fields display inconspicuous minor marks.(#97794)

## Elusive 1861 Old Reverse, Type One Select Quarter Eagle

5237 **1861 Old Reverse, Type One MS63 PCGS.** The large letters and arrowheads on the reverse confirm this important and elusive variety, one that Garrett and Guth describe as " ... very rare in any grade and ... many times rarer than the 1861 New Reverse quarter eagle." Mint-green and apricot compete for territory on this lustrous Select specimen. Well struck and minimally abraded. Population: 5 in 63, 4 finer (12/08).(#97794)

5238 **1861 New Reverse, Type Two MS61 PCGS.** A beautiful honey-gold quarter eagle from the first year of the Civil War. Exactingly struck, and the lustrous surfaces appear smooth despite a couple of light field grazes near AMERICA.(#7794)

## Challenging 1861-S Quarter Eagle Uncirculated Details

5239 **1861-S—Improperly Cleaned—NCS. Unc. Details.** Fine hairlines are observed under a 30X loupe, otherwise the cleaning noted by NCS is not so obvious. More troubling, however, is a dark toning spot between Liberty's upper forehead and star 4. 1861-S quarter eagles circulated heavily and, for some reason, many survivors are impaired in one way or another. With only seven Mint State specimens in the combined NGC and PCGS population data, a well detailed but slightly impaired example—such as the current offering—becomes more attractive.
*From The Findley Collection.*(#7795)

5240 **1866-S AU50 NGC.** The 1866-S has a mintage of only 38,960 pieces, and most survivors are heavily worn. The surfaces display an even, reddish-gold appearance with a few noticeable abrasions. Trifling softness is noted on the eagle.(#7804)

## Impressive Near-Mint 1866-S Quarter Eagle

5241 **1866-S AU58 PCGS.** Unlike the half eagle, eagle, and double eagle denominations, the motto was not added to the quarter eagle in 1866. The 1866-S is a rare issue in all grades, and most survivors are in VF and XF grades. This sharply struck and unmarked piece has a peripheral band of bright luster. A die crack meanders across the left obverse field to Liberty's chin. At least three sets of clashmarks are noted on both sides, below the hairbun and above the eagle's right (facing) shoulder. Population: 7 in 58, 3 finer (12/08). (#7804)

5242 **1867-S AU55 NGC. CAC.** Most San Francisco quarter eagles of this era were heavily circulated at their time of issue, making high-grade examples quite rare. The present coin is an attractive specimen, with bright green-gold color on the surfaces, and emerald toning around the devices. The reverse is softly struck at the center, as often seen on this date.(#7806)

5243 **1870-S AU58 NGC.** Luster dominates the borders of this smooth and precisely struck straw-gold quarter eagle. Only 16,000 pieces were struck for this San Francisco issue, since double eagles were the denomination of choice for bankers and traders. Census: 24 in 58, 12 finer (12/08).(#7812)

5244 **1872 AU53 PCGS.** Sharply struck with pleasing luster and clean fields. The face has a couple of small marks. A mere 3,000 quarter eagles were struck at Philadelphia in 1872, since exporters preferred large denominations and East Coast commerce was conducted with paper money.(#7815)

5245 **1872-S AU58 NGC.** An intricately struck slider from a low emission of only 18,000 pieces. Friction is limited to the open fields, and the only marks of any notice are relegated to the upper reverse field.(#7816)

5246 **1873-S—Reverse Scratched—NCS. AU Details.** The upper reverse field has a relatively small L-shaped pinscratch, but in all other regards, this is a nice Borderline Uncirculated example with substantial bright luster and original apricot toning. Just 27,000 pieces were struck.(#7820)

## Uncirculated 1875-S Two and a Half

5247 **1875-S MS61 NGC.** The 1875-S comes from a small mintage of 11,600 pieces. The NGC/PCGS population shows relatively few Mint State coins. This MS61 specimen displays soft luster on yellow-gold surfaces imprinted with hints of light tan. The design elements are well defined, save for the right (facing) claw and left (facing) leg. Some light marks are noted, slightly more so on the obverse. Census: 20 in 61, 8 finer (12/08).(#7823)

## The Finest Prooflike 1877 Quarter Eagle, MS62

5248 **1877 MS62 Prooflike NGC.** Most 1877 quarter eagles have seen at least a slight degree of circulation, with the most common certified grades being AU55 and AU58. As might be expected from a date with a mintage of 1,632 coins, a degree of prooflikeness is common for mint state pieces. The current lot certainly does not disappoint in that regard, and it is the finest to have received the prooflike designation from NGC (11/08). The yellow-gold surfaces have collected a few abrasions, but none out of character for the assigned grade.
*From The Findley Collection.*(#77826)

5249 **1884 MS61 NGC.** A lovely, glistening example with yellow-gold surfaces that display boldly struck design elements and scattered, tiny marks that limit the grade. A scarce issue in Mint State. Census: 26 in 61, 25 finer (11/08).(#7836)

## Lustrous 1890 Quarter Eagle, MS64

5250 **1890 MS64 PCGS.** The mintage of 8,720 coins was low enough to ensure that survivors are few and far between today. This near-Gem is near the top of the PCGS population chart, and a highly desirable example of the date. It is boldly detailed with excellent yellow-gold luster and hints of coppery toning along the upper right obverse border. Population: 23 in 64, 4 finer (12/08).(#7842)

## Outstanding 1890 Quarter Eagle MS62 Prooflike

5251 **1890 MS62 Prooflike NGC.** The 1890 quarter eagle boasts a low mintage of only 8,720 coins, making it rarer than the 1888 and 1889. The present coin has prooflike reflective surfaces, complementing an excellent strike. Handling marks are minimal and eye appeal is spectacular. Census: 3 in 62, 2 finer (12/08).(#77842)

5252 **1897 MS65 PCGS.** Lovely champagne-gold coloration adorns each side of this sharply struck Gem. The fields are ablaze with coruscating mint luster that produces a sensational cartwheel effect in the fields. A wonderful, high-end example of this popular issue. Population: 67 in 65, 32 finer (11/08).
*From The James Mossman Collection.*(#7849)

## Fantastic 1897 Quarter Eagle, MS67

5253 **1897 MS67 PCGS.** Smooth, impeccably preserved surfaces exhibit swirling luster. A penetrating strike delivers crisp definition to the design elements, further enhancing the already outstanding eye appeal. The 1897 is very difficult to locate at the Superb Gem level. Population: 7 in 67, 0 finer (12/08).(#7849)

### Gorgeous 1898 Quarter Eagle, MS66

5254 **1898 MS66 NGC.** During the 1880s and 1890s, most quarter eagle issues had very low mintages, such as the 24,000 coins produced in 1898. All of those dates are scarce, although most are available through Gem grades. This piece is fully defined with soft, frosty yellow-gold surfaces and considerable pinkish-rose patina. Census: 51 in 66, 26 finer (12/08).(#7850)

5255 **1905 MS65 NGC.** This intricately struck green-gold Gem has exuberant luster and only minor marks. A nice representative of the long-lived Liberty quarter eagle type.(#7857)

5256 **1907 MS65 PCGS.** Powerfully detailed with strong, satiny luster. Generally yellow-gold surfaces exhibit a measure of alloy at the lower reverse.(#7859)

### Desirable MS66 1907 Quarter Eagle

5257 **1907 MS66 NGC.** Warm peach-gold surfaces are beautifully lustrous with elements of satin. Razor-sharp striking definition enhances carefully preserved central devices. With a mintage of slightly over a third of a million pieces that was heavily saved, the 1907 has been a type collector favorite for decades.(#7859)

## PROOF LIBERTY QUARTER EAGLES

### Attractive 1890 Quarter Eagle, PR62 Cameo

5258 **1890 PR62 Cameo NGC.** The 1890 quarter eagle saw a mintage of 93 proof coins, about 50 of which are probably extant (Jeff Garrett and Ron Guth, 2006). NGC and PCGS have graded about 80 specimens, around 20 of which are Cameos. Exquisitely struck, frosty design features stand out on this PR62 Cameo. A few minuscule marks are noted on the peach-gold surfaces.
*From The Peter J. Adasek, M.D. Collection.*(#87916)

### Beautiful 1892 Quarter Eagle, PR62 Cameo

5259 **1892 PR62 Cameo NGC.** A lovely reddish hue adds to the eye appeal of this already gorgeous proof Liberty two and a half. The fields are watery and the devices frosty. However, close inspection with the aid of magnification reveals a negligible amount of hairlines in the fields, thus defining the conservative grade assigned by NGC. Approximately 50 survivors of this issue are believed extant at all levels of preservation.
*From The Peter J. Adasek, M.D. Collection.*(#87918)

### Lovely PR62 Cameo 1892 Quarter Eagle

5260 **1892 PR62 Cameo NGC.** Exquisitely detailed with pleasing contrast, as usual for this late 19th century proof gold issue. Though evidence of hairlines and contact in the lemon-gold fields precludes a finer designation, the visual appeal remains strong. One of just 105 specimens struck. Census: 6 in 62 Cameo, 14 finer (11/08). (#87918)

### Boldly Struck 1898 Quarter Eagle PR61 Cameo

5261 **1898 PR61 Cameo NGC.** An attentive strike leaves bold delineation on the design features, all of which yield pleasing contrast with the mirrored fields. Yellow-gold surfaces display blushes of red over each side. Patches of handling marks in the fields limit the grade. Nevertheless, this makes a nice type coin.
*From The Peter J. Adasek, M.D. Collection.*(#87924)

5262 **1902—Cleaned—ICG. PR60 Details.** Although the fields on both sides are lightly rubbed, the overall appearance is acceptable with fully mirrored yellow-gold fields and reflective, slightly contrasting devices.(#7928)

## Sharp 1902 Quarter Eagle, PR62

5263 **1902 PR62 NGC.** The yellow-gold surfaces of this quarter eagle are imbued with splashes of apricot, and possess sharply struck design features. A few wispy marks in the fields limit the grade. Still, a very sharp coin for the designated grade.
*From The Peter J. Adasek, M.D. Collection.*(#7928)

## Lovely 1903 Liberty Quarter Eagle, PR62

5264 **1903 PR62 PCGS.** Ex: Stecher Collection. This is a beautifully produced piece that exhibits needle-sharp definition on all design elements. Lovely reflectivity remains evident in the fields, which reveal just a few wispy hairlines. Population: 31 in 62, 86 finer (12/08).(#7929)

## Appealing 1904 Quarter eagle PR63 Cameo

5265 **1904 PR63 Cameo NGC.** Deeply mirrored field on this Select proof Cameo highlight the motifs. Uniform yellow-gold coloration covers both sides, each of which exhibits crisply impressed design features. Wispy handling marks in the fields account for the grade, but do not detract from the overall eye appeal.(#87930)

5266 **1905 PR58 PCGS. CAC.** An exactingly struck specimen that possesses orange and lemon tinged luster near design elements. The devices show no evidence of friction, but the open fields are subdued from brief non-numismatic handling. Proof gold coins were often spent by heirs or cash-crunched owners, since in many cases such pieces commanded little premium over face until after the FDR gold recall. A stingy 144 proofs were struck.(#7931)

## Brilliant 1905 Quarter Eagle, PR62

5267 **1905 PR62 NGC.** This boldly defined proof has brilliant and highly reflective yellow surfaces with satiny devices that fall just shy of a Cameo designation. Both sides are exceptional for the grade with only a few minor hairlines and contact marks.
*From The Peter J. Adasek, M.D. Collection.*(#7931)

## Fully Struck 1905 Quarter Eagle, PR62

5268 **1905 PR62 NGC.** Bright yellow-gold surfaces display a brilliant finish on the obverse, while the reverse yields modest field-motif contrast at various angles. An exacting strike results in complete delineation on the design features. A small alloy spot is visible in the left reverse field.
*From The Peter J. Adasek, M.D. Collection.*(#7931)

## Flashy 1905 Select Proof Quarter Eagle

5269 **1905 PR63 PCGS.** Rich orange-gold coloration adorns each side of this Select proof, complemented with exquisitely struck design features. A handful of minute marks precludes the attainment of the next highest grade; nevertheless, this piece generates considerable flash, and will fit comfortably into a high-grade gold collection. (#7931)

### Sharply Struck 1906 Select Proof Quarter Eagle

5270 **1906 PR63 NGC.** This Select proof quarter eagle displays noticeable field-device contrast, especially when is tilted slightly beneath a light source. Under magnification, the yellow-gold surfaces reveal hints of light green and rose. Sharply struck, and showing just a few minor marks.
*From The Peter J. Adasek, M.D. Collection.*(#7932)

## INDIAN QUARTER EAGLES

### Beautiful Gem 1908 Indian Head Quarter Eagle

5271 **1908 MS65 PCGS.** First year of issue for the Indian Head quarter eagle. This is a coin with extraordinary eye appeal. The surfaces exhibit unusually bright mint frost, and lovely honey-gold and lime toning. Both sides of the piece reveal near-flawless preservation. A beautiful Gem example of this highly popular type coin.
*From The James Mossman Collection.*(#7939)

### Attractively Toned 1908 Gem Quarter Eagle

5272 **1908 MS65 PCGS.** A medley of yellow-gold, mint-green, and apricot patination enriches both sides of this Gem quarter eagle, and an attentive shrike leaves good definition on the design features, except for the usual weakness on the eagle's right (facing) shoulder. Lustrous surfaces are nicely preserved.(#7939)

### Lustrous 1908 Quarter Eagle, MS66

5273 **1908 MS66 NGC.** The devices throughout, save for the Indian's cheek, are remarkably clean and free of anything beyond a couple of the hair-thin abrasions that appear on the obverse high point. The amber-gold surfaces glow with soft luster, and the overall eye appeal is extraordinary. NGC has certified only three examples finer (12/08).(#7939)

5274 **1911 MS63 NGC.** Changes in the planchets for this date resulted in satiny mint luster and slightly granular surfaces. The present coin exhibits a sharper than average strike, which is often soft on this date. Overall eye appeal is excellent.
*From The Findley Collection.*(#7942)

### Delicately Toned 1911-D, AU Details

5275 **1911-D—Improperly Cleaned—NCS. AU Details.** Semi-bright surfaces display a subtle mixture of yellow-gold, light green, and orange coloration. The design elements are nicely defined, with just high-point wear. The mintmark shows clearly, but is not bold. A faint hair-thin mark is visible in the left obverse field. A nice piece overall, despite the light cleaning.
*From The Peter J. Adasek, M.D. Collection.*(#7943)

### Key 1911-D Quarter Eagle, AU53

5276 **1911-D AU53 PCGS.** Both sides of this key-date quarter eagle display attractive apricot-gold patina splashed with mint-green. Sharp detail is apparent on the design features, except for areas of minor high point wear. While we cannot call the mintmark "bold," it is nevertheless quite clear. A few minute circulation marks are not detracting. Housed in a green-label holder.(#7943)

## Favorite 1911-D Quarter Eagle, AU53

5277 **1911-D AU53 NGC.** Lightly circulated, yet fundamentally pleasing 1911-D quarter eagles such as the present coin are irresistible to collectors assembling date sets in similar condition. This well struck, still-lustrous example shows few marks and only minor wear across the lavender-accented straw-yellow surfaces.(#7943)

## AU55 Sharpness 1911-D Quarter Eagle

5278 **1911-D—Cleaned—ICG. AU55 Details.** The fields are slightly glossy, and minor wear is present on the Indian's cheekbone and the eagle's shoulder. Nonetheless, this well defined example will allow the collector to fill the most challenging hole within the Indian quarter eagle series. A faded thin mark passes through two letters in the motto, but the piece is otherwise minimally abraded. (#7943)

## Interesting AU55 1911-D Quarter Eagle

5279 **1911-D AU55 PCGS.** Light yellow-gold and wheat-gold shadings overall with slight deepening present near the rims. This briefly circulated example retains impressive detail and the majority of its original luster. An excellent key-date Indian quarter eagle for the budget-minded series enthusiast.(#7943)

## 1911-D Quarter Eagle, AU58 Details

5280 **1911-D—Cleaned—ANACS. AU58 Details.** The semi-bright, lightly cleaned surfaces of this key-date quarter eagle display yellow-gold coloration imbued with traces of light tan. Relatively strong definition is apparent on the design features, save for minor softness on the eagle's shoulder. Several faint pinscratches are visible in the upper reverse field.(#7943)

## Popular Near-Mint 1911-D Quarter Eagle

5281 **1911-D AU58 NGC.** Only a trace of rub is visible in the centers. Despite brief circulation, the straw-gold surfaces remain boldly radiant with a subtly matte texture. Boldly struck and minimally marked with the mintmark slightly weak (as usually seen) but intact and readily readable. An interesting example of this key issue. (#7943)

## Lustrous 1911-D Quarter Eagle, AU58

5282 **1911-D AU58 NGC.** This is the Weak D variant of the key-date 1911-D quarter eagle, with the D faint but clearly discernible. The surfaces are quite close to Mint State, with nearly all of the luster intact and attractive orange-gold surfaces. A couple of abrasions are noted above IN GOD WE TRUST, heavier than most. (#7943)

### Attractive 1911 Weak D Quarter Eagle, AU50

5283 **1911-D Weak D AU50 PCGS.** Only a faint trace of the mintmark is visible, but the other characteristics that identify 1911-D quarter eagles are visible, including the wire rim on the obverse and the small die line hidden near the arrows on the reverse. Housed in a green-label holder, this piece has deep yellow surfaces with considerable violet toning.(#7954)

5284 **1914 MS62 NGC.** Satiny and boldly struck, with intermingled light-green and rose coloration. A few trivial marks are observed on each side. An attractive Mint State example of this scarce low-mintage issue.
*From The Peter J. Adasek, M.D. Collection.*(#7946)

5285 **Quartet of 1915 gold coins:** A matched denomination set of 1915 Philadelphia gold coins from the quarter eagle to the double eagle, each PCGS MS63 and each in a green-label holder. All four coins have rich yellow luster with frosty surfaces and bold design details. (Total: 4 coins)(#7948)

5286 **1915 MS64 PCGS.** Highly lustrous surfaces with brilliant yellow-gold that has accents of light pink toning. Housed in a green-label PCGS holder.(#7948)

5287 **1925-D MS64 NGC.** This issue marks the first time quarter eagles were struck since 1915. The present coin is fully struck, with satiny luster and abundant eye appeal. Only a few handling marks limit the grade.(#7949)

5288 **1927 MS64 NGC.** An excellent strike and attractive, satiny mint luster highlight this Near Gem late-date quarter eagle. A few, small handling marks on the reverse define the grade.(#7951)

## THREE DOLLAR GOLD PIECES

5289 **1854—Mount Removed—NCS. XF Details.** Mounts have been removed at 3 and 9 o'clock on the reverse, with the nearby rim repaired and the fields sunken and smoothed. The reverse also displays two lengthy straight pinscratches, presumably used to guide placement in jewelry.(#7969)

5290 **1854—Improperly Cleaned—NCS. XF Details.** This first-year type coin has a glossy and slightly bright appearance. Inspection beneath a lens reveals countless minute marks. It may have once been in a piece of jewelry.(#7969)

5291 **1854—Mount Removed, Improperly Cleaned—NCS. AU Details.** There is no obvious sign of a removed mount, but both sides have a cloudy appearance and a couple of abrasions are near the CA in AMERICA.(#7969)

5292 **1854 AU53 PCGS.** A shining, faintly worn representative of this first-year issue, well-defined with rich orange-gold and sun-yellow color. Only wispy abrasions are present.(#7969)

5293 **1854 AU55 NGC.** Luster fills the wreath, portrait, and legends. This unmarked and well impressed example will satisfy those on the hunt for this scarce first-year gold type coin.(#7969)

### Choice AU 1854 Three Dollar Gold Piece

5294 **1854 AU55 NGC.** The first year of issue for the three dollar gold coins that were authorized by Congress when they passed the Act of February 21, 1853. It was the same act that adjusted weights of the silver coins, creating the With Arrows varieties. This piece has a trace of rub on the high points of the design, but retains nearly full green-gold luster.(#7969)

5295 **1854 AU58 NGC. CAC.** Luster dominates all but the open fields. Light wear on the hair and plumes confirms momentary circulation, but neither side has any remotely distracting marks.(#7969)

### Uncirculated 1854 Three Dollar Gold

5296 **1854 MS61 PCGS.** This yellow-gold type coin has effusive luster, particularly across the legends and devices. A couple of thin marks are noted above the portrait, and the left obverse field is lightly abraded. DOLLARS was increased in size on the 1855 issues, which makes the first-year 1854 a single year design subtype.(#7969)

5297 **1854-O Fine 15 PCGS.** The 1854-O is popular as the sole New Orleans issue of the denomination. Its mintage of 24,000 pieces is low, since the facility concentrated on Seated coinage that year. This green-gold and sun-yellow example exhibits wear appropriate to its grade, but is without any bothersome abrasions.(#7971)

### Lovely XF 1854-O Three Dollar

5298 **1854-O XF40 NGC.** Bright luster beckons from the legends and devices of this lightly abraded first year three dollar gold piece. A good strike aside from softness on the 5 in the date. A minor strike-through is noted beneath the TA in STATES. The sole New Orleans issue of the denomination.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7971)

5299 **1855 AU55 PCGS.** Rich wheat-gold and honey-orange hues dominate on this briefly circulated, yet immensely lustrous three dollar gold. Minimally marked and attractive.(#7972)

## Strongly Defined 1855 Three Dollar, AU58

5300 **1855 AU58 NGC.** Traces of luster reside in the protected areas of this near-Mint State three dollar gold piece, and a well directed strike imparts strong definition to the design features. A few minute contacts are visible on the honey-gold surfaces, as well as faint slide marks.(#7972)

5301 **1856—Reverse Repaired, Improperly Cleaned—NCS. AU Details.** Bright from a polishing, and the field is repaired beneath the wreath, where any S mintmark might have been. The reverse periphery also has a couple of faint scratches between 1 and 3 o'clock.(#7974)

## Charming AU53 1856-S Three

5302 **1856-S AU53 PCGS.** Medium S. Similar to the 1856-S half eagle and eagle, two different mintmark sizes are known for the 1856-S three dollar. This is a charming San Francisco type coin that has light gold toning and no obtrusive abrasions. Luster shimmers from protected regions, and wear is generally confined to Liberty's hair and the center of the corn stalks. Population: 22 in 53, 66 finer (12/08).(#7975)

5303 **1859—Damaged—NCS. XF Details.** The obverse field is typically abraded and Liberty's cheek has a minor scratch, but perhaps the NCS assessment is unduly strict. A 'dirty gold' example that retains glimpses of crud in protected areas, an indication that the piece is original.(#7979)

## Lustrous 1859 Three, MS61

5304 **1859 MS61 NGC.** The 1859 is a moderately low mintage issue, with 15,558 coins minted. Typical survivors are XF or AU grade. Despite some evidence of a weak strike at the upper obverse and lower reverse, this lovely Mint State piece has lustrous yellow-gold surfaces and excellent aesthetic appeal for the grade. Census: 39 in 61, 57 finer (12/08).(#7979)

## Elusive 1860 Three Dollar MS61

5305 **1860 MS61 NGC.** Luster penetrates the open fields, and the highpoints show only trivial blending of detail. Marks are surprisingly minimal. An attractive Mint State example from the year of the Pony Express. A mere 7,036 pieces were struck. Census: 28 in 61, 39 finer (11/08).
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7980)

## Impressive 1860 Three Dollar, MS62

5306 **1860 MS62 PCGS.** This survivor from the low mintage of 7,036 coins has rich honey-gold patina with fully lustrous and pleasing surfaces. Hints of green and rose color are visible on both sides, adding to its overall aesthetic appeal. Population: 29 in 62, 26 finer (12/08).(#7980)

5307 **1860-S—Mount Removed, Improperly Cleaned—NCS. AU Details.** Mounts have been removed from the reverse at 3 and 9 o'clock, where the piece was once affixed to jewelry. The dusky orange toning appears artificial, and the underlying surfaces are subdued and faintly hairlined. Still a collectible example of this rare San Francisco issue, which had a little-saved mintage of just 7,000 pieces.(#7981)

## Satiny 1861 Three Dollar, MS61

5308 **1861 MS61 NGC.** With only one exception, all gold denominations had large mintages during the Civil War year of 1861; less than 6,000 Three Dollar Gold pieces were struck. Most survivors are in XF to AU condition. The grade of this well struck and moderately prooflike piece is limited only by a couple of curved obverse pinscratches. Census: 25 in 61, 28 finer (12/08).(#7982)

## Attractive 1861 Three Dollar, MS62

5309 **1861 MS62 PCGS.** Apricot-gold patina enriches both sides of this three dollar gold coin, and a well executed strike sharpens the design features. Fairly strong die polish lines in the fields impart prooflike tendencies. Minor handling marks limit the grade. Housed in a first generation holder.(#7982)

## Pleasing AU53 1865 Three Dollar

5310 **1865 AU53 PCGS.** Sun-gold at its base with lavender and mint overtones to the still-lustrous parts of the fields. Well-defined for this lower-mintage Civil War-era issue, though light wear crosses the high points. Scattered wispy marks contribute to the grade. Population: 12 in 53, 31 finer (12/08).(#7986)

## Splendid 1869 Three, AU58

5311 **1869 AU58 NGC.** In their *Gold Encyclopedia*, Jeff Garrett and Ron Guth state "Thanks to a low mintage, the 1869 $3 gold piece is a real challenge for the date collector." With three different examples included, the present sale provides an real opportunity to acquire an example. This near-Mint example is lustrous with light to medium yellow-gold surfaces and excellent eye appeal.(#7990)

## Reflective 1869 Three Dollar, MS61

5312 **1869 MS61 NGC.** Lovely yellow-gold surfaces retain considerable prooflike reflectivity in the obverse and reverse fields of this elusive piece. The low mintage of just 2,500 coins was sufficient to ensure that the date is hard to locate today. Census: 11 in 61, 5 finer (12/08).(#7990)

5313 **1870 AU58 NGC.** The moderately prooflike surfaces are a lovely medium-gold with glints of deeper orange-gold near the rims. Minuscule grade-consistent abrasions are noted only under magnification. The reverse die is rotated about 45 degrees counterclockwise. NGC has graded 24 pieces finer (11/08). (#7991)

## Shining 1874 Three Dollar Gold, MS60

5314 **1874 MS60 NGC.** A shining, strictly Mint State example of this popular type issue, which boasts the fourth-highest mintage for the entire series. Shining lemon-gold surfaces offer occasional green-gold accents, and the central devices are pleasingly detailed. A number of wispy abrasions affecting each side account for the grade. (#7998)

## Popular 1874 Three Dollar, MS61

5315 **1874 MS61 NGC.** Partially prooflike fields on both sides of this three dollar piece establish a degree of contrast with the devices at all angles. An attentive strike imparts relatively sharp definition to the design elements. Magnification reveals distributed light grazes. The 1874 is a popular type coin.(#7998)

## Radiant 1874 Three Dollar MS62

5316 **1874 MS62 NGC.** This yellow-gold type coin has extensive shimmering luster and a pleasing strike. No marks merit mention, and the wreath is free from any friction. The 1874 is more available than neighboring dates, but examples of the present quality are nonetheless desirable.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7998)

## Tempting MS62 1874 Three Dollar Gold

5317 **1874 MS62 NGC.** At 41,800 pieces coined, the 1874 was the first three dollar gold coin with a five-figure or better mintage since 1859. The wheat-gold surfaces of this appealing example have pale amber accents near the rims. Well struck with light to moderate abrasions on each side and softly radiant fields.(#7998)

## 1874 Three Dollar, MS61 Prooflike

5318 **1874 MS61 Prooflike NGC.** This is a fortunate piece, for with a relatively high production for the issue of nearly 42,000 pieces, this example must have been a fresh strike from the dies, before the prooflikeness wore off. There is splendid field-device contrast over the orange-yellow surfaces, and a few minor field abrasions, while accounting for the grade, fail to dampen the appeal. Census: 5 in 61 Prooflike, 3 finer (12/08).(#77998)

5319 **1878—Holed—NCS. AU Details.** A round hole is obvious between the ES in STATES, and a pinscratch crosses the reverse between 2 and 6 o'clock. Fainter pinscratches are noted near Liberty's chin, and the surfaces are slightly glossy.(#8000)

5320 **1878 AU58 NGC.** A rich orange-gold near-Gem of this popular three dollar date. Liberty's eyebrow and the edges of the cotton leaves show slight friction, but substantial luster beckons from the undisturbed surfaces.(#8000)

5321 **1878 AU58 NGC.** Exceptionally well struck, with essentially complete luster and lovely yellow-gold and rose toning. A conservatively graded near-Mint example of this popular issue for type purposes.
*From The Peter J. Adasek, M.D. Collection.*(#8000)

## Appealing MS60 1878 Three Dollar Gold

5322 **1878 MS60 NGC.** Though a number of wispy abrasions are present in the lustrous fields, the overall eye appeal is better than the MS60 designation might suggest. Generally sun-gold surfaces show occasional honey and lilac accents that create considerable visual interest. A noteworthy type coin.
*From The Omaha Collection.*(#8000)

5323 **1878—Cleaned—ICG. MS60 Details.** This popular three dollar issue has rose toning over medium yellow-gold surfaces. An excellent piece for a type collection.
*From The Findley Collection.*(#8000)

## Pleasing 1878 Three Dollar Gold Piece, MS61

5324 **1878 MS61 NGC.** Brassy-gold lustrous surfaces exhibit whispers of light pink, along with some minuscule handling marks. The design elements are well impressed. Minor planchet roughness is noted on the bow, as are grease streaks below the 1 in the date. Actually a very nice coin for the grade designation.
*From The Peter J. Adasek, M.D. Collection.*(#8000)

## Uncirculated 1878 Three Dollar

5325 **1878 MS61 NGC.** This shimmering gold type coin has an assertive strike, and neither side has any consequential marks. Those in search of a Mint State example of this widely pursued denomination need look no further. 19th century collectors must also have cherished the three dollar gold coin, since a surprising number have survived in Uncirculated grades, relative to the initial mintages.
*From The Findley Collection.*(#8000)

### Attractively Toned 1878 Three Dollar, MS61

5326 **1878 MS61 NGC.** A medley of apricot-gold, mint-green, yellow-gold, and lilac patination graces both sides of this three dollar piece, and an attentive strike brings about strong definition on the design elements. A scattering of minute marks results in localized disruption of the luster flow.(#8000)

### Appealing 1878 Three Dollar Gold, MS61

5327 **1878 MS61 ANACS.** Swirling luster and lovely wheat-gold coloration are hallmarks of this attractive example. Minimally marked for the grade, and possibly underrated by ANACS at MS61. This date is the most plentiful and available in the series, making this piece an ideal choice for type purposes.(#8000)

### Notable MS62 1878 Three Dollar Gold

5328 **1878 MS62 PCGS.** This lovely yellow-gold example is well struck save for light softness in Liberty's hair. The surfaces reveal a few marks, including one on Liberty's cheek and two below the wreath bow that limit the grade. The 1878 three dollar gold issue had a high mintage in excess of 82,000 pieces, and is one of the most easily obtained of all three dollar dates.(#8000)

### Popular 1878 Three, MS62

5329 **1878 MS62 PCGS.** Well struck and highly lustrous, with rich rose-gold toning over both sides. Scattered small marks seem minimal for the grade. This issue is easily the most common of the three dollar gold series, according to the *Encyclopedia of U.S. Gold Coins 1795-1933*, by Jeff Garrett and Ron Guth.(#8000)

### Glowing 1878 Select Three Dollar

5330 **1878 MS63 NGC.** Glowing luster emanates from both sides of this Select three dollar, and a well directed strike leaves strong definition on the design features. Yellow-gold surfaces display mint-green and lilac, and reveal a few minor contacts that just barely preclude the next highest grade. Pleasing overall eye appeal.
*From The Peter J. Adasek, M.D. Collection.*(#8000)

### Choice 1878 Three Dollar

5331 **1878 MS64 NGC.** Delicate peach and olive-gold toning visits this lustrous and minimally abraded three dollar piece. A good candidate for a quality type set. The 1878 has a significantly lower mintage than the 1854, but a greater number of examples were set aside, perhaps by banks as a bullion reserve.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#8000)

## Low Mintage AU58 Details
## 1879 Three Dollar Gold

5332 **1879—Cleaned—ANACS. AU58 Details.** The moderate field reflectivity is enhanced by a mild cleaning, but this exactingly struck example has barely a whisper of friction on the corn husks and on the hair above the ear. Faintly hairlined, but free from noticeable marks. A mere 3,000 pieces were struck.(#8001)

## Rare 1882 Three Dollar Gold, MS61

5333 **1882 MS61 ANACS.** With a total issue of only 1,500 business strikes, the 1882 is another of the many elusive, low mintage three dollar gold pieces that make this series such a challenge to collect. This fully lustrous piece exhibits a few minor surface marks, mostly trivial.(#8004)

## Flashy MS63 ★ 1882 Three Dollar

5334 **1882 MS63 ★ NGC.** The obverse is prooflike and the reverse is semi-prooflike. This combination undoubtedly inspired the Star designation from NGC. Well struck and flashy with only a couple of wispy marks on the left obverse field. The 2 in the date is recut, as always on the scarce business strikes. Just 1,500 pieces were struck. Census: 1 in 63 ★, 2 finer with a Star designation (11/08). *From The Omaha Collection.*(#8004)

5335 **1884 XF45 NGC.** Bright luster outlines the legends and devices. Surprisingly sharp, and marks are limited to a few thin lines near DOLLARS. Just 1,000 pieces were struck, and third party populations suggest not many more than 100 examples have survived.(#8006)

## Appealing 1885 Three Dollar, MS62 Prooflike

5336 **1885 MS62 Prooflike ANACS.** It is unsurprising that this piece should be certified Prooflike, given that the business-strike mintage is a skimpy 801 pieces, second only to the 1881 emission which saw only 500 coins made. A small patch of light abrasions appears in the lower left obverse field with other scattered elsewhere, none individually distracting. The surfaces are bright yellow-gold, with broad appeal.(#78007)

## Choice XF 1886 Three Dollar Gold

5337 **1886 XF45 NGC.** Pretty lilac patina graces the rims of this low-mintage survivor from late in the Indian Princess three dollar series, with orange-gold centers and good eye appeal. A few light marks are consistent with the Choice XF grade, but none is individually distracting. The original mintage was only 1,000 coins.(#8008)

## Lovely MS63 1887 Three Dollar

5338 **1887 MS63 PCGS.** Doubling appears on RICA, as often appears on the business strikes of this date. Coming so close to the end of the series, the 1887 had the highest mintage of any date in the 1880s at 6,000 coins, but examples scarcely circulated, and some pieces may have been melted before ever escaping the Mint. This lovely Select Mint State piece displays satiny orange-gold surfaces with few visible abrasions. A small rectangular strike-through appears before Liberty's nose, as made.(#8009)

## Desirable 1887 Three Dollar, MS64

5339 **1887 MS64 PCGS.** A Choice Mint State specimen, the 1887 three dollar gold piece is often available in higher circulated and lower Mint State grades, but seldom as fine as the present example. Only 6,000 coins were minted, yet that is the highest mintage of any date in the 1880s. Nearly all survivors grade either AU or Mint State. However, it is uncertain how many have survived, or even how many left the Mint in the first place. It seems that an unknown quantity may have been melted, having never entered circulation. Population: 52 in 64, 34 finer (12/08).(#8009)

5340 **1888—Damaged, Improperly Cleaned—NCS. AU Details.** No damage is readily evident, but this low mintage three dollar piece is whizzed and has a luminous appearance and microgranular surfaces. (#8010)

## Brilliant 1888 Three Dollar, MS62

5341 **1888 MS62 NGC.** Mintages remained quite low near the end of the three dollar gold series, with only 5,000 business strikes minted in 1888. This lovely piece is sharply detailed with frosty light yellow surfaces and full luster. The date is frequently available as the final few issues of the denomination failed to circulate.(#8010)

## Pretty MS63 1888 Three Dollar

5342 **1888 MS63 PCGS.** This is an attractive Select Uncirculated example of the next-to-last three dollar gold issue, one produced to the extent of only 5,000 business strikes. The pretty surfaces are reddish-orange, with relatively few marks noted on either side save for a thin scrape on the reverse under the denomination. (#8010)

## Impressive Select 1889 Three Dollar

5343 **1889 MS63 NGC.** This lightly abraded Select example has a bold strike and pleasing eye appeal. Subtle apricot toning visits lustrous surfaces. Unlike its gold dollar counterpart, the final-year 1889 three dollar is very scarce in Mint State, due primarily to a tiny mintage of 2,300 pieces.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#8011)

# PROOF THREE DOLLAR GOLD PIECE

## PR62 Cameo 1887 Three Dollar

5344 **1887 PR62 Cameo PCGS.** The frosted motifs display obvious contrast with the darkly reflective fields. The strike is penetrating, and the surfaces are less abraded than is expected of the grade. An affordable specimen with substantial eye appeal. A mere 160 proofs were struck. Population: 4 in 62 Cameo, 19 finer (11/08).
*From The Peter J. Adasek, M.D. Collection.*(#88051)

### Green-Gold 1800 BD-2 Half Eagle, XF Details

5345 **1800—Mount Removed, Bent—NCS. XF Details.** Breen-6438, BD-2, High R.3. Evidence of a mount is visible at 12 o'clock, with a slight bend at that location. This pleasing light yellow piece has been cleaned, but overall it is an attractive piece despite its several imperfections.(#8082)

### Bright 1800 Five Dollar AU55, BD-5

5346 **1800 AU55 NGC.** BD-5, High R.3. Attributed by the blunt 1 in the date, the distance between star 13 and Liberty's bust and the star touching the back of the eagle's head. Bright yellow-gold surfaces display nicely struck design features. A scattering of light ticks does not detract. The reverse is rotated about 20 degrees counterclockwise.(#8082)

### Desirable 1802/1 BD-1 Half Eagle, AU50

5347 **1802/1 AU50 NGC.** Breen-6440, BD-1, High R.4. Key diagnostics include a previous 1 centered within the 2 in the date that is free of the bust; and a reverse leaf tip that points directly to the center of I in AMERICA. Several die cracks are evident on the reverse. Light green-gold surfaces have only a few trivial surface marks on each side. A splash of violet toning is confined to star 11.(#8083)

### Scarce 1802/1 Five Dollar, AU55 Breen-6440, BD-7, R.5

5348 **1802/1 AU55 NGC.** Breen-6440, BD-7, R.5. The 2 in the date touches the bust, the 1 is left of center in the two, and the reverse Ts are missing the right foot. The bright yellow-gold surfaces of this Choice AU example display whispers of apricot, along with relatively well defined design features. Each side reveals the expected number of marks seen on coins experiencing brief circulation.(#8083)

### XF Details 1803/2 Five Dollar, BD-1

5349 **1803/2—Mount Removed, Whizzed—NCS. XF Details.** Breen-6441, BD-1, R.4. All 1803/2 half eagles are overdates, but a die crack between the TE in UNITED determines the variety. Subtle repairs are noted between 11 and 12 o'clock on the obverse, and near 6 o'clock on the reverse. The right obverse is abraded, and both sides are a bit bright and show unnatural luster from whizzing. *From The Omaha Collection.*(#8084)

### Reflective 1803/2 BD-2 Half Eagle, AU Details

5350 **1803/2—Improperly Cleaned—NCS. AU Details.** Breen-6441, BD-2, R.5. The right foot of T in LIBERTY is missing, as are the feet of all three Ts on the reverse. Key diagnostics are on the reverse, as the obverse dies were also used on BD-1 and BD-3. These include a star well away from the beak, and the upright of E in STATES over a cloud space.

An amazing deep green-gold example with rich orange luster along the borders. Both sides show evidence of mirrored surfaces, with the reverse especially reflective.(#8084)

## Pleasing 1804 BD-1 Half Eagle, AU55

5351 **1804 Small 8 AU55 PCGS.** Breen-6443, BD-1, High R.4. The 1 in the date has a blunt top, and the 8 is normal (formerly called the Small 8, but Bass and Dannreuther say it is the correct size). The 4 is small. There is a die crack from the rim through the 0, running upward into the portrait. On the reverse a straight graver's line appears, connecting the left (facing) shield point with the B in the motto, through star 12, and to the upper beak. TE are apart, with the right side of the upright of E above the break between two clouds.

A wonderful example with lustrous green-gold surfaces and light peripheral rose toning. The surfaces have a few typical abrasions, but overall this piece is fully consistent with the grade.(#8085)

## Uncirculated Details 1804 Five Dollar Small 8 Over Large 8, BD-6

5352 **1804 Small 8 Over Large 8—Improperly Cleaned—NCS. Unc. Details.** Breen-6442, BD-6, R.5. Bass-Dannreuther Die State a/b. A faintly hairlined but still desirable early half eagle. The strike is virtually full, with only a hint of softness on the left-side vertical shield lines and the left (facing) claw. Luster shimmers across design elements, and the only remotely noticeable mark is a short pinscratch between obverse stars 5 and 6.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#8086)

## 1805 Close Date Half Eagle, AU50 Details, BD-1

5353 **1805-Ex-Jewelry, Cleaned—ANACS. AU50 Details.** Close Date, Breen-6445, BD-1, High R.3. This precisely struck Heraldic Eagle five has little evidence of wear, but it is glossy and hairlined from a past cleaning. No adjustment marks or notable abrasions are present.
*Ex: Marvin P. Matlock, M.D. Collection (Bowers and Merena, 3/91), lot 1744.*(#8088)

## Scarce BD-2 1805 Half Eagle, AU55

5354 **1805 AU55 PCGS.** Breen 6445, BD-2, R.4. While the 1805 half eagle is available as a date, the BD-2 variety is scarce, with perhaps 100 examples surviving. The present coin is an attractive example, with a sharp strike and much original mint luster remaining. A trace of friction on the cheek limits the grade.(#8088)

## Desirable AU55 1807 BD-6 Half Eagle

5355 **1807 Bust Right AU55 PCGS.** Large Date, Breen-6452, BD-6, High R.4. Obverse State a, Reverse State b, faint crack through the N of UNITED on the reverse and an early-state obverse. An attractive example of this very scarce variety. Warmly lustrous yellow-gold surfaces show occasional tan accents and an aura of originality. Only modest wear crosses the high points of the well struck devices. The obverse shows only a few light ticks, though a significant abrasion is present in the left reverse field. Still, an interesting coin that displays delightfully. Housed in a green label holder.(#8092)

## Interesting 1808 Five, XF Sharpness

5356 **1808—Scratched, Cleaned—ANACS. XF Details, Net VF30.** Wide 5D, Breen-6457, BD-4, High R.3. This is a relatively common variety, available in a wide range of grades up to Mint State. For the collector seeking an affordable example, this coin is a good candidate. The obverse has a curved scratch through Liberty's profile, extending from the border left of the date up to star 6. Bright yellow-gold color mingles with deep rose toning on both sides. (#8102)

## Uncirculated Details 1808 Five Dollar Scarce BD-4, Wide 5 D

5357 **1808—Improperly Cleaned—NCS. Unc. Details.** Wide 5D, Breen-6457, BD-4, High R.3. The obverse field has faint hairlines, but the reverse appears unimpaired, and on its own grades MS63 to MS64. A wispy mark appears in the field near Liberty's mouth, the obverse rim has a minor ding at 2 o'clock, and there is a brief mark beneath Liberty's cap. A sharply struck and lustrous example with glimpses of peripheral peach toning.(#8102)

## Lovely AU Details 1809/8 Half Eagle, BD-1

5358 **1809/8—Reverse Improperly Cleaned—NCS. AU Details.** Breen-6458, BD-1, High R.3. The only dies for this scarce Capped Bust Left date. This is an evenly struck khaki-gold representative that has a band of bright luster across both borders. Extensive rotation of the reverse beneath a light and a loupe eventually locates a few trivial hairlines, but most collectors would be delighted with the present piece. *From The Martin L. Diffenbaucher, Jr. Collection.*(#8104)

## Important Uncirculated 1810 Small Date Tall 5 Half Eagle, BD-1

5359 **1810 Small Date, Tall 5 MS61 PCGS.** Breen-6462, BD-1, High R.3. Considerably scarcer than the usually seen 1810 variety, the Large Date, Large 5. This is a sharply struck and well balanced representative with no individually relevant abrasions. Luster penetrates the open fields and shimmers across the cheek. Faint luster grazes on the fields and cheek determine the grade. This is Bass-Dannreuther Die State c/c. Delicate die cracks connect stars 3 to 6, and a second die crack spans from above UNUM through the wingtip and the AME in AMERICA. Population: 11 in 61, 27 finer (12/08).(#8106)

## 1811 Half Eagle, Small 5, BD-2 AU Details

5360 **1811 Small 5—Scratched, Cleaned—ANACS. AU Details.** Breen-6464, BD-2, R.3. A crisply struck and lightly circulated olive-gold piece that has faint adjustment marks at 11 o'clock. Wispy hairlines are on both sides but more prominent on the obverse. Two wavy pinscratches intersect on the cheek, and the left obverse field has a lengthy pinscratch.(#8109)

### 1812 Capped Head Five, BD-2, XF Details

5361 **1812—Damaged, Mount Removed—NCS. XF Details.** Narrow 5D, Breen-6465, BD-2, High R.4. This variety, with the 5 and D in the denomination closely spaced, is far more elusive than the Wide 5D pairing that shares the same obverse die, the two marriages constituting all half eagle varieties for the year. Formerly mounted in a piece of jewelry, the bright green-gold surfaces have heavy scratches in the fields.(#8112)

### Sharp 1812 Half Eagle, AU Details

5362 **1812—Repaired, Whizzed—NCS. AU Details.** Narrow 5D, Breen-6465, BD-2, High R.4. Although both sides retain considerable brilliant yellow-gold luster, the surfaces have been tooled and smoothed to diminish the effects of some unidentified damage that the coin was subjected to.(#8112)

5363 **1813—Mount Removed—NCS. VF Details.** Breen-6467, BD-1, R.2. Clear evidence of an old, removed mount is visible at 12 o'clock on this heavily abraded green-gold half eagle.(#8116)

### Attractive 1813 BD-1 Half Eagle, VF Details

5364 **1813—Improperly Cleaned—NCS. VF Details.** Breen-6467, BD-1, R.2. Light green-gold surfaces are the backdrop for minor wear and light hairlines. The surfaces are relatively clean for the grade, although a few small rim bumps are visible on the reverse. Still attractive for the type collector.(#8116)

### Lovely 1814/3 BD-1 Half Eagle Rarity, AU58

5365 **1814/3 AU58 NGC. CAC.** Breen-6468, BD-1, High R.4. The 1814 overdate half eagle, the only variety of the year, is generally unrecognized as an important rarity in the series. It is much rarer than the 1813, but overshadowed by the 1815 half eagle. This near-Mint example has rich green-gold surfaces with excellent luster, and only a trace of high point wear.(#8117)

## CLASSIC HALF EAGLES

5366 **1834 Plain 4 AU53 NGC.** First Head, Breen-6501, McCloskey 3-B, R.2. This apricot-gold representative shows light wear on the eyebrow and curls, but most design detail remains and luster glints from the legends and devices.(#8171)

### Alluring 1834 Half Eagle, Plain Triple-Punched 4 AU58, Breen-6502

5367 **1834 Plain 4 AU58 ANACS.** Second Head, Breen-6502, McCloskey 2-A, R.2. Triple-punched 4 in the date. This is a lustrous representative with visually enticing lime-green and apricot coloration across both sides. Faint highpoint wear and a few wispy hairlines are noted, along with a vertical abrasion in the right obverse field.(#8171)

5368 **1834 Plain 4 AU58 NGC.** McCloskey 2-A, R.2. The 4 in the date is repunched and the 5 of the denomination is partially under the feather. Well detailed and possessing a pleasing orange-gold patina. With ample luster throughout, this near-Gem example offers plenty of eye appeal.
*From The Findley Collection.*(#8171)

## Rare AU Details Crosslet 4 1834 Classic Half Eagle

5369 **1834 Crosslet 4—Scratched—ICG. AU50 Details.** Second Head, Crosslet 4, Breen-6503, McCloskey 5-D, R.4. A thin horizontal scratch is noted in the right obverse field, but this richly detailed key date Classic five has no other distractions. Liberty's cheek, curls, and the wingtips show light wear.(#8172)

## Crosslet 4 1834 Half AU53

5370 **1834 Crosslet 4 AU53 PCGS.** Second Head, Crosslet 4, Breen-6503, McCloskey 5-D, R.4. The Crosslet 4 is a famous scarcity within the Classic half eagle series. It is many times more elusive than the Plain 4, since only one die pair (M. 5-D) was struck. At least eight pairs of Plain 4 marriages were produced. This undipped and partly lustrous example is chestnut-gold and has only moderately abraded fields. Population: 7 in 53, 27 finer (12/08).(#8172)

## Near-Mint 1836 Five Dollar

5371 **1836 AU58 NGC.** Second Head, Large Date, Breen-6509, McCloskey 2-A, R.4. This scarcer die variety is noted for a bisecting crack on each side. The obverse crack extends from star 8 through the 6 in the date, while the reverse crack passes through the E in STATES through the middle leaf pair. Clean and nicely struck with ample luster and good eye appeal.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#8174)

## Pleasing AU58 McCloskey 2-B 1836 Five

5372 **1836 AU58 PCGS.** Second Head, Large Date, Breen-6509, McCloskey 2-B, R.4. This very scarce issue is noteworthy for its obverse, which shows a prominent, nearly bisecting vertical die crack. Dusky yellow-gold surfaces show few marks and only a trace of friction across Liberty's well struck curls.(#8174)

## Attractive 1837 Half Eagle, MS61

5373 **1837 MS61 NGC.** Ex: Bass. Small Date, Breen-6513, McCloskey 3-C, R.4. An attractive canary-gold representative. The strike is crisp aside from the left shield border, and luster dominates the borders and devices. Census: 18 in 61, 30 finer (12/08).
*Ex: ANA Sale (RARCOA, 8/1970), lot 1527; Harry W. Bass, Jr. Collection, Part IV (Bowers and Merena, 11/2000), lot 348.*(#8175)

## Low-Mintage 1838-C Five Dollar, XF45 Breen-6517, Normal 5, Variety 1-A

5374 **1838-C XF45 ICG.** Breen-6517, Normal 5, Variety 1-A, R.4. On this Normal 5 variety, the left-most leaf pair is distant from U of UNITED, while the Repunched 5 variety has the lower leaf joined to the left curve of U. The 1838-C has the lowest mintage of the Classic Head type (17,179 pieces). Rich yellow-gold color adheres to both sides of this Choice XF coin. Well defined, save for flatness on the star centers.(#8177)

### Scarce 1838-D Classic Head Half Eagle, AU Details

5375 **1838-D—Scratched, Cleaned—ANACS. AU Details, Net XF40.** Garrett and Guth (2006) describe the 1838-D half eagle thus: "The 1838-D is the third-rarest issue of the type, but not nearly as rare as the the 1834 Crosslet 4 or the 1838-C. This was the first year of coin production at the Dahlonega Mint, and the coin features a mintmark just above the date." This example displays scratches in the obverse and reverse fields, and seems rather bright from improper cleaning. Well detailed, however, with appealing green-gold coloration and few other problems.(#8178)

## LIBERTY HALF EAGLES

5376 **1839-C Fine 15 PCGS.** Variety 1-A. A scarce and important issue not only because it is the first Charlotte Mint issue of Christian Gobrecht's Coronet design, but it also has the mintmark on the obverse—this design feature was moved to the reverse in 1840. Evenly worn throughout, the surfaces display the normal abrasions expected on a coin at this grade level.(#8192)

### Elusive 1839-C Half Eagle VF25

5377 **1839-C VF25 PCGS.** Variety 1-A. A middle-grade representative of this introductory obverse mintmark Liberty variety. Rich yellow-gold color confirms the originality, and there are no obtrusive marks. The eagle's wings retain substantial plumage detail. Just 17,205 pieces were struck.(#8192)

### Scarce XF 1839-C Half Eagle

5378 **1839-C XF40 PCGS.** Variety 1-A. The only date of the Liberty half eagle series with an obverse mintmark. The portrait also differs from later years; Liberty has a sleepy expression. The curls show wear commensurate with the grade, but the eagle's plumage is well defined. No marks merit comment. Population: 20 in 40, 34 finer (12/08).(#8192)

5379 **1839-D—Obverse Repaired, Improperly Cleaned—NCS. VF Details.** Variety 1-A. Moderately worn with considerable smoothing of the left obverse field, perhaps an attempt to erase abrasions such as those found elsewhere on the surfaces. The dusky yellow-gold surfaces show unnatural brightness from a past cleaning.(#8193)

### Popular 1839-D Half Eagle VF35, Variety 2-A

5380 **1839-D VF35 NGC.** Variety 2-A. The mintmark is midway between the 3 and 9 in the date with the left edge of the D over the center of the 3. Honey-gold surfaces reveal just a few small marks, and decent remaining detail on the motifs. The mintmark is found on the obverse, making the 1839 type different from the later issues of the Liberty Head half eagle.(#8193)

### Bright 1840-C Five Dollar, AU50

5381 **1840-C AU50 PCGS.** Variety 2-B. In his reference *Gold Coins of the Charlotte Mint*, Douglas Winter opines that the 1840-C is the second-rarest C-mint half eagle, behind only the 1842-C Small Date. The stars, the hair above the coronet, and other peripheral elements are bold, while the centers are typically struck. A couple of small mint-made strike-throughs on the upper reverse rim are noted, along with a moderate mark on the field above the eagle. Population: 9 in 50, 17 finer (12/08).(#8196)

### Important 1840-C Half Eagle Variety, AU53

5382 **1840-C AU53 PCGS.** Unlisted variety with the mintmark nearly entirely over the V in FIVE, and with a bold die crack through the arrows to the I in LIBERTY. A very scarce early Charlotte five that is most often available in VF or low-end XF condition, with pieces grading as high as AU being quite rare. This example is softly struck in areas, but there is little actual wear present. Scattered abrasions that are typical for this issue are present on both sides.(#8196)

## Near-Mint 1840-C Half Eagle

5383 **1840-C AU58 NGC. CAC.** Variety 2-B. This lustrous near-Mint specimen has trivial surface marks on green-gold surfaces. The Charlotte branch produced 18,992 examples of the issue, and most saw considerable circulation. The typical survivor grades just XF40, and few exist in Mint State grades. Census: 9 in 58, 5 finer (12/08). (#8196)

## Pleasing 1840-D Half Eagle, AU50

5384 **1840-D Tall D AU50 NGC.** Variety 3-B. The Tall Mintmark variety fills about half of the space between the arrow feather and the VE in FIVE. The Small D and Tall D mintmark varieties are newcomers to the variety field, and are unlisted in the current *Guide Book*. This pleasing green-gold example has attractive surfaces, although minor rim bruise is evident at 5 o'clock. Census: 10 in 50, 36 finer (12/08).(#8198)

## Choice AU 1840-O Half Eagle

5385 **1840-O Narrow Mill AU55 NGC.** Mint luster is extensive for the AU55 level, and although the centers are incompletely brought up, there are no mentionable marks. The dies are rotated nearly 90 degrees counter-clockwise. The first New Orleans issue of the series, made scarce by a low mintage of 40,120 pieces. Census: 23 in 55, 47 finer (11/08).
*From The Martin L. Diffenbaucher, Jr. Collection.*(#8200)

5386 **1841-C—Damaged, Cleaned—ICG. AU50 Details.** Variety 3-C. A small dig in front of Liberty's neck is noted, and a brief thin scratch above the olive branch also merits mention. Lightly hairlined, but crisply struck and only lightly worn.(#8203)

## Bold 1842-C Large Date Five, AU58

5387 **1842-C Large Date AU58 NGC.** Variety 5-C. Most of the 27,432 half eagles minted in Charlotte in 1842 were the Large Date variety. This boldly defined example is lustrous with green-gold surfaces and excellent eye appeal. A few minor surface marks on each side are only a minor distraction. Census: 22 in 58, 9 finer (12/08). (#8209)

## Sharp 1842-C Large Date Half Eagle, AU58

5388 **1842-C Large Date AU58 PCGS.** Variety 5-C. This precisely struck and untoned Borderline Uncirculated C-mint gold coin has attractive, minimally abraded fields and devices. A slender retained lamination near the C in AMERICA is of mint origin. The Large Date and Small Date share a low mintage of 27,432 pieces. Population: 2 in 58, 6 finer (12/08).(#8209)

## Crisply Defined 1842-D Small Date Half Eagle, MS60 Details

5389 **1842-D Small Date—Cleaned—ICG. MS60 Details.** Variety 8-E. Orange-gold coloration laced with hints of light green endow this D-mint five dollar, and a penetrating strike imparts crisp definition to the design elements. A few minute contact marks are visible on the lightly cleaned surfaces. Really not a bad coin.(#8210)

## Scarce 1843-C Five Dollar, AU58

5390 **1843-C AU58 NGC.** Variety 6-C, the only variety described for the issue, although two minutely different mintmark positions are known. The C is centered over the V of FIVE on this coin. This yellow-gold AU58 example retains considerable luster, and is well struck, except for the usual softness on the eagle's neck. This is a scarce date in higher grades. Census: 17 in 58, 12 finer (11/08). (#8214)

## 1843-D Medium D Five Dollar XF

5391 **1843-D Medium D XF40 PCGS.** Variety 10-H. Liberty's curls and the peripheries of the bust show moderate wear, but substantial luster remains on design elements. The obverse field has a few abrasions, but Dahlonega collectors are certain to answer to the call. Housed in a green label holder.(#8215)

5392 **1843-O Small Letters—Cleaned—ANACS. AU55 Details.** A bit bright from a wipe, but this rare date New Orleans half eagle has much mint luster, particularly across the eagle and the reverse legends. Distributed tiny marks correspond with brief circulation in the antebellum South.(#8217)

## Exceptional 1844-C Half Eagle, AU50

5393 **1844-C AU50 PCGS.** Variety 7-D. Die State II with a reverse crack from the first A in AMERICA to the wing. The 1844-C is moderately scarce in all grades, and very rare in Mint State. Greenish-gold surfaces on this AU coin display splashes of olive-tan, and retain traces of luster in the recessed areas. The design elements are somewhat better struck than usual, though some of the star centers and the eagle's neck feathers are soft. Distributed small marks are visible, but these are fewer and of less severity than the "very heavily abraded surfaces" usually seen on surviving specimens of this issue (Douglas Winter, 1998).(#8220)

## Choice XF 1844-D Five Dollar

5394 **1844-D XF45 NGC.** Variety 11-H, the only one referenced by Douglas Winter (2003). Hints of luster occur in the recesses of this Choice XF five dollar. Honey-gold surfaces display traces of red, and the design elements exhibit sharp, even definition. Minute ticks are distributed over both sides. Fortunately, neither reveals the mint-made imperfections, such as planchet chips, grainy areas, or grease stains that are often encountered on this issue.(#8221)

## Important 1844-O Half Eagle, MS62

5395 **1844-O MS62 NGC.** In 1844 the New Orleans Mint produced 364,600 half eagles, the second highest mintage of the denomination at the Louisiana branch mint. This amazing Mint State piece has sharp definition with satiny yellow luster. A few low areas on the obverse are the result of slight contaminants on the die. Census: 12 in 62, 16 finer (12/08).(#8222)

5396 **1845-D XF40 NGC.** Variety 12-I. Somewhat softly struck, with even khaki-green color across both sides. Both of these characteristics are typical of coins produced at the U.S. Mint in Dahlonega, Georgia, which closed at the advent of the Civil War. The most popular D-mint half eagle for type collectors.(#8224)

## Attractive 1845-D Five Dollar, AU50

5397 **1845-D AU50 PCGS.** Variety 12-I. The far left placement of the date defines the variety. The bright yellow-gold surfaces of this AU50 five dollar show luster residing in the recesses, and exhibit well defined design features. A few minuscule marks do not detract. Housed in a green-label holder.(#8224)

## Sharp, Lustrous 1845-D Half Eagle, MS61

5398 **1845-D MS61 PCGS.** Variety 12-I, the more common of the two available varieties. The 1845-D is one of the better struck Dahlonega half eagle issues, and even by the high standards for this date, this coin is blessed with an above average strike. No trace of weakness can be seen on the eagle and obverse stars at all, and what weakness there is on the dentils is not profound. This coin enjoys a full helping of luster above orange-gold color that is deeper on the obverse than the reverse, and the combined effect of the strike and luster grants this coin a bountiful helping of eye appeal. Grade-defining abrasions, which can also serve as pedigree markers, are noted at Liberty's mouth, star 11, and between star 12 and Liberty's neck. Only nine coins have been certified finer by both major grading services combined (11/08).
*From The Findley Collection.*(#8224)

## Pleasing AU53 1845-O Five

5399 **1845-O AU53 NGC.** Generally yellow-gold with occasional elements of amber and sun-yellow. Though lightly circulated, the wear present is mostly on the high points, and the fields are largely undisturbed. Wispy abrasions to either side of the portrait have little impact on the eye appeal of this O-mint five. Census: 12 in 53, 48 finer (11/08).(#8225)

## Lovely 1846 Large Date Five, MS62

5400 **1846 Large Date MS62 PCGS. CAC.** The Large Date variety is more frequently seen than the Small Date, but neither variety is plentiful in Mint State grades. This piece exhibits lovely and fully brilliant yellow luster with bold design details. It is an exceptional piece with few peers. Population: 6 in 62, 2 finer (12/08). (#8226)

## Exceptional 1846-C Five Dollar, AU58

5401 **1846-C AU58 ICG.** Variety 8-E, the only one known. The 1846-C is one of the scarcest Charlotte Mint half eagles. It is rare in About Uncirculated and extremely rare in Mint State (Douglas Winter, 1998). This AU58 coin exhibits a good amount of luster, along with medium to deep yellow-gold hues with greenish undertones. Nicely struck, save for the typical weakness in the upper right part of the shield. Remarkably clean surfaces occur over both sides, very unusual for an issue that is ordinarily heavily abraded.(#8227)

## Rather Nice 1846-O Five Dollar, Unc Details

5402 **1846-O—Scratched—NCS. Unc Details.** Most 1846-O half eagles are in VF or XF grades. AU pieces are scarce, and Mint State examples are rare. This Uncirculated Details coin displays partially prooflike fields and sharply struck devices. The yellow-gold surfaces reveal a few minuscule marks, fine hairlines, and some shallow, unobtrusive "scratches." (#8230)

## Condition Scarcity 1847 Half Eagle, MS62

5403 **1847 MS62 PCGS.** Circulated 1847 half eagles are found with relative ease, but Mint State coins are somewhat scarce. This MS62 example displays sharply struck design elements, and pleasing yellow-gold patination. Tiny marks scattered about result in occasional breaks in the luster flow.
*From The Findley Collection.*(#8231)

## Elusive Select 1847 Half Eagle
## From the Famous Harry Bass, Jr. Collection

5404 **1847 MS63 PCGS. CAC.** Ex: H.W. Bass, Jr. Collection. This alertly struck example has flashy fields and lustrous borders. Refreshingly free from noticeable bagmarks. No Motto half eagles of any date are very scarce in Select Mint State, unlike No Motto twenties recovered in quantity from shipwreck hoards. Population: 22 in 63, 5 finer (11/08).
*Ex: Harry W. Bass, Jr. Collection, Part II (Bowers and Merena, 10/1999), lot 971.*
*From The James Mossman Collection.*(#8231)

## Sharply Struck 1847-C Five Dollar, AU58

5405 **1847-C AU58 NGC.** Variety 9-E. The 7 in the date firmly touches the truncation on this variety. The 1847-C is rare in high-end AU, and is extremely rare in Mint State. The yellow-gold surfaces of this near-Mint State specimen display traces of red, along with luster in the recessed areas. A sharply struck piece, except for the usual softness on the arrow feathers and the right (facing) claw. Minimally abraded for an issue that is typically heavily marked. Census: 35 in 58, 17 finer (11/08).(#8233)

## Conditionally Rare 1848 Half Eagle, MS63

5406 **1848 MS63 PCGS.** The I in LIBERTY is repunched. This is an extremely appealing Select Mint State example, with lovely sea-green toning over both sides, and a substantial degree of reflectivity in the fields. The striking definition is remarkably crisp, and only the eagle's neck feathers exhibit minor softness. Scattered small marks define the grade. The conditional rarity of this piece should not be overlooked. Population: 6 in 63, 0 finer (12/08).(#8236)

5407 **1848-C VF35 NGC.** Variety 11-E. Noticeably repunched on obverse star 13. Softly struck on the eagle's talons, and evenly worn across the design's high points. An attractive Choice VF example of this Charlotte Mint half eagle.(#8237)

## Elusive 1848-C Half Eagle, AU50

5408 **1848-C AU50 NGC.** Variety 11-E. The wingtips, hair bun, and eyebrow show slight wear, but luster illuminates protected areas. The obverse and the reverse field are typically abraded. A problem-free canary-gold example of this elusive Charlotte issue.
*Ex: Dartmouth Sale (Kingswood Galleries, 2/91), lot 7006.* (#8237)

## Well Struck 1849-C Five Dollar, AU58

5409 **1849-C AU58 NGC. CAC.** Variety 12-F. A high date with the 1 closer to the bust than the denticles identifies this variety. This piece is Die State II, recognized by the die crack that starts at the rim, passes the U in UNITED, and ends at the olive branch. Pleasing orange-gold patina envelops both sides with some satiny mint luster present in the fields. This example is particularly well-struck for a Charlotte Mint piece, with nice definition on the stars and central devices.(#8241)

## Choice VF 1849-D Half Eagle

5410 **1849-D VF35 NGC.** Variety 22-L. According to Garrett and Guth (2006): "Most of the 1849-D half eagles offered for sale fall in the category of Very Fine or Extremely Fine. Many of them are of inferior quality, even for circulated coins." This Choice VF example is generally well struck, with few noticeable abrasions and moderate wear that seems evenly distributed across the two sides. (#8242)

### Better Struck 1850-C Half Eagle, XF40

5411 **1850-C XF40 PCGS.** Variety 15-F. An early die state with only faint die cracks near the FI in FIVE extending to the U of UNITED. The yellow-gold surfaces display semiprooflike fields at certain angles, especially on the reverse. The design elements exhibit better detail than typically seen on the issue. Just a scattering of light marks are visible, not the heavy abrasions usually encountered. Housed in a green label holder.(#8244)

### Attractive 1850-C Half Eagle, AU53

5412 **1850-C AU53 NGC.** Variety 14-F, a radial die crack just touches the left serif of the U in UNITED. Yellow-gold surfaces display luster in the recesses, along with typically struck design elements, that is, softness in the curls below BERT and on the eagle's legs. A few minuscule marks do not disturb. This is a nice mid-level AU coin. (#8244)

### Difficult 1851 Half Eagle, MS61

5413 **1851 MS61 PCGS. CAC.** Garrett-Guth correctly note in their *Encyclopedia of U.S. Gold Coins* that this issue is scarce. They elaborate: "Most of the coins seen are just XF or AU. Mint State examples are seldom seen ... ." This piece—as evinced by the CAC green sticker—is an accurately graded MS61 specimen. It is reasonably well struck for the issue and the surface tone is a pleasing yellow-gold hue. Light scuffing in the exposed obverse fields limit the grade. Population: 13 in 61, 24 finer (12/08).(#8246)

### AU50 1851-C Half Eagle

5414 **1851-C AU50 NGC.** Variety 16-G. The punchmark as described in the Winter reference is visible on the lobe of Liberty's ear, and the C mintmark on the reverse is centered. The central strike is somewhat weak, as usually seen on the issue, but only a few light abrasions consistent with the grade appear. Considerable luster remains.(#8247)

### 1851-D Weak D Half Eagle AU53

5415 **1851-D Weak D AU53 PCGS.** Variety 26-O. The first 1 in the date is imbedded in a denticle and shows noticeable repunching. An additional diagnostic for this variety is the die crack running from the lower serif of D in the denomination through the bottom part of FIVE and the upper portions of UNITED STATE. Only the upper right curve of the D mintmark is barely visible on this AU53 specimen. Peach-gold surfaces display hints of light green, and traces of luster in the recesses. This piece is slightly better defined than most 1851-Ds, that is rated as one of the more poorly struck Dahlonega half eagles from the 1850s (Douglas Winter, 2003). A few inoffensive circulation marks are noted on each side.(#98248)

### Elegant Choice XF 1851-O Five

5416 **1851-O XF45 NGC.** After a four-year hiatus from the denomination, New Orleans struck 41,000 half eagles in 1851, an issue that circulated heavily. This Choice XF coin is an upper-end survivor, softly struck but with ample remaining luster in the satiny peach-gold and orange-gold fields. Census: 29 in 45, 66 finer (12/08).(#8249)

## Pretty Choice AU 1851-O Half Eagle

5417 **1851-O AU55 NGC.** This is a rare issue in any grade and a very rare one in Mint State, due both to the small mintage of 41,000 coins and their status as the first O-mint half eagles produced since 1847: Most pieces promptly entered circulation. This pretty piece boasts orange-gold surfaces tinged with hazel, and while the central strike is typically somewhat soft, the excellent luster and overall eye appeal more than compensate. Census: 15 in 55, 24 finer (12/08). (#8249)

## Desirable 1852 Half Eagle, MS62

5418 **1852 MS62 NGC.** This frosty and highly lustrous yellow-gold half eagle is a scarce issue in full Mint State grades, despite a mintage of 573,901 coins, one of the highest in the entire No Motto series. Although a few stars are weak, other design elements are mostly bold. Census: 34 in 62, 37 finer (12/08).(#8250)

## Bright 1852-C Five Dollar, AU58

5419 **1852-C AU58 NGC.** Variety 18-H. Bright luster glints from the borders and devices of this lovely near-Mint Charlotte No Motto five. The eagle's neck is softly brought up, which is par for the course on this issue, but the overall strike is good. Marks are minor for the AU58 level. Census: 40 in 58, 34 finer (11/08).(#8251)

5420 **1852-D VF35 NGC.** Variety 27-U. A pleasing mustard-gold piece that has substantial plumage definition within the wings. The surfaces are unblemished. A good candidate for an originally toned Dahlonega type set.(#8252)

## Well Defined 1853-C Five Dollar, AU55

5421 **1853-C AU55 NGC.** Variety 20-H. The digit 1 is close to the bust, with a small curved notch in the lower bust line. The 1853-C is available in Very Fine and Extremely Fine, and can be located without too much difficulty in the lower About Uncirculated grades. It is scarce in the better AU levels, and rare in Mint State. The yellow-gold surfaces of this AU55 piece retain ample luster, and reveal just a few small marks. The design elements exhibit better definition than usually seen.(#8254)

## Die Doubled MS62 1854 Half Eagle

5422 **1854 MS62 PCGS. CAC.** FS-101, formerly FS-004.5. Liberty's earlobe is widely die doubled, reminiscent of the *Guide Book* doubled ear 1984 Lincoln cent. Of course, *any* No Motto half eagle is desirable at the MS62 level, since few examples of the denomination were set aside until the late 1870s. Nicely struck and lightly abraded with abundant peripheral luster. FS-101 Population: 26 in 62, 13 finer (11/08).(#8256)

## Scarce 1854-C Five Dollar, AU58

5423 **1854-C AU58 PCGS.** Variety 22-I. This is a much scarcer date than expected, with a relatively higher mintage of 39,283 pieces. Although the Charlotte mintmark is faint, it is fully outlined. The mintmark was evenly but lightly impressed into the die, and all C-mint half eagles struck from this reverse die have this feature. The present piece has a reasonable strike considering the mint of origin. The fields are impressively void of marks, although a few shallow mint-made strike-throughs are present. Population: 7 in 58, 7 finer (11/08).(#8257)

## Well-Struck AU58 Medium D 1854-D Five

5424 **1854-D Medium D AU58 NGC.** Variety 31-W. Definitely scarcer than its Large D counterpart, and also preferable to the Weak D variety. This orange-gold near-Mint example has an impressive amount of flashy luster, especially across the borders and within the devices. The strike is intricate for a Dahlonega product.
*From The Findley Collection.*(#88258)

5425 **1855-C—Obverse Damage—NCS. XF Details.** Variety 23-J, the only recorded die pair for the 1855-C half eagles. Both sides have the usual circulation marks with a small punch mark in front of Liberty's mouth. Pleasing greenish-yellow gold.(#8262)

## Choice XF 1855-C Half Eagle

5426 **1855-C XF45 NGC.** Variety 23-J. The only variety known. Brass-gold surfaces on this Choice XF specimen have a slight greenish cast. The design elements show the typical softness on the first three stars, and on the eagle's neck and right (facing) leg feathers. While a few minute marks are visible, they are of less severity than usually seen on surviving specimens.(#8262)

## Scarce 1855-D Large D Five, XF40

5427 **1855-D Large D XF40 PCGS.** Variety 32-AA, the usually seen Large D mintmark variety of the 1855-D half eagle issue. Minor surface roughness and considerable weakness at the center is evident beneath deep orange-gold patina. The weak strike is typical of this date. Population: 19 in 40, 55 finer (12/08).(#8263)

## 1855-O Half Eagle, XF45

5428 **1855-O XF45 PCGS.** Glimmers of luster brighten Liberty's hair and coronet, as well as the eagle and the peripheral reverse legends. A thin mark above the right (facing) wing and moderate abrasions on the field near the chin merit only passing mention. Elusive due to small production of 11,100 pieces. Population: 13 in 45, 22 finer (12/08).(#8264)

## Exceptional 1856-C Half Eagle, AU50

5429 **1856-C AU50 PCGS.** Variety 24-J, the only known die pair for the date. The 1856-C five dollar is usually seen weakly struck (Douglas Winter, 1998). This AU coin is an exception to the rule, as most of the design elements are sharply impressed, save for a couple of the star centers and the eagle's neck. Yellow-gold surfaces reveal a few minor circulation marks.(#8267)

## Brilliant 1856-C Five, AU58

5430 **1856-C AU58 NGC. CAC.** Variety 24-J as always for this issue. The entire mintage of 28,457 coins were produced from this single die pair, so far as we know. Examples are scarce in all grades, and near-Mint pieces are elusive. This one has a sharp strike with brilliant yellow luster. Census: 27 in 58, 14 finer (12/08).(#8267)

## Attractive 1857-C Half Eagle, AU58

5431 **1857-C AU58 NGC. CAC.** Variety 25-J. The only variety known. Luster fills the recesses of this lightly abraded, yellow-gold Charlotte Mint five. A good strike for the Southern facility, except for some incompleteness on the eagle's neck and fletchings. Just 31,360 pieces were struck. Census: 49 in 58, 21 finer (11/08).(#8272)

## Elusive 1857-C Half Eagle, AU58

5432 **1857-C AU58 NGC.** Variety 25-J. Only one die pair is known for this elusive Charlotte issue. Douglas Winter (1998) writes that this date is difficult to locate in high-end About Uncirculated, and is rare in Mint State. Greenish-gold patina on this AU58 coin displays splashes of apricot. A well struck piece, save for the typical softness on the eagle's neck. Quite clean for a coin that saw some circulation. Census: 49 in 58, 21 finer (11/08).(#8272)

## Sharp Mint State 1857-C Half Eagle

5433 **1857-C MS61 PCGS.** Variety 25-J. This pretty Mint State piece offers pleasing reddish-gold surfaces that show considerable prooflike luster. The average grade of certified survivors is a meager Choice XF or a bit finer, and only a couple of dozen survivors may be truly considered Mint State. There is a scrape in the left obverse field, but elsewhere the abrasions are mostly minor and grade-consistent. The bold strike is a plus. Population: 8 in 61, 5 finer (12/08). (#8272)

## AU Sharpness 1857-D Five

5434 **1857-D—Improperly Cleaned—NCS. AU Details.** Variety 34-CC. This undipped low mintage Dahlonega half eagle is green-gold with luminous yellow luster in protected regions. Liberty's hair lacks a full strike, and a couple of the left-side stars are soft, but the designs are sharp elsewhere. Slightly glossy, and the reverse field is hairlined. *From The Martin L. Diffenbaucher, Jr. Collection.*(#8273)

5435 **1858 AU58 NGC.** From a small mintage of 15,136 pieces, the 1858 half eagle is definitely a better date. The present coin is sharply struck, with only the slightest friction on the high points. Attractive satiny mint luster enhances the surfaces, creating outstanding eye appeal. *From The Findley Collection.*(#8276)

## Scarce 1858-C Half Eagle, AU50

5436 **1858-C AU50 ANACS.** Variety 26-K. The 1858-C Liberty half eagle is scarce in all grades; with Mint State pieces being rare. It is also the last Charlotte date that can be found with a decent strike. This is an unusually well defined example that shows strong details, especially on Liberty's hair curls. Even green-gold color is noted over both sides with traces of reddish patina near the peripheries. Lightly worn and minimally abraded, for the grade.(#8277)

## Pleasing 1858-C Five Dollar, AU58

5437 **1858-C AU58 NGC.** Variety 26-K. This pleasing yellow-gold Charlotte Mint half eagle is relatively lightly marked, and strike-throughs are limited to a small area left of the eagle's tail. Luster dominates protected areas, and individually outlines the stars. A good strike with only minor softness on the eagle's neck. Census: 38 in 58, 20 finer (11/08).(#8277)

## AU58 Sharpness 1858-S Five

5438 **1858-S—Damaged, Cleaned—ANACS. AU58 Details.** Like all S-mint half eagles prior to 1878, the 1858-S has a very low mintage. Just 18,600 pieces were struck. Bankers of the day preferred the double eagle denomination, more convenient for large transactions and bullion reserves. The present has a lightly etched appearance and has a moderate number of small marks. Evidence of friction is virtually absent, but the luster is subdued.(#8279)

5439 **1859-C VF30 NGC.** Variety 27-M. A moderately worn antique-gold survivor with the usual assortment of handling marks. The coin has a slight bend centered at 8 o'clock on the obverse, with the effects more visible on the reverse.(#8281)

## Lustrous AU55 1859-C Half Eagle

5440 **1859-C AU55 NGC.** Variety 27-M. Despite a few light, scattered abrasions, the surfaces are somewhat prooflike and highly lustrous on this Choice AU example, with attractive yellow-gold coloration and a strike that, while weak on the reverse, is better than expected on the obverse. Census: 25 in 55, 44 finer (12/08).(#8281)

## Bright 1859-C Half Eagle, AU58

5441 **1859-C AU58 NGC.** Variety 27-M. The only variety known. This near-Mint State specimen features bright brassy-gold surfaces that exhibit sharply struck design features, with the exception of softness on the eagle's neck and the arrow feathers. The few minute marks are in line with a lightly circulated coin. Census: 31 in 58, 13 finer (11/08).(#8281)

## Uncirculated Sharpness 1859-C Half Eagle

5442 **1859-C—Obverse Improperly Cleaned—NCS. Unc. Details.** Variety 27-M. Delicate hairlines are observed near the date and stars, but this late date Charlotte half eagle has generally unabraded surfaces and no indication of highpoint wear. Luster glimmers from the margins and devices. The horizontal shield lines are merged together, as always on the '59-C due to improper reverse die preparation. *From The Martin L. Diffenbaucher, Jr. Collection.*(#8281)

## Worthy AU53 1859-D Medium D Five

5443 **1859-D Medium D AU53 PCGS.** Variety 36-CC. Flashy luster emerges from the margins of this unabraded and briefly circulated Dahlonega five. Some blending of detail is seen on the eagle's neck and Liberty's curls, but the overall strike is crisp. Very scarce, since a scant 10,366 pieces were struck.(#8282)

## Wonderful 1859-S Half Eagle, AU58

5444 **1859-S AU58 NGC.** An extremely rare date in higher grades, as nearly all of the 13,220 coin mintage entered circulation. The typical piece grades just XF, and NGC and PCGS have only certified three Mint State pieces. This nicely defined near-Mint piece has lustrous light yellow surfaces with splashes of rose and violet patina. Census: 6 in 58, 2 finer (12/08).(#8283)

## Desirable 1860-C Half Eagle, AU53

5445 **1860-C AU53 NGC.** Variety 28-M. Luster brightens stars, letters, and other recessed areas. The border elements are well struck, although the eagle is softly impressed, as is invariably the case for this later Charlotte issue. The obverse field has a few moderate marks, but the present piece retains its original green-gold skin, and is desirable as such.
*Ex: Greenwich Collection (Bowers and Merena, 1/1991), lot 180.* (#8285)

## Uncirculated 1860-D Medium D Five

5446 **1860-D Medium D MS61 PCGS. CAC.** Variety 38-FF. Well struck for a late Dahlonega issue, particularly on the fletchings and Liberty's curls near the coronet. The eagle's neck lacks absolute definition, and the lovelock beneath the ear is also incomplete. Nonetheless, it is unusual to see such a sharp Georgian gold piece. The present example is also pleasing for its relatively smooth surfaces, although one subtle mark is noted beneath the chin. Luster is plentiful is slightly diminished in intensity across the open obverse field. Population: 8 in 61, 9 finer (12/08).(#8286)

## Lustrous 1861 Half Eagle, MS61

5447 **1861 MS61 NGC.** Always regarded as the most common date of all No Motto half eagles, the 1861 is chosen more often for type collections than any other date in the series. Perhaps it is chosen more often than *all* other dates. This lovely example has soft, frosty surfaces with a few minor blemishes and some weakness of the strike. A tiny rim nick is visible on the reverse at 5 o'clock.(#8288)

## Attractive 1861 Half Eagle, MS62

5448 **1861 MS62 PCGS.** Sharply struck and lustrous, with the usual small abrasions and luster grazes associated with the MS62 grade level. Hardly scarce as a date in lesser grades, but Mint State pieces can be difficult to locate, and are important as representatives of the No Motto type. A logical and worthy choice for a type set. (#8288)

## Attractive 1861-C Half Eagle, VF30

5449 **1861-C VF30 PCGS.** Variety 30-K. The only variety known. The 1861-C is the final coin produced at the Charlotte Mint. Rich apricot-gold patina bathes both sides of this VF30 specimen, and the design elements are well defined, except for the usual strike softness on the eagle's neck. Distributed light marks do not detract. (#8289)

## Important AU55 1864 No Motto Five

5450 **1864 AU55 NGC.** This yellow-gold Choice AU representative is sharply struck and has moderate marks on the right obverse field and the vicinity of the E in LIBERTY. Just 4,170 pieces were struck for this Civil War date, which is essentially unobtainable in Uncirculated condition. Census: 15 in 55, 13 finer (11/08).
*From The Findley Collection.*(#8296)

## Challenging 1865-S Half Eagle, AU50

5451 **1865-S AU50 NGC.** A scarce S-mint issue from the year the Civil War ended, this is one of the most challenging half eagles to find in high grade. Much luster still radiates from the medium-gold surfaces of this piece. There are myriad small abrasions, more so on the reverse than the obverse, none of them overly distracting or much visible without a loupe. the strike is a bit weak on the lower reverse, but decent elsewhere. Census: 4 in 50, 44 finer (12/08). (#8299)

## Elegant AU55 1865-S Five

5452 **1865-S AU55 NGC.** A challenging lower-mintage San Francisco minor gold issue, one little-saved at the time of release and a rarity even in better circulated grades, as here. Slightly dusky yellow-orange surfaces retain much of their original luster, though light abrasions are noted on and around the well-defined portrait. Census: 21 in 55, 14 finer (12/08).(#8299)

5453 **1866-S No Motto VF25 PCGS.** A problem-free tan-gold example without detracting marks. A rare issue, since the mintage of 9,000 pieces went into circulation and stayed there. None are known in Mint State. The new Motto dies presumably arrived via Panama, a route sufficiently arduous to require No Motto production earlier in the year.(#8300)

5454 **1866-S No Motto VF25 NGC.** Ex: Eliasberg. Last of the No Motto fives, and limited to a tiny mintage of 9,000 pieces. Rarer (and lower mintage) than its famous double eagle counterpart, and priced much more affordably as well. The eagle's wings have pleasing definition, and the only noticeable marks are those to the right of the eagle's neck. Census: 7 in 25, 35 finer (12/08).
*Ex: Louis E. Eliasberg Collection (Bowers and Ruddy, 10/1982), lot 512.*(#8300)

## Choice AU 1866-S No Motto Five

5455 **1866-S No Motto AU55 NGC.** An elusive No Motto half eagle, one of only 9,000 pieces struck in this final year without IN GOD WE TRUST placed above the eagle. Additionally, survivors tend to display an appreciable amount of circulation, as is typical of early S-mint coinage. This example is atypical and shows only slight friction and the expected severity of abrasions beneath a uniform reddish tint. Census: 2 in 55, 8 finer (12/08).(#8300)

## Borderline Uncirculated 1866-S No Motto Five None Certified Mint State

5456 **1866-S No Motto AU58 NGC.** A challenging transitional year Half Eagle, although not holding a significant advantage in overall rarity when compared to its higher mintage With Motto counterpart. Just 9,000 pieces were issued and the average survivor is heavily worn, often grading XF 40 or lower. No Mint State pieces have been certified by either major service, promoting this bright golden example to Condition Census quality for the issue. Both sides are well struck and display ample luster in the recesses. Census: 8 in 58, 0 finer (12/08).
*Ex: Long Beach Signature (Heritage, 9/2004), lot 7562.*(#8300)

5457 **1867-S XF40 PCGS.** A delightful honey-gold example of this scarce, low-mintage issue. The San Francisco Mint struck 29,000 pieces that entered circulation at the time of issue, leaving few higher grade pieces for collectors.(#8314)

## Choice AU 1867-S Five Dollar

5458 **1867-S AU55 NGC.** This piece is lightly abraded and has strike weakness in the centers on both sides, yet it retains nearly full luster and offers excellent eye appeal over the orange-gold surfaces. The issue is quite scarce above XF grades. Census: 7 in 55, 3 finer (12/08).(#8314)

## Exemplary Near-Mint 1869 Half Eagle

5459 **1869 AU58 NGC.** The total coinage of 1,760 business strikes for this postbellum issue means that the certified survivors today, when they can be found at all, average Choice XF or so. This exemplary near-Mint State piece boasts lovely orange-gold coloration, mellowing to deep orange near the date, and lots of luster appears on both sides. The strike is somewhat soft through the centers of each side, but there are relatively few abrasions and the eye appeal is quite high. Census: 7 in 58, 2 finer (12/08).(#8317)

## Condition Census 1870-S Half Eagle, AU55

5460 **1870-S AU55 NGC.** A small original mintage—17,000 coins—and the preference for circulating gold coins out West over paper currency led to the circulation of most examples of this issue, as with so many other S-mint gold issues of the era. NGC has certified 11 examples in AU55, with only three finer, and there are no graded higher at PCGS (12/08). The surfaces are dusky reddish-gold, with most of the luster still remaining and a bold and pleasing strike. (#8321)

## Impressive Choice AU 1872-S Half Eagle Tied for Finest-Graded at PCGS

5461 **1872-S AU55 PCGS.** The 1872-S half eagle, with a mintage of 36,400 pieces, is a very rare issue in any grade, and is nearly unobtainable in Mint State. The Choice AU example in this lot exhibits bright yellow-gold surfaces that retain a considerable amount of luster. The design features are well brought up, and just a few minute abrasions are scattered about on both sides. This piece is currently tied with four others as the finest-graded at PCGS (12/08). (#8327)

## Difficult Choice AU 1874-S Five

5462 **1874-S AU55 PCGS.** The San Francisco Mint produced 16,000 half eagles in 1874, not at all an insignificant production. Nearly all of those coins immediately entered circulation, so high grade examples of this issue are rare today. This example has brilliant yellow-gold surfaces with satiny luster. Several tiny abrasions are visible on both sides, but these are consistent with the grade. The opportunity to acquire an attractive example of this issue is not an everyday occurrence. *Ex: FUN Signature (Heritage, 1/2005), lot 9053.*(#8335)

## Condition Census 1874-S Half Eagle, AU58

5463 **1874-S AU58 NGC.** This is a Condition Census example of an issue that is, as of this writing, unknown in Mint State grade, although the present AU58 piece is tied with a bit more than a dozen pieces at both services combined. Even in AU the 1874-S half eagle is quite rare. This piece displays splendid yellow-gold surfaces with tinges of lilac patina at the obverse rim. A few light abrasions are characteristic, as is the central strike weakness, most notable on the S mintmark which is faint yet discernible.(#8335)

## Pleasing VF25 1875-CC Five

5464 **1875-CC VF25 PCGS.** Normal Reverse. Two varieties are known, the Normal Reverse and the Doubled Reverse. Despite rather substantial wear on both sides, the surfaces of this beautiful specimen are pristine, exhibiting rich gold with subtle hints of olive and rose toning. The relative rarity of the two varieties is currently unavailable. With a mintage of just 11,288 coins, the presence of a second reverse die is unusual.(#8337)

## Charming Choice AU 1875-S Five

5465 **1875-S AU55 NGC.** Warm orange-gold at the margins with a slight fading toward straw-gold in the centers. Excellent luster and crisp central detail with only a trace of wear across the well-defined devices. A top-notch example from this issue of 9,000 pieces despite a handful of small abrasions. Census: 10 in 55, 9 finer (12/08). (#8338)

5466 **1877 XF45 NGC.** With a minuscule mintage of 1,132 pieces, the 1877 half eagle is very rare in all grades. The present coin is especially attractive, with moderate, even wear and minimal abrasions. Traces of mint luster are observed in the protected areas near the devices. This issue seems like a real sleeper. *From The Findley Collection.*(#8342)

5467 **1879 MS63 PCGS.** A lovely peach-gold example of this conditionally challenging Motto issue. The strike is meticulous, and the fields display only wispy abrasions. Population: 30 in 63, 7 finer (12/08).(#8348)

5468 **1882-CC AU53 NGC.** This scarce Carson City half eagle has a band of bright luster across the stars, and other design elements are also lustrous. The eagle's neck and fletchings are lightly impressed, but actual wear is minimal.(#8359)

5469 **1890-CC AU58 PCGS.** This apricot-gold Carson City five is from a low mintage and has a crisp strike. A band of luster illuminates both peripheries, as well as the eagle and Liberty's hair.(#8376)

5470 **1891-CC MS62 NGC.** A highly lustrous Carson City gold type coin. Sharply struck, and without any distracting marks. The second 1 in the date is repunched.
*From The Omaha Collection.*(#8378)

### Pretty 1892-CC Half Eagle, MS62

5471 **1892-CC MS62 PCGS.** A rare issue in Choice and Gem condition, although survivors in the lower Mint State levels can occasionally be obtained. This piece shows a few light abrasions that preclude a finer grade, with pretty antique-gold coloration and considerable luster. Population: 22 in 62, 13 finer (12/08).(#8380)

### Desirable 1893 Five Dollar MS66

5472 **1893 MS66 PCGS.** A razor-sharp Premium Gem that displays pleasing orange and olive toning. Careful study beneath a loupe can locate only trivial luster grazes. The 1893 has its share of bourse appearances in MS61 to MS63, but Gems are seldom encountered, and Premium Gems are very rare. Population: 5 in 66, 1 finer (11/08).
*From The James Mossman Collection.*(#8383)

5473 **1893-CC AU58 NGC.** An exactingly struck and refreshingly unabraded final year CC-mint half eagle. The borders and devices are lustrous, particularly on the reverse.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#8384)

5474 **1893-O MS62 PCGS.** The 1893-O half eagle is the most common O-mint half eagle in Mint State, and has the second highest mintage, at 110,000 coins, of any New Orleans half eagle, behind the 1844-O's 364,000 pieces. This is an interesting specimen, with several zigzagging peripheral die cracks on the obverse and somewhat prooflike luster beneath a few scuffs that determine the grade. Numerous other die cracks, if a bit less dramatic, join some of the reverse letters. It appears as though the dies, even in their advanced states, had been freshly polished before this coin was struck. Population: 43 in 62, 10 finer (12/08).(#8385)

5475 **1894-S MS60 NGC.** The mintmark is repunched. Well struck with full even luster and a pleasing, flashy sheen. Numerous small abrasions and a shallow scrape, in the left obverse field, define the grade. Only 55,900 pieces were struck, few if any of which were set aside at the time of issue.(#8389)

5476 **1896 MS64 PCGS.** This sharply detailed yellow-gold half eagle has traces of peripheral olive toning. It is an attractive piece, and a condition rarity from a mintage of only 59,063 coins. Population: 14 in 64, 2 finer (12/08).(#8392)

### Visually Arresting 1899 Five Dollar, MS65

5477 **1899 MS65 NGC. CAC.** This is a visually arresting and essentially pristine Gem of this available issue, one occasionally seen in even higher Mint State grades. This piece has frosty, fine-grained, somewhat mattelike surfaces, with yellow-gold centers deepening to antique gold near the rims on both sides. NGC has certified 10 examples finer (12/08).(#8398)

5478 **1900-S MS64 NGC.** A lustrous peach and canary-gold near-Gem. Well struck, and smooth aside from a small planchet flake beneath the hair bun. Scarcer than the usual late date Liberty issue in this eye appealing grade. Census: 71 in 64, 4 finer (12/08).(#8401)

### Gem 1902-S Half Eagle

5479 **1902-S MS65 PCGS.** This original Gem is primarily yellow-gold, but also has freckles of peach-gold, particularly near the rims. Boldly struck with booming luster and attractively preserved surfaces. S-mint half eagles and eagles from 1901 to 1903 are available in pleasing condition, unlike most years from both of those series. (#8406)

## PROOF LIBERTY HALF EAGLE

### Enchanting PR63 Cameo 1892 Half Eagle

5480 **1892 PR63 Cameo NGC.** While this issue's stated mintage of 92 specimens is high relative to other years, it is just as much of a rarity as its earlier peers, according to Garrett and Guth in their *Encyclopedia of U.S. Gold Coins*. To quote their entry on this issue, "There are just 20 to 30 coins known, including those in museums and tightly held collections." This is one of the few examples available, a significantly contrasted lemon-gold representative that is attractive despite minor hairlines and contact evident in the fields. Census: 1 in 63 Cameo, 7 finer (11/08).
*From The Peter J. Adasek, M.D. Collection.*(#88487)

## INDIAN HALF EAGLES

### Popular 1909-O Five Dollar, AU53

5481 **1909-O AU53 PCGS.** The 1909-O five dollar saw a mintage of 34,200 pieces. Jeff Garrett and Ron Guth, in their *Encyclopedia of U.S. Gold Coins*, say: "This is one of the most sought-after issues in the series because of the low mintage and general rarity in any Mint State grade. It has long been considered a key date and is always in feverish demand."

Two varieties of 1909-O are recognized. On one, the mintmark is weak and double punched to the left. On the second, the mintmark is much sharper and shows no signs of doubling.

The mintmark is very weak on this AU53 coin. The remaining design features are quite sharp, however, though the eagle's shoulder reveals minor softness. Yellow-gold surfaces display a fair amount of luster, and are lightly abraded.(#8515)

## Remarkable Near-Gem 1910 Indian Half Eagle

5482 **1910 MS64 PCGS.** This is a remarkable specimen, for a near-Gem. Not only are the satiny surfaces exceptionally clean (indeed they are nearly blemish-free); the striking definition is distinctly more crisp and complete than is typical for examples of this date. A lovely piece that resides very much in the high-end category for the issue and the grade level.(#8517)

5483 **1910-S MS61 NGC.** A satiny green-gold Indian five from the conditionally scarce San Francisco Mint. The mintmark is evident, and the only consequential mark is relegated to the T in LIBERTY. (#8519)

## Lovely MS62 1910-S Half Eagle

5484 **1910-S MS62 PCGS.** A luminous yellow-orange piece, well-defined with considerable charm. The obverse is generally smooth and minimally abraded, though several marks in the reverse fields preclude a higher designation. This heavily minted San Francisco issue is elusive any finer, with just 38 such pieces certified by PCGS (12/08).(#8519)

5485 **1911-S MS62 PCGS.** A wonderful Mint State example with brilliant and frosty yellow-gold luster. The design motifs are sharply defined and the surfaces are outstanding for the conservative grade. (#8522)

## Well Defined 1911-S Five Dollar, MS63

5486 **1911-S MS63 NGC.** Despite a relatively high mintage, the 1911-S half eagle becomes scarce at the Select level, and elusive in higher grades. Peach-gold surfaces display pleasing luster, and exhibit well impressed design elements, though the mintmark reveals the usual weakness. Minute marks in the raised, exposed fields limit the grade. Census: 53 in 63, 21 finer (11/08).(#8522)

5487 **Group Lot Two Indian Half Eagles, 1912 and 1915 MS62 NGC.** This lot includes: **1912 Indian Half Eagle MS62 NGC,** boldly struck and intensely lustrous, with rich rose-gold toning and scattered small abrasions; and a **1915 Indian Half Eagle MS62 NGC,** satiny and nicely struck, with positively gorgeous sunset-orange and lime-gold toning across each side. (Total: 2 coins)(#8523)

## Desirable MS62 1913-S Five

5488 **1913-S MS62 PCGS.** Warm orange-gold surfaces are softly lustrous with no trace of wear. Though a number of wispy marks and a few more significant abrasions combine to deny a finer designation, the overall eye appeal is high for a coin not accorded Select status. PCGS has graded 71 finer examples (11/08).(#8526)

## Crisp 1914 Half Eagle, MS64

5489 **1914 MS64 NGC. CAC.** Excellent surface quality for an Indian half eagle of any issue, with generally smooth and impressively lustrous yellow-orange surfaces. The strike is crisp throughout, even on the often-weak pendants of the necklace. A condition rarity any finer, with just 18 numerically superior pieces known to NGC (11/08).(#8527)

5490 **1914-S MS61 NGC.** A satiny Mint State example with highly lustrous surfaces and exceptional eye appeal. Traces of pale green add to the overall desirability of this piece.(#8529)

## Desirable MS61 1914-S Five

5491 **1914-S MS61 PCGS. CAC.** Luminous orange-gold surfaces show scattered abrasions, though none are overtly distracting. A partial ring of russet alloy visits the lower obverse and runs through the date. Uncommonly strong detail for this lower-mintage San Francisco issue with the pendants on the necklace complete.(#8529)

### Appealing Near-Gem 1915 Indian Half Eagle

5492 **1915 MS64 PCGS.** An appealing survivor from this moderate-mintage issue, the last from the Philadelphia Mint until 1929. The khaki-gold and rose coloration is a pleasing combination. A pair of shallow pinscratches are noted directly behind the eagle's head. This date becomes rare and very expensive at the Gem level of preservation.(#8530)

### Low Mintage 1915-S Indian Half Eagle, MS61

5493 **1915-S MS61 ICG.** A lovely Mint State piece with bright yellow-gold surfaces that exhibit the usual minor marks associated with the grade. Only 164,000 pieces were originally minted, the fifth-lowest production of the entire Indian half eagle series. The mintmark on this piece is weak, as usual.(#8531)

## EARLY EAGLES

### Desirable AU Details BD-10 1799 Large Stars Eagle

5494 **1799 Large Stars Obverse—Damaged, Improperly Cleaned—NCS. AU Details.** Breen-6841, Taraszka-22, BD-10, R.3. Obverse State a, Reverse State a. No die cracks on obverse. Solidly detailed for this scarce but relatively available early eagle die pair. Despite significant peripheral abrasions and a past cleaning that has left a gloss across the yellow-gold surfaces, a worthy and readily collectible piece.(#8562)

### AU Details 1799 Ten Dollar Better BD-8 Small Stars Obverse

5495 **1799 Small Stars Obverse—Mount Removed, Improperly Cleaned—NCS. AU Details.** Irregular Date, Breen-6840, Taraszka-20, BD-8, R.5. A repair is noted on the reverse between 5 and 6 o'clock, and both sides are hairlined and somewhat bright from a wipe. Scattered hair-thin marks suggest indifferent past non-numismatic handling. Still a bold and partly lustrous example of this better die variety.
*From The Omaha Collection.*(#98562)

### Interesting AU Details 1801 Ten, BD-2

5496 **1801—Damaged, Cleaned—ANACS. AU50 Details.** Breen-6843, Taraszka-25, BD-2, R.2. The more available of two varieties for the year and one of the most widely distributed early eagles, a type-collector favorite. Though the present lightly circulated piece shows several significant abrasions, the "damaged" notation seems excessive; by contrast, the glossy, hairlined nature of the lemon-gold surfaces entirely justifies the "cleaned" designation.(#8564)

### 1801 Eagle, AU55 Details, BD-2

5497 **1801—Damaged, Cleaned—ANACS. AU55 Details.** Breen-6843, Taraszka-25, BD-2, R.2. Star 1 is further from the lowest curl than on the BD-1, and star 13 nearly touches the bust tip. Despite the caveats this is still a nice, collectible coin of this variety. Apparently even ANACS thinks so, given the AU55 Details grade. The "damage" is a few scrapes on the obverse—one between stars 1 and 2, one through the lowest hair curl, one before stars 11-13, one through the neck, a couple more—that, while each individually deep enough to move small bits of metal, they are still scarcely seen without a loupe. The noted cleaning is not a bad job, and the piece nonetheless retains a high degree of appeal.(#8564)

## Sharply Struck 1803 Extra Star Eagle
## AU Details, BD-5

5498 **1803 Extra Star—Improperly Cleaned—NCS. AU Details.** Breen-6845, Taraszka-30, BD-5, High R.4. Only one obverse was used for all six 1803 ten dollar varieties. The BD-5 reverse features 13 large stars, with a small "extra" star in the last cloud under the F of OF. Also, a leaf points to the left edge of I in AMERICA.

Luster resides in the recessed areas of this yellow-gold AU Details example, and a well executed strike leaves sharp definition on the design elements. Close inspection reveals fine hairlines in the fields, as well as a few hair-thin marks in the lower right obverse field. Not a bad coin, despite the cleaning.(#88565)

# LIBERTY EAGLES

## Charming AU58 Head of 1838
## 1839/8 Ten Dollar, Large Letters

5499 **1839/8 Type of 1838, Large Letters AU53 PCGS.** This is the so-called "Type of 1838" or "Old Portrait" variety. Actually, the head is much smaller on the obverse than on the later type. The 9 in the date is boldly recut, and the *Guide Book* regards it as an overdate. This lovely specimen has pleasing copper-gold color and no individually significant marks. Bright luster brightens the stars, legends, shield, hair, and plumage. Housed in a green label holder. Population: 11 in 53, 29 finer (12/08).
*Ex: FUN Signature (Heritage, 1/2006), lot 5390, which realized* $8,050.(#8576)

5500 **1840 AU50 PCGS.** This bright example has refreshingly unmarked surfaces and no shortage of shimmering luster across the margins and devices. A scarce issue in AU grades. Population: 14 in 50, 17 finer (11/08).(#8581)

5501 **1841 AU55 NGC.** Luster fills the devices and legends of this well struck better date No Motto ten. The vertical shield stripes are abraded, but marks elsewhere are usual for the combination of denomination and grade. Census: 27 in 55, 28 finer (12/08). (#8582)

5502 **1842 Large Date AU53 NGC.** Nicely detailed with greenish color over the fields and centers, and copper-red peripheral toning on both sides. Numerous wispy marks are observed in the fields, and a thick die crack, on the reverse, extends from the lower rim through E in TEN, over the left side of the eagle, and upward to just below TA in STATES.(#8584)

## Choice AU 1842 Large Date Eagle

5503 **1842 Large Date AU55 PCGS.** This splendid piece has lustrous light yellow surfaces with hints of pale rose toning. The surfaces have the usual quota of trivial surface marks of little consequence. The Large Date variety is more plentiful than the Small Date, but it is still rare in higher grades. Population: 12 in 55, 7 finer (12/08). (#8584)

5504 **1843 AU50 PCGS.** Bright, almost flashy surfaces show pale lemon-gold and straw-gold shadings. Well-defined with faint abrasions and wear largely concentrated at the high points. Population: 19 in 50, 8 finer (11/08).(#8588)

## Scarce AU55 1843 Ten Dollar

5505 **1843 AU55 NGC.** Surprisingly scarce in AU and better grades in spite of a mintage of 75,462 pieces, an amount that would seemingly have guaranteed a higher survival rate than actually occurred. This is a well-struck example that still retains significant amounts of prooflikeness in the fields in spite of numerous small abrasions scattered over each side. Census: 23 in 55, 19 finer (12/08).(#8588)

## Bold Choice AU 1843 Eagle

5506 **1843 AU55 NGC.** This antebellum eagle strike from the Philadelphia Mint, despite a healthy mintage of more than 75,000 pieces, is elusive today in the higher circulated grades, and the average certified survivor only averages XF40 or a bit better. This Choice AU example displays considerable prooflike luster over the orange-gold surfaces with light field chatter from a short spate in circulation. A boldly struck and pleasing piece.(#8588)

5507 **1843-O XF45 NGC.** Slight, even wear shows on the surfaces of this attractive specimen. Mint luster is still present, although muted, and scattered abrasions are not individually distracting.(#8589)

## Elusive Near-Mint 1843-O Ten Dollar

5508 **1843-O AU58 PCGS.** During the 1840s it almost appears as if the Philadelphia Mint (in its second facility since 1833) were competing with the New Orleans Mint (completed in 1839, although it struck its first silver coins in 1838). The two mints regularly flip-flop the record for most eagles coined during the decade. In 1843 New Orleans grabbed the laurel, with an eagle emission of 175,000-plus pieces, more than double Philadelphia's 75,000 coins. AU pieces are nonetheless scarce, and Mint State examples are rare. The present coin boasts boldly struck greenish-yellow surfaces that show generous glimpses of the initial luster. Relatively smooth save for a moderate bagmark above the 3 in the date. Population: 5 in 58, 6 finer (12/08).(#8589)

## Flashy XF45 1844 Eagle

5509 **1844 XF45 NGC.** The 1844 is one of the most underappreciated ten dollar issues. Just 6,361 pieces were struck, yet prices are reasonable, considering the low quantity of survivors. This example has the die marks near stars 1 to 3 that are diagnostic for the issue. Luster flashes from the borders, shield, and coronet, and neither side reveals any evidence of significant contact. Census: 9 in 45, 24 finer (12/08). (#8590)

## Rare 1844 Ten Dollar, AU50

5510 **1844 AU50 NGC.** The low mintage 1844 ten (6,361 pieces) is rare in all grades. NGC and PCGS have graded a mere two Mint State coins. The bright yellow-gold surfaces of this AU50 specimen are nicely defined, save for the typical softness in the star centers. Contact marks are scattered over each side, including a noticeable one on the eagle's shield.(#8590)

## Condition Scarcity 1844-O Ten Dollar, AU58

5511 **1844-O AU58 PCGS.** This near-Mint State ten dollar holds a considerable amount of luster on its yellow-gold surfaces, and displays sharply struck design features. The few minor contact marks scattered about are in line with what would be expected for a coin that saw limited circulation. Population: 6 in 58, 3 finer (12/08). (#8591)

5512 **1845 AU50 ICG.** Radiant yellow-gold fields retain prominent luster despite the light wear present across the high points. Well struck with scattered light to moderate marks. A better example of this low-mintage eagle issue.(#8592)

5513 **1845-O XF45 NGC.** An elusive date among O-mint Liberty tens, and one that is especially difficult to locate above VF. Smooth for the grade despite small marks on the cheek. A well defined piece that shows good details on the hair curls, eagle's feathers, and strong stars on both the left and right of the obverse.
*Ex: Palm Beach Signature (Heritage, 11/2004), lot 8557.*(#8593)

## Gleaming 1846 Eagle, AU50

5514 **1846 AU50 PCGS.** This canary-gold No Motto ten has ample glowing luster and a consistent strike. Portions of the reverse field are abraded, but the overall eye appeal is attractive. The 1846 is a seldom-encountered issue with a mintage of just 20,095 pieces. PCGS has yet to certify any as Mint State. Population: 7 in 50, 11 finer (12/08).(#8594)

## Popular 1846/5-O Ten Dollar, AU50

5515 **1846/5-O AU50 PCGS.** Although undesignated as such on the PCGS holder, this is the 6/5 overdate. The peach-gold surfaces of this AU ten dollar display hints of prooflike luster on the reverse. Generally well struck design elements reveal the typical softness in the hair around Liberty's ear and on the eagle's left (facing) leg. Numerous ticks are scattered over each side. Population: 10 in 50, 10 finer (12/08).(#8596)

## Difficult 1846/5-O Eagle, AU53

5516 **1846/5-O AU53 NGC.** Undesignated as the 'overdate' variety, but the 'ball' of a '5' is present within the loop of the 6. The 1846/5-O is scarce in About Uncirculated and is virtually impossible to locate in Mint State. This briefly circulated piece has a pleasing strike and original yellow-gold surfaces. Careful examination locates distributed small marks.(#8596)

## Lustrous 1847 Eagle, MS61

5517 **1847 MS61 NGC.** Bulging bun subtype. Available in lower grades, Mint State survivors of this P-mint issue are scarce and comparable in rarity to those of the 1847-O and 1849 deliveries. This is a remarkably lustrous coin for the grade with modestly reflective fields and scattered contact marks throughout. For pedigree purposes, a diagonal mark is seen over the lateral lines in the shield, and a group of abrasions rests in the right obverse field near star 11. Census: 30 in 61, 21 finer (12/08).(#8597)

5518 **1848-O XF40 NGC.** Surprisingly radiant straw-gold fields host softly struck stars and slightly better-defined central devices that show minor wear. Modestly abraded for this O-mint issue with interesting eye appeal.(#8600)

## Pleasing 1848-O Liberty Ten, AU53

5519 **1848-O AU53 NGC. CAC.** Like many New Orleans eagles, the 1848-O is generally available in lower grades, but becomes quite rare near the Mint State level. This piece has pleasing green-gold surfaces with subtle rose toning. The central design definition is somewhat weak as usual. Census: 17 in 53, 41 finer (12/08).(#8600)

## Scarce 1848-O Eagle, AU55

5520 **1848-O AU55 PCGS.** The 1848-O eagle is scarce to rare in AU grades. The present coin is softly struck, which is true of most examples seen of this date. Some slight wear is detectable on Liberty's hair. Satiny mint luster enhances the surfaces, which are virtually blemish free. Eye appeal is above average. Population: 4 in 55, 9 finer (12/08).(#8600)

## Elusive 1849-O Eagle, AU55

5521 **1849-O AU55 NGC.** Only 23,900 pieces were struck of the 1849-O, which is one of the rarest O-mint ten from the 1840s. It is very elusive in high grades (AU and better). Weakness of strike, which is always expected on this issue, is generally seen on this piece on the peripheral stars. Deep reddish patina covers each side of this pleasing high grade example. Census: 15 in 55, 6 finer (12/08).(#8602)

## Condition Scarcity 1850 Small Date AU55 Eagle

5522 **1850 Small Date AU55 NGC.** The 1850 ten dollar is difficult to locate in About Uncirculated grades, and is very rare in Mint State. Traces of luster are visible in the recesses of this peach-gold Choice AU specimen, and the design elements are generally well impressed, save for the usual weakness in the star centers and on the eagle's neck. Lightly abraded. The Small Date 1850 ten dollar is considerably scarcer than its Large Date counterpart. Census: 14 in 55, 20 finer (11/08).(#8604)

## Remarkable 1850-O Eagle, XF45

5523 **1850-O XF45 PCGS.** The 1850-O eagle is usually sharply struck, and this piece is no exception. Even with 25 points of wear, much intricate detail remains on all devices. The surfaces are remarkably undisturbed and significant mint luster remains to enhance the considerable eye appeal. Population: 30 in 45, 24 finer (12/08). (#8605)

## Pleasing Choice AU 1851-O Ten

5524 **1851-O AU55 NGC.** An interesting Choice AU coin, vaguely orange-gold on the obverse with distinct green-gold overtones on the reverse. Strongly lustrous with softly struck peripheries but excellent central detail and minimal wear. Light, scattered marks on and around the portrait contribute to the grade.(#8607)

## Clean AU55 1851-O Ten Dollar

5525 **1851-O AU55 NGC.** Variety Two. The hollow ring is seen at the top of the second set of vertical stripes but the obverse differs with the date placed lower in the exergual area. This is a scarce issue in AU but not one that is impossibly so. This is a well-preserved example with few abrasions on either side and rich orange-gold color.(#8607)

## Condition Rarity 1852 Eagle, MS60

5526 **1852 MS60 NGC.** Jeff Garrett and Ron Guth believe the 1852 eagle is rare in Mint State grades. The present coin features lovely orange-gold color, with frosty mint luster and excellent eye appeal. The coin has a decent strike, often weak on this issue, and a single scratch on Liberty's cheek probably determines the grade. Census: 6 in 60, 23 finer (12/08).(#8608)

5527 **1853/2 AU53 NGC.** FS-301, formerly FS-007. Attractive orange-gold coloration and pleasing surface quality. A respectable level of luster is observed within the protected areas of both sides. Census: 25 in 53, 61 finer (12/08).
*From The Findley Collection.*(#8611)

5528 **1853-O AU55 NGC.** The yellow-gold surfaces of this Choice AU O-mint eagle are surprisingly free of distracting abrasions. A thin die break connects the bottoms of the four digits in the date, and another crack is observed from star 1 through star 4. Small die lumps are observed in the same area. A pleasing example of an issue that becomes quite challenging above the MS60 level. Census: 55 in 55, 47 finer (12/08).(#8612)

### Flashy Near-Mint 1853-O Eagle

5529 **1853-O AU58 PCGS.** Surprisingly bright yellow-gold surfaces show occasional hints of alloy at the margins. Well-defined on the central devices with only a trace of friction at the highest design elements. Impressive condition and eye appeal for this antebellum issue. Population: 12 in 58, 2 finer (11/08).(#8612)

### Better Date Near-Mint 1854 Ten Dollar

5530 **1854 AU58 PCGS.** This much better date No Motto ten has an impressive band of luster across the obverse margin. The reverse is lustrous except for the open fields. Well struck aside from the deeply hubbed stars. The fields display distributed small marks, usual for the series and grade. Population: 10 in 58, 6 finer (11/08). (#8613)

### Pleasing 1854-O Small Date Eagle, AU55

5531 **1854-O Small Date AU55 PCGS.** A generous amount of luster resides on the yellow-gold surfaces of this Choice AU ten dollar gold piece, and a well executed strike leaves strong definition on the design elements, except for softness on a few of the stars. Distributed light marks are not bothersome. Population: 13 in 55, 8 finer (12/08). (#8614)

5532 **1854-S AU53 NGC.** Rich red-gold coloration and lustrous surfaces are the positive features of this early S-mint ten. The base of an errant 1 is observed near the dentilation between the 1 and 8 in the date, thus adding to the charm of this already pleasing piece. (#8615)

### Lustrous AU55 1854-S Ten Dollar

5533 **1854-S AU55 NGC.** The 1854-S is one of the more frequently seen S-mint tens in the No Motto series, and several dozen pieces are known in AU condition. This is an especially pleasing example that has bright surfaces with a significant amount of mint luster remaining, especially on the reverse. Sharply defined in the centers with slight softness on the peripheral stars.(#8615)

### Elusive 1855-O Eagle, AU50

5534 **1855-O AU50 PCGS.** According to Jeff Garrett and Ron Guth, 1855-O eagles in AU grades are "very rare." Not surprising, considering the paltry mintage of 18,000 pieces. The present coin features a sharp strike, with a touch of wear showing on the eagle's neck and Liberty's hair. Attractive, satiny mint luster highlights the surfaces. A few abrasions are consistent with the grade. Population: 16 in 50, 9 finer (12/08).(#8617)

### Desirable AU50 1855-S Ten

5535 **1855-S AU50 PCGS.** After the six-figure mintage of eagles that began the San Francisco Mint's production of the denomination in 1854, strikings dropped off dramatically, and this AU50 piece is a higher-end survivor from its issue of just 9,000 coins. Warm gold-orange surfaces remain pleasingly lustrous, though the strike is a trifle soft and small abrasions are scattered on each side. Population: 7 in 50, 7 finer (12/08).(#8618)

## Lustrous AU50 1856-O Eagle

5536 **1856-O AU50 PCGS.** The average grade of certified survivors (presumably the top end of all survivors) is only XF45, a function 153 years after the fact of the small original mintage of only 14,500 coins in antebellum New Orleans. This AU example shows good luster clinging to the yellow-gold surfaces, with moderate abrasions including one through the lower portion of the 6 in the date. The reverse is somewhat prooflike. Population: 10 in 50, 18 finer (12/08). (#8620)

## Elusive Near-Mint 1856-S Eagle

5537 **1856-S AU58 NGC.** Medium S. Despite its seemingly unwavering focus on double eagles during its early years, the San Francisco Mint managed to produce 68,000 ten dollar gold pieces in 1856, more than either Philadelphia or New Orleans. This near-Mint representative offers shining yellow-orange surfaces and excellent visual appeal, despite numerous scattered abrasions. The strike is well defined in the centers, although the stars show softness. NGC has graded just one Mint State example (12/08).(#8621)

## Lovely AU53 1857 Eagle

5538 **1857 AU53 NGC.** Strong central striking definition, though the obverse stars show a touch of weakness. Modestly abraded yellow-gold surfaces are surprisingly radiant for the grade assigned. Overall, a solid example of this challenging pre-Civil War eagle issue. Census: 15 in 53, 45 finer (11/08).(#8622)

## Desirable 1857-S Eagle, AU55 From the *S.S. Republic*

5539 **1857-S AU55 NGC.** Ex: *S.S. Republic*. The recent discovery of the treasure left behind when the *S.S. Republic* sank has rewritten the rarity ratings for many issues. A few Mint State coins were recovered from the treasure, among the first of their kind. This Choice AU piece is fully lustrous with bright green-gold surfaces.(#8624)

## Shimmering 1858-O Ten Dollar, AU55

5540 **1858-O AU55 PCGS.** Luster shimmers from the borders and devices of this richly detailed No Motto ten. The surfaces are moderately abraded, with a few marks clustered on the field beneath the chin. A scarce New Orleans issue with a mintage of just 20,000 pieces. PCGS has certified only 14 examples in higher grade (12/08). (#8626)

## Sharp Choice AU 1858-O Eagle

5541 **1858-O AU55 PCGS.** The 1858-O eagle is often seen in the lower circulated grades but infrequently encountered above AU, although a dozen or so Mint State specimens exist. This piece is well struck, with some semiprooflikeness appearing on each side under a light haze of field chatter and some light abrasions consistent with the grade. Population: 16 in 55, 14 finer (12/08).(#8626)

## Seldom Encountered 1859 Eagle, AU58

5542 **1859 AU58 NGC.** The 1859 eagle is a scarce date, with a low mintage of 16,013 pieces. The present coin exhibits satiny mint luster on slightly granular fields, with a moderate number of abrasions. A sharp strike is evident on both sides, but there is just a touch of friction on the hair above the ear that probably limits the grade.(#8628)

## Beautiful AU55 1860 Eagle

5543 **1860 AU55 NGC.** Bulging bun subtype. Warm yellow-orange surfaces show blushes of sunset and honey, particularly close to the rims. Well-defined overall, including at the often-weak obverse stars, with only modest wear across the high points and the occasional wispy mark or abrasion. Census: 18 in 55, 33 finer (11/08).(#8631)

5544 **1860-O XF40 NGC.** This rare O-mint issue is here represented by a coin that offers considerable appeal for the XF grade. Considerable luster is still present, with attractive straw-gold coloration and relatively few consequential contact marks for a coin that has seen 20 points of circulation. The strike is a trifle soft in the immediate centers.(#98631)

## Luminous AU 1860-O Ten

5545 **1860-O AU50 NGC.** The last of the No Motto New Orleans eagle issues, represented here by a lightly circulated example, yellow-gold on the obverse with considerable orange overtones on the reverse. Numerous fine abrasions on and close to the well struck portrait contribute to the grade. Census: 17 in 50, 79 finer (12/08). (#98631)

## MS62 No Motto 1861 Liberty Ten

5546 **1861 MS62 NGC.** Two different obverse hubs were used for the 1861. The present piece has a rounded (five-fold) central bun, the style used between 1847 and 1860. Examples are also known with a bulged (six-fold) central bun, the subtype coined after before 1847 and after 1861.

Admittedly, No Motto collectors will pay little attention the hub subtype, and instead examine the present piece for its remarkable luster and eye appeal. Well struck aside from the lowest stars, and surprisingly devoid of relevant marks. Although it is theoretically possible to acquire a higher graded example, this lustrous, smooth, and handsome sun-gold example will satisfy all but the most determined number chasers. Census: 9 in 62, 5 finer (11/08).
*From The Martin L. Diffenbaucher, Jr. Collection.*(#8633)

## Delightful AU55 1861-S Eagle

5547 **1861-S AU55 NGC.** A briefly circulated representative of this always-challenging earlier S-mint eagle issue, softly struck in general but pleasingly detailed on the central reverse. Lightly abraded sun-yellow surfaces have virtually intact luster, and only modest wear is present on the high points. Census: 20 in 55, 17 finer (12/08). (#8634)

5548 **1862 XF40 PCGS.** Unlike the 1862 gold dollar, the ten dollar from that year is a rare low mintage item. The present example has original orange color and possesses the remaining luster of a higher grade. Liberty's neck has a relatively heavy thin mark, and a few hairlines are present about the reverse peripheral legends. Encapsulated in a green label holder. Population: 12 in 40, 45 finer (12/08).(#8635)

## Rare AU 1862 Liberty Ten

5549 **1862 AU50 PCGS.** The 1862 begins a long run of very low mintage Philadelphia issues. This was the year of suspension of specie payments, and unbacked paper money drove gold coins from circulation until long after the Civil War. This example nonetheless remained briefly in commerce, yet its surfaces are smooth aside from a few moderate marks on the field beneath the hairbun. Population: 11 in 50, 17 finer (12/08).(#8635)

5550 **1862-S VF25 PCGS.** An interesting straw-gold and mustard-gold mid-range example of this challenging Civil War-era S-mint issue. A significant pinscratch is visible in the right obverse field. Population: 1 in 25, 38 finer (11/08).(#8636)

## Luminous XF40 1863-S Eagle

5551 **1863-S XF40 NGC.** The 1863-S was the highest-mintage eagle issue for the year, though with its only competition being the 1,218 business strikes produced at Philadelphia, even this issue with its minimal five-figure mintage scores an easy win. The present coin is luminous yellow-orange with small, scattered marks and a slightly soft strike. Census: 4 in 40, 27 finer (12/08).(#8638)

## Lovely 1864 Ten Dollar Gold, AU50

5552 **1864 AU50 ANACS.** As a result of the hoarding and exporting that gold and silver coins experienced during the Civil War, not a single 1864-dated gold coin from any mint saw a mintage of more than 6,000 pieces. The 1864 eagle was produced to the extent of 3,530 "circulation" strikes, and today any 1864 eagle is a great rarity. This nice AU example boasts lovely, deep orange-gold color, with no mentionable impairments and much eye appeal.(#8639)

## Important 1867 Liberty Ten, AU50

5553 **1867 AU50 NGC.** A small mintage of only 3,090 eagles left the Philadelphia Mint in 1867, and few of those coins have survived. The typical grade is just XF. This piece has light green-gold surfaces that are accented by pale rose-gold toning. Census: 12 in 50, 39 finer (12/08).(#8651)

5554 **1868 AU53 NGC.** Bright straw-gold surfaces offer surprising radiance. Faint abrasions on the devices yield to more significant marks in the fields. Still, a pleasing example of this challenging Philadelphia eagle issue. Census: 17 in 53, 38 finer (11/08).(#8653)

## Flashy XF45 1869 Low Mintage Eagle

5555 **1869 XF45 ANACS.** Greenbacks drove gold coins out of circulation shortly after the Civil War began. Because of the high national debt, paper money continued to trade at a discount relative to gold coins. Since ten dollar pieces, like all gold coins, were hoarded and failed to circulate, few were struck, a status that went unchanged until 1878. The 1869 had a low mintage of 1,855 pieces, and because of the high face value, few were set aside. The present moderately abraded example has ample glimpses of flashy luster and retains much of its original detail.(#8655)

5556 **1869-S VF20 PCGS.** Despite considerable wear on both sides, the light yellow surfaces are accented by deep peripheral toning. This example survives from a limited mintage of only 6,430 coins. (#8656)

## Rare Date 1871 Eagle, AU50

5557 **1871 AU50 PCGS.** A significant P-mint eagle, one of a mere 1,790 business strikes issued in a year of reduced mintage gold production. As an illustration of its rarity in all grades, the total PCGS population for the 1871 ten dollar is a scant 29 coins. The present example is somewhat liberally abraded beneath rich orange and steel-blue toning. Glimpses of prooflike luster are still visible in the protected areas. Encased in a green label holder. Population: 8 in 50, 8 finer (12/08).(#8660)

## Important AU53 1871 Ten Dollar Mintage 1,790 Pieces

5558 **1871 AU53 PCGS.** An even finer example of this Philadelphia-Mint rarity. When one considers the mintage and extremely low availability of an issue such as the 1871 eagle, it soon becomes apparent how undervalued it is. The same can be said for numerous S-mint issues, and the common thread to each is the lack of references to help guide collectors. Only one book has been published since Breen's *Complete Encyclopedia* in 1988 ("Prohibitively rare above VF") that mentions the 1871 eagle, and that is the Garrett-Guth reference. With the publication of so many references in other series over the past 20 years, there are still obviously a few unexplored areas in U.S. numismatics.

This is an attractive reddish-gold piece that shows a distinctive mark located in the field directly in front of Liberty's mouth. The fields still retain much reflectivity, as the dies would not have time to wear down from initial burnishing with only 1,790 strikings. (#8660)

## Pleasing AU50 1871-S Eagle

5559 **1871-S AU50 PCGS.** The low mintage of 16,500 coins is a good indication of the scarcity of this issue, but it says nothing about the further condition rarity. Examples of this issue are seldom found in grades better than VF or XF, at best. In fact, PCGS has only certified 10 examples of this date in grades better than XF45. The present example is a pleasing AU with typical lightness of strike, including the mintmark, which is weak but visible. Light surface marks appear, none serious. Population: 6 in 50, 4 finer (12/08).(#8662)

## Underrated 1873-S Eagle, AU50

5560 **1873-S AU50 PCGS.** Garrett and Guth (2006) state that the 1873-S, with a mintage of only 12,000 pieces, is an underrated issue. About Uncirculated examples are rare, and PCGS reports just five pieces at the AU50 level, with eight finer (12/08). Myriad abrasions barely affect the impressive luster that graces both sides. A handsome, crisply struck example with lovely lemon-yellow patina. (#8668)

## Noteworthy MS62 1874 Ten Dollar

5561 **1874 MS62 NGC. CAC.** The mintage of the 1874 is a bit higher than surrounding Philadelphia dates, perhaps because Treasury officials anticipated a return of gold coins to circulation. Nonetheless, the 1874 is very scarce, and becomes rare in Mint State. This example has good luster and a bold strike. Marks are few and unimportant. Census: 10 in 62, 9 finer (12/08).(#8669)

## Pleasing 1874-CC Eagle, VF20

5562 **1874-CC VF20 PCGS.** The 1874-CC eagle is a scarce date, with a recorded mintage of 16,767 pieces. The present coin is a pleasing example of this date, with moderate, even wear on both sides. All inscriptions are legible, and much fine detail remains on all devices. The surfaces are lustrous, and only a few scratches on the reverse are noticeable.(#8670)

## Warm XF 1874-S Eagle

5563 **1874-S XF40 NGC.** With a mintage of merely 10,000 pieces, it is little wonder that the 1874-S eagle is elusive in all grades. This lightly circulated wheat-gold and mustard-gold piece shows considerable remaining luster in the moderately abraded fields. Well struck on the portrait. Census: 12 in 40, 48 finer (11/08).(#8671)

## Desirable Choice XF 1874-S Ten

5564 **1874-S XF45 PCGS. CAC.** Dusky orange-gold surfaces show light, even wear with glimmers of luster at the margins. Despite the time this piece spent in circulation, marks are few. Minor elements of allow are present near the first and last stars on the obverse. Overall, a solid example of this lower-mintage San Francisco eagle issue. Population: 19 in 45, 16 finer (12/08).(#8671)

## Underappreciated XF45 1874-S Ten

5565 **1874-S XF45 PCGS.** A Choice XF representative with rich green-gold toning, some traces of luster, and no obvious marks. Like all other San Francisco eagle issues between 1857 and 1878, the 1874-S is low mintage and usually encountered with substantial wear. None have been certified as Mint State by either leading service. Only 10,000 pieces were struck. Population: 19 in 45, 16 finer (12/08). (#8671)

5566 **1874-S—Cleaned—ANACS. AU50 Details.** Very light yellow surfaces retain some frosty luster with considerable pinkish toning highlights. A few abrasive marks are evident, mostly on the reverse. (#8671)

## Scarce 1875-CC Eagle, VF30 Details

5567 **1875-CC—Cleaned—ANACS. VF30 Details.** An important Carson City eagle with moderate wear and light surface imperfections that are expected given its time in commerce. The mintage was limited to 7,715 coins, and the present piece is typical of most survivors. The average grade for this issue is about XF40. (#8673)

## VF25 1876-CC Eagle

5568 **1876-CC VF25 NGC.** Rusty Goe writes in *The Mint on Carson Street* concerning this issue, "To meet heavy export demand, the nation's gold coinage production increased sharply in 1876, fortified by bountiful gold discoveries in Nevada and other mining regions. By then the Carson City Mint was receiving only 25% of the deposits from the Comstock mines, most of it returned in the form of gold pieces."

The preference for double eagles meant that only 4,696 eagles fell from the presses in this Centennial year, although the survival is somewhat higher than expected in percentage terms—possibly due to the 1876 date. This piece shows pretty orange-gold coloration, with few abrasions and a decent strike.(#8675)

## Scarce 1876-CC Eagle, VF30

5569 **1876-CC VF30 NGC.** The 1876-CC eagle has a small recorded mintage of only 4,696 pieces. The present coin shows moderate wear on all surfaces, with small abrasions on the truncation of Liberty's bust and cheek. The surfaces are a pleasing orange gold. In the words of Jeff Garrett and Ron Guth, "This is a date that any collector would be pleased to own-in any grade." Census: 7 in 30, 74 finer (12/08).(#8675)

## Rare 1876-S Gold Eagle, XF45

5570 **1876-S XF45 PCGS.** "The best example that Harry Bass could find, even with all of his contacts and unlimited budget, was only an AU-53 coin," report Garrett and Guth in relation to this low-mintage Centennial date, produced to the extent of just 5,000 pieces. The present Choice XF example show attractive yellow-gold surfaces that still retain some luster and show relatively few abrasions for the date and mint. Population: 19 in 45, 12 finer (12/08).(#8676)

## Very Rare 1877 Liberty Eagle, XF45

5571 **1877 XF45 ANACS.** Considerable luster and reflectivity are still visible in the protected areas around the devices of this lightly circulated eagle. An extremely rare issue, the total production amounted to just 797 business strikes, and few have survived. This example has lovely light yellow-gold surfaces and good eye appeal. (#8677)

## Appealing 1878 Eagle, MS62

5572 **1878 MS62 PCGS.** The 1878 eagle was well represented in European hoards, and is fairly available in Mint State grades today. This date is an appropriate choice for a Mint State type set. The present coin is a particularly attractive specimen, with beautiful lustrous surfaces and a sharp strike. Eye appeal is fantastic. Population: 49 in 62, 18 finer (12/08).(#8680)

5573 **1878-S AU53 NGC.** With a scant mintage of 26,100 pieces, it is no surprise that the 1878-S ten dollar is a challenging coin, especially in Mint State condition. In fact, NGC has only certified five examples in MS60 or finer condition as of (11/08). This pleasing piece displays peach-gold coloration and sharp details throughout.(#8682)

5574 **1878-S AU55 PCGS.** The peach-gold surfaces, which retain some reflective luster, show only the slightest amount of wear. Nicely struck, though myriad small abrasions—typical for the issue—are noted in the fields. Overall, this is a pleasing representative of an issue that is rare in Mint State condition. Population: 7 in 55, 5 finer (12/08).(#8682)

5575 **1879-S MS61 Prooflike NGC.** Prooflike flash brightens the fields of this scarcer date ten dollar issue. The obverse has distributed small marks, but none individually distract. Census: 1 in 61 Prooflike, 1 finer (12/08).(#78686)

5576 **1880 MS62 Prooflike NGC.** One of only three certified at the Prooflike level with one additional example carrying the Deep Prooflike moniker. The fields are fully reflective with confirmed contrast between the fields and honey-gold devices. While a few light marks are present, none seriously detract from the overall eye appeal of this special 1880 ten. Census: 1 in 62, 0 finer with the Prooflike designation (12/08).(#78687)

5577 **1881-CC AU53 NGC.** Lightly marked surfaces have deep yellow-gold with splashes of reddish toning on both sides. Considerable luster is still present.(#8692)

## Enchanting AU55 1881-CC Eagle

5578 **1881-CC AU55 NGC.** A lovely mid-date Carson City eagle example, well-defined with light wear largely confined to the high points. This leaves the bright sun-gold fields gleaming with essentially intact luster. An excellent candidate for the type collector seeking a slightly better Carson City date.(#8692)

5579 **1881-O AU50 PCGS.** A scarce late date O-mint and one of just 8,350 pieces minted. A well struck orange-gold example with numerous light to moderate abrasions in the semi-prooflike fields. This example is encapsulated in a green label. Population: 12 in 50, 26 finer (12/08).
*Ex: Denver Signature (Heritage, 8/2006), lot 2000, which realized $1,380.*(#8693)

## Low Mintage 1884-CC Eagle, AU55

5580 **1884-CC AU55 PCGS.** The 1884-CC eagle is a low mintage issue, with only 9,925 pieces coined. All pieces seen have heavy, raised die lines on Liberty's neck. The present coin features excellent detail on all devices and full mint luster. A series of scratches and abrasions in the obverse field account for the grade.(#8704)

## Better Date 1884-CC Eagle, AU58

5581 **1884-CC AU58 NGC.** From a low mintage of 9,925 pieces, the 1884-CC eagle is definitely a better date. The present coin is an especially attractive example of this rare branch mint issue. The coin features a sharp strike, with sharp detail on all design elements. The reflective surfaces are overlayed with a pleasing green-gold patina. Only the slightest friction on the hair above the ear precludes a Mint State grade..(#8704)

## Elusive 1887 Ten Dollar MS62

5582 **1887 MS62 PCGS.** This lustrous example has surprisingly pleasing eye appeal, because the fields and portrait lack the noticeable marks usually found on MS62 gold tens. A significantly better date, since only 53,600 pieces were struck. That mintage nonetheless surpassed the 1887 half eagle and double eagle, both of which are proof-only. Population: 19 in 62, 5 finer (11/08).(#8710)

5583 **1890 AU58 Prooflike NGC.** Faintly circulated, but distinctly reflective despite the fine abrasions present in the light yellow-gold fields. Exceedingly elusive with Prooflike surfaces. Census: 1 in 58 Prooflike, 2 finer (11/08).(#78717)

## Scarce 1891 Eagle, MS63

5584 **1891 MS63 PCGS.** In the *Encyclopedia of U.S. Gold Coins 1795-1933*, Jeff Garrett and Ron Guth report the 1891 eagle is a better date in the Liberty Head series and becomes quite scarce in MS63 grade. The present coin is fully struck and lustrous, with a few handling marks defining the grade. Population: 31 in 63, 3 finer (12/08).(#8719)

5585 **1891-CC AU58 NGC.** This highly lustrous and bright yellow-gold example has reflective fields around boldly defined design types. It is an attractive near-Mint example that should find a happy home with nearly any collector.(#8720)

5586 **1891-CC MS60 NGC.** The peach-gold fields offer sweeping luster, and although small marks are scattered, none are of individual consequence. The highpoints exhibit glimpses of silver-blue toning. (#8720)

5587 **1891-CC MS61 NGC.** FS-501, Breen-7035. The mintmark is repunched, more prominently on the right C. Sharply struck and lustrous with scattered minor abrasions. Popular as a Carson City gold type coin.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#8720)

5588 **1891-CC MS61 NGC.** FS-501. The mintmark is obviously repunched. Well struck with intense mint luster and noticeable cartwheel effects in the fields. Lime-green and pink-gold toning enhances the coin's overall eye appeal. An attractive and affordable example of this popular Carson City ten.(#8720)

5589 **1891-CC MS62 PCGS.** This sharply struck Carson City type coin provides unbroken cartwheel luster. Small marks are scattered across the fields, but only an abrasion on the jaw merits individual mention.(#8720)

## 1891-CC Ten Dollar, MS62

5590 **1891-CC MS62 PCGS.** Most collectors have to settle for an MS62 representative of this issue, since Select Uncirculated or better examples are few and far between. The piece offered here has pleasing straw-gold coloration with radiant luster across all surfaces. The grade-defining abrasions are minor and do not require explanation.(#8720)

### 1891-CC Ten Dollar, MS62 Repunched Mintmark

5591 **1891-CC MS62 PCGS.** FS-501, Breen-7035. Traces of the a second CC are seen to the right of the bold CC. A light crack extends through the denomination on the reverse and a thin, circular die break connects the outer points of stars 1 through 4 on the obverse. This Carson City type coin has full cartwheel luster and a sharp strike. There are no obtrusive marks. PCGS has certified only 68 pieces finer as of (12/08).(#8720)

### Pleasing 1891-CC Eagle, MS62

5592 **1891-CC MS62 NGC.** A pleasing olive hue give this lustrous 1891-CC ten dollar added eye appeal. Scattered abrasions are evenly dispersed throughout the fields and account for NGC's grade determination. Unfortunately, the holder has seen more wear than the actual coin, and the next owner is advised to send this Carson City ten to NGC for reholdering.(#8720)

### Lustrous 1891-CC Eagle, MS62

5593 **1891-CC MS62 NGC.** Undoubtedly the most plentiful of all Carson City eagles, the 1891-CC had a mintage of 103,732 coins, a high production total for an example of the series. Examples can be found in nearly any grade desired. This boldly defined piece has excellent luster with minor abrasions on each side.(#8720)

### Select Uncirculated 1891-CC Ten

5594 **1891-CC MS63 PCGS.** Coppery hues shimmer off of splendidly lustrous surfaces. The strike is bold and the net eye appeal is substantial. This is a plentiful issue relative to other Carson City tens, but in high grade the availability dwindles. As of (12/08), PCGS has certified only 65 1891-CC tens in MS63 with a staggeringly low three finer pieces—all at the MS64 level.(#8720)

5595 **1892-CC AU53 NGC.** Prooflike luster glints from protected regions of this lightly circulated better date eagle. Marks are surprisingly absent. IN GOD WE TRUST is die doubled, diagnostic for this low mintage Carson City issue.(#8722)

### Antique-Gold 1892-CC Eagle, MS61

5596 **1892-CC MS61 NGC.** Antique-gold patination evenly covers each side of this CC-mint product—one of only 40,000 pieces produced in this year. Few examples of this issue survive in Mint State. In 1892 the efforts of our nation's mints were focused on producing the first-year Barber coinage, minor coinage, silver dollars in moderate amounts, and the first Columbian commemorative half dollars. Considerable luster is present on this piece, along with moderate abrasions. Census: 21 in 61, 10 finer (12/08).(#8722)

5597 **1892-O MS62 NGC.** A sharply struck low mintage New Orleans example with good luster and the expected number of moderate marks. Conditionally scarce as well; NGC has yet to certify any finer.(#8723)

5598 **1893 MS63 ★ Prooflike NGC.** Flashy yellow-gold fields show occasional glints of green. A decisively struck piece with marvelous reflectivity and eye appeal despite a number of minor abrasions. Of the 85 1893 eagles certified with Prooflike surfaces, only two have received the ★ moniker. Census: 14 in 63, 1 finer for those pieces designated as Prooflike (12/08).(#78725)

## Pleasing AU53 1893-CC Ten

5599 **1893-CC AU53 PCGS.** Lustrous for the grade, and the canary-gold fields and devices show only inconsequential contact. A sharply struck and attractive example of the final Carson City issue. A better date, since a mere 14,000 pieces were struck. Population: 11 in 53, 45 finer (11/08).(#8726)

5600 **1893-O MS62 NGC.** A mere 17,000 pieces were struck for this conditionally rare New Orleans emission. Neither major grading service has encapsulated any above MS63. A boldly struck and lustrous example with a few too many minor obverse marks to tie for finest known.(#8727)

5601 **1895 MS61 Prooflike NGC.** The reflective fields are expectedly abraded, but the portrait is relatively smooth and there are no singular heavy marks. Census: 5 in 61 Prooflike, 6 finer (12/08). (#78732)

## Appealing 1896-S Ten, MS61

5602 **1896-S MS61 PCGS.** When Jeff Garrett and Ron Guth published their gold tome in 2006, they noted that not a single 1896-S eagle grading finer than MS62 had appeared at auction. This coin is not an MS63, but it is a pleasing example, considering the assigned grade. Potent luster and peach-gold coloration add to the eye appeal. Housed in an older generation PCGS green label holder. Population: 13 in 61, 56 finer (12/08).(#8736)

## Condition Scarcity 1901-O Ten, MS64

5603 **1901-O MS64 PCGS.** Variety Two, with the repunched mintmark positioned closer to the feather than the eagle's talon. Doug Winter states in his *Gold Coins of the New Orleans Mint* that "this is an easy date to locate in grades up to and including MS62." That is true, if the NGC *Census Report* and PCGS *Population Report* are any indication. The same sources also identify how challenging this issue becomes at the Select Uncirculated level. Population: 12 in 64, 1 finer (12/08).(#8748)

## Attractive Gem 1901-S Ten Dollar

5604 **1901-S MS65 PCGS.** This khaki-gold Gem has all-encompassing luster and a bold strike. Careful study locates only moderate marks, a hint of debris on the eagle, and faint mint-made roller marks near OF. An original example worthy of a matched Gem gold type set. Contrary to popular belief, the 1901-S does not have the highest mintage of the series. That distinction belongs to the 1881. (#8749)

## Imposing 1901-S Liberty Ten MS66

5605 **1901-S MS66 PCGS. CAC.** Lovely apple-green and apricot shades confirm the originality of this lustrous and meticulously struck gold type coin. The reverse is beautifully preserved, and the obverse has only a couple of unimportant marks. Encased in a green label holder. Despite the common reputation of the 1901-S, PCGS has certified only two pieces finer (11/08).
*From The James Mossman Collection.*(#8749)

## Intensely Lustrous 1902 Near-Gem Ten

5606 **1902 MS64 PCGS.** Gold specialists are aware of the scarcity of the 1902 Liberty eagle. Only 82,400 pieces were struck, which is less than 5% of the mintage of its 1901 predecessor. The few gold collectors of the day purchased proofs, while business strikes either circulated or were improperly stored and shipped. Unsurprisingly, the 1902 is rare at the MS64 level. The present piece is lustrous, intricately struck, and remarkably void of bagmarks. It is only kept from an even finer grade by a shallow planchet flake—inherent to the minting process—in the field below Liberty's chin. Population: 15 in 64, 3 finer (12/08).(#8750)

## Solidly Struck 1903-O Ten Dollar, MS63

5607 **1903-O MS63 PCGS.** The 1903-O ten dollar is readily obtainable in any grade through MS62. MS63 coins are much more difficult to locate, and anything finer is a great rarity. The lustrous surfaces of this Select example yield yellow-gold patina imbued with hints of light tan. A solid strike sharpens the design elements. Some minor grazes and contacts limit the grade. Population: 97 in 63, 12 finer (11/08).(#8753)

## Charming Select 1903-O Eagle

5608 **1903-O MS63 PCGS.** Beyond the MS63 level, this 20th century O-mint gold issue is a condition rarity. The present example, strongly defined and impressively lustrous, has claims to a higher grade and is sure to see active bidding from collectors and dealers alike. Both sides offer even apricot-gold color. PCGS has graded 12 finer examples (11/08).(#8753)

## Attractive 1904-O Ten, MS63

5609 **1904-O MS63 PCGS.** Straw-gold centers are beautifully framed by a sea of magnificent orange-gold coloration on both sides of this Select Uncirculated O-mint ten. The luster is frosty and the strike more exacting than what is typically found on other examples of this issue, which is also plagued by abrasions. This exceptional exemplar was apparently well cared for through the years and is now ready for a new home in your cabinet. Population: 60 in 63, 15 finer (12/08). (#8756)

## Pleasing and Conditionally Scarce 1904-O Ten, MS63

5610 **1904-O MS63 PCGS.** This is a pleasing example of the penultimate New Orleans Mint eagle. The surfaces are lightly abraded, but splendid pinkish yellow-gold color ensures the beauty and desirability of this piece. Jeff Garrett and Ron Guth comment: "In MS63, this date becomes very scarce, and anything better is positively rare." This statement by Garrett and Guth is clearly supported by the current PCGS population data: Population: 60 in 63, 15 finer (12/08).(#8756)

## Exceptional 1905 Ten Dollar, MS65

5611 **1905 MS65 PCGS. CAC.** The number of high grade 1905 eagles in this sale is not indicative of the availability of this date in high grade. The numbers certified speak for themselves. PCGS has only certified 11 other Gems with nine in higher grades (12/08). But of those 20 submission events, three coins are in this auction plus an NGC MS66! That speaks more to the high visibility of rarities and condition rarities in the FUN sale than it does to any perceived availability of this date in high grade. The surfaces of this piece have smooth, softly frosted mint luster that is uninterrupted by any noticeable marks. The luster has taken on a slight reddish patina with the passage of time. Definitely an upper-end coin, as indicated by the CAC endorsement.(#8757)

## Amazing 1905 Liberty Eagle, MS65

5612 **1905 MS65 PCGS. CAC.** An important condition rarity in the Liberty eagle series, and few examples of the 1905 eagle can match the present piece. It is boldly defined with highly lustrous yellow-gold surfaces and exceptional eye appeal. Population: 12 in 65, 9 finer (12/08).(#8757)

## Radiant 1905 Ten Dollar, MS66

5613 **1905 MS66 NGC.** Powerfully struck with attractive orange-gold coloration throughout. The intense luster of the current offering is suggestive of an even finer grade designation, but closer examination reveals a few abrasions in the field in front of and behind Miss Liberty's lower neck. Although the 1905 eagle is considered "one of the more common 'tough' dates of the 20th century," according to the Garrett-Guth reference, the issue is undeniably challenging in grades higher than MS65. As of (11/08), NGC has certified a mere 13 examples at the MS66 level, with only seven finer pieces—all grading MS67. The numbers at PCGS are similar.(#8757)

5614 **1906 MS63 PCGS.** A highly lustrous yellow-gold piece that has pleasing orange accents. Nicely struck and appealing. Considering the assigned grade, the fields are above average. As of (12/08), PCGS has graded only 25 examples finer.(#8759)

## Interesting Select 1906-O Eagle

5615 **1906-O MS63 PCGS.** Only 86,895 pieces were struck of the 1906-O, and while not an absolute rarity this issue, certainly is a condition rarity, especially in Mint State. This piece displays satiny green-gold surfaces and the devices are strongly struck throughout. A grade-limiting scrape is noted at the back of Liberty's cheek and there is also a die lamination across the bridge of the nose. Population: 31 in 63, 16 finer (11/08).(#8761)

# INDIAN EAGLES

## Well Defined 1907 Wire Rim Ten Dollar, AU Details

5616 **1907 Wire Rim—Scratched, Improperly Cleaned—NCS. AU Details.** The mintage of the 1907 Wire Rim With Periods ten dollar was 500 pieces.

This figure results from the research of gold specialist Roger Burdette, who says: "500 pieces were struck in August and September 1907, and another 42 wire struck between October and December of that year. Then the 70 pieces that remained unsold in 1915 were melted, giving a net of 472 Wire Rim tens released" (James Halperin, et al., *The Coinage of Augustus Saint-Gaudens*).

The Wire Rim on this AU Details example appears more noticeable on the reverse. All of the design elements have benefited from a sharp strike. Both sides reveal fine hairlines under magnification, and a small scratch is seen in the upper right obverse quadrant. A few areas of dark residue are visible on the reverse. (#8850)

5617 **1907 No Periods MS63 PCGS.** A lustrous yellow-gold representative of this popular first year issue. The fields are impressively smooth, and the cheekbone has only moderate contact. (#8852)

## Choice 1907 No Periods Ten Dollar

5618 **1907 No Periods MS64 NGC.** A sharply struck Choice first year Indian gold type coin that has dazzling luster and gorgeously smooth fields. Faint grazes on the cheek are all that prevent a decidedly higher grade. Excellent eye appeal for the grade, which trades at approximately half the value of an MS65.
*From The Findley Collection.*(#8852)

## Lustrous 1907 No Periods Ten Dollar, MS64

5619 **1907 No Periods MS64 PCGS.** Rich apricot-gold patination tinged with mint-green and lilac envelops both sides of this radiantly lustrous near-Gem. A sharp strike brings out great definition on the design features, including most of the hair and bonnet feathers, areas that are usually weak on this issue. Close scrutiny reveals fewer marks than what might be expected for the grade designation. Housed in a green label holder.(#8852)

## Gem 1907 Indian Ten, No Periods

5620 **1907 No Periods MS65 PCGS.** A beautiful lemon-gold Gem from the introductory year of the popular Indian type. Glimpses of prooflike surface are present on the lower left obverse field, but cartwheel luster otherwise dominates. The strike is bold despite slight incompleteness on the eagle's right (facing) claw.
*From The James Mossman Collection.*(#8852)

## Charming 1908 Motto Eagle, MS64

5621 **1908 Motto MS64 ICG.** Bold orange-peel luster combined with rich yellow-golden color give this near-Gem representative spectacular eye appeal. Few flaws are visible beyond the occasional luster graze or pinpoint mark. The With Motto 1908 eagles are more available than their No Motto counterparts, but are elusive at the near-Gem level and beyond.(#8859)

## Vibrant 1908 With Motto Eagle, MS65

5622 **1908 Motto MS65 NGC.** A combination of coin design and minting technology explains the vibrant luster and stunning eye appeal of the Saint-Gaudens' ten dollar issue. The current Gem offering displays wonderful surface quality and attractive red-gold coloration. Interestingly, this piece would be a two point upgrade for the Smithsonian Institution 1908 With Motto eagle. Census: 69 in 65, 44 finer (12/08).(#8859)

5623 **1908-D Motto MS62 NGC.** This specimen is fully struck, with crisp detail on the hair and feathers. The surfaces exude satiny mint luster, and handling marks are consistent with the grade. This date is difficult to locate in higher Mint State grades.(#8860)

## Pleasing 1909 Ten Dollar, MS64

5624 **1909 MS64 NGC. CAC.** Rich apricot-gold patination graces both sides of this near-Gem ten dollar piece, each of which displays scintillating luster. An attentive strike manifests itself in strong definition on the design elements, including the feathers in the headdress and the eagle's plumage. A few minor rim marks define the grade. Census: 39 in 64, 29 finer (11/08).(#8862)

## Exceptional Choice 1909 Indian Ten

5625 **1909 MS64 ANACS.** A gorgeous and radiant near-Gem that possesses blazing luster and uncommonly mark-free fields. Sharply struck and exceptionally attractive. Although ANACS always seems to be the underdog service to NGC and PCGS, bidders who doubt the quality of the present piece will nonetheless be impressed if they examine it in person at the FUN convention.(#8862)

## Wonderful 1911 Indian Ten, MS64

5626 **1911 MS64 NGC.** An amazing near-Gem, this frosty and highly lustrous example has rich honey-gold luster with exceptional surfaces for the grade. The date is considered common, with a mintage of slightly more than half a million coins. Examples are available in all grades through Gem.(#8868)

## Pleasing 1911 Ten Dollar, MS64

5627 **1911 MS64 NGC.** The 1911, with a mintage of 505,500 circulation strikes, is one of the most obtainable Indian Head ten dollar pieces, though Gem and finer coins are scarce. Both sides exhibit finely granular frosty surfaces with pleasing luster, a characteristic of the 1911. A well executed strike imparts excellent definition to the design elements. A few minor marks barely prevent a higher grade.
*From The Peter J. Adasek, M.D. Collection.*(#8868)

## Delightful Gem 1911 Indian Ten

5628 **1911 MS65 PCGS.** Rich pumpkin-orange and khaki-gold embrace this smooth, lustrous, and exactingly struck Gem. Although readily obtainable in typical Mint State, the 1911 is very scarce as a Gem, and a good value relative to a common date such as the 1932. Population: 53 in 65, 27 finer (11/08).
*From The James Mossman Collection.*(#8868)

## Memorable Gem 1911 Ten Dollar

5629 **1911 MS65 NGC. CAC.** As of (12/08), NGC has certified 58 pieces finer than the current Gem specimen. The richly frosted surfaces of this orange-gold survivor are relatively abrasion-free and exhibit a slight concave appearance. The resulting eye appeal is memorable. A uniformly bold strike compliments the aforementioned positive attributes.(#8868)

## Bright Near-Mint 1911-D Eagle

5630 **1911-D AU58 PCGS.** Though it is the lowest-mintage With Motto Saint-Gaudens eagle issue, the 1911-D does not attract the same attention as its quarter-eagle counterpart due to the presence of melt rarities later in the series. Still, near-Mint examples such as the present coin are highly desirable. Shining yellow-gold surfaces show their share of scattered abrasions, but only a trace of friction affects the pleasingly detailed devices.(#8869)

## Elusive MS63 1911-S Eagle

5631 **1911-S MS63 PCGS.** While 1911-S eagles are now less rare than formerly due to the discoveries of a couple of small hoards, Mint State examples remain elusive, particularly in the higher grades. This piece displays attractive eye appeal over orange-gold, mattelike surfaces. A few tiny abrasions are consistent with the grade.(#8870)

## Blazing 1912 Eagle, Gem Uncirculated

5632 **1912 MS65 NGC.** Majestic cartwheel luster and appealing orange-gold coloration are the memorable traits of this Gem Indian two and a half. The fields are remarkably free of abrasions, suggesting a finer grade when first inspected. However, a few abrasions on Liberty's cheek appropriately restrict this piece to the MS65 level. Census: 56 in 65, 18 finer (12/08).(#8871)

5633 **1912-S AU58 PCGS.** Orange and olive tints enrich this satiny and minimally abraded slider. Slight rub is confined to Liberty's cheek and forehead, and the eagle's shoulder and neck. San Francisco Indian tens are notorious for their scarcity in Mint State.(#8872)

5634 **1912-S MS61 NGC.** An intense satiny sheen radiates across each side of this Mint State example. The surfaces have a distinct fine grain texture, and there are a few grade-limiting marks on the reverse. *From The Peter J. Adasek, M.D. Collection.*(#8872)

## Dazzling 1913 Eagle, MS64

5635 **1913 MS64 PCGS.** Dazzling cartwheel luster illuminates this meticulously struck and exceptionally unmarked Choice Indian ten. The 1913 is relatively scarce at the MS64 level, unlike such issues as the 1932 or 1926, yet trades at a reasonable premium above gold type prices.(#8873)

5636 **1913-S AU55 NGC.** A low mintage of 66,000 pieces ensures the scarcity of this Choice AU Indian ten. The cartwheel luster is only slightly diminished across the open fields, and wear on the eagle corresponds to the grade. Void of reportable marks.(#8874)

5637 **1913-S AU55 PCGS.** Orange-gold fields are minimally marked and vibrantly lustrous. Light but distinct wear on the high points accounts for the grade.(#8874)

## Superlative 1914-D Eagle, MS64

5638 **1914-D MS64 NGC.** The superlative eye appeal of this stunning near-Gem puts it at first glance quite close to the Gem category. The orange-gold surfaces on both sides reveal precious few impairments of any sort, although a loupe and close examination do uncover a couple of tiny ticks. The granular surfaces are somewhat mattelike, and the whole adds up to a marvelous coin.(#8876)

## Lustrous 1914-D Ten Dollar, MS64

5639 **1914-D MS64 PCGS.** This sharply struck and thoroughly lustrous near-Gem has the occasional faint luster graze, but its quality for the grade is undeniable. Pleasing peach-gold patina is imbued with the occasional splash of orange. A better-date Indian ten, especially relative to the abundant 1926 and 1932 issues.(#8876)

## Attractive Choice 1915 Eagle

5640 **1915 MS64 PCGS.** Strong definition for this Philadelphia issue with even wheat-gold coloration save for a splash of crimson at the left obverse rim. Notable eye appeal with satiny luster. This World War I-era slowdown issue is appreciably elusive any finer; PCGS has graded 46 finer examples (11/08).(#8878)

### Sumptuous Gem 1915 Eagle

5641 **1915 MS65 PCGS.** Many survivors hail from this issue's original mintage of 351,000 examples, and of the pieces certified by NGC and PCGS, an astounding 75% are in Mint State, according to statistics from Garrett and Guth (2006). Yet Gems remain elusive, even if such pieces are common compared to those of other Saint-Gaudens eagle issues. The present example has glowing yellow-gold surfaces with occasional apricot accents and minimal marks. Solid detail and an attractive overall appearance count strongly for the coin. PCGS has certified only seven pieces finer (11/08). (#8878)

### Appealing 1916-S Indian Ten MS62

5642 **1916-S MS62 PCGS.** San Francisco Indian eagles are notoriously scarce in Mint State, but here is an example with unbroken mint sheen and undisturbed peach and olive-green color. The chin has a small strike-through, as made, but abrasions of consequence are refreshingly absent.(#8880)

## LIBERTY DOUBLE EAGLES

### Sharp 1850 Double Eagle, XF45

5643 **1850 XF45 NGC.** Rich yellow-gold surfaces exhibit traces of luster in the recesses of this Choice XF twenty dollar. After discounting for high-point wear, the design elements display relatively strong detail. Distributed light marks are within the parameters of the designated grade.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#8902)

5644 **1850 XF45 PCGS.** Light but distinct wear crosses the obverse high points, but the reverse is largely untouched. Pleasingly lustrous with rich yellow-gold color that takes on a mustard appearance near the rims.(#8902)

5645 **1850 AU50 NGC.** This coin is an exciting example of the first regular-issue double eagle. Only slight wear shows on the high points of the design, and much mint luster remains on the surfaces. A moderate number of abrasions on the obverse is consistent with the grade.(#8902)

### Bright 1850 Double Eagle, AU Details

5646 **1850—Improperly Cleaned—NCS. AU Details.** The bright surfaces of this AU Details example reveal fine hairlines under magnification, and traces of reddish-purple and sky-blue patina reside in many of the protected areas. The design elements are sharply defined. Minute contact marks are visible over each side, as is a moderate rim bruise at 4:00 on the obverse.(#8902)

5647 **1850—Obverse Scratched, Improperly Cleaned—NCS. AU Details.** A V-shaped pinscratch on the obverse field near 2 o'clock is hard to find, and the cleaning only moderately subdues the green-gold surfaces. Luster is nonetheless plentiful, particularly on the reverse.(#8902)

### Important 1850 Twenty, AU53

5648 **1850 AU53 NGC.** The deep patina over green-gold surfaces attests to the originality of this double eagle, struck during the first year of mintage for the denomination. A few minor rim marks and other tiny abrasions are of little consequence. Overall an attractive double eagle for the specialist.(#8902)

### Desirable AU53 1850 Twenty

5649 **1850 AU53 NGC.** Though distinct wear is present on the central devices, the bright yellow-gold and lemon-gold fields retain lovely luster. Scattered abrasions on Liberty's cheek and in the surrounding fields contribute to the grade. Still, an attractive example from the beginning of circulating double eagle coinage.(#8902)

## Choice AU 1850 Double Eagle

5650 **1850 AU55 NGC. CAC.** A dusky apricot-gold representative from the first commercially issued date of the series. Luster shimmers across the designs, and the absence of heavy marks confirms the quality. The first obverse hub was used through 1858, and used an L punch to enter the I in LIBERTY. Perhaps Longacre was in a hurry. (#8902)

## Near-Mint State 1850 Twenty

5651 **1850 AU58 NGC.** Green-gold coloration and well defined details add to the eye appeal of this pleasing twenty. NGC has certified only 78 pieces finer as of (12/08), making this near-Mint State survivor a desirable alternative for most collectors. Popular as a first-year issue double eagle, which adds pressure to the available supply of nice examples.(#8902)

## Mint State Sharpness 1850 Twenty

5652 **1850—Improperly Cleaned—NCS. Unc. Details.** This precisely struck almond-gold representative lacks high point friction. The field luster is disrupted by hairlines, and a loupe reveals a few thin abrasions near the bust tip. Since the 1849 is an uncollectible pattern, the popular series in effect begins with the 1850.(#8902)

## Middle-Grade 1850-O Twenty, XF40

5653 **1850-O XF40 NGC.** The 1850-O is historically significant as the first New Orleans double eagle issue, and it is more difficult to locate than the 1851-O, the usually encountered O-mint date from the early 1850s. This apricot-gold example displays luster within design crevices, especially on the reverse, and there are no obtrusive marks. (#8903)

## Nicely Detailed 1850-O Twenty Dollar, XF45

5654 **1850-O XF45 NGC.** Most 1850-O double eagles seen are poorly struck. After accounting for wear on the high points, this Choice XF example exhibits fairly nice definition. The yellow-gold surfaces possess partially prooflike fields, especially on the obverse. A scattering of minute marks does not noticeably interfere with the coin's appeal.(#8903)

5655 **1851 AU58 PCGS.** This highly lustrous near-Mint piece has frosty yellow-gold surfaces with extremely faint traces of light pink toning. (#8904)

5656 **1851-O VF35 NGC.** The 1851-O is most often seen in VF-XF grades, and this coin is an attractive example of this popular date. Moderate, even wear shows on all surfaces, with much remaining mint luster, and no distracting abrasions.(#8905)

## Attractive AU 1851-O Twenty

5657 **1851-O AU50 NGC.** Luster illuminates design recesses of this lightly marked New Orleans twenty. Liberty's cheek and eyebrow show only moderate friction, and there are no individually noteworthy marks. The O mintmark is the scarcest to secure on double eagles, although Carson City twenties are also elusive.(#8905)

## Attractive 1851-O Twenty, AU50

5658 **1851-O AU50 NGC.** All New Orleans twenties are scarce, and this subdued straw-gold example has only minimal wear on the portrait and eagle. A loupe reveals a few thin abrasions on each side, and the borders have a hint of granularity. Collectors often select the 1851-O to represent the denomination within O-mint type sets. (#8905)

## In Demand 1851-O Twenty, AU53

5659 **1851-O AU53 PCGS. CAC.** This well-defined double eagle has ample glimmers of luster that outline the design elements. Liberty's hair has only moderate friction, and there are no mentionable abrasions on either side. New Orleans twenties are scarce, and are always in demand from Southern gold collectors. Population: 38 in 53, 53 finer (12/08).(#8905)

## Popular AU53 1851-O Twenty

5660 **1851-O AU53 NGC.** Luster shimmers from the devices and legends of this smooth and lightly circulated New Orleans double eagle. The wingtips, eyebrow, and hair have only a whisper of friction. A completely problem-free representative from this challenging Southern facility.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#8905)

## Pretty AU55 1851-O Twenty

5661 **1851-O AU55 NGC.** This pretty Choice AU double eagle offers considerable prooflikeness that resides just under a layer of light field chatter created by a short spate in circulation. The average certified survivor only grades Choice XF, showing that most examples of the issue did circulate. Today the issue is scarce in AU and rare in Mint State. This piece has pleasing canary-yellow surfaces with brilliant luster and lots of appeal.(#8905)

5662 **1852 AU53 NGC.** FS-301, Breen-7152. All four date digits are clearly repunched north. An apricot-gold representative with clean surfaces aside from moderate marks near Liberty's chin. A well detailed piece that retains portions of its initial mint sheen, particularly on the reverse.(#8906)

5663 **1852 AU55 NGC.** FS-301, Breen-7152. The date was initially punched too lightly. It was entered a second time, slightly lower in the die. Obvious remnants from the initial logotype punch are evident above the primary date. This sun-gold Choice AU double eagle is only moderately abraded from its brief duration in antebellum commerce.(#8906)

## Doubled Date 1852 Twenty, MS61

5664 **1852 MS61 ANACS.** FS-301, Breen-7152. All four digits of the date are boldly recut south, meaning the original digits were placed a little too high in the space between the bust and border. A boldly struck piece, the surfaces have a faintly matte appearance with brilliant yellow-gold luster.(#8906)

## Scarce AU53 1852-O Liberty Twenty

5665 **1852-O AU53 NGC.** Only a tiny portion of double eagles bear a New Orleans mintmark, and among those that do, many are dated 1851. The 1852-O is a bit scarcer, although collectible unlike most post-1853 O-mint issues. This lightly abraded example has slight rub on the cheek, eyebrow, and hair, but luster emerges from all design recesses.(#8907)

## Attractively Toned 1852-O Twenty, AU53

5666 **1852-O AU53 NGC.** Prohibitively rare in accurately graded Mint State condition. This AU53 alternative is pleasing to the eye, displaying rich orange-gold surfaces with copper-red coloration clinging to the devices throughout. Although the current offering served briefly in the channels of commerce, the surface quality is respectable with no abrasions worthy of individual mention. (#8907)

5667 **1853 AU53 NGC.** The present coin is lustrous and appealing, with only slight wear on the hair strands and eagle's feathers. A number of bag marks and abrasions in the obverse field account for the grade. A pleasing example of this early double eagle.(#8908)

5668 **1853 AU55 NGC.** Breen-7161. The date is repunched, most notably beneath the base of the 1 and through the lower ball of the 3. This double eagle has its share of remaining mint luster, and although the surfaces show marks, these are typical for the grade. (#8908)

5669 **1853 AU58 NGC.** The highest points of the design show slight wear, but all important detail remains intact. Original mint luster radiates from the surfaces, and some handling marks are consistent with the grade. An attractive example of this early double eagle(#8908)

5670 **1853/2—Improperly Cleaned—NCS. AU Details.** FS-301. Whatever the origin of the disturbance within the lower loop of the 3 in the date, coins bearing it are readily collectible! This moderately abraded yellow-gold piece, though somewhat lackluster from a past cleaning, retains strong detail.(#8909)

## Interesting Choice XF 1853-O Twenty

5671 **1853-O XF45 NGC.** Lightly orange-tinged surfaces retain considerable luminosity despite the light wear that is plain across the devices. Well struck overall with strong eye appeal, though the expected minor to moderate marks are scattered across each side. Previously certified as XF45 by PCGS; insert accompanies lot. (#8910)

## Scarce Choice XF 1853-O Twenty

5672 **1853-O XF45 NGC.** Mintages began dropping for the New Orleans twenty in 1853, a harbinger of the ultra rarity issues that soon followed. The 1853-O production of 71,000 pieces was down from 190,000 pieces in 1853 and 315,000 pieces in 1852. This orange-gold Choice XF example shows wear on the hair and wingtips, but some luster remains on the rays, shield, and lettering.(#8910)

## Elusive 1854 Large Date Twenty, XF45

5673 **1854 Large Date XF45 PCGS.** Vivid orange-gold surfaces show occasional hints of deeper color near the margins. Strongly lustrous fields offer a pleasing contrast to the light, even wear across the well struck devices. Scattered abrasions are present on and near the portrait. For Large Date pieces, Population: 5 in 45, 23 finer (12/08). (#98911)

5674 **1854-S—Cleaned—ANACS. XF45 Details.** This double eagle was struck at the San Francisco Mint during its first year of operation, and is collectible as such unlike the 1854-S quarter eagle and half eagle. Cloudy from hairlines, and the obverse has a small rim bruise at 2:30.(#8913)

5675 **1854-S—Improperly Cleaned—NCS. AU Details.** A hairlined straw-gold double eagle that has ample luster and no obtrusive bagmarks. Struck during the first year of operation at the San Francisco Mint, and lower mintage than nearly every subsequent issue of the series from the facility.(#8913)

## Choice AU 1855 Liberty Twenty

5676 **1855 AU55 NGC.** Though described by Garrett and Guth as "fairly common" in lesser states of preservation, they note that the 1855 double eagle " ... becomes increasingly rare in high-grade condition." This sun-gold Choice AU piece, well-defined overall with just a touch of wear on the highest design elements, offers strong luster in the faintly abraded fields. A fundamentally appealing survivor. (#8914)

5677 **1855-S AU50 NGC.** This satiny orange-gold AU double eagle has original color, and the only noticeable marks are tiny rim nicks on the reverse near 3 o'clock and at 7:30. The fledgling San Francisco Mint struggled to produce sufficient gold coins in 1855, causing the firms of Kellogg & Co. and Wass Molitor to strike their own gold issues.(#8916)

5678 **1855-S AU53 ICG.** Subdued yellow-gold surfaces exhibit faint traces of orange toning. An excellent opportunity to acquire an early San Francisco Mint gold coin.(#8916)

5679 **1855-S AU53 NGC.** In its second year of full operation as a federal mint, the San Francisco facility managed to turn out nearly 900,000 1855-dated double eagles, most of which were welcomed into the ravenous maws of commerce. The average grade for certified survivors is only a bit better than Choice XF. This AU53 example offers attractive golden-orange surfaces with a few moderate abrasions and a rim mark on the reverse at 1 o'clock.(#8916)

## 1855-S Double Eagle, AU55

5680 **1855-S AU55 NGC.** The 1855-S double eagle is most often seen in Very Fine or Extremely Fine condition. The apricot-gold surfaces of this Choice AU specimen have traces of light green and tan, and exhibit well defined design features. Hints of luster are visible in the protected areas. Scattered marks are in line what would be expected for a lightly circulated coin.(#8916)

5681 **1856-S XF45 NGC.** Luster glimmers from the stars, legends, and plumage. The surfaces are appropriately abraded for 15 points of circulation. The crossbar of the A in STATES is absent, a hub defect often corrected (but not in the present case) on working dies of the era.(#8919)

5682 **1856-S AU53 NGC.** Myriad abrasions are noted on both sides of this pale greenish-gold example. A few small splashes of coppery-orange toning are evident on the reverse.(#8919)

5683 **1857 AU55 NGC.** This appealing example shows only slight wear on the hair strands and eagle's wings, and a moderate number of abrasions. Satiny mint luster is attractively displayed on the coins' surfaces.(#8920)

5684 **1857 AU55 ICG.** Partly lustrous orange-gold surfaces show only modest wear at the highest points of the sharply struck central devices. Minimally abraded and immensely appealing for the grade. (#8920)

## Attractive AU58 1857-S Twenty

5685 **1857-S AU58 ICG.** A significant amount of mint luster remains on each side of this attractive 1857-S twenty. It is impossible to know for certain if this coin came from the salvage of *S.S. Central America*, but most of those coins were still in mint condition. This is a strongly struck example that has light reddish patina over each side and a few handling marks are present that are consistent with the grade. *From The Peter J. Adasek, M.D. Collection.*(#8922)

## Pleasing Near-Mint 1857-S Twenty

5686 **1857-S AU58 NGC.** Well-defined and brightly lustrous with just a touch of rub across the highest parts of the design. Light yellow-gold surfaces are minimally marked save for a few flaws on the cheek and an abrasion at Liberty's upper hair. Likely of *S.S. Central America* origin, though not designated as such.(#8922)

## Popular MS63 1857-S Twenty
## Ex: *S.S. Central America*

5687 **1857-S MS63 PCGS.** Ex: *S.S. Central America*. 20A, Spiked Shield. SSCA 2987. A shining Select example of this popular shipwreck issue, sharply struck with bright straw-gold luster in the centers that yields to slightly deeper orange near the rims. Minor abrasions, including a few reed marks in the right obverse field, contribute to the grade. Comes with faux-book case and certificate of authenticity. (#8922)

## Gleaming 1857-S Twenty, MS64 From the *Central America*

5688 **1857-S MS64 PCGS.** Variety 20C. Ex: *S.S. Central America.* This variant was labeled the Narrow Serif variety by researcher Robert Evans. The left serif of the U in UNITED was haphazardly repaired through the addition of a thin die cut. Each of the eight different reverse types found among the Central America hoard was mated with one obverse die. The current offering is boldly struck with satiny luster throughout. A memorable 1857-S twenty that is imbued with as much historical significance as undeniable beauty. Housed in a gold label holder.(#8922)

5689 **1858 AU53 NGC.** The present coin is a seductive example of this scarce date. The surfaces are lustrous and attractive, with fewer than average abrasions. There is a touch of wear on the eagle's head and Liberty's hair.(#8923)

## Lustrous 1858 Double Eagle, AU58

5690 **1858 AU58 NGC.** The lustrous surfaces of this near-Mint State twenty have a pleasing copper tinge throughout. Garrett-Guth consider this issue to be a "condition rarity." Based on the NGC *Census Report* and the PCGS *Population Report*, we would have to agree. Census: 80 in 58, 26 finer (12/08).(#8923)

## Pleasing 1858-O Double Eagle, AU Details

5691 **1858-O—Improperly Cleaned—NCS. AU Details.** Rich orange-gold color imbued with traces of light green envelops both sides of this AU Details double eagle, each of which displays traces of luster in the recessed areas. Close inspection reveals a scattering of contact marks, but no hairlines of significance. The interested bidder should not be dissuaded, as the alleged cleaning does not detract.(#8924)

5692 **1858-S XF45 NGC.** This khaki-gold Liberty twenty has remnants of its introductory mint sheen within the legends, plumage, rays, and other raised elements. The obverse has a small rim nick near 3 o'clock.(#8925)

5693 **1858-S AU53 NGC.** This boldly struck twenty exhibits considerable luster, and the only mentionable marks are located near star 13 and on Liberty's neck. Relatively few have emerged from shipwreck hoards, and Uncirculated pieces are rare.(#8925)

5694 **1858-S AU53 ANACS.** Rich yellow-gold color with elements of honey and amber on each side. Light to moderate abrasions overall but strong eye appeal nonetheless. Housed in a small-format ANACS holder.(#8925)

5695 **1859-S AU50 NGC.** An attractive branch mint Type One double eagle, with light wear and minimal abrasions. Mint luster remains strong near the design elements.(#8928)

5696 **1859-S AU50 NGC.** Luster is extensive for the AU50 level, and the strike is good despite slight blending within the hair. The wingtips show light wear, and the obverse has a few scattered moderate marks.(#8928)

5697 **1860 AU53 NGC.** The present piece is less abraded than is customary for a lightly circulated double eagle, and bright luster emerges from all design crevices.(#8929)

5698 **1860 AU55 PCGS.** The present coin is an attractive specimen of the Type One double eagle. The strike is a little soft on Liberty's hair, and slight wear shows on the high points of the design. The surfaces remain lustrous, and there are fewer than average abrasions for the grade.(#8929)

5699 **1860 AU55 PCGS.** Immensely lustrous with pale lemon-gold surfaces. Faintly worn on the softly struck high points with small, scattered abrasions that appear on and near the portrait. (#8929)

5700 **1860-S AU53 PCGS.** Luster illuminates protected portions of this lightly circulated Type One twenty. A moderately abraded canary-gold example that is devoid of individually consequential marks. (#8931)

## Glorious MS61 1860-S Double Eagle

5701 **1860-S MS61 PCGS.** A high-mintage issue of the time, Garrett and Guth describe the 1860-S double eagle as "a workhorse of commerce." As a natural consequence, the coins saw heavy circulation; Garrett and Guth further write that while this is one of the more available Type One double eagles in circulated grades, "High-grade pieces are another story. The issue is very rare in Mint State." The present coin, softly struck but highly lustrous, is generally yellow-gold with substantial orange-to-russet alloy at the margins. Wispy abrasions overall, with a few more serious marks on the eagle's shield. Population: 14 in 61, 10 finer (12/08).(#8931)

5702 **1861-S XF45 NGC.** The present coin is an appealing specimen of a Type One double eagle. The surfaces are attractive yellow-gold, with much remaining mint luster. Moderate, even wear shows on both sides, with a few scratches in the obverse field, consistent with the grade.(#8935)

## Attractive AU55 1861-S Twenty

5703 **1861-S AU55 NGC.** This higher-mintage Civil War-era issue is elusive in better grades. This softly struck piece, lemon-gold with hints of honey, offers superior eye appeal for the designation, with nearly intact luster and only a handful of stray marks that affect the portrait and nearby fields.(#8935)

## Choice XF 1862 Double Eagle

5704 **1862 XF45 NGC.** This Civil War issue is one of the rarest Type One double eagles from the Philadelphia Mint (Jeff Garrett and Ron Guth, 2006). The yellow-gold surfaces of this Choice XF example display traces of luster in the protected areas. Nicely defined, save for high point wear. Distributed light marks are not that bad for the designated grade.
*From The Peter J. Adasek, M.D. Collection.*(#8937)

## Apricot-Gold 1862-S Twenty, AU50

5705 **1862-S AU50 PCGS.** A nice example considering the assigned grade. Apricot-gold coloration meets with relatively lustrous surfaces on both the obverse and reverse. There are abrasions present, but nothing that would challenge the AU50 designation. A respectable S-mint double eagle survivor from the era of the Civil War. (#8938)

5706 **1863-S XF45 NGC.** The 1863-S double eagle is a fairly available Civil War-era issue, popular with type collectors and gold specialists. The present coin shows moderate, even wear, mostly on the obverse. Significant mint luster remains, and abrasions are minimal for the grade.(#8940)

5707 **1863-S AU55 ICG.** Sharply defined with lustrous yellow-gold surfaces and splashes of brighter lemon-yellow toning. Once a scarce date, but now rather plentiful due to recently discovered treasures. (#8940)

### Shimmering Near-Mint 1863-S Twenty

5708 **1863-S AU58 PCGS.** A partially lustrous Borderline Uncirculated representative that has a good strike and the expected number of scattered small abrasions. Although paper money drove gold coins from Eastern and Midwestern commerce by 1863, double eagles remained in circulation on the West Coast.(#8940)

### Beautifully Toned 1864 Twenty, AU50

5709 **1864 AU50 PCGS.** This otherwise straw-gold twenty emits a burst of gorgeous orange coloration when tilted under a light source. Luster is plentiful within the protected areas of the obverse stars and most of the reverse. Struck at about the time Union General Sherman commenced his famous "March to the Sea," while destroying many towns and farms along the way. Population: 34 in 50, 89 finer (12/08).(#8941)

### Barely Circulated 1864-S Twenty, AU58

5710 **1864-S AU58 NGC.** From a good strike, resulting in an ample amount of luster. The surfaces are abraded, but to a lesser extent than is usually seen for this grade and era. As was the case with most Type One Double Eagles from the San Francisco Mint, the entire mintage went directly into circulation. Very few were set aside and despite a sizable production the 1864-S is scarce in AU and better condition. Census: 78 in 58, 62 finer (12/08).(#8942)

### Key 1866-S Double Eagle No Motto, XF40

5711 **1866-S No Motto XF40 NGC.** San Francisco Mint double eagles were coined in both Motto and No Motto varieties in 1866. The No Motto variety is much rarer, with an estimated mintage of 120,000 pieces. This issue is actually one of the rarest dates of the design type, with an estimated population of 200 pieces extant. The issue is rare in XF grades and is a major rarity in AU. According to Jeff Garrett and Ron Guth, no Mint State examples are known.

The present coin exhibits much original detail in the hair and feathers, and LIBERTY is fully legible. Attractive yellow-gold color combines with hints of rose in the fields. A few abrasions are consistent with the grade.(#8945)

### Lovely AU55 1866 Twenty

5712 **1866 AU55 NGC.** A trifle softly struck on the hair over the ear, but this briefly circulated Type Two example from the first year of the design subtype offers solid detail otherwise. Luminous gold-orange surfaces show few overt abrasions, though one is present on the cheek. Generally interesting eye appeal.(#8949)

### Notable Near-Mint 1866 Double Eagle

5713 **1866 AU58 NGC.** A striking near-Mint representative from this initial Motto double eagle issue, highly lustrous with a degree of reflectivity to the wheat-gold fields. The strike is substantially above-average, and though wispy abrasions and minor friction affect each side, the overall eye appeal is high. NGC has graded 37 finer pieces (11/08).(#8949)

### Scarce 1866-S Twenty, AU50

5714 **1866-S Motto AU50 NGC.** The AU50 level is about the average grade of most survivors, as few coins have survived in Mint State for the date. This piece shows a fair number of small abrasions, but considerable luster remains on the pretty apricot-gold surfaces. The first year of the With Motto coinage.(#8950)

5715 **1867 AU55 NGC.** Striking sun-gold with uncommonly vibrant luster for an AU coin. Modest abrasions at and around the portrait contribute to the grade of this well struck Type Two twenty. (#8951)

### Attractive Uncirculated 1867 Twenty Dollar

5716 **1867 MS61 NGC.** The 1867 is a hoard date that was brought back to this country in the 1960s. Most examples do not grade finer than the present piece. The surfaces on this coin have unusually pronounced mint luster for the grade and the striking details are strong throughout. A number of small abrasions and luster grazes account for the grade.(#8951)

### Brilliant 1867 Twenty, MS61

5717 **1867 MS61 NGC.** An amazing 1867 double eagle with highly lustrous and frosty light yellow surfaces that are accompanied by pale pink toning on each side. The surfaces have a few typical marks and abrasions that are consistent with the grade. Census: 76 in 61, 38 finer (12/08).(#8951)

### Desirable 1867 Twenty, MS61

5718 **1867 MS61 PCGS.** Bright luster with orange-gold overtones on the reverse of this otherwise sun-yellow coin. Fine abrasions on the portrait have little impact on the eye appeal, though a few more serious abrasions are present in the fields close to the profile. Nonetheless, a pleasingly detailed coin with interesting visual appeal. Population: 64 in 61, 33 finer (12/08).(#8951)

5719 **1867-S AU53 NGC.** A nice AU53 example of this second year of the With Motto type from San Francisco, this piece displays considerable luster remaining over the golden-yellow surfaces. A few marks near the obverse rim are not overly bothersome. (#8952)

### Lustrous 1867-S Double Eagle, AU55

5720 **1867-S AU55 NGC.** A bold strike and lustrous green-gold surfaces are accompanied by deep toning on both sides of this lovely, original beauty. Only a trace of high point wear and minor marks consistent with the grade keep this piece from the Mint State level. A highly attractive example of the date.(#8952)

## Near-Mint 1867-S Double Eagle

5721 **1867-S AU58 NGC.** Cartwheel luster penetrates the open fields, and the apricot and lime toning is clearly original. The left obverse is typically abraded, while the remainder of this Borderline Uncirculated twenty has only faint surface grazes. Struck after all the shipwreck hoards, the 1867-S is a rarity in Mint State.(#8952)

## Scarce 1868 Double Eagle, XF45

5722 **1868 XF45 PCGS.** Faint traces of greenish color are visible on the lightly abraded yellow-gold surfaces. Both sides have hints of pale rose toning. Perhaps slightly finer than normal for this issue, as the typical 1868 twenty grades just VF or XF. Population: 25 in 45, 79 finer (12/08).(#8953)

5723 **1868-S AU53 NGC.** Luster glimmers from the borders and eagle of this straw-gold double eagle. Heavy marks are refreshingly absent, although we note a thin vertical mark on the left obverse field. (#8954)

## Well Defined 1868-S Twenty Dollar, AU58

5724 **1868-S AU58 NGC.** Ample luster resides on the peach-gold surfaces of this near-Mint State S-mint example, and a decent strike leaves fairly sharp definition on the design features. Distributed small marks are in concert with a large, heavy gold coin that has seen some circulation.(#8954)

5725 **1869 AU53 NGC.** The 1869 double eagle is a low mintage issue, with only 175,130 example coined. This lustrous specimen shows light wear on the hair and some scratches in the obverse field that prevent a Mint State grade.(#8955)

5726 **1869 AU55 NGC.** This low mintage issue is very rare in Mint State grades, but this specimen comes close. Some softness on Liberty's hair and some abrasions in the obverse field limit the grade. Full mint luster makes this example quite attractive.(#8955)

5727 **1869-S AU55 NGC.** Despite a degree of wear on the highest design elements, this yellow-orange S-mint double eagle retains ample luster. Abrasions are surprisingly minimal, and the right reverse border exhibits interesting die cracks.(#8956)

## Sharp 1870 Double Eagle, AU55

5728 **1870 AU55 NGC.** Both sides of this Choice AU double eagle display bright brassy-gold surfaces that retain a good amount of luster in the recessed areas. Except for areas of high-point wear, the design elements exhibit relatively sharp detail. Jeff Garrett and Ron Guth (2006) contend that the 1850 is "surprisingly scarce in all grades."(#8957)

## Pleasing Near-Mint 1870 Double Eagle

5729 **1870 AU58 PCGS. CAC.** Warm yellow-orange surfaces show a measure of alloy at the left obverse with a hint at the uppermost stars. Well struck for this challenging Type Two double eagle issue with only modest wear across the devices, though a few significant abrasions are also present. Population: 12 in 58, 36 finer (11/08). (#8957)

## Reddish-Tinged 1870-S Double Eagle, AU58

5730 **1870-S AU58 NGC.** A few dozen pieces have been graded finer, but the 1870-S is generally not found in Uncirculated condition in spite of the number of submission events. Coins such as this AU58 definitely represent excellent value, as pieces that grade finer are considerably more expensive. This piece has bright surfaces and even, reddish-tinged color. A noticeable trace of luster outlines the devices on each side also, and the surfaces show relatively few handling marks.(#8959)

## Near-Mint State 1871-S Double Eagle

5731 **1871-S AU58 NGC.** A wonderful representative of the AU58 grade, with nearly complete luster throughout, especially on the reverse. Without the assistance of a loupe, any abrasions seen are minuscule and not distracting. We do note, however, a tiny rim bump on the reverse rim near the 7 o'clock position.(#8962)

## Desirable Mint State 1871-S Twenty

5732 **1871-S MS60 PCGS.** Ex: Dallas Bank Collection. Despite the minimal Mint State designation, this Type Two S-mint twenty offers considerable eye appeal. Well struck with vibrantly lustrous gold-orange surfaces that show light to moderate abrasions which account for the grade assigned. Population: 13 in 60, 32 finer (11/08). *Ex: Dallas Bank Collection, (Sotheby's, 10/2001), lot 57.*(#8962)

5733 No Lot.

5734 **1873 Open 3 MS61 NGC.** A fully lustrous yellow-gold double eagle with an attentive strike and the expected number of distributed obverse abrasions. A scarce design subtype in Mint State. (#8967)

## Lustrous MS62 1873 Open 3 Twenty

5735 **1873 Open 3 MS62 PCGS.** The Open 3 1873 is the most frequently encountered Type Two twenty. As such, it gives the collector an opportunity to acquire this scarce type in Uncirculated condition, which is generally not the case with most issues of this type. This piece is sharply defined throughout and has even reddish patina over each side. A surprisingly lustrous coin and one that shows minimal abrasions for the grade.(#8967)

5736 **1873 Open 3 MS62 PCGS.** In the *Encyclopedia of U.S. Gold Coins 1795-1933*, Jeff Garrett and Ron Guth state the 1873 Open 3 double eagle is the number one choice for type collectors in Type Two double eagles. The present example shows some softness on Liberty's hair, but it is fully lustrous, with minimal handling marks. This date is scarce in Mint State, as are all Type Two double eagles. (#8967)

## Popular 1873 Open 3 Type Two Twenty, MS62

5737 **1873 Open 3 MS62 NGC.** Strong demand for Mint State Type Two twenties keeps prices high for these "common" twenties. Each side shows strong definition in the centers with slight softness on the peripheral obverse stars. The surfaces are evenly but lightly satin-like with an even layer of reddish patina on each side. Lightly abraded. (#8967)

## Interesting XF45 1873-CC Twenty

5738 **1873-CC XF45 PCGS.** This typically detailed Choice XF coin, housed in a green label holder, has still-lustrous orange-gold surfaces that show light to moderate abrasions. Interesting eye appeal for this challenging Carson City issue, not so elusive as earlier dates but difficult in its own right.(#8968)

5739 **1873-S Closed 3 MS60 ICG.** Well struck with bright, semiprooflike reflectivity in the fields. Moderately abraded on both sides. A somewhat scarce Type Two issue in Mint State.(#8969)

5740 **1873-S Open 3 AU58 NGC.** The Open 3 variety is less available than the other variety of this date, and Mint State examples are quite scarce. The present coin is an attractive choice for a nice collection of double eagles, with lustrous surfaces, minimal wear and a moderate number of abrasions.(#8979)

5741 **1874 MS60 NGC.** Lustrous and boldly defined with marks on the upper lip and the left obverse field. The 1874 is considerably scarce than its 1873 Open 3 predecessor.(#8970)

5742 **1874-CC—Cleaned—ICG. XF45 Details.** A hairlined pumpkin-gold example that has scattered the small marks customary for limited Western frontier circulation. The reverse displays glimpses of die rust, as made.(#8971)

## Charming Choice XF 1874-CC Twenty

5743 **1874-CC XF45 PCGS.** Both sides are yellow-orange with the latter color dominant on the reverse. Though significant striking softness affects the portrait, the overall visual appeal is strong, and only a handful of stray marks are visible on either side. A solid example of this earlier Carson City double eagle issue.(#8971)

5744 **1874-CC—Improperly Cleaned—NCS. AU Details.** The fields are a bit bright, but the wipe was careful and no hairlines are obvious. The left obverse field has a thin vertical mark, but the surfaces are otherwise only moderately abraded. Well struck throughout. A popular Carson City issue.(#8971)

## Attractive AU55 1874-CC Double Eagle

5745 **1874-CC AU55 PCGS.** Substantial remaining mint luster sweeps the obverse stars and portrait. The reverse has virtually full luster. The scattered marks are unimportant, and fewer in number than is customary for the grade. Small alloy spots are noted at 9 o'clock on the obverse and 8 o'clock on the reverse. Carson City twenties remain popular for their low mintage and Western heritage. (#8971)

## Choice AU 1874-CC Double Eagle

5746 **1874-CC AU55 NGC.** Luster resides in the protected areas of this honey-gold Carson City Choice AU double eagle. The design elements exhibit relatively strong definition, except for a couple of the star centers and portions of Liberty's hair. Scattered light marks are within the parameters of the grade designation.(#8971)

5747 **1875 MS61 PCGS.** An attractive coin, with substantial luster and a decent strike. A touch of rose toning in the field, and scattered handling marks, consistent with the grade.(#8973)

## Shining MS62 1875 Double Eagle

5748 **1875 MS62 PCGS.** Considerable frosty luster graces each side of this charming yellow-gold example. Though the portrait shows trifling striking weakness, the overall eye appeal is excellent. If not for a scrape at the tip of the bust, to the left of the date, a Select or better designation would be within reach.(#8973)

5749 **1875-CC VF30 PCGS.** Originally toned in deep, attractive orange-yellow shades. Luster is present in selected areas, but we note a bright back and forth mark on the obverse field near 11 o'clock. Encapsulated in a green label holder.(#8974)

## Vibrant MS62 1875-CC Double Eagle

5750 **1875-CC MS62 PCGS.** Doug Winter, in his *Gold Coins of the Carson City Mint*, sings the praises of this issue for the type collector: "It is easily the most obtainable Carson City double eagle in Mint State from the 1870's and is the only issue from this decade seen even in [MS63 and better]." This MS62 coin does not quite reach such heights, but it is pleasing nonetheless with brightly lustrous yellow-orange surfaces flecked with deep alloy. Considerable frostiness graces the well struck central devices. The 1875-CC twenty is available at this level but a rarity any finer.(#8974)

## Impressive MS62 1875-CC Twenty

5751 **1875-CC MS62 PCGS.** Though Garrett and Guth enthuse about the overall availability of this issue, noting it as the most easily obtained Type Two Carson City twenty, they caution: "As with all With Motto double eagles, the availability drops drastically as the grade increases. The 1875-CC double eagle becomes scarce in MS-62 and MS-63." This well struck example has brightly lustrous straw-gold and yellow-gold surfaces with just a touch of frostiness on the minimally marked devices, which show above-average design definition for the issue. PCGS has certified just 25 finer pieces (11/08).(#8974)

5752 **1876-CC VF35 PCGS.** This orange-tinted Type Two Carson City double eagle has the sharpness and luster extent of a higher grade, although the cheek, mouth, and obverse field display conspicuous marks. Housed in a green label holder.(#8977)

5753 **1876-CC XF45 NGC.** Considerable flash remains in the fields despite light, even wear. Rich yellow-gold surfaces show elements of straw and sun. A significant abrasion passes from Liberty's eye into the hair behind it.(#8977)

## Semiprooflike 1876-CC Double Eagle, AU50

5754 **1876-CC AU50 PCGS.** The peach-gold surfaces of this AU twenty dollar reveal partially prooflike fields, especially on the obverse. This is a sharply defined coin, except for portions of Liberty's hair. Evenly distributed light marks are noted on both sides. Large numbers of this issue have returned from Europe and South America over the past few decades.(#8977)

5755 **1876-CC AU50 PCGS.** The butter-gold fields and devices are smooth aside from a faded mark above the jaw. Luster emerges from the devices. A lightly worn Carson City twenty from our Centennial year.(#8977)

5756 **1876-CC AU50 PCGS.** Orange-red and peach toning embraces this lightly worn CC-mint twenty. Abrasions are distributed, but are fewer in number and less in severity than generally seen for AU double eagles.(#8977)

5757 **1876-CC AU50 NGC.** A pleasing example of this Centennial-year double eagle. The orange-gold surfaces show a bit of smoky patina on the high points, and while the luster is fairly muted, there are few abrasions of any size noted.(#8977)

5758 **1876-CC AU50 NGC.** Considerable luster glimmers from the margins and eagle's plumage. The fields are moderately abraded, as is to be expected of the grade, but the eye appeal is attractive as there are no individually heavy bagmarks.(#8977)

## Centennial 1876-CC Double Eagle, AU53

5759 **1876-CC AU53 NGC.** Even though this piece obviously saw a brief time in circulation, glints of the fresh prooflike surfaces can be observed when rotated under a light source—especially so on the reverse. An abrasion in the left obverse field is disclosed for the sake of accuracy, although the balance of the marks are insignificant. (#8977)

## 1876-CC Double Eagle, AU53

5760 **1876-CC AU53 NGC.** The peach-gold surfaces of this AU53 specimen display hints of light tan. Traces of luster reside in protected areas, and the design features show fairly good definition, except for the usual softness in portions of Liberty's hair. A few light surface and rim marks are visible over each side.(#8977)

## Appealing 1876-CC Wide Mintmark Twenty, AU53

5761 **1876-CC AU53 PCGS.** Breen 7262, Wide Mintmark, "Rare." The intensely prooflike fields of the current offering tend to exaggerate the surface abrasions received during its brief stint in circulation. Reasonably well struck with straw-gold coloration throughout, save for an occasional dapple of copper toning. The resulting eye-appeal is excellent.(#8977)

## Respectable AU55 1876-CC Twenty

5762 **1876-CC AU55 NGC.** A pleasing Choice AU survivor. Much of the mintage of 1876 Carson City double eagles were transported in bags, including many coins that were shipped overseas. As a result, most examples are riddled with bagmarks. The current offering is surprising well preserved, showing little in the way of obtrusive abrasions.(#8977)

## Choice AU 1876-CC Double Eagle

5763 **1876-CC AU55 PCGS.** The product of a bold strike, this 1876-CC is pleasantly well defined. The red-gold coloration is intensified by rich luster on both sides. A minor abrasion on Liberty's neck and another adjacent to star 1 are the only two marks visible without the aid of magnification, although they are completely commensurate with the assigned grade.(#8977)

## Partly Lustrous Near-Mint 1876-CC Double Eagle

5764 **1876-CC AU58 PCGS. CAC.** A charming Borderline Uncirculated example of the final Type Two CC-mint twenty. Bright luster dominates all but the open fields, which lack the obtrusive abrasions so often encountered on large denomination gold coins. Peripheral elements are well struck.(#8977)

## Frosted MS62 1876-S Type Two Twenty

5765 **1876-S MS62 NGC.** Final year of the Type Two design, the 1876-S is also one of the more frequently seen type coins, especially in high grades. This is a lovely piece for the grade that has thick, frosted mint luster and a strong strike. A few light alloy spots are scattered over each side along with a number of light and individually insignificant abrasions and luster grazes.(#8978)

5766 **1877 MS61 NGC.** Sharply struck with smooth luster and strong eye appeal. Vibrant yellow-gold surfaces show a number of wispy abrasions but few overt distractions. A pleasing example of this initial Type Three double eagle issue.(#8982)

5767 **1877-CC VF30 NGC.** Evenly worn across both sides, with khaki-gold surfaces that are still faintly lustrous. There are no overly distracting abrasions to be found, but superficial marks are numerous. A moderately scarce Carson City issue, with a modest original mintage of 42,565 pieces.
*From The Peter J. Adasek, M.D. Collection.*(#8983)

## Honey-Gold 1877-CC Twenty, XF45

5768 **1877-CC XF45 PCGS.** A conservatively graded double eagle, with considerable semiprooflikeness within the protected areas of both sides. Luscious honey-gold coloration adds to the overall eye appeal of this piece. Previously slabbed as part of the Rainy Day Collection, and so noted on the PCGS insert.(#8983)

## Attractive AU55 1877-CC Twenty

5769 **1877-CC AU55 PCGS. CAC.** The 1877-CC twenty is available through lower-end AU, but starts to become scarce in Choice AU and higher levels of preservation. A strong strike imparts nice detail to the design elements on this coin, and considerable luster remains on the bright peach-gold surfaces. A few light bagmarks are of little consequence to the eye appeal.(#8983)

## Low Mintage 1878-CC Twenty, VF35

5770 **1878-CC VF35 NGC.** Variety 1-A, although only one die marriage was used to produce the scant mintage of 13,180 coins. No distractions require individual mention on this pleasing, red-gold exemplar, and honest wear defines the grade. Dave Bowers, in his *Guide Book of Double Eagle Gold Coins*, opines that the 1878-CC "is one of the keys to the Carson City double eagle series."(#8986)

## Scarce 1878-CC Twenty, AU55 Details

5771 **1878-CC—Tooled, Cleaned—ANACS. AU55 Details.** Light pinkish-gold surfaces are the result of burnishing and cleaning on this scarce date double eagle. Both sides still exhibit sharp design features. With a production of just 13,180 coins, and a distribution of nearly the entire mintage into the channels of commerce, few have survived in any grade.(#8986)

## Conditionally Rare 1878-S Twenty, MS62

5772 **1878-S MS62 PCGS.** Like so many other San Francisco gold coins, the 1878-S double eagle is an elusive condition rarity. While more than 1.7 million double eagles were coined during the year, typical survivors grade XF or AU. This frosty piece has rich honey-gold luster with few surface marks of any kind. PCGS has only certified six finer examples of this date (12/08).(#8987)

## Challenging Choice AU 1879-CC Twenty

5773 **1879-CC AU55 NGC.** The 1878-CC issue boasts the second lowest mintage of double eagles during the 1870s. Of the 10,708 examples that were struck, most—if not all—circulated. The well struck specimen offered here saw limited use, as evinced by the pleasing amount of luster retained on both sides. Dave Bowers writes that "the 1879-CC is scarce in all grades, and when an example is presented at auction there is always a lot of competition." Be prepared for aggressive bidding when this Choice AU survivor crosses the auction block. Census: 46 in 55, 58 finer (12/08). (#8989)

5774 **1881-S MS61 NGC.** The cartwheel luster is unbroken across this attentively struck and moderately abraded representative. NGC has certified just three pieces in grades above MS62, since most Mint State examples paid their dues within loosely stored canvas bags. (#8995)

5775 **1882-CC XF45 PCGS.** Ex: Rainy Day Collection. Warm orange-gold color overall with ample remaining luster at the margins and reverse fields. Well-defined and attractive. Double eagles pedigreed to the Rainy Day Collection within PCGS holders began appearing in quantity in the year 2000.(#8997)

## Pleasing, Original AU50 1882-CC Twenty

5776 **1882-CC AU50 NGC.** Variety 2-B. The 1882-CC is one of the more available Carson City twenties and really only becomes rare in the higher grades of Uncirculated. This is an original AU coin that has even wear over the high points. The devices have an outline of charcoal-gray, and there are noticeable remnants of luster on each side. Overall dusky gray-rose color gives the assurance of originality. (#8997)

## Glorious 1882-CC Twenty, Choice AU

5777 **1882-CC AU55 NGC.** Despite the relatively small mintage of less than 40,000 business strikes, this issue is available up to the lower Mint State levels, for a price. The average certified survivor, however, is only AU50. This Choice AU example displays essentially pristine surfaces, with a bold strike and glorious orange-gold coloration. (#8997)

## Interesting MS61 1882-CC Twenty

5778 **1882-CC MS61 NGC.** A popular mid-date Carson City double eagle issue, one that is generally available in lesser circulated grades, though as Doug Winter notes in his *Gold Coins of the Carson City Mint*, "it is rarer in high grades than such dates as the 1883-CC, 1884-CC, and 1889-CC." The present straw-gold and orange-gold coin offers attractive, slightly dusky luster. Though the well-defined devices show a number of fine to moderate abrasions, the overall visual appeal is strong. Previously graded as MS61 by PCGS; insert accompanies lot. Census: 19 in 61, 6 finer (12/08).(#8997)

5779 **1883-CC XF45 NGC.** Light, even wear shows on the high points, but much original detail remains in the hair and eagle's feathers. The surfaces are lustrous and problem free.(#8999)

## Above Average 1883-CC Twenty, AU50

5780 **1883-CC AU50 NGC.** Quite lustrous considering the assigned grade. The details of this red-gold exemplar are bold and we find no flaws or distractions meriting individual mention. Business strike double eagles were only produced at the two Western mints in 1883, although the San Francisco Mint output was 20 times greater than that of the Carson City Mint.(#8999)

5781 **1883-CC AU50 NGC.** Warm yellow-gold with hints of peach and amber in the luminous fields. Wispy abrasions and a few ticks contribute to the grade, but actual wear is minimal.(#8999)

### Attractive Near-Mint 1883-CC Twenty, AU58

5782 **1883-CC AU58 PCGS.** Apricot-gold luster dominates all but the cheek and open fields. Evenly struck, attractive, and void of mentionable marks. The dies can be identified by spikes within the denticles, at 6:30 on the obverse and 12 o'clock on the reverse. The 1883-CC has a mintage of fewer than 60,000 pieces, and near-Mint examples are insufficient to meet demand.(#8999)

5783 **1883-S MS62 NGC.** Sharply struck with intense cartwheel luster on both sides and attractive yellow-gold color. The reverse is minimally marked, while a few moderate abrasions on Liberty's cheek and in the adjacent field area account for the grade.(#9000)

5784 **1884-CC XF45 PCGS.** Luminous yellow-gold with hints of mustard and orange. The strike is pleasing, and few marks are visible in the fields. Excellent quality for the grade.(#9001)

5785 **1884-CC AU50 NGC.** Many 1884-CC double eagles were shipped overseas in foreign trade, accounting for the survival of many AU and Mint State specimens today. The present specimen has lustrous surfaces and moderate abrasions, consistent with the grade. Light wear and substantial eye appeal make this example most attractive. (#9001)

5786 **1884-CC AU55 ANACS.** A problem-free piece that has ample luster and no obtrusive abrasions among the scattered small marks. Carson City double eagles are highly popular, and have low mintages in comparison with their San Francisco counterparts.(#9001)

5787 **1884-S MS62 NGC.** The design elements are crisply and completely struck. Highly lustrous with deep green-gold toning and the usual number of minor scuff marks, for the grade. This issue becomes scarce and expensive at the Select Mint State grade level, or finer.(#9002)

5788 **1884-S MS62 ANACS.** The sharply struck yellow-gold obverse is surprisingly well-preserved for an MS62. On the reverse, small alloy spots and wispy abrasions account for the grade.(#9002)

### Scarce 1885-CC Double Eagle, VF35

5789 **1885-CC VF35 NGC.** The 1885-CC is one of the scarcest Carson City double eagles struck in the 1880s. Jeff Garrett and Ron Guth (2006) note that large numbers were shipped overseas. The honey-gold surfaces of this Choice VF specimen retain traces of luster in some of the protected areas. Nicely defined, after discounting areas of high-point wear.(#9004)

### Lovely AU53 1885-CC Twenty

5790 **1885-CC AU53 NGC.** Though modest wear is present on the high points of the sharply struck devices, the luster of the yellow-gold fields remains virtually intact. Scattered light to moderate abrasions in the area of the portrait contribute to the grade. Previously certified as AU53 by PCGS; insert accompanies lot.(#9004)

5791 **1885-S MS62 NGC.** Rich yellow-gold with hints of orange and straw. The strike is crisp, as expected for this S-mint issue, and the grade-limiting abrasions are generally wispy and inoffensive. (#9005)

### Lustrous 1889 Twenty, MS62

5792 **1889 MS62 PCGS.** The 1889 double eagle, from a conservative mintage of just 44,070 coins, is seldom found so nice. This piece is sharply detailed and exhibits frosty yellow luster. A few minor surface marks are evident on each side. PCGS has only certified 16 finer examples of this conditionally rare coin (12/08).(#9010)

5793 **1889-CC XF45 PCGS.** Light orange-gold and mustard-gold on the obverse with similar, yet deeper shadings on the reverse. This Choice XF piece offers excellent detail despite minor wear.(#9011)

### Popular 1889-CC Double Eagle, AU55

5794 **1889-CC AU55 NGC.** The 1889-CC is one of the more popular double eagles from the Carson City Mint. An attentive strike leaves crisp definition on the design elements of this Choice AU example. Both sides display peach-gold color, and retain luster in the recessed areas. A minimal number of marks are visible for a coin that saw some circulation.(#9011)

## Challenging AU55 1889-CC Twenty

5795 **1889-CC AU55 NGC.** Lustrous for the grade, and marks are uncommonly few. Both attractive and recommended. A low mintage Carson City twenty that carries over name recognition from its silver dollar counterpart. The facility re-opened in 1889 after a four-year slumber as a mere assay office. The openings and closings in 1885, 1889, and 1893 were greatly influenced by the changes in party of the Presidency.(#9011)

5796 **1889-S MS62 PCGS.** Crisply detailed with warm amber-gold surfaces. Though a number of fine abrasions preclude Select status, powerful luster redeems the overall eye appeal.(#9012)

5797 **1890 MS62 NGC.** Pleasing yellow-gold with overtones of peach. Though a number of light abrasions contribute to the grade, the general visual appeal is high. NGC has graded 20 numerically finer pieces (11/08).(#9013)

5798 **1890-CC AU53 NGC.** Lustrous for the grade with minor wear and distributed small abrasions. A couple of tiny aqua specks beneath the Y in LIBERTY and on the left (facing) wing. Lightly die doubled on PLURIBUS and TWENTY, as is usual for this popular CC-mint issue.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#9014)

## Popular 1890-CC Double Eagle, AU55

5799 **1890-CC AU55 NGC.** A delicate blend of apricot-gold and mint-green patination dances over both sides of this Choice AU Double eagle. Lightly abraded surfaces possess a generous amount of luster, and exhibit sharply struck design features. This is a popular Carson City issue.(#9014)

5800 **Group Lot Three AU Gold Coins.** This lot includes: **1890-CC Liberty Double Eagle, AU55 PCGS,** boldly struck with lots of luster and mere traces of wear on Liberty's crown and hair; **1908 Indian Eagle, With Motto, AU58 PCGS,** very close to Mint State, with intensely lustrous yellow-gold surfaces and minimal evidence of circulation; and a **1909/8 Saint-Gaudens Double Eagle, AU58 NGC,** well struck with a bright, satiny finish, slight highpoint wear, and a few minuscule hairlines in the fields.
(Total: 3 coins)(#9014)

## Sharply Struck 1890-CC Double Eagle, AU55

5801 **1890-CC AU55 NGC.** This Choice AU Carson City representative displays generous luster on its brassy-gold surfaces, and a well executed strike results in crisp definition on the design elements, including the star radials, Liberty's hair strands, and the eagle's plumage. The expected number of marks are visible over both sides.(#9014)

## Attractive 1890-CC Twenty, AU58

5802 **1890-CC AU58 NGC.** A boldly struck and highly lustrous example, this 1890-CC twenty has attractive light yellow surfaces with a few minor contact marks on each side, along with traces of wear on the highest design points. The 1890-CC double eagle is often chosen by type collectors who only seek a single piece from the Carson City Mint.(#9014)

## Patinated 1890-CC Double Eagle, AU58

5803 **1890-CC AU58 NGC.** A delicate mixture of apricot-gold, mint-green, and lilac patina adorns each side of this near-Mint State specimen, and an attentive strike delivers strong delineation to the design elements. A few minute marks do not significantly take away from the nice overall eye appeal.(#9014)

## Uncirculated 1890-CC Twenty Dollar

5804 **1890-CC MS60 NGC.** This Carson City type coin has full luster and rich sun-gold color. The obverse has its share of small marks, and the portrait has three tiny dark alloy spots. The spot on the cheek is accompanied by a few faint pinscratches. PLURIBUS and TWENTY on the lower right reverse are lightly die doubled, as is the case for most (but not all) 1890-CC twenties.(#9014)

## Low Mintage AU53 1892 Twenty Dollar

5805 **1892 AU53 NGC.** 1892 half eagles and eagles are plentiful, but East Coast bankers apparently had little use for the double eagle that year. Just 4,430 pieces were struck, and most survivors are in XF or AU grades. The present yellow-gold example retains much of its initial flashy luster, although the surfaces display scattered moderate marks consistent with light circulation.(#9019)

5806 **1892-CC XF45 PCGS.** Gleaming sun-yellow surfaces show occasional hints of orange. Light wear is generally restricted to the high points, leaving the fields remarkably lustrous and minimally marked. A great Carson City twenty.(#9020)

5807 **1892-CC—Cleaned—ICG. AU58 Details.** This low mintage Carson City double eagle is richly detailed and has nearly complete cartwheel luster on the reverse. The obverse is slightly glossy from a cleaning, the cheek is scratched, and the obverse rim has a small ding at 2:30.(#9020)

## Gleaming Near-Mint 1892-CC Double Eagle

5808 **1892-CC AU58 PCGS.** Sharply struck with only a trace of friction visible across the high points. Most notable about this yellow-gold example is its astonishing reflectivity. Though the mirrors magnify the fine abrasions scattered throughout the fields, the overall eye appeal remains impressive.(#9020)

5809 **1892-S MS61 Prooflike NGC.** A remarkable example with fully mirrored fields around the frosty devices. Both sides are fully lustrous with bright yellow surfaces. Census: 6 in 61 Prooflike, 3 finer (11/08). (#79021)

## Sharply Defined 1893-CC Double Eagle, AU58

5810 **1893-CC AU58 NGC.** This near-Mint State example possesses semiprooflike fields that show field-device variance at certain angles. A well executed strike results in strong definition on the design elements, including the star centers, Liberty's hair strands, and the eagle's plumage. Lightly abraded on each side.(#9023)

## Crisp 1894 Double Eagle, MS63 Prooflike Tied for Finest Certified in Prooflike

5811 **1894 MS63 Prooflike NGC.** The 1894 double eagle is very common, and easily located through MS63. Prooflike examples are another matter. The Prooflike fields of this Select example yield pleasing contrast with the motifs at all angles. Brass-gold surfaces exhibit sharply struck design elements, and reveal just a few grade-defining marks. Census: 2 in 63 Prooflike, 0 finer (11/08). (#79025)

5812 **1894-S MS63 PCGS.** All of the design elements are sharply struck. The surfaces are carefully preserved, but a thin coating of milky patina over both sides limits the grade. Surface marks are minimal for the grade.(#9026)

## Significant 1896-S Twenty, MS64

5813 **1896-S MS64 NGC. CAC.** An amazing example of the conditionally rare 1896-S double eagle, with frosty and brilliant yellow-gold surfaces that exhibit subtle rose and pink toning on each side. Few have survived in finer quality than the present piece, with NGC and PCGS each certifying just two better examples. (#9030)

5814 **1900 MS64 NGC.** Peach-gold surfaces exhibit sharply struck design elements and radiate strong luster. A handful of light marks deny Gem classification.(#9037)

5815 **1900-S MS63 NGC.** Lime-green and caramel-gold enriches this lustrous and only lightly abraded Select Liberty twenty. The 1900-S is plentiful in MS61 and MS62, but is nearly unobtainable as a Gem. (#9038)

5816 **1901 MS64 PCGS.** Sharply struck,with exquisite detail on the hair and eagle's feathers. The surfaces are fully lustrous, and only a few, scattered handling marks prevent a Gem certification.(#9039)

5817 **1901 MS65 PCGS. CAC.** Vibrant luster enlivens the honey-gold and pale rose surfaces. The design elements are well struck, and marks are minimal on both sides. A lovely Gem example of this low mintage issue, of which just 111,430 pieces were struck. PCGS has only graded three examples finer (11/08).
*From The James Mossman Collection.*(#9039)

5818 **1902 AU58 PCGS.** Crisply struck and lustrous with no obvious signs of highpoint friction. The cheek and obverse field are typically (but not heavily) abraded. A low mintage issue popular with speculators.(#9041)

### Interesting MS62 1902 Twenty

5819 **1902 MS62 PCGS.** Warm yellow-orange surfaces show a few small alloy streaks on the sharply struck portrait. Luster is impressive, and only a few small abrasions scattered on each side combine to preclude a finer designation. Solid eye appeal for this lower-mintage 20th century double eagle issue. PCGS has graded 68 finer pieces (11/08).(#9041)

### Lustrous MS62 1902 Twenty, Low Mintage Issue

5820 **1902 MS62 PCGS.** A forgotten issue but one with a tiny mintage, the 1902 double eagle was only produced to the extent of 31,140 business strikes. This piece shows good luster over orange-gold surfaces that show only a modicum of small contact marks. An underrated coin in the lower Mint State grades, in all likelihood. (#9041)

5821 **1903 MS64 NGC.** This yellow-gold near-Gem has glimpses of subtle orange toning here and there. Booming luster and clean surfaces ensure the eye appeal. A pleasing example of this lower mintage Philadelphia issue.(#9043)

### Popular Gem 1904 Twenty

5822 **1904 MS65 PCGS.** A shining Gem representative of the quintessential Liberty double eagle type issue, boldly impressed with rich sun-yellow color and enchanting luster. A tiny area of haze is visible at the upper obverse, but this has minimal impact on the eye appeal. Even this heavily minted issue becomes scarce any finer. (#9045)

5823 **1904-S MS62 Prooflike ANACS.** Well-defined in the centers with undeniable yellow-gold mirrors flanking the devices. Highly appealing despite wispy, grade-defining abrasions on each side. (#79046)

5824 **1904-S MS62 Prooflike NGC.** Both fields are nicely reflective, and display no more than the expected number of moderate marks. Boldly struck. A plentiful issue with normal cartwheel luster, but prooflikes remain scarce. Census: 34 in 62 Prooflike, 20 finer (12/08). (#79046)

### Desirable MS62 1905 Double Eagle

5825 **1905 MS62 PCGS.** After the 1904 double eagle mintage extravaganza, production for the denomination at Philadelphia plunged below 60,000 pieces in 1905. This satiny yellow-orange example from the latter year is sharply struck and attractive for the grade, with only wispy abrasions precluding Select status. (#9047)

### Sharply Defined 1906 Twenty Dollar, MS62

5826 **1906 MS62 NGC.** Soft luster resides on both sides of this twenty dollar representative, each of which yields peach-gold patination. An exacting strike leaves strong definition on the design features, including Liberty's hair, the star centers, and the eagle's plumage. Some light marks and grazes occur on both faces.
*From The Peter J. Adasek, M.D. Collection.*(#9049)

### Pleasing Select 1906-D Double Eagle

5827 **1906-D MS63 NGC.** A lovely yellow-gold example of the initial Denver Mint double eagle issue. Nicely struck and thoroughly lustrous with scattered minor marks. The Denver Mint would displace the New Orleans Mint within a few years, presumably because of its modern equipment and centralized location.(#9050)

### Prooflike 1906-S Twenty, MS62

5828 **1906-S MS62 Prooflike NGC.** Fully prooflike double eagles are extremely elusive and highly desirable. Orange-yellow surfaces are highly reflective with bold definition and scattered abrasions, mostly trivial in nature. An attractive example at this grade level. Census: 4 in 62 Prooflike, 1 finer (12/08).(#79051)

## HIGH RELIEF DOUBLE EAGLES

### AU Sharpness 1907 High Relief, Wire Rim Twenty

5829 **1907 High Relief, Wire Rim—Genuine—PCGS. AU Details.** This Wire Rim High Relief is in one of the new PCGS Genuine holders, and we have in-house graded it as AU Details. The rims have been filed on both sides, most noticeably around the upper obverse and upper reverse, perhaps to simulate a Flat Rim example. The piece also appears lightly cleaned, although unobtrusively. Despite the caveats there is much appeal remaining, both from the glory of Saint-Gaudens' original vision and from the coin itself. (#9135)

### Formidable Uncirculated Details MCMVII High Relief Twenty

5830 **1907 High Relief, Wire Rim—Rim Filed—NCS. Unc. Details.** The obverse rim is filed near 10:30, but this lustrous High Relief twenty is otherwise delightful. The strike is penetrating, and there are no remotely noticeable marks. The eye appeal is exquisite, and the collector who can overlook a subtle impairment will acquire a numismatic prize at a reasonable prize.(#9135)

### Satiny 1907 High Relief Twenty, MS60

5831 **1907 High Relief, Wire Rim MS60 NGC.** A lovely High Relief double eagle, with minor surface marks that are consistent with the grade. Both sides have satiny yellow-gold luster. The strike is about average, considering the multiple blows of the coining press that were required to make them.(#9135)

### Accessible Choice VF 1907 High Relief, Flat Rim Twenty

5832 **1907 High Relief, Flat Rim VF35 NGC.** This is a reasonably attractive example of the famous and ever-popular Saint-Gaudens High Relief Double Eagle. Heavy wear is evident overall, no doubt from being used as a pocket piece for many years. It is interesting to note NGC labeled this as a Flat Rim variety; indeed, even if this were originally a Wire Rim, it would have long since worn away! Though almost every worthy coin auction contains a few High Reliefs, well-worn pieces have tremendous numismatic importance and are coveted by a formidable cross-section of collectors.(#9136)

### 1907 High Relief Twenty, XF Details

5833 **1907 High Relief, Flat Rim—Polished—NCS. XF Details.** Like so many other High Relief double eagles, this piece met with the jewelers cloth at some point during the past century. Although the coin displays unnaturally reflective surfaces, it still has a level of eye appeal—perhaps because it is a stunning work of art to begin with. Noted on the NCS label as the Flat Rim variant, which is five times scarcer than their Wire Rim cousins.
*From The Peter J. Adasek, M.D. Collection.*(#9136)

### Lovely Borderline Uncirculated 1907 High Relief Double Eagle

5834 **1907 High Relief, Flat Rim AU58 PCGS.** The careful numismatist, armed with a lens and a strong light, can locate a whisper of friction on Liberty's knee and chest, and on the upper edge of the eagle's front wing. Mint luster is nonetheless unbroken, although slightly diminished in intensity. Any marks present are inconsequential. The Roman Numerals, High Relief twenty was issued only in 1907, with a mintage of just 12,367 pieces. It is certainly possible to obtain a higher graded example of this world famous rarity, but the AU58 grade provides exemplary value for the issue.(#9136)

### Uncirculated Details Flat Rim MCMVII High Relief

5835 **1907 High Relief, Flat Rim—Improperly Cleaned—NCS. Unc. Details.** Although designated as cleaned by NCS, the hairlines are difficult to locate, even when a loupe is used. This firmly struck yellow-gold example shows minor incompleteness only on Liberty's raised knee and on the base of the rays above the sun. Two curious lintmarks on the upper edge of the front wing are of mint origin. This high relief has all the eye appeal seen on many finer graded examples, but will likely be procured at a much lower price.(#9136)

## SAINT-GAUDENS DOUBLE EAGLES

### Pleasing MS65 1907 Arabic Numerals Double Eagle

5836 **1907 Arabic Numerals MS65 NGC.** This was the final version of Saint-Gaudens' double eagle design, as reworked by Charles Barber. The result was a design that struck up much more readily than either the High Relief or the Ultra High Relief varieties; but numismatists have traditionally decried the lesser artistic merit of the Arabic Numerals version. This Gem example is well struck and lustrous, with rich orange-gold coloration and minimal surface marks, as expected for the grade.
*From The Calvin Collection.*(#9141)

### Highly Lustrous 1907 Arabic Numerals Gem Twenty Dollar

5837 **1907 Arabic Numerals MS65 PCGS.** Rich apricot-gold patina is laced with traces of light tan, and a penetrating strike imparts crisp definition to the design features, including the panes on the Capitol building, and Liberty's facial features, fingers, and toes. Highly lustrous surfaces are nicely preserved.(#9141)

## Gem 1907 Arabic Date Twenty Dollar

5838 **1907 Arabic Numerals MS65 PCGS.** Rich peach centers are framed by deep canary-gold. The device highpoints show glimpses of olive-green and steel-blue. Booming luster and a precise strike combine with surprisingly smooth fields and minimal contact on the devices. Approximately 10 times scarcer as a Gem than its 1908 No Motto Philadelphia successor.
*From The James Mossman Collection.*(#9141)

## 1907 Arabic Numerals Twenty, MS66

5839 **1907 Arabic Numerals MS66 NGC.** Frosty luster and satisfyingly clean surfaces deliver substantial eye appeal. A well struck Gem that has meticulous definition on Liberty's torch hand and the Capitol building. The No Motto type was struck for only two years, and high grade examples of this date are much less common than their 1908 No Motto alternatives. Only eight pieces have been graded finer as of (12/08).(#9141)

5840 **1908 No Motto MS66 NGC.** Short rays obverse hub. A gorgeously unabraded Premium Gem that has the quality of a Wells Fargo hoard piece, although no such pedigree is designated on the NGC insert. Sharply struck, lustrous, and lovely.(#9142)

## Satiny 1908 No Motto Twenty, MS66

5841 **1908 No Motto MS66 NGC.** Mesmerizing orange-gold coloration and satiny surfaces throughout. The strike is crisp and the fields are nearly distraction-free, as one would expect of a Premium Gem survivor. Three different issues represent the No Motto subtype, and the 1908 P-mint is the most plentiful of the trio in all grades. (#9142)

5842 **1908 No Motto MS66 PCGS.** Ex: Wells Fargo Nevada Gold. Uncommonly smooth with rich, reddish-gold color. Both sides are fully frosted with an above average impression for this often inadequately defined issue, and abrasions are held to an absolute minimum.(#9142)

5843 **1908 No Motto MS66 NGC.** Warm sun-gold surfaces are expressively lustrous and carefully preserved. A trifle softly struck on the right (facing) leg, though this is a minor quibble in context. (#9142)

5844 **1908 No Motto, Wells Fargo Nevada MS66 PCGS.** Like many others from the Wells Fargo hoard, this double eagle is lustrous and well preserved. The design motifs are boldly rendered, including the panes of the Capitol building, and Liberty's fingers and toes. Only minor weakness occurs on the eagle's feathers, just below the breast. Honey-gold patina adorns both sides.(#99142)

5845 **1908-D No Motto MS64 NGC.** Light yellow-orange with hints of straw in the centers of the satiny fields. A pleasingly lustrous Choice coin that shows only minimal evidence of alloy.(#9143)

## Splendid Gem 1908-D No Motto Twenty

5846 **1908-D No Motto MS65 PCGS.** Bowers' *Guide Book of Double Eagle Gold Coins* asserts that while lower-Mint State examples are available, Gems are rare. That may be a bit of a stretch, as PCGS has certified nearly 300 pieces in Gem condition. They certainly *are* rare at the next grade level up, where only nine Premium Gems are certified. This piece has splendid orange-gold coloration and broad eye appeal. What few contact marks occur are away from the prime focal areas.(#9143)

5847 **1908 Motto MS63 PCGS.** A satiny orange-gold example with solid detail and only minor, scattered abrasions present on each side. Strongly appealing for the issue and housed in a green label holder.
*From The Calvin Collection.*(#9147)

## Delightful Near-Gem 1908 With Motto Twenty

5848 **1908 Motto MS64 PCGS.** A sharply struck double eagle that has carefully preserved surfaces and pleasing, softly frosted luster. A couple of more noticeable marks are located on the lower left reverse, below the eagle's head and breast, respectively. The piece has very good overall eye appeal, however. Much scarcer than the No Motto variety of the same date. PCGS has only graded 48 finer examples (12/08).(#9147)

5849 **1908-D Motto MS64 NGC.** Well-defined with strong luster that shows a hint of satin on the yellow-orange obverse. Aside from a handful of tiny marks and a flattened area in the rays to the right of Liberty, an impressively preserved coin.
*From The Calvin Collection.*(#9148)

## Wonderful 1908-D Motto Twenty, MS65

5850 **1908-D Motto MS65 PCGS.** The satiny, copper-gold surfaces are exceedingly attractive. This piece is bright and lustrous, with good eye appeal and only a touch of light haze to mark the passage of time. About as nice as this date is ever found, and fairly difficult to obtain in Gem condition as seen here. PCGS has graded 26 examples finer (12/08).(#9148)

## AU50 1908-S Twenty Dollar

5851 **1908-S AU50 PCGS.** The memorable production figure for this low-mintage issue is a minuscule 22,000 coins, the least plentiful of all the With Motto Saints. This piece still retains about half of its original luster, with brownish-gold surfaces and some moderate contact marks that are more prominent on the obverse. (#9149)

5852 **1909 MS62 NGC.** The luster of this yellow-gold piece is generally satiny, though occasional hints of flashiness appear under a light. Pleasingly detailed with only light, scattered abrasions. *From The Calvin Collection.*(#9150)

5853 **1909 MS62 NGC.** Bright yellow-gold overall with hints of sun and wheat near the margins. Though a few too many abrasions are present for Select status, this strongly lustrous coin is attractive for the grade assigned.(#9150)

## Near-Gem 1909 Twenty, MS64

5854 **1909 MS64 PCGS.** The 1909 Saint-Gaudens is an exceedingly difficult condition rarity in MS64. This is a sharply struck near-Gem whose satiny surfaces display lovely bright peach and lime-gold color. Actually quite close to full Gem status, with only the slightest imperfections evident. The obverse is especially clean. PCGS has only certified 26 finer pieces.(#9150)

## Lustrous 1909/8 Twenty, MS61

5855 **1909/8 MS61 NGC.** An unusual 20th century gold overdate, the 1909/8 twenty is about equal the rarity of the non-overdate issue of the same year. This boldly defined piece is highly lustrous with frosty yellow-gold surfaces. Scattered abrasions are evident on each side, but entirely trivial in degree.(#9151)

## Uncirculated 1909/8 Twenty Dollar

5856 **1909/8 MS61 NGC.** Always a popular issue as the 1909/8 is the only overdate in the Saint-Gaudens double eagle series. This is an especially attractive example, especially for the grade that shows fully defined design elements on each side. Light reddish patina on each side and lightly abraded for the grade.(#9151)

5857 **1909-S MS64 NGC.** Slight softness at the margins has a counterbalance in the strong central detail. Generally pale straw-gold with elements of wheat and violet near the rims.(#9153)

## Attractive MS65 1909-S Twenty

5858 **1909-S MS65 NGC.** Dave Bowers' 2004 reference on the subject states that "the 1909-S double eagle is readily available in Mint State grades through MS64, with MS65 being scarce to rare." Scarce is probably the more accurate choice of words, although the demand for Gem examples does put a strain on the limited supply. This piece displays an attractive reddish hue throughout. As of (12/08), NGC has certified only nine examples finer.(#9153)

## Exquisitely Struck 1909-S Gem Double Eagle

5859 **1909-S MS65 PCGS.** Whispers of lilac are imbedded within the honey-gold patina of this S-mint Gem. A penetrating strike emboldens the design elements, including Liberty's facial features, fingers, and toes, the Capitol building panes, and the eagle's plumage. A few trivial, grade-consistent marks are not bothersome. (#9153)

## Splendid MS65 1910 Double Eagle

5860 **1910 MS65 PCGS.** The 1910 twenty is readily available in lower Mint State grades but seldom seen in Gem condition. This splendid Gem offers radiant cartwheel luster along with a bold strike and exemplary orange-gold coloration. Relatively unabraded and pleasing; do not let the scuffs on the reverse slab, at the eagle's lower midsection, deter.(#9154)

## Gem 1910-D Saint-Gaudens Twenty

5861 **1910-D MS65 PCGS.** A beautiful Gem with exemplary preservation and pleasing canary-gold toning. Nicely struck and highly lustrous. A good value, given its quality and the cost of securing an MS66. The 1910-D has mintage about one-fifth that of the 1910-S, yet the 1910-D is more available, perhaps because more of the 1910-S went into circulation.(#9155)

## Desirable 1910-D Twenty, MS66

5862 **1910-D MS66 PCGS.** Exceptional quality for this date and mint, with blazing luster in the fields and a strong strike. Note the rich orange-gold color and pristine nature of the surfaces. Precious few double eagles are so well preserved, as most show substantial nicks and handling marks. Not so here, as the surfaces are wonderfully clean for a double eagle of this era. An impressive coin for the date or type collector. Population: 96 in 66, 2 finer (12/08).(#9155)

5863 **1910-S MS64 NGC.** Green-gold and apricot tints ensure the originality of this carefully preserved near-Gem. Creamy luster sweeps the intricately struck devices. Liberty's face, her torch fingers, and the panes of the Capitol building are all impressively brought up.(#9156)

## Bold Gem 1910-S Double Eagle

5864 **1910-S MS65 PCGS.** A pretty example with slightly subdued luster on the satiny mustard-orange surfaces. Intricately detailed with an appreciable lack of marks; with slightly more vibrant luster, this coin could be a higher grade. PCGS has certified only 16 finer examples (12/08).(#9156)

## Handsome Choice 1911 Twenty Dollar

5865 **1911 MS64 NGC.** An exceptionally mark-free example of this popular lower mintage issue. Although quantities of Uncirculated 1911 twenties have returned to America from their long slumber in European vaults, most are noticeably abraded due to indifferent bag storage. However, the present lustrous orange-gold near-Gem has superior eye appeal for its certified grade.
*From The Calvin Collection.*(#9157)

## Lovely 1911 Twenty, MS64

5866 **1911 MS64 PCGS.** A remarkable near-Gem representative of this moderately low (197,200) mintage issue, with its bold design features and exceptional surfaces. Housed in a first generation PCGS holder, this piece should see considerable demand when it crosses the auction block. PCGS has only certified 42 finer pieces (12/08). (#9157)

## Important 1911 Double Eagle, MS64

5867 **1911 MS64 PCGS.** Frosty and mostly brilliant with just a hint of olive-gold toning. Outstanding quality for the grade. Although the 1911 is not particularly scarce in MS60 and lower grades, examples at the MS64 level are scarce and highly esteemed by specialists. Worth a generous bid.(#9157)

## Vibrant MS66 1911-D Twenty

5868 **1911-D MS66 NGC.** Gleaming lemon-gold surfaces are carefully preserved with glimpses of sun-yellow. The strike is crisp in the centers, and the margins have substantially above-average detail. A great Premium Gem representative that offers near-impeccable visual appeal. NGC has graded 30 numerically finer examples (11/08).(#9158)

## Exquisite 1911-D Double Eagle, MS66

5869 **1911-D MS66 PCGS.** Potent luster exudes from apricot-gold surfaces laced with tints of light green. The motifs are in receipt of a penetrating strike, reflected in the crisp detail on Liberty, the Capitol building, and on the eagle. Exquisitely preserved throughout. PCGS has seen only nine pieces finer.(#9158)

## Sumptuous 1911-D Twenty, MS66

5870 **1911-D MS66 PCGS.** The 1911-D is one of the wonder issues of this amazing series, one that is occasionally found in Gem and even finer condition in sufficient numbers that the many collectors who desire one actually have a reasonable chance. This piece displays sumptuous cartwheel luster along with orange-gold surfaces tinged with hazel at the rims. A piece certainly deserving of a fine type or date set.(#9158)

5871 **1911-D MS66 NGC.** Sharply struck throughout with rich, satiny luster. This subtly granular yellow-gold and green-gold Premium Gem offers excellent visual appeal for this D-mint issue.(#9158)

## Unusual 1911-D/D Twenty, MS66

5872 **1911-D/D MS66 PCGS.** FS-501, formerly FS-1911.5. The boldly doubled mintmark is clearly evident on this piece, although examples of the variety are infrequently seen. Varieties such as repunched mintmarks, overdates, and doubled dies, are seldom seen on any gold coins, due to the care that was taking in their production. This boldly defined piece has frosty yellow-gold luster with considerable rose toning.(#9158)

## Gorgeous 1911-S Twenty, MS65

5873 **1911-S MS65 PCGS.** A pleasing Gem example of this issue, lustrous and with fine-grained, reddish-gold surfaces that add a hint of hazel there and there. Pleasingly struck, although not boldly so. A coin from the year that saw the U.S. Supreme Court order the dissolution of Standard Oil as an "unreasonable monopoly" under the Sherman Antitrust Act. Exceedingly scarce any finer. (#9159)

5874 **1912 MS63 PCGS.** Warm yellow-gold and orange-gold shadings meld on each side of this lustrous Select coin. Solid strike and eye appeal with few overt abrasions. Housed in a green label holder. (#9160)

5875 **1912 MS63 PCGS.** Tinges of sage appear near the rims on this lustrous Select Uncirculated piece, one that is kept from a higher grade by a few individually minor contact marks but is nonetheless quite appealing.(#9160)

## Near-Gem 1912 Double Eagle

5876 **1912 MS64 PCGS.** It is possible that the grade-limiting factors for this attractive 1912 double eagle are two abrasions: one in the upper right obverse field and another across the rays on the reverse. Otherwise the fields are quite pleasing and the strike firm. PCGS has only graded 32 pieces finer as of (12/08).(#9160)

## Scarce Select 1913 Twenty Dollar

5877 **1913 MS63 NGC.** This scarcer date pre-war Saint-Gaudens twenty has sun-gold luster and a good strike. The obverse displays scattered minor contact, and the reverse rim at 4 o'clock has inconspicuous marks. Nearly unobtainable as a Gem, the 1913 is collectible in AU58 through MS64.
*From The Calvin Collection.*(#9161)

## Conditionally Rare 1913 Twenty, MS64

5878 **1913 MS64 PCGS.** This issue is rare as a Gem, but available in lower grades—for a price, of course. The present example offers beautiful, coruscating luster emanating from the matte-like orange-gold surfaces, with glints of greenish-gold at the rims. The strike is bold, and only small ticks and undistracting evidence of contact preclude a Gem grade. PCGS has graded eight specimens finer (12/08).(#9161)

5879 **1913-D MS64 PCGS.** With 393,500 pieces produced, the 1913-D is not rare in the absolute sense, but as with many other Saint-Gaudens issues, high-grade survivors are elusive. This sharply struck piece offers delightfully lustrous yellow-gold surfaces with splashes of orange.
*From The Calvin Collection.*(#9162)

## Radiant Gem 1913-D Saint

5880 **1913-D MS65 NGC.** The 1913-D is another Saint-Gaudens issue readily found in lower Mint State grades but rare in Gem condition. This pretty apricot-gold example tinged with sage at the rim displays powerful eye appeal through its combination of radiant cartwheel luster, a bold strike, and relative paucity of contact. NGC has certified only seven examples finer (12/08).(#9162)

5881 **1913-S MS61 NGC.** Generally light yellow-orange with occasional hints of honey and wheat. Numerous wispy and more noticeable abrasions, though the overall visual appeal remains surprisingly strong.(#9163)

## Desirable MS62 1913-S Twenty

5882 **1913-S MS62 PCGS.** A few minor abrasions in the obverse field, above and through the rays, appear to be the grade-limiting factor here, but this piece still offers more appeal than the grade might suggest. The strike is well executed if short of full, and cartwheel luster abounds on the orange-gold surfaces. The second lowest mintage of all With Motto twenties adds to the allure.(#9163)

## Challenging Select 1913-S Twenty

5883 **1913-S MS63 PCGS.** The 1913-S mintage is so low that it brings to mind the colloquialism, 'it sticks out like a sore thumb.' Just 34,000 pieces were struck, the least of any Arabic Numerals issue save for the 1908-S. This lustrous and suitably struck Select representative has the faint marks on the fields and devices characteristic of the grade.(#9163)

## Low Mintage Near-Gem 1913-S Twenty

5884 **1913-S MS64 PCGS.** This low mintage Saint-Gaudens twenty has ebullient luster and original peach-gold toning. A crisply struck near-Gem with a lightly abraded reverse and a few faint obverse field grazes. Housed in a green label holder. PCGS has certified only 21 pieces finer (9/08).
*From The Calvin Collection.*(#9163)

## Lustrous Select Mint State 1914 Saint-Gaudens Twenty

5885 **1914 MS63 PCGS.** Gorgeous, deep orange-gold coloration adorns the bright, satiny surfaces of this Select Mint State example. The fields possess a matte-like, fine grain texture. A few minor abrasions are scattered about, as expected for the grade. A more elusive Saint-Gaudens issue in near-Gem and better condition, and the lowest mintage regular issue P-mint of the series. Housed in a green label PCGS holder.
*From The Calvin Collection.*(#9164)

## Original 1914 Twenty, MS63

5886 **1914 MS63 NGC.** The striking details are complete on each side, and there are minimal abrasions for the grade. The surfaces display the usually seen matte-like texture with an overlay of soft, frosted mint luster. Even reddish patina is seen over both obverse and reverse with occasional hints of lilac (visible only with a magnifier). (#9164)

## Vibrant Select 1914 Double Eagle

5887 **1914 MS63 PCGS.** Both sides offer strong luster, though the mustard-gold obverse exhibits a degree of satin. Pleasingly detailed save for trifling softness noted on Liberty's torch hand. Strong eye appeal for this double eagle issue, little-repatriated with an original mintage only in the five-figures.(#9164)

## Pleasing 1914 Near-Gem Double Eagle

5888 **1914 MS64 PCGS.** Rich peach-gold patination graces the highly lustrous surfaces of this near-Gem twenty dollar, and a well directed strike imparts crisp delineation to the devices. Lightly distributed marks preclude Gem classification. The 1914 becomes very elusive any finer.(#9164)

## Elusive 1914 Double Eagle, MS64

5889 **1914 MS64 PCGS.** This frosty example displays thick cartwheel luster and a powerful strike that is manifested in excellent definition on Liberty's face, fingers, and toes, and on the Capitol. An above-average near-Gem that is ideal for the budget-conscious collector, as Gem examples are much scarcer and surpass the five-figure mark when offered. A few small marks commensurate with the grade are noted over each side.(#9164)

## Gorgeous Gem 1914-D Double Eagle

5890 **1914-D MS65 PCGS.** An appealing Gem with vibrant luster and lovely champagne-gold and mint-green coloration. Boldly struck except for slight weakness on the fingers of Liberty's branch hand, with well preserved surfaces that are mostly free of marks. A small abrasion is noted on Liberty's nose, however.
*From The Calvin Collection.*(#9165)

## Amazing Gem 1914-D Saint-Gaudens Twenty

5891 **1914-D MS65 PCGS.** This gorgeous honey-gold Gem provides dazzling luster, and has exceptional eye appeal, even for a Gem. The strike is meticulous aside from minor softness on the sun. Although the Denver Mint had struck double eagles every year (except 1912) since its 1906 opening, further production of the denomination did not occur until 1923.(#9165)

5892 **1914-S MS65 NGC.** Impressively detailed in the centers, though the letters of LIBERTY are curiously flat. Carefully preserved with sparkling luster and a striking orange-peel effect in the fields.
*From The Calvin Collection.*(#9166)

## Worthy 1914-S Twenty Dollar MS66

5893 **1914-S MS66 NGC.** This formidably lustrous Saint-Gaudens double eagle has an exceptional strike, particularly on the Capitol building and Liberty's face. Well preserved despite a minor reverse mark near 8 o'clock. The 1914-S is the final issue until 1922 with a mintage above 1 million pieces, presumably due to the impact of World War I on international commerce.
*From The James Mossman Collection.*(#9166)

## Vibrant, Subtly Colored MS66 1914-S Twenty

5894 **1914-S MS66 NGC.** A bold striking with attractive, matte-textured surfaces that are enhanced by a thin veil of reddish-gold and lilac patina. Excellent luster characteristics also distinguish this high-end piece with just a few insignificant abrasions on the reverse. A scarce coin in this outstanding grade.(#9166)

5895 **1915 MS62 NGC.** A well struck example of this underrated Philadelphia issue with satiny sun-gold surfaces. Strongly appealing with surprisingly few overt flaws for the grade.
*From The Calvin Collection.*(#9167)

## Premium Gem 1915-S Saint-Gaudens Twenty

5896 **1915-S MS66 PCGS.** While a common coin in lower grades, the '15-S is very elusive in this lofty condition. While the usual matte-like surfaces are still present, just about everything else on this coin is atypical. The mint luster is thick and frosted, giving the coin a glowing, granular texture that is very appealing. Rich reddish tinged patina has accrued to each side, and the striking details are fully brought up in all areas. And as one could reasonably infer, each side is refreshingly free from the abrasions that usually plague this issue. Population: 172 in 66, 0 finer (12/08).(#9168)

### Lustrous Gem 1916-S Double Eagle

5897 **1916-S MS65 NGC.** The final double eagle coined during the decade, the 1916 was only struck at the San Francisco Mint. The mintage was just 796,000 coins, and until about 25 years ago, the date was considered a rarity. In 1983 a hoard of about 4,000 pieces turned up in South America, and today the date is considered common. This one has rich orange-gold luster and exceptional eye appeal.(#9169)

### Amazing 1916-S Double Eagle, MS66

5898 **1916-S MS66 PCGS.** The surfaces of this gorgeous Premium Gem exude a warm honey-gold glow with unbroken satiny luster beaming from each side. A few scattered abrasions are apparent, but none are out of context with the MS66 grade. While common in lower Mint State grades, the 1916-S is rare this fine and is virtually unobtainable any finer. PCGS has never certified an MS67 example of this date. (#9169)

### Seldom Seen 1920 Twenty, MS64

5899 **1920 MS64 PCGS.** The Philadelphia Mint's delivery of 228,250 double eagles in 1920 is somewhat on the low side for the series. Although limited, this mintage figure does not even begin to portray the conditionally rare status of this issue. NGC and PCGS combined report just eight coins in MS65 or finer (12/08). An obviously important, and conditionally scarce near-Gem, the present example is earmarked for inclusion in the finest specialized collection. Peach-gold in color, the surfaces exhibit sharp striking definition. There are very few abrasions for a gold coin of this size, and the luster is well frosted.(#9170)

### Vibrant MS64 1920 Double Eagle

5900 **1920 MS64 PCGS. CAC.** Generally pale wheat-gold with occasional glimmers of deeper yellow and apricot. The strike is pleasing, and if not for an abrasion at Liberty's waist, an even finer grade would be within reach. Essentially unavailable any finer, with only one such coin certified by PCGS (11/08).(#9170)

### Delightful Gem 1922 Twenty

5901 **1922 MS65 PCGS.** The 1922 double eagle begins a string of the available P-mint Saint-Gaudens twenties, a run that is well produced and among the major glories of the series to modern-day collectors. This delightful Gem offers khaki-gold surfaces with brilliant luster and a near-complete absence of singular abrasions.(#9173)

### Desirable MS62 1922-S Double Eagle

5902 **1922-S MS62 PCGS.** A seldom-encountered issue despite a substantial mintage of over 2.6 million pieces and relatively high certified populations. The present example is yellow-gold with touches of alloy visible near the margins. Wispy abrasions on the well-defined devices account for the grade.(#9174)

## Challenging MS62 1922-S Twenty

5903 **1922-S MS62 PCGS.** Portions of the 1922 Philadelphia issue were dispatched to foreign bank holdings and escaped the 1933 gold recall. The 1922-S was less fortunate, and perhaps 99% of the mintage was eventually melted to line the walls of Fort Knox with gold bricks. This 1922-S has lovely olive-gold toning and the expected number of distributed small obverse marks. The reverse is beautiful. Encapsulated in a green label holder.(#9174)

## Lustrous Near-Gem 1922-S Double Eagle

5904 **1922-S MS64 NGC.** Bold peripheral die cracks are noted on each side of this lustrous near-Gem twenty. The design details are boldly reproduced, while a partial wire rim is evident along the lower reverse and upper obverse peripheries. The warm orange-gold coloration is imbued with strong accents of lime-green. A few minor marks limit the grade. NGC has only graded 14 finer examples, as of (11/08). *From The Calvin Collection.*(#9174)

## Captivating Choice 1922-S Twenty

5905 **1922-S MS64 PCGS.** Though it was not melted quite to the extent as certain later dates, the 1922-S double eagle suffered considerable adversity, and a general lack of certified survivors above the MS64 level bears this out; PCGS has graded only 12 such coins (12/08). This near-Gem is enchantingly lustrous with rich sunset-orange color that deepens at the margins. Well struck and desirable. (#9174)

## Near-Gem 1922-S Double Eagle

5906 **1922-S MS64 PCGS.** An issue seldom seen in Gem and finer grades, and one sure to bring top money on the rare occasions when such a piece does surface at auction. This near-Gem offers deep orange-gold coloration with good original skin, lots of luster and a few minor, out-of-the-way contact marks consistent with the grade. PCGS has certified only a dozen coins finer (12/08).(#9174)

## Glorious Superb Gem 1923-D Twenty

5907 **1923-D MS67 PCGS.** A majority of the branch mint issues from the 1920s have a higher mintage than the 1923-D. However, only the 1923-D is readily obtained in Mint State. Presumably, a number of sealed bags found their way to European vaults prior to Roosevelt's gold recall. But those bag-stored coins are generally abraded. Examples with immaculate fields are rare. The present piece is pristine aside from a solitary minor mark atop the front wing. A lustrous khaki-gold Superb Gem, encapsulated in an old green label holder. Population: 59 in 67, 0 finer (11/08).(#9176)

## Sharply Defined 1924 Double Eagle, MS67

5908 **1924 MS67 NGC.** Attractive luster issues from both sides of this Superb Gem, each of which shows lovely honey-gold patina. An attentive strike leaves strong definition on the design elements, including Liberty's fingers and toes and the eagle's plumage. Impeccably preserved throughout. Readily available through Premium Gem, but very difficult to locate any finer.(#9177)

## Lovely MS62 1924-D Twenty

5909 **1924-D MS62 NGC.** This unworn example is well struck with strong, almost brassy luster. The yellow-gold surfaces show the usual assortment of light, scattered marks, as well as a significant abrasion just below Liberty's branch. Still, a readily collectible example of this heavily melted Denver issue.(#9178)

## Scarce 1924-D Saint-Gaudens Double Eagle, MS63

5910 **1924-D MS63 NGC.** Beautiful rose-gold toning adorns both sides of this intensely lustrous Select Mint State double eagle from the Denver Mint. Most of the design elements are well produced, except for minor softness on Liberty's torch hand, and a touch of die polish on her left (facing) leg. A shallow scrape on the upper right obverse field, below TY, limits the grade. A scarce issue at this grade level or finer.
*From The Calvin Collection.*(#9178)

## Lustrous MS63 1924-D Twenty

5911 **1924-D MS63 PCGS.** This piece shows pretty orange-gold coloration with some complements of hazel near the rim and in the recesses. While there is good luster in abundance, there is some strike softness seen near the margins, for example on the last digit, 4, in the date, and elsewhere around the rims—a typical occurrence for the issue.(#9178)

## Desirable MS62 1925-D Twenty

5912 **1925-D MS62 NGC.** Pleasing luster and strike for this heavily melted issue of nearly 3 million pieces. Though the fields and devices show a number of fine abrasions that preclude Select status, the overall eye appeal is strong for a Denver double eagle of the era. An interesting candidate for the date collector.(#9181)

## Impressive Select 1925-D Twenty

5913 **1925-D MS63 PCGS.** While over 2.9 million double eagles were struck at the Denver Mint in 1925, as with many nearby mintmarked twenty dollar issues, this figure is irrelevant to its availability today; to quote Garrett and Guth, "the vast quantity of these coins ended up in the melting pot during the late 1930s, and the seemingly large mintage was virtually eliminated." This Select piece is an excellent mid-range example by the standards of this heavily repatriated issue's abbreviated grading scale. Warmly lustrous peach-gold and sun-yellow surfaces show only small, wispy abrasions.(#9181)

### Lustrous 1925-S Twenty, MS60 Details

5914 **1925-S—Damaged—ICG. MS60 Details.** The 1925-S is a rarely encountered mintmarked issue from this difficult decade. If one factors out the damage, the surfaces are actually much finer than the details grade. The mint luster is frosted and bright and the definition on the devices is almost fully brought up. But there are several small digs on the obverse that appear to be intentional damage, netting an otherwise very pleasing coin down to an MS60 Details grade. (#9182)

### Splendid 1926 Twenty Dollar, MS66

5915 **1926 MS66 NGC.** The 1926 is another in the late-series run of well-produced P-mint issues that make this series in high Mint State grades so much more collectible for type purposes. The present example offers splendid, pristine yellow—gold surfaces that reveal almost no distractions, even under a loupe.(#9183)

### Well Impressed 1926-S Double Eagle, MS62

5916 **1926-S MS62 PCGS.** The large mintage in excess of 2 million pieces of 1926-S double eagle's was nearly obliterated in the melting pot. This MS62 survivor has peach-gold surfaces imbued with traces of light tan, along with sharply impressed design elements. Some minute surfaces and rim marks limit the grade.(#9185)

### Select Mint State 1926-S Twenty

5917 **1926-S MS63 NGC.** The mintage of the 1926-S is more than double that of the 1926 Philadelphia, but the latter is far more often encountered. This is because most 1926-S twenties were melted by the Treasury during the 1930s. Approximate 1,000 pieces survived, many undoubtedly held by foreign banks as mere bullion for several decades. Lustrous and nicely struck with smooth fields and an interesting series of die cracks on the reverse.(#9185)

### Smooth MS63 1926-S Twenty

5918 **1926-S MS63 NGC.** This issue's mintage of just over 2 million pieces is rendered essentially irrelevant by the mass meltings of the Roosevelt Administration. Series aficionados know of its scarcity, particularly in attractive Select and better grades. This luminous and well-defined example is largely butter-yellow with glimmers of rose near the margins.(#9185)

### Remarkable Near-Gem 1926-S Saint-Gaudens Twenty

5919 **1926-S MS64 PCGS.** This is a remarkably appealing near-Gem example of the '26-S Saint-Gaudens double eagle, a scarcer issue with relatively few survivors from the substantial original production of more than two million coins. Rich orange-gold coloration is illuminated by shimmering luster, and there are few surface blemishes on either side. Some minor disturbances along the rim are probably mint-made. Rare any finer.
*From The Calvin Collection.*(#9185)

## Dazzling Near-Gem 1926-S Double Eagle

5920 **1926-S MS64 PCGS.** This mintmarked issue is available for a price up to MS64, but Gem and finer examples are few and far between, and pricey when encountered. This piece displays lovely orange-gold coloration over well-struck surfaces. A contact mark near the left obverse rim and a few other minor abrasions explain the grade, but the eye appeal is dazzling.(#9185)

## Elusive 1926-S Twenty, MS64

5921 **1926-S MS64 NGC.** Choice with faint, scattered marks in the straw-gold fields and a few pinpoint flaws on the devices. The surfaces offer uncommonly vibrant luster and just a trace of haze at the margins. Despite a substantial mintage of over 2 million pieces, this heavily melted issue remains elusive in the numismatic marketplace, particularly in higher grades; NGC has certified only 23 pieces as Gem or better (12/08).(#9185)

5922 **1927 MS66 PCGS.** A popular date among high-grade type collectors as it is both one of the most common Saint-Gaudens issues and a date noted for its high production standards. This boldly impressed yellow-orange Premium Gem offers silky luster and amazing eye appeal. PCGS has graded 12 finer examples (8/08). *From The Calvin Collection.*(#9186)

5923 **1927 MS66 PCGS.** Unblemished fields, precisely struck devices, and original peach-gold toning proclaim the quality of this thoroughly lustrous Premium Gem. Encapsulated in an old green label holder.(#9186)

5924 **1928 MS65 NGC.** Boldly impressed with flashy yellow-gold surfaces. This carefully preserved Gem would make an excellent addition to a similarly graded date or type set. *From The Calvin Collection.*(#9189)

## High Quality 1928 Twenty, MS66

5925 **1928 MS66 PCGS.** The last readily available issue within this widely collected series, the 1928 is common in bagmarked to middle grade Mint State. However, Premium Gems are scarce and are under strong demand from type set collectors and accumulators. A lustrous and lovely example with medium apricot patina and appropriately unabraded fields.(#9189)

5926 **1928 MS66 PCGS. CAC.** Peach-gold with traces of straw and orange. The devices display excellent definition, and the fields have outstanding luster. This exceptionally preserved gold type coin is a Premium Gem in every regard.(#9189)

## Seldom Seen Superb Gem 1928 Saint-Gaudens Twenty

5927 **1928 MS67 NGC.** More than 8.8 million 1928 double eagles were struck, and it comes as no surprise that there are enough to go around in typical Mint State grades. But any Motto Saint-Gaudens issue is conditionally rare at the lofty MS67 level. The production was struck for circulation, and the large diameter, heavy weight, soft gold alloy, and indifferent shipment and storage all combined to make even the '28 nearly impossible to find nearly perfect. But this is a splendid piece with coruscating luster, a sharp strike, and impressively smooth surfaces. Neither NGC nor PCGS have managed to corral a higher graded example (12/08).(#9189)

### AU Details A. Bechtler Gold Dollar K-24, 27 G., 21 C.

5928 **(1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge—Damaged, Bent—ANACS. AU Details, Net XF40.** K-24, R.3. A crease between the LE in BECHTLER and the D in DOL confirms this pioneer gold dollar was once folded in half. A small dig to the right of the prominent 1 appears to be the 'damage' noted on the ANACS insert. Substantial luster exists on the yellow-gold, orange, and russet surfaces. An affordable entry into the Bechtler gold series. (#10040)

### A. Bechtler Gold Dollar, 27G. 21C. Plain Edge, K-24, AU50

5929 **(1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge AU50 PCGS.** K-24, R.3. The A. Bechtler 27G. 21C. gold dollar is by far the most available of the various Bechtler issues, although it is also in great demand as a "type" coin for the Bechtler family. This piece shows considerable luster remaining over yellow-gold surfaces with some reddish-gold patina near the rims, and the planchet shows some bulging. Certified in a green-label holder, and listed on page 359 of the 2009 *Guide Book*.(#10040)

### AU Details A. Bechtler Gold Dollar 27 G, 21 C, Plain Edge, K-24

5930 **(1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge—Graffiti, Bent—NCS. AU Details.** K-24, R.3. Faint pinscratches surround the field near 27 G., in the form of illegible cursive letters. Lightly bent (a common fate for this variety) with uneven wear on CAROLINA. Substantial letter hugs the legends. A familiar Bechtler gold variety. Listed on page 359 of the 2009 *Guide Book*.(#10040)

### A. Bechtler Dollar, 27G. 21C., K-24, AU58

5931 **(1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge AU58 NGC.** K-24, R.3. This charming piece of early American numismatic history appears quite close to its presumed state when issued, as there is some prooflikeness noted around the peripheral legends on both sides, and there are few abrasions of any significance—in short, this is an example that is quite close to Mint State. Some light buildup in a few of the letters is the only minor distraction. Listed on page 359 of the 2009 *Guide Book*.(#10040)

### Uncirculated A. Bechtler Gold Dollar Plain Edge, 27 G., 21 C., K-24

5932 **(1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge MS61 NGC.** K-24, R.3. An impressive Bechtler private gold coin that possesses substantial bright luster and only the occasional minor field mark. Much nicer than usually seen for this more available variety. The dies are widely rotated. Listed on page 359 of the 2009 *Guide Book*. Census: 48 in 61, 39 finer (11/08).
*From The Martin L. Diffenbaucher, Jr. Collection*.(#10040)

### AU Details A. Bechtler Five Dollar 134 G, 21 Carats, K-27

5933 **(1842-52) A. Bechtler Five Dollar, 134G. 21C.—Repaired, Improperly Cleaned—NCS. AU Details.** K-27, Low R.5. The NCS insert incorrectly refers to the piece as a C. Bechtler variety. The pale gold surfaces show substantial luster, particularly within CAROLINA GOLD. Nonetheless subdued slightly by a cleaning, and a mostly retained lamination affects 134 G. Subtle repairs are noted on the rim near the RO in CAROLINA and to the right of 21. Listed on page 359 of the 2009 *Guide Book*.
*From The Omaha Collection*.(#10046)

## Scarce Bechtler Gold Dollar (1837-42) N Reversed, AU55

5934 **(1837-42) C. Bechtler Dollar, N Reversed AU55 NGC. CAC.** K-4, R.4. Produced by Christian Gobrecht, at his private mint in Rutherfordton, North Carolina. This attractive specimen displays iridescent crimson and orange toning over the reflective gold surfaces. The blundered N shows plainly, and all A's are actually inverted V's. Only 16 coins have been certified finer at NGC and PCGS combined (12/08).(#10055)

## C. Bechtler Dollar, 28G. Centered, Normal N, K-3, MS61

5935 **(1834-37) C. Bechtler Dollar, 28G. Centered MS61 NGC.** Normal N, K-3, R.6. The Normal N variety, K-3, is far more elusive than the Reversed N variety, K-4, which we currently rank as R.4. This Normal N, 28G. Centered piece shows considerable prooflike luster over the greenish-gold surfaces. A toned-over scrape in the planchet beneath CAR is likely as made, and elsewhere only a few light, wispy marks appear under a loupe. A rare and high-grade example of this elusive variety, and a piece that is unlikely to offer much improvement opportunity in the foreseeable future. Listed on page 357 of the 2009 *Guide Book*.(#10058)

## C. Bechtler Quarter Eagle, K-12, High R.6, AU50

5936 **(1837-42) C. Bechtler Quarter Eagle, Even 22 AU50 PCGS.** K-12, High R.6. This is one of the 64 G varieties, here with the 22 even, and the A's in GEORGIA and CARATS are actually inverted V's, lacking crossbars. This piece has the typical greenish-gold tint often seen on the issue, with most of the luster remaining. A few moderate contact marks on each side are neither surprising nor distracting. Listed on page 358 of the 2009 *Guide Book*. Population: 1 in 50, 4 finer (12/08).(#10076)

## Scarce AU C. Bechtler Five Dollar

5937 **(1837-42) C. Bechtler Five Dollar, 134G, With Star AU50 NGC.** K-20, R.4. This Carolina gold coin has a wealth of detail, and the khaki-gold surfaces have only a few subdued and inconspicuous marks. Bechtler five dollar pieces are rarer than their gold dollar counterparts, and the present piece would be an impressive representative of the early private gold coiner. Listed on page 359 of the 2009 *Guide Book*. Census: 6 in 50, 54 finer (11/08).
*From The Martin L. Diffenbaucher, Jr. Collection*.(#10097)

## 1860 Clark, Gruber Two and a Half Uncirculated Details, Kagin-1

5938 **1860 Clark, Gruber & Co. Quarter Eagle—Rim Filed—NCS. Unc. Details.** K-1, R.4. The obverse rim is filed near 2 o'clock, and the reverse rim is repaired and filed between 4:30 and 6 o'clock. This territorial gold piece has a band of bright luster across both borders. Slightly soft at the centers, since the portrait relief is pronounced. Listed on page 375 of the 2009 *Guide Book*.(#10135)

## AU Sharpness 1860 Clark, Gruber Five

5939 **1860 Clark, Gruber & Co. Five Dollar—Obverse Scratched, Improperly Cleaned—NCS. AU Details.** K-2, R.4. A scratch is noted between stars 1 and 2, and the cheek is abraded. A portion of the lower right obverse field is overly bright, but the rich orange and lime-green toning appears original. Listed on page 375 of the 2009 *Guide Book*.(#10136)

## 1860 Clark, Gruber & Co. Five
## Uncirculated Details, Kagin-2

5940 **1860 Clark, Gruber & Co. Five Dollar—Reverse Scratched, Improperly Cleaned—NCS. Unc. Details.** K-2, R.4. Fine pinscratches are noted near the upper arrow, the eagle's shield, and the field above the left (facing) wing. Obverse hairlines appear localized to the date area. Attractively toned olive-gold. Later dies than usual with a complicated network of slender peripheral obverse die cracks. Listed on page 375 of the 2009 *Guide Book*.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#10136)

## AU Details 1860 Clark, Gruber Ten, K-3

5941 **1860 Clark, Gruber & Co. Ten Dollar—Obverse Rim Filed, Improperly Cleaned—NCS. AU Details.** K-3, R.5. Partly lustrous, but the green-gold surfaces are slightly bright, and the obverse border between 12 and 3 o'clock is hairlined with the nearby rim faintly filed. From late dies with a bold arc-shaped die crack on the lower right obverse. Listed on page 375 of the 2009 *Guide Book*. (#10137)

## Uncirculated Sharpness K-3
## 1860 Clark, Gruber Ten Dollar

5942 **1860 Clark, Gruber & Co. Ten Dollar—Obverse Scratched, Improperly Cleaned—NCS. Unc. Details.** K-3, R.5. The popular and distinctive type with a volcano-shaped rendition of Pikes Peak. The dies were engraved in the East Coast by an artist unaware of the actual appearance of the famous mountain. This example has a cluster of faint pinscratches on the upper left obverse field, presumably a long-ago test to see if the piece was gold plated. The orange-gold surfaces are lightly hairlined, but mint luster is extensive and the strike is exacting. Listed on page 375 of the 2009 *Guide Book*.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#10137)

## AU Sharpness K-5a
## 1861 Clark, Gruber Two and a Half

5943 **1861 Clark, Gruber & Co. Quarter Eagle—Obverse Scratched—NCS. AU Details.** K-5a, R.4. Two straight pinscratches bookend star 12, and the reverse is scratched left of the denomination. These marks were likely made generations ago to determine whether the 'unfamiliar' piece was plated. Softly struck at the centers, but actual wear is slight, confirmed by the presence of luster across the peach-tinged borders. Listed on page 375 of the 2009 *Guide Book*. (#10139)

## Quaint Clark-Gruber K-6 Five, VG10

5944 **1861 Clark, Gruber & Co. Five Dollar VG10 NGC.** K-6, R.4. If only this coin could talk! A well circulated but nonetheless pleasing example of this popular territorial gold issue. The pleasing pale-olive surfaces show a few marks on Liberty's neck and one above the eagle's left (facing) wing—all perfectly acceptable at this stage of circulation. Listed on page 375 of the 2009 *Guide Book*. (#10140)

## Attractive K-6 Clark, Gruber & Co. Five, AU53

5945 **1861 Clark, Gruber & Co. Five Dollar AU53 NGC.** K-6, R.4. Clark, Gruber & Co. established their private mint to serve the mining communities in Colorado in the early 1860s. They sold their operation to the U.S. government to pave the way for the Denver Mint, but circumstances delayed the opening of that institution until 1906. The present coin has a soft strike, typical of this issue. Wear is confined to the high points of the design and abrasions are minimal.(#10140)

## Pleasing 1861 Clark, Gruber Five Dollar, K-6, AU55

5946 **1861 Clark, Gruber & Co. Five Dollar AU55 NGC.** K-6, R.4. About half of the original luster still clings to this lovely Choice AU piece. The surfaces are pretty, bright yellow-gold, with only a few light, grade-consistent abrasions. This piece was clearly snatched from circulation early, as a memento of the historic Colorado Gold Rush.

Clark, Gruber & Co. bought three lots for $600 in Denver City (present-day Denver) on which to build their mint, and a two-story brick Assay and Coinage Office was erected on the corner of McGaa and G streets (the present 16th and Market near downtown Denver). Today a way marker points out the spot, as part of a walking tour of Denver. The entire region in the 1860s was known as the "Pike's Peak District," leading to the legend on some of the Clark, Gruber pieces.

*From The Martin L. Diffenbaucher, Jr. Collection.*(#10140)

## Choice AU 1861 Clark, Gruber Five, K-6

5947 **1861 Clark, Gruber & Co. Five Dollar AU55 NGC.** K-6, R.4. Orange-gold borders frame the green-gold centers of this well defined pioneer gold five dollar piece. Liberty and the eagle imitate the Federal types and are charmingly engraved by the diemaker. A shallow strike-through near star 12, but impressively free from abrasions. Listed on page 375 of the 2009 *Guide Book.* (#10140)

## Interesting XF Details 1861 Clark, Gruber Ten, K-7

5948 **1861 Clark, Gruber & Co. Ten Dollar—Improperly Cleaned—NCS. XF Details.** K-7, R.4. Luminous orange-gold surfaces show a number of wispy hairlines from a past cleaning. Typical softness of strike at the outer parts of the devices, though the centers retain pleasing detail despite light wear. Overall, an interesting example of this readily collectible Territorial gold issue. Listed on page 376 of the 2009 *Guide Book.*(#10141)

## Well Respected Clark, Gruber & Co. Ten, XF45

5949 **1861 Clark, Gruber & Co. Ten Dollar XF45 NGC.** Clark, Gruber & Co. was widely respected for the fair value of their private gold coinage. The present coin exhibits moderate, even wear and no individually distracting abrasions. The strike was well executed, and much original detail remains. Attractive yellow-gold color enhances the surfaces.(#10141)

## Desirable AU55 Kagin-7
## 1861 Clark, Gruber Ten Dollar

5950 **1861 Clark, Gruber & Co. Ten Dollar AU55 NGC.** K-7, R.4. The remaining luster has a cherry-red tint on this lightly circulated private gold coin. A few small marks are present, but none distract. In 1861, Clark, Gruber abandoned the Pike's Peak obverse motif and instead imitated Federal types. Listed on page 376 of the 2009 *Guide Book.*
*From The Martin L. Diffenbaucher, Jr. Collection.*(#10141)

## 1861 Clark, Gruber Twenty Dollar Pattern, MS62
## Copper, Gilt

5951 **1861 Clark, Gruber & Co. Twenty Dollar MS62 NGC.** K-12c, R.6. Struck from the same dies used to coin the regular K-8 1861 twenty, but this is a die trial piece struck in copper then gilt at a later time. The gilt occurred after the piece received small marks near Liberty's profile. The surfaces are evenly granular, due to the method used to gilt the coin. It is interesting that so many off-metal Clark, Gruber & Co. examples have survived. Perhaps they were saved by the firm to compare against copy die counterfeits offered for redemption in specie.(#10142)

## Gilt Copper 1860 Clark, Gruber Twenty Dollar Die Trial, Unc Details

5952 **1860 Clark, Gruber Copper Die Trial—Improperly Cleaned—NCS. Unc Details.** Listed by NCS as K-4a, R.5, but in copper gilt; actual rarity in this state speculative. This trial from unused dies shows no trace of wear on the eagle or on the abstract mountain. Luminous peach-gold surfaces show dots of alloy and a number of hairlines from a past cleaning, as well as an unnatural aura overall. Still, a desirable example.(#10146)

## Rare K-10 1861 Clark, Gruber Five Dollar White Metal, Plain Edge Die Trial MS62

5953 **1861 Clark, Gruber White Metal Die Trial, Plain Edge MS62 NGC.** K-10, R.8. The firm of Clark, Gruber struck die trials in 1861 for the half eagle in white metal (plain edge), white metal (reeded edge), copper (plain edge), and copper (reeded edge). This particular piece is labeled as a K-10 which, per the Kagin reference, translates to a double thickness white metal striking with a plain edge. The present trial strike was obviously struck with no restraining collar, as the edge is slightly out-of-round and shows extra width, especially on the lower obverse. However, the piece appears to have normal thickness, instead of double thickness. The surfaces retain much of the original brightness of the white metal composition with an overlay of medium density gray patina. The fields near the chin and above the eagle are abraded. As of (12/08), the NGC population report has certified three examples of K-10, two as MS62 and a single MS63 example.(#10151)

## 1852 Humbert Ten Dollar, K-10, AU53

5954 **1852 Humbert Ten Dollar AU53 NGC.** K-10, Low R.4. There were three different reverse dies used for the 1852 Humbert ten dollars, and both dies, but the reverse in particular, are subject to crumbling. This piece shows such crumbling on both sides, although this piece shows little actual wear and retains some of its original prooflike luster. Listed on page 363 of the 2009 *Guide Book*. (#10187)

## XF Details 1852 Humbert Fifty 887 Thous, Kagin-11

5955 **1852 Humbert Fifty Dollar, 887 Thous.—Rim Filed—NCS. XF Details.** K-11, R.5. This yellow-gold octagonal slug has moderate wear on the eagle's body, yet glimpses of luster emerge from design crevices. Portions of the rims are faintly hairlined, and the reverse has an edge ding at 9:30. The surfaces are lightly cleaned and have moderate marks. The reverse has a small blimp-shaped depression at 11:30. Listed on page 364 of the 2009 *Guide Book*.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#10217)

## AU Sharpness 1852 Humbert Fifty, K-11

5956 **1852 Humbert Fifty Dollar, 887 Thous.—Repaired—NCS. AU Details.** K-11, R.5. The obverse fields have been smoothed in a couple of areas, and it appears that some rim bumps have been repaired as well, and the piece has been cleaned on the obverse, resulting in a overglossy appearance. The reverse is unimproved. Despite the obverse repairs much pleasing detail remains, hence the NCS Details grade, and this piece might provide a good venue for some collector to enter the fascinating world of U.S. Territorial gold. . Listed on page 364 of the 2009 *Guide Book*.(#10217)

## Choice AU 1852 Assay Office Ten, K-12a

5957 **1852 Assay Office Ten Dollar AU55 PCGS.** Kagin-12a, R.5. Strong reverse border beads. This is an attractive example with pale olive-gold accented by rich honey-gold toning. The eagle is splendidly detailed, and the partly lustrous surfaces lack obtrusive marks. Listed on page 363 of the 2009 *Guide Book*.
*Ex: Long Beach Signature (Heritage, 6/2005), lot 8269, which realized $7,475.*(#10001)

## 1852 Assay Office Fifty, K-13, VF25

5958 **1852 Assay Office Fifty Dollar, 887 Thous. VF25 NGC.** K-13, Low R.5. The only visible difference between the so-called K-13 U.S. Assay Office fifty dollar and the K-11 "Humbert" fifty, both .887 THOUS, is in the legend running around seven sides of the obverse periphery, with the former reading UNITED STATES ASSAY OFFICE OF GOLD SAN FRANCISCO CALIFORNIA while the latter reads AUGUSTUS HUMBERT UNITED STATES ASSAYER OF GOLD CALIFORNIA. On this piece the determination is difficult but not impossible due to wear and abrasions: A couple of letters of UNITED are discernible at 7 o'clock, and GOLD AN FRAN may be made out at the 1:30 and 3 o'clock areas (on the Humbert ASSAYER would replace GOLD at 1:30). While the obverse shows numerous abrasions, none of them is particularly severe, although we do note a rim bump at the 8 o'clock corner. The surfaces are golden-yellow, with good eye appeal for the midrange grade. Listed on page 364 of the 2009 *Guide Book*. (#10016)

## Pleasing AU50 1853 Assay Twenty, K-18

5959 **1853 Assay Office Twenty Dollar, 900 Thous. AU50 PCGS. CAC.** K-18, R.2. Struck by Curtis, Perry, and Ward—principals of the United States Assay Office of Gold. In the previous year Moffat & Company produced a very similar twenty dollar issue. This survivor retains ample luster and displays reddish hues, especially at the peripheries. A small rim bump is noted at the 9 o'clock reverse rim for the sake of full disclosure. Listed on page 365 of the 2009 *Guide Book*.(#10013)

## AU Details 1853 Assay Office Twenty 900 Thous., Kagin-18

5960 **1853 Assay Office Twenty Dollar, 900 Thous.—Damaged—NCS. AU Details.** K-18, R.2. The borders exhibit glimmers of orange-gold luster, and the surfaces are less abraded than usual for a lightly circulated Assay Office piece. A thin mark is noted near the right ribbon end, and the centers have blurry definition, as if thumbed at length by a past owner with a tight grip. Listed on page 365 of the 2009 *Guide Book*.
*From The Omaha Collection*.(#10013)

## Uncirculated Details 1854 Kellogg Twenty, K-1b

5961 **1854 Kellogg & Co. Twenty Dollar—Repaired, Rim Filed, Improperly Cleaned—NCS. Unc. Details.** K-1b, R.5. Short Arrows. This orange-tinted example is bright from a cleaning, and the lower right obverse field has been smoothed. The rim is intermittently filed, most noticeably on the obverse between 9 and 11 o'clock. There is a dull diagonal scratch above the eagle's head. Despite these impairments, the present piece has full design detail, unlike the circulated pieces that comprise most survivors. Listed on page 372 of the 2009 *Guide Book*.
*From The Martin L. Diffenbaucher, Jr. Collection*.(#10222)

## Interesting 1855 Kellogg Twenty, VF30

5962 **1855 Kellogg & Co. Twenty Dollar, VF30 PCGS.** K-3b, R.5. Kellogg & Co. played an important role in the California economy during the 1850s. The firm filled the gap between the closing of the United States Assay Office and the opening of the San Francisco Mint, coining enough twenty dollar gold coins to meet the needs of the burgeoning local economy. The present example has moderate wear, primarily on the obverse, with no individually distracting abrasions. Much satiny mint luster remains on the attractive surfaces. (#10225)

## K-3b 1855 Kellogg Twenty, AU Details

5963 **1855 Kellogg & Co. Twenty Dollar—Improperly Cleaned—NCS. AU Details.** K-3b, R.5. Short Arrows, Thin Reverse Letters. Mildly bright and glossy from a cleaning, but the major devices are splendidly detailed and exhibit ample glistening luster. Moderately abraded, and the reverse field near the shield has tiny pinscratched entries "173" and "J." Listed on page 372 of the 2009 *Guide Book*. *From The Martin L. Diffenbaucher, Jr. Collection.*(#10225)

## Fine 1849 Moffat & Co. Five Dollar, K-4

5964 **1849 Moffat & Co. Five Dollar Fine 12 NGC.** K-4, R.5. Liberty's hair and cheek are worn, but the eagle has a sharper appearance. A soft strike undoubtedly contributed to the high point weakness on Liberty. Neither side has any noticeable marks. Clashed near GOLD. Listed on page 361 of the 2009 *Guide Book*.(#10240)

## AU Details K-4 1849 Moffat & Co. Five

5965 **1849 Moffat & Co. Five Dollar—Obverse Scratched—NCS. AU Details.** K-4, R.5. The upper left obverse field has a subtle cluster of pinscratches, and the cheek has a pair of bright pinscratches. The right obverse field has a bright area from buffing, and the letter D is lightly pinscratched into the right field beneath the right (facing) wing. Substantial luster remains on this canary-yellow private gold coin from the heady days of the California Gold Rush. Listed on page 361 of the 2009 *Guide Book*. *From The Martin L. Diffenbaucher, Jr. Collection.*(#10240)

## 1852 Moffat Ten Dollar, K-8, Fine 12

5966 **1852 Moffat & Co. Ten Dollar Fine 12 PCGS.** Narrow date, K-8, R.6. Moffat & Co. was among the early coiners of California private gold issues, and they are known to have made more than 8,000 examples of this five dollar issue early in 1852 in response to a plea from local businessmen. This piece is the Narrow Date variant, although both subtypes appear about equally rare. The surfaces are brownish gold, with grade-consistent wear more extensive on the obverse than on the reverse. Certified in a green-label holder, and listed on page 361 of the 2009 *Guide Book*. (#10252)

## Extremely Rare XF Details Moran & Clark Ten Dollar Pattern Gilt Copper, K-1

5967 **(1849) Moran & Clark Ten Dollar, Gilt Copper—Environmental Damage—NCS. XF Details.** K-1, High R.7. Listed on page 348 of the 1981 Kagin reference, which depicts an off-center example. The present piece is well centered, but the obverse has several pinscratches, probably from an attempt long ago to determine whether the piece was gold or merely plated. Both sides are granular, perhaps from exposure to soil, but the olive-green and straw-gold surfaces still display some luster.

## Rare K-2 1849 Mormon Five, VF Details

5968 **1849 Mormon Five Dollar—Improperly Cleaned—NCS. VF Details.** K-2, R.5. This green-gold territorial five dollar piece is slightly glossy and bright from a wipe, and both sides display faint hairlines. The reverse (date side) has a small rim nick at 2 o'clock. All design details are clear save for a combination of striking weakness and wear and the clasped hands. Listed on page 374 of the 2009 *Guide Book*.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#10262)

## Lustrous XF45 Norris, Gregg, & Norris Five, K-4

5969 **1849 Norris, Gregg, & Norris Five Dollar, Reeded Edge, XF45 NGC.** Period, K-4, R.4. The company of Norris, Gregg, & Norris is, according to Don Kagin, assumedly "the first to issue California private gold coins sometime in May, 1849." The Norris, Gregg, & Norris five dollar coins are fairly available, although Kagin rates the Reeded Edge, No Period K-3 "variety" as R.6, while we believe it is merely a later die state, one that could be caused by a number of sources.

This example shows the period after ALLOY, more faintly than the nearby dot between ALLOY and GOLD and lending further credence to a theory such as die filling or lapping. The surfaces still retain considerable luster and have a greenish-gold tinge. Listed on page 360 of the 2009 *Guide Book*.(#10282)

## AU Sharpness Large Head, Wide Date 1852 Wass Molitor Ten, K-4

5970 **1852 Wass Molitor Ten Dollar, Large Head, Wide Date—Repaired, Improperly Cleaned—NCS. AU Details.** K-4, R.5. The obverse field and Liberty's face and neck are tooled with myriad fine pinscratches, and a repair is evident on the field beneath the hairbun. The reverse retains its original skin. Well struck for a private gold coin, and ample luster persists within the devices. Listed on page 370 of the 2009 *Guide Book*.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#10348)

## XF Sharpness 1855 Wass Molitor Fifty, K-9

5971 **1855 Wass Molitor Fifty Dollar—Genuine, Repaired—NCS. XF Details.** K-9, R.5. NCS has certified the piece as "Genuine—Repaired," and we have in-house graded it as XF Details. The fields on both sides have been extensively smoothed, reworked, and cleaned, lending the piece an overly glossy, glassy, golden appearance. Tooling marks are evident virtually throughout both sides.

By the time the Wass, Molitor Company produced these large round fifty dollar pieces, the crisis in the need for circulating gold coinage had eased, if not entirely ceased. The San Francisco Mint had opened the previous year, although its output would be sporadic for the first few years of its operations. Listed on page 371 of the 2009 *Guide Book*.(#10363)

5972 **1852-Dated Brass California Counter, AU55 NGC.** The obverse has a head of Liberty similar to the Liberty double eagles, wearing a crown inscribed LIBERTY. Around are 13 stars, with the date below. The reverse has an American flag waving in the wind on a flag pole, with CALIFORNIA above, and COUNTER below, flanked by three stars to the left and three to the right. Both sides have deep olive surfaces with light wear on the high points of the design.

## Very Rare Kagin-1 Nickel Alloy
## 1851 San Francisco Standard Mint Five Dollar

5973 **1851 San Francisco Standard Mint Five Dollar, Nickel Alloy—Genuine—NCS.** K-1, High R.7, page 352. In-house graded VG8 Edge Damage, apparent at 11 o'clock on the reverse. A green-gray example with extensive wear on the portrait and wreath, although the peripheral stars remain sharp. CARAT is misspelled as CARRAT, a gross engraving blunder unmentioned in the Kagin reference.

## Elusive Kagin-1a Gilt Copper
## 1851 San Francisco State of California
## Two and a Half Dollars MS62

5974 **1851 San Francisco State of California 2 1/2 Dollars, Gilt Copper MS62 NGC.** K-1a, Low R.7, page 353. 1.5 gm. The types imitate the Type One Federal gold dollar. Intricately struck and lustrous with no visible marks. The plating is canary-gold with glimpses of lime-green and rose-red. The San Francisco State of California series was, per Kagin, "apparently made for speculation in San Francisco by a company from Birmingham, England."

## Rare Kagin-3b Gilt
## 1851 San Francisco State of California
## Ten Dollar, AU Details

5975 **1851 San Francisco State of California $10, Gilt White Metal—Damaged—NCS. AU Details.** K-3b, Low R.7, page 354. 5.8 gm. The gold gilt is mostly intact although both sides display deep gray from the underlying white metal. There is little if any wear, which would be visible on the hair above the ear. A relatively minor mark on the coronet and a few tiny rim nicks on each side constitute the "damage."

5976 **1850-Dated California Gold Mines Token—Corroded—NCS. Good Details.** K-1, Low R.7, page 373. 21 gm. Donald Kagin, in his *Private Gold Coins and Patterns of the United States*, indicates that this copper token was probably engraved by William Lemme of San Francisco, and that all known pieces are gold plated. The obverse design elements are clearly outlined, but the reverse eagle displays only the right (left facing) wing, the date, and the letters MINES CA. Each side reveals a few corrosion spots, the most notable located in the upper left obverse quadrant.

5977 **"1849" California Game Counter MS62 NGC.** Kagin-1, page 374. F-CAL-2. 3.6 gm, reeded edge. Struck in brass, this game counter is the approximate size of a half eagle and bears an imitation of the Liberty five dollar obverse. The reverse depicts a miner pondering a nugget (or the skull of Yorick). A high grade example of this usually well-handled variety. Lustrous and brassy yellow-gold with gray toning on the devices. Listed in the Kagin territorial reference on page 374, where it suggests these pieces were made in England and shipped to the United States.

5978 **"1847" Brass California Counter XF45 NGC.** This example appears to share the same reverse die as Kagin-4, from page 375 of his 1981 classic territorial gold reference. The obverse imitates the 1847 Liberty ten dollar gold piece. The present brass example could have been used in poker games generations ago. It has faded olive-gold toning with obverse peripheral granularity and a few reverse field marks.

## Extremely Rare BG-201 Round Liberty Quarter, MS63

5979 **Undated Liberty Round 25 Cents, BG-201, High R.7, MS63 PCGS.** This is a part of a series of 1852-3 Narrow Head quarters. Generally attributed to Joseph Brothers, but there is no clear indication that these were made by that company or Frontier, Deviercy & Co. Either the BG-201 or 202 were referred to in the *Sacramento Daily Union* on April 29, 1853 as having 'lately' appeared in circulation. The BG reference notes that this variety was discovered by Kenneth W. Lee before 1970. The obverse stars are from a punch with one broken point, and many of the stars are double punched. BG lists six coins, ranging from MS63 to a plugged (and presumably circulated) piece. Of those pieces listed, this is most likely the # 2 piece, only identified as "Another coin certified by PCGS as MS-63." The surfaces are bright yellow-gold with semiprooflikeness on the obverse only. Identifiable by a minute irregular planchet flake out of the obverse near the rim at 4 o'clock. The Jay Roe specimen graded MS62 and brought $9775 in Bowers' 2003 sale of his collection.(#10386)

5980 **1856 Liberty Round 50 Cents, BG-434, Low R.4, MS62 NGC.** The sole 1856 round half dollar Breen-Gillio variety. Well struck except for the base of the wreath, and the straw-gold surfaces appear unblemished albeit mildly subdued. Census: 6 in 62, 0 finer (11/08). (#10470)

## Famous Arms of California 1853 Round Half, MS62, BG-435

5981 **1853 Arms of California 50 Cents, BG-435, Low R.5, MS62 PCGS.** Among the most famous varieties within the entire California small denomination gold series. The obverse displays the California state arms, and the reverse imitates the eagle, ribbon, and shield motif used on the Assay Office slugs then in local circulation. Such interesting types would soon belong to the past, since the majority of the Breen-Gillio varieties feature a parade of Liberty, Indian, and wreath types vaguely reminiscent of the Federal gold dollar. This is a well struck and minimally abraded example that has slightly subdued luster. Population: 4 in 62, 29 finer (11/08). (#10471)

## R.6 1854 Liberty Round 50 Cent, BG-436, MS62

5982 **1854 Liberty Round 50 Cents, BG-436, R.6, MS62 PCGS.** A very rare piece by an unknown maker—Breen-Gillio theorize it was possibly Auguste DuBois. The rear of the head and neck has an unfinished appearance, and the eagle lacks a scroll on the reverse. This piece is midway between the two die states listed in Breen-Gillio. There is a "period" die dot after the date, but the "exclamation point" documented after DOL. is not fully formed, although a die crack passes nearby, from the eagle's beak up between the L and the period after. A lustrous amber-gold piece, certified in a green-label holder.(#10472)

## Striking Near-Mint 1854 Octagonal One Dollar Large Eagle, BG-504

5983 **1854 Large Eagle Octagonal 1 Dollar, BG-504, Low R.5, AU58 NGC.** This Period One octagonal dollar-size issue has designs inspired by the (much larger) Humbert fifties released into circulation a few years before. This briefly circulated example has warmly lustrous butter-yellow surfaces with occasional violet overtones. Census: 3 in 58, 0 finer (11/08).(#10481)

## Pleasing 1854 Liberty Octagonal Dollar MS64 ★, BG-508 Solitary Example With Star

5984 **1854 Liberty Octagonal 1 Dollar, BG-508, High R.4, MS64 ★ NGC.** Uniform brass-gold color adorns both sides of this near-Gem bearing the coveted Star designation. Partially prooflike fields highlight frosty design features. Well struck, except for softness on the date digits. Both sides are nicely preserved. Census: 1 in 64 ★, 0 finer (11/08). *From The Peter J. Adasek, M.D. Collection.*

## Interesting Gem 1871 Liberty Octagonal 25 Cents, BG-717

5985 **1871 Liberty Octagonal 25 Cents, BG-717, R.3, MS65 PCGS.** A wide date on the reverse is the most distinguishing feature of this variety, which features the Liberty-head-and-wreath motifs found on numerous other octagonal quarters. Strongly lustrous yellow-gold surfaces are carefully preserved with an undercurrent of orange. Population: 48 in 65, 21 finer (11/08).(#10544)

## Popular BG-722 1872 Octagonal Quarter, MS66

5986 **1872 Washington Octagonal 25 Cents, BG-722, Low R.4, MS66 PCGS.** The Washington Head design type is among the most popular across the various denominations of California fractional gold. This octagonal quarter, sharply struck with carefully preserved butter-yellow surfaces, exemplifies the design type. Population: 29 in 66, 2 finer (11/08).(#10549)

5987 **1870 Liberty Octagonal 25 Cents, BG-757, R.6, MS64 Prooflike NGC.** This elusive variety shows clear repunching on the AL in DOLLAR. The G (for Gray) initial is centered above the 7 in the date. A prominently mirrored Choice octagonal quarter with slight incompleteness of strike on the central reverse, due to metal flow into the high relief portrait. The sole example of BG-757 certified as Deep Mirror Prooflike by NGC (12/08).(#710584)

5988 **1873 Liberty Octagonal 25 Cents, BG-772, High R.6, MS63 Prooflike NGC.** This well mirrored representative is sharply struck aside from a couple of letters on the reverse legend. The central reverse has a few faint hairlines, mostly from the planchet prior to the strike. NGC has certified just two examples, the other grades MS61 (12/08).(#710599)

## Challenging BG-799 AA 1881 Gold Octagonal Quarter, MS61

5989 **1881 Indian Octagonal 25 Cents, BG-799 AA, R.7 MS61 PCGS.** An extremely rare octagonal quarter variety with huge headdressed portrait on the obverse, sizable enough that it crowds the stars. Luminous gold-orange surfaces show several significant abrasions, particularly on the face, but no trace of wear. Population: 2 in 61, 4 finer (11/08).(#10653)

## 1871 Liberty Round Quarter, BG-838, AU58

5990 **1871 Liberty Round 25 Cents, BG-838, R.2, AU58 PCGS.** The G is repunched and the date crowded between stars, with the three lowest curls joined. Breen-Gillio calls this "possibly the most plentiful of all Period Two varieties, reflecting a brief fad." Pretty orange-gold surfaces with most of the prooflike luster intact and a tad of copper color in the left obverse field.(#10699)

5991 **1875 Indian Round 25 Cents, BG-878, R.3, MS65 Deep Prooflike NGC.** BG-878, R.3. Die State II. An impressive specimen with deeply mirrored fields set against frosty devices. Of the 31 BG-878 twenty-five cent gold pieces documented in the NGC *Census report*, only four examples have been graded finer.(#710739)

5992 **1871 Liberty Octagonal 50 Cents, BG-924, R.3, MS64 Prooflike NGC.** Die State I. A magnificent, meticulously preserved fractional from the final year of Robert B. Gray & Co. The G beneath the bust was originally punched too low and was subsequently corrected. There are a number of raised die lines on Liberty, which Breen and Gillio describe as file marks. A few stars and several letters are weakly struck, as typically seen.(#710782)

5993 **1873 Liberty Round 50 Cents, BG-1012, High R.5, MS65 PCGS.** Both sides of the Gem are fully prooflike with lustrous devices, all beneath pale blue and iridescent toning on the green-gold surfaces.(#10841)

5994 **1872 Indian Round 50 Cents, BG-1049, R.4, MS66 Deep Prooflike NGC.** An absolutely stunning example of the popular Indian Head design among California fractional gold pieces. The fields are deeply mirrored, the devices are highly lustrous, and the contrast is amazing.(#710878)

## COMPLIMENTARY SUBSCRIPTION

## WALKING LIBERTY HALF DOLLARS

5995 **1916 MS65 PCGS.** Luminous reddish-orange and silver-gray surfaces are delightful and satiny with whispers of frost. Well struck and carefully preserved. PCGS has graded 73 finer pieces (8/08).
*From The Calvin Collection.*(#6566)

### Sharp 1916-D Gem Half Dollar

5996 **1916-D MS65 PCGS.** Russet and electric-blue toning concentrates at the margins of this radiantly lustrous Gem Walker, leaving the centers essentially untoned. A solid strike imparts strong definition to the design elements. A few inoffensive marks on each side might well preclude an even higher grade. Housed in a green-label holder.
*From The Calvin Collection.*(#6567)

### Conditionally Scarce Gem 1916-D Walking Liberty Half

5997 **1916-D MS65 PCGS.** While the 1916-D half dollar has a higher mintage than its Philadelphia cousin, it is somewhat more difficult to locate in the higher grades of Mint State. This Gem displays bright luster and is virtually color-free. The design elements are well brought up, and just a few minor obverse marks preclude an even higher grade.(#6567)

### Choice Obverse Mintmark 1917-D Half

5998 **1917-D Obverse MS64 PCGS.** Gentle golden toning visits this sharply struck and lustrous near-Gem. A few faint obverse field grazes are all that stand in the way of an even higher grade. A low mintage variety, especially compared to the plentiful 1917 Philadelphia. Branch mint Walking Liberties bore obverse mintmarks only in 1916 and part of 1917.
*From The Calvin Collection.*(#6570)

5999 **1917-D Reverse MS63 NGC.** The 1917-D half dollar with the mintmark on the reverse is an underrated issue, according to Jeff Ambio. The present example is sharply struck, with much fine detail present on Liberty's head and gown. The surfaces display light lavender toning, and pleasing satiny luster.
*From The Findley Collection.*(#6571)

### Satiny 1917-D Reverse Half Dollar, MS64

6000 **1917-D Reverse MS64 PCGS.** The mintmark on Walking Liberty Half Dollars moved from the obverse to the reverse during 1917, creating obvious varieties for those pieces minted in Denver and San Francisco. Although the 1917-D with obverse mintmark is marginally tougher to find in low grades, the variety with the reverse mintmark is markedly scarcer in Mint State. This piece features soft golden-brown toning over satin luster, with a strong, although not quite full, strike. A few marks on the obverse appear to determine the grade.
*From The Calvin Collection.*(#6571)

## 1917-D Reverse Mintmark Walking Liberty Half, MS64

6001 **1917-D Reverse MS64 PCGS.** Dove-gray visits the obverse of this scarce early branch mint Walker. The reverse is lighter in hue despite glimpses of sun-gold and chestnut-brown. A minimally abraded and satiny near-Gem that has a sharp strike and compelling eye appeal. Scarcer in better grades than its obverse mintmark counterpart.(#6571)

## Toned 1917-D Half Dollar, MS64 Reverse Mintmark

6002 **1917-D Reverse MS64 NGC.** Jeff Ambio says the 1917-D Reverse Mintmark half dollar is the fourth rarest date in the Walking Liberty series in high grade. The present specimen has a decent strike,with much detail emerging on the central devices. The surfaces show satiny mint luster under lovely iridescent gold, lavender, and blue toning. Census: 96 in 64, 22 finer (12/08).(#6571)

## Scarce 1917-S Reverse Half Dollar, MS62

6003 **1917-S Reverse MS62 PCGS.** In spite of a mintage of more than 5.5 million pieces, the 1917-S Reverse is a scarce coin that appears to have mostly circulated with few examples set aside at the time of issue. This is a brilliant piece that is remarkably well struck. The surfaces have a frosted appearance but are somewhat subdued on this piece.(#6573)

## Desirable 1917-S Reverse Half Dollar, MS64

6004 **1917-S Reverse MS64 PCGS.** Light gold color envelops the surface of this Choice piece, with additional hints of rose noted on the obverse. Well, if not quite fully, struck, with visible surface chatter unusually for a coin of this assigned grade. Luster is full and attractive. Housed in an older green label holder.
*From The Calvin Collection.*(#6573)

## Frosty Gem 1918 Half Dollar

6005 **1918 MS65 NGC.** Although a bit of russet color is evident in the peripheries, the overall visual effect of this coin is of a white and highly lustrous beauty. The strike is strong, with a few inconsequential markings visible in the obverse fields. MS65 is the highest grade for which the 1918 half dollar is reasonably available (for a price); the date becomes scarce in MS66, and none have been certified higher.
*From The Calvin Collection.*(#6574)

## Sharp 1918-D Half Dollar, MS64

6006 **1918-D MS64 PCGS.** Soft luster emanates from both sides of this near-Gem D-mint representative, and a well directed strike brings out sharp definition on the design features. Whispers of violet and yellow-green color are slightly more noticeable on the reverse. Some light marks preclude Gem status. Housed in a green-label holder.
*From The Calvin Collection.*(#6575)

## Attractive 1918-D Half Dollar, MS64

6007 **1918-D MS64 PCGS.** The 1918-D half dollar is the third rarest date in the Walking Liberty series in high grade, according to Jeff Ambio. The present specimen is softly struck on Liberty's hand and the eagle's breast, as usually seen on this issue. Mint luster is full and attractive, and handling marks are minimal.(#6575)

## Delectable Near-Gem 1918-S Half Dollar

6008 **1918-S MS64 PCGS.** An exceptionally pleasing example of this early branch mint issue. Lustrous and uncommonly smooth with exemplary eye appeal. A good strike despite the unavoidable minor merging on the eagle's front leg feathers. Encased in a green label holder. Certain to elicit strong bids on the auction floor.
*From The Calvin Collection.*(#6576)

## Crisply Struck 1919 Half Dollar, MS64

6009 **1919 MS64 PCGS.** Intense luster radiates from both sides of this near-Gem, each of which shows whispers of tan-gold, joined by violet and apple-green on the reverse. A penetrating strike leaves crisp definition on the design features including the branch hand and the gown lines. A few minor marks define the grade. Housed in a green-label holder.(#6577)

## Flashy Gem 1919 Half Dollar

6010 **1919 MS65 NGC.** Although by no means the condition rarity that its D-Mint counterpart is, the 1919 half remains one of the better dates in the Walking Liberty series. This is a flashy, white coin with a high degree of luster and no trace of toning. A few marks can be seen on Liberty's leading leg, however, none distracts from the overall appeal of this piece. Housed in a prior generation NGC holder.
*From The Calvin Collection.*(#6577)

## Elusive MS63 1919-S Half Dollar

6011 **1919-S MS63 PCGS.** Satiny and untoned on the obverse, with brief amounts of amber-gold patina noted in the upper left reverse field. Faint die polish lines appear in the obverse and reverse fields. The striking detail is noticeably crisp on Liberty's head, but the branch hand is typically soft. Two or three small blemishes are noted on Liberty's legs, preventing a higher grade. The 1919-S is one of the premier rarities in the early Walking Liberty series.(#6579)

## Lovely 1920 Half Dollar, MS65

6012 **1920 MS65 NGC.** This lovely piece features subdued golden-brown color throughout over lustrous surfaces; in addition, sepia highlights the reverse for an interesting and beautiful visual effect. Although a few surface marks are visible, they are unobtrusive and sparse, even for this grade. Housed in an older NGC holder.
*From The Calvin Collection.*(#6580)

6013 **1920-S MS62 NGC.** A scarce, early S-mint Walker that is rated 10th rarest in the 65-piece series in Mint State grades. As always, this piece shows excellent mint luster—a prominent feature even on this MS62 coin. A bit softly struck on the high points of the design, but again this would be expected for this issue. Lightly and evenly toned with a few grade-consistent bagmarks.(#6582)

6014 **1920-S MS62 NGC.** The 1920-S half dollar is a strike rarity, and the present coin is above average for this issue. Central details are emerging, but soft in places. Light champagne toning highlights the surfaces over satiny mint luster. Handling marks are minimal for the grade. *From The Findley Collection.*(#6582)

## Elusive Select Mint State 1920-S Walking Liberty Half

6015 **1920-S MS63 PCGS.** This Select '20-S Walker is typically weak on the central highpoints, and also exhibits slight softness on Liberty's head and skirt lines, and on the eagle's right (facing) leg. The mintmark is misshapen. The coin has an abundance of original luster to recommend it, and mottled charcoal-green toning on the upper obverse. The reverse shows deeper strains of purple, steel-green, and russet. The surfaces of this early San Francisco Mint product are very clean for the grade.
*From The Findley Collection.*(#6582)

## Pleasing 1920-S Near-Gem Half Dollar

6016 **1920-S MS64 PCGS.** A bit softly struck in the centers, as usually found, this clean, upper-end coin shows exceptional mint luster, and there is just a bit of attractive golden rim toning on each side. While not as well known as the 1920-D, the '20-S is, nevertheless, an important and difficult early Walker, and one that is seldom found in such superior condition.
*From The Calvin Collection.*(#6582)

## Key Date 1921-D Half Dollar, MS62

6017 **1921-D MS62 NGC.** The 1921-D is the lowest mintage date in the business strike Walking Liberty half dollar series (208,000 pieces). The present coin is softly struck, as usually seen with this date. The lack of central detail is the limiting factor in the grade, as all other aspects of this coin are outstanding. The surfaces display outstanding mint luster and virtually no handling marks.(#6584)

## Low Mintage 1921-D Half Dollar, MS63

6018 **1921-D MS63 NGC.** The 1921-D has the lowest business strike mintage (208,000 pieces) in the Walking Liberty half dollar series. Bruce Fox writes in his *Walking Liberty Half Dollars* reference that: "1921 was a recession year and there was a large reduction in business activity due to the end of the war. There was little need for small denomination coinage and the mints concentrated on silver dollars. Few halves were saved in mint state."

The silver-gray surfaces of this Select example display the satiny texture typical for the issue. The strike is relatively sharp, manifesting itself in partial delineation on Liberty's branch hand. While some minute marks on each side limit the grade, overall this is a nice key-date coin.(#6584)

## Popular Key 1921-S Half, XF40

6019 **1921-S XF40 PCGS.** Light pewter-gray surfaces have faint traces of peripheral gold toning, mostly on the reverse of this important key-date. Both sides have a few fine hairlines and tiny abrasions, but none that are of any significance. An excellent opportunity for the specialist to fill a hole in an advanced Walking Liberty half dollar collection.(#6585)

## Scarce 1921-S Half Dollar, XF40

6020 **1921-S XF40 ANACS.** The 1921-S is among the scarcest issues in the series, especially in XF or better grades. The mintage was low due to record silver dollar production, obligated by the Pittman Act. This example exhibits highpoint wear consistent with the grade, and is toned dove-gray aside from glimpses of peach-tinged luster. There are no detrimental marks.(#6585)

## Low-Mintage 1921-S Fifty Cent, AU50

6021 **1921-S AU50 NGC.** The 1921-S half dollar has a low production of 548,000 pieces, and was apparently not saved in large numbers at the time of striking. The present AU offering exhibits a better-than-average strike, including partial definition on Liberty's branch hand, an area that is usually weak (Jeff Ambio, 2008). Semibright surfaces are devoid of significant contacts, though we mention an unobtrusive hair-thin mark in the right obverse field for complete accuracy.(#6585)

## Lightly Toned 1923-S Half Dollar, MS64

6022 **1923-S MS64 PCGS.** The 1923-S is the lone half dollar delivery between 1921 and 1927, and an issue that apparently saw extensive circulation that precluded the survival of numerous high grade examples. This is an original coin layered in speckled steel-gray patina and a deeper crescent of apricot toning along the left side of the obverse. Fairly well struck, lustrous, and nicely preserved.
*From The Calvin Collection.*(#6586)

6023 **1927-S MS63 PCGS.** A wonderful example with satiny silver luster and excellent design definition that shows weakness only at the center of the obverse. The MS63 grade is extremely popular with collectors who seek a combination of quality and price. (#6587)

## Vibrant 1927-S Half Dollar, MS64

6024 **1927-S MS64 PCGS.** Vibrant luster exudes from both sides of this near-Gem. Aside from the usual softness in the central areas, the design elements are nicely defined. A few minute handling marks scattered about prevent the attainment of Gem classification. The '27-S saw extensive circulation.
*From The Calvin Collection.*(#6587)

## Beautiful Gem 1928-S Half Dollar

6025 **1928-S MS65 NGC.** Beautifully lustrous and virtually all white, with just the slightest tints of beige-gold color visible in the peripheries. The typical strike weakness appears in the centers; otherwise all detail is full and clear, and surface marks are at a minimum. A spot of full reflectivity can be seen above the eagle's head. Housed in an earlier NGC holder. Census: 37 in 65, 5 finer (11/08).
*From The Calvin Collection.*(#6588)

## Appealing 1929-D Half Dollar, MS65

6026 **1929-D MS65 PCGS.** The present coin is sharply struck, with fine detail on the usual problem areas (Liberty's hand, eagle's breast, etc.). Lovely shades of gold and champagne toning accent the surfaces. Satiny mint luster enhances the substantial eye appeal. Jeff Ambio cautions against obtaining this date in grades lower than the Gem level.(#6589)

## Lustrous 1929-D Half Dollar, MS66

6027 **1929-D MS66 PCGS.** Despite its relatively paltry mintage of just over a million, tenth lowest in the series, the 1929-D is one of the more common early date Walkers in all grades. However once it rises to the MS66 level of the present coin, it becomes formidable in its own right, and it is virtually unknown finer. Lustrous surfaces feature light green-gold color, deepening to brown in the extreme peripheries. The few surface abrasions that exist are difficult to find, even under magnification. Housed in a green label holder. Population: 61 in 66, 1 finer (11/08).
*From The Calvin Collection.*(#6589)

## Delightful 1929-S Half Dollar, MS65

6028 **1929-S MS65 PCGS.** Rose-gold color dominates the satiny obverse of this Gem; the reverse features flashier luster and mottled golden-brown color. A bit softly struck on Liberty's branch hand, as virtually always seen; however, the surfaces are unusually free of abrasions, distracting or otherwise. In a green label PCGS holder.
*From The Calvin Collection.*(#6590)

6029 **1933-S MS64 PCGS.** Excellent detail with soft, pleasing luster beneath pink, gold, and silver-gray patina. Small marks on the sun and in the right obverse field preclude Gem status.
*From The Calvin Collection.*(#6591)

6030 **1933-S MS64 NGC.** Freckles of gray, purple, and sky-blue run over the lustrous surfaces of this near-Gem Walker. An exquisitely struck piece, with just a few minor grazes.
*From The Deb-Ann Collection.*(#6591)

## Scarce Gem 1933-S Walking Liberty

6031 **1933-S MS65 PCGS.** The 1933-S Walking Liberty half was the only issue of *any* denomination struck at the San Francisco Mint that year. The Great Depression and an associated banking crisis limited the need for coins in circulation. Although fifty cents went a long way in 1933, the present piece was never spent. The mint luster is effusive, and both sides display only faint olive-gold toning. Well preserved and sharply struck with intricate branch hand detail and only minor blending near the cheek.
*From The James Mossman Collection.*(#6591)

6032 **1934-D MS65 NGC.** Reddish-orange patina graces much of the obverse margins, while the reverse has more even golden coloration. Well-defined and immensely lustrous. NGC has graded 34 numerically finer pieces (8/08).
*From The Calvin Collection.*(#6593)

## Desirable 1934-S Half Dollar, MS65

6033 **1934-S MS65 PCGS.** Light golden brown color is visible over the surfaces of this piece, whose luster, although soft, is abundant, so much so on the reverse as to present almost a matte appearance. Blessed with a better than average strike featuring full separation on the branch hand between Liberty's fingers and thumb, with the latter nearly fully outlined. A few minuscule abrasions appear to determine the grade. Encapsulated in a green label holder.
*From The Calvin Collection.*(#6594)

## Enchanting MS66 1934-S Half

6034 **1934-S MS66 PCGS.** This stunning silvery Premium Gem is far and away finer than typical for the issue, with a bold strike including a split thumb on Liberty's branch hand, generous cartwheel luster, and frosty surfaces that show no singular marks even under a loupe. PCGS has certified only five coins finer (11/08).(#6594)

6035 **1935-D MS65 PCGS.** Though the central devices show evidence of typical striking softness, the minimally toned surfaces are impressively lustrous with hints of frostiness. Minimally marked and attractive.
*From The Calvin Collection.*(#6596)

### Elegant Gem 1935-S Half

6036 **1935-S MS65 PCGS.** A well struck Gem, housed in a green label holder, that offers considerable luster and eye appeal. Subtle golden tints visit parts of the fields, while the rest of the coin remains silver-white. Charming eye appeal for this challenging S-mint issue. PCGS has graded 97 finer pieces (11/08).
*From The Calvin Collection.*(#6597)

6037 **1938-D MS65 NGC.** An impressively lustrous Gem that offers surprisingly strong peripheral detail. Minimally toned with few flaws evident in the fields.
*From The Calvin Collection.*(#6605)

6038 **1938-D MS66 PCGS. CAC.** Whispers of golden-tan patina grace the highly lustrous surfaces of this Premium Gem, and an attentive strike delivers strong detail to the motifs. Both sides are impeccably preserved.(#6605)

### Important, Key Issue 1938-D Half, MS66

6039 **1938-D MS66 PCGS.** The key to the later series of Walkers with a mintage of only 491,600 pieces. This is a mostly brilliant coin that shows absolute completeness of striking with full hand, skirt lines, and head of Liberty. The mint luster is more satiny than frosted, as one would expect from a Denver product.(#6605)

6040 **1939-S MS67 PCGS.** Jeff Ambio reports the 1939-S half dollar is scarce in MS67, and population data indicate that it is not found any finer. The present coin features a sharp strike, and full mint luster, with a hint of Vermillion toning at the periphery. Population: 93 in 67, 0 finer (12/08).(#6608)

6041 **1941-S MS65 NGC.** Subtle golden accents visit parts of each side on this otherwise silver-white Gem. Slightly above-average detail and luster, with modest definition on the branch hand.
*From The Calvin Collection.*(#6613)

### Captivating MS66 1941-S Half

6042 **1941-S MS66 PCGS. CAC.** Slightly above-average strike with winning, satiny luster and rich patina, silver-gray in the centers with vibrant autumnal orange and russet at the margins. This short-set S-mint Walker is a condition rarity in Superb Gem, with only six such pieces acknowledged by PCGS (11/08).(#6613)

### Lustrous 1941-S MS66 Half Dollar

6043 **1941-S MS66 PCGS.** Whispers of purple and electric-blue visit the margins of this Premium Gem half dollar, each side of which is awash in intense luster. Sharply struck throughout, including partial definition in Liberty's branch hand. This is a nicely preserved half. (#6613)

6044 **1945 MS67 PCGS.** This is a positively gorgeous representative from near the end of the Walking Liberty half dollar series. Well struck with a luminous satiny sheen across both sides, and near-immaculate surfaces that display pale gold color in the fields. Population: 60 in 67, 1 finer (11/08).
*From The James Mossman Collection.*(#6624)

6045 **1945-S MS67 NGC.** The design elements of this Superb Gem exhibit sharp definition, including the gown lines and the branch hand. Lustrous, silvery surfaces are impeccably preserved. Die striae are visible in the obverse fields.(#6626)

### Superb 1946-S Half Dollar, MS67

6046 **1946-S MS67 NGC.** The 1946-S half dollar is the most common San Francisco issue in the Walking Liberty series, making it a favorite choice of type collectors. The present specimen is sharply struck, with crisp detail on the central design elements. The surfaces are untoned, with fantastic mint luster. Census: 49 in 67, 0 finer (12/08).(#6629)

# PROOF WALKING LIBERTY HALF DOLLARS

### Peripherally Toned 1936 Walker, PR63

6047 **1936 PR63 NGC.** Framed by fully mirrored fields, the satiny devices of this pleasing specimen suggest a trace of cameo contrast on each side. Essentially a brilliant silver proof, the obverse and reverse have a hint of pale golden toning along the borders. The first year of proof coinage in the Walking Liberty series.(#6636)

### Impressive 1936 Half, PR64

6048 **1936 PR64 NGC.** The satiny and boldly detailed devices seem to float across the deeply mirrored silver surfaces of this brilliant white half dollar. A trace of light gold toning is limited to Liberty's right (facing) shoulder of this near-Gem. Otherwise, both sides are entirely void of toning.(#6636)

### Choice Proof 1936 Walking Liberty Half Dollar

6049 **1936 PR64 PCGS.** Although rumors persist of matte or sandblast proof Walkers dated 1916 or 1917, the 1936 is the first collectible proof of the series. This piece has a trace of contrast with satiny devices that are framed by deeply mirrored fields. Close inspection reveals a few faint splashes of pale gold toning.(#6636)

### White PR65 ★ 1936 Walking Liberty Half

6050 **1936 PR65 ★ NGC.** This stone-white Gem is undisturbed by contact. The devices are generally frosted, and although no 1936 Walker has been designated as Cameo by NGC, the present piece does exhibit moderate contrast. The first proof date of the type, and also the lowest mintage. Census: 4 in 65 ★, 14 finer with a Star designation (11/08).(#6636)

### Excellent 1936 Walker, PR66

6051 **1936 PR66 NGC.** This extraordinary Premium Gem proof 1936 Walking Liberty half dollar will make a nice addition to the specialist's cabinet, with its brilliant and fully mirrored fields that outline the satiny devices. NGC has only certified 73 finer examples of this variety (12/08).(#6636)

### Lovely PR66 1936 Half

6052 **1936 PR66 NGC.** Subtle champagne tints invigorate the otherwise light silver-gray surfaces of this attractive Premium Gem. The strike is bold, as expected, and the mirrors are carefully preserved. A great specimen from the first year of proof issue for the design. NGC has certified 73 numerically finer pieces (11/08).
*From The Plymouth Collection.*(#6636)

## Brilliant 1936 Walking Liberty Half, PR66

6053 **1936 PR66 PCGS.** This brilliant Premium Gem has noticeable frost on the Walking Liberty. The fields appear immaculate, and the eye appeal is impeccable. As is the case with sculptor Adolph Weinman's other design, the Mercury dime, the 1936 proofs are key to the series. The 1936 mintage is less than one-fifth that of the 1942. The reduced supply is important given the large number of collectors for the popular series.(#6636)

## Amazing 1936 Walking Liberty Half, PR67 ★

6054 **1936 PR67 ★ NGC. CAC.** This is an incredible 1936 proof Walking Liberty half dollar that exhibits silver brilliance that is somewhat subdued by ivory and iridescent toning on the obverse, and peripheral iridescence on the reverse. The toning masks the deeply mirrored fields, and prevents the true cameo contrast from shining as brightly as it could. The present specimen is one of the finest existing 1936 proof Walkers, with just one higher grade piece certified by PCGS. NGC has never certified a PR68 or finer example, and have only handed out the star designation to a small handful of the PR67 pieces.(#6636)

6055 **1937 PR67 PCGS.** Delicate pearl-gray toning drapes much of the mirrors, while the rims show subtle traces of golden-brown patina. An exquisitely detailed Superb Gem that offers fabulous visual appeal. PCGS has graded nine finer specimens (11/08).
*From The Plymouth Collection.*(#6637)

6056 **1937 PR67 NGC.** This brilliant Superb Gem proof displays an exquisite strike. The surfaces on both sides are nearly pristine. (#6637)

6057 **1938 PR67 ★ NGC. CAC.** An extraordinary Superb Gem proof with NGC's special star designation for quality. Both sides are essentially white with a trace of peripheral champagne toning. The devices are lustrous, around deeply mirrored fields, creating a desirable cameo appearance.(#6638)

## Sumptuous 1939 Walker, PR68

6058 **1939 PR68 PCGS.** Even though 8,808 proofs were struck this year, there are very few that have survived in this superior state of preservation. The surfaces seem to be perfect. Examination with a magnifier shows no obvious contact marks or hairlines. In fact, close examination with a loupe is recommended as it reveals the multiple colors that make up the rich tonal qualities seen on each side. Just an exceptional proof and obviously original. Population: 24 in 68, 0 finer (12/08).(#6639)

6059 **1942 PR67 PCGS.** A modestly mirrored Superb Gem that is untoned, or very nearly so, and undoubtedly appearing much as it did upon being newly minted. An ideal specimen to represent Adolph Weinman's Walking Liberty design. In a green label holder. (#6642)

## Gorgeous PR68 1942 Half

6060 **1942 PR68 NGC.** A marvelously preserved specimen from the design's proof finale. Light silver-gray patina overall with arcs of gold and orange-umber at the margins. Sharply detailed and profoundly reflective through the considerable patina. NGC has graded just four numerically finer pieces (11/08).(#6642)

# FRANKLIN HALF DOLLARS

6061 **1950-D MS66 Full Bell Lines PCGS.** This was just the third year of the Franklin half dollar series, and high-grade survivors are relatively scarce with Full Bell Lines. This sharply struck Premium Gem displays shimmering luster and small amounts of cherry-red, gold, and sea-green peripheral toning. Exquisitely preserved and free of all but the most minute marks. Population: 47 in 66 Full Bell Lines, 0 finer (12/08).(#86657)

### Bold 1951-D Half, MS66 Full Bell Lines

6062 **1951-D MS66 Full Bell Lines PCGS.** Light rose toning covers satiny, distraction-free surfaces on both the obverse and reverse of this Premium Gem exemplar. The fields are unusually nice for an MS66 representative and the resulting eye appeal is also above average. Population: 63 in 66 Full Bell Line, 0 finer (12/08). (#86659)

6063 **1951-S MS67 PCGS.** Intensely toned, with fiery orange-red and green over most of the obverse, with scattered breaks in the toning over Franklin's profile and the lettering, where silvery-gray remains. The reverse is well matched, with deep orange-red relegated to the periphery and the centers a lighter silver color. No toning flecks are found on the reverse. This phenomenal coin is fairly well struck, and has been carefully preserved ever since. Just a few ticks separate this coin from perfection. The strike is sharp, but not quite enough so for the coveted Full Bell Lines designation, with the lower lines a trifle shallow near the clapper. An extraordinary Franklin half dollar. Population: 1 in 67, 0 finer (12/08).(#6660)

### Beautiful 1957 Half Dollar, MS67 Full Bell Lines

6064 **1957 MS67 Full Bell Lines PCGS.** Beautiful cobalt-blue and reddish-orange toning on the obverse is clearly the result of prolonged mint set storage. The reverse of this Superb example is a lighter gray with numerous specks of russet and steel-blue throughout. Population: 11 in 67 Full Bell Lines, 0 finer (12/08). (#86672)

### Attractively Toned 1957-D Half, MS67

6065 **1957-D MS67 PCGS.** Light gold and silver-gray toning covers both sides, but the reverse benefits from a concentric bands of chartreuse, lavender, sea-green, amber, and electric-blue peripheral toning. The combination of the attractive coloration and the stunning state of surface preservation results in a Superb Gem Franklin half of the finest quality available. Population: 2 in 67, plus 9 pieces in 67 Full Bell Lines, 0 finer (12/08).(#6673)

### Toned 1958-D Half Dollar MS67 Full Bell Lines

6066 **1958-D MS67 Full Bell Lines PCGS.** Ex: Larry Shapiro Collection. Waves of multicolored, rainbow-like toning bathes the lustrous surfaces of this Superb Gem. Sharply struck, with Full Bell Lines, and impeccably preserved. Population: 26 in 67 Full Bell Lines, 0 finer (12/08).(#86675)

### Silky Smooth 1959 Half, MS66

6067 **1959 MS66 Full Bell Lines PCGS.** With the discontinuation of the cardboard holders for mint sets after 1958, a higher percentage of high grade 1959 halves are brilliant. This is such a piece. The surfaces are uncommonly smooth and silky with none of the obvious abrasions that usually mar Franklins. An extraordinary piece. Population: 31 in 66, 0 finer (12/08).(#86676)

### Pleasing 1959 Franklin Half, MS66 Full Bell Lines

6068 **1959 MS66 Full Bell Lines PCGS.** A rarity in certified Full Bell Lines at either service, the 1959 Philadelphia Mint Franklin is generally among the poorest strikes in the entire series. This piece falls well within the definition, however, with pleasing surfaces and considerable eye appeal. Tied for the finest certified at PCGS, while NGC has certified a single Full Bell Lines piece finer (12/08). (#86676)

## PROOF FRANKLIN HALF DOLLARS

6069 **1950 PR65 Cameo NGC.** A splendid, razor-sharp Gem that has frosted devices and seamless mirrored fields. A very flashy proof! This issue is somewhat scarce at the PR65 Cameo grade level, from an original mintage of just 51,386 pieces.(#86691)

6070 **1953 PR68 Cameo NGC.** This piece is untoned and deeply reflective, with strong contrast. The bell and eagle, in particular, are richly frosted. Census: 20 in 68 Cameo, 0 finer (12/08). (#86694)

### Dazzling PR69 Cameo 1955 Half Dollar

6071 **1955 PR69 Cameo NGC.** A scarce and seldom-encountered date with cameo contrast. To date (12/08), NGC has only certified three other pieces in this grade. This is a magnificent coin that shows deep, watery fields on each side and the devices are nicely frosted, almost to the Ultra level. Brilliant throughout and, to our eyes, flawless. Census: 4 in 69 Cameo, 0 finer (12/08).(#86696)

6072 **1957 PR68 Deep Cameo PCGS.** A rare issue in PR68 Deep Cameo, with black-on-white contrast that is both unusual and exceptional for the issue. The surfaces are extraordinarily pristine and completely untoned.(#96698)

6073 **1958 PR67 Deep Cameo PCGS.** This Superb Gem is nearly color free, save for some tiny orange freckles that show up under magnification. Well struck, nicely cameoed, and wonderfully preserved.(#96699)

### Amazing 1958 Franklin, PR68 Ultra Cameo

6074 **1958 PR68 Ultra Cameo NGC.** A stunning 1958 proof Franklin half dollar with fully brilliant silver surfaces sans toning. Both sides have deeply mirrored fields that seem unending, serving as a nice frame for the extraordinary, highly lustrous devices. Census: 11 in 68 Ultra Cameo, 1 finer (12/08).(#96699)

### Exceptional PR69 Deep Cameo 1961 Half

6075 **1961 PR69 Deep Cameo PCGS.** While not one of the scarcer dates with Deep Cameo contrast, this piece is unique in PR69 at PCGS. And it is stunning. The surfaces are brilliant on each side. The fields show illimitable depth of reflectivity with thickly frosted devices that contrast sharply, yielding a strong cameo effect.(#96702)
***See: Video Lot Description***

## SMS KENNEDY HALF DOLLAR

### Elusive 1967 SMS Kennedy, MS68 Deep Cameo

6076 **1967 SMS MS68 Deep Cameo PCGS.** A true prize for the Kennedy half Registry Set collector, the present 1967 SMS, certified MS68 Deep Cameo by PCGS, is one of only a half-dozen pieces so graded at that service. Most examples are likely held in extremely strong hands, as the competition is keen among this group of collectors, and such prizes appearing in the various auction venues are rapidly and eagerly snatched up.

While the 1967 SMS and its counterparts are readily available for a price up through the MS68 level, it is with Cameo or Deep Cameo contrast that they show their true rarity—a trait they also share with the celebrated 90% silver 1964 proof Kennedys. This 1967 SMS example offers no-questions, deeply mirrored black-on-white contrast, almost appearing to be a true proof, and the lack of mentionable contact more than justifies the grade. In recognition of the rarity of Deep Cameo examples, PCGS awards them a three-point bonus in the 192-coin "long set," the Kennedy Half Dollars Complete Variety Set, Circulation Strikes and Proof (1964-Present) collection—effectively making this coin an MS71! Certified in a green-label holder. Population: 6 in 68 Deep Cameo, 0 finer (12/08). (#96847)

## PROOF KENNEDY HALF DOLLARS

### PR69 Deep Cameo 1964 Kennedy

6077 **1964 PR69 Deep Cameo PCGS.** Type Two Reverse. Icy devices provide desirable contrast with the glassy fields. The strike is needle-sharp, and the surfaces are as made aside from glimpses of chestnut-gold toning. The only Philadelphia Mint proof issue. Population: 70 in 69 Deep Cameo, 0 finer (11/08).(#96800)

6078 **1964 Accented Hair PR66 Deep Cameo PCGS.** Stark white-on-black contrast includes fathomlessly deep reflectivity in the fields. Fully struck and distraction-free; a great Deep Cameo example of this scarce Kennedy half dollar variety. Population: 18 in 66 Deep Cameo, 25 finer (11/08).(#96801)

### 1968-S Half, PR70 Deep Cameo

6079 **1968-S PR70 Deep Cameo PCGS.** One of only 16 pieces graded PR70 Deep Cameo by PCGS as of (12/08). Coincidentally, this John F. Kennedy half dollar was struck in the same year that his brother and Democratic presidential candidate Robert F. Kennedy was assassinated in Los Angeles. The current offering is just as it was when it was carefully minted 40 years ago.(#96804)

### Stunning 1973-S Half, PR70 Deep Cameo

6080 **1973-S PR70 Deep Cameo PCGS.** As of (12/08), over 4,000 1973-S Kennedy halves have been encapsulated at the PR69 Deep Cameo level, but only a staggeringly low 17 pieces have been granted the coveted PR70 Deep Cameo designation. Early Kennedy halves with intense cameo contrast are challenging in any grade, but they become rare in the theoretically perfect grade of PR70.(#96809)

### Tough 1974-S Half, PR70 Deep Cameo

6081 **1974-S PR70 Deep Cameo PCGS.** Unimprovable quality for this popular design. A magnificent cameo effect is seen throughout, and no defects of any kind can be found. Not counting the bicentennial issue, the 1974-dated proof Kennedy halves represent that last challenging year for the series at the PR70 Deep Cameo level. Population: 16 in 70 Deep Cameo and, obviously, none finer (12/08). (#96810)

### Amazing 1976-S Fifty Cent, PR70 Deep Cameo

6082 **1976-S Clad PR70 Deep Cameo PCGS.** Unfathomably deep fields turn black at just the right angle and contrast nicely with the frosty white design elements on both sides. Completely distraction-free surfaces and the aforementioned qualities have earned this stunning Kennedy half PR70 Deep Cameo grade at PCGS—one of only 16 to do so as of (12/08).(#96811)

### Unimprovable PR70 Deep Cameo 40% Silver 1976-S Kennedy Half

6083 **1976-S Silver PR70 Deep Cameo PCGS.** Fully frosted motifs rise above the flashy mirrored fields. A precisely struck proof Kennedy half from our nation's bicentennial year. A single-year type with Independence Hall on the reverse, similar to the 1926 Sesquicentennial quarter eagle. Housed in a green label holder. Population: 29 in 70 Deep Cameo (11/08).(#96812)

6084 **1979-S Type Two PR70 Deep Cameo PCGS.** The 'Clear S' mintmark style is much scarcer than its 'Filled S' counterpart, as is the case for most proof denominations of this year. Exceptional white on black contrast and undisturbed mirror fields confirm the lofty third party grade. Population: 42 in 70 Deep Cameo, 0 finer (12/08).(#96819)

### Type Two 1981-S Half, PR70 Deep Cameo

6085 **1981-S Type Two PR70 Deep Cameo PCGS.** A very light golden hue uniformly blankets both sides of this virtually perfect coin. The 1981-S Type Two proof half dollar issue is four to five times more challenging at the certified PR69 and PR70 Deep Cameo levels. As of (12/08), PCGS has certified only 24 examples as PR70 Deep Cameo, compared to 82 Type One variants in the same grade. (#96822)

6086 **1981-S Type Two PR70 Deep Cameo PCGS.** A haze of light gold does not disturb the breathtaking Cameo contrast. Exquisitely struck and flawless. Population: 24 in 70 Deep Cameo (12/08). (#96822)

## COMMEMORATIVE SILVER

6087 **1893 Isabella Quarter MS65 ICG.** Silver-gray surfaces are lightly toned in violet and sky-blue on the reverse. Sharply struck throughout. What appear to be light water stains are visible on the upper reverse.(#9220)

6088 **1900 Lafayette Dollar—Improperly Cleaned—NCS. AU Details.** DuVall 1-B. Silver-gray surfaces show traces of luster in the recesses. Fine hairlines occur over each side, along with scattered small contact marks. A well struck piece.(#9222)

6089 **1900 Lafayette Dollar MS63 PCGS.** DuVall 1-B. Lovely, variegated blue, violet, and yellow-orange patina graces the highly lustrous surfaces. A couple of light abrasions are present on Washington's cheek, limiting the grade.(#9222)

6090 **1900 Lafayette Dollar MS63 PCGS. CAC.** A fully lustrous Mint State piece with entirely brilliant, untoned silver surfaces. The grade is a popular choice among collectors who seek excellent quality at an affordable price.(#9222)

6091 **1937 Antietam MS67 NGC.** A frosty and highly lustrous Superb Gem, this Gettysburg half dollar exhibits traces or splashes of peripheral gold toning.(#9229)

6092 **1937 Antietam MS67 PCGS. CAC.** Observance of the 75th anniversary of the Battle of Antietam was the occasion for this commemorative half dollar. Light gray surfaces are endowed with pleasing luster, and devoid of significant marks. A well directed strike brings out crisp detail on the design elements.(#9229)

### Vibrant 1937 Antietam Half Dollar, MS67

6093 **1937 Antietam MS67 PCGS.** Pastel violet, gold, yellow-green, and powder-blue patina adheres to both sides of this superb Gem, each of which is awash in vibrant luster. An attentive strike delivers strong definition to the design features, heightening the coin's already impressive eye appeal. Nicely preserved throughout.(#9229)

### Colorful Superb Gem 1935-S Arkansas Half

6094 **1935-S Arkansas MS67 PCGS.** Peripheral toning ranges from gold to deep orange and russet, while the centers remain light silver-gray. A carefully preserved, slightly satiny Superb Gem with interesting eye appeal, one of just 5,506 pieces struck for the issue and tied for numerically finest known to NGC or PCGS (12/08).(#9235)

## Important Superb Gem 1936 Arkansas Half

6095 **1936 Arkansas MS67 NGC.** The year 1936 appears on both sides of this issue, on the obverse as part of the centennial dates and on the reverse to signify the actual year of mintage. This highly lustrous example, well struck overall with a touch of softness on the eagle's neck, has rich orange patina at the obverse periphery and speckles of gunmetal toning around pale rose, amethyst, and silver-gray centers. One of seven Superb Gems graded by NGC, with none numerically finer (12/08).(#9237)

6096 **1939-D Arkansas MS66 PCGS. CAC.** Soft yellow-gold patina envelops this Premium Gem commemorative. Lustrous surfaces exhibit well struck design elements, and are minimally abraded. Population: 59 in 66, 6 finer (12/08).(#9250)

6097 **1939 Arkansas PDS Set MS65 NGC.** Includes the **1939**, cheerful luster with light golden overtones; the **1939-D**, light silver-gray with occasional milk-spotting; and the **1939-S**, gold-orange at the rims with varying degrees of silver-gray in the centers and a subtle streak of charcoal before the chief's nose.(Total: 3 coins)(#9252)

6098 **1935/34-D Boone MS67 PCGS. CAC.** The 1935/34-D Boone and its S-mint counterpart are among the showstoppers in high grade to assembling a complete set of U.S. silver commemoratives of the classic era. This piece, from a net mintage of 2,003 pieces, is one of a few dozen so certified at PCGS, with but five coins graded finer (12/08). The silvery, pristine surfaces are virtually untoned and unperturbed, save for a thin ring of amber-gold at the extreme rims. (#9263)

## Superb Gem 1935-S Boone Low Mintage 1934 in Field Variety

6099 **1935/34-S Boone MS67 NGC. CAC.** Along with its Denver Mint counterpart, the 1935/34-S has the lowest mintage of any silver commemorative issue. Only 2,004 pieces were struck, with the errant four coins destined for assay. This high grade example has pastel lime and chestnut toning. Satiny, solidly struck, and devoid of contact.(#9264)

6100 **1938-D Boone MS67 PCGS. CAC.** The satiny surfaces of this Superb Gem commemorative reveal wisps of olive-brown and russet patina at some of the margins, along with nice luster. Impeccably preserved.(#9275)

## Beautiful 1925-S California Half, MS67

6101 **1925-S California MS67 PCGS. CAC.** The centers are brilliant on this Superb Gem, but the rims are encircled with wonderful rings of jade and amber. Close perusal with a loupe reveals no mentionable distractions. Not a common coin in this grade, and seldom seen finer, as PCGS has certified only five coins in higher grade (12/08). *From The Good Humor Collection.*(#9281)

6102 **1936 Cleveland MS67 NGC.** Richly Toned in golden-brown, olive-green, crimson, and orange patina, some of which takes on a dappled appearance. Both sides are sharply struck, and devoid of mentionable marks. Census: 49 in 67, 3 finer (12/08).(#9288)

## Charming MS67 1892 Columbian Half

6103 **1892 Columbian MS67 PCGS. CAC.** As the first silver commemorative struck, the Columbian half holds a special place in the long and historic commemorative series. This a spectacularly toned piece displaying lovely, sea-green patina with rich reddish-golden accents at the rims. Superb luster and exceptional eye appeal overall. One tiny, lateral mark is noted to the left of the eye. Population: 9 in 67, 0 finer (11/08).(#9296)

## Attractively Toned 1893 Columbian Half, MS66

6104 **1893 Columbian MS66 PCGS. CAC.** This Premium Gem displays highly lustrous surfaces that are splashed with aquamarine, lavender, golden-tan, and violet patination. The design features are well brought up, including the outlines of the continents. A nicely preserved piece. Well deserving of the CAC green label. (#9297)

## Wonderful MS67 1935 Connecticut Half

6105 **1935 Connecticut MS67 PCGS.** Each side of this gleaming Superb Gem shows a vibrant melange of gold-orange, rose, violet, and silver-white with subtle iridescence at the borders. Excellent striking definition and preservation for this universally praised classic commemorative design. Population: 42 in 67, 1 finer (11/08). (#9299)

## Outstanding MS67 1935 Connecticut Half

6106 **1935 Connecticut MS67 NGC.** A magnificently designed commemorative that displays a historically significant tree, the Charter Oak, on the obverse and an Art Deco eagle on the reverse. The surfaces are nicely frosted and, as one might imagine, nearly defect-free. Each side shows a lovely overlay of golden and lilac toning. Census: 62 in 67, 1 finer (12/08).(#9299)

6107 **1936 Gettysburg MS66 PCGS.** Primarily brilliant and frosty silver surfaces, though with considerable deep iridescent toning splashes on both sides.(#9305)

6108 **1936 Gettysburg MS67 NGC.** Meticulous striking detail and impressive preservation characterize this remarkable Superb Gem. Subtle variations of steel-gray and blue-rose toning appear on both sides. Census: 46 in 67, 2 finer (11/08).(#9305)

## Desirable 1922 Grant With Star Half Dollar, MS64

6109 **1922 Grant with Star MS64 NGC.** The with Star Grant half dollars were, according to David Bowers (2008) coined in error, as the Commission had not ordered them. Hints of light champagne color rest on the radiantly lustrous surfaces of this near-Gem, and a well executed strike imparts crisp definition to the design elements. A couple of unobtrusive marks do not detract.(#9307)

## Lustrous 1922 Grant With Star Half Dollar, MS64

6110 **1922 Grant with Star MS64 PCGS.** Golden-gray patination overruns both sides of this near-Gem Grant with Star commemorative. An attentive strike sharpens the design elements. Lustrous surfaces are devoid of serious contact marks. Nice overall eye appeal for the grade designation.(#9307)

## Important MS62 1928 Hawaiian Half

6111 **1928 Hawaiian MS62 ANACS.** An interesting and unworn survivor, housed in a small-format ANACS holder. Light gold-orange peripheral toning frames radiant centers that are effectively silver-white. Moderate luster with a few distractions in the fields, though no flaws on either side warrant individual mention.(#9309)

## Attractive 1928 Hawaiian Half, MS64

6112 **1928 Hawaiian MS64 NGC.** The silver-gray surfaces show just a bit of hazy gold color, but this near-Gem may nonetheless fill the bill as an attractive example of one of the true keys to the classic commemorative silver set. Some charcoal-gray appears in protected areas of the lower reverse, but the Hawaiian chieftain's torso and legs show fewer marks than usually seen at this grade level. (#9309)

6113 **1935 Hudson MS65 PCGS. CAC.** Golden-brown freckles race over the lustrous surfaces of this Gem commemorative. Well struck and nicely preserved.(#9312)

## Gorgeous 1924 Huguenot, MS67

6114 **1924 Huguenot MS67 NGC.** Easily obtainable in lower grades, Superb Gem Huguenot commems are not encountered with any frequency in today's market. This is a gorgeous coin whose surfaces show rich crimson-russet peripheral toning about the silver-lilac centers. Intensely frosted with pinpoint striking definition and no distractions. Census: 37 in 67, 0 finer (12/08).(#9314)

## Attractive 1921 Missouri Half Dollar, MS65

6115 **1921 Missouri MS65 NGC.** Robert Aitken, of Panama-Pacific fifty dollar fame, designed this 1921 commemorative issue. The exact mintage is disputed, but the most accepted figure is 10,428 pieces. The present coin displays lovely shades of gold and lavender toning on virtually flawless surfaces. The strike is sharp and eye appeal is excellent.(#9330)

## Frosty 1921 Missouri 2★4 Half, MS65

6116 **1921 Missouri 2★4 MS65 NGC.** The 2★4 variety. Just as the ★ found on the Grant Memorial commemoratives, this feature was raised in the die, resulting in an incuse feature on the struck coin. The idea for the 2★4 feature was that of James Montgomery, chairman of the Missouri Centennial Exposition. He wanted the star feature raised in the die so that it could easily be removed after striking 5,000 or so coins. The logic was that the public would pay extra for this feature. The example offered here is a true Gem, with frosty luster across all surfaces and lightly variegated rose and amber hues imbued throughout.(#9331)

## Enchanting MS66 ★ 1923-S Monroe Half

6117 **1923-S Monroe MS66 ★ NGC.** Typically, the phrases "eye appeal" and "Monroe half" do not belong in the same sentence, save to note the usual lack of the former on examples of the latter. The present coin is a delightful exception, with both sides sporting pleasing detail and uncommonly warm luster. On the obverse, rich bands of rose, orange, cerulean, and lime patina surround a small silver-white center, while the reverse shows only a touch of reddish-orange peripheral toning to the right. NGC has graded just seven numerically finer examples (12/08).(#9333)

6118 **1936 Norfolk MS68 PCGS.** One of the most attractive examples of this type that we have ever seen, featuring a complex and interesting design. Well struck, lustrous, and seemingly pristine, with a gorgeous toning scheme on both sides. None have been graded any finer, by either service (11/08).(#9337)

6119 **1936 Norfolk MS68 PCGS.** Elegant silver-blue shadings visit the centers, while intermittent tan elements grace the margins. Excellent strike and preservation as always, but taken to the highest level recognized by NGC or PCGS (12/08).(#9337)

6120 **1926-S Oregon MS66 ★ NGC.** Ocean-blue, cherry-red, and golden-tan adorn the margins of this satiny and immaculate Premium Gem. Crisply struck save for minor merging on the back of the wagon. Census: 3 in 66 ★, 12 finer with a Star designation (11/08). *From The Malibu Collection.*(#9341)

6121 **1933-D Oregon MS67 NGC.** Light gray, lustrous surfaces have reddish-gold and yellow-gold accents at the margins. This is a sharply struck, well preserved coin. Census: 35 in 67, 2 finer (12/08). (#9343)

6122 **1934-D Oregon MS67 NGC.** Pretty dapples of sage and saffron grace the obverse and reverse of this attractive Superb Gem coin, among the few dozen finest certified at both services combined. The net distribution was 7,006 pieces.(#9344)

6123 **1934-D Oregon MS67 PCGS. CAC.** Lustrous surfaces display light gray-blue color on the obverse, ceding to silver and yellow-gold on the reverse. Exquisitely struck and impeccably preserved. Population: 48 in 67, 0 finer (12/08).(#9344)

## Superlative 1939-D Oregon Half, MS68

6124 **1939-D Oregon MS68 NGC.** This frosty and highly lustrous Superb Gem is at the top of the population charts for the '39-D Oregon half, as neither NGC or PCGS have certified any as MS69. The strike is bold and the brilliant silver surfaces are entirely untoned. Census: 20 in 68, 0 finer (12/08).(#9353)

6125 **1915-S Panama-Pacific MS64 NGC.** Light silver-gray centers with peach and blue-violet at the rims of this satiny and well struck coin. Single rings of deeper patina run through the center of the peripheral toning on both obverse and reverse, a common feature for this earlier half dollar commemorative.(#9357)

## Scarce 1915-S Panama-Pacific Half Dollar Silver Commemorative, MS66

6126 **1915-S Panama-Pacific MS66 PCGS.** This stone-white silver commemorative has a precise strike and booming mint luster. Only a few faint grazes emerge when the piece is rotated beneath a light. The mintmark is lightly repunched north. The Panama-Pacific half is scarcer than its mintage suggests, probably because examples were sold for apiece to non-numismatist attendees at the 1915 exposition. (#9357)

## Frosty 1915-S Pan-Pac Half, MS66

6127 **1915-S Panama-Pacific MS66 PCGS.** Chief Engraver Charles Barber designed the obverse of this beautiful commemorative, whereas the reverse was the work of George Morgan. 36 years earlier Charles Barber was promoted to chief engraver after the death of his father and chief engraver, William, even though Morgan was the more capable of the two designers. This Pan-Pac half dollar was one of the last few design collaborations between the two engravers, as Barber died on February 18, 1917.

Subtle amber coloration shimmers across the lustrous surfaces of this Premium Gem representative. A couple of light abrasions in the lower region of the reverse's shield are the only distractions visible without the aid of a loupe, and likely all that precludes a finer grade. As of (12/08), PCGS has certified only 77 pieces higher. (#9357)

## Lustrous 1915-S Panama-Pacific Half, MS66

6128 **1915-S Panama-Pacific MS66 NGC.** Deep electric-blue, golden-brown, and purple toning occupies the obverse, ceding to lower intensity coloration of the same palette on the reverse. Pleasing luster emanates from both sides, each of which is devoid of mentionable marks. A well executed strike leaves exquisite definition on the design elements.(#9357)

## Beautifully Toned Superb Gem 1915-S Panama-Pacific Half

6129 **1915-S Panama-Pacific MS67 NGC. CAC.** Golden-brown, apple-green, and slate patina invigorates this lustrous and powerfully struck Superb Gem. Essentially pristine aside from inconspicuous marks between Columbia's outstretched arms. The mintmark is repunched directly north, one of two different interesting RPM varieties found on this conditionally rare issue. Census: 63 in 67, 0 finer (11/08). *From The Scott Rudolph Collection.*(#9357)

6130 **1935 Spanish Trail MS66 NGC.** The surfaces are satiny and fine-grained powder-gray, although there is a touch of orange at the extreme rims. Even under a loupe there are no remotely relevant marks on this exceptional Premium Gem, one of the more elusive issues in the series.(#9376)

## Pleasing Superb Gem 1935 Spanish Trail Half

6131 **1935 Spanish Trail MS67 NGC. CAC.** Sumptuous, satiny luster with occasional hints of charcoal and tan visible at the rims of the otherwise pearl-gray surfaces. The strike is pleasing for the issue, and save for a tiny mark on the upper right obverse rim, there are marks of any note. NGC has certified just five numerically finer pieces (12/08).(#9376)

### Shining Superb Gem 1927 Vermont Half

6132 **1927 Vermont MS67 NGC.** The strike is excellent, and the fields are carefully preserved with immense luster beneath varying degrees of green-gold and tan patina. A high-end survivor for this Roaring Twenties commemorative issue, struck just before Herbert Hoover's rise to the presidency and a subsequent moratorium on commemorative issues.(#9401)

### Elusive 1947-S Booker T. Washington Half Dollar, MS67

6133 **1947-S Booker T. Washington MS67 NGC.** This silver commemorative is available through the Gem level of preservation, and can even be located in Premium Gem with some searching. Superb Gems such as the present example are elusive, however, and represent the finest certified. Soft champagne patina covers highly lustrous surfaces. Sharply struck and nicely preserved. Census: 15 in 67, 0 finer (11/08).(#9410)

### Well Struck Superb Gem 1948-D Booker T. Washington Half

6134 **1948-D Booker T. Washington MS67 NGC.** A satiny and brilliant Superb Gem that has an uncommonly sharp strike on the cheek and jaw of educator Booker T. Washington. Both sides are essentially free from abrasions. A scant 8,005 pieces were produced, all issued as part of PDS sets. Census: 14 in 67, 0 finer (11/08).(#9413)

6135 **1951-S Booker T. Washington MS67 PCGS.** Well struck with radiant mint luster and mostly-white surfaces that reveal slight touches of gold color on both sides. Impressively preserved and virtually pristine. Population: 22 in 67, 0 finer (11/08).
*From The Omaha Collection.*(#9426)

6136 **1951 Washington-Carver MS66 ANACS.** Dappled purple and sky-blue toning runs over the lustrous surfaces of this Premium Gem. Sharp definition appears on the devices, and both sides are nicely preserved.(#9430)

### Sharp 1952-S Washington-Carver Half Dollar, MS67

6137 **1952-S Washington-Carver MS67 NGC.** Dapples of olive-brown and russet dot each side, joined by splashes of reddish-brown on the reverse. An attentive strike leaves strong definition on the design elements. Devoid of mentionable contact marks. Census: 4 in 67, 0 finer (12/08).(#9436)

## COMMEMORATIVE GOLD

6138 **1903 Louisiana Purchase/Jefferson MS65 NGC.** Essentially unmarked with bright, satiny luster and beautiful peach-gold and lime coloration. Well struck on all of the design elements. A distinct orange-peel texture is noted near the peripheries.
*From The Peter J. Adasek, M.D. Collection.*(#7443)

6139 **1903 Louisiana Purchase/Jefferson MS65 NGC.** A beautiful sun-gold Gem with vibrant luster and no grade-limiting marks. A sharply struck and attractive example of this scarce early gold commemorative.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7443)

6140 **1903 Louisiana Purchase/Jefferson MS65 NGC.** A quick glance at this boldly defined example indicates a higher grade than NGC has assigned. Both sides are highly lustrous with frosty yellow-gold surfaces. A few small coppery toning spots are evident on the obverse.(#7443)

### Pretty MS66 1903 Louisiana Purchase/Jefferson Dollar

6141 **1903 Louisiana Purchase/Jefferson MS66 PCGS.** One of the two gold dollar issues from 1903 that ushered in the era of classic U.S. gold commemoratives. The Louisiana Purchase/Jefferson is the "purer" issue in the sense that it commemorates the president at the time of the 1803 purchase, one that doubled the size of the continental United States. This pretty Premium Gem has radiant orange-gold surfaces with a tinge of hazel near the rims.(#7443)

## Lustrous 1903 Louisiana Purchase/Jefferson Commemorative Dollar, MS66

6142 **1903 Louisiana Purchase/Jefferson MS66 PCGS.** Rich apricot-gold color resides on the highly lustrous surfaces of this Premium Gem gold dollar commemorative, and an attentive strike delivers strong definition to the design elements. This is a lovely well preserved specimen. 17,500 pieces were distributed.(#7443)

6143 **1903 Louisiana Purchase/McKinley MS65 PCGS.** Originally intended to consist only of the Louisiana Purchase/Jefferson type, the McKinley coins were added in order to honor the recently-assassinated president. This is a vibrantly lustrous Gem example, with shining yellow-gold surfaces that are imbued with lime undertones. Well preserved and free of distractions.(#7444)

## Satiny 1903 Louisiana Purchase/McKinley Dollar, MS66

6144 **1903 Louisiana Purchase/McKinley MS66 PCGS.** The assassination of William McKinley, in 1901, led to his inclusion in this centennial commemorative issue, which was originally supposed to show only the image of Thomas Jefferson, as the President who presided over the Louisiana Purchase. This Premium Gem is bright and satiny, with vibrant orange-gold and lime-green toning and unblemished surfaces. (#7444)

## 1903 Louisiana Purchase/McKinley Dollar, MS66

6145 **1903 Louisiana Purchase/McKinley MS66 NGC. CAC.** This is a lovely and problem-free example of this first-year gold dollar, one of two with the 1903 Louisiana-McKinley issue that ushered in the classic era of U.S. gold commemoratives lasting through 1926. The peach gold surfaces are appealing and frosty, with few marks of any kind. The first (and redundant) dash in the 1803-1903 date is somewhat faintly struck.(#7444)

6146 **1904 Lewis and Clark MS63 NGC.** A beautiful Select representative. The borders display faint lime-green, while the centers are radiant yellow-gold. Sharply struck, and highly attractive for the designated grade.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7447)

## Captivating 1904 Lewis and Clark Gold Dollar, MS64

6147 **1904 Lewis and Clark MS64 NGC.** Greenish-gold surfaces are imbued with blushes of apricot, and yield pleasing frosty luster. Uniformly well struck design elements complement these attributes. A couple of unobtrusive marks barely prevent Gem classification. Nonetheless, this is a captivating example from the first of two Lewis and Clark gold dollar issues.
*From The Peter J. Adasek, M.D. Collection.*(#7447)

## Charming Choice 1904 Lewis and Clark Dollar

6148 **1904 Lewis and Clark MS64 NGC.** The obverse and reverse surfaces of this boldly defined Lewis and Clark gold dollar exhibit amazing lemon-yellow color with hints of deeper orange toning. The late die state exhibits some die erosion on each side, framing the devices and outlining the legends. Still, a highly attractive Choice representative of this challenging classic gold commemorative issue. (#7447)

## Prooflike Near-Gem 1904 Lewis & Clark Gold Dollar

6149 **1904 Lewis & Clark MS64 Prooflike NGC.** Crisp and seemingly flawless definition is observed on the design elements. A small die lump is noted on the reverse field, just below the tip of Clark's nose. The fields display tremendous prooflikeness, and just a few wispy, grade-limiting hairlines. Census: 4 in 64 Prooflike, 1 finer (12/08). (#77447)

6150 **1905 Lewis and Clark MS61 NGC.** A semi-prooflike representative with a penetrating strike and light canary-gold toning. Appears undergraded upon first inspection, although close study locates a thin mark on the forehead of Clark.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7448)

6151 **1915-S Panama-Pacific Gold Dollar MS64 NGC.** A beautiful honey-gold near-Gem that exhibits vibrant luster and an unmarked appearance. A tiny spot within the second C in PACIFIC will be ignored by most observers.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7449)

6152 **1915-S Panama-Pacific Gold Dollar MS65 PCGS.** Bright luster exudes from the peach-gold surfaces laced with mint-green. Well struck throughout, and devoid of mentionable contacts. (#7449)

## 1915-S Panama-Pacific Gold Dollar MS67

6153 **1915-S Panama-Pacific Gold Dollar MS67 NGC. CAC.** This desirable and unimprovable Superb Gem has light khaki-gold toning. The strike is intricate across all design details, and both sides lack any indication of contact. The obverse portrait represents a worker on the Panama Canal, although myriad collectors have undoubtedly identified him as a baseball player. Census: 50 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.*(#7449)

## Choice 1915-S Pan-Pac Two and a Half

6154 **1915-S Panama-Pacific Quarter Eagle MS64 NGC.** Satin luster and a smooth yellow-gold appearance explain the Choice designation. A nicely struck example of this interesting Barber-Morgan collaboration. The 'defiant eagle' on the reverse is nearly identical in design to the eagle on the reverse of the famous Judd-1608 1879 Schoolgirl dollar.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7450)

## Beautiful Gem Panama-Pacific 1915-S Two and a Half

6155 **1915-S Panama-Pacific Quarter Eagle MS65 NGC.** This satiny canary-gold Gem has an exemplary strike, and the obverse appears pristine. The reverse is virtually as smooth. One of the more fanciful gold commemorative designs, the obverse features both a hippocampus and a caduceus that each have obscure significance with the Panama Canal project.
*From The Peter J. Adasek, M.D. Collection.*(#7450)

## Gem 1915-S Panama-Pacific Quarter Eagle

6156 **1915-S Panama-Pacific Quarter Eagle MS65 PCGS.** A lovely apricot-gold Gem that exhibits a crisp strike and unencumbered satin luster. Surface imperfections are minor and require patience to locate. The Panama-Pacific quarter eagle was a design collaboration between present and future Chief Engravers Charles Barber and George Morgan.
*From The Findley Collection.*(#7450)

## Exemplary Gem 1915-S Panama-Pacific Quarter Eagle

6157 **1915-S Panama-Pacific Quarter Eagle MS65 PCGS.** To many eyes the 1915-S Panama-Pacific quarter eagle is the most beautiful of the small-size classic gold commemoratives, and this is certainly an exemplary specimen. The lustrous surfaces are bright yellow-gold, and examination under a loupe reveals only the light, swirling raised die polish lines characteristic of the issue.(#7450)

6158 **1916 McKinley MS64 NGC.** A beautiful canary-gold Choice gold commemorative. The strike is needle-sharp, and the reverse is essentially immaculate. Struck from moderately rotated dies.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7454)

6159 **1916 McKinley MS65 PCGS. CAC.** A green-label PCGS holder is the home for this lovely Gem 1916 McKinley gold dollar. Both sides have satiny yellow-gold luster with faint traces of rose toning. (#7454)

## Exquisite 1916 McKinley Gold Dollar, MS67

6160 **1916 McKinley MS67 NGC.** This gold commemorative exhibits a high certified population in Mint State, right through the Premium Gem level of preservation. The population drops precipitously in MS67, and higher-grade examples are absent at both NGC and PCGS. A blend of peach-gold, lavender, and mint-green patina adorns the lustrous surfaces of this MS67 coin. Sharply struck and lovingly preserved. Census: 66 in 67, 0 finer (11/08).1(#7454)

6161 **1917 McKinley MS64 NGC.** This decisively struck near-Gem provides dynamic cartwheel sheen. The fields appear immaculate, and only a trivial and solitary vertical hairline on the cheek denies a much higher grade.
*From The Omaha Collection.*(#7455)

6162 **1917 McKinley MS64 PCGS.** Pleasing terra cotta coloration is imbued with hints of pale rose on each side. A boldly struck and unmarked near-Gem McKinley gold dollar.(#7455)

## Excellent 1917 McKinley Gold Dollar MS66

6163 **1917 McKinley MS66 NGC.** An estimated 5,000 1917 McKinley dollars escaped Treasury furnaces, from the initial production of 10,000 pieces. Sales were disappointing, since many collectors who purchased a 1916 example passed on acquiring a second date of an identical type. This is a nearly pristine Premium Gem with dazzling luster and consistent straw-gold color.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7455)

## Splendid MS66 1917 McKinley Gold Dollar

6164 **1917 McKinley MS66 PCGS.** The 1917 McKinley is somewhat less available in the higher Mint State grades than its 1916 counterpart, as a function of its lower net distribution. This example boasts splendid appeal, with peach-gold surfaces accented by tinges of lavender on the high points of both sides. Certified in a green-label holder.(#7455)

## 1922 Grant No Star Gold Dollar, MS65

6165 **1922 Grant no Star MS65 NGC.** An undisturbed canary-gold Gem that has invigorating luster and outstanding preservation. The strike is exemplary save for the unavoidable incompleteness on the tree trunk left of the birthplace window. Mintages of the Star and No Star varieties were identical, and both gold issues trade at similar levels.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7458)

## Gem 1922 Grant No Star Gold Dollar

6166 **1922 Grant no Star MS65 PCGS.** Deep, rich reddish-orange coloration on both sides, strictly original, gives this lovely Gem over-the-top appeal. The tiny, swirling raised die polishing lines are characteristic of the issue. Close perusal with a loupe reveals few abrasions of any import. Certified in a green-label holder. (#7458)

## 1922 Grant No Star Gold Dollar, MS66

6167 **1922 Grant No Star MS66 NGC. CAC.** The No Star variant. It is an interesting fact that both the With Star and No Star 1922 Grant gold dollars were offered for sale to the public at the same time, but the With Star version cost $3.50 each—fifty cents more than the No Star type. Subtle yet pleasing orange-gold coloration evenly covers both sides of this Premium Gem exemplar. NGC has certified 73 examples finer as of (12/08).(#7458)

## Beautiful Premium Gem 1922 Grant No Star Gold Dollar

6168 **1922 Grant no Star MS66 NGC.** This orange-tinged high grade gold commemorative has outstanding preservation and an unimprovable strike. In retrospect, it is curious that, prior to 1983, there were several gold dollar commemorative issues, but only a single silver dollar commemorative, since collectors generally prefer large diameter coins. It may be that Farran Zerbe, who distributed several gold dollar commemoratives, simply had a preference for that denomination.
*From The Peter J. Adasek, M.D. Collection.*(#7458)

## Near-Gem 1922 With Star Grant Gold Dollar

6169 **1922 Grant with Star MS64 NGC.** This Laura Fraser design is identical to her 1922 commemorative half dollar. Fraser—wife of Buffalo nickel designer, James Earle Fraser—went on to win a design contest for the new Washington quarter in 1931, although Treasury Secretary Mellon ignored Fraser's win and selected John Flanagan instead. The current lemon-yellow gold representative is pleasing in every way and the assigned grade seems on the conservative side.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7459)

## Lustrous Near-Gem 1922 Grant With Star Dollar

6170 **1922 Grant with Star MS64 PCGS. CAC.** The lustrous surfaces on this near-Gem are canary-yellow, and close perusal with a loupe reveals only a couple of faint ticks on Grant's cheek that appear to limit an even finer grade. Most of the Grant with Star gold dollars found fall into the MS64-65 grade range, although examples up through MS67 may be had for a price.(#7459)

## 1922 Grant With Star Gold Dollar MS66

6171 **1922 Grant with Star MS66 NGC.** A shimmering and essentially pristine Premium Gem that shows full design definition apart from the unavoidable slight incompleteness on the tree trunk left of the frame house window. The Star on the obverse field has no significance apart from creating an additional variety for collectors. Commemorative distributors apparently did not learn about mintmark varieties until 1926.
*From The Peter J. Adasek, M.D. Collection.*(#7459)

6172 **1926 Sesquicentennial MS64 PCGS.** Glowing luster exudes from peach-gold surfaces tinted with hints of light tan. A few minute marks on this well struck piece preclude Gem status.(#7466)

6173 **1926 Sesquicentennial MS64 PCGS.** Highly lustrous with lovely khaki-gold toning across both sides. A couple of tiny nicks are noted near the obverse center, under low magnification.(#7466)

6174 **1926 Sesquicentennial MS64 ICG.** Both sides of this shining butter-yellow quarter eagle have splashes of orange. A well-defined and minimally marked representative of this final classic commemorative gold issue, notoriously elusive any finer.(#7466)

## Gem 1926 Sesquicentennial Two and a Half

6175 **1926 Sesquicentennial MS65 PCGS. CAC.** Dynamic luster and a full strike only begin to describe the quality of this pleasing Gem. Each side alternates between khaki-gold and pumpkin-orange, and a loupe is required to locate any minuscule marks. The final gold commemorative issue until 1984, partly because of a Federal desire to hoard gold, and partly because of a Congressional response to abuses by commemorative distributors.(#7466)

## Splendid MS65 1926 Sesquicentennial Quarter Eagle

6176 **1926 Sesquicentennial MS65 PCGS.** This is a splendid, radiant Gem striking of this difficult low-relief issue. The coloration is a deep, rich orange-gold, and fine-grained surfaces appear somewhat mattelike. While Gems are available for a price, at the Premium Gem level the certified population thins out by an order of magnitude. (#7466)

## Gem Sesqui 1926 Quarter Eagle

6177 **1926 Sesquicentennial MS65 NGC.** A gorgeous Gem that boasts sweeping luster, a precise strike, and carefully preserved surfaces. The second and final gold commemorative of the denomination. Independence Hall appears on the reverse, very similar in perspective to its rendition on the Bicentennial half.
*From The Martin L. Diffenbaucher, Jr. Collection.*(#7466)

## Lustrous 1926 Sesqui Quarter Eagle, MS65

6178 **1926 Sesquicentennial MS65 PCGS.** Glowing luster cascades over the peach-gold surfaces imbued with tints of light tan, and a well executed strike manifests itself in strong delineation on the design features. A couple of minuscule grade-defining marks are visible over each side.(#7466)

# MODERN ISSUES

## MS70 Low Mintage Bimetallic 2000-W Library of Congress Ten

6179 **2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC.** Collectors balked at the high issue price for the Library of Congress bimetallic coins, and those that purchased favored proofs. The Uncirculated variety later became one of the keys to a complete collection of modern commemoratives, since the mintage of 7,261 pieces was insufficient to meet demand. Satiny and needle-sharp with flawless surfaces.(#9784)

## Perfect MS70 Bimetallic 2000-W Library of Congress Ten

6180 **2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC.** The Library of Congress ten dollar is the only bimetallic U.S. coin. It is also the only commemorative that contains platinum. Nonetheless, collectors collectively passed, particularly on the Uncirculated finish variety. Only 7,261 pieces were struck, and those that attain the grade of numismatic perfection, MS70, are under formidable demand.(#9784)

## MODERN BULLION COINS

6181 **1993-W One-Ounce Gold Eagle PR70 Ultra Cameo NGC.** Utterly faultless, from the richly frosted and sharply struck devices to the fathomless mirrors and the contrast between them. The ultimate example of this issue.(#9875)

### Desirable 1995-W Silver Eagle, PR69 Ultra Cameo

6182 **1995-W Silver Eagle PR69 Ultra Cameo NGC.** Who knew, thirteen short years ago, that the US Mint would be producing a bullion coin this desirable? Included only in the 1995 five piece proof set and thus initially available only to those with the means to purchase nearly two ounces of gold — at mint issue prices — this coin has exploded in popularity in the interim. This example boasts seemingly flawless black on white surfaces along with tremendously deep reflectivity.(#9887)

### Popular 1995-W Silver Eagle, PR69 Deep Cameo

6183 **1995-W Silver Eagle PR69 Deep Cameo PCGS.** When the ordering period was open for 1995-W proof silver eagles, few could have predicted that the mintage would be so low, with a production of only 30,125 pieces. Today, examples are rare and in substantial demand. Like most or all, this piece is deeply mirrored around amazing frosty white devices.(#9887)

6184 **Three-Piece 20th Anniversary Silver Eagle Set NGC.** This set includes: **2006-W MS70 NGC; 2006-P Reverse Proof PR70 NGC,** a key low mintage issue; and a **2006-W PR70 Ultra Cameo NGC.** All three silver eagles are as flawless as the third party grades indicate.(Total: 3 coins)(#799977)

6185 **2006-P Silver Eagle 20th Anniversary Reverse Proof PR69 PCGS.** Near pristine surfaces display brilliant devices highlighted against frosty fields. Breathtaking eye appeal. First Strike. (#899977)

### 2006-W One-Ounce Gold Reverse Proof, PR70

6186 **2006-W One Ounce Gold Reverse Proof PR70 PCGS.** Certified by PCGS as "First Strike," this one-ounce gold fifty was struck in a special reverse proof format as part of the 20th anniversary of the American Eagle bullion issues. The Guide Book accurately credits Augustus Saint-Gaudens with the obverse motif, and Miley Busiek with the reverse design.(#89995)

## COINS OF HAWAII

### Well Struck 1847 Hawaii Cent MS64 Brown

6187 **1847 Hawaii Cent MS64 Brown PCGS.** Medcalf 2CC-2, attributed by a crosslet 4 and a berry beneath the first A in Hawaii. Glossy medium brown surfaces show traces of reddish-orange in the recesses. An attentive strike leaves strong definition on the design elements. A few minute surface and rim marks preclude Gem status. Population: 27 in 64 Brown, 5 finer (12/08).(#10965)

6188 **1883 Hawaii Ten Cents MS63 ANACS.** Despite a recorded mintage of a quarter-million examples, when Hawaii became a U.S. territory in 1883, most examples of the 1883 Hawaiian dime were likely melted—a proposition that the survival figures certainly bear out. This piece shows attractive lilac toning on each side near the rims, with silver centers and lots of eye appeal.(#10979)

6189 **1883 Hawaii Quarter MS65 PCGS. CAC.** Highly lustrous with splashes of champagne and autumn-orange toning. The portrait of the king is suitably detailed and free of significant faults. The Hawaii quarter is the most available of the island nation's coins, though Gems are elusive.(#10987)

6190 **1883 Hawaii Quarter MS66 PCGS.** This boldly defined Hawaiian quarter dollar has pale golden-brown toning with traces of iridescence over the frosty and lustrous surfaces. Population: 85 in 66, 12 finer (11/08).(#10987)

## Colorful 1883 Hawaii Quarter, MS66

6191 **1883 Hawaii Quarter MS66 PCGS. CAC.** An exceptional, toned specimen, with frosty underlying luster and sharp design details. The surfaces have vibrant steel, violet, blue, green, russet, and gold toning splashes and intermingled over both surfaces Population: 86 in 66, 12 finer (12/08).(#10987)

## Impressive 1883 Hawaii Quarter, MS66

6192 **1883 Hawaii Quarter MS66 PCGS. CAC.** Breen-8033. The first 8 in the date is recut. Breen believed this variety to be an 1883/1383 blundered date. Golden-brown toning graces the borders of this lustrous and assertively struck Hawaiian type coin. The reverse is particularly void of marks. Population: 86 in 66, 12 finer (12/08). (#10987)

## Resplendent 1883 Hawaii Quarter, MS67

6193 **1883 Hawaii Quarter MS67 PCGS. CAC.** An amazing example, this Hawaiian quarter dollar is tied for the finest that PCGS has certified. Both sides have bold design features with brilliant silver luster and exceptional eye appeal that is created through splashes of gold, russet, violet, and blue toning. Population: 12 in 67, 0 finer (12/08).(#10987)

## Well Struck 1883 Select Hawaii Half Dollar

6194 **1883 Hawaii Half Dollar MS63 NGC.** Satiny silvery white surfaces with pleasing luster characterize this Select Hawaiian half. A well executed strike delivers strong definition to the design elements, including the King's hair and beard. A linear lamination is visible in the field above the date. A few small abrasions and light scuffs confirm the numerical grade assigned.(#10991)

## Lovely 1883 Hawaiian Half Dollar, MS63

6195 **1883 Hawaii Half Dollar MS63 PCGS.** The Hawaii silver coins dated 1883 were all struck at the San Francisco Mint, on contract with the Hawaiian Islands. Existing planchets for dimes through silver dollars simplified production. This highly lustrous and sharply defined piece has brilliant silver surfaces with reflective fields and frosty devices.(#10991)

## Moderately Toned 1883 Hawaii Half Dollar, MS64

6196 **1883 Hawaii Half Dollar MS64 PCGS.** Medium intensity golden-brown patination is accented with traces of electric-blue, all of which is slightly deeper on the obverse. This is a sharply struck piece, including excellent detail on the King's hair and beard. A couple of unobtrusive marks preclude Gem status. Population: 50 in 64, 10 finer (12/08).(#10991)

## Near-Mint Four-Piece 1883 Hawaii Set

6197 **Four-Piece 1883 Hawaii Set AU58 NGC. CAC.** Each example is near-Mint with excellent luster beneath light gray-gold patina with varying degrees of rose and violet visible at the margins. Only a trace of friction affects each coin. Includes the low-mintage **dime**, **quarter**, **half dollar**, and the **dollar**, the prize of the lot.(Total: 4 coins)(#10995)

## Beautifully Toned 1883 Hawaii Dollar, MS63

6198 **1883 Hawaii Dollar MS63 PCGS.** The largest and most elusive denomination of Hawaiian coinage, the 1883 dollar had a mintage of 500,000 pieces. The present example is sharply struck, with exquisite detail on all design elements. The most outstanding feature of this specimen is the iridescent blue, green and golden-brown toning. Eye appeal is fantastic. Population: 13 in 63, 33 finer (12/08). (#10995)

## Important XF Hawaii Waterhouse Token, Medcalf 2TE-1

6199 **Undated (1855-1860) Hawaii-Waterhouse Token XF40 PCGS.** Medcalf 2TE-1. John T. Waterhouse founded the first of his two Honolulu stores in 1851. The Waterhouse token is the earliest known Hawaiian token, and because it was struck in soft pewter, it is "virtually impossible to find above EF condition," per Medcalf. This cream-gray example is sharply struck with an apparent planchet flaw beneath the beehive but no singularly distracting flaws. Listed on page 391 of the 2009 *Guide Book*.(#600500)

## Rare 1871 Half Real, MS62
## Wailuku Plantation Token, Medcalf 2TE-4

6200 **1871 Wailuku Plantation Token MS62 NGC.** Medcalf-Russell 2TE-4, but incorrectly attributed on the NGC label. The 1871 half real is by far the rarest of the six Wailuku Plantation token issues. In fact, this is the first specimen we have ever offered since we began maintaining our online auction archives. The "VI" on the reverse actually represents six and a half cents—the denomination of this issue. The state of preservation of the current offering is rarely encountered and we anticipate aggressive bidding when this rare token crosses the auction block.(#600506)

## Interesting AU50 1871 Hawaii Wailuku Plantation
## Medcalf 2TE-2 12 1/2 Cent Token

6201 **1871 Hawaii Wailuku Plantation 12.5 Cents AU50 NGC.** Medcalf 2TE-2. The narrow starfish variety. This evenly struck example has a large reverse die break along the right border, unlike the 2009 *Guide Book* plate coin shown on page 391. The surfaces are mildly granular, and a pair of thin planchet streaks (as made) are noted at 7 o'clock on the reverse.(#600503)

## Choice AU Medcalf 2TE-8
## 1879 T. Hobron One Real Hawaii Token

6202 **1879 Hawaii T. Hobron Token AU55 NGC.** Medcalf 2TE-8. These copper tokens were produced by Captain Thomas H. Hobron and could be redeemed at his general store in Kahului, Maui. Hobron's railroad line carried sugar cane from regional mills to the port of Kahului for export. A medium brown example with a surprisingly smooth appearance. No abrasions are visible. Well struck in the centers with the usual softness along the borders. Listed on page 391 of the 2009 *Guide Book*.(#600515)

6203 **1882 One Real Haiku Plantation Token—Corroded—ANACS. XF45 Details.** Medcalf-Russell TE-15. The various tokens of Hawaii were issued between 1860 and 1891 and were valued in either Spanish or American denominations. The token offered here was produced in 1882 by the Haiku Plantation—a sugar cane farm that was located on the island of Maui. The "corroded" notation on the ANACS label refers to dark debris within the recesses on both sides of this XF45 survivor. The overall look of this piece is pleasing nonetheless. Listed on page 391 of the 2009 *Guide Book*. (#600518)

### Select Mint State One 'Rial' 1882 Haiku Plantation Token, Medcalf TE-15

6204 **1882 Haiku Rial MS63 Brown NGC.** Medcalf TE-15. The Haiku Plantation one real (incorrectly spelled as 'RIAL' by the maker) token was professionally engraved, and was also struck with better equipment than other Hawaii tokens of the era, which are crude by comparison. This is a gently shimmering and evenly struck olive-brown example without any spots or marks. Listed on page 391 of the 2009 *Guide Book*.(#600518)

### 1886 Grove Ranch Token, Medcalf TE-16, XF45

6205 **1886 Hawaii Grove Ranch Token XF45 PCGS.** Medcalf TE-16. The Grove Ranch Plantation covered six square miles, producing sugar from cane. This Hawaiian token has medium-brown surfaces, with no consequential marks appearing on either side. The strike is weak on the 6 in the date. Listed on page 391 of the 2009 *Guide Book*. Population: 2 in 45, 2 finer (12/08).(#600521)

### Rare AU50 Medcalf TE-16 1886 Grove Ranch Hawaii Token

6206 **1886 Hawaii Grove Ranch Token AU50 PCGS.** Medcalf TE-16. Medcalf states that the Grove Ranch Plantation "covered 3,870 acres. In 1885 the plantation employed 110 men and produced 1,300 tons of sugar. 110 yoke oxen were used to provide the work power." This very scarce token is golden-brown and has only a few inconsequential obverse planchet flaws. All design elements are bold. Listed on page 391 of the 2009 *Guide Book*. Population: 2 in 50, 0 finer, only 5 in all grades (11/08).(#600521)

### Elusive 1887 Hawaii Grove Ranch Plantation Token, Medcalf TE-17, AU50

6207 **1887 Hawaii Grove Ranch Plantation 12 1/2 AU50 Brown NGC.** Medcalf TE-17. The 1887 Grove Ranch Plantation 12-1/2 cent token is notably rarer than the 1886 counterpart, despite the similarities in design between the two pieces. The present AU50 example offers problem-free surfaces with a bold strike, which is somewhat off-center toward 6 o'clock on the obverse. (#600524)

## MISCELLANEOUS

6208 **Ribbon and Tags From a Panama-Pacific Set.** The companion-lot to the five-piece Farouk Panama-Pacific set offered in Platinum Night, consisting of a purple ribbon and four purple tags from a cased set of Panama-Pacific pieces. Tags are for the gold dollar, quarter eagle, and two tags for the quintuple eagles, all sandwiched between the layers of a white-and-gold plastic frame. Slight fraying on ribbon and wrinkling of cards, but pleasing and legible.(#661000)

# ERRORS

## Rare Near-Gem 1863 Indian Cent With Struck-Through Reverse

6209 **1863 Indian Cent—Reverse Struck-Through—MS64 NGC.** Lustrous and well preserved with nearly mark-free surfaces. A popular Civil War date that is quite elusive in high grades. The reverse shows a broad strike-through across the right side of the periphery, between 2 o'clock and 4 o'clock. Some of the obverse details are mushy, probably as a result of the same striking anomaly. An interesting and rare Indian cent error coin.

## 1864 Indian Cent, L on Ribbon, 20% Off-Center MS64 Brown

6210 **1864 Indian Cent, L On Ribbon—Struck 20% Off Center—MS64 Brown PCGS.** The strike is off-center toward 4:30, but enough of the date remains that the top half of the 4 in the date is still evident, as is the L on the ribbon. The glossy surfaces are pleasing and medium-brown. An interesting error to expand one's Indian cent or error holdings.

## Distinctive Broadstruck PR66 Brown 1885 Cent

6211 **1885 Indian Cent—Broadstruck—PR66 Brown NGC.** Beautifully detailed chocolate-brown surfaces show elegant aqua and sapphire-violet overtones. Preservation is excellent. Most distinctive about this piece is that it is an error, struck out-of-collar with the dentils substantially elongated from the norm and a crescent of unstruck surface area at the upper obverse.

## 1892 Full Brockage Indian Cent, AU55 Struck 10% Off Center

6212 **1892 Indian Cent—Struck 10% Off Center—Full Brockage—AU55 PCGS.** A delightful and lustrous brown Indian cent struck 10% off center at 10 o'clock, and a wonderful full brockage of the obverse design, combine to make this one of the most striking errors in the present sale.

## Interesting 35% Off-Center 1902 Cent, MS63 Brown

6213 **1902—Struck 35% Off-Center—MS63 Brown PCGS.** An attractive example of an off-center Indian cent, shifted 35% off-center toward 2 o'clock, a simple and clean error that would work equally well as an error collector's example or a non-specialist's conversation starter. Generally olive-brown surfaces show areas of lighter yellow-orange and are smooth save for the occasional small dig.

## 1918 Cent Struck Nine Times, Fine 15

6214 **1918 Lincoln Cent—Struck Nine Times—Fine 15 ANACS.** The lower obverse shows numerous bust truncations, and the upper reverse has multiple impressions of PLURIBUS, each from a different strike. The first strike was apparently normal, but the piece failed to eject from the dies. Instead, it rotated slightly clockwise between strikes, and also gradually moved off center toward 1 o'clock. This problem-free chocolate-brown mint error was likely a pocket piece for its lucky finder.

## Desirable Choice AU Multiple-Strike Steel Cent

6215 **Undated (1943) Steel Cent—Struck Twice, Second Strike 45% Off-Center—AU55 PCGS.** The first strike on this steel cent was centered, but the piece failed to clear the dies, and it received a second blow approximately halfway off-center to the south, obscuring the date and mintmark area. Generally steel-gray with a degree of discoloration on the reverse. Steel cent errors are highly prized by collectors due to their status as one-year-only coins.

6216 **1944 Lincoln Cent—Flipover Double Struck in Collar, Two Dates—XF45 PCGS.** Struck twice by the dies, with the obverse of the second strike over the reverse from the first strike. Such errors often show a partial collar, but the present piece was fully forced into the collar (despite its wider diameter) by the force of its second strike. Many design elements from the understrike are visible, including all four date digits near PLURIBUS. A smooth chocolate-brown cent with moderate wear on the portrait.

## 40% Off Center Lincoln Cent on a Peru Half Sol Planchet

6217 **Undated Lincoln Memorial Cent—Struck 40% Off-Center on a Peru Half Sol Planchet—MS66 NGC.** 2.2 gm. Widely off center toward 3 o'clock. No date is evident, though the U.S. Mint struck half sol pieces for Peru only in 1976. Light to medium chestnut-tan toning visits lustrous, smooth surfaces.

## Gem 1964 Cent on a Clad Dime Planchet

6218 **1964 Lincoln Cent—Struck on a 2.3-gm Clad Dime Planchet, Transitional Off Metal—MS65 PCGS.** Although the cent alloy did not change between 1964 and 1965, 1964-dated cent dies were apparently in use in 1965, a year when both clad and silver alloy dimes were struck. This gently shimmering piece is remarkably smooth, and features faint tan and cream-gray toning. Slightly uncentered toward 3 o'clock, with TRUST largely off the flan.

## 1964-D Cent Struck Over 1963-D Lincoln Cent, MS64 Brown

6219 **1964-D Lincoln Cent—Struck Over 1963-D Lincoln—MS64 Brown NGC.** The strike is heads-to-tails, so that the Lincoln Memorial reverse appears, slightly rotated beneath the 1964-D obverse. On the 1964-D reverse, the Lincoln portrait prominently occupies the center, with the 1963-D plain at the right corner of the Memorial steps. Despite the Brown designation, generous traces of red appear in the protected areas around the devices.
***See: Video Lot Description***

## Novel PR65 Red and Brown 1971-S Cent Obverse Double Struck in Collar

6220 **1971-S Lincoln Cent—Obverse Double Struck in Collar—PR65 Red and Brown PCGS.** To the casual observer, this Memorial S-mint proof cent may seem like "just another toned Gem." Closer examination, however, reveals distinct doubling from multiple impressions on Lincoln's profile. The obverse is richly toned blue-green and violet, while the reverse has warm pumpkin-orange color that justifies the Red and Brown designation.

## Dramatic Foldover Strike Zinc Lincoln Cent MS65 Red and Brown

6221 **Undated Zinc Lincoln Cent—Foldover Strike—MS65 Red and Brown NGC.** 2.5 gm. Areas of zinc-blue shine through otherwise reddish-orange and mahogany surfaces. This piece was struck with the planchet nearly vertical between the dies, and the impression was only partial, leaving the center of the piece blank and folded in on itself, forming a complete loop. A fascinating error.

## Choice Red and Brown Foldover Strike Lincoln Cent

6222 **Undated Lincoln Memorial Cent—Foldover Strike—MS64 Red and Brown NGC.** Post-1982 copper-plated zinc composition. A cent planchet was aligned vertically relative to the dies at the time of strike. The dies promptly folded the coin in half and struck the semi-circle portion, with a broad seam missed by the dies. The net effect is a foldover planchet struck widely off center toward 2 o'clock. Much brick-red is present, along with silver-gray from the zinc interior.

## Superb Gem 1985 Cent Struck on a 1985-P Dime

6223 **1985 Cent—Struck on a 1985-P Dime—MS67 NGC.** A great example of the always-popular double denomination striking error, this interesting piece shows equal definition of both designs on the obverse, but the reverse displays much stronger detailing of the Memorial cent. Bright, superb mint luster and exceptionally clean surfaces combine for winning eye appeal.

6224 **1991 Lincoln Cent—Struck 5% Off-Center on a (1991-P) Roosevelt Dime—MS65 NGC.** The head of Roosevelt gazes north relative to Lincoln's portrait. The P mintmark from the dime is visible on Lincoln's shoulder, but most of the dime date is effaced by the overstrike. Lustrous and essentially untoned.

## Double Denomination 2000 Cent on a 2000-P Dime, MS67

6225 **2000 Lincoln Cent—Struck on a 2000-P Roosevelt Dime—MS67 NGC.** The dime date is faint but evident. The dime mintmark is bold, and the cent date is readable. Roosevelt gazes northeast relative to the Lincoln Memorial. The flame of the torch rests on Lincoln's shoulder. Brilliant and highly lustrous with exemplary surfaces.

## Desirable 2001-P 11 Cent Piece, MS67 2001-P Cent Struck on a 2001-P Roosevelt Dime

6226 **2001 Lincoln Cent—Struck on a 2001-P Roosevelt Dime—MS67 NGC.** A highly lustrous piece with excellent eye appeal, this spectacular error is fully brilliant with frosty light gray surfaces. The Roosevelt dime landed in the penny press almost exactly upright, with Lincoln's entire profile framed by the outline of Roosevelt's head.

## (1864-72) Two Cent With Obverse Die Cap MS64 Brown

6227 **(1864-72) Two Cent—Obverse Struck Through Capped Die—MS64 Brown NGC.** The reverse is that of the regular Shield two cent piece in copper, but the obverse is struck through a capped reverse die that has left a deep, incused and reversed impression of the 2 on the obverse, along with fainter details from the other die details.

6228 **1865 Three Cent Nickel—Struck 15% Off Center—MS63 PCGS.** Struck off center toward 4 o'clock on the obverse. Attractive surfaces for the grade, with just a tiny speck located below the O in OF on the obverse. Lightly toned in powder-blue and almond-gold. The first column of the denomination is unevenly struck, otherwise the devices are well struck. Both the obverse and reverse show clash marks, common to this issue.
*Ex: The Larry Rausch Collection, Part Two (Heritage, 1/2005), lot 12159.*

## 1868 Shield Nickel, AU Details Struck on a Three Cent Nickel Planchet

6229 **1868 Shield Nickel—Struck on a Three Cent Nickel Planchet—Environmental Damage, Edge Damage—NCS. AU Details.** 1.97 Grams. Slightly rough light gray surfaces with a nicely centered impression; the date and most of the central design motifs are visible on this piece, despite the slightly smaller diameter planchet.

6230 **1867 No Rays Shield Nickel—15% Off Center & Cracked Planchet—AU55 PCGS.** Struck off center toward 11:30 with the motto completely off the flan. The steel-gray surfaces have satin luster and are unabraded. The flan is cracked at 7:30. On the reverse, the crack is accompanied by a pair of minute aqua flecks.

6231 **1874 Shield Nickel—Struck 20% Off Center—XF45 PCGS.** Struck approximately 25% off center toward 11 o'clock. IN GOD WE TRUST is fully absent from the obverse, while only a sliver of the TS in CENTS is present. A series of spindly die cracks (as made) journey throughout the margins of this attractive and bold silver-gray piece.
*Ex: Portland Signature (Heritage, 3/2004), lot 6993; Long Beach Signature (Heritage, 9/2004), lot 9097, which realized $1,782.50.*

## MS63 1889 Liberty Nickel Struck 15% Off Center, Full Date

6232 **1889 Liberty Nickel—Struck 15% Off Center—MS63 PCGS.** Off center toward 3:30, with the upper portion of AMERICA off the flan. The right-side borders show the peripheral distortion common to the error type. The date is complete. Dusky tan-brown and dove-gray toning. Satiny and unabraded with intricate design definition.

6233 **1900 Liberty Nickel—Struck on a Nicaragua Five Centavos Planchet—AU50 PCGS.** The U.S. Mint struck copper-nickel Nicaragua five centavos in 1899. A planchet for that type found its way between Liberty nickel dies. Because the flan is undersized, the upper left stars are flatly struck, and the rim is absent near 5 o'clock. There is no evidence of an undertype.

## Near-Gem 1905 Liberty Nickel Struck on a Thin Foreign Planchet

6234 **1905 Liberty Nickel—Struck on a Foreign Planchet—MS64 NGC.** 2.7 grams. The flan appears to be a nickel-based composition, considering the light gray color and hints of champagne toning, although silver is also a possibility. This piece has considerable weakness, especially on the reverse, resulting from the thin planchet that is half the weight of a nickel but nearly the same diameter.

## Mint Error 1906 Liberty Nickel, Struck on Cent Planchet, AU50

6235 **1906 Liberty Nickel—Struck on Cent Planchet—AU50 PCGS.** Deep red-brown and iridescent coloration inhabits the surfaces of this interesting and rare mint error. A 1906 Liberty nickel was struck on an Indian cent planchet; either accidentally or, perhaps, intentionally by a "midnight minter". Most of the design features were boldly struck, and the piece only shows faint evidence of light circulation, indicating that it was identified fairly quickly by someone as an anomaly, and withdrawn from the channels of commerce.

## 1918-Dated Nickel on a Cent Planchet AU58

6236 **1918-? Buffalo Nickel—Struck on a Cent Planchet—AU58 PCGS.** Dark chocolate-brown in color and clean for the grade. We note only one thin mark on the bison's hide. A well centered example, probably from the Philadelphia Mint although the mintmark area is off the flan. A good strike aside from STATES, which is softly brought up.
*Ex: Larry Rausch Collection, Part Two (Heritage, 1/2005), lot 12168, which realized $5,750.*

## 1919 Buffalo Nickel on a Cent Planchet, MS61

6237 **1919 Buffalo Nickel—Struck on a Cent Planchet—MS61 Brown NGC.** The date is fully visible and so is the mintmark space, although this Philadelphia Mint product lacks a mintmark. The surfaces are yellowish-brown with a few tiny carbon flecks on each side, obviously limiting the grade.

## Broadstruck 1919-D Near-Gem Five Cent

6238 **1919-D Buffalo Nickel—Struck 5% Off Center—MS64 PCGS.** Although designated as an off center strike by PCGS, this piece has the look of an uncentered broadstruck, since no design elements are off the flan. A wide area of unstruck surface is centered near 12 o'clock. The peripheral legends and the tail are distorted toward the rim, as made. Not only rare as a mint error, the 1919-D is infrequently encountered in better Mint State grades. The smooth surfaces are accompanied by beautiful gold, rose, olive, and sky-blue colors.

## 1920 Dated Buffalo Nickel
## Split Planchet After Strike, MS64

6239 **1920-? Buffalo Nickel—Obverse Only Split Planchet—MS64 PCGS.** This 1920-dated nickel split in two after the strike. This is considered a mint error, because the planchet was improperly made. The slate-gray obverse is intricately struck, but the reverse displays only a faint, reversed, and incused impression of the portrait. The green-gray reverse is unexpected smooth, without the rough woodgrain texture often seen on a split planchet error.

## Splendid 1936 Broadstruck Nickel, MS62

6240 **1936 Buffalo Nickel—Broadstruck—MS62 NGC.** A wonderful, sharply detailed and highly attractive Buffalo nickel, struck out of the collar and slightly off-center toward 4 o'clock. Both sides have excellent light gray surfaces with full mint brilliance and faint traces of gold toning.

## Double Struck 1961-D Nickel
## Second Strike 50% Off Center, AU58

6241 **1961-D Jefferson Nickel—Double Struck, Second Strike 50% Off Center—AU58 NGC.** The first strike was normal, but the piece was struck a second time widely off center toward 10:30. Both dates and mintmarks are visible. Lustrous and smooth with predominant cream-gray toning.

## Jefferson Nickel Struck Over a 19??-P Dime

6242 **Undated Jefferson Nickel—Double Denomination on Struck 19??-P Dime—MS60 PCGS.** This coin began its life as an ordinary dime, but it somehow found its way between Jefferson nickel dies. By a remarkable coincidence, the portraits of the overtype and undertype are **perfectly aligned**, such that it appears that Roosevelt's profile rests above Jefferson's collar. A partial date and P mint mark (from the dime dies) are legible on the lower right obverse. The nickel date and mintmark are off the flan. The portrait(s) show a few pinscratches made by a curious finder.

6243 **1993-P Jefferson Nickel—On Defective Clad Planchet—MS65 NGC,** 2.5 gm. A deep planchet flaw removes Jefferson's face, and gives the head a horse-like outline. The edge has several defects, which affect the date although the digits are identifiable. Dashes of orange toning are present. The dome of Monticello is softly struck. A lustrous and wavy piece for the error specialist to ponder over. Also, a **2000-P Jefferson Nickel—Struck on a Defective Clad Planchet—MS63 Full Steps NGC,** 4.81 gm, mostly toned orange-red but with several slate-gray portions that appear of different alloy, the surface is rough (as made) near 1 o'clock on the obverse and 5 o'clock on the reverse.(Total: 2 coins)

## MS66 Red 2000-D Nickel Struck on a Struck 2000-D Cent

6244 **2000-D Jefferson Nickel—Struck on a Struck 2000-D Cent—MS66 Red NGC.** The 2000 date of the cent is faint but readable, near UNITED. The cent mintmark is on the lower left border of Monticello. The nickel date and mintmark are clear, although one of the holder's four tabs partially obscures the D mintmark. Bright orange-red with dazzling luster.

## Incredible 1857 Off Center Half Dime, MS64

6245 **1857 Seated Half Dime—Struck 30% Off Center—MS64 PCGS.** Struck off center at 12 o'clock, the centering permits the date to be entirely visible but lacks the mintmark area. Probably a product of Philadelphia, although it would be interesting to search for a die characteristic that might identify this as a New Orleans product. The surfaces are highly lustrous with exceptional aesthetic appeal.

## Fascinating 1875-CC Dime, AU50 Struck 12% Off Center

6246 **1875-CC Mintmark Above Bow Seated Dime—Struck 12% Off Center—AU50 PCGS.** This lustrous, lightly circulated Carson City dime is toned in rich lavender and green-gold hues. Struck 12% off center towards 1 o'clock (obverse), however much of the detail remains, especially the all-important date and mintmark. Roller marks are visible throughout the unstruck areas, which gives us a clear picture of how the planchets appeared before being struck. Carson City mint errors are rare.

## 5% Off Center 1887 Dime MS64

6247 **1887 Seated Dime—Struck 5% Off Center—MS64 PCGS.** Noticeably off center toward 6 o'clock, although almost all of the date is present. This lustrous near-Gem is toned olive-green and rose-red. The strike is precise, even on the cereal grains near the top of the wreath. An important mint error on a 19th century type.

## Attractive 1889 Dime, AU55 Struck 12% Off Center

6248 **1889 Seated Dime—Struck 12% Off Center—AU55 PCGS.** Struck off-center towards 12 o'clock. This is a stunning example with satiny, reflective fields and beautiful iridescent hues of lavender, amber, and electric-blue throughout. A few minor abrasions are visible on the blank margin, however, the fields of the struck portion are exceptionally pleasing and attractive. An interesting mint error combined with wonderful eye appeal.

## Rare Off Center 1890 Seated Dime, MS63

6249 **1890 Seated Dime—Struck 20% Off Center—MS63 PCGS.** Struck off-center at 11 o'clock. This is a wonderful, fully brilliant Mint State error, accented by just a trace of golden toning at the border. Sharply struck and highly desirable, a fascinating and fantastic 19th century error.

### 40% Off Center, Mirror Reverse Brockage
### Undated Mercury Dime MS63

6250 **Undated Mercury Dime—40% Off Center with Mirror Reverse Brockage—MS63 NGC.** Struck widely off center toward 6 o'clock, relative to the reverse. The obverse shows an incused and reversed image of the obverse, a perfect (first strike) brockage. A previously struck dime (not included) stuck to the obverse die, and the present piece was fed off center between the reverse die and the reverse of the already struck coin. Brilliant with full bands and clean surfaces.

6251 **1920 Mercury Dime—Struck 20% Off Center—MS64 PCGS.** Noticeably off center toward 7 o'clock. STATES is distorted as it spreads toward the rim, and a small portion of the date is absent from the flan. The major devices are razor-sharp. Lustrous and unabraded with light gunmetal toning.

### 20% Off Center, MS63 Full Bands
### 1945-Dated Mercury Dime

6252 **1945-? Mercury Dime—Struck 20% Off Center—MS63 Full Bands NGC.** Possibly one of the few 1945 dimes with full bands, although the mintmark location is off the flan and the piece may have been struck at Denver or San Francisco. Struck off center toward 10:30, affecting portions of ONE, UNITED, and LIBERTY. The major devices are needle-sharp. Lustrous and smooth with olive-gray toning.

6253 **Undated 90% Silver Roosevelt Dime—Double Struck, Both Off Center—MS64 NGC.** Likely, this piece was misfed between two sets of dime dies, and both strikes occurred at the same moment. One strike is double-sided, and is 75% off center toward 6 o'clock. The other strike is 60% off center toward 6 o'clock, and is uniface obverse, the reverse blocked by a planchet (not included).

### Reverse Half of Clad Layer
### of a Roosevelt Dime MS67

6254 **Undated Roosevelt Dime—Reverse Half of Clad Layer—MS67 NGC.** 0.38 gm. When viewed from the reverse, this proof dime appears slightly wavy but otherwise normal. The obverse, however, shows a blurry, incused, and reversed image of the reverse. The reverse outer clad layer cleanly separated from the copper core after the strike, due to improper bonding between the layers.

### Triple Struck 1970-D Dime MS66
### Saddle Strike with Chain Edge

6255 **1970-D Roosevelt Dime—Triple Struck, Saddle Strike with Chain Edge—MS66 NGC.** The first strike was apparently normal. The piece improperly ejected and found its way between sets of dies (modern presses have multiple sets of dies) and was simultaneously struck two additional times, both off center. The force of the additional strikes severely bent the coin near its center (hence the 'saddle' nomenclature). When the edge from the initial strike is viewed near 9 o'clock, it has the shape of a chain. Lustrous with moderate gold and lilac toning.

### Gem Proof 1973-S Dime
### Struck on a Liberia 10 Cent Planchet

6256 **1973-S Roosevelt Dime—Struck on a Liberia 10 Cent Planchet—PR65 NGC.** 1.8 gm. The U.S. struck several denominations of Liberian coinage annually between 1968 and 1975. This dime appears normal at first glance, but the reverse has a multi-thread lintmark at 4:30, and a (mostly) retained horizontal lamination crosses the reverse between 4:30 and 7:30. Another lengthy but fainter (mostly) retained reverse lamination is noted between 10:30 and the oak branch.

## PR67 1975-S Dime Struck on a Philippines 10 Sentimo Planchet

6257 **1975-S Roosevelt Dime—Struck on a Philippines 10 Sentimos Planchet—PR67 PCGS.** 3.86 gm. The United States struck various denominations for the Philippines prior to 1978. A 1975 10 sentimo has a copper-nickel-zinc alloy. This is a sharply struck mint error with milky golden-gray and olive toning. The left border shows slight weakness of strike. Wrong planchet errors are unusual on U.S. proof coins.

## 1999-D Roosevelt Dime Broad Struck on a Cent Planchet

6258 **1999-D Roosevelt Dime—Broad Struck on a Cent Planchet—MS65 Brown.** 2.5 gm. Under most circumstances, wrong-metal errors involving planchets of larger diameter than the design allows are impossible; the flan simply would not fit due to the presence of the collar. In a broadstrike, however, coins can be struck out-of-collar, which would bypass that restriction and permit the striking of an unusual error. Such was the case with the origin of this fascinating piece.

Blue-green, violet, and gold-orange elements grace each side of this Gem. Significant unstruck margins surround the central elements. The devices are sharp, as one might expect from the excess metal, and the eye appeal is strong. An exciting and interesting error that seems impossible at first glance.

## MS64 2007-D Dime Triple-Struck on Aluminum Feeder Finger

6259 **2007-D Roosevelt Dime—Triple-Struck on 12-gm Aluminum Feeder Finger—MS64 PCGS.** The aluminum feeder finger that carries the blank planchets for striking managed to insert itself between the dies, where it was struck three times in horizontal progression before being ejected as a jagged double triangle. Three images of Roosevelt and the reverse are visible, along with one 2007-D date and mintmark.

## Impressive 1861 Quarter, AU58 Struck 15% Off Center

6260 **1861 Seated Quarter—Struck 15% Off Center—AU58 PCGS.** Struck 15% off-center towards 4 o'clock. This is an amazing Seated Liberty quarter error with deep, original slate-gray patination throughout. The details are boldly impressed and the majority of the design is visible, including the date. Civil War-era mint errors are rarely offered for sale, especially when in a wonderful state of preservation like this piece.

## 1951 Washington Quarter Struck on 1951 Lincoln Cent, MS66 Brown

6261 **1951Washington Quarter—Struck on a 1951 Lincoln Cent—MS66 Brown NGC.** Traces of the undertype are visible on both sides. Faint lines from the wheat ears are present on the obverse above IN GOD WE TRUST and near 3 o'clock. The 51 in the cent date is legible near the eagle's right (facing) wingtip, and the cent's Y in LIBERTY is ghostly apparent above the arrowheads. A well struck and satiny chocolate-brown Premium Gem with carbon-free and unabraded surfaces. The cent-on-dime is the most common double denomination Mint error. The quarter-on-Wheat cent is rare, especially in such exemplary quality.

## 1953 Quarter on a Dime Planchet AU58

6262 **1953 Washington Quarter—Struck on a Silver Dime Planchet—AU58 PCGS.** Close to 50% of the date is present, and much of the mintmark area is also on the flan. LIBERTY and QUARTER DOLLAR are completely absent. Toned cream-gray with glimpses of almond-gold. Satiny and unabraded with a few small dark flecks on the reverse.

## 1956 Washington Quarter on a Dime Planchet, AU58

6263 **1956 Washington Quarter—Struck on a Silver Dime Planchet—AU58 PCGS.** Both sides of this wonderful error are fully brilliant with satiny silver luster and traces of pale gold toning. Just enough of the date is visible to identify, but the Mint is unknown, although presumably Philadelphia.

## Gem 1973-D Quarter on a Cent Planchet

6264 **1973-D Quarter—Struck on a Cent Planchet—MS65 PCGS.** No color category assigned by PCGS, but a Red and Brown example with varying degrees of copper-orange, rose-violet, and mahogany. The small planchet has resulted in cut-offs on the peripheral elements, including the date, but enough of the date is present to identify, and the Denver mintmark is intact. Well-preserved and fascinating.

## 5% Off Center AU 1827 Half Square Base 2, O-112

6265 **1827 Square Base 2—Struck 5% Off Center—AU50 PCGS.** O-112, R.2. Struck noticeably off center toward 7:30, taking portions of UNITED STATES off the flan. 85% of the date is present. The rim is unusually wide near 1:30, and the dentils are double struck within that region, although no evidence of a double strike is seen elsewhere. A minimally worn example with rich orange-tan, cream-gray, and gunmetal-blue toning.

## 1954 Franklin Half On a Quarter Planchet, MS66 FBL

6266 **1954 Franklin Half MS66 Full Bell Lines—Struck on a 25 Cent Planchet—NGC.** 6.36 gm. A well centered wrong planchet error, with essentially all of the portrait and bell present. The date and mintmark area are also fully intact. Peripheral legends are partly off the flan, with LIBERTY nearly absent. Brilliant and beautiful. NGC has certified only seven pieces as MS66 Full Bell Lines with none finer (11/08), although error collectors will likely outbid any Registry specialists.

## 1962-D Franklin Half Dollar, MS67 Struck on a Nickel Planchet

6267 **1962-D Franklin Half—Struck on a Nickel Planchet—MS67 NGC.** 5.0 grams. LIBERTY and HALF DOLLAR are off the undersized flan, which is uncentered toward 10 o'clock. Satiny and essentially brilliant with immaculate surfaces. Surprisingly, neither NGC nor PCGS has certified any 1962-D half dollars above the MS66 level, the present mint error excepted (8/07). A desirable wrong planchet combination, especially with such spectacular preservation.

## Pleasing 1963-D Franklin, AU58 Struck on a Silver Quarter Planchet

6268 **1963-D Franklin Half—Struck on a Silver Quarter Planchet—AU58 PCGS.** This example is fully brilliant with a trace of rub and a short scratch in the left obverse field. Both sides have hints of peripheral gold and iridescent toning that adds to the overall eye appeal of this piece.

### Borderline Uncirculated Kennedy Half Struck on a Clad Dime Planchet

6269 **Undated Kennedy Half—On a Clad Dime Planchet—AU58 PCGS.** The peripheral legends are absent, but the profile and most of Kennedy's head is present, as is virtually all of the eagle. An untoned and satiny piece with smooth surfaces and scant evidence of actual circulation. A scarce wrong planchet combination.

6270 **Undated 40% Silver Kennedy Half—Struck 65% Off Center—MS67 NGC.** The alloy indicates the piece was struck between 1965 and 1970. The date and mintmark location are off the flan, as it is widely struck off center toward 4:30. Peripheral lettering is distorted, characteristic of the error category. The struck portion appears immaculate.

### Near-Gem 1964 Kennedy Half Struck on a Silver Quarter Planchet

6271 **1964 Kennedy Half—Struck on a Silver Quarter Planchet—MS64 PCGS.** Type Two Reverse. The eagle is perfectly centered, but the peripheral legends are partly to fully absent. About 50% of the date is visible, as is all of the mintmark area. This lustrous near-Gem mint error has golden-brown and chestnut-gray toning. Appears a Type One planchet, but the holder makes it difficult to see the rim.

### Dramatic 1964 Kennedy Half Die Cap Set

6272 **1964 Kennedy Half—Die Cap Set—PCGS.** A matched set that includes both an obverse die cap and what is likely the last reverse impression taken from it. The former coin, labeled **Coin #1 MS64 PCGS**, is a die cap of significant depth with excellent detail on the portrait. The latter coin, labeled **Coin #2 MS66 PCGS**, has similarly bold detail on the eagle. Each item is essentially uniface with null detail on the other side.(Total: 2 coins)

6273 **1964 Kennedy Half—Struck 25% Off Center & Cupped—MS65 PCGS.** Type Two Reverse. Struck widely off-center toward 3 o'clock. Although the final digit of the date is not present, this is identified as a 1964 half dollar as it is 90% silver. A lovely Gem with brilliant silver surfaces and satiny luster. The force of the strike caused the unstruck portion to bend into a cupped shape.

### 1964-D Half Struck on a Silver Quarter Planchet MS62

6274 **1964-D Kennedy Half—Struck on a Silver Quarter Planchet—MS62 PCGS.** The date is off the flan, but the Denver mintmark near the branch stem confirms it is a 1964-D. No mintmark is present on the 1965 to 1967 dates, and the mintmark was moved to the obverse is 1968. This slightly oval-shaped wrong planchet error is uncentered toward 4 o'clock. The portrait and eagle are complete. Kennedy's hair is slightly granular, and the shield has a faint, thin mark. Satiny and smooth overall.

### 40% Silver Kennedy Half Struck 65% Off-Center, MS66

6275 **(1965-70) Kennedy Half—Struck 65% Off-Center—MS66 NGC.** The visible devices—the top half of Kennedy's head and the lower reverse—are sharp, although the majority of this error shows an empty void. This well-preserved off-center error is shifted toward 6 o'clock on the obverse. The 40% silver composition narrows down the date range.

## 1969-D 40% Silver Half, MS63 Double Struck

6276 **1969-D 40% Silver Kennedy Half—Double Struck—MS63 NGC.** This 40% silver Kennedy half dollar almost cleared the dies after the first strike. A fraction of a second of inopportune timing resulted in the planchet being struck twice, with the second hit about 95% off center near the 12 o'clock position. Even with such a tiny area captured by the subsequent strike, the first three digits of the date are clearly visible. An interesting error that is rarely seen on a 40% silver half.

## Double Struck, Second Strike Off Center AU58 1977-D Kennedy Half

6277 **1977-D Kennedy Half—Double Struck, Second Strike Off Center—AU58 NGC.** The first strike was normal, but the piece was struck again, 85% off center toward 7 o'clock. The second strike was uniface obverse. Medium steel-blue and almond-gold toning. Smooth aside from an inconspicuous scratch inside the right obverse rim, relative to the first strike.

## Double Struck 1991-P Half, MS64 Prooflike

6278 **1991-P Kennedy Half—Double Struck—MS64 Prooflike ANACS.** Dramatically double struck in the upper left quadrant (viewing obverse). The first four digits of the date are visible on the second strike. Light golden toning evenly blankets both sides and the underlying surfaces have a pleasing reflectivity, which prompted ANACS to designate this piece as Prooflike.

## 1991-D Kennedy Half, MS62 Struck 50% Off Center

6279 **1991-D Kennedy Half—Struck 50% Off Center—MS62 PCGS.** This piece is struck about 50% off-center at 1 o'clock. The light gray surfaces are satiny and lustrous with only a few abrasions, mostly limited to the blank or unstruck portion of the planchet, probably remaining from before this piece was created.

## Interesting Select Proof 1864 Seated Dollar Double Struck in Collar

6280 **1864 Seated Dollar—Double Struck in Collar—PR63 PCGS.** The immense pressures used to strike proofs have obliterated almost all of the undertype, but the ghost of an eagle's wing appears in the upper right reverse field. Surfaces are lightly toned silver-blue and gold-gray. Contact marks on Liberty's upper body account for the grade.

## Rare 1883-O Off Center Dollar, MS64

6281 **1883-O Morgan Silver Dollar—Struck 10% Off Center—MS64 PCGS.** A near-Gem example that was struck 10% off center towards 6 o'clock. Both sides are fully brilliant without any evidence of toning. From the specialist's viewpoint, this is extremely rare. The typical off center Morgan dollar is apt to be 5% or less off center. Any that meet or exceed a 10% deviation—and retain a full date—are extraordinarily important.

## Die Adjustment Strike on a 1921 Morgan Dollar, Misaligned Obverse

6282 **1921 Morgan Dollar—Obverse Misaligned, Die Adjustment Strike—NGC.** In-house graded AU58, with little or no actual wear. Possibly a branch mint issue, since the mintmark area is indistinct. Poorly struck throughout most of the design, although the eagle's left (facing) wing and certain other areas are brought up. The obverse is misaligned several degrees toward 11 o'clock and has a broad, sloping rim near 5 o'clock.

## 5% Off Center AU 1921-D Morgan

6283 **1921-D Morgan Dollar—Struck 5% Off Center—AU50 PCGS.** Struck noticeably off center toward 11:30. All legends are fully intact, but the rim is wide at 5:30 on the obverse and opposite at 12:30 on the reverse. Well struck on the wreath and cheek, and in fact sharper than most Uncirculated '21-D Morgans. A satiny piece, richly toned golden-brown and aquamarine. The obverse field has faint marks.

## Stunning 1921 Broadstruck Peace Dollar Rare Error, AU58

6284 **1921 Peace Dollar, Broadstrike Error, AU58 NGC.** Broadstrikes are spectacular errors that occur when the collar die is not in position when a coin is struck. The unrestrained planchet expands and distorts, creating the Broadstruck error. The present coin is an attractive example of this error, with full mint luster and a sharp strike. This error is extremely rare, and is avidly pursued by error specialists. A search of auction records reveals that Heritage has never handled a specimen of this particular error before.

6285 **90% Silver Dollar Planchet NGC.** 26.8 gm. Very close to the 26.73 gm statutory weight of 1840 through 1935 U.S. Silver dollars. A Type Two planchet with raised rims from a journey through the upset mill. The planchet is virtually untoned and has its share of hairlines and small marks.

6286 **Undated 90% Silver Blank Planchet.** A Type One blank planchet for a silver dollar in 90% silver, before going through the upsetting process. The surfaces show faint hairlines and minor ticks on each side.

## Ike Dollar Struck Off-Center on Kennedy Planchet, MS65

6287 **(1971-78) Eisenhower Dollar—Struck 12% Off-Center on Blank Half Dollar Planchet—MS65 PCGS.** The Eisenhower dollar is dateless due to the off-center strike, but the presence of the design presumably narrows down the date. The piece is struck off-center toward 7:30 on an unstruck clad half dollar planchet, with some dishing and warping at the juncture of the struck and unstruck areas.

## Interesting Choice 1971-D Eisenhower Dollar Struck on a Half Dollar Planchet

6288 **1971-D Eisenhower Dollar—Struck on a Half Dollar Planchet—MS64 NGC.** 11.2 gm. A meeting of the little-used denominations, the massive Eisenhower dollar design rendered on the slightly smaller and just as unpopular half-dollar-size planchet. Faintly toned gold-gray overall with occasional milk-spotting at the margins. The design is shifted toward 6 o'clock as reckoned by the obverse, cutting off the entire word LIBERTY and the denomination completely but keeping the date and mintmark intact.

## 2% Defective, Partial Split Layer on an Ike Dollar Planchet

6289 **Eisenhower Dollar Planchet—2% Defective, Partial Split Layer—MS60 PCGS.** This Type Two planchet has a cigar-shaped lamination at 3 o'clock (relative to the holder) that exposes the copper core. The outer clad layer is partly separated from the core near the lamination. The 'reverse' of the planchet appears normal aside from a slight wave at 3 o'clock that likely occurred within the upset mill.

### Choice 1974-D Ike Dollar
### Struck on a Philippine 1 Piso Flan

6290 **1974-D Eisenhower Dollar—Struck on a Philippine 1 Piso Planchet—MS64 NGC.** Uncentered toward 3 o'clock. The mintmark is intact, as is the upper portion of the 4 in the date. A lustrous near-Gem with medium gold toning and a few trivial gray obverse spots. The centers show slight incompleteness of strike.

### 1974-D Eisenhower Dollar, MS64
### Struck on Philippines One Piso Planchet

6291 **1974-D Eisenhower Dollar—Struck on Philippines One Piso Planchet—MS64 PCGS.** A Philippines one piso planchet was struck by dies intended to produce 1974-D Eisenhower dollars. Since the Denver Mint produced coins for a couple of foreign countries in the 1970s, such an error was bound to happen. Other Ike dollars on one piso planchets are known, but most are missing the date. This piece shows just the tops of the four digits, but it is enough to identify it as a 1974-D. The smaller size planchet prevented proper metal flow, resulting in poorly defined reverse details, but this coin is an unquestionable near-Gem.

### 1974-D Eisenhower Dollar, MS66
### Struck 5% Off Center

6292 **1974-D Eisenhower Dollar—Struck 5% Off Center—MS66 PCGS.** This lovely Eisenhower dollar was struck 5% off-center at 1 o'clock. Both sides have satiny medium gray surfaces with brilliant luster and a trace of light gold toning. As usual for off-center coins, the design details are quite bold.

### Double-Clipped 1976-D Ike Dollar, MS65

6293 **1976-D Eisenhower Dollar—Struck on a 24% Double-Clipped Planchet—Type One MS65 PCGS.** The planchet is doubly clipped, one about 8% and one perhaps twice that, forming crescents that nearly intersect at the lower obverse, leaving only the 76 . 19 visible from the 1776 . 1976 intended double date. A lustrous silver-gray piece with good eye appeal.

### Two 5% Curved Clips on a
### 1976-D Type Two Ike Dollar MS63

6294 **1976-D Type Two Eisenhower Dollar—10% Double Clip Planchet—MS63 PCGS.** Two different 5% curved clips are present, at 7:30 and 10 o'clock. A lustrous olive-gray example that has clean fields and a few moderate marks on the jaw and neck. The Thin Letters (or 'Type Two') reverse.

### 1977 Ike Dollar Struck on Clipped Planchet

6295 **1977 Eisenhower Dollar—Struck on 61% Clipped Scrap Planchet—MS64 PCGS.** The 1977 date is barely visible counting the last 7, but the area behind the president's head and LIB is a gaping void. Silver-gray with traces of lilac patina.

## Gem 1977 Ike Dollar on an Improperly Annealed Sintered Planchet

6296 **1977 Eisenhower Dollar—Improperly Annealed Sintered Planchet—MS65 PCGS.** Unlike your usual stone-gray Gem Ike, the present piece has dramatic (yet attractive) deep fire-red and gunmetal-green patina. Lustrous and lightly abraded with a precise strike. Presumably, copper alloy was leftover in the Mint annealing furnaces, and adhered to the planchet prior to the strike.

## MS66 1977 Ike Dollar on an Improperly Annealed Sintered Planchet

6297 **1977 Eisenhower Dollar—Improperly Annealed Sintered Planchet—MS66 PCGS.** This high grade Ike dollar has booming luster, smooth surfaces, and a bold strike. What makes it unusual is its color. It is dusky orange-red with glimpses of sea-green. Apparently, the planchet was annealed in a Mint furnace laced with copper alloy, which bonded to the planchet before it made its way between Ike dollar dies.

## 1977-D Dollar MS62 With a Die Adjustment Strike

6298 **1977-D Eisenhower Dollar—Die Adjustment Strike, Reeded Edge—MS62 PCGS.** The date is faintly visible. The Denver mintmark is also clear, although this piece is incorrectly designated as a Philadelphia issue by PCGS. Satin luster sweeps over both sides. Lightly toned honey-gold. The strike is mushy, although planet Earth and Ike's profile are brought up.

6299 **1978 Eisenhower Dollar—10% Brockage Obverse—MS64 PCGS.** At the moment of strike, the obverse die was partly blocked by a previously struck Ike dollar (not included). That dollar leaves an incused and reversed (brockage) impression of the NIT in UNITED, along with a few edge reeds. The brockage is between 11:30 and 12:30. This final-year Ike dollar is lustrous and gunmetal-gray with smooth fields and a minor mark on the jaw.

## Spectacular 1999 SBA Dollar Overstruck on a 1999 Georgia Quarter, MS63

6300 **1999-P Anthony Dollar—Struck on a 1999 Georgia Quarter—MS63 NGC.** The P mintmark from the quarter is visible atop the A in ONE DOLLAR. The top half of Anthony's portrait is inundated with legends from the Georgia statehood quarter: 1788, JUSTICE, MODERATION. The surfaces show bright mint luster and there is no trace of toning on this rare double denomination combination. The final year of the Anthony dollar coincided with the initial year of the Statehood quarter program. Anthony dollars needed to be struck to supply U.S. Post Office vending machines.

## Fascinating 1999-P Susan B. Anthony Dollar, MS64 Broadstrike on a Type One Proof Planchet

6301 **1999-P Susan B. Anthony Dollar—Broadstrike on a Type One Proof Planchet—MS64 PCGS.** This uncentered broadstrike is aligned toward 2 o'clock. There is no raised indication of a raised rim, as expected of a Type 1 planchet. The unstruck surface is granular, yet distinctly reflective. The Philadelphia Mint struck the proof Anthony dollars in 1999, a change from the usual production at the San Francisco Mint.

## 2000-P Sacagawea Dollar, MS65 Multiple Strike on Feeder Fingers

6302 **2000-P Sacagawea Dollar—Multiple Strike on Feeder Fingers—MS65 NGC.** 2.5 gm. This mint error probably shut down a press until the broken feeder finger could be replaced. Although struck on a feeder finger fragment, most of the design is present. Portions of ONE and LIBERTY are absent. The date and mintmark are clear. Evidence of a double strike is strongest above Sacagawea's head, which has a ghostly secondary impression of her forehead and LIBERTY. Mostly dark gray, although areas of brilliant-white occasionally emerge. This visually arresting error would prove nearly impossible to duplicate, particularly since the Sacagawea dollar was struck for circulation only in 2000 and 2001.

## MS66 2000-P Sacagawea Dollar Struck on a Foreign Planchet

6303 **2000-P Sacagawea Dollar—Struck on a Foreign Planchet—MS66 NGC.** 7.04 gm. The United States receives Sacagawea dollar planchets from private vendors, some of which also service other foreign nations. This example is silver-white with faint tan toning, a color unlike the brassy Sacagawea dollar, which normally weighs 8.1 gm. The rims are coarse and sloped.

## 2000-P Sacagawea Dollar, MS66 Multiple Strike on Split Obverse Die

6304 **2000-P Sacagawea Dollar—Multiple Strike on Split Obverse Die—MS66 NGC.** The obverse die shattered during the strike of this coin. Radial die cracks are present at 1 o'clock, 5 o'clock, and 8:30. The 5 o'clock crack is unusually deep, and kept the piece from ejecting from the dies. It was struck again and again, without any further planchets fed in. The strikes caused an obverse die cap, and the obverse rim is uniformly high where it began to wrap around the obverse die. Blushes of lilac toning cover the centers of this lustrous and unabraded orange-gold mint error.

## 2000-P Sacagawea Dollar, MS67 Struck on a Maryland Quarter

6305 **2000-P Sacagawea Dollar—Struck on a 2000-P Maryland Quarter—MS67 NGC.** This is a stunning Superb Gem example with intense light gray luster and remarkable surface quality. The orientation between the two designs is inverted and flipped, with the obverse of the quarter visible on the reverse of the dollar. Only traces of the quarter dollar design remain visible including part of the word OLD on the baby's cheek and part of the word LINE on Sacagawea's chin.

## Distinctive 2000-D Sacagawea Dollar With Foreign Planchet Undertype, MS67

6306 **2000-D Sacagawea Dollar—Struck on an Israel One New Sheqel—MS67 NGC.** NGC omitted the weight of this nickel-colored piece. Uncentered toward 10:30 with a complete date and mintmark. Most of Sacagawea and her infant are on the flan. The reverse has no hint of an undertype, but on the obverse, ISRAEL and SHEQEL are visible near the upper and lower rim, respectively, indicating a KM-160a. Housed in a custom-format NGC holder alongside a regular 2000-D Sacagawea dollar and a KM-160a Israel One New Sheqel that is positioned the same way as the undertype on the error piece.(Total: 3 coins)

## 2001-P Sacagawea Dollar on Quarter Planchet, MS64

6307 **2001-P Sacagawea Dollar—Struck on a Quarter Planchet—MS64 NGC.** 5.4 grams. A bit underweight for a statehood quarter planchet, which weighs 5.67 grams per the *Guide Book*. This lustrous and well preserved piece has full legends, although AMERICA is tight, and the right-side rims are absent. Mostly white with faint tan toning and a couple of dabs of cherry-red patina. The 2001-P has a much lower mintage than the first-year 2000-P and 2000-D.

## 2002-D Sacagawea Dollar, MS66 Struck on a Quarter Planchet

6308 **2002-D Sacagawea Dollar—Struck on a Quarter Planchet—MS66 NGC.** 5.6 grams. A remarkable piece with brilliant light gray surfaces and exceptional luster. This error would be difficult to spot, due to the similar planchet size, although the color difference is unmistakable.

## Interesting 1905 Quarter Eagle, MS63 Uncentered Broadstrike Error

6309 **1905 Liberty Quarter Eagle—Uncentered Broadstrike—MS63 PCGS.** Several commentators have alluded to the elusive nature of the gold error; with the high face value and relative prestige accorded to the nation's gold coinage, perhaps more care was taken with quarter eagles than with, say, quarter dollars. Whatever the actual reason, errors such as this broadstrike are challenging in gold. The present coin was struck out-of-collar so that the design is complete, but a significant crescent of unstruck planchet appears at the lower obverse and the corresponding area on the reverse. Light rose alloy spots visit otherwise yellow-gold surfaces that are highly lustrous.

## 1980 Canada Cent, MS67 Struck on a 1980 Bangladesh 25 Poisha

6310 **1980 Canada Cent—Struck on a 1980 Bangladesh 25 Poisha—MS67 NGC.** Undertypes from the 25 poisha are visible on both sides. The tiger head on the central reverse is nearly as bold as the maple leaf from the overtype, and the waves and leaves from the Bangladesh design threaten to obscure the bust of Queen Elizabeth II. Lustrous, untoned, and immaculate.

# SO-CALLED DOLLARS

## Beautiful 1900 Lesher Dollar Z-2, HK-788, MS63

6311 **1900 Lesher Dollar, MS63 NGC.** Z-2, HK-788, R.5. Approximately 210 of these medals were originally struck. The intricate detail of the mining scene is crisply delineated. The reflective surfaces are lightly toned in shades of lavender, with golden highlights. Eye appeal is magnificent. No submission has been certified finer at NGC or PCGS (12/08).

## Interesting 1900 Lesher Dollar Z-3, HK-789, MS62

6312 **1900 Lesher Dollar, Z-3, HK-789, MS62 NGC.** Z-3, HK-789, R.5. Joseph Lesher advocated the free coinage of silver, and issued these large silver "souvenirs" to make his point. Lesher issued these specimens in his home town of Victor, Colorado, and advertised that he would redeem them at $1.25 in U.S. money. The present specimen is sharply struck, showing intricate detail on all design elements. Attractive blue and gray toning enhances the surfaces.

### Fascinating 1901 Lesher Dollar
### Z-10, HK-796, MS63

6313 **1901Lesher Dollar, MS63 NGC.** Z-10, HK-796, R.6. From an estimated mintage of 150 pieces, this issue is quite rare today. The present specimen exhibits an excellent strike, with all details of the design fully brought up. The reflective surfaces are covered with lovely shades of gold, lavender, and blue toning. Eye appeal is outstanding.

### HK-876 1905 Denver Mint Opening
### So-Called Dollar, MS63 Red and Brown

6314 **1905 Denver Mint Opening So-Called Dollar, HK-876, MS63 Red and Brown NGC.** HK-876, R.6. Struck in bronze with a reeded edge. This specimen exhibits pleasing reddish coloration throughout and lacks any serious flaws worthy of disclosure. This popular so-called dollar was the first issue produced at the newly constructed Denver Mint and, according to the newly released Hibler-Kappen reference (2008), less than 75 pieces are believed extant in all grades. Census: 2 in 63 Red and Brown, 3 finer (12/08).

## BETTS MEDALS

6315 **Obverse Trial Strike for 1781 Victory at Cowpens Medal, Betts-593.** Lead, 53 mm, 10.5 gm. Uniface. Obverse die trial strike for the Victory at Cowpens medal. An Indian queen with quiver of arrows on her back crowns an officer with a laurel wreath. His hand rests on a sword, with a miscellany of military equipment and a forested scene in the background. At the top rim is DANIELI MORGAN DUCE EXERCITUS, with COMITIA AMERICANA in exergue, or "The American Congress to Daniel Morgan, general of the Army." These pieces are similar to splashers in that they have newspaper backing, but the rims are upset. This obverse planchet is quite a bit thinner and lighter overall than the accompanying reverse, but it is appealing and shows little impairment beyond a couple of nicks on the rim. We grade this piece as AU55 uncertified.

6316 **Reverse Trial Strike for 1781 Victory at Cowpens Medal, Betts-593.** Lead, 53 mm, 30.9 gm. Uniface. Reverse trial strike for the Victory at Cowpens medal, a Congressional medal awarded Brigadier General Daniel Morgan (1736-1802): An officer on horseback leads his troops, charging against the fleeing enemy. The foreground shows a hand-to-hand battle between an unhorsed dragoon and a foot soldier, while fierce combat rages in the background. The inscription above is VICTORIA LIBERTATIS VINDEX, or "Victory, the protector of Liberty." In exergue is FUGATIS, CAPTIS AUT CAESIS / AD COWPENS HOSTIBUS / XVII. JAN. MDCCLXXXI—"The foe put to flight, taken, or slain, at Cowpens, January 17, 1781." Below is DUPRE INV. ET F., "Dupre invented and made it."

There is little actual wear on this piece, but the thin, irregular planchet shows some nicks at the rim. Please see also the obverse die trial strike in the accompanying lot.

## WASHINGTONIA

6317 **Gold-Plated "Washington Before Boston" Medal, similar to Baker-49C, MS60.** Gold-plated (likely bronze), 68 mm, 157.6 gm. This is the famous Washington Before Boston medal, here a modern restrike that has been gold-plated. Obverse bust of Washington faces right, with COMITIA AMERICANA beneath; the Latin motto translates as, "To George Washington, supreme general of the Army, defender of liberty." On the reverse, Washington, on horseback with four of his commanders, surveys his troops from a high point on Dorchester Heights. The edge is plain, which to us indicates an ex-Mint striking of some sort. To our knowledge, all of the various Mint restrikes bear edge-markings of various kinds that allow determination of their metal and striking period. We grade this piece MS60 uncertified, due to the numerous light contact marks and roughness along the rims.

### Unlisted, Possibly Unique
### Uniface Baker-198A Washington Medal

6318 **(1824) George Washington Medalet, Blank Reverse MS63 NGC.** Obverse of Baker-198A. 13.5 mm. Plain edge. Noted engraver C.C. Wright produced a series of medals to celebrate Lafayette's tour of America in 1824. Baker-198A has a bust left of Washington on the obverse, and a bust right of Lafayette on the reverse. The present piece, however, has a blank reverse. **The consignor believes that this piece is unique as such.** Toned forest-green, golden-brown, fire-red, and cream-gray.

## MISCELLANEOUS MEDAL

6319 **1972 Franklin Mint Apollo 17 Moon Landing Medal, PR67 Ultra Cameo NGC.** Pure platinum, 35.5 mm, 31.1 gm. Pure platinum medal (not the minicoins that were also issued) to commemorate the Apollo 17 moon landing in December 1972. Issued by the Franklin Mint, edge-numbered No. 006 according to the NGC insert. These were issued as part of a series, as we are also aware of similar pieces for the Apollo 11 (first manned moon landing, July 20, 1969) and 15 (fourth manned moon landing) missions.

The consignor believes that this coin is one of less than 10 specimens known, a figure that, while we are unable to verify it, is quite plausible given the high cost of platinum, the availability of the much-smaller minicoins, and the likely requirement that buyers subscribe to a series of such pieces.

## PROOF SET

6320 **1939 Proof Set NGC Certified.** Encapsulated in a large NGC holder, each coin is individually graded. The cent is PR64 Red and Brown; the nickel is a Reverse of '38 and grades PR64, deep golden and lilac toning; the dime is PR65, a real sparkler with completely brilliant surfaces and deeply mirrored fields; the quarter is PR64, mostly brilliant with just a few flecks of color on the obverse; and the half grades PR65, like the quarter, mostly brilliant with a couple of streaks of golden on the obverse.(Total: 5 coins)(#3343)

## ROLL

6321 **Roll Quantity of 1939-S Nickels.** Forty (40) pieces, a sampling revealing most Mint State with none worse than AU58. A majority show light nickel-gray and green-gold patina that lends positive eye appeal.(Total: 40 coins)

## MISCELLANEOUS

6322 **1907 Abraham Lincoln Bronze Plaque by Victor D. Brenner, AU50.** Bronze, 180 mm x 240 mm x 8 mm. A half-length portrait of the martyred president faces right, with the upper coat and profile in a design that any beginning collector of classic Lincoln cents will instantly recognize. At the lower edge is ABRAHAM LINCOLN / ★ ★ 1809 ★ 1865 ★ ★. Running up the right side is COPYRIGHT 1907 BY V.D. BRENNER (although the V looks like a Y) with an arrow pointing left inside a circle, and the date 1907. The plaque is hinged and hooked with metal attachments for desk or wall mounting.

Roger Burdette's recent *Renaissance of American Coinage 1909-1915* depicts (page 30) a Lincoln commemorative desk medal produced by Gorham & Co. from models of Lincoln by Brenner. Burdette writes, "The immediate inspiration for this medallic portrait (and a 1907 rectangular plaquette) appears to be an 1864 photograph of President Lincoln taken in Matthew Brady's Washington, D.C. studio by assistant Anthony Berger. However, a letter written by Brenner and published in April 1, 1909 opens the possibility that the medalist also had in mind a portrait of the President reading to his son, Tad [photograph also on page 30]."

This example of the plaque shows a few scattered dark flecks but is otherwise appealing and nearly as made.

## MINT SET

6323 **1947 Original Mint Set, Uncertified.** The 1947 mint set marked the first occasion in which the Mint offered a full set of uncirculated coins to the public. An estimated 5,000 sets were minted, containing two examples of each denomination and mint (no half dollars were minted at San Francisco). The cost for each set was $4.87. Each coin was placed in a cardboard cutout holder, with paper covers to protect the coins. Interestingly, the holders contained sulphur, which caused what is known as "mint set toning." The present set contains coins that would grade between MS62 and MS64 individually, with various degrees of the desirable "mint set toning."

## GSA DOLLARS

6324 **1881-CC GSA Hoard MS65 NGC.** VAM-2. A lightly toned and boldly struck Gem that has exemplary luster and only a few faint grazes on the cheek. The second lowest mintage among Carson City Morgans.(#7126)

6325 **1881-CC GSA Hoard MS65 NGC.** Frosty on each side with an essentially silver-white obverse and blushes of gold and peach on the reverse. Well-defined and a delightful Gem. Band-certified in the original holder of issue, box and literature accompanying. (#7126)

6326 **1885-CC GSA Hoard MS65 NGC.** A crisply struck Gem, faintly toned in chestnut tints and awash in potent cartwheel luster. A quality representative of this always popular and low mintage Carson City date.
*Ex: Long Beach Signature (Heritage, 2/2006), lot 4209, which realized $1,207.50.*(#7160)

6327 **1885-CC GSA Hoard MS65 NGC.** Band-certified in the original holder of issue. This untoned Gem displays intense mint frost and sparkling, snow-white surfaces. There are only a modicum of tiny surface marks that keep it from grading even higher. Once the *creme de la creme* of Uncirculated Morgan dollars, approximately 150,000 pieces were disbursed by the Treasury Department between 1962 and 1980, according to Bowers (1993).(#407160)

## MODERN BULLION COINS

### 1995-W American Eagle 10th Anniversary Proof Set Including One-Ounce Silver in Original Case

6328 **American Eagle 10th Anniversary Proof Set Including 1995-W Silver One-Ounce.** Five pieces, including the four gold: **one-ounce gold, half-ounce gold, quarter-ounce gold,** and **tenth-ounce gold**. The star of the lot, however, is the highly desirable and low-mintage **1995-W One-Ounce Silver,** uncertified but in excellent condition with flawless contrast. Housed in the original case with accompanying box and literature.(#9887)

## LIVE FLOOR BIDDING

Bid in person during the floor sessions.

## LIVE TELEPHONE BIDDING *(floor sessions only)*

Phone bidding must be arranged on or before Tuesday, January 6, 2009, by 12:00 PM CT.
Client Service: 866-835-3243.

## HERITAGE Live!™ BIDDING

***Bid live*** from your location, anywhere in the world, during the Auction using our HERITAGE Live!™ program at HA.com/Live

## INTERNET BIDDING

Internet absentee bidding ends at 10:00 PM CT the evening before each session. HA.com/Coins

## FAX BIDDING

Fax bids must be received on or before Tuesday, January 6, 2009, by 12:00 PM CT. Fax: 214-409-1425

## MAIL BIDDING

Mail bids must be received on or before Tuesday, January 6, 2009.

*Please see "Choose Your Bidding Method" in the back of this catalog for specific details about each of these bidding methods.*

*Extended Payment Terms available.*
*See details in the back of this catalog.*

*Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.*

*This auction is subject to a 15% Buyer's Premium.*

HERITAGE HA.com
Auction Galleries

Dear Pattern Collectors,

What an incredible event! We welcome you to Heritage Auction Galleries' first-ever Pattern Night presentation, featuring The Lemus Collection – Queller Part Two, assembled by the Queller Family. Even numismatic novices will recognize this as an extraordinary collection, featuring an astounding 465 different patterns; it is, in fact, the greatest pattern collection to be auctioned in our generation! Assembled over many decades by the Queller Family, this collection is world-class in aesthetic appeal and numismatic breadth. One of the first aspects that really comes through the general sense of wonderment results from looking at the certified grades – it is simply astonishing how many of these masterpieces are the finest known, tied for the finest known, or among the finest known. The population statistics confirm what the eye sees – these patterns are numismatic treasures of the highest quality.

Heritage was honored to sell The Queller Family Collection of Silver Dollars, 1794–1935 at our 2008 Central States Numismatic Society Platinum Night auction. This was another extraordinary collection assembled by this extraordinary family of collectors. Among the highlights then was the Mickley-Hawn 1804 silver dollar, accompanied by many additional highest quality rarities. The same must be said of the Lemus Collection, containing an extraordinary number of pattern rarities in delectable condition! After four decades of dedicated collecting, this collection is equally worthy of many superlatives.

During the 1930s, David Queller would sell copies of the Saturday Evening Post to his schoolteachers to clear a quarter-dollar profit, and he delivered the Sunday edition of the NY Daily News to his classmates (during the wee hours) for a one-dollar profit. His father offered to pay him two dollars to give up the scheme and get a proper night's sleep, but the young lad already recognized the importance of earning to motivate saving.

Mr. Queller bought his first Redbook in 1954, but didn't begin collecting coins until the 1960s. Since his collecting experience as a boy had been limited to philately, he didn't begin pursuing rare coins until he was well grounded in the basics. His first collecting interest was half dollars, and over several decades he assembled what was arguably the finest collection of halves ever assembled. By the late 1960s, he had expanded his interests into the dollar denomination and Mrs. Queller focused on patterns, and the collecting activities became a family effort.

FUN was the venue selected for our first Platinum Night event. This year, thanks to the decades of extraordinary collecting effort of the Queller family, we introduce our Pattern Night event. When combined with the additional pattern lots being offered, we can promise a night of numismatic excitement that will be remembered for decades.

As the Official Auctioneer of FUN, we have the pleasure of working with the most enthusiastic numismatic organization in America. Numismatists who regularly attend the FUN conventions understand why they have become the largest such events in America: it is a fun event, with more dealers, more collectors, and more coins and notes! Heritage delivers at FUN as well -- we twice set the Guinness Record for the World's Most Valuable Numismatic Auction there!

If you are joining us in Orlando to participate in this historic event, please stop by the lot viewing room or at the Heritage tables on the bourse to say hello. We also welcome your bids placed through the Interactive Internet™ and HERITAGE Live! bidding systems at HA.com. Many of our 400,000+ registered bidder-members in our online community have used HERITAGE Live! to participate live during the auction to great success – and many more are using it just to watch! Good luck with your bidding, however you choose to participate!

Sincerely,

Greg Rohan
President

## PATTERNS FROM THE LEMUS COLLECTION, QUELLER FAMILY COLLECTION – PART TWO

Historic 1792
Silver Center Cent
Judd-1, VF30

## Historic 1792 Silver Center Cent, Judd-1, VF30
## The Mickley-Cohen-Dohrmann-Brand-Roper Specimen

1500 **1792 One Cent, Judd-1, Pollock-1, High R.6, VF30 NGC.**

**Design.** Probably designed by Henry Voight. Liberty faces right with hair flowing behind. The obverse periphery reads LIBERTY PARENT OF SCIENCE & INDUSTRY, with 1792 just below the bust. The reverse has a wreath that is tied with a ribbon at the bottom; ONE CENT is within. Around the rim is UNITED STATES OF AMERICA with the fraction 1/100 below. Struck in copper with a silver plug in the center. Medallic alignment.

**Commentary.** The patterns of 1792 are the rarest series of patterns ever struck and each is a classic of U.S. coinage in its own right. This exclusive series includes the silver center cent, Birch cent (two varieties), half disme, disme, and the Eagle on Globe quarter. Of these five issues, only the half disme and disme ever circulated. Of the other three pattern issues, the silver center cent was an experimental striking that was intended to create a coin with an intrinsic value of one cent on a smaller copper planchet by inserting a silver plug in the center. These pieces proved impractical to produce; in the end, no one seemed to care that they were struck on smaller planchets or had a silver center. The result, we know now, was the production of large cents from 1793 through 1857. It was not until the mid-1850s that the idea of a small-sized cent was again entertained as an alternative to the large coppers.

Along with the production of the silver center cents, another small cent was also struck with the same design, the so-called fusible alloy cent. These coins incorporated the same idea of mixing copper and silver, but these pieces (Judd-2) had the metals alloyed together. The problem with such coins is they were visually indistinguishable from a copper striking and could be easily counterfeited.

The first mention of the actual striking of cents appears in a letter from Secretary of State Thomas Jefferson to President Washington, dated December 18, 1792:

> "Th. Jefferson has the honor to send the President two cents made on Voigt's plan by putting a silver plug worth ¾ of a cent into a copper worth ¼ cent. Mr. Rittenhouse is about to make a few by mixing the same plug by fusion with the same quantity of copper. He will then make of copper alone of the same size, & lastly he will make the real cent as ordered by Congress, 4 times as big. Specimens of these several ways of making the cent may now be delivered to the Committee of Congress now having the subject before them."

The Mint was ready for occupancy in September 1792. From the date of Jefferson's letter, we may infer that the first two experimental cents were struck in December 1792 (the third type mentioned was never coined). In 1907 Frank Stewart (a much later owner of the original Mint property in Philadelphia and an author of a history of the facility) discovered two planchets for the silver center cents as he was excavating the first Mint building. They were blanks with a hole in the center but lacking the silver plug. Stewart donated the planchets to the Congress Hall Collection in Philadelphia rather than sell them to J.C. Mitchelson. With Stewart's discovery of the planchets which "fell down from the overhead joists" it was finally established that the silver center cents were actually produced within the newly opened Mint and not outside its walls as previously believed.

The Mint Act of April 2, 1792 authorized cents that would weigh 264 grains and half cents of 132 grains. Such coins would have given a full cent's (or half cent's) worth of copper. The intention of such large small-denomination coinage was to drive out of circulation the wide variety of world coinage found in the states. Such coins would have undoubtedly achieved the desired result, but a smaller, lighter version was authorized in January 1793; Congress granted a further reduction in 1795. The result was to reduce the amount of copper in each coin by almost 36% from the original weight designated in 1792. Thus, the silver center cent and its companion fusible alloy cent were experiments aimed at convenience.

This piece is the first of the three types discussed in Jefferson's letter, and it is believed that today only 14 of these experimental coins survive. P. Scott Rubin conducted an exhaustive survey of auction records in 1984, conducting a line-by-line scan of 3,200 auction catalogs spanning the years 1855 to 1984. He logged each appearance of a silver center cent he found, resulting in only 38 listings over the 130 years surveyed. This particular coin has an especially distinguished pedigree. Its first appearance at public auction was in the Joseph Mickley Collection in 1867. The Mickley Collection was so extensive that it was sold over a period of six nights. The coin was described by W. Elliot Woodward as "Remarkably fine condition." One has to wonder today if this was a comment on the overall appearance of the piece or an early attempt at grading. The coin sold for $54 to Colonel Mendes I. Cohen.

Borrowing heavily from Rubin's 1984 list of known examples and his updated roster since that time, the following is a roster of known silver center cents:

1. Ellsworth-Raymond-Garrett.
2. Warner-Winsor-Lauder-Weinberg.
3. Davis-Jenks-Lohr-River Oaks-Hughes-private collection- Smithsonian.
4. Morris-Eastern Collection-Mitkoff & Numismatic Ltd-1974 GENA-Anton-private collection.
5. Bushnell-Parmelee-Smith-Wurtzback-Brand-Roach-Neil-New Netherlands-Ramano-Stack's 65th Anniversary Sale.
6. Stearns-Groves.
7. 1907 Elder Sale-Judd-Leidman-Eastern Collection.
8. Mickley-Cohen-Dohrmann-Woodward-Brand-1964 Kreisberg & Schulman-Gibson-Roper. **The present specimen.**
9. 1933 Morgenthau's 311th Sale (the first sale of Brand coins)-1992 Floyd Starr Sale-American Numismatic Rarities (8/2006).
10. Eric Newman.
11. Norweb III.
12. 1892 Woodside Sale.
13. 1997 Glendining's Sale-Anthony Terranova.
14. Discovered by Anthony Terranova, 1993. The coin does not have a silver center and appears to have been a trial striking before making the silver center pieces.

**Physical Description.** The coin is close to XF overall, with the devices on each side well-centered on the flan. The upper right reverse shows evidence of corrosion, and there two distinguishing planchet voids in the obverse fields, one before Liberty's face and the other at the base of the second E in SCIENCE. On the obverse the silver plug touches Liberty's ear, runs along the jawline, and covers several of the strands of hair. On the reverse the plug covers the right half of the E and almost all of the N in CENT, as well as the lower half of the N in ONE. Even, darker brown color over both sides is interrupted by the brightness of the silver plug.

**Provenance.** Ex: Joseph J. Mickley Auction (W. Elliot Woodward, 10/1867), lot 2135; Colonel Mendes I. Cohen; Cohen Collection (Bangs, Merwin & Co., 10/1875), lot 380; bought by William Sumner Appleton for $45; bought back by Woodward on behalf of A. Dohrmann; A. Dohrmann Collection (W. Elliot Woodward, 3/1882), lot 437; Lady of Western New York Collection (W. Elliot Woodward, 2/1887), lot 816; Virgil Brand; Kreisberg-Schulman (3/1964), lot 1106; Roper Collection (Stack's, 12/1983), lot 425.
*From The Lemus Collection, Queller Family Collection Part Two.(#11001)*

Rarely Seen 1792 Birch Cent
Judd-5, R.8, Fair 2

## Rarely Seen 1792 Birch Cent
## Judd-5, R.8, Fair 2

1501 **1792 Birch Cent, Judd-5, Pollock-6, R.8, Fair 2 NGC.**

**Design.** On the obverse Liberty faces right. The name BIRCH is seen on the truncation of the neck. Around the margin are: LIBERTY PARENT OF SCIENCE & INDUSTRY. The date 1792 is just below the bust. The reverse has a wreath with ONE CENT within. Around the periphery: UNITED STATES OF AMERICA; the fraction 1/100 is at the bottom beneath the knot in the wreath. Most likely designed by William Russell Birch. Struck in copper with a lettered edge reading TO BE ESTEEMED BE USEFUL.

**Commentary.** The patterns of 1792 are among the most intriguing stories in the history of U.S. numismatics. Two extensive articles have been written about these pieces, one by Carl Carlson and another by Michael Berkman. Carlson published an article in the March 1982 *Numismatist*. In this lengthy and worthwhile article, he brought together findings from previous researchers who had examined the series, such as Walter Breen and Robert Julian. He also led in a methodical fashion queries into when the pieces were struck, by whom, and where they were manufactured. The article leaves open several questions, some of which have yet to be resolved. One is the question of which Birch the coin refers to.

There are two varieties of Birch cents: The "regular" design has BIRCH on the bust truncation and is represented by 15-20 pieces today (including both Judd-4 and Judd-5). The other design is a unique white metal specimen with GWPt on the reverse, an abbreviation for "George Washington President." As superficially different as these two coins appear, they are actually different engraving states of the same die. The two designs are punch-linked, indicating the same person engraved both at about the same time. The obverses are closer in treatment, but the reverses show evidence of considerably more drastic die work.

The half disme and the Birch cent are definitely related and from the same engraver. The half disme is virtually a mirror image of the Birch cent, with Liberty facing left rather than right as on the cent. Carlson's 1984 article makes a clear case for the time frame of the striking of these coins from a December 1792 letter written by Thomas Jefferson. In this letter he implies there were no cents struck in the Mint itself before December, which leaves production of these coins to sometime before October, when the Mint presses were first operational. This leaves only one possibility for the location of the production of the Birch cents: John Harper's coach house.

The question of just which Birch was actually responsible for these pattern cents has since proven to be not Thomas Birch, previously believed to have engraved the dies. Thomas Birch was born in England in 1779 and was only 13 years old in 1792. It is more likely that William Russell Birch, a famous Philadelphia miniaturist, visited Philadelphia in the spring and summer of 1792, although he only moved his family there in 1794. Carlson lays out the most logical origin of the Birch cent:

> "Were the original 'GWPt' dies engraved in Philadelphia, or were they prepared in England prior to Birch's departure for America to serve as a sample of his work to show Mint officials and Harper upon his arrival? He would certainly have had the necessary contacts at the various private Mints in England to have cut the original dies there and made some trial strikes in white metal as samples. The punches for the cent ... were of British origin and do not appear on any dies over here other than the cent. The revised version of the cent required recutting but not punches."

Questions remain today about the specific origins of the Birch cent. Although we have evidence, we still do not conclusively know: Exactly which Birch was the engraver? Did Birch himself modify the GWPt die? Can these coins be punch-linked to British tokens of the period to identify exactly where the dies were engraved? Nevertheless, the Birch cent shares a prestigious spot in the birth of U.S. coinage, along with the silver center cent, half disme, disme, and Eagle on Globe quarter, all highly interesting and historic issues from the first year the Mint was established.

**Physical Description.** The central device of Liberty on the obverse is fully outlined. Numerous hair curls were deeply cut into the die and still show definition, especially toward the back of the hair. Likewise, Liberty's eye is well detailed, and the nearly smiling mouth shows strong definition for the grade. The even, chocolate-brown surfaces are only interrupted by a darker outline around Liberty's hair curls and the other recessed devices. The date is strong, and all four digits show completely. The peripheral legends are irregular. SCIENCE & INDUSTRY are weak but can be made out. The word LIBERTY is uncommonly bold for the grade compared to the other peripheral lettering, leading us to speculate that perhaps the dies were slightly misaligned. Just the faintest trace of the bottom of the letters BIR can be made out on the truncation of the bust. The reverse is almost slick, with the only devices that can be clearly made out being the letters OF AM and several of the leaves in the wreath in that same area. A couple of deep planchet voids can also be seen on that side. The edge lettering is unseen inside the NGC encapsulation.

**Provenance.** *Ex: Loye L. Lauder (William Doyle Galleries, 12/1983), lot 235; Stack's private treaty transaction (12/1983). From The Lemus Collection, Queller Family Collection Part Two.*(#11014)

# High Grade 1792 Half Disme, AU Details, Judd-7

1502 **1792 Half Disme, Judd-7, Pollock-7, R.4—Repaired—NCS. AU Details.**

**Design.** The mirror image of the Birch cent with Liberty facing left, the date immediately below the bust. Around the obverse periphery: LIB. PAR. OF SCIENCE & INDUSTRY. The reverse shows an eagle in flight, the denomination HALF DISME below. Around the margin: UNI. STATES OF AMERICA. Struck in silver with a diagonally reeded edge.

**Commentary.** The story of the 1792 half dismes is one of the best-known and often-repeated tales in U.S. numismatics. The story begins with George Washington. His involvement with these coins was twofold. He allegedly contributed the silver to the Mint to strike the half dismes, and he also mentioned the coins in his national address of November 6, 1792:

> "In execution of authority given by the legislature, measures have been taken for engaging some artists from abroad to aid in the establishment of our Mint. Others have been employed at home. Provisions have been made for the requisite buildings, and these are now putting into proper condition for the purposes of the establishment. There has been a small beginning in the coinage of half dimes, the want of small coins in circulation calling the first attention to them."

The final sentence of Washington's address seems to clearly indicate that the half dismes were intended for circulation. The other involvement of Washington, that of his contributing the silver necessary to strike the pieces, is also generally accepted as factual today. However, it took nearly a century for evidence to surface that substantiated his contribution. Research conducted by Joel Orosz and Carl Herkowitz, titled

> "George Washington and America's 'Small Beginning' in Coinage: the Fabled 1792 Half Dismes" and published in the *2003 American Journal of Numismatics*, cited a memorandum by John A. McAllister, Jr., who related his interview with Chief Coiner Adam Eckfeldt:
> "In conversation with Mr. Adam Eckfeldt (Apr. 9, 1844) at the Mint, he informed me that the Half Dismes ... were struck, expressly for Gen. Washington, to the extent of One Hundred Dollars, which sum he deposited in Bullion or Coin, for the purpose. Mr. E. thinks that Gen. W. distributed them as presents. Some were sent to Europe, but the greater number, he believes, were given to friends of Gen. W. in Virginia. No more of them were ever coined."

While discovery of this document would seem to indicate that all half dismes were struck from silver "deposited in Bullion or Coin" by President Washington, the authors would not state conclusively that this was the case. In a *Coin World* article on June 13, 2005, Eric von Klinger wrote a review of Orosz and Herkowitz's article, titled "Document Details Half Disme: Confirms that G. Washington was Source of Silver," and first sentence that reads: "General Washington did indeed deposit silver for the 1792 half dismes." Orosz responded in a July 4, 2005 letter to the editor that:

> "We never claim in our article that we have proved that President Washington provided the silver used to strike the half dismes, as both the headline and the first sentence of von Klinger's article flatly state. In our article, we conclude that while the great preponderance of the evidence points toward Washington as the silver provider, the pieces of evidence that could prove he was— Washington's diary for 1792 and Acting Chief Coiner Henry Voigt's July 1792 account book—are unavailable. Washington was a long-time diarist, but the press of his presidential duties prevented him from keeping a diary in 1792. Voigt did keep an account book, but it was lost about a century ago, and no one knows where it is, or if it even still exists. Therefore, while the authors believe that all of the available evidence points to Washington, we cannot prove he was the donor beyond the shadow of a doubt."

Orosz and Herkowitz are to be commended for thoroughness in their research as well as their reluctance to draw a conclusion without proof from a primary source. That unfortunately has not been the case with the story of the half disme over the past 150 years. Since Washington apparently deposited bullion or coin for this issue, the story was embellished that he contributed the family silverware. Another favorite story about the half disme is since Washington had some involvement in this project and since there is a female figure of Liberty on the obverse, then the female figure must be Martha Washington. These stories did not originate with Dr. Montroville Dickeson and Mint Director James Ross Snowden in their books on American coinage published in the late 1850s, but both considerably enlarged the myths that had been put in print only a few years previously. Both Dickeson and Snowden undoubtedly meant well in promoting numismatics in the mid-19th century but their writings are certainly suspect from the point of view of modern historical scholarship. After the wide dissemination of their printed works, these myths became fact to succeeding generations of numismatists. Only in the last few years have we begun to take a hard look at what has previously been assumed to be factual. Now we are *almost* certain that Washington was the source of the silver for the half dismes, but we will probably never know if his silverware was melted to provide the necessary bullion. We certainly know now that Martha Washington was not the model for the depiction of Liberty. Rather, the engraver, whom we now believe was William Russell Birch, simply used a mirror image of the design on the Birch cent and applied it to this coin.

One aspect of the half disme that is left unresolved is its status. Was it meant to be a pattern or a regular issue? We have primary sources that seem to contradict each other regarding this. In his national address from 1792, Washington states: "There has been a small beginning in the coinage of half dimes, the want of small coins in circulation calling the first attention to them." But John McAllister seems to contradict this with his statement from 1844: "Mr. E. thinks that Gen. W. distributed them as presents. Some were sent to Europe, but the greater number, he believes, were given to friends of Gen. W. in Virginia." Both statements could be true. President Washington could have distributed them to friends and foreign dignitaries, but the "want of small coins in circulation" could also have compelled many recipients to use these pieces in the channels of commerce.

Fact, fiction, and myth have surrounded the 1792 half dismes almost since they were struck 217 years ago. Perhaps some of the fiction will decrease in the future, but the lore of this issue will undoubtedly continue as long as there are collectors of U.S. coinage.

**Physical Description.** The NCS insert reads "AU Details, Repaired." We have been unable to discern the repair. The coin was bent and straightened, as seen on the lower right of the obverse and lower left of the reverse. Perhaps in the process of straightening the piece the edge was damaged and repaired, but this is not obvious to us with the coin in its present holder. The surfaces have the appearance of old silver with medium density gray and blue toning over each side. The devices are well defined with the only softness in the areas usually seen; that is, on the central hair curls on the obverse and the breast feathers of the eagle. Among of the most frequently seen surface imperfections on half dismes are planchet flaws. This example is remarkably free from them. Only two such voids can be seen on this piece: One is in the right obverse field between OF and SCIENCE; the other requires strong magnification and is on the reverse just above the bend in the eagle's left (facing) wing.

**Provenance.** *Ex: Stack's (4/1962); Gibson-Groves Sale (Stack's, 11/1974), lot 34; Auction '85 (Stack's, 7/1985), lot 1594.*

1794 Half Dime Die Trial
Judd-15, Pollock-19, AU55

## Extremely Rare and Important 1794 Half Dime Die Trial
## Judd-15, Pollock-19, AU55

1503 **1794 Half Dime, Judd-15, Pollock-19, R.8, AU55 NGC.**

**Design.** Both obverse and reverse dies were used to strike regular-issue half dimes of the V-3, LM-3 variety dated 1794. Struck in copper with a reeded edge.

**Commentary.** In his magnum opus *United States Patterns and Related Issues*, Andrew Pollock III subdivides the older Judd-15 designation into two closely related classifications, Pollock-19 and 20. Pollock-19 is from the dies used to strike V-3, LM-3 variety 1794 half dimes, with the date close to the bust. Pollock-20 is from the dies used to strike V-4, LM-4 half dimes, with the date placed far from the bust. The present coin is one of the two known examples of Pollock-19.

The 1794 half dime was the first coin of this denomination struck at the U.S. Mint, because the famous 1792 issue was actually struck in John Harper's cellar before the Mint was built. Both examples of Pollock-19 are true die trial pieces, struck to test the half dime dies in 1794 or early 1795. In *Federal Half Dimes 1792-1837*, Russell Logan and John McCloskey report that all 1794 half dimes were delivered on March 30, 1795, so it is likely that the Pollock-19 coins were actually struck in early 1795. Both examples are remarkably well preserved, with the present coin certified as AU55 by NGC, and the other specimen grading an astounding MS64 Brown, also by NGC. It is clear that this issue has been prized and well cared for since the earliest days of the hobby.

Robert Coulton Davis compiled the first important listing of pattern coinage, published serially in *The Coin Collector's Journal* from 1885-1886. The 1794 half dime pattern was described as follows, "No. 12.-Obv. LIBERTY. Head with flowing hair to right. Before the head, seven stars; behind seven. In ex., 1794. Rev. UNITED STATES OF AMERICA. An eagle with outstretched wings within a wreath of laurel. This is the pattern mill, or 1/10 of a cent. Copper." Davis apparently missed the first star behind Liberty's head, enmeshed in the curls.

The attribution of this pattern as a mill has caused much confusion among pattern researchers. Pollock notes that "R. Coulton Davis regarded these pieces as pattern mills, equivalent to one tenth of a cent. Interestingly, Davis' attribution seems to be substantiated by the weight of one specimen enumerated in the census below, 19.7 grains, which, of course, is very close to the expected theoretical weight of 20.8 grains. Unfortunately, no other weight data are presently available for this variety." Pollock was referring to the present coin, which he had examined, weighed, and measured. His theory that Davis might have attributed the coin based on weight and composition is ingenious, but further research has uncovered a different source for the attribution.

A description of an obscure lot in the Mickley Collection (Woodward, 10/1867), lot 2138, explains Davis' curious attribution. The lot description follows, "2138. Pattern Mill, or tenth of a cent, 1794, copper, struck from the dies of the 1794 Half-Dime, *fine and excessively rare, possibly unique*." From this description, it is clear that Davis was not basing his attribution on scientific weights and measures. He was merely describing the coin that appeared in the Mickley sale 18 years earlier. Of course, Pollock's observation may explain why Woodward described the coin as he did in 1867.

The whereabouts of the present example prior to its appearance in Auction '85 has puzzled researchers for the last century. In *The Comprehensive Catalogue and Encyclopedia of United States Coins*, Don Taxay specifically states the coin in the Mickley Collection was from the "Val. 3" dies, identifying it as a Pollock-19. It is hard to know what his source was, since the lot description is not detailed enough to differentiate between V-3, LM-3 (Pollock-19) and V-4, LM-4 (Pollock-20) dies. Perhaps he had information on the location of the single known example of Pollock-20 in 1867. In any case, trusting that Taxay is correct in identifying lot 2138 as the long-missing present example of Pollock-19, part of the mystery is solved. The purchaser of lot 2138 was Col. Mendes I. Cohen, the prominent Baltimore collector. At the sale of the Cohen Collection (Cogan, 10/1875), lot 384 is described as follows, "1794 Half Dime. *Copper.* Trial piece. Exceedingly rare. Fair." The lot was purchased by Jules Fonrobert, the great industrialist and collector from Berlin. Fonrobert was bidding under the name "Roberts" at the sale. Fonrobert sold his collection through Adolph Weyl in 1878. Extensive research has failed to turn up any further appearances of this coin until it surfaced in Auction '85. Much like the second example of the Paquet Reverse double eagle, the coin seems to have gone overseas in the early times and only returned after a lengthy hiatus. The present offering is incredibly important, as the coin may not appear on the market again for years.

**Physical Description.** The strike is strong for a coin of 1794, with only a little softness on the eagle's breast. The surfaces are a lovely chocolate-brown and have a minimum number of abrasions for the grade. There is a small rim bruise above the B in LIBERTY. Excellent eye appeal and fascinating history combine in this nearly unique pattern from the earliest days of the Mint.

**Census and Provenance.** The following census was expanded from information provided by USPatterns.com.

1. Matthew Stickney (per Don Taxay); Stickney Collection (Henry Chapman, 6/1907), lot 447; William H. Woodin; Waldo C. Newcomer; Maj. Lenox Lohr; Robert Batchelder; River Oaks (Bowers and Ruddy, 11/1976), lot 936; Public Auction Sale (Stack's, 1/1987), lot 511; Red Bank Collection (American Numismatic Rarities, 12/2003), lot 278; Southern Collection; Simpson Collection. The Adams-Woodin and Judd plate coin.
2. Possibly Ex: Joseph Mickley; Mickley Collection (Woodward, 10/1867), lot 2138; Col. Mendes I. Cohen; Cohen Collection (Cogan, 10/1875), lot 384; Jules Fonrobert; Die Jules Fonrobert Sammlung (Adolph Weyl, 2/1878); unknown intermediaries; Auction '85 (Stack's, 7/1985), lot 1595. **The present coin.**

# Unique 1797 Half Eagle Die Trial in Copper
# Judd-24, PR50

1504 **1797 Five Dollar, Judd-24, Pollock-40, Unique—Mint Defaced—PR50 NGC.**

**Design.** Both obverse and reverse dies were used to strike 1797 Small Eagle BD-4 half eagles. The berry on the right side of the wreath on the reverse is inside the wreath, the key diagnostic of the extremely rare BD-4 variety. Struck in copper with a reeded edge.

**Commentary.** This issue is an original die trials piece from 1797. It was defaced at the Mint to prevent possible counterfeiting (it would be a simple matter to gild the piece, and five dollars was a lot of money in 1797). Miraculously preserved, this piece has been known to numismatists since the 1890s. The dies were used to strike an extremely rare variety of 1797 half eagle, BD-4, with only a single example known today. The BD-4 variety was unknown until Robert P. Hilt discovered a specimen in the Byron Reed Collection in 1972. Harry Bass purchased that coin at the sale of the Byron Reed Collection (Spink, 10/1996), lot 99, and it now resides in the Harry Bass Research Foundation. Because of this unique copper pattern, the BD-4 reverse die was known to the numismatic community for almost a century before the single gold example was discovered. Unique, the only specimen known. The coin has been off the market for 20 years, and it may not be offered again for decades.

**Physical Description.** While not a thing of beauty, this coin has character and unparalleled historic charm. Heavy blows from a blunt instrument have distorted the devices on both sides, but enough detail survives to identify the design. The dark brown surfaces have been well preserved, and the romance of the early Mint enhances every detail.

**Provenance.** *Ex: Woodside Collection (New York Coin & Stamp, 4/1892), lot 7; Virgil Brand; Forty-First Catalog (New Netherlands, 9/1953), lot 419; Matt Rothert Collection (Bowers and Ruddy, 11/1973), lot 1266; Breen II (Pine Tree, 6/1975), lot 332; Everson and Faught (Bowers and Merena, 6/1988), lot 281.*

# Rare 1808 Silver Five Dollar Muling
# Judd-40, MS66

1505 **1808 Five Dollar, Judd-40, Pollock-6175, High R.7, MS66 NGC.**

**Design.** The obverse is from the 1808 BD-2 die with the diagnostic low date and 1 centered over two denticles (difficult to see on this piece because of the die rust). The reverse is from the 1804 BD-7 reverse die that has a leaf pointing toward the left serif of the I in AMERICA but still separate, the lowest arrow even with the right upright of the N in UNITED, and the bottom of star 12 pointing to the right side of the B in PLURIBUS. Struck in silver with a (presumably) plain edge. Allegedly a reeded edge piece was recorded in Woodward's Levick Sale of October 1864, but this was apparently a cataloging error, as such a coin is untraced today.

**Commentary.** When this piece last appeared in 1979, it was succinctly described as: "Mule of rusted obverse and reverse dies of the 1804 half eagle. Less than 6 known pieces." While this is true, there is much more to the story of these pieces. This is not technically a pattern, but rather a fantasy piece that has long been considered a part of the pattern series, as have many similar pieces. Struck privately; it is believed that Joseph J. Mickley was responsible for the production of the few pieces that are known. Mickley purchased scrap dies from the Mint in the early 1860s and struck other fantasy pieces from heavily rusted and oftentimes illogical obverse / reverse die pairings. In this case, at least the obverse and reverse are within the same series. Since they were struck in silver, there was clearly no intent to deceive.

**Physical Description.** The surfaces show evidence of heavy die rust on each side, as one would expect. Close examination shows there are no detracting abrasions or handling marks, as one would infer from the MS66 grade. Light rose-colored toning is seen over each side. The reverse fields display a surprising degree of striation of the die, the result of which is a bright semireflectivity on that side. An extremely rare private restrike that is seldom offered at public auction.

**Census and Provenance.** We could find no roster of known specimens more recent than Pollock (1994). In that reference five examples are listed, with one of unknown provenance. This coin matches the plate in the Auction '79 catalog, thus it is the No. 2 coin on the roster. Pollock made these notes about the Lemus coin: "The specimen in the Lemus Collection weighs 108.7 grains, has a diameter of 0.997 inches and a die alignment of about 170 degrees."

*Ex: Auction '79 (Superior's session, 8/1979), lot 1620. From The Lemus Collection, Queller Family Collection Part Two.*(#661000)

# Curious 1818 Judd-45, Pollock-6210 Mule, PR64
## A Combination of 1818 Cent and Quarter Dies

1506 **1818 One Cent, Judd-45, Pollock-6210, R.8, PR64 NGC.**

**Design.** The obverse is a rusted die originally used for the 1818 B-2 quarter dollar, and the reverse is a similar rusted die originally used for 1818 N-8 and N-10 large cents. Evidence of at least two strikes appears on the reverse, with considerable doubling of the letters in the legend and denomination. The 1860 date from the Seated quarter undertype is visible, upside down, between the wreath and TES of STATES. Struck in silver over an 1860 Seated Liberty quarter with a reeded edge, the edge reeding flattened.

**Commentary.** The seventh edition of Judd, edited by Abe Kosoff, states that this muling was "struck over a quarter dollar dated 1800," an obvious typographical error as there is no such thing as an 1800 quarter. This apparently unique piece was produced some time between 1860 (the date on the quarter) and March 1862 (its first auction appearance), apparently earlier than other similar curiosities such as the 1804 and 1823 restrike cents. Its maker is unknown, but may have been Dr. Montroville W. Dickeson or Joseph J. Mickley. The obverse die is extensively rusted and heavily broken, the die cracks seemingly in the same stage as the latest known 1818 B-2 quarters. The reverse appears to have a heavy die crack through the tops of AMERICA.

There is little agreement about a suitable name for this curiosity. NGC calls it a "Private Restrike" as does Steve Tompkins in *Early United States Quarters 1796-1838*. At USPatterns.com, it is described as a "restrike made outside the mint from dies sold as scrap." In his update of the Browning reference, Walter Breen called it a "silver curiosity." In the ninth edition of the Judd reference, Dave Bowers states that it is "a private restrike from mismatched dies of 1818." Andrew Pollock records it in his chapter on Privately Issued Restrikes.

Whatever it is called, this piece is an extremely important part of American numismatic history, it is apparently unique, and it remains in exceptional condition. Plated in Adams-Woodin (AW-31), the eighth and ninth editions of Judd, in Pollock, and in Tompkins. This piece was also listed (although not plated) in the 1914 ANS *Exhibition Catalogue* as the property of Mr. Judson Brenner, of Youngstown, Ohio.

**Physical Description.** Certified as PR64 by NGC, based on its reflective obverse and reverse surfaces. An argument could be made to grade it MS64, but in this case the distinction is unnecessary. Both sides have bold details, with splendid deep gold toning combined with splashes of rose and pale blue.

**Provenance.** *Ex: John K. Wiggin (Edward Cogan, 3/1862), lot 270; Lorin G. Parmelee (New York Stamp and Coin, 6/1890), lot 19; William H. Woodin; Judson Brenner; T. James Clarke; J. Welch; ANA (Paramount, 8/1972), lot 2662; Bowers and Ruddy Galleries; Bowers and Ruddy (6/1982), lot 974; Stack's (3/1985), lot 563.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#661000)

## Rare Silver-Plated Copper 1827/3 Quarter, Judd-48, PR63
## Believed to be Ex: Lyman Low (6/1887)

1507 **1827 Quarter Dollar, Judd-48, Pollock-49, High R.7, PR63 Silver-Plated NGC.**

**Design.** This rarity pairs the obverse of 1827/3 with a reverse from 1819, Browning-2. The reverse has a square-base 2 in the denomination, which differs from the original 1827 quarters (which have a curl-base 2). Struck in copper and silver-plated with a reeded edge.

**Commentary.** Little is known about the copper and silver strikings of this issue. A popular theory is that these pieces were struck in the Mint, probably in the late 1850s under James Ross Snowden's tenure as Mint director. Walter Breen speculated that these dies were among the many sets of dies that were sealed in a carton on July 30, 1860 and not opened again until 1867.
The other—and to us, the more convincing—theory about the striking of these coins is that put forward by Saul Teichman and Andy Lustig on USPatterns.com: "These were believed to have been struck along with most of their silver counterparts in the 1870s. The first occurrence for a copper example was in Haseltine's February 1877 sale. This sale also included a copper example of Judd-59 [1836 Gobrecht dollar in copper]. This is probably no accident!" Undoubtedly, these pieces were struck to provide collectors of the day an example of this rare date.

**Physical Description.** At the time of the Parmelee Sale in 1890 it was stated that "only 3 [were] struck." However, today five examples are known in copper, one impounded in the Connecticut State Library. Another was in the historic 1914 ANS exhibit (owned at that time by William Woodin). All of the copper strikings show evidence on each side of die rust. As an interesting sidenote, two silver examples are known and they show no evidence of die rust, which would indicate they may have been produced in the 1830s to test a close collar or steam press.
The surfaces of this piece display the extensive traces of die rust that one would expect on a restrike 1827/3 quarter. The silver-plating was well done and is still intact over each side, but it has naturally subdued much of the mirror like finish in the fields. Slight golden toning is seen on the right reverse. This piece is identifiable as the Lemus Collection example by a lint mark to the left of star 8.

**Census and Provenance.** Numismatic researcher David Stone has compiled the following roster of known copper restrike 1827/3 quarters using information supplied by Steve Tompkins and Karl Moulton in *Early United States Quarters 1796-1838*:

1. Matthew Stickney (before 1894); Stickney Estate (1894-1907); The Matthew Stickney Collection (Henry Chapman, 6/1907), lot 448; Virgil Brand (accession number 38987); Joseph C. Mitchelson; The Connecticut State History Museum (inventory number 11563).
   Tompkins-Moulton believe that Stickney obtained this coin from the Mint around 1877, based on his earlier dealings with the 1804 dollar, etc. They also think that Mitchelson obtained the coin through the Chicago Coin Company, owned by Brand and T. E. Leon. These speculations are not unlikely, but the supporting evidence is not stated. Since the coin has not appeared in any auction or other public sale in more than 100 years and we determined that it is not the silver-plated example in the present sale, we are safe in assuming that this is the Mitchelson coin.
2. William J. Jenks Collection (Cogan, 4/1877), lot 359; Lorin G. Parmelee Collection (New York Coin and Stamp, 6/1890), lot 22, bought in; Virgil Brand (1899 private sale, accession number 20762); Virgil Brand Part I (Bowers and Merena, 11/1983), lot 476; Auction '90 (Superior, 8/1990), lot 1417; ANA Spring Sale (Heritage, 2/1991), lot 1388; Americana Sale (Stack's, 1/2004), lot 3701. This coin is plated in all its auction appearances and has a small dot in the field near Liberty's throat that makes a reliable pedigree marker.
3. Coin Sale (Haseltine, 2/1887), lot 556; The Woodside Collection of Patterns (New York Coin and Stamp, 4/1892) lot 13; George Hull Collection (J. W. Scott, 11/1895), lot 731, bought in; Virgil Brand (1895 private sale, accession number 14960); Virgil Brand Estate. Tompkins-Moulton pedigree continues from this point, unknown source for their information. Belden E. Roach Collection (B. Max Mehl, 2/1944), lot 2387; Royal Sale (B. Max Mehl, 3/1948), lot 2632; Curtis-Talmadge Sale (Kosoff, 2/1950), lot 1025; King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1711; James P. Randall; Charles Ruby; Clarke E. Gilhousen Part III (Superior, 10/1973), lot 598, Auction '80 (Stack's, 8/1980), lot 1386; 65th Anniversary Sale (Stack's, 10/2000), lot 692. The lot descriptions in the Roach and Royal sales match, but the plate in the Royal Sale is a stock photo of the wrong coin; no rust at all on the reverse.
4. Peter Gschwend Collection (Elder, 6/1908), lot A in the second addendum; William H. Woodin, featured in the 1914 ANS exhibit and the Adams-Woodin pattern reference. In Stack's sale of 1/1990, the cataloger states that this coin was plate-matched to the silver-plated coin in that sale. The plate in the Adams-Woodin book is a grainy halftone, so it is unknown how this can be verified. These pedigree markers do not show: the bruise under Liberty's eye, the lintmark in the field next to star 8, or the small dot near the dentils at star 8. Tompkins-Moulton have information that Fred Olsen bought this coin, along with many others, in the 1930s. Their pedigree continues from here. Fred E. Olsen Sale (B. Max Mehl, 11/1944), lot 203; John H. Morris, Jr.; 1953 ANA Sale (Numismatic Gallery, 8/1953), lot 854, bought in by Kreisberg; Coin Sale (Kreisberg, 6/1969), lot 456, bought in; Coin Sale (Kreisberg, 1/1970), lot 625; Auction '85 (Superior, 7/1985), lot 678; U.S. Coins (Stack's, 4/1996), lot 1400; Anthony Bongiovanni. Tompkins-Moulton say that the two Kreisberg appearances are identical.
5. ANA (Superior, 8/1975), lot 1231, silver-plated; ANA (Steve Ivy, 8/1980), lot 682; Stack-Teich Sale (Stack's, 1/1990), lot 1384. **The present coin.** Tompkins-Moulton believe this coin was plated when it was produced by Henry Linderman and that it was offered as lot 38 in the Lyman Low sale of his collection in June 1887. The lot description is quoted in part: " ... the lack of polish on certain portions of the dies prevented the brilliancy customary with proofs of a more recent date."

*From The Lemus Collection, Queller Family Collection Part Two.*(#11171)

## Innovative 1836 Two Cent Pattern in Billon
## Judd-52, PR65

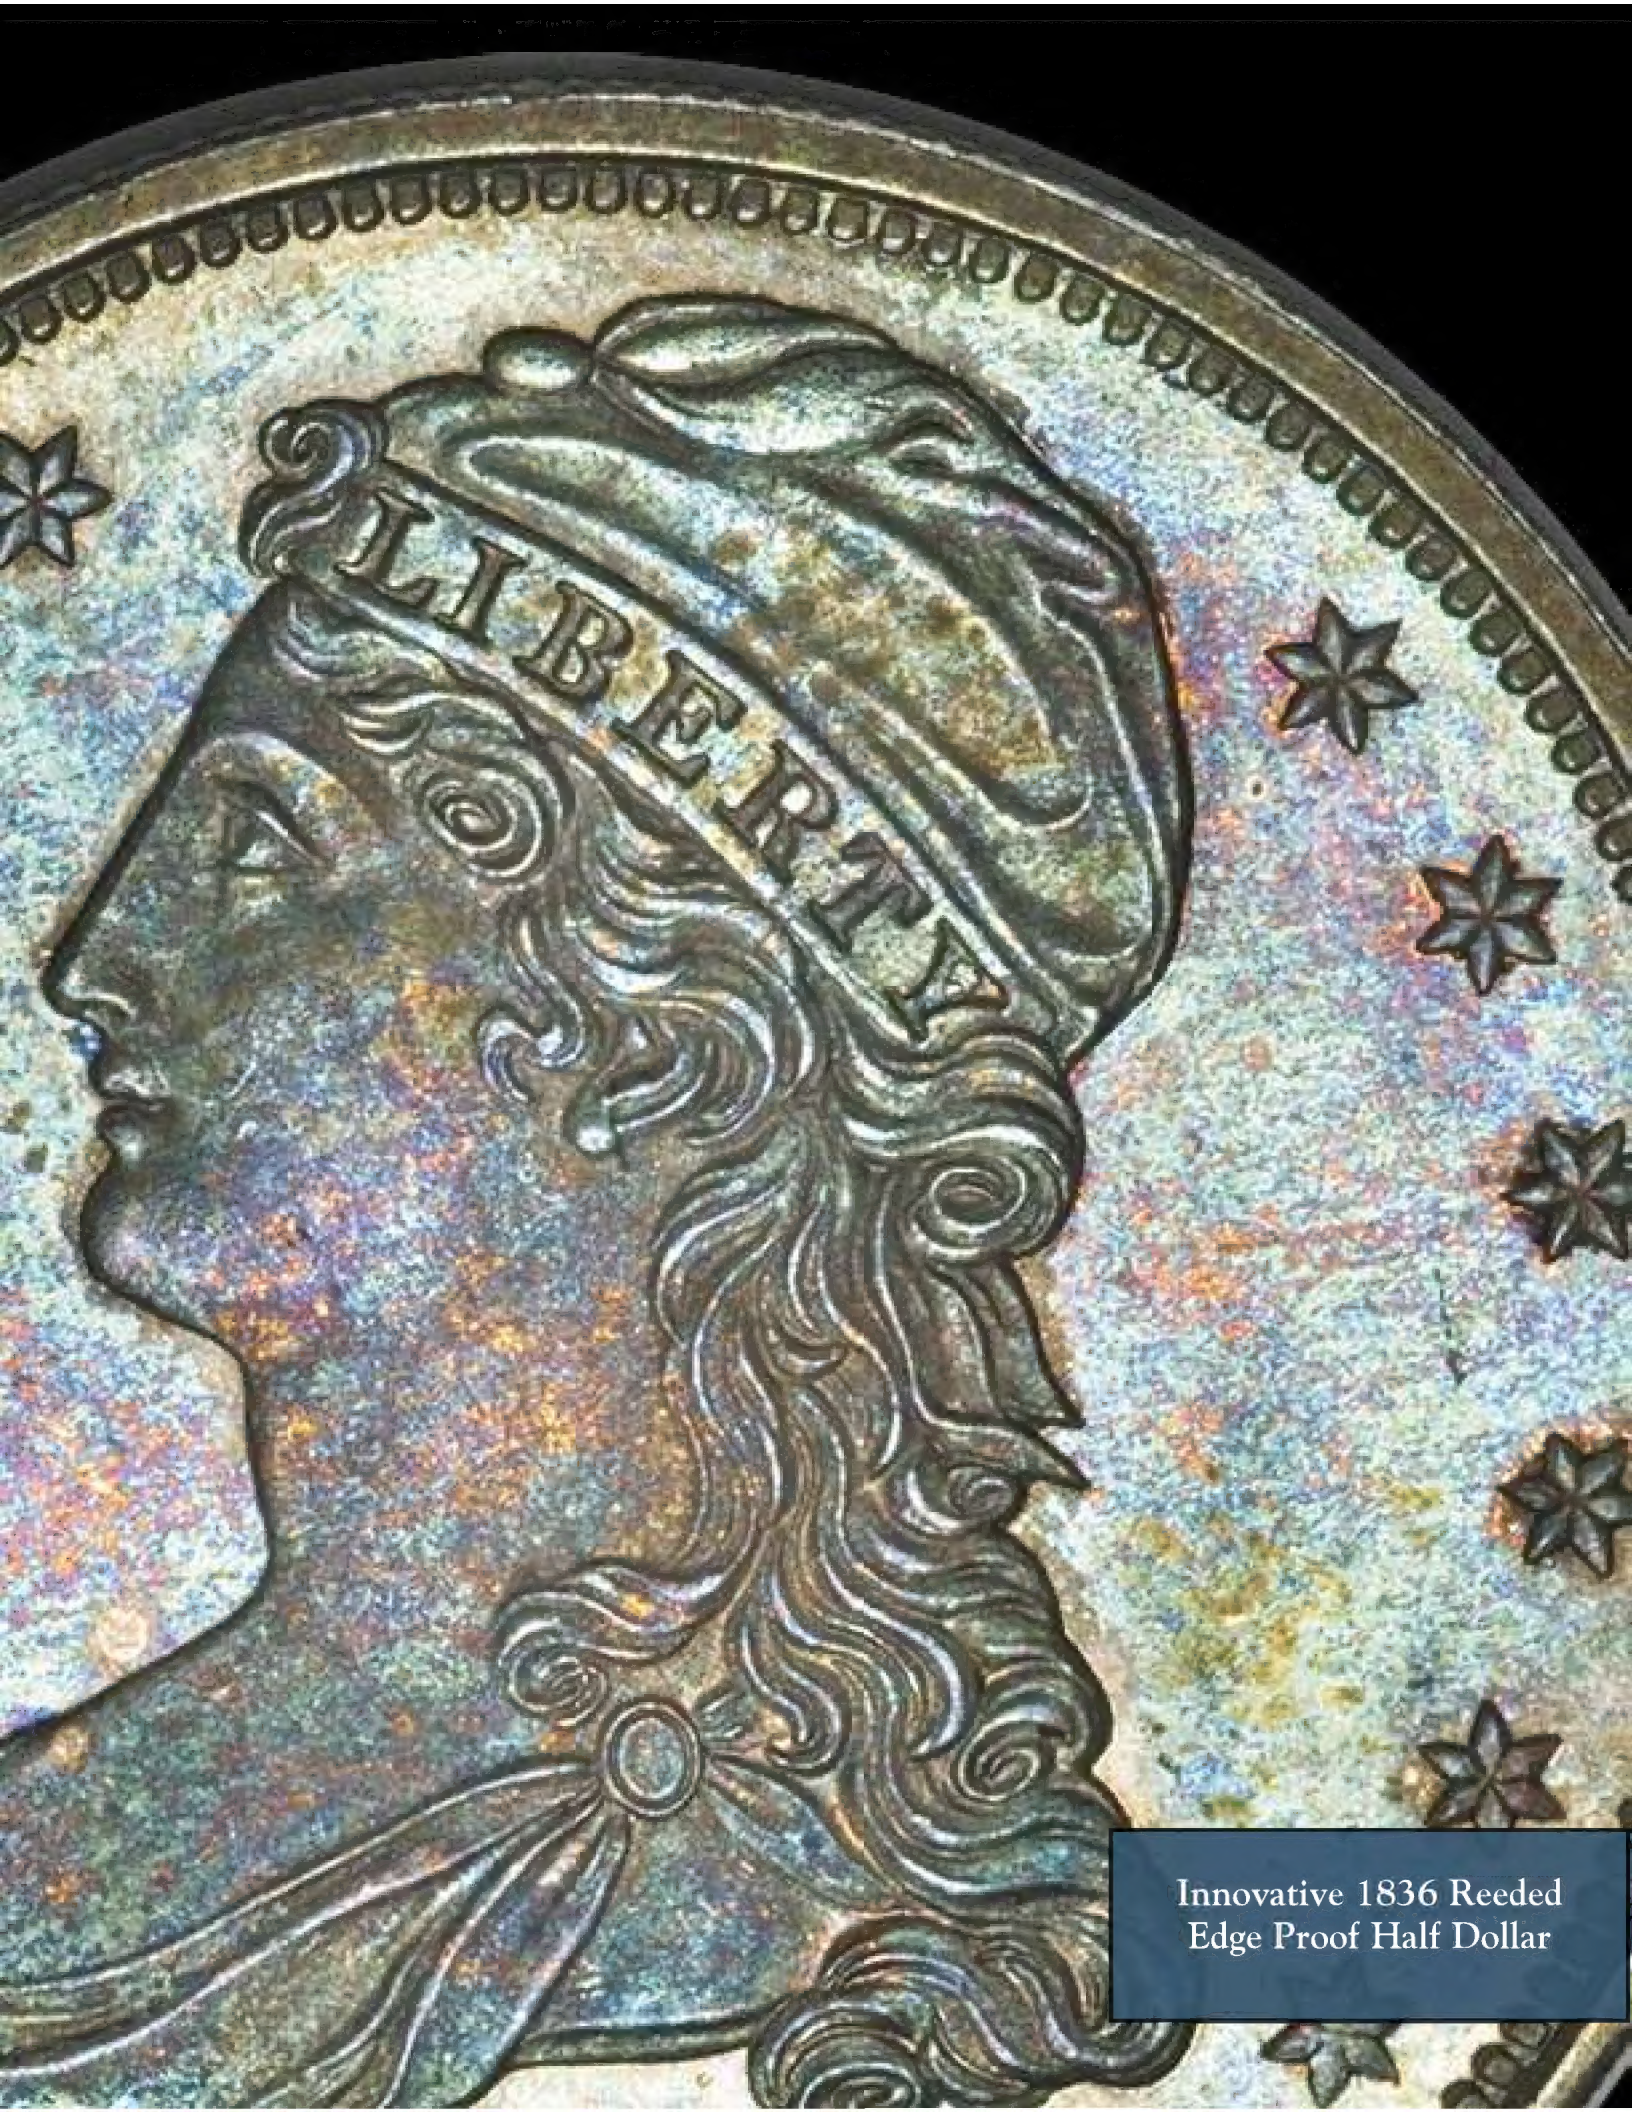
1508 **1836 Two Cents, Judd-52, Pollock-55, Low R.6, PR65 NGC.**

**Design.** Obverse: A small eagle with outstretched wings standing on a cloud, with the peripheral legend UNITED STATES OF AMERICA and 1836 below. Reverse: The denomination TWO CENTS surrounded by a laurel wreath. Struck in billon (90% copper, 10% silver) with a plain edge.

**Commentary.** The two cent denomination was proposed as part of the Act of January 13, 1837. Unfortunately, the portion of the bill dealing with the two cent coin was deleted before the bill was passed. The two cent coin became a reality only in 1864.

**Physical Description.** A well-preserved specimen, with a sharp strike and wisps of gray toning. An attractive example of this early pattern. **NGC Census:** 2 in PR65, none finer. **PCGS Population:** 1 in PR65, none finer (12/08).

**Provenance.** *Stack's private treaty transaction (10/1991).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11194)



Innovative 1836 Reeded Edge Proof Half Dollar

## Rare, Innovative 1836 Reeded Edge Proof Half Dollar, Low R.7 as Proof Tied for Finest Certified, Judd-57, PR65

1509 **1836 Half Dollar, Judd-57, Pollock-60, Low R.7 as Proof, PR65 NGC.**

**Design.** The obverse features a modified Capped Bust design, with six stars to the left and seven stars to the right, and the date below. The reverse consists of a perched eagle with shield, clutching three arrows and an olive branch. The peripheral legend UNITED STATES OF AMERICA is above and denomination 50 CENTS below. Struck in silver with a reeded edge.

**Commentary.** Although the 1836 Capped Bust, Reeded Edge half dollars have been widely collected as patterns, most numismatists now believe the coins are regular issues. The variety is listed in Davis, Adams-Woodin, Taxay, Pollock, and Judd, but recent editions of the standard references include a caveat about the issue's disputed pattern status. The coins were struck on November 8, 1836, well in advance of the Act of January 18, 1837, which authorized the new weight standard for the denomination. This circumstance is probably the reason early researchers considered the coins to be patterns. Date of production notwithstanding, the fact that nearly all examples of this issue were released into circulation through regular commercial channels seems undeniable and decisive. Regardless of its official status, the issue continues to be collected by pattern specialists and Bust half dollar aficionados alike.

The year 1836 saw a watershed event in Mint operations. Steam power was introduced, and the first steam press began operation at 10:35 a.m. on March 23, 1836. The Capped Bust, Reeded Edge half dollars of 1836 were the first coins of this denomination to be minted with the new technology. Another innovation, the close collar, was also used on half dollars for the first time with this issue. The close collar introduced many improvements in coin production. It confined the planchet during striking operations, ensuring that all coins had uniform diameter. The coins were well centered, and sharpness of detail was much improved. The new technology was incompatible with the ornate lettered edge devices used in previous years, however. The edge lettering was damaged when the planchet tried to expand against the restraining collar during striking operations. It was found that a close collar could impart a reeded edge to the coins during striking and the coins could be easily ejected afterward. Technology thus mandated the change to the new reeded edge design.

It was originally intended to use the Seated Liberty design for the obverse of the new half dollar, to match the Gobrecht dollars that were minted for the first time in 1836. Unforeseen difficulties caused authorities to change their minds, and Christian Gobrecht settled for slightly altering the old John Reich designs. Some early catalogers refer to the variety by the engraver's name, rather than the modern Reeded Edge designation. In the Cohen collection (Edward Cogan, 10/1875), lot 622, the coin is described as, "1836 Gobrecht head. *Beautiful* proof. Extremely rare in this condition." The lot was purchased by Richard B. Windsor for $12.50, a respectable sum at the time.

The entire mintage of 1836 Reeded Edge half dollars was accomplished on November 11, 1836. Mint records show that 1,200 business strikes and an unknown number of proofs were struck. The business strikes were released into circulation, with the result that few high grade specimens are currently available. Experts estimate that perhaps two dozen proof specimens were struck, with approximately half that number surviving today.

The small population of 1836 Reeded Edge proof half dollars is under intense pressure because of the low survival rate of high-quality business strikes. Collectors from several disciplines pursue the issue. Type collectors, Bust half dollar specialists, and pattern collectors all aspire to own one. Its infrequent appearance at auction underscores its rarity. In *The Official Red Book Of Auction Records 1995-2003*, Jeff Garrett and John Dannreuther only list six appearances of an 1836 Reeded Edge proof half dollar during that nine-year time frame. Vigorous competition is expected for this high-end numismatic classic.

**Physical Description.** The strike is extraordinary, with exquisite detail on the hair over the ear and the eagle's talons, areas that often appear weak on this issue. The virtually flawless fields complement the strongly impressed devices. Iridescent green, rose, and cerulean-blue toning vividly highlights the surfaces. All the subtle intangibles combine to produce stunning eye appeal. The present offering is a spectacular opportunity that may not be duplicated for many years. **NGC Census:** 1 in PR64 Cameo, and this piece in PR65. **PCGS Population:** A single coin in PR63 (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*

## 1836 Name Below Base Gobrecht Dollar, Judd-58, PR62
## A Major Rarity in the Series

1510 **1836 Name Below Base, Judd-58 Restrike, Pollock-61, R.6(?), PR62 NGC.**

**Design.** Die Alignment IV (center of Liberty's head opposite right side of F in OF). Christian Gobrecht's Seated Liberty design, no stars in the field, C. GOBRECHT F. in the field below the base. On the reverse the eagle flies level in a starry field. Struck in silver with a plain edge.

**Commentary.** The Name Below Base Gobrecht dollar is an American classic. Much has been written about this issue over the past 150 years, including an apocryphal mintage of only 18 pieces. These coins have been highly sought after since striking and a considerable body of misinformation has grown up about them. Much research has been conducted over the past several years into the Gobrecht series, with special focus on the Name Below Base coins. The inescapable conclusions are that these pieces were restrikes made during the tenure of James Ross Snowden and that no original strikings were made in 1836 or 1837. This also means all the examples of Judd-58 will be seen in Die Alignment III (center of Liberty's head opposite N in ONE) or as seen here, in Die Alignment IV (center of Liberty's head opposite right side of F in OF).

It is impossible to unequivocally state when a particular Name Below Base dollar was struck. What is known, however, is that Die Alignment III coins show heavier die cracks than Die Alignment IV coins, leading to the conclusion that Die Alignment IV coins were struck first. The generally accepted time frame for the striking of these pieces is the late 1850s for Die Alignment IV pieces and the 1860s for those in Die Alignment III.

The popularity of the Name Below Base dollar was immediate. The first auction record that we are aware of is from the J.N.T. Levick Auction in December 1859 but that coin did not sell and was bought in by Mason at $32.50. The MacKenzie Sale in 1868 had the first Name Below Base that sold. That piece brought an astounding $90.00. This extraordinarily high price may well be because of the novelty of these pieces. Two years later, prices reached a more "realistic" level when dealer Edward Cogan bought one out of the Fewsmith auction for $35.

Probably fewer than 60 examples are known today of the Name Below Base Gobrecht dollar. These rare pieces are a cornerstone of any collection of Gobrecht dollars or 19th century set of silver dollars. They are generally found in PR60 or better grades, and this piece is above average.

**Physical Description.** As one would expect from a proof produced in the late 1850s, the fields are deeply mirrored on each side. This is apparent even through the multiple layers of deep blue, gray, and rose-golden toning that cover each side. The high points of the design are completely brought up, including Liberty's head, foot and sandal, and the eagle's breast feathers. Light hairlines account for the grade, but they are not apparent to the unaided eye because of the depth of toning. **NGC Census:** 1 in PR62, 9 finer. **PCGS Population:** 2 in PR62, 10 finer (12/08).

**Provenance.** *Ex: Stack's (10/1991), lot 840.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#11217)

# 1836 Proof Gobrecht Dollar, Judd-60
# Die Alignment I, Second Striking Period

1511 **1836 Name on Base, Judd-60 Original, Pollock-65, R.1—Artificial Toning—NCS. Proof.**

**Design.** The familiar Christian Gobrecht Seated Liberty design, no stars in the field, C. GOBRECHT F. in recessed letters on the base. On the reverse the eagle flies upward in a starry field. Struck in silver with a plain edge. Die Alignment I (Liberty's head opposite DO).

**Commentary.** Presumably a late December striking, with the die scratch plainly evident above the eagle's wing. Of the 1,000 coins struck in late 1836, it is believed that 400 were produced in early December and 600 in late December. These two striking periods are indistinguishable except for the accidental die scratch above the eagle's wing that points to the AT in STATES. However, there is a distinct difference in the level of preservation between these two striking periods. A great many dollars from the first period were given out as presentation pieces, and thus are seen today in high grades. The later strikings, such as this coin, were all deposited in a local bank, and are usually found circulated.

Gobrecht dollars are not generally considered patterns, except by tradition. The 1836-dated coins were struck for circulation. Most researchers today consider only the 1838 coins true patterns. However, there are many off-metal fantasy pieces, unusual mulings, and some experimental strikings (Judd-61 for instance, an 1836 dollar struck with a reeded edge). This long tradition of calling Gobrecht dollars patterns will likely continue, and even specialists today refer to these pieces by their Judd number.

**Physical Description.** This is a deeply toned and equally deeply mirrored example. The toning is multicolored and well-balanced from side-to-side. The deep coloration helps subdue the light hairlining that can be seen with a magnifier. Sharply, but not fully detailed with complete definition on Liberty's foot, mostly complete hair detail, and just a bit of softness on the eagle's breast feathers.

**Provenance.** *Ex: Stack's Auction (11/1989), lot 530.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11225)

## Glittering 1836 Pattern Gold Dollar
## Struck in Gold
## Judd-67, PR65 Cameo

1512 **1836 Gold Dollar, Judd-67, Pollock-70, R.5, PR65 Cameo NGC.**

**Design.** The obverse features a Liberty cap surrounded by rays of glory, similar in design to certain contemporary Mexican issues. The reverse features the denomination 1 D. within a coiled palm frond, with the date below and UNITED STATES OF AMERICA above. Christian Gobrecht is credited with both designs. Struck in gold with a plain edge.

**Commentary.** Judd-67 is the first gold dollar pattern struck in anticipation of a future coinage. It is also one of the few gold patterns, actually struck in gold, that can be obtained at a somewhat reasonable price. The cataloger for Stack's in 2003 noted the blundered reverse die, with the C in AMERICA first punched horizontally, with its opening toward the border, and then corrected. The observation provides clear evidence that the dies (or a hub) were created through the use of individual letter punches. Both originals and restrikes exist for Judd-67, with at least one overstruck example known on an 1859 gold dollar as its host. That piece is clearly visible at USPatterns.com.

**Physical Description.** This remarkable Gem has exquisite yellow-gold surfaces with fully mirrored fields of moderate depth, around lovely devices that exhibit excellent luster. A few faint hairlines and tiny contact marks are consistent with the grade. **NGC Census:** 3 in PR65 Cameo, 6 with finer numerical grades (all designations). **PCGS Population:** 3 in PR65, 3 finer, none with a cameo designation (12/08).

**Provenance.** *The Randolph S. Rothschild Collection (Stack's, 10/2003), lot 1112.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#11260)

# Marvelous 1838 Half Dollar Pattern
# Judd-72, PR66 Cameo

1513 **1838 Half Dollar, Judd-72, Pollock-75, R.5, PR66 Cameo NGC.**

**Design.** Obverse: Bust of Liberty facing left, stars 7x6, 1838 below. Reverse: An eagle with spread wings holding an olive branch and four arrows. The legend UNITED STATES OF AMERICA above and denomination HALF DOLLAR below. Medallic alignment. Struck in silver with a reeded edge.

**Commentary.** This issue was struck in both original and restrike formats. The originals weigh approximately 206 grains, conforming to the weight standard for half dollars before February 21,1853. The restrikes weigh approximately 192 grains, the standard weight after the reduction of 1853. The restrike issues are further divided into early and late period restrikes. Early restrikes were struck circa 1858 and the dies show little or no rust. Later restrikes, struck circa 1870, show extensive die rust and flat central detail. The present coin weighs 192 grains and shows virtually no rust spots, making it an early restrike example. An interesting and historically significant specimen, created in the days of Mint Director James Ross Snowden's liberal restrike program.

**Physical Description.** The strike is strong at the periphery, but a little softness shows in the hair and eagle's breast. The surfaces are undisturbed and reflective, with light golden toning over each side. Vivid contrast is evident on both sides, resulting in the coveted Cameo designation. **NGC Census:** 2 in PR66 Cameo, with the only finer piece a PR67 Cameo. **PCGS Population:** 3 in PR66, none finer (12/08).

**Provenance.** *Ex: Auction '81 (RARCOA, 7/1981), lot 309. From The Lemus Collection, Queller Family Collection Part Two.* (#11282)

## Appealing 1838 Half Dollar Pattern
## Probable Restrike
## Judd-73, PR64

1514 **1838 Half Dollar, Judd-73 Restrike, Pollock-77, R.5, PR64 NGC.**

**Design.** The central figure of the obverse die is a bust of Liberty facing left, wearing a diadem, with a ribbon inscribed LIBERTY. Thirteen stars at the periphery are arranged seven left and six right, with 1838 below. The reverse features an eagle flying left, with the legend UNITED STATES OF AMERICA above and the denomination HALF DOLLAR below. Struck in silver with a medal turn and a reeded edge.

**Commentary.** From a design by William Kneass, Judd-73 is found in both original and restrike formats. The extensive die cracks on the reverse would seem to indicate the present example is a restrike, but this evidence is inconclusive, as no examples are known from perfect dies. In any case, the present coin is an attractive example of this scarce and popular pattern.

**Physical Description.** The strike is strong at the periphery, with excellent detail on the star centers, but there is a little softness on the hair and eagle's breast, as usually seen on this issue. Fetchingly toned in shades of green and brown, with the color deepest at the borders. Overall eye appeal is strong. An exceptionally pleasing specimen for the dedicated pattern specialist. **NGC Census:** 10 in PR64 including a single cameo example; 9 finer. **PCGS Population:** 10 in PR64, 8 finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction (circa 1979).*
*From The Lemus Collection, Queller Family Collection Part Two.*(#11288)

# Extremely Rare 1838 Half Dollar Pattern, Judd-76A, PR66
# One of Two Pieces Believed Known; Ex: Witham

1515 **1838 Seated Liberty Half Dollar, Judd-76A Restrike, Pollock-82, R.8, PR66 NGC.**

**Design.** 193 grains. Medallic alignment. The obverse is similar to the adopted design with only slight differences. The reverse, however, is noticeably different, with a spread-winged eagle that holds four arrows and a laurel branch. Struck in silver with a reeded edge.

**Commentary.** Pollock notes that the reverse design by Christian Gobrecht is based on a mica drawing (No. 39) reproduced in Elvira Clain-Stefanelli's article "From the Drawingboard of a Coin-Engraver" in the *1991 ANA Anthology*. Ms. Clain-Stefanelli believed this reverse design was intended for the reverse of the quarter eagle.

Earlier editions of Judd stated that there were two variants of this design: a straight date and a curved date. The straight date is actually from the obverse that has LIBERTY incused (as seen here). The curved date is seen on Judd-76b, which was struck from an obverse die where LIBERTY is raised. The Judd-76a restrikes are believed to have been struck in the 1870s. Both show extensive reverse die rust. Only two pieces of the reeded edge variant are believed known. The USPatterns.com website lists two pieces, the Garrett-Bass specimen and the present Witham-Queller coin.

**Physical Description.** The fields on each side of this piece are bright and glassy with significant mirrorlike reflectivity. Both obverse and reverse (but especially the former) show a number of tiny lint marks that were struck into the coin at the time of manufacture. Light reddish-golden toning is seen over the surfaces, with deeper accents of russet and blue at the margins. A major rarity for the pattern collector. **NGC Census:** One in PR64 and one (this coin) in PR66, presumably corresponding to the pieces listed at USPatterns.com. **PCGS Population:** None. (12/08).

**Provenance.** *Ex: Stewart Witham; Auction '81 (RARCOA, 7/81), lot 314.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11305)

## Magnificent 1838 Seated Liberty Half Dollar Pattern Judd-77, PR66 Red and Brown

1516 **1838 Seated Liberty Half Dollar, Judd-77 Restrike, Pollock-85, High R.7, PR66 Red and Brown NGC.**

**Design.** Obverse: Liberty seated on a rock with shield and pole. A scroll draped across the shield has the inscription LIBERTY in incuse letters. Thirteen stars around and the date below. Reverse: Eagle with wings spread holding an olive branch and four arrows. The legend UNITED STATES OF AMERICA around and the denomination HALF DOLLAR below. Struck in copper with a plain edge.

**Commentary.** All examples seen of this extremely rare pattern show indications of extensive die rust. Judd-77 is a restrike issue produced for sale to collectors in the 1870s. An early auction appearance was in the Parmelee Collection (New York Coin & Stamp, 6/1890), lot 34. The preceding lot in that sale offered a specimen of Judd-76, from the same dies struck in silver. The issue was unlisted in Adams-Woodin and was not displayed in the 1914 ANS Exhibition. USPatterns.com states that four pieces are known to collectors today. The present offering is an opportunity that may not be repeated for years.

**Physical Description.** A magnificent specimen, with virtually faultless fields complementing an extraordinary strike. Much original mint red remains, blending gently into pale blue and chocolate-brown. The second finest certified at both services combined. **NGC Census:** This coin, graded PR66 Red and Brown, as well as a specimen graded PR67 Red and Brown Star. **PCGS Population:** A single coin graded PR63 Red and Brown (12/08).

**Provenance.** *Ex: Stewart Witham; Auction' 81 (RARCOA, 7/1981), lot 315.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#11310)

# Extremely Rare 1838 Half Dollar Pattern
# Judd-78, PR65 Brown
# Only Two Specimens in Collectors' Hands

1517 **1838 Seated Liberty Half Dollar, Judd-78 Restrike, Pollock-84, High R.7, PR65 Brown PCGS.**

**Design.** Obverse: Liberty seated on a rock with shield and pole. A scroll draped across the shield has the inscription LIBERTY in incuse letters. Thirteen stars around and the date below. Reverse: Eagle with wings spread holding an olive branch and four arrows. The legend UNITED STATES OF AMERICA around and the denomination HALF DOLLAR below. Medallic turn. Struck in copper with a reeded edge.

**Commentary.** Judd-78 is a restrike issue, with all known examples showing evidence of extensive die rust. The issue is extremely rare, with only four examples extant. Exactly half of the known population is currently impounded in museum collections, leaving only two coins available for collectors. Like the Judd-77 1838 half dollar pattern, The issue was unlisted in Adams-Woodin, and no example was shown in the 1914 ANS Exhibition. This piece is so rare that it was missing in most of the great pattern collections of the past, including Linderman, Parmelee, Woodside, Woodin, Farouk, and Lohr. Clearly, the current offering is a "can't miss" opportunity for the advanced pattern collector.

**Physical Description.** Sharply struck, with just a touch of softness on the eagle's breast, as always seen on this issue. Traces of mint red linger at the rims and in sheltered areas near the devices. The surfaces display vivid hues of deep brown and cerulean-blue toning. Extraordinary eye appeal enhances this nearly unique numismatic treasure. **PCGS Population:** This is the sole example graded by PCGS in any grade. **NGC Census:** A single piece, graded PR66 Red and Brown (12/08).

**Census and Provenance.** Only four specimens are known of Judd-78:

1. Stewart Witham; Auction '81 (RARCOA, 7/1981), lot 316; Morris Evans; Rarities Sale (Bowers and Merena, 8/1998), lot 2034; Public Auction sale (Superior, 4/2003).
2. Numismatics, Ltd; purchased by Harry Bass 8/12/1974; Harry Bass Collection (Bowers and Merena, 5/1999), lot 1148. **The present specimen.**
3. J.C. Mitchelson; Connecticut State Library, Inv. No. 11569.
4. Byron Reed; Omaha City Library, Inv. No. P-18.

**Other Appearances.** Probably an earlier citation of one of the coins listed above:

A. R.C. Davis Collection (New York Coin and Stamp, 1/1890), lot 1019a.

*From The Lemus Collection, Queller Family Collection Part Two.* (#11315)

## 1838 Seated Half Pattern With Incuse LIBERTY
## Judd-79A, PR66

1518 **1838 Seated Liberty Half Dollar, Judd-79A, Pollock-86, Low R.7, PR66 NGC.**

**Design.** 206 grains. Medallic orientation. The obverse has the Seated Liberty design, close to that adopted for circulation strikes. This is Judd's "straight date," which has LIBERTY incused on the shield. The reverse shows Gobrecht's Flying Eagle design, with UNITED STATES OF AMERICA on the upper rim and HALF DOLLAR at the lower margin. Struck in silver with a reeded edge.

**Commentary.** According to USPatterns.com there are no restrikes of this issue, only originals, which were struck in 1838: "No light weight restrikes have ever been confirmed." One of about a dozen pieces known.

**Physical Description.** This example of Judd-79A is especially well preserved. The fields on each side are heavily striated, which imparts a profound flash on both obverse and reverse. The proof mirrors flash strongly through the rich orange-russet toning seen over each side. **NGC Census:** 3 in PR66, 1 finer. **PCGS Population:** 1 in PR66, none finer (12/08).

**Provenance.** *Ex: Auction '81 (RARCOA, 7/1981), lot 318.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#11328)

## Spectacular 1838 Seated Liberty Half Dollar Pattern
## One of the Finest of Three Traced, Judd-80 Restrike, PR65

1519 **1838 Seated Liberty Half Dollar, Judd-80 Restrike, Pollock-87, High R.7, PR65 NGC.**

**Design.** The obverse design is a slightly modified Seated Liberty motif, with the rock larger, the stars spaced differently, and Liberty's drapery rearranged. The word LIBERTY is incused on the scroll. The date is in the exergue. The reverse features a "defiant" eagle, clutching an olive branch and six arrows, with the legend UNITED STATES OF AMERICA around and HALF DOL. below. Struck in silver with a reeded edge.

**Commentary.** Experts agree Judd-80 is a restrike issue, coined long after 1838. Andrew Pollock states the issue was coined in 1858 or later, but allows for the possibility that some original strikings may exist. USPatterns.com's experts doubt that any originals exist and believe the reverse die was not even completed until the late 1860s or early 1870s. A. Loudon Snowden mentions finding a large group of dies and hubs on hand when he assumed the position of chief coiner. Per Snowden, "Among the number were several from which no pieces are known to have been struck. Many of the devices were beautiful in design and exquisite in execution. This was particularly the case with a dollar and half dollar hub by Gobrecht."

Snowden asserted that these items were destroyed in the spring of 1869, but the veracity of this statement is dubious. A hub trial of the eagle on the reverse of Judd-80 survives in the National Numismatic Collection of the Smithsonian. It is listed as Pollock-3058. Pollock states that the hub used to strike this trial still exists. It is fascinating to think the half dollar hub Snowden mentions might have been this very hub of the Judd-80 design. It would have been a simple matter to use such a hub to create dies for this beautiful pattern in 1869, just the time frame envisioned by USPatterns.com for the completion of the die.

In support of the theory that Judd-80 had a late production date, the piece was completely unknown before 1875. The first auction appearance was in the Cohen Collection (Edward Cogan, 10/1875), lot 420. Cogan's described the lot as, "1838 Half Dollar. Liberty seated. Rev. Flying Eagle, holding in its talons six arrows and an olive branch. Underneath, Half Dollar. This variety has never before been offered at auction. Only two or three are known to exist, rarer than either of the preceding. Beautiful proof." Dealer John W. Haseltine purchased the lot for $10.50. Haseltine seems to have had an affinity for this design. The first auction appearance of Judd-81, the same design in copper, occurred in his Coin Sale (Haseltine, 2/1877), lot 559. Perhaps Haseltine liked the coin he acquired from Cogan and used his influence at the Mint to get a few examples struck in copper. It is only speculation, but it would not be out of character for Haseltine and the Mint under Henry Linderman.

Whatever its origin, Judd-80 is a rare and beautiful coin. We believe only three or four pieces exist, nearly the same estimate Cogan made 133 years ago, and the present example is one of the finest. We expect spirited bidding as advanced collectors compete for this numismatic treasure.

**Physical Description.** The present specimen features a better than average strike for this issue. For some reason, all known examples of Judd-80 have some softness on the central devices. The peripheral devices are strong, with crisp detail on the hair and star centrils. Most of each side is brilliant, with a thin ring of blue toning around the margins. A shallow, scimitar-shaped mark from Liberty's arm to star 6 serves as a pedigree marker. NGC has graded only one specimen at the PR65 level, with none finer, and PCGS has certified no proof examples of Judd-80 at the Gem level (11/08).

**Census and Provenance.** We believe this roster includes all known examples of Judd-80:

1. H.P. Smith Collection (S.H. and H. Chapman, 5/1906), lot 1324; John Story Jenks Collection (H. Chapman, 5/1921), lot 5585; Anderson Dupont (Stack's, 11/1954), lot 2415; ANA (Stack's, 8/1976), lot 3597; Crouch Collection (Superior, 6/1977), lot 448; Auction '90 (RARCOA, 8/1990), lot 882; Public Auction Sale (Stack's, 9/1999), lot 1083. **The present specimen.**
2. Parmelee Collection, (New York Coin & Stamp, 6/1890), lot 36; Woodside Collection (New York Coin & Stamp, 4/1892), lot 26; Numismatics, Ltd.; Harry Bass, purchased on August 12, 1974; Harry Bass Collection (Bowers and Merena, 5/1999), lot 1150.
3. Stewart Witham; Auction '81 (RARCOA, 7/1981), lot 319; Rarities Sale (Bowers and Merena, 8/1998), lot 2036.

**Other Appearances.** These appearances may duplicate citations above, but conclusive evidence is lacking:

A. Cohen Collection (Edward Cogan, 10/1875), lot 420.
B. Virgil Brand; Dr. J. Hewitt Judd; The Illustrated History of United States Coins (Kosoff, 1962), lot 111.
*From The Lemus Collection, Queller Family Collection Part Two.*(#11332)

## Elusive 1838 Seated Half Dollar Pattern
## Judd-81 Restrike, PR64 Brown NGC

1520 **1838 Seated Liberty Half Dollar, Judd-81 Restrike, Pollock-88, Low R.7, PR64 Brown NGC.**

**Design.** The obverse has Christian Gobrecht's Seated Liberty design, without drapery, surrounded by 13 stars, and the date below the base. LIBERTY has incuse letters. The reverse has an eagle flying to the left, holding six arrows in its left claw, and an olive branch in its hidden right claw. UNITED STATES OF AMERICA follows the border from 8 o'clock clockwise to 4 o'clock, with HALF DOL. at the lower border. Struck in copper with a reeded edge.

**Commentary.** It is thought that six to eight examples of this variety are known in copper, and they were produced in the late 1860s or early 1870s. The first known auction appearance was in the 1875 Cogan sale of the Colonel Cohen Collection. Today, three of those known are in museums—the Smithsonian Institution, the Connecticut State Library, and the Western Heritage Museum—reducing the available population for collectors.

An unattributed comment at USPatterns.com suggests that the reverse die was actually a creation of the restrike period: "To my knowledge, no originals were ever made using this reverse die. In fact, I believe that this die was actually finished many years later either in the late 1860s or early 1870s."

**Physical Description.** Some evidence of a weak strike is noted at the centers, with some surface roughness and minor hairlines. The fields appear nicely mirrored, with a crescent of steel-blue and violet on the obverse that accompanies bright apple-green coloration. The reverse is similar with brighter green-gold at the center. **NGC Census:** This coin, as well as a piece in PR66 Brown. **PCGS Population:** A single coin in PR64 Brown (12/08)

**Provenance.** *Ex: Stack's private treaty. Earlier, from Auction '81 (RARCOA, 7/1981), lot 320. From The Lemus Collection, Queller Family Collection Part Two.*(#11337)

Plain Edge Judd-85 1838
Gobrecht Dollar, PR66★

## Plain Edge Judd-85 1838 Gobrecht Dollar, PR66 ★
## One of Only Twelve Estimated Known

1521 **1838 Name Omitted, Judd-85 Restrike, Pollock-94, High R.7, PR66 ★ NGC.**

**Design.** Die Alignment III (center of Liberty's head opposite the N in ONE). Christian Gobrecht's Seated Liberty design, stars around the periphery, C. GOBRECHT F. removed from the base. On the reverse, after a coin turn the eagle flies level in a starless field. Struck in silver with a plain edge.

**Commentary.** Many variants of Gobrecht dollars were struck beginning in 1836, continuing in 1837, 1838, and 1839, picking up again in the late 1850s and continuing through the 1870s. Of these many issues the only date that is believed to actually have been coined as a pattern is the 1838. Close examination of the die alignment and die cracks on these coins led researchers Jim Gray and Mike Carboneau to the conclusion that only Die Alignment IV 1838 dollars (center of Liberty's head opposite the right side of the F in OF) were struck in 1838 or 1839. Very few such original pieces have been seen, and they are characterized by a lack of die cracks on the reverse. This particular coin shows die cracking that is even more advanced than on regular Judd-84 (1838 reeded edge) coins, indicating the plain edge variants were struck after the reeded edge dollars. On this piece the crack through the tops of MERI is advanced slightly to the left of the M and joins the top of the final A. Similarly, the crack from the top of TE on most Judd-84 dollars is seen here connecting the tops of ITED. The die crack that normally connects the bottoms of LAR is significantly advanced to the right of R, almost even with the period. The other usual reverse die characteristics are present on this piece: the die spur on the curve of the D and the depression on the lower part of the F. This advanced state of the dies would indicate that the plain edge (Judd-85) dollars were probably struck during Henry Linderman's second term as Mint director, sometime between 1873 and 1878.

Judd-85 Gobrecht dollars are rarely seen. Gray and Carboneau have estimated that only a dozen coins exist of this variant. The Julius Korein example, now in the ANS, graded PR63. This is the finest Judd-85 that has been certified even though it is numerically tied with another PR66.

**Physical Description.** As one would expect from a coin graded PR66 ★ this piece has extraordinary eye appeal as well as surfaces that are nearly flawless. The fields are deeply mirrored, and there is just the slightest overlay of pale golden and lilac patina interspersed on each side. Sharply defined throughout. **NGC Census:** The two PR66 pieces mentioned above, with this ★ designated piece being considered the finer. **PCGS Population:** PCGS has not graded an example of Judd-85 finer than PR64 (12/08).

**Provenance.** *Ex: L.R. French Family Collection (Stack's, 1/1989), lot 17.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#11354)

# R.8 1839 Half Dollar Restrike, Judd-96, PR66 Brown
## Finest Certified of Only Two Available Today

1522 **1839 Half Dollar, Judd-96 Restrike, Pollock-104, R.8, PR66 Brown NGC.**

**Design.** Sometimes called the Backward Head, this pattern features an obverse much like that found on the regular-issue 1839 gold eagles, with a rounded tip on the forward edge of the bust truncation and a pointed tip on the rear edge—but the entire head is facing backward from that on the eagle, right rather than left. Thirteen stars ring the rim, with date 1839 below. The reverse is from the regular-issue Seated Liberty die, Medium Letters, as seen on the 1840 half dollars. Struck in copper with a reeded edge.

**Commentary.** An experiment begun in 1838, the various half dollar patterns continued into 1839, but many of them were clearly restruck as numismatic delicacies or "trade bait" for the Mint Cabinet in the late 1850s. The original pieces struck conform to the weight standard of the Mint Act of January 18, 1837, at 206.25 grains of .900 fine silver (0.430 troy oz.; 0.387 oz. pure silver), while the restrikes conform to the lesser-weight requirements of the Mint Act of February 21, 1853, that is 192 grains (0.4 oz.; 0.36 oz. pure silver).

The original silver and copper half dollars from these dies are classified Judd-93 and 94, while the restrikes are classified Judd-95 and 96, respectively. USPatterns.com makes a useful distinction between the two groups, calling the originals "essai" (a trial strike, from the French *essayer*, "to try") and the restrikes "fantasy pieces." Only three pieces of the Judd-96 are known, one of them in a museum collection. All of the various half dollar patterns of 1838 and 1839 are incredibly rare to unique—with the sole exceptions of the Judd-72 and 73 in silver—and all are monumentally important. These pieces represent a profound shift in design, from the older Capped Bust style to more-modern designs, and as such are significant previews of the future of U.S. silver coinage.

**Physical Description.** The fields are moderately reflective and considerably enliven the lovely iridescent brown, pale red, and blue coloration. This evenly balanced coin has no detracting contact marks, and just a bit of slight strike softness appears in the centers of each side. Andrew Pollock notes that the present Lemus Collection specimen, *one of only two available and the finest in private hands*, weighs 173.0 grains, has a diameter of 1.196 in. and is in 180-degree ("coin turn") die alignment. **NGC Census:** one PR66 Brown (this specimen). **PCGS Population:** one PR64 Brown (10/08). Confirmation of the two pieces below with, unusually, no duplication.

**Census and Provenance.** We can trace only three specimens:

1. Stewart Witham; Auction '81 (RARCOA, 7/1981), lot 326. **The present specimen.**
2. J.C. Mitchelson (1913); Connecticut State Library.
3. D. Weaver (1/1974); Harry W. Bass, Jr. Collection (Bowers and Merena, 5/1999), lot 1154; Shippee. PR64 Brown PCGS.

*From The Lemus Collection, Queller Family Collection Part Two.* (#11410)

Splendidly Toned Near-Gem Judd-97 1839 'Backward Head' Half Dollar

## Splendidly Toned Near-Gem Judd-97, 1839 'Backward Head' Half Dollar
## One of Four or Five Known, Tied for Finest Certified

1523 **1839 Half Dollar, Judd-97 Restrike, Pollock-107, High R.7, PR64 NGC.**

**Design.** The Backward Head design. The obverse is much like that found on the regular-issue 1839 gold eagles, with a rounded tip on the forward edge of the bust truncation and a pointed tip on the rear edge—but the entire head faces backward from that on the eagle, right rather than left. Thirteen stars ring the rim, with date 1839 below. The reverse is from the regular-issue Seated Liberty die, Large Letters, as used from 1842 through 1853. Struck in silver with a reeded edge.

**Commentary.** In the 1976 ANA sale the cataloger described this coin as, "Brilliant Proof. Deep blue obverse, pink and russet iridescent toning on the reverse. An extremely rare coin, high Rarity 8, with no recent records." The 1989 cataloger quoted the above while adding, "In our opinion today the Rarity 8 rating stands intact. The only other specimen offered in two decades was the example in RARCOA's session of Auction '81, lot 327. No specimen was included in the Olsen, Garrett, Malcolm Jackson, Crouch, or even Woodin collections. The only earlier record we have was the Farouk Sale, lot 1733."

It appears from the census below that today we should rate the piece as High R.7 rather than R.8, as perhaps five or even a half-dozen pieces might exist. This still puts the variety in the stratosphere of the super-rare, with—a little numismatic perspective here, please—far fewer known survivors than the 1933 double eagle or the 1804 silver dollar.

USPatterns.com says, "Stewart Witham noted 146 reeds [the edge reeding] on these, which according to a reed count listing from Bill Bugert of the Liberty Seated Collectors Club, means they were likely struck some time between 1854 & 1860 although this reed count was also used in 1869 and 1870."

**Physical Description.** The splendid original toning present in the 1976 description above is still much in evidence, perhaps a bit more mellowed but just as stunning. This near-Gem boasts a sharp strike, particularly on the reverse, that is equally appealing. **NGC Census:** two in PR64. **PCGS Population:** one PR64, one PR62 (10/08).

**Census and Provenance.** We believe that only four or five separate specimens exist (including one in the Smithsonian), with most of the older appearances representing duplications:

1. Anderson Dupont (Stack's, 11/1954), lot 2416; River Oaks (Bowers and Ruddy, 11/1976), lot 964; Auction '81 (RARCOA), lot 327; Morris Evans Collection-Rarities Sale (Bowers and Merena, 8/1998), lot 2037, which realized $12,650. PR64.
2. ANA (Stack's, 8/1976), lot 3598; Rarities Group; James A. Stack, Sr. Collection (Stack's, 11/1989), lot 716. **The present specimen.**
3. Superior (5/2003), lot 3469, $32,200. PR64 PCGS.
4. Numismatics, Ltd.; Harry W. Bass, Jr. via private treaty sale (8/1974); Bass Collection (Bowers and Merena, 5/1999), lot 1155. PR62 PCGS.
5. Chase Manhattan Bank; Smithsonian Institution. 191.3 grains, 1.204-in. diameter, coin alignment.

**Other Appearances.**

A. Virgil Brand; Illustrated History (Kosoff, 1962), lot 119.
B. King Farouk; Palace Collections of Egypt (Sotheby's, 5/1954), lot 1733. XF.

*From The Lemus Collection, Queller Family Collection Part Two.*(#11416)

# 1839 Judd-98 Half Dollar Restrike, PR67 Brown, Finest Certified
## One of Three or Four Known

1524 **1839 Half Dollar, Judd-98 Restrike, Pollock-108, High R.7, PR67 Brown NGC.**

**Design.** The Backward Head design. The obverse is similar to the regular-issue 1839 gold eagles, with a rounded tip on the forward edge of the bust truncation and a pointed tip on the rear edge—but the entire head faces backward, right rather than left. Thirteen stars ring the rim, with date 1839 below. The reverse is from the regular-issue Seated Liberty die, Large Letters, of 1842-1853. Struck in copper with a reeded edge.

**Commentary.** Saul Teichman notes on USPatterns.com that he believes these are restrikes produced in the 1870s, and throws down the gauntlet challenging collectors to try to match the reverse die to a regular-issue proof. The present example weighs 174.3 grains according to the accompanying envelope, while Pollock notes that it weighs 172.0 grains—which we believe to be an error; see below.

**Physical Description.** Deep iridescent toning with emerald-green highlights predominates, against a shimmering, lustrous backdrop on surfaces that show almost no signs of contact for a coin of this vintage. A splendid, almost perfectly preserved pattern. **NGC Census:** one PR67 Brown (this coin). **PCGS Population:** one PR64 Brown, one PR65 Brown (10/08).

**Census and Provenance.** Likely only three or four pieces exist. Tracing the pedigrees below was more than usually tortuous. As confirmation of our example's provenance, however, the Auction '81 cataloger noted that the weight was 174.3 grains, exactly the same weight as on the accompanying envelope, which also lists a provenance from King Farouk and Stack's.

1. William H. Woodin; Waldo Newcomer; King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1733; Hans Schulman; Gaston DiBello; DiBello Collection (Stack's, 5/1970), lot 357; Auction '81 (RARCOA, 7/1981), lot 328. **The present specimen.**
2. Julian Leidman; Harry Bass, private treaty on 7/28/1972; Bass Collection (Bowers and Merena, 5/1999), lot 1156.
3. Byron Reed; Omaha City Library, Inv. No. P-21; Durham Western Heritage Museum.
4. Adams and MacMillan Collections (Superior, 10/1992). Possibly a duplicate appearance of 1 or 2.

*From The Lemus Collection, Queller Family Collection Part Two.* (#11420)

# R.8 1839 Capped Bust Silver Half Restrike, Judd-99, PR61
## One of Only Two Examples Known
## Ex: Woodin, Brand, Farouk, Judd

1525 **1839 Capped Bust Half Dollar, Judd-99 Restrike, Pollock-109, R.8, PR61 NGC.**

**Design.** The obverse is the regular Capped Bust half dollar die as used from 1836 through 1839. The reverse shows an eagle with its head turned right (facing), with olive branch in the left talon and four arrows in the right. The usual legends encircle the rim. Struck in silver with a reeded edge.

**Commentary.** The reverse design will be instantly familiar to students of U.S. coinage, as it is quite similar to that used on the short-lived twenty cent coinage of 1875 through 1878. The arrows and olive sprig are switched, and other minor details vary, but there is no mistaking the many identical elements. The obverse was also used on Judd-72, Pollock-75 of 1838. The weight of the Garrett-Bass-Simpson specimen is recorded as 192 grains, which would place it in the category of mid-19th century (or later) restrike. Saul Teichman of USPatterns.com calls these restrikes made for sale in the 1870s, as evidenced by the heavy die rust prominent on both sides.

**Physical Description.** The die rust on the present specimen is more prominent on the obverse, specifically a couple of arrowhead-shaped areas nearly at the rim at 12 o'clock, just above the front fold of the cap; just before Liberty's mouth and nose; on her jawline and the forecurl at the top of her bustline; and scattered along the lower periphery from the bust tip through the date area. The reverse displays more-scattered die rust, mostly around the peripheral letters but still fairly heavy. Deep rose and blue iridescent highlights appear on both sides.

Please note the incredible pedigree below for this specimen, one of only two examples known. The provenance reads like a textbook of the most important pattern collectors of the past century. Another unparalleled opportunity to acquire a pattern that will almost certainly not repeat for many years to come.

**Census and Provenance.** Only two pieces are known.

1. William H. Woodin; Waldo Newcomer; Virgil M. Brand; Burdette G. Johnson; F.C.C. Boyd; King Farouk; Palace Collections of Egypt (Sotheby's, 5/1954), lot 1734; Dr. J.H. Judd; Illustrated History (A. Kosoff, 1962), lot 120; Coronet Coin; Merkin (2/1971), lot 859, proof; Stewart Witham; Auction '81 (RARCOA, 7/1981), lot 329. **The present specimen.**
2. Édouard Frossard; Garrett-Johns Hopkins University (Bowers and Ruddy, 11/1979), lot 367; Harry W. Bass, Jr. Research Foundation; Bass Collection (Bowers and Merena, 5/1999), lot 1157; Southern Collection; Simpson Collection. PR63 PCGS.

*From The Lemus Collection, Queller Family Collection Part Two.* (#11426)

# Judd-100 Silver 1839 Capped Bust Half With Flying Eagle Reverse PR63
## One of Two Known Only One Publicly Available

1526 **1839 Capped Bust Half Dollar, Judd-100 Restrike, Pollock-110, R.8, PR63 NGC.**

**Design.** The obverse is the regular Capped Bust (1836-1839) die, with date 1839. The reverse is a rather ungainly Flying Eagle design with plain field, similar to the Flying Eagle cents but with an awkward extra crook in the neck. The usual legends ring the rim. Struck in silver with a reeded edge.

**Commentary.** This is another incredibly rare pattern, with *only two examples known*, per all the standard references we possess. A note on the accompanying envelope puts the weight at 192.5 grains, marking this, unsurprisingly, as another restrike from after the weight was changed as per the Mint Act of February 21, 1853. The former weight of 206.25 grains of .900 fine silver was lowered to 192 grains of .900 fine silver.

**Physical Description.** Weakly struck, particularly on the area just below the cap on the obverse. The heavy die rust on both sides marks this as another restrike. Whether these were struck in the late 1850s-early 1860s or in the early 1870s is still open to debate, although USPatterns.com is clearly in the latter camp. Charcoal and powder-gray surfaces on the obverse cede to rose-gray on the reverse. The reverse die is close to shattering, with numerous bold radial cracks dividing that side into "pie slices," and there are other peripheral cracks. This piece is the only example available in the numismatic market, as the other specimen below was retained by the Bass Research Foundation and not sold in the important Bowers and Merena Bass Collection Part I auction of May 1999.

**Census and Provenance.**

1. Massachusetts Historical Society; ANA (Stack's, 8/1976), lot 3599, proof; Stewart Witham; Auction '81 (RARCOA, 7/1981), lot 330, proof, 192.5 grains. **The present specimen.**
2. William H. Woodin; Waldo Newcomer; F.C.C. Boyd; Dr. J.H. Judd; Illustrated History (A. Kosoff, 1962), lot 121; Coronet Coin; Lester Merkin (2/1971), lot 860; Harry W. Bass, Jr. Research Foundation.

*From The Lemus Collection, Queller Family Collection Part Two.* (#11428)

# 1839 'Gobrecht Half Dollar,' Judd-102 PR66, High R.7, Four to Six Known Wonderfully Toned, Finest Certified

1527 **1839 Seated Liberty Half Dollar, Judd-102 Restrike, Pollock-113, High R.7, PR66 NGC.**

**Design.** The obverse is struck from a regular 1839-dated Seated Liberty, With Drapery die, but the reverse has the Flying Eagle design also used on Judd-100. Struck in silver with a reeded edge.

**Commentary.** The Judd-100 and Judd-102 coins share the same extensively cracked, rusty reverse and other similarities. that indicate a striking period—or restriking period—in the 1870s, the free-wheeling Mint days under Director Henry R. Linderman.

A single unique example, Judd-102a, of this die pairing with a plain edge was listed in the King Farouk catalog, but it may be a misdescription and is now unconfirmed.

Another interesting numismatic side note, with which we wholeheartedly agree, comes from the Bowers and Merena cataloger of the Bass coin below, who notes that "this pattern variety should be of interest as a peripheral item for the Gobrecht dollar specialist." It is, in effect, a "Gobrecht half dollar" that utilizes one of the many intermediate designs that were produced by several artists on the way to final designs for the Gobrecht silver dollars and the Seated Liberty halves that followed.

**Physical Description.** The weight is 192.0 or 192.1 grains, the diameter is 1.20 in., and the die alignment is 360 degrees ("medal turn"). Apparently all of the pieces known are in this alignment. The weight further indicates a striking period sometime after 1853. The present specimen is a wonderfully toned coin. It shows strong highlights of golden-rose on the obverse, with moderate die rust noted in the fields behind Liberty and at the mouth. The reverse is similarly shaded, with a pattern of radial die cracks similar to the Judd-100 described herein. **NGC Census:** one PR66, one PR67. **PCGS Population:** one PR63 (10/08). The present specimen is the *finest certified by two grade points.*

**Census and Provenance.** We believe that no more than a half-dozen pieces exist, and perhaps as few as four.
*Ex: Bowers and Ruddy* Rare Coin Review, *various issues (1970s); Roy Harte (Bowers and Ruddy, 11/1977), lot 3263.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#11434)

# 1839 Copper Half Dollar, Judd-103, PR66 Brown R.8
## The Only Specimen in Collectors' Hands

1528 **1839 Half Dollar, Judd-103 Restrike, Pollock-115, R.8, PR66 Brown NGC.**

**Design.** The obverse is of the regular-issue Seated Liberty half, With Drapery, of 1839, and the reverse is the Medium Letters die, as seen on the 1840 issue. Struck in copper with a reeded edge.

**Commentary.** Another fantasy piece struck long after the date on the die, probably in the 1870s, for sale to collectors. Only two examples are known of this R.8 pattern, and one of them is impounded—presumably permanently—in the Connecticut State Museum Collection.

Like some of the related pieces of this period, Stewart Witham has counted the edge reeds and gotten a total of 152. According to USPatterns.com, "according to a reed count listing from Bill Bugert of the Liberty Seated Collectors Club, [that] means they were likely struck some time between 1861 & 1871. We believe the actual date is closer to the latter date."

**Physical Description.** Another wonderfully toned coin from the Lemus Collection that appears essentially untampered with. This piece boasts splendid, near-pristine surfaces with overtones of lilac and purple. The needle-sharp strike brings out tiny details of Liberty's sandal and emboldens all the stripes in the shield. A small patch of die rust appears above TAT in STATES and there are scattered areas elsewhere, but overall the die rust is less than would be expected. A simply marvelous coin that is in every way representative of the quality that embodies the Lemus Collection. **NGC Census:** one PR66 Brown (this coin). **PCGS Population:** none certified (10/08).

**Census and Provenance.** Only two pieces are known, one in a museum collection.

1. Lorin Parmelee (New York, 6/1890), lot 43; King Farouk; Palace Collections of Egypt (Sotheby's, 5/1954); Mayflower (5/1959); Cox (Stack's, 4/1962), lot 2197, proof; ANA (Kosoff, 6/1966), lot 1027; Gentleman's Study Collection (Coronet Coin), lot 11, proof; Stewart Witham; Auction '81 (RARCOA, 7/1981), lot 333, proof. **The present specimen.**
2. J.C. Mitchelson (1913); Connecticut State Library.

*From The Lemus Collection, Queller Family Collection Part Two.* (#11438)

Rare Plain Edge Judd-105
1839 Gobrecht Dollar, PR65

# Rare Plain Edge Judd-105 1839 Gobrecht Dollar, PR65

1529 **1839 Name Omitted, Judd-105 Restrike, Pollock-117, Low R.7, PR65 NGC.**

**Design.** Die Alignment III (center of Liberty's head opposite the N in ONE). Christian Gobrecht's Seated Liberty design, stars around the periphery, C. GOBRECHT F. almost completely removed from the base. On the reverse, after a coin turn the eagle flies level in a starless field. Struck in silver with a plain edge.

**Commentary.** One of the most interesting and significant discoveries in the Gobrecht dollar series in the past few years was when John Dannreuther discovered in August 2007 that C. GOBRECHT F. had been removed from the base of the rock on which Liberty is seated. In more than 170 years of collecting these popular coins, no one else had apparently noticed. It is even more curious when one reads the statement by George Escol Sellers who stated that Gobrecht "had taken the inexcusable liberty of placing his name on the die, which became conspicuous on the coin, and the coinage had to be stopped *until it could be obliterated.*" (Emphasis ours). The discovery of this obliteration also gives a guide to the striking sequence for the various dates of Gobrecht dollars. Most of Gobrecht's imprint was removed from the 1839 coins, but faint traces of the letter bottoms can still be seen. On the 1838 coins an even more vigorous effacement was done, and virtually nothing remains. The conclusion is that the 1839 dollars were actually struck prior to those dated 1838.

Original 1839 Gobrecht (Judd-104) dollars are believed to have been struck in December 1839. The rare restrikes, such as this coin, were undoubtedly struck decades later. While there is no documentation to support this, the texture of the coin certainly does. Unlike the Gobrecht dollars struck in the 1830s, this piece has mirrorlike fields that one would expect from a regular-issue coin struck in proof format from the 1850s through the 1870s. This piece is similar to the Queller 1838 Gobrecht dollar. That is to say, it is not the standard issue one would expect for the year. The vast majority of 1838 Gobrechts are Judd-84. Likewise, the standard 1839 encountered is a Judd-104. In both cases, he opted for the much-rarer plain-edge version. Approximately six to 10 examples are known of the Judd-105, compared to the 60 to 75 Judd-104 coins that are believed extant today. As with other Judd-105 dollars, this piece shows the same reverse diagnostics: a die crack through the tops of MERIC, NITE, into the field from the bottoms of AR, and a pronounced die spur on the right side of the D in UNITED.

**Physical Description.** As mentioned above, the fields are extraordinarily deep in their mirrored reflectivity. Each side retains much brilliance, with a slight overlay of color. The obverse shows just the slightest hint of pinkish-gold, while the reverse is notably deeper in hue and more varied, with occasional dabs of light blue. A few tiny planchet flakes can be seen in the obverse fields, but strong magnification is required. Otherwise, there are no mentionable interruptions in the surfaces on either side of this magnificent and rare Gobrecht dollar. In the Somerset catalog, this coin was listed as 411.9 grains, with a diameter of 1.504 inches. **NGC Census:** 2 in PR65, 1 finer. **PCGS Population:** One in PR65, none finer (12/08)

**Provenance.** *Ex: Somerset Collection (Bowers and Merena, 5/1992), lot 1756.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#11448)

## 1849 Three Cent Silver, Judd-112 Original, PR64

1530 **1849 Three Cent Silver, Judd-112 Original, Pollock-126, Low R.7, PR64 NGC.**

**Design.** The obverse die is of the Seated Liberty half dime, while the reverse bears the Roman numeral III with no other legends. A "coin without a country," struck in a 60:40 silver:copper alloy with a reeded edge.

**Commentary.** Save for a couple of unique and unusual pieces listed in Judd for 1840 and 1846, the 1849 three cent patterns in their several varieties are the first U.S. pattern coins struck since 1839—or, to put it more precisely, bearing a date after 1839.

**Physical Description.** The pinkish-gray, well-struck surfaces on both sides are appealing, despite some minor field chatter and planchet laminations that are almost exclusively seen on the reverse. **NGC Census:** 1 in PR64, 1 finer. **PCGS Population:** None graded higher than PR63 (12/08).

**Provenance.** *Ex: The Casterline and Hall Collections Sale (Superior, 5/1989), lot 1028.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11490)

## 1849 Three Cent Silver, Judd-113 Original PR64, Tied for Finest Certified

1531 **1849 Three Cent Silver, Judd-113 Original, Pollock-127, High R.7, PR64 NGC.**

**Design.** Popularly known as the Ugly Duckling, this pattern combines "Arabic" and Roman numerals 3 and III, one on each side, with no other legends, date, denomination, or other device. Not only is this a "coin without a country," it is a numerator without a denominator, a quantity with no units. Struck in a "silver-copper alloy of unknown proportions," according to Judd, with a plain edge.

**Commentary.** Struck as both originals (per Judd) and restrikes, the last of which Judd notes are probably in 90% silver. Saul Teichman of USPatterns.com believes all are post-1849 restrikes. Pollock notes that the Lemus Collection piece, presumably this one, weighs 19.2 grains (which Teichman notes is "the same as a standard half dime planchet"), with diameter 0.594 in. Teichman concurs that these pieces "are more likely standard coin silver as opposed to being 50% silver, 50% copper," adding that perhaps a dozen exist. We would not be surprised if the number were lower, perhaps eight to 10 pieces.
A comment regarding the certification services: Sometimes the basis on which they make a pattern attribution are quite clear, and sometimes such basis in fact, if any, is completely *unclear*. They would do the numismatic community an enormous service if they would accurately record the weight of each pattern certified, in grains, on the plastic slab before its encapsulation.

**Physical Description.** Splashes of golden and ice-blue alternate on both sides of this coin, which in its design confirms its hurried origins, but in its execution here and subsequent preservation reveal much to commend it to the viewer and suggest an even finer grade. The only example certified at NGC, with five at PCGS ranging from PR61 to PR64 (10/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11495)

## 1850 One Cent, Judd-124 Restrike, PR64

1532 **1850 One Cent, Judd-124 Restrike, Pollock-139, Low R.7, PR64 NGC.**

**Design.** ONE above, CENT below a central ringed area, which on some of its siblings is perforated, but not here. Rosettes are to the left and right. The reverse offers USA above, ONE TENTH SILVER at top and bottom. Struck in copper-nickel with a plain edge.

**Commentary.** An experiment in producing a smaller-size cent piece, one intended, of course, to be produced in silver with a central perforation to lower the weight and corresponding silver content. The originals were produced in billon (90% copper, 10% silver), with weights from 24 to 26 grains, but they were too subject to counterfeiting, among other difficulties with the issue.

**Physical Description.** Light gray-rose color covers both sides, with some minor flecks noted on both sides but nonetheless attractive. The reverse (ONE TENTH SILVER) side shows extensive peripheral die breaking through the legends. The die apparently shattered early during the striking of the originals. **NGC Census:** 1 in PR64, 2 finer. **PCGS Population:** 4 in PR64, none finer (12/08).

**Provenance.** *Ex: Stack's auction (6/1980).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11532)

## Terrific Gem Proof 1850 Three Cent Silver Judd-125 Original

1533 **1850 Three Cent Silver, Judd-125 Original, Pollock-147, R.4, PR65 NGC.**

**Design.** The obverse has a Liberty cap with resplendent rays surrounding. LIBERTY is on the bottom part of the cap, and the date 1850 below. A palm branch encircles the entire reverse to form a wreath, enclosing the numeral III. UNITED STATES OF AMERICA rings the rim. Struck in silver with a plain edge.

**Commentary.** A similar design was employed in 1836 for gold dollar patterns (Judd-67) and for a Mint medal celebrating the first coinage on a steam press. Both borrow heavily from Mexican silver coins of the early to mid-1800s, including the half real, one real, two, four, and eight reales, all with a Cap and Sunburst design that first appeared in the 1820s, for example on the KM-374.10 Mexico City two reales of 1825. Mexican coinage circulated widely in the United States during this era and may have directly influenced the Mint's decision to replicate the popular Cap and Sunburst design motif. As the old saying goes, "Imitation is the greatest form of flattery."

**Physical Description.** This stunning Gem has beautiful original "skin" in shades of silver accented with high-point peach and ice-blue shadings. The date shows the characteristic slanted 5, a favorite of Mint Engraver James B. Longacre. Simply a terrific coin. **NGC Census:** 4 in PR65, 1 finer. **PCGS Population:** 1 in 65, none finer (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11536)

## Undated (ca. 1850) Double Eagle PatternStruck in Silver, R.8
## One of Two Known Judd-126, PR62, Ex: Dr. Judd

1534 **(ca. 1850) Twenty Dollar, Judd-126, Pollock-148, R.8, PR62 NGC.**

**Design.** The design is that of the Liberty Head double eagle that would premier in 1850 for circulation purposes, save that the die is undated. Struck in silver with a reeded edge.

**Commentary.** This is a pattern of paramount importance, as it represents the intersection of geology, history, and numismatics as perhaps no other coin can. The California Gold Rush bounty by 1849 was making its way back East, upsetting the traditional balance between gold and silver. True to the laws of supply and demand, silver became overpriced in relation to paper currency or gold, and it was widely hoarded and melted, promptly disappearing from circulation. The vast supplies of gold and need for circulating specie dictated a twenty dollar denomination be introduced, large enough for important commerce and international trade but not so unwieldy as to prevent its circulation (as happened with the octagonal California gold fifties of 1851 and 1852).

A unique 1849 double eagle struck in gold is in the Smithsonian, and it is a national treasure that has justly achieved fame and renown. Of the 1850 double eagle patterns, only three are known, two struck in silver (including the present piece), and a copper-gilt piece in the Harry Bass, Jr. Research Foundation Collection. The date of issue is unknown, but the year 1850 is an eminently reasonable guess.

**Physical Description.** Both sides are deep steel-gray, with accents of cinnamon around the devices front and back. The fields show some minor, insignificant contact that explains the grade but fails to diminish either the considerable appeal—or this piece's historic importance. **NGC Census:** one in PR62, one in PR64. **PCGS Population:** one in PR63 (10/08). There is undoubtedly one duplication here.

**Census and Provenance.** Only two are known. An example (Judd-126a) in the Harry W. Bass, Jr. Research Foundation is copper-gilt, not silver.

1. Dr. J.H. Judd; Illustrated History (A. Kosoff, 1962), lot 150; Mocatta Metals; 1979 ANA (NERCA, 7/1979), lot 1290, proof; various *Rare Coin Reviews* (Bowers and Ruddy, 1981); Auction '89 (Superior, 7/1989), lot 944. **The present specimen. PR62 NGC.**
2. Champa (Bowers and Ruddy, 5/1972), lot 1113, proof; Evans (Bowers and Merena, 8/1980; Southern Collection; Simpson Collection.

## Interesting 1851 'Ring' Cent Pattern
## Judd-127, PR64

1535 **1851 One Cent, Judd-127 Original, Pollock-149, Low R.6, PR64 NGC.**

**Design.** The simple obverse design consists of the peripheral notations CENT above, and ONE TENTH SILVER below. The reverse employs an open wreath, with the legend UNITED STATES OF AMERICA around. Medallic turn. Struck on a perforated billon planchet with a plain edge.

**Commentary.** A bill drafted by Congressman Sam F. Vinton in 1849 called for a reduction in the size of the one cent coin. Judd-127 was an experimental attempt to reduce the size of the coin, while maintaining the same intrinsic value. The perforated annular planchet made it easy to distinguish the coin from a dime, which was nearly the same size. Unfortunately, the annular design created many problems in the striking process, particularly with ejection of the struck coins. The small size Flying Eagle cent was eventually selected to replace the old large cent design.

**Physical Description.** The undisturbed satin surfaces are covered with attractive gray and golden-brown patina. A pleasing example of this distinctive design. **NGC Census:** 3 in PR64, 3 finer. **PCGS Population:** 3 in PR64, 2 finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#11545)

# Tied for Finest Certified 1851 Silver Dollar Pattern Struck in Copper Judd-132, PR66 Brown

1536 **1851 Dollar, Judd-132 Restrike, Pollock-159, Low R.7, PR66 Brown NGC.**

**Design.** Both obverse and reverse dies feature the designs used to coin the 1851 silver dollar restrikes. The obverse can be distinguished from the original 1851 dies because the date is centered. On the original dies the date is slanted upward. Struck in copper with a reeded edge.

**Commentary.** The rarity of the silver dollars of 1851 was recognized by collectors in the earliest days of the hobby. Mint Director James Ross Snowden responded to collector demand by including the 1851 silver dollar in his restrike program in 1859. Silver restrike examples were available right away, but copper specimens appeared on the market only several years later. The first auction appearance of Judd-132 was in the F.S. Edwards Sale (Edward Cogan, 10/1865), lot 1995. The cataloger described the coin in his typical, terse style: "1851, Fine proof. In copper. Silver dollar size." The lot sold for $12, a considerable sum in those days. This issue has remained popular with collectors ever since and always causes excitement in its rare auction appearances.

The present coin was featured in the 195th Auction Sale (Bolender, 3/1959), lot 115. Bolender's description follows, "**1851 Trial piece for silver dollar, struck in copper,** from regular dies. AW-144. Proof. Excessively rare, only 4 or 5 minted. Edgar H. Adams, author of the Adams-Woodin book on U.S. Pattern Coins, had his specimen priced at $250 more than 30 years ago, when I purchased part of his collection, including his 1851 dollar in copper. This is not the same coin, and only the second I have handled, in over 50 years of dealing. More than 100 times as rare as the 1851 dollar in silver which sells for over $500." Since Bolender's time, a few more examples of Judd-132 have surfaced, but the issue remains elusive. USPatterns.com estimates fewer than one dozen specimens exist. The present offering represents a rare opportunity to acquire this highly sought-after issue in virtually unimprovable condition.

**Physical Description.** Sharply struck, with fine detail visible on all design elements. There is a partial wire rim on both sides. Deep brown color is pleasingly mixed with subdued mint red, with cerulean-blue highlights. Outstanding eye appeal. **NGC Census:** 1 in PR66 Brown, none finer. **PCGS Population:** None graded higher than PR64 Red and Brown (12/08).

**Provenance.** *Ex: 195th Sale (Bolender, 3/1959), lot 115; The June Sale (Stack's, 6/1986), lot 434.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#11563)

## Seldom Encountered 1852 'Ring' Gold Dollar Pattern in Silver, Judd-138, PR62

1537 **1852 Gold Dollar, Judd-138 Thin, Pollock-165, Low R.7, PR62 NGC.**

**Design.** The simple obverse die consists of the legend USA above and 1852 below. The reverse features a circle of olive sprigs. Struck on an annular, thin silver planchet with a plain edge.

**Commentary.** Public complaints that the standard gold dollar coin was too small and easily lost led to this innovative, annular design. Using this format, a coin with a diameter of 0.65 inches could be made using the same weight and fineness specifications as the gold dollar. Unfortunately, the annular design did not function well in high-volume coining operations. The issue comes in both thick and thin planchets.

**Physical Description.** The surfaces are lightly toned, with a pleasing, golden-rose hue. A few contact marks are consistent with the grade. **NGC Census:** 1 in PR62, 9 finer. **PCGS Population:** 1 in PR62, none finer (12/08).

**Provenance.** *Ex: June Sale Part II (Stack's, 6/1984), lot 1268.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11583)

## Unusual Annular 1852 Gold Dollar Pattern Copper-Nickel, Judd-140, PR64

1538 **1852 Gold Dollar, Judd-140, Pollock-167, Low R.7, PR64 NGC.**

**Design.** The simple obverse design consists of the legend USA above and 1852 below. The reverse features a circle of olive sprigs. Struck on an annular copper-nickel planchet with a plain edge.

**Commentary.** The USPatterns.com website makes note of the fact that the silver version of this design—Judd-138—is struck over an 1860 Seated Liberty dime, clearly confirming the long-standing belief that these issues are restrikes prepared by Mint employees for sale to collectors. They were probably produced in 1860 or perhaps shortly thereafter. It is not known if these patterns were perforated before or after striking, although the latter is most likely due to technical limitations at that time. An early appearance was in the Parmelee Sale (New York Coin & Stamp, 6/1890), lot 58, where it was sold together with an example of Judd-138.

**Physical Description.** Sharply struck with bright golden-rose toning. **NGC Census:** 2 in PR64, 4 finer. **PCGS Population:** 5 in PR64, none finer (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11589)

## Annular 1852 Gold Dollar
## Pattern Struck in Gold
## Judd-145, Proof

1539 **1852 Gold Dollar, Judd-145, Pollock-173, Low R.6—Reverse Graffiti—NCS. Proof.**

**Design.** Simply designed with UNITED STATES OF AMERICA around the outer portion of the obverse with the date at the bottom. The reverse has DOLLAR at the top with a wreath around the lower margin. Struck in gold, perforated in the center, with a plain edge.

**Commentary.** Pollock records both thin and thick planchet varieties, the thin planchet pieces with a weight of 25.4 to 26.0 grains, the thick planchet pieces with a weight of 31.9 to 32.5 grains. In 1985, Stack's recorded the weight of this piece as 25.8 grains.

**Physical Description.** Heavy die polish creates satiny luster on this unusual gold pattern. A few faint hairlines and contact marks are evident, along with a small heavy X scratched in the reverse field after the R in DOLLAR.

**Provenance.** *Ex: Auction '85 (Stack's, 7/1985), lot 1871.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#11604)

## 1852 'Ring' Gold Dollar Struck in Silver
## Tied for Finest Certified Judd-146, PR65

1540 **1852 Gold Dollar, Judd-146, Pollock-174, Low R.7, PR65 NGC.**

**Design.** The obverse features a line design, described as a circle of six bows by early catalogers, around the central perforation. The legend UNITED STATES OF AMERICA around, with 1852 below. The reverse consists of the denomination DOLLAR above and an open wreath below. Struck on an annular silver planchet with a plain edge.

**Commentary.** While Judd-146 is technically an R.7 issue, its actual availability deserves an R.8 rating. This circumstance is because no less than five examples of Judd-146 have been impounded in museum collections. This issue is less available today than it was circa 1890, before Byron Reed, J.C. Mitchelson, and B. Peyton donated their advanced collections to various institutions. Early pattern collectors were familiar with the issue, and R.C. Davis listed it as number 74 in his pioneering work on patterns. An early auction appearance of Judd-146 was in the R.C. Davis Collection (New York Coin & Stamp, 1/1890), lot 1032. In recent times, a search of auction records has uncovered only three appearances in the last 32 years.

The present coin was purchased at the Randolph S. Rothschild Sale (Stack's, 10/2003), lot 1114. The catalogers in that sale described some unique features of this coin as follows, "Very close examination of the reverse periphery of this piece reveals a faint undertype of the legend of an 1860 Dime obverse. A small piece of the liberty cap is also visible just to the left of the undertype 'O' in the legend. We can find no evidence of an understrike on the obverse of this coin. We are thus of the opinion that the planchet used to strike this coin was initially a uniface 1860 With Legend Dime obverse die trial and was subsequently perforated and restruck as the coin offered here. Ring dollars of this issue are **of the utmost rarity.** In fact, we cannot find any auction records for this Judd number in this decade!" It is clearly established that the Mint was producing restrikes of this issue in the 1860s. The closing comments of the Stack's cataloger underscore the importance of the present offering.

**Physical Description.** Strongly impressed devices, with a high wire rim above the date on the inner perforation. Pristine surfaces, with light champagne toning. NGC has graded one coin at the PR65 level, with none finer. PCGS has graded no coin this high (11/08).

**Census and Provenance.** As stated above, we believe at most three specimens of Judd-146 are available to collectors today because of the high number of pieces in institutional collections.

1. ANA (Stack's, 8/1976), lot 3627.
2. ANA (New England Rare Coin Auctions, 7/1979), lot 1307.
3. The Randolph S. Rothschild Collection (Stack's, 10/2003), lot 1114. **The present coin.**
4. Smithsonian Institution, Inv. No. 1985.0441.1912.
5. B. Peyton, 11/1960; ANS Inv. No. 1960.166.192.
6. Byron Reed; Omaha City Library; Durham Western Heritage Museum.
7. Byron Reed; Omaha City Library; Durham Western Heritage museum.
8. J.C. Mitchelson; Connecticut State Library.

**Other Appearances.** These appearances may be duplicates of some of the coins above, but they cannot be conclusively linked.

A. R.C. Davis Collection (New York Coin and Stamp, 1/1890), lot 1032.
B. Woodside Collection (New York Coin and Stamp, 4/1892), lot 54.
C. William H. Woodin's consignment to the 1914 ANS Exhibition.
*From The Lemus Collection, Queller Family Collection Part Two.*(#11608)

## Unimprovable 1852 'Ring' Gold Dollar Struck in Copper Judd-147, PR66 Brown

1541 **1852 Gold Dollar, Judd-147, Pollock-175, Low R.7, PR66 Brown NGC.**

**Design.** The obverse features a line design, described as a circle of six bows by early catalogers, around the central perforation. The legend UNITED STATES OF AMERICA around, with 1852 below. The reverse consists of the denomination DOLLAR above and an open wreath below. Struck on an annular copper planchet with a plain edge.

**Commentary.** Judd-147 is a restrike issue, made for sale to collectors in the late 1850s. An early auction appearance was in the Parmelee Collection (New York Coin & Stamp, 6/1890), lot 61. The cataloger in that sale noted that both thick and thin planchets exist for this issue.

**Physical Description.** Sharply struck, with pristine surfaces that display iridescent tones of blue, lilac and, gold with most of the color on the reverse. NGC has certified one PR66 Brown and three PR66 Red and Brown, with none finer. The finest at PCGS are two PR66 Red and Brown pieces (11/08).

**Provenance.** *Ex: T. Henry Allen Collection (Stack's, 2/1977), lot 1135.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11610)

## Distinctive 1852 'Ring' Gold Dollar Struck in Copper-Nickel Judd-148, PR65

1542 **1852 Gold Dollar, Judd-148, Pollock-176, Low R.7, PR65 NGC.**

**Design.** The obverse features a line design, described as a circle of six bows by early catalogers, around the central perforation. The legend UNITED STATES OF AMERICA around, with 1852 below. The reverse consists of the denomination DOLLAR above, and an open wreath below. Struck on an annular copper-nickel planchet, with a plain edge.

**Commentary.** Judd-148 is from a more intricate design than the other pattern dollars of 1852. The annular design was an attempt to create a larger-diameter coin without increasing the amount of gold in each specimen. Unfortunately, problems ejecting the coins after striking made this innovation impractical.

**Physical Description.** A beautifully preserved example with a sharp strike and virtually no distractions. Bright overall with some light toning in shades of gray and brown, primarily on the reverse. **NGC Census:** 5 in PR65, none finer. **PCGS Population:** 3 in PR65, none finer (12/08).

**Provenance.** *Ex: Yale University Sale (Stack's, 12/1971), lot 370.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11614)

## Interesting 1853 Cent Pattern
## Judd-151, PR66

1543 **1853 One Cent, Judd-151, Pollock-178, Low R.6, PR66 NGC.**

**Design.** The obverse is the same as that used to coin regular-issue 1853 quarter eagles. The reverse shows the denomination ONE CENT within a laurel wreath. Struck in a 40% nickel, 60% copper alloy with a reeded edge.

**Commentary.** The Mint wasted little time designing this issue, combining an existing obverse die with a simple, rudimentary reverse. USPatterns.com estimates a population of approximately two dozen survivors.

**Physical Description.** Sharply struck, with exquisite detail on Liberty's hair. Pristine pale-steel surfaces are accented by wisps of light gold toning. There is an unimportant planchet defect on the reverse rim at 12 o'clock. **NGC Census:** 1 in 66, none finer. **PCGS Population:** 1 in 66, none finer (12/08).

**Provenance.** *Ex: Preston Pond Collection (Stack's, 7/1942), lot 822; 61st Public Auction Sale (New Netherlands, 6/1970), lot 5; Public Auction Sale (Stack's, 1/1987), lot 478.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11628)

## Experimental 1854 Cent Pattern
## Judd-158, PR64

1544 **1854 One Cent, Judd-158, Pollock-185, High R.6, PR64 NGC.**

**Design.** Obverse: The regular Seated Liberty motif used on silver coins, with an arc of 13 stars around and the date below. Reverse: The denomination 1 CENT surrounded by a wreath of oak leaves. Struck in nickel alloy with a reeded edge.

**Commentary.** USPatterns.com observes, "The obverse design was crudely reduced from an 1854 silver dollar using the portrait lathe resulting in many semi-circular patterns appearing on it. The 4 in the date is very weak, so much so that these actually look like they are dated 1851 instead of 1854."

**Physical Description.** Due to the crude production technique, this issue lacks the customary brilliance and sharp detail of most proofs. The coin remains as struck, with no wear and few contact marks for the grade. Light blue and golden toning. **NGC Census:** 1 in 64, 1 finer. **PCGS Population:** 1 in 64, none finer (12/08).

**Provenance.** *Ex: Public Auction Sale (Stack's, 10/1988), lot 602.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11652)

## 1854 Copper Cent Electrotype
## Judd-159A, PR65 Brown

**1545 1854 One Cent, Judd-159A, Pollock-186, High R.7, PR65 Brown NGC.**

**Design.** The obverse is a die made by reducing an 1854 silver dollar, but in such a way that many details are blurry or indistinct, especially in the date. The reverse is a new die with a heavy, open wreath of oak leaves and acorns tied with a ribbon and bow at bottom, 1 CENT in the center. Many different alloys were recorded, but the Judd-159A, Pollock-186 is called a copper electrotype.

**Commentary.** Pollock notes that most examples offered over the years are electrotypes, said to have been produced at the Mint in such a way that they "have a clear ring." He also specifically records this piece, from the August 1971 ANA Sale, as an electrotype.

**Physical Description.** The fields are striated, and the devices show the circular lines from the reducing lathe. Yet the fields show a surprising amount of reflectivity, and the surfaces overall are problem-free. Deep, even brown and blue patina covers both obverse and reverse. **NGC Census:** 1 in PR65 Brown, none finer. **PCGS Population:** None graded finer than PR64 Red and Brown (12/08).

**Provenance.** *Ex: ANA 80th Convention Auction (Stack's, 8/1971), lot 265.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11654)

## 1854 No Stars Pattern Cent
## Judd-161, PR66 Brown

**1546 1854 One Cent, Judd-161, Pollock-187, R.4, PR66 Brown NGC.**

**Design.** The design is similar to the current large cent in circulation, but there are no stars on the obverse, and the planchet is smaller—just about 25.4 mm (1 inch), compared with a diameter for the large cent of 27.5 mm (1.08 inches). Struck in copper or bronze with a plain edge.

**Commentary.** While the measurements above do not seem to be a dramatic difference, it is one that is immediately noticeable. The corresponding weights, of course, differ as well. Originals and restrikes are known. The originals, per Pollock, weigh in the neighborhood of 91 to 100 grains (5.9 to 6.5 gm), while the restrikes weigh around 113-114 grains (7.3-7.4 gm). By way of comparison, a standard 1854 large cent would weigh 10.9 gm when new. NGC has not given an indication which this is.

**Physical Description.** This is a splendid, deeply mirrored proof. Each side shows glimmering iridescent blue patina with noticeable amounts of original red that still remain. USPatterns.com notes that these are difficult to find with much red color. **NGC Census:** 3 in PR66 Brown, none finer. **PCGS Population:** 3 in PR66 Brown, 2 finer in PR66 Red and Brown (12/08).

**Provenance.** *Ex: Lester Merkin (6/1972).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11663)

## 1855 Flying Eagle Cent
## Judd-168, PR66 Brown

**1547 1855 Flying Eagle Cent, Judd-168, Pollock-193, R.4, PR66 Brown NGC.**

**Design.** A reduced-diameter large cent, as begun in 1854, continuing the Flying Eagle motif for the obverse, with peripheral stars and date 1855 below. The reverse shows a circular wreath similar to the large cent in circulation, with four leaves under the E of STATES. Struck in copper (Judd-167) or bronze (Judd-168) with a plain edge.

**Commentary.** As in 1854, the restrikes weigh about 13-14 grains more than the originals, but many different unconfirmed alloys are recorded, and the variations require elemental analysis for certain attribution. Dr. Judd believed that some bronze examples are originals—although that is also uncertain.

**Physical Description.** Each side has considerable visual interest. While most of both the obverse and reverse are deep blue (rather than brown), there is a wide swath of original, fiery red color on the lower right portion of the obverse. The reverse has streaky red luster and blue color. A lovely example of this popular pattern. In PR66 Brown this piece is tied with four other pieces at NGC as the numerically finest at that service—two Brown, two Red and Brown. The finest at PCGS are a handful of PR65 coins (10/08).

**Provenance.** *Ex: ANA 80th Convention Sale (Stack's, 8/1971), lot 270.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11720)

## 1856 Copper-Nickel Half Cent
## Judd-177, PR64

**1548 1856 Half Cent, Judd-177, Pollock-205, R.5, PR64 NGC.**

**Design.** The regular half cent dies of 1856 but, continuing the metallic composition experiments begun in 1850 that would lead to the successful introduction of the copper-nickel small cents, the planchets for these pieces are copper-nickel, either 88:12 or 90:10. Struck with a plain edge.

**Commentary.** Records indicate two slightly different alloys, but they are impossible to distinguish from each other except by elemental analysis. The pattern variety as a whole, however, should be easily distinguished by the distinctive color of coins produced in copper-nickel alloy, a fact that was not lost on Mint personnel of the era.

**Physical Description.** Bright, even orange-red color is seen over each side of this attractive, well-balanced pattern. Sharply defined, except on a few of the leaves on the wreath of the reverse. A flashy, deeply mirrored example. **NGC Census:** 4 in PR64, 2 finer. **PCGS Population:** 10 in PR64, 3 finer (12/08).

**Provenance.** *Ex: The Montgomery Collection (Bowers & Ruddy, 2/1976), lot 1672.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11777)

# Pristine Gem Red and Brown (1856) 'Gobrecht' Flying Eagle Copper Cent Undated, Judd-179

1549 **(1856) Flying Eagle Cent, Judd-179, Pollock-207, Low R.7, PR65 Red and Brown NGC.**

**Design.** The design is the regular Flying Eagle cent motif on the obverse and the Agricultural Wreath reverse from 1857-58, but there is no date or other legends, save for the denomination ONE CENT in the center reverse. Struck in copper with a plain edge.

**Commentary.** Pollock notes that the obverse eagle is a "direct copy of the eagle featured on the Gobrecht dollars dated 1836 to 1839." This pattern could just as easily be called a "Gobrecht cent," crediting the obverse's original designer, Christian Gobrecht, rather than merely describing the design. Examples were struck in both copper and copper-nickel, with the latter somewhat rarer—but both are rare. The dated Judd-180 is the R.1 1856 Flying Eagle cent pattern, a high-mintage production (for a pattern, at least) that is collected alongside the regular-issue series. USPatterns.com reports more than a dozen are known of this copper undated variety.

**Physical Description.** Gorgeous pinkish-red and lilac-toned surfaces on both sides are pristine and distraction-free. An arcing small mark is noted in the area where the date would normally appear. A similar curving mark appears on the reverse near the rim at 12 o'clock, running through the right wreath tip—definite pedigree markers for this remarkable and rare coin. **NGC Census:** 1 in PR65 Red and Brown; one finer in PR66 Brown. **PCGS Population:** 1 in PR65 Red and Brown; one finer in PR66 Brown (12/08).

**Provenance.** *Ex: T. Henry Allen Collection (Stack's, 4/1977), lot 355.*

## 1857 Quarter Die Trial
## Attributed to Paquet
## Judd-188, PR64 Brown

1550 **1857 Quarter Dollar, Judd-188, Pollock-225, Low R.7, PR64 Brown NGC.**

**Design.** The obverse is the regular-issue Seated Liberty quarter from 1857, while the reverse is from an incomplete die that shows UNITED STATES OF AMERICA and QUAR. DOL. at the rim in a smaller font than on the regular issues, with the letter Q shaped much differently. The center reverse is blank. Struck in copper with a plain edge.

**Commentary.** Struck on both thick and thin planchets, this is another pattern variety that begs for a weight indication on the encapsulation. In earlier editions, the comment on this pattern in Judd was that it "appears to be the first work of Anthony C. Paquet who started working at the Mint on October 20, 1857." Perhaps a dozen exist on both thick and thin planchets according to USPatterns.com, but this is the sole example certified at NGC. There are three others at PCGS, the finest a PR64 Brown (11/08). Could the variety be rarer than thought?

**Physical Description.** The Q in QUARTER is noticeably thin and squeezed, with a long serif descending from the center of the letter. Both sides offer subtle reddish-gold coloration, with a dollop of sage added to the reverse. A few reeding marks are noted in the center reverse, signs of contact with other coins (of the same issue, one might assume), but otherwise the surfaces are splendid and attractive, with a bold strike and excellent appeal. **NGC Census:** This is the sole Judd-188 graded by NGC in any grade. **PCGS Population:** Three pieces graded in total, with the finest in PR64 Brown (12/08).

**Provenance.** *Ex: Stack's unknown auction, lot 2031, PR62 Red and Brown PCGS.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11825)

## 1858 Transitional Flying Eagle Cent
## Judd-191, Pollock-233, PR65 Cameo

1551 **1858 Flying Eagle Cent, Judd-191, Pollock-233, R.5, PR65 Cameo NGC.**

**Design.** Another transitional issue: The obverse is the regular Flying Eagle cent of 1858, but the reverse is that of 1859, the Laurel Wreath reverse, rather than the heavier wreath of corn, wheat, cotton, and tobacco that appears on the 1858 regular issue. Struck in copper-nickel with a plain edge.

**Commentary.** This pattern issue was struck in two types, both lumped together in Judd as number 191, but given separate numbers in Andrew W. Pollock III's *United States Patterns and Related Issues*. Pollock-233 (as here) shows five-leaf clusters on the reverse, while Pollock-234, considerably rarer, shows clusters of six leaves.

**Physical Description.** This pretty Gem Cameo coin displays well-struck, distraction-free pinkish-tan surfaces on each side, with excellent eye appeal and noticeable field-device contrast. Like so many pieces in this remarkable collection, the piece was obviously purchased with an eye toward *quality*. **NGC Census:** This is the sole Judd-191 graded by NGC with a Cameo designation, with two pieces graded PR66 with no designation. **PCGS Population:** The finest graded are five PR65 pieces without the cameo designation (12/08).

**Provenance.** *Ex: Quality (12/1972).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11840)

## 1858 Flying Eagle, Oak Wreath Cent Pattern, Judd-192, PR64

**1552 1858 Flying Eagle Cent, Judd-192, Pollock-235, R.5, PR64 NGC.**

**Design.** The obverse is struck from the regular 1858 Flying Eagle cent, Small Letters die, while the reverse is an Oak Wreath design. Struck in copper-nickel with a plain edge.

**Commentary.** The Flying Eagle and Indian cents of 1856-60 underwent several different changes in the design of the reverse wreath, many of them documented via pattern issues. The first wreath on the regular-issue Flying Eagle cents of 1857 and 1858 (as well as some of the 1856 patterns) comprised corn, wheat, oak, and tobacco. Then in 1859, the first copper-nickel Indian cents had a Laurel Wreath reverse, with no shield. Introduced in 1860 and running through the series' end, the Oak Wreath, With Shield reverse included a wreath somewhat similar to the oak wreath on the present pattern, of course with the noted addition of an ornamental shield at the wreath opening.

**Physical Description.** Attractive pinkish-tan surfaces show just a few trivial dark flecks, and a small planchet lamination is noted just northwest of the 1 in the date, providing a pedigree identifier. There is minor strike softness on the O of ONE on the reverse. **NGC Census:** 6 in PR64; 7 finer, including two PR64 Cameos. **PCGS Population:** 16 in PR64, 7 finer (12/08).

**Provenance.** *Ex: Bowers and Merena (11/1992), lot 1012.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11842)

## 1858 Flying Eagle, Oak Wreath With Shield Cent, Judd-193, PR66

**1553 1858 Flying Eagle Cent, Judd-193, Pollock-236, R.5, PR66 NGC.**

**Design.** The regular-issue 1858 Flying Eagle, Small Letters obverse combined with an Oak Wreath, With Shield reverse featuring an ornamented shield. Struck in copper-nickel with a plain edge.

**Commentary.** The Judd-191, 192, and 193 Flying Eagle cent patterns, rated R.5, are among the more available of the various cent experiments produced during this era when the "old coppers" were being phased out, and they are popular and collectible; while still rare, they are much less so than most patterns, and they combine that with their broad appeal to aficionados of Flying Eagle and Indian cents.

**Physical Description.** The golden-tan surfaces reveal no mentionable distractions, with generous eye appeal and a bold strike much in evidence. A couple of streaks of darker orange toning appear on the reverse. **NGC Census:** 2 in PR66, none finer. **PCGS Population:** No specimens have been graded higher than PR65 (12/08).

**Provenance.** *Ex: The Winner F. Delp Collection (Stack's, 11/1972), lot 14.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11844)

## Gem Proof 1858 Flying Eagle Large Letters Cent, Oak Wreath With Shield Reverse, Judd-198

**1554 1858 Flying Eagle Cent, Judd-198, Pollock-229, Low R.6, PR65 NGC.**

**Design.** Combines the regular 1858 Flying Eagle, Large Letters die with the Oak Wreath, With Shield reverse also used on Judd-193 through 195. Struck in copper-nickel with a plain edge.

**Commentary.** This variety, while sharing the same reverse, is somewhat rarer than the Judd-193 (Small Letters obverse). The AM in AMERICA are joined on the Large Letters, separated on the Small Letters.

**Physical Description.** Some minor planchet roughness appears along the obverse rim, near S OF AM, but this is mentioned for pedigree purposes only. Both sides show consistent appeal, a function of the good strike and attractive golden-tan coloration. **NGC Census:** 4 in PR65, 1 finer. **PCGS Population:** 3 in PR65, none finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11856)

## 1858 Flying Eagle Cent
## Judd-202, Pollock-245, PR64

**1555 1858 Flying Eagle Cent, Judd-202, Pollock-245, R.5, PR64 NGC.**

**Design.** The obverse combines a rather ungainly Flying Eagle design that famed pattern collector Rogers M. Fred, Jr. attributed to Anthony Paquet, with a Laurel Wreath reverse showing six-leaf clusters. An olive sprig and three arrows are bound at the base of the wreath. Struck in copper-nickel with a plain edge.

**Commentary.** As quoted in Pollock, pattern collector Fred wrote, "... the letters on this obverse type are taller, thinner, and more condensed than on the large Flying Eagle type. This is the type of lettering used by Paquet on other coins and medals so I think that he probably designed this obverse. It also has the same awkward appearance to the eagle that is found on many of his other designs." This cent is found in five- (Pollock-245) and six-leaf (Pollock-246) clusters, with the latter R.6 and the former R.5. This piece is a five-leaf example.

**Physical Description.** The reddish-tan surfaces show a couple of faint smudges on the obverse and a dark spot above the eagle's wing, while the reverse is a tad nicer, and might rate a PR65 if taken on its own merits. Pleasing nonetheless. **NGC Census:** 13 in PR64, 7 finer. **PCGS Population:** 13 in PR64; 9 finer including a PR64 Cameo (12/08).

**Provenance.** *Ex: Bowers and Merena (5/1993), lot 2403.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11867)

## 1858 'Small' Flying Eagle Cent
## Judd-203, PR64

**1556 1858 Flying Eagle Cent, Judd-203, Pollock-247, R.5, PR64 NGC.**

**Design.** The Small Flying Eagle obverse, combined with Oak Wreath reverse. Struck in copper-nickel with a plain edge.

**Commentary.** The Judd ninth edition has this as R.3, certainly a typo, as it is R.5 or higher. The Mint sold to collectors in 1858 12-piece sets containing three different major obverse design types, combined with four different reverse designs (one pairing would produce the regular-issue proof 1858 Flying Eagle cent), although several subvarieties are known.

**Physical Description.** A sharp strike delineates the feather detail in that strange hawklike eagle on the obverse and accentuates the fine detail in the oak wreath. The lovely golden-tan surfaces overall appear close to a Gem grade. **NGC Census:** 7 in PR64; 7 finer including a PR64 Cameo example. **PCGS Population:** 15 in PR64, 5 finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11869)

## PR63 Judd-204 1858 Flying Eagle Cent

**1557 1858 Flying Eagle Cent, Judd-204, Pollock-248, R.5, PR63 NGC.**

**Design.** The Small Flying Eagle obverse of 1858 is combined with the Oak Wreath With Shield reverse. Struck in copper-nickel with a plain edge.

**Commentary.** Another R.5 1858 Flying Eagle cent pattern; like some others of the year, this design also saw some copper strikes, but they are rated R.8, with only a tiny handful of survivors known.

**Physical Description.** The pretty golden-tan surfaces on this conservatively graded piece show a few minor, undistracting flecks along with a bold strike and lots of eye appeal. **NGC Census:** 8 in PR63, 17 finer. **PCGS Population:** 19 in PR63, 29 finer. (12/08).

**Provenance.** *Ex: Central States Numismatic Society Auction (RARCOA, 4/1975), lot 357.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11871)

## PR64 1858 'Small' Flying Eagle Cent, Judd-206

1558 **1858 Flying Eagle Cent, Judd-206, Pollock-242, R.5, PR64 NGC.**

**Design.** The Small Flying Eagle obverse combined with the Agricultural Wreath reverse, featuring corn, wheat, cotton, and tobacco. Struck in copper-nickel with a plain edge.

**Commentary.** Another available variety with the Small Flying Eagle. Pollock notes a Pollock-242, a possible "double eagle" cent based on a 1911 article in *The Numismatist* by Edgar H. Adams, titled "Live American Numismatic Items":

> "Mr. William H. Woodin, the well-known pattern collector, has one piece in his collection that can very properly be called a 'double eagle.' The design shows on one side the small flying eagle as used on one *[sic]* variety of the copper-nickel pattern cents of 1858, while on the other is the large flying eagle that was used on the flying eagle cents of 1856, 1857, and 1858. Neither side bears a date, and the metal of which it is composed is pure nickel."

The variety, if indeed it exists, is unlisted now in Judd.

**Physical Description.** Considerable cameo contrast appears on both sides, although it is unnoted by NGC. There are a few trivial flecks, but the strike is razor-sharp. Beautiful iridescence is seen on both obverse and reverse in shades of rose, citrine, and cyan. **NGC Census:** 10 in PR64, 7 finer. **PCGS Population:** 18 in PR64; 3 finer including a PR64 Cameo (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#11877)

# 1858 Indian Cent Pattern, Judd-208, Pollock-259
# Centered Date, Five-Leaf Clusters, MS64

1559 **1858 Indian Cent, Judd-208, Pollock-259, R.4, MS64 NGC.**

**Design.** This is a transitional issue, with the same Indian Head obverse and Laurel Wreath reverse as adopted in 1859. Struck in copper-nickel with a plain edge.

**Commentary.** Examples of the Judd-208 issue were struck in both proof and business strike formats, although a determination of which of the Pollock varieties below were produced in those formats is beyond the scope of this description. The present piece was produced as a business strike. In terms of the certified populations, the total business strikes at NGC and PCGS combined are only about half of the proof total.

Pollock enumerates the obverse and reverse variants (all of which share the same Judd number, 208) as follows:
—**Pollock-253.** Low Date, five-leaf clusters in wreath. R.7.
—**Pollock-254.** Low Date, six-leaf clusters in wreath. R.7.
—**Pollock-259.** Centered Date, five-leaf clusters in wreath. Pollock R.4. The combined NGC/PCGS population is nearly 120 examples (of Judd-208).
—**Pollock-261.** Centered Date, six-leaf clusters in wreath. Pollock R.4, now considered R.7.

Much confusion surrounds the rarity of this issue. Part of it is due to the lack of separately attributed varieties at the major grading services, which would allow a more-accurate estimate of the surviving populations. Part of it is likely due to lack of knowledge of the die differences on the part of many collectors. Although the Judd ninth edition lists the rarity as R.1, that is surely in error, as it would mean that more than 1,250 examples are known.

The most accurate current information from USPatterns.com is given here. Several Indian cent (and Flying Eagle cent) die varieties were included in the 12-piece sets the Mint sold to collectors, with the Centered Date and five-leaf cluster (Pollock-259) much more often seen than the other Indian cent types. All of the Low Date and six-leaf varieties are indicated as R.7 according to Saul Teichman, with about a half-dozen examples known of each. The site lists the Pollock-259 as R.4, and we concur that high R.3 to R.4 is probably correct. (The "very common" label on USPatterns.com may explain the discrepancy, but one must add, "common *for a pattern.*")

**Physical Description.** This glossy, lustrous, well-struck near-Gem piece shows pretty almond-brown and pinkish coloration over surfaces that show only a couple of minor flecks but are free of any major distractions. The strike is somewhat soft on parts of LIBERTY and the central reverse, indicative of the hardness of the copper-nickel planchets that would ultimately lead to the introduction of the bronze cents. **NGC Census:** 15 in MS64, 6 finer as business strikes. **PCGS Population:** 11 in MS64, 4 finer (12/08).

**Provenance.** *Ex: Stack's (12/1970), lot 587.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#11884)

## 1858 Centered Date Indian Cent
## Judd-211, Pollock-262, PR64

**1560 1858 Indian Cent, Judd-211, Pollock-262, R.5, PR64 NGC.**

**Design.** The regular-issue Indian Head obverse is here combined with the Laurel Wreath reverse. Struck in copper-nickel with a plain edge.

**Commentary.** Die varieties exist: Low Date (Pollock-255, R.7) and Centered Date (Pollock-262, R.4 in Pollock; now listed as R.5 on USPatterns.com). The rarer Low Date is really quite easy to distinguish, as the lower right loop of the last 8 in the date is extremely close to the denticles.

**Physical Description.** Centered Date. A few trivial flyspecks appear, mostly visible under a loupe, but a sharp strike and contact-free pinkish-tan surfaces provide generous eye appeal. **NGC Census:** 18 in PR64; 7 finer. **PCGS Population:** 22 in PR64; 6 finer including a PR64 Cameo (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11893)

## 1858 Centered Date Indian Cent
## Struck in Copper-Nickel
## Judd-212, Pollock-263, PR63

**1561 1858 Indian Cent, Judd-212, Pollock-263, R.5, PR63 NGC.**

**Design.** The Indian Head obverse combined with the Oak Wreath, With Shield reverse, featuring an ornamented shield. Struck in copper-nickel with a plain edge.

**Commentary.** Die varieties exist: Low Date (Pollock-256, R.7) and Centered Date (Pollock-263, R.5). The rarer Low Date (of which USPatterns.com estimates a half-dozen examples exist) is really quite easy to distinguish: The bottom left serif of the 1 and the lower right loop of the last 8 in the date are close to the denticles.

**Physical Description.** Centered Date. A sharply struck piece that shows some minor haze in the fields and a small, island-shaped planchet lamination near O(F), mentioned for pedigree purposes. Seemingly conservatively graded, and quite attractive despite the modest Select rating. Streaky tan surfaces. **NGC Census:** 15 in PR63, 32 finer. **PCGS Population:** 25 in PR63, 49 finer (12/08).

**Provenance.** *Ex: The S.S. Forrest, Jr. Collection (Stack's, 9/1972), lot 647.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11895)

# PR64 1858 Judd-213, Pollock-258 Indian Cent, Sharp R.6 Variety

1562 **1858 Indian Cent, Judd-213, Pollock-258, R.6, PR64 NGC.**

**Design.** Transitional issue, the obverse as adopted in 1859 (pointed bust on truncation) combined with the Agricultural Wreath 1858 reverse, with a wreath of corn, cotton, tobacco, and wheat. Struck in copper-nickel with a plain edge.

**Commentary.** Pollock enumerates the obverse and reverse variants (all of which share the same Judd number, 213) as follows:
—**Pollock-251.** Pointed bust truncation as on regular-issue cents from 1859 and part of 1860; the obverse is called "Low Date" in Breen's *Complete Encyclopedia*. Reverse shows point of leaf closest to C(ENT) well above the base of that letter. R.7.
—**Pollock-252.** Same obverse as Pollock-251; reverse point of leaf closest to C(ENT) about even with base of C. R.6.
—**Pollock-257.** Rounded bust truncation as on regular-issue Indian cents from 1860 through part of 1864. This is called the "Centered Date" in Breen's *Complete Encyclopedia*. Reverse shows point of leaf closest to C(ENT) well above the base of that letter. R.7.
—**Pollock-258.** Same obverse as Pollock-257; reverse point of leaf closest to C(ENT) about even with base of C. R.6.

Pollock in 1992 and USPatterns.com today rate both the Pollock-252 and 258 varieties with leaf tip even with base of C as R.6, but the Pollock-251 and 257, with leaf tip high, as R.7.

**Physical Description.** Rounded Bust, leaf tip even with base of C(ENT). A lovely near-Gem piece that shows only the most picayune flecks, hardly worthy of mentioning. Pretty golden-pink surfaces offer a bold strike and much eye appeal, with considerable cameo contrast. **NGC Census:** 13 in PR64, 5 finer. **PCGS Population:** 16 in PR64, 1 finer. (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#11897)

# Elusive 1858 Quarter Pattern, PR63 Judd-221, High R.7

1563 **1858 Quarter Dollar, Judd-221, Pollock-264, High R.7, PR63 NGC.**

**Design.** The regular Liberty Seated quarter dollar obverse for the year. Anthony Paquet designed the reverse die for this variety, which was also used to produce the 1859 Judd-234 quarter patterns. A seemingly malformed eagle with outstretched wings displays a shield on its breast. The left claw holds three long, slender arrows while the right talons grasp an olive sprig. UNITED STATES OF AMERICA / QUARTER DOLLAR surrounds the periphery. Struck in silver with a reeded edge.

**Commentary.** The author of the USPatterns.com website comments on Judd-221: "Its first appearance to my knowledge was lot C of Edward Cogan's 5/21/1860 sale where it was stated that only [four pieces] were struck." Our research finds three different examples offered at major auction during the past 15 years, although some pieces crossed the block more than once during that period and there may be a couple of more appearances unknown to us. Andrew Pollock's reference identifies six different specimens, so the Cogan cataloger was either mistaken, or a couple of more patterns were struck at a later date. Regardless, Judd-221 remains a true rarity to this day with six to 12 pieces believed existing by various researchers.

**Physical Description.** Sharply struck throughout, with interesting amber toning on both sides. A few superficial hairlines in the delicate fields limit the grade beyond the Select proof level. Pollock noted that this piece has a weight of 95.9 grains and a diameter of 0.942 inches. The die alignment is 180 degrees. **NGC Census:** 1 in PR63, 4 finer. **PCGS Population:** None. (12/08).

**Provenance.** *Ex: DiBello Sale (Stack's, 5/1970), lot 334; U.S. Patterns Sale (Stack's, 1/1987), lot 521.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11914)

# Extremely Rare 1858 Half Dollar, PR63 Brown
# Only Example in Private Hands of Judd-223A, R.8

1564 **1858 Half Dollar, Judd-223A, Pollock-267, R.8, PR63 Brown NGC.**

**Design.** The two known Judd-223A patterns were created through the marriage of two Paquet Perched Eagle reverse dies, although one was extensively ground, thus removing approximately 75% of the detail. Struck in copper with a reeded edge.

**Commentary.** Judd-223A is perhaps one of the oddest patterns of any date and, until the eighth edition of *United States Pattern Coins* by Judd, was listed under Appendix A: Die and Hub Trials in the same reference. The age-old question regarding this peculiar pattern—or, more accurately, "fantasy piece"—is which die was ground to create the near-uniface side. The latest edition of Judd (2005) states that the ground side is "possibly Reverse B of 1859, but this has not been confirmed." This suggestion is logical since Reverse B is the "broken ribbon" version of Paquet's Perched Eagle die, and the opposite side of Judd-223A is the "perfect ribbon" variation. Given the limited quantity of pieces struck from Paquet's dies, we can safely assume that only one die of each version was prepared.

Because little detail was spared when the die was effaced, past researchers have only speculated that it could be the "broken ribbon" variety. Using computer overlay technology, the catalogers of this sale are confident that the ground die is indeed Reverse B, or the "broken ribbon" variety. The key diagnostic is the positional relationship of DOLLAR to the dentils. Further proof is found in the differing styles of the olive branch leaves. Now that the effaced die has been positively identified, a new questions begs to be answered: Why was one die cancelled, as opposed to simply being discarded, and were the two dies married for a purpose, or are they truly fantasy pieces? These mysteries, unfortunately, may never be solved.

Only two examples of Judd-223A are known. The Cox piece, which was unknown to Pollock, is permanently impounded in the Smithsonian Institution. Taxay (1975) also considered this to be a unique die trial. The USPatterns.com website provides a provenance which corrects the information documented in Pollock's 1994 treatise. The current offering is **plated in both Judd and Pollock.**

**Physical Description.** Mottled ebony and walnut coloration blankets both sides of this bizarre production. The surfaces are smooth with a few scattered abrasions that are commensurate with the assigned grade. Although more fascinating than attractive, this extremely rare piece is sure to be a highlight of its new owner's pattern cabinet.

**Census.** Only two examples are known.

1. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1756; M.H. Bolender; Edwin Hydeman; Mann Sale (Bowers and Merena, 9/1988), lot 597. **The present specimen.**
2. The Cox example; Smithsonian Institution.

*From The Lemus Collection, Queller Family Collection Part Two.*(#11919)

## Interesting 1859 Pattern Cent, MS64 Judd-227, Low R.6

1565 **1859 Indian Cent, Judd-227, Pollock-271, Low R.6, MS64 NGC.**

**Design.** A regular 1859-dated cent die was mated with a pattern reverse die displaying a small ornamental shield between the upper points of an oak wreath. ONE CENT, in two lines, fills the central design area. Struck in copper-nickel with a reeded edge.

**Commentary.** Although tested on several patterns dated 1858 and 1859, the reverse design of Judd-227 never appeared on a regular cent issue. *United States Pattern Coins* by Judd references an 1860 comment by Mint Director James Ross Snowden that sheds light on the reason for the failure: "The objection to this was that the shield had the appearance of a harp."

**Physical Description.** Pale red-gold coloration dominates the surfaces of this boldly struck cent pattern. A dark toning spot between the E of AMERICA and the Indian's headdress is noted. **NGC Census:** 4 in MS64, 1 finer. **PCGS Population:** 3 in MS64, none finer. (12/08).

**Provenance.** *Ex: Bergin Sale (Stack's, 6/1984).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11931)

## Popular 1859 Judd-228 Transitional Cent, MS65

1566 **1859 Indian Cent, Judd-228, Pollock-272, R.1, MS65 NGC.**

**Design.** Regular 1859-dated obverse cent dies were mated with a reverse die, or dies, featuring a design that was eventually adopted to strike all official Indian cents from 1860 through 1909. An oak wreath—with a narrow shield between the two upper tips—encloses ONE CENT. Struck in copper-nickel with a plain edge.

**Commentary.** This transitional piece is popular due to its relatively low price in relation to its availability. For example, many more 1856 Flying Eagle cents are extant than Judd-228, yet the latter often sells for a fraction of the cost. The absence of this issue in leading hobby price guides explains the price-to-availability phenomenon. *United States Pattern Coins* by Judd indicates that most survivors are in business strike format, and that the proof variants "are valued at four times their Mint State counterparts."

**Physical Description.** A business strike dominated by red coloration on both sides. The strike is bold. Two small carbon spots on the reverse—one at the 10 o'clock reverse rim and another on the diagonal of N in ONE—shall serve as pedigree identifiers for future collectors and researchers. **NGC Census:** 37 in MS65, 6 finer. **PCGS Population:** 59 in MS65, 10 finer. (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#10413)

## Second Finest 1859 Indian Cent
## Die Trial in Copper
## Judd-230, PR64 Red and Brown

1567 **1859 Indian Cent, Judd-230, Pollock-274, High R.7, PR64 Red and Brown NGC.**

**Design.** Struck from regular dies for the 1859 Indian cent. The reverse has a laurel wreath with six-leaf clusters. Struck on a thick planchet in copper or bronze, with a plain edge and a medallic die alignment.

**Commentary.** A single Pollock number includes both Judd-230 (copper) and Judd-231 (bronze) since it is impossible to distinguish between them without elemental analysis. There are just seven or eight examples known of both Judd numbers combined.

In volume two of *The Flying Eagle & Indian Cent Attribution Guide*, Richard Snow itemizes seven distinct examples, noting that one of his seven may actually be a regular-issue 1859 cent. The present specimen is unlisted in Snow, so it may be either a seventh or eighth known piece. It appears to be the second finest known specimen.

**Physical Description.** Brilliant and fully mirrored mint red surfaces exhibit excellent contrast. Both sides have slight mellowing of the color, preventing a full Red designation, and minor spots or toning splashes that prevent a Gem grade assignment. Census (as Judd-230): one in 64 Red and Brown, none finer (11/08). NGC has certified a "Judd-231" as PR65 Brown. PCGS has also certified a single PR64 Red and Brown as its finest Judd-230.

**Provenance.** *Ex: Stack's (6/1988), lot 428.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#11945)

# 1859 Transitional Dime Pattern, PR67 Judd-233, Low R.7
# The Pollock Plate Coin

1568 **1859 Ten Cents, Judd-233, Pollock-280, Low R.7, PR67 NGC.**

**Design.** A transitional pattern produced with a regular-issue dime obverse die and a conceptual reverse die. A seated Liberty holds a pole and cap in her left hand while a shield with a ribbon inscribed with the word LIBERTY rests against her. Thirteen stars encircle the obverse periphery, with the date in exergue. ONE DIME is within an ornate wreath of corn, wheat, maple, and oak on the reverse. Struck in silver with a reeded edge.

**Commentary.** Often referred to as the "stateless issue," in that the design lacks any reference to the country of origin. Mint Director Snowden was a proponent of Longacre's "cereal wreath" reverse motif, which was ultimately adopted for regular-issue half dimes and ten cent pieces in 1860. Obviously the new reverse die(s) were sunk before the obverse dies were modified with our nation's identity replacing the 13 stars at the periphery—and a transitional pattern was born. Actually, the term "pattern" applied to this issue is debatable. The USPatterns.com website labels these items as "fantasy pieces," while others prefer the use of "pattern" when describing the issue. In the end, Judd-233 is best described as a transitional piece.
Although equally as rare, these transitional curiosities are valued substantially higher than many other patterns of the era due to their inclusion in mainstream price guides, such as the *Guide Book*. It is a simple matter of supply and demand; there are more included in collectors' want lists than there are examples available for purchase.

**Physical Description.** A distinct toning area near stars 11 through 13 on the obverse confirms this piece as the **plate coin in Andrew Pollock's 1994 pattern treatise.** Teal coloration dominates otherwise steel-gray surfaces on both sides of this Superb Gem proof. The strike is sharp and evenly distributed. The eye appeal of the current offering is spectacular. Aggressive bidding is sure to ensue. **NGC Census:** 1 in PR67, 1 finer as a PR67 Cameo. **PCGS Population:** None has been graded higher than PR66 (12/08).

**Provenance.** *Ex: Stack's private treaty transaction (12/1990). From The Lemus Collection, Queller Family Collection Part Two.* (#11956)

# Stunning 1859 Half Dollar, PR67
# Finest Graded at Either Service; Judd-235, Pollock-282, R.6

1569 **1859 Half Dollar, Judd-235, Pollock-282, R.6, PR67 NGC.**

**Design.** Paquet's obverse design features a left-facing Liberty, seated, supporting a fasces with her right hand and a shield with her left. Thirteen small stars surround the periphery with the date, 1859, in exergue. Arrows and olive branches lie at the base of the shield. Reverse: Also by Paquet. A slightly disproportionate eagle, with wings spread, holds three slender arrows in its left claw and an olive sprig with its right talon. The perfect scroll held in the eagle's beak reads E PLURIBUS UNUM with UNITED STATES OF AMERICA occupying the upper periphery and HALF DOLLAR the lower. The vertical lines in the shield are in groups of four each, as opposed to three lines as found on the similar "broken ribbon" version of this pattern. Struck in silver with a reeded edge.

**Commentary.** Interestingly, Judd chose to classify four different die marriages of this design within two categories: Judd-235 for the silver pieces and Judd-236 for the copper strikings. Each of the Judd varieties actually includes two different reverse dies. The difference in the reverse dies—both by Paquet—is most easily recognized in the shield design and the broken, versus perfect, condition of the ribbon held in the eagle's beak. In addition, on Pollock-282 the eagle has seven tail feathers, whereas the Pollock-284 eagle shows six tail feathers. Judd-235 comprises the aforementioned Pollock attributions.

**Physical Description.** A sharply impressed and wonderfully preserved example. Deep, watery fields contrast nicely with the lustrous devices, although not designated as Cameo by NGC. Light, amber toning attests to the utter originality of this Superb Gem proof pattern. **NGC Census:** 1 in PR67, none finer. **PCGS Population:** No Judd-235 has been graded higher than PR65 (12/08).

**Provenance.** *Ex: Metropolitan New York Numismatic Convention (Stack's, 3/1973), lot 337.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11960)

# 1859 Judd-236, Pollock-285 Half Dollar in Copper, R.7
# Pleasing PR66 Red and Brown

1570 **1859 Half Dollar, Judd-236, Pollock-285, R.7, PR66 Red and Brown NGC.**

**Design.** Paquet's obverse design featuring a left-facing Liberty, seated, supporting a fasces with her right hand and a shield with her left. Thirteen small stars surround the periphery with the date, 1859, in exergue. Arrows and olive branches lie at the base of the shield. Reverse: Also by Paquet. A slightly disproportionate eagle, with wings spread, holds three slender arrows in its left claw and an olive sprig with its right talon. The scroll held in the eagle's beak reads E PLURIBUS UNUM with UNITED STATES OF AMERICA occupying the upper periphery and HALF DOLLAR the lower. The vertical lines in the shield are in groups of three each, as opposed to four lines as found on the similar "perfect ribbon" version of this pattern. Struck in copper with a reeded edge.

**Commentary.** This design is referred to as the "broken ribbon" variety, which is a reference to the incompleteness of the scroll held in the eagle's mouth due to relapping of the reverse die to remove rust and other signs of deterioration. Researchers believe that this and other patterns dated 1859 were actually struck at a later date—possibly in the 1870s. Curiously, Judd lists both the perfect and broken ribbon patterns under Judd-236, whereas Pollock (1994) separated the varieties: Pollock-283 for the "perfect ribbon" and Pollock-285—the version offered here—for the "broken ribbon" issues. Pollock-285 is slightly rarer than the other.

**Physical Description.** Variegated mahogany and chestnut coloration over glossy surfaces. The strike is razor-sharp with the exception of the R in PLURIBUS on the reverse scroll, which is inherent to the issue. **NGC Census:** 2 in PR66 Red and Brown, none finer. **PCGS Population:** The finest example PCGS has seen is a single PR66 Brown (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11963)

## Premium Gem Proof 1859 Half Dollar, Judd-237 Tied for Finest Certified

**1571 1859 Half Dollar, Judd-237, Pollock-293, R.4, PR66 NGC.**

**Design.** Referred to as Longacre's "French Liberty Head" design. A Romanesque bust of Liberty faces right, with a crown of intertwined oak and vine leaves. Around her neck is a scroll inscribed with the word LIBERTY. UNITED STATES OF AMERICA fills the peripheral fields with the date below. An ornate wreath of cotton, tobacco, sugar cane, corn, wheat, and oak leaves dominates the reverse, with HALF / DOLLAR enclosed. Struck in silver with a reeded edge.

**Commentary.** The reverse design was attributed to Anthony Paquet by Mint Director James Ross Snowden in 1860, according to research by Pollock. Snowden stated that the "Wreath of Cereals" was "deliberately designed to admit perfect striking of the head on the obverse." Even though Paquet was the engraver, Snowden credits Harold P. Newlin with the concept.

**Physical Description.** Crisply struck with mirrored fields throughout. Delicate amber toning boosts the eye appeal of this Premium Gem proof. **NGC Census:** four in PR66, none finer (11/08). **PCGS Population:** one PR66. This example is tied for finest certified.

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11966)

## Glossy 1859 Fifty Cent Pattern, PR65 Brown, Judd-238

**1572 1859 Half Dollar, Judd-238, Pollock-294, R.5, PR65 Brown NGC.**

**Design.** Referred to as Longacre's "French Liberty Head" design. A Romanesque bust of Liberty faces right, with a crown of intertwined oak and vine leaves. Around her neck is a scroll inscribed with the word LIBERTY. UNITED STATES OF AMERICA fills the peripheral fields with the date below. An ornate wreath of cotton, tobacco, sugar cane, corn, wheat, and oak leaves dominates the reverse, with HALF / DOLLAR enclosed. Struck in copper with a reeded edge.

**Commentary.** This die marriage was used to strike two varieties: one in silver and one in copper—the current offering—both with a reeded edge. Both are common relative to other patterns of the era, but finding eye-appealing examples can be challenging. The ninth edition of *United States Pattern Coins* by Judd elaborates: "Copper strikings are apt to be dull, cleaned, and otherwise unsatisfactory."

**Physical Description.** A pleasing Gem proof. Walnut-brown surfaces reveal traces of electric-blue iridescence when viewed under direct light. A circular toning spot under the LL of DOLLAR on the reverse provides a simple yet undistracting means of future identification. Although correctly designated as Brown by NGC, much original red coloration remains, especially on the reverse. **NGC Census:** 2 in PR65 Brown; 5 finer including 2 PR65 Red and Brown. **PCGS Population:** No piece has been awarded a Gem grade (12/08).

**Provenance.** *Ex: Auction '87 (Stack's, 7/1987), lot 827.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11969)

## Well-Preserved 1859 Half Dollar, PR65 French Liberty Head in Silver, Judd-239

1573 **1859 Half Dollar, Judd-239, Pollock-295, R.5, PR65 NGC.**

**Design.** Referred to as Longacre's "French Liberty Head" design. A Romanesque bust of Liberty faces right, with a crown of intertwined oak and vine leaves. Around her neck is a scroll inscribed with the word LIBERTY. UNITED STATES OF AMERICA fills the peripheral fields with the date below. An ornate wreath of cotton, tobacco, sugar cane, corn, wheat, and oak leaves dominates the reverse, with 1/2 DOLLAR enclosed in two lines. Struck in silver with a reeded edge.

**Commentary.** Although the design is popular with collectors today, not everyone is a fan of Longacre's French Liberty Head design. Cornelius Vermeule criticizes in his *Numismatic Art in America:* "The obverse is a horror by any standards of taste in any age. The bust of Liberty is none other than that of the Greco-Roman Apollo Belvedere with a large wreath of oak and vine leaves, an awkward ribbon set at various irregular, jerky angles around the base of the neck being the surface for display of the word LIBERTY. The cereal wreath is florid, pleasing, and only pedantic if someone stops to tell the viewer what its elements contain."

**Physical Description.** Intermingled russet and steel-gray toning plays over the well-preserved surfaces. The crisp strike confirms the Gem status of this eye-appealing proof pattern. **NGC Census:** 5 in PR65, 1 finer. **PCGS Population:** 4 in PR65, none finer (12/08).

**Provenance.** *Ex: Smith Sale (Stack's, 12/1987), lot 1015.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11972)

## Attractive 1859 Half Dollar, PR65 Brown, Judd-240

1574 **1859 Half Dollar, Judd-240, Pollock-296, R.5, PR65 Brown NGC.**

**Design.** Referred to as Longacre's "French Liberty Head" design. A Romanesque bust of Liberty faces right, with a crown of intertwined oak and vine leaves. Around her neck is a scroll inscribed with the word LIBERTY. UNITED STATES OF AMERICA fills the peripheral fields with the date below. An ornate wreath of cotton, tobacco, sugar cane, corn, wheat, and oak leaves dominates the reverse, with 1/2 DOLLAR enclosed in two lines. Struck in copper with a reeded edge.

**Commentary.** As noted on USPatterns.com, pattern specialist Saul Teichman "has always questioned whether [the French head] was designed by Longacre or Paquet as the 1859 half dollar patterns used Paquet's punches in the legend UNITED STATES OF AMERICA." Credit for the design will likely remain a matter of opinion.

**Physical Description.** Deep brown surfaces reveal blue-green and rose hues when viewed at an angle under light. Slight surface roughness suggests that this piece was restruck from rusted dies no later than the 1870s. **NGC Census:** NGC has certified four examples at the Gem level with four finer pieces, all color designations considered. **PCGS Population:** 1 in PR65 Brown, 6 with the same grade and differing color designations (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11975)

## Deeply Toned 1859 Half Dollar, PR64 Brown, Judd-242

1575 **1859 Half Dollar, Judd-242, Pollock-298, R.5, PR64 Brown NGC.**

**Design.** Referred to as Longacre's "French Liberty Head" design. A Romanesque bust of Liberty faces right, with a crown of intertwined oak and vine leaves. Around her neck is a scroll inscribed with the word LIBERTY. UNITED STATES OF AMERICA fills the peripheral fields with the date below. An ornate wreath of cotton, tobacco, sugar cane, corn, wheat, and oak leaves dominates the reverse, with 50 CENTS enclosed in two lines. Struck in copper with a reeded edge.

**Commentary.** The USPatterns.com website opines that over 30 Judd-242 patterns are believed extant in all grades. With approximately 20 auction appearances during the past 15 years and a combined NGC and PCGS population of 35 pieces (11/08), the USPatterns.com estimate appears to be accurate.

**Physical Description.** Bold chestnut coloration adorns this well struck near-Gem proof pattern. Areas of darker toning are observed on both sides, although more so in the right obverse field. **NGC Census:** NGC has certified two examples PR64 Brown and one PR64 Red and Brown, with four pieces numerically finer. **PCGS Population:** 6 in PR64 Brown, 10 finer including five pieces graded PR64 Red and Brown (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11981)

## Seldom-Offered 1859 Half Dollar, PR63 NGC Judd-243, High R.7

1576 **1859 Half Dollar, Judd-243, Pollock-299, High R.7, PR63 NGC.**

**Design.** Referred to as Longacre's "French Liberty Head" design. A Romanesque bust of Liberty faces right, with a crown of intertwined oak and vine leaves. Around her neck is a scroll inscribed with the word LIBERTY. UNITED STATES OF AMERICA fills the peripheral fields with the date below. A regular Type Two reverse die—with LF of HALF spaced apart at their tops—was used to strike Judd-243 and Judd-244 patterns. Struck in silver with a reeded edge.

**Commentary.** Pollock (1994) lists three confirmed specimens, including the current offering, as well as two other possible Judd-243 patterns. A review of auction appearances from 1990 through 2005, as documented in the Dannreuther-Garrett *Red Book of Auction Records*, identifies only two examples having crossed the auction block during that 16-year timeframe. Thus, the generally accepted rarity rating of High R.7 seems to be accurate. In fact USPatterns.com, which is the most current source of pattern rarity ratings, suggests that "about half a dozen [pieces are] known." Without question, this is a rare issue.

**Physical Description.** Richly patinated on both sides and featuring crisply defined details. Pollock documented this piece at 192.1 grains, 1.198 inches in diameter, with a die alignment of 180 degrees. **NGC Census:** This is the only specimen of Judd-243 graded by NGC. **PCGS Population:** 2 in PR63, 1 finer (12/08).

**Provenance.** *Ex: Massachusetts Historical Society (Stack's, 3/1973), lot 342.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11984)

## Eye-Appealing 1859 Fifty Cent Struck in Silver, PR64 Judd-245, Pollock-303, R.7

1577 **1859 Half Dollar, Judd-245, Pollock-303, R.7, PR64 NGC.**

**Design.** Referred to as Longacre's "French Liberty Head" design. A Romanesque bust of Liberty faces right, with a crown of intertwined oak and vine leaves. Around her neck is a scroll inscribed with the word LIBERTY. UNITED STATES OF AMERICA fills the peripheral fields with the date below. Reverse: Paquet's Perched Eagle design with a broken ribbon held in the eagle's beak. Struck in silver with a reeded edge.

**Commentary.** The ninth edition of *United States Pattern Coins* by Judd groups the perfect ribbon and broken ribbon varieties, Pollock-301 and Pollock-303, respectively, under Judd-245. Both variations are rare. The USPatterns.com website comments of the current variety: "The 'broken ribbon' reverse die shows extensive die rust ... and is likely a restrike made in the 1870s. Over a half dozen combined are known in both silver and copper."

**Physical Description.** Deep gunmetal-gray patination hosts variegated magenta and electric-blue toning on both sides of this pleasing near-Gem. Strike weakness is observed on the reverse and is actually an artifact of the die setup; the design was too deep to fill completely with the selected planchets. Pollock (1994) documented a weight of 192.1 grains with a diameter of 1.199 inches for the current offering. **NGC Census:** 2 in PR64, 1 finer. **PCGS Population:** 4 in PR64, none finer (12/08).

**Provenance.** *Ex: Auction '89 (David Akers, 7/1989), lot 1220.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11988)

## Paquet 1859 Liberty Seated With Fasces Half Dollar Judd-248, PR65 Brown

1578 **1859 Half Dollar, Judd-248, Pollock-287, High R.7, PR65 Brown NGC.**

**Design.** The Paquet Liberty Seated With Fasces obverse. A homely, disproportionate Liberty is seated on a rock, shield at her lowered right (facing) hand and holding the top of a fasces in her left hand. An olive branch and three arrowheads lie—curiously so—under the shield. Thirteen stars encircle the rim. The reverse is the familiar Cereal Wreath design, with denomination HALF DOLLAR in the center. Struck in copper with a reeded edge.

**Commentary.** Pollock notes that in October 1859 Mint Director James Ross Snowden wrote to Treasury Secretary Howell Cobb, asking that the reverse of this design be adopted for all silver circulating coins, but it ultimately was placed only on the dime and half dime denominations. Snowden in 1860 attributed the reverse to Anthony Paquet. USPatterns.com opines that these pieces, of which less than a half dozen exist, were "struck from rusted dies in the 1860s or 1870s."

**Physical Description.** While evenly patinated, the fields still show remarkable depth of reflectivity. Both sides are primarily brown and lilac with slight bits of original red still evident, especially on the reverse. Well struck. Each side shows a few scattered carbon spots. **NGC Census:** 1 in PR65 Brown, 1 finer. **PCGS Population:** The sole PCGS-graded example is PR65 Brown (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#11996)

# 1859 Paquet Half Dollar in Silver High R.7, Judd-249, PR63

1579 **1859 Half Dollar, Judd-249, Pollock-288, High R.7, PR63 NGC.**

**Design.** The Paquet Liberty Seated with Fasces obverse. A homely, disproportionate Liberty is seated on a rock, shield at her lowered right (facing) hand and holding the top of a fasces in her left hand. An olive branch and three arrowheads lie—curiously so—under the shield. Thirteen stars encircle the rim. On the reverse, a cereal wreath encloses a large fraction 1/2 on two lines, with DOLLAR on a third line beneath. Struck in silver with a reeded edge.

**Commentary.** We use the expression "curiously so" in the design discussion above, because the engraver, Anthony Paquet, chose to have an olive branch and three arrowheads lying on the ground under Liberty's shield, appearing nearly crushed. Was Paquet trying to make some kind of statement?

Heritage cataloger Mark Van Winkle, as quoted in Pollock, has examined an example that shows dramatic repunching on the digits 185 of the date, and with significant die rust on the reverse around the 2, and on the rim between 12 and 2 o'clock and 6 and 8 o'clock. This may well be common to all these pieces, as it is present on this coin also. USPatterns.com comments that these pieces were probably also struck in the 1860s or 1870s as fantasy pieces for collectors, and estimates that less than a half-dozen are known.

**Physical Description.** The brightly reflective fields serve as a backdrop to the golden-rose color seen over each side. Deeper blue accents surround the margins. A few slight contact marks explain the grade. **NGC Census:** 1 in PR63 and 1 in PR64. **PCGS Population:** None (12/08).

**Provenance.** *Ex: Stack's private treaty transaction (9/1985).From The Lemus Collection, Queller Family Collection Part Two.* (#12000)

# Splendid Gem 1859 'Two-Headed' Half Dollar Muling Judd-253
## One of Perhaps Six Known

1580 **1859 Half Dollar, Judd-253, Pollock-292, High R.7, PR65 NGC.**

**Design.** The design is, as Judd puts it, a "curious muling" of what are actually two obverses, the Paquet Liberty Seated with Fasces and the James B. Longacre (?—see below) French Liberty Head. Obverse 1: A homely, disproportionate Liberty is seated on a rock, shield at her lowered right (facing) hand and holding the top of a fasces in her left hand. An olive branch and three arrowheads lie—curiously so—under the shield. Thirteen stars encircle the rim. Obverse 2: Liberty with an elongated neck faces right, a scroll reading LIBERTY wrapping irregularly at the bust truncation. She has an elaborate floral wreath in her hair, and the tall, thin, stilted letters characteristic of Anthony Paquet spell out UNITED STATES OF AMERICA at the rim. The date 1859 appears in exergue on both sides. Struck in silver with a reeded edge.

**Commentary.** This is strictly a fantasy piece, with "two heads and no tails"—although therein lies a tale. Saul Teichman of USPatterns.com writes that "these were possibly struck in 1859 as an example of this was offered as lot 1185 of Bangs and Co.'s April 1865 sale of the Joseph N.T. Levick collection." Teichman adds the interesting comment that he questions whether the French Head, traditionally attributed to James B. Longacre, was really designed by Anthony C. Paquet, as the design here uses the characteristic Paquet letter punches. USPatterns.com estimates there are a half-dozen pieces known, but three are impounded, presumably permanently, in museum collections.

Similar Paquet-style letters, with tall, fat uprights, narrow letter widths, and tiny horizontals, would two years later be famously employed on the 1861 and 1861-S Paquet Reverse double eagles, regular issues although rare. This is one of the many patterns that may have been created as "trade bait" for the recently formed Mint Cabinet, as the period 1859-60 seems to have been a heyday of such activity, which had only recently gone underground.

**Physical Description.** This splendid Gem features an extremely sharp strike that clearly articulates all the lines in the shield and fasces, as well as all the strands in Liberty's hair. Blushes of gold and rose are a bit stronger near the rims. In PR65 this piece is tied for the finest certified at NGC with another example, but PCGS shows four pieces ranging from PR65 to PR67 (10/08).

**Provenance.** *Ex: Saunders Collection (Bowers and Merena, 11/1987), lot 459.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#12012)

## 1859 Gold Dollar Pattern, Copper
## Judd-256, PR63 Gilt

1581 **1859 Judd-256, Pollock-7010, Low R.7, PR63 Gilt NGC.**

**Design.** Both sides of this gold dollar pattern are similar to the regular-issue Indian Princess gold dollar, but show the characteristic taller, narrow font attributed to Anthony C. Paquet. Struck in copper and gilt, with a reeded edge.

**Commentary.** Although all known examples of this design are struck in copper, many, including the present piece, are gilt. The Judd ninth edition says "the jury is still out on whether this is a Mint issue or a private production." Pollock, listing them under "Uncertain Issues 1800-1920," comments that the design is much like a Paquet pattern gold dollar of 1858, but "somewhat cruder in appearance; a caricature of the 1858 issue." (The 1858 pattern is Judd-222 and 223.)

**Physical Description.** The surfaces are lightly hairlined, but the gilt was well done; each side shows an uninterrupted layer of gold. Sharply struck throughout. The only identifying marks are a small planchet void on the obverse below the D in UNITED, and on the reverse there is a series of reeding marks to the right of the digit in the denomination. **NGC Census:** 2 in PR63 gilt, no other gilt pieces in any grade. **PCGS Population:** No gilt pieces graded (12/08).

**Provenance.** *Ex: ANA Midwinter Auction (Heritage, 2/1987), lot 1303.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#12021)

## Gilt 1859 Paquet Double Eagle
## Judd-257, PR63

1582 **1859 Twenty Dollar, Judd-257, Pollock-305, High R.6, PR63 Gilt NGC.**

**Design.** The obverse features Paquet's design with a seated figure of Liberty facing to the left, a fasces supported by her right hand and a shield by her left hand. Around, 13 stars, and below, the date. An eagle is partially hidden by the shield. The reverse design has a heavy wreath enclosing the date, denomination 20 DOLLARS, and legend UNITED STATES OF AMERICA. The lettering is all in Paquet's distinctive style, apparently not used by any other engravers. Struck in copper, gilt, with a reeded edge.

**Commentary.** About 20 of these patterns are thought to exist per USPatterns.com, and many are gilt like this piece. Andrew Pollock notes that the earliest auction appearance of Judd-257 was in 1870, according to a comment made by 19th century numismatist Thomas Birch. That comment suggests these pieces may be restrikes.

**Physical Description.** Deeply mirrored yellow surfaces exhibit a few faint contact marks and nearly imperceptible hairlines. Some additional lint marks are present, as is some faint pitting. This piece was probably plated long after it was struck. **NGC Census:** 4 in PR63 gilt, 4 finer gilt. **PCGS Population:** No gilt pieces certified (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#12025)

## 1860 Transitional Half Dime Judd-267, MS64

1583 **1860 Transitional, Judd-267, Pollock-315, R.4, MS64 NGC.**

**Design.** The Transitional half dime, featuring the With Stars obverse as used from 1839 through 1859—but dated 1860—combined with the Cereal Wreath reverse used in 1860 and subsequently. Struck in silver with a reeded edge.

**Commentary.** This is a popular pattern issue that is collected by many Seated Liberty aficionados alongside the regular-issue series. The usual mintage given is 100 pieces. As quoted in Pollock, Heritage cataloger Mark Van Winkle writes that all specimens show a "characteristic die scratch from the left base of the rock to the rim." Seated Liberty half dime expert Al Blythe writes in his reference, "This transitional is one of two in the Half Dime series that bear no statutory legend, UNITED STATES OF AMERICA. Reports surface periodically regarding the existence of proofs, but I suspect with only 100 coins struck that there was almost no die wear and all coins minted were proof-like and sharply struck."

Fifty-seven examples are certified at PCGS (listed in the Patterns section of the *Population Report)*, although to find the 52 Mint State examples certified at NGC, one must look in the Half Dimes section of the *Census Report*, where the issue is listed as "1860 Transitional, Judd-267!" Ironically, there is no listing in the Mint State Patterns section.

**Physical Description.** A bit irregularly struck with slight softness noted at the top of the obverse and bottom of the reverse, indicating the dies must have slipped out of alignment. The bright, lustrous surfaces show rose toning over most of each side, with an accent of blue-green around the peripheries. No mentionable marks are seen on either side. **NGC Census:** 14 in MS64, 26 finer. **PCGS Population:** 18 in MS64, 17 finer (12/08).

**Provenance.** *Ex: Stack's (4/1986), lot 370.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#4373)

## 1860 Lettered Edge Half Dollar Pattern Judd-269, R.8, Three Known MS60 Brown

1584 **1860 Half Dollar, Judd-269, Pollock-317, R.8, MS60 Brown NGC.**

**Design.** These are regular-issue Liberty Seated half dollars dated 1860 but they are defaced, and each displays the "edge lettered E PLURIBUS UNUM, but with the letters not strongly impressed," according to Judd. Struck in copper with a lettered edge (of course).

**Commentary.** Another experiment with edge lettering, apparently a short-lived one. While Judd (2005) comments that all of the three known examples show edge lettering "not strongly impressed," Pollock writes (1994) that only the Farouk piece "shows evidence of lettering."

**Physical Description.** Edge lettering on this piece is extremely faint. The most obvious presence on the edge are the stars at 6 and 12 o'clock. Each side has four long indents, an obvious attempt at defacement. The effects of these cancellation marks carry through to the other side, giving the coin a slightly bulged area opposite each mark. The coin is graded MS60, but this is clearly a net grade because of the cancellation, as the surfaces otherwise are remarkably free from post-striking impairments. The color designation is listed as Brown, but again this seems conservative to us, as there is considerable underlying red on each side.

**Provenance.** *Ex: Maj. Lenox R. Lohr; Cox Collection (Stack's, 4/1962), lot 2206; Boosel (RARCOA, 4/1972), lot 1019, Uncirculated; 1974 FUN (RARCOA, 1/1974), lot 554; ANA (Steve Ivy, 2/1983), lot 3026, Uncirculated; Stack's (3/1985), lot 576, Uncirculated.*

# 1860 Pattern Five Dollar in Copper
# Judd-272, PR65 Red and Brown

1585 **1860 Five Dollar, Judd-272, Pollock-320, Low R.6, PR65 Red and Brown NGC.**

**Design.** The James B. Longacre Phrygian Cap design. The head of Liberty faces right, with three large stars on her forehead. A broad curl winds down her neck, meeting a scroll reading LIBERTY at the shoulder. Thirteen small stars ring the rim, with date 1860 below. On the reverse a rather narrow eagle extends his wings while clutching the usual ornaments in his talons, a scroll with the Latin motto above his head. UNITED STATES OF AMERICA and FIVE DOLLARS encircle the border. The V in FIVE is an inverted A. Struck in copper with a reeded edge.

**Commentary.** The Phrygian Head design was reused in 1869 on some of the Standard Silver patterns. On this five dollar pattern, however, the design was on a broad planchet the size of a gold eagle, designed to foil malefactors who might be tempted to scoop out the innards of the coin and replace it with base metal.
We estimate that somewhat less than two dozen examples are known of the issue. Incomplete die and hub trials, struck in lead, are also known.

**Physical Description.** A magnificent piece that retains nearly full mint red color. Each side shows a slight bit of blue toning, but one comes away with an impression of deep red after viewing this pattern. The fields are moderately reflective, and the striking details are strong throughout. Some specimens of this issue are found gilt, but this piece is not, and it is the single finest certified at NGC of the three Red and Brown examples at that service (10/08). **NGC Census:** 1 in PR65 Red and Brown, 1 finer as a PR66 Brown. **PCGS Population:** 1 in PR65 Red and Brown, none finer (12/08).

**Provenance.** *Ex: Stack's private treaty (12/1987).*
*From The Lemus Collection, Queller Family Collection Part Two.*(#12079)

## Interesting Business Strike
## 1861 GOD OUR TRUST Half Dollar
## Low R.7 as Proof, Judd-279, MS65

1586 **1861 Half Dollar, Judd-279, Pollock-330, Low R.7 as Proof, MS65 NGC.**

**Design.** The obverse and reverse are the regular Seated Liberty half dollar dies of the year, with GOD OUR TRUST added in the reverse field, no scroll. Struck in silver with a reeded edge.

**Commentary.** The various 1861 patterns produced with reference to trust in God are due to the upswell in religious sentiment during the Civil War. The copper proof pieces usually have a bronzed surface produced by pickling of the struck coins. About a dozen are known.

**Physical Description.** This piece is fully struck throughout, but the fields show heavy parallel die striations rather than the mirrored finish one would expect from a proof coin—apparently the source for NGC's certification of this rather anomalous coin as a business strike rather than a proof, the only one so certified. Slightly variegated golden-rose toning is seen over each side and is slightly deeper in hue on the reverse. A splendid example with no mentionable or noticeable contact marks on either side. (Business strike) Census: 1 in MS65, 0 finer (11/08). There are no business strikes certified at PCGS.

**Provenance.** *Ex: Superior (2/1987), lot 3225.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#12106)

## 1861 GOD OUR TRUST Half Dollar
## Judd-280, PR66 Brown

1587 **1861 Half Dollar, Judd-280, Pollock-331, Low R.7, PR66 Brown NGC.**

**Design.** The obverse and reverse are the regular Seated Liberty half dollar dies of the year, with GOD OUR TRUST added in the reverse field, no scroll. Struck in copper with a reeded edge.

**Commentary.** The Library Company of Philadelphia has an undated letter from Mint Chief Engraver James B. Longacre concerning the directive to put a reference to trust in God on U.S. coinage. The original suggestion was OUR TRUST IS IN GOD, but no patterns are known with that inscription; Longacre apparently edited it to GOD OUR TRUST. He further, understandably, chose to implement the motto only on the four largest-size coins, the double eagle, eagle, silver dollar, and half dollar. The letter is quoted on USPatterns.com under Judd-279 and 280.

**Physical Description.** A magnificent example. The surfaces actually retain a significant amount of original red, mostly around the devices, but overall the coin has mellowed to lovely iridescent brown, blue, and red. The striking definition is intricately detailed on each side, and there are no obvious contact marks (nor should one expect them on a PR66). **NGC Census:** 2 in PR66 Brown, none finer. **PCGS Population:** 1 in PR66 Brown, 1 finer as a PR66 Red and Brown (12/08).

**Provenance.** *Ex: Stack's (12/1987), lot 1018.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#12108)

## 1861 High Date Gilt Pattern Ten Dollar Judd-285, Pollock-340, PR63 Gilt

1588 **1861 Ten Dollar, Judd-285, Pollock-340, Low R.7, PR63 Gilt NGC.**

**Design.** The obverse is the regular eagle die of the year, and the reverse as well, save that it bears the motto GOD OUR TRUST on a scroll. Struck in copper and gilt with a reeded edge.

**Commentary.** The Judd reference notes that copper impressions usually have bronzed surfaces. Copper half dollars and eagles were struck, both with the motto on a scroll as well as directly in the field. The bronzing was effected by pickling of the coins to "produce a minutely etched surface of rich brown color." Both Low Date (Pollock-338) and High Date (Pollock-340) variants exist, each to the extent of perhaps a half-dozen examples.

**Physical Description.** This gilt example is the High Date variety, with the date placed slightly higher in the field and closer to the bust truncation than to the denticles. Light hairlines are seen on each side, which explain the PR63 grade. The only other mentionable defects are a cluster of planchet porosity in front of Liberty's forehead and several carbon spots that show through the gilt on the reverse. **NGC Census:** This is the finer by three grade points of the two gilt pieces NGC has graded. **PCGS Population:** None have been graded gilt (12/08).

**Provenance.** *Ex: Stack's (6/1988), lot 432.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60431)

## 1861 Ten Dollar Pattern Judd-287, Pollock-342 Low Date, PR63 Brown

1589 **1861 Ten Dollar, Judd-287, Pollock-342, High R.6, PR63 Brown NGC.**

**Design.** The obverse and reverse are the regular Liberty Head eagle dies of the year, with GOD OUR TRUST added in the reverse field, no scroll. Struck in copper with a reeded edge.

**Commentary.** Like the Judd-284 and 285 pattern eagles (with scroll), the no-scroll copper Judd-287 eagle patterns come in Low Date (Pollock-342) and High Date (Pollock-344) variants, this being the Low Date. (The gold Judd-286 is unconfirmed.)

**Physical Description.** Low Date. Pollock notes concerning this piece that it is a bronzed proof with a die rotation of 300 degrees. The blue-brown surfaces show considerable brightness over the high points of the design. A few tiny lint marks are scattered in the fields on each side. **NGC Census:** 2 in PR63 Brown, 2 finer. **PCGS Population:** 2 in PR63 Brown, 4 finer (12/08).

**Provenance.** *Ex: Stack's (10/1988), lot 628.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60433)

## Gem Proof 1862 GOD OUR TRUST Half Dollar, Judd-293

1590 **1862 Half Dollar, Judd-293, Pollock-351, R.5, PR65 NGC.**

**Design.** The regular Liberty Seated half dollar dies of the year 1862, except that the reverse contains GOD OUR TRUST on a scroll. Struck in silver with a reeded edge.

**Commentary.** A continuation into 1862 (and one that would last into 1863) of the experimentation with the motto on the larger coinage denominations: the eagle and double eagle, half dollar and silver dollar. The Judd-293 (with scroll) and Judd-295 (no scroll) silver patterns are among the more widely available of the era at R.5, while still quite rare in absolute terms.

**Physical Description.** The obverse fields were more completely finished in the Mint than those of the reverse. The reverse shows considerable evidence of die striations. Beautiful rose-colored centers are surrounded by lime-green patina at the margins. The only mentionable pedigree marker is a carbon spot just above Liberty's foot. **NGC Census:** 4 in PR65; 2 finer including one in PR65 Cameo. **PCGS Population:** 8 pieces have been graded as PR64 with none finer (12/08).

**Provenance.** *Ex: John Work Garrett; Garrett Collection, John Hopkins University (Stack's, 3/1976), lot 625.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60443)

## 1862 GOD OUR TRUST Half Judd-294, PR62 Brown

1591 **1862 Half Dollar, Judd-294, Pollock-352, Low R.7, PR62 Brown NGC.**

**Design.** The regular-issue Liberty Seated half dollar dies of the year, but with GOD OUR TRUST on a scroll on the reverse. Struck in copper with a reeded edge.

**Commentary.** The Judd reference notes that in comparison to the 1861 varieties with GOD OUR TRUST, the 1862-dated patterns are even more plentiful, as sales by Mint officials apparently reached new highs. These coins were revenue producers, and the Mint likely struck as many as could be sold. However, while perhaps two dozen of the silver Judd-293 were struck, at Low R.7 the present copper Judd-294 is far from a plentiful issue, with perhaps a dozen extant.

**Physical Description.** Striking details are complete on each side and the surfaces are somewhat irregular, with shallow granularity on the reverse. Deeply toned throughout, with even gray-charcoal and brown patina. The NGC slab states that this coin has been bronzed, and the coin shows up as such in that service's population report. However, we disagree with their assessment, as although this is a dark copper coin, considerable reflectivity shows in the fields, a feature that would not be seen on a piece that was bronzed.

**Provenance.** *Ex: Moreira (Superior, 1/1989), lot 4489.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60444)

## Silver GOD OUR TRUST 1862 Half Judd-295, PR63

1592 **1862 Half Dollar, Judd-295, Pollock-353, R.5, PR63 NGC.**

**Design.** The regular-issue Liberty Seated half dollar dies of the year, with GOD OUR TRUST on the reverse between the eagle's wings, no scroll. Struck in silver with a reeded edge.

**Commentary.** Perhaps two dozen are known in silver. While this makes a pattern to be considered "fairly available," one would do well to remember that if this were a regular-issue U.S. coin, it would be viewed as incredibly rare.

**Physical Description.** Slight hairlining explains the PR63 grade, but the obverse is nicely reflective in the fields, while the reverse has the expected die striations that remain from incomplete die polishing. Deep reddish-gray in the centers with sky-blue around the rims. A well-balanced and attractive coin for the grade. **NGC Census:** 4 in PR63, 7 finer. **PCGS Population:** 2 in PR63, 10 finer (12/08).

**Provenance.** *Ex: The River Oaks and C.W. Krugjohann, Part II Collections (Bowers and Ruddy, 11/1976), lot 971.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60445)

## High Date 1862 Eagle, Bronzed Copper Judd-297, Pollock-356, PR65 Brown

1593 **1862 Ten Dollar, Judd-297, Pollock-356, Low R.6, PR65 Brown NGC.**

**Design.** The regular 1862 eagle dies, with the added GOD OUR TRUST on a scroll on the reverse. Struck in copper with a reeded edge.

**Commentary.** The Judd ninth edition notes that this pattern is usually found with bronzed surfaces. Like the similar 1861 patterns, Low and High Date variants exist. USPatterns.com notes that the High Date, as here, with about a half-dozen examples known, is twice as rare as the Low Date, of which maybe a dozen survive. The Low R.6 rarity ranking is for Judd-297, both varieties combined.

**Physical Description.** High Date, Pollock-356. Designated "Bronzed $10" as well as PR65 Brown by NGC. The Brown designation may be somewhat misleading, as there is a significant amount of underlying red that still shows through the thin overlay of brown-blue patina. A high-end example of this popular pattern and one that has no mentionable contact marks or carbon spots. **NGC Census:** This is the finer of the two pieces graded by NGC as bronzed. **PCGS Population:** None as bronzed (12/08).

**Provenance.** *Ex: The T. Henry Allen Collection (Stack's, 2/1977), lot 1143.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60447)

## Low Date 1862 Eagle
## Judd-298, Pollock-358
## PR64 Brown

**1594 1862 Ten Dollar, Judd-298, Pollock-358, Low R.6, PR64 Brown PCGS.**

**Design.** The regular 1862 eagle dies, with the added GOD OUR TRUST on the reverse, no scroll. Struck in copper with a reeded edge.

**Commentary.** The horrors of the Civil War and the resultant upsurge in religious faith were responsible for the various forms of the motto, which fortunately persisted on many U.S. coins after the conflict had ended.
Like the Judd-297, examples of the Judd-298 are usually bronzed. The High Date variety is about twice as rare as the Low Date variety, according to USPatterns.com. The Low R.6 rarity ranking is for Judd-298, the Low and High Date varieties combined.

**Physical Description.** Low Date, Pollock-358. The design elements are intricately detailed and each side shows even brown patina, but when the coin is angled just so, much of the original red can still be seen beneath the brown. A few light field marks and lint marks account for the grade. **NGC Census:** 4 in PR64 Brown, 4 finer. **PCGS Population:** 4 in PR64 Brown, 6 finer (12/08).

**Provenance.** *Ex: The Robert W. Miller, Sr. Collection (Bowers and Merena, 11/1992), lot 1094.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60448)

## Popular 1863 Indian Cent Pattern
## Judd-299, PR66 Brown

**1595 1863 One Cent, Judd-299, Pollock-359, R.3, PR66 Brown NGC.**

**Design.** Both obverse and reverse dies were the designs used on regular-issue coinage in 1863. Struck in bronze, with a medal turn, and a plain edge.

**Commentary.** This issue was the Mint's first experiment with the bronze alloy used in cent coinage after 1864.

**Physical Description.** Sharply struck, with exceptional detail on all devices. Light brown patination with hints of rose and gold. **NGC Census:** 4 in PR66 Brown; 5 finer as PR66 with a color or cameo designation. **PCGS Population:** 6 in PR66 Brown, 2 finer as PR66 Red and Brown (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60454)

# Finest Certified 1863 Indian Cent With 'L' Pattern
# Judd-302 PR67 ★ Ultra Cameo

1596 **1863 One Cent, Judd-302, Pollock-365, High R.7, PR67 ★ Ultra Cameo NGC.**

**Design.** The obverse features the adopted design for 1864 (but dated 1863), with the pointed bust truncation and Longacre's "L" initial on the ribbon. The reverse displays the standard oak wreath and shield motif used for regular-issue coinage in 1863. Struck in copper-nickel with a plain edge.

**Commentary.** At first glance, Judd-302 seems to be a transitional pattern, a bridge between the old copper-nickel cent and the thinner Civil War-era bronze cent. A closer look at the reverse die reveals that it was first used on regular coinage in 1871 (per Richard Snow). This circumstance is convincing evidence that Judd-302 is a restrike issue, possibly made for sale to collectors during the 1870s.

A letter from William F. Hidden to the editor of *The Numismatist* in the December 1903 issue reports the discovery of Judd-302. Hidden writes, "This little L is extremely small, but is intentionally there to record Longacre's artistic design of workmanship. ... I cannot learn of any example but this one of mine and it is a Proof. It came from our old friend, Wm. P. Brown, among a lot of Proofs." The letter is dated November 8, 1903. The first auction appearance of Judd-303 (the same design, but in oroide) seems to predate this report by a few months. According to the ninth edition of the Judd pattern reference, an example was offered in the Comstock Collection (Lyman Low, 6/1903).

Whatever its origins, Judd-302 is an extremely rare issue. Experts estimate a surviving population of fewer than six pieces. The issue has always been sought after and prized by collectors. A recent auction appearance was in The Lexington Collection (Bowers and Merena, 1/1994), lot 1540. To quote the cataloger in that sale, "This is one of the most desired, most famous of all Indian cent patterns—a true numismatic classic. It has been many years since we have handled one." The present offering is an important opportunity to acquire this rare and extremely popular pattern.

**Physical Description.** A magnificently preserved specimen, worthy of the esteemed Star designation. Blazing, original red color highlights the pristine surfaces. The fields are extraordinarily deep in their reflectivity and set up a stark contrast against the heavily frosted devices. The strike is all one could ask, with crisp detail on all design elements. Extraordinary eye appeal and historical significance in one special package. **NGC Census:** The finest certified, the only PR67, and the only Judd-302 with a Star designation in any grade. **PCGS Population:** The finest certified is a lone PR66 Cameo example (12/08).

**Provenance.** *Ex: Public Auction Sale (Stack's, 6/1991), lot 627.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#60457)

## Washington Head 1863 Two Cent
## Judd-305, PR65 Brown

1597 **1863 Two Cents, Judd-305, Pollock-370, R.4, PR65 Brown NGC.**

**Design.** Obverse: Portrait of Washington facing right with GOD AND OUR COUNTRY around and the date and two stars below. Reverse: The denomination 2 CENTS centered in a wheat wreath with UNITED STATES OF AMERICA around. The word CENTS is curved dramatically. Struck in copper with a plain edge.

**Commentary.** According to an entry in George Eckfeldt's journal, Judd-305 was struck in late 1863 (Eckfeldt journal courtesy of Alan Meghrig and USPatterns.com). This circumstance establishes Judd-305 as the earliest appearance of Washington's image on a U.S. Mint pattern.

**Physical Description.** Strongly impressed devices complement the pristine surfaces. The reflective fields are beautifully toned in iridescent shades of lavender, blue, and gray. An attractive example of this popular pattern. **NGC Census:** 4 in PR65 Brown, 7 finer. **PCGS Population:** 4 in PR65 Brown, 7 finer (12/08).

**Provenance.** *Ex: The Nate Smith Collection (Stack's, 3/1973), lot 438.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60460)

## Very Rare 1863
## Two Cent Pattern
## Judd-310, PR64

1598 **1863 Two Cents, Judd-310, Pollock-375, Low R.7, PR64 NGC.**

**Design.** The obverse features a bust of Washington facing right with the motto GOD AND OUR COUNTRY around and 1863 below. The reverse is the design adopted for regular-issue two cent coinage in 1864. Struck in copper-nickel with a plain edge.

**Commentary.** USPatterns.com estimates fewer than six examples of Judd-310 are extant. This small number is further diminished by the impoundment of the specimen in the Smithsonian Institution. The present offering is a rare opportunity to secure this elusive pattern.

**Physical Description.** Bright red color and a splendid strike create outstanding eye appeal. A few flyspecks and handling marks define the grade. **NGC Census:** 3 in PR64, 2 finer. **PCGS Population:** 1 in PR64, 1 finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60465)

## Spectacular 1863 Bronze Two Cent, Judd-312 PR67 Red and Brown

1599 **1863 Two Cents, Judd-312, Pollock-377, R.4, PR67 Red and Brown NGC.**

**Design.** The obverse die showcases the heraldic shield, with arrows behind and a laurel wreath draped down both sides. A scroll with the motto GOD OUR TRUST is above, and the date below. The reverse die centers around the denomination 2 CENTS inside a wreath of wheat, with UNITED STATES OF AMERICA around. Struck in bronze with a plain edge.

**Commentary.** The Mint experimented with several designs for the two cent piece in 1863. Judd-312 was struck in at least three different weight standards, and the dies were used to strike Judd-313 (copper-nickel), and Judd-314 (aluminum). It was decided that GOD OUR TRUST was not quite the perfect phrasing for the motto and another design was adopted for coinage of the two cent piece in 1864.

**Physical Description.** Impressively struck, with design elements that seem nearly three dimensional. Blazing, original, mint-red color with tints of pale blue create fantastic eye appeal. A nearly unimprovable example of this popular pattern. **NGC Census:** One in 67 Red and Brown, 1 finer as a 67 Red. **PCGS Population:** Only two examples of Judd-312 have graded as high as PR66 Brown (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#70467)

# Extremely Rare 1863 Two Cent Pattern Judd-313, PR63

1600 **1863 Two Cents, Judd-313, Pollock-378, High R.7, PR63 NGC.**

**Design.** The obverse centers around a wide heraldic shield with arrows behind and a thick wreath draped down either side. A scroll with motto GOD OUR TRUST above and the date below. The reverse features the denomination 2 CENTS surrounded by a wreath of wheat, with UNITED STATES OF AMERICA around. Struck in copper-nickel with a plain edge.

**Commentary.** Judd-313 was struck in late 1863, as the Mint experimented with designs for the two cent piece that would begin production in 1864. An early auction appearance was in the Parmelee Collection (New York Coin and Stamp, 6/1890), lot 130, where the coin was paired with an example of Judd-312.
The extreme rarity of the issue has been underestimated in the past. Sometimes, when a coin is unavailable for a long period of time, the numismatic community loses touch with the issue. "Out of sight, out of mind" seems to apply in this case. A search of auction records has failed to uncover an appearance of Judd-313 in the last 15 years. One of the few surviving examples is impounded in the ANS Collection. NGC and PCGS have certified a total of four examples of Judd-313, assuming no resubmissions have occurred. The present example has been off the market for 17 years. Clearly, this offering is an important opportunity to acquire an underappreciated numismatic rarity.

**Physical Description.** Brilliant, reflective fields complement a remarkable strike. Chromium steel flash remains in the center of the shield, while the periphery is cloaked in attractive reddish-gold. A few flyspecks and a small obverse smudge account for the grade. **NGC Census:** This is the sole Judd-313 certified by NGC. **PCGS Population:** One each in PR63, PR64, and PR65 (12/08).

**Provenance.** *Ex: Public Auction Sale (Stack's, 5/1991), lot 496. From The Lemus Collection, Queller Family Collection Part Two.* (#60469)

## Fascinating 1863 Three Cent Pattern In Bronze Judd-319, PR64 Red and Brown

1601 **1863 Three Cents, Judd-319 Original, Pollock-384, R.5-6, PR64 Red and Brown NGC.**

**Design.** The obverse die is similar to the Braided Hair large cent design, with 13 stars around Liberty's bust and the date below. The reverse displays the denomination 3 CENTS in two lines, centered in a laurel wreath, with UNITED STATES OF AMERICA around. Struck in bronze or copper with a plain edge.

**Commentary.** Hoarding of regular coinage during the uneasy days of the Civil War led to a desperate shortage of small change in the national economy. One measure considered to alleviate the problem was to replace the precious-metal trime with a bronze three cent piece. The pieces were struck at different times and on various planchets with different weights, in order to evaluate the feasibility of such a coin. The project was abandoned when it was discovered that the public hoarded copper coins, too. The present coin weighs approximately 144 grains, indicating that it is an original issue, not a restrike.

**Physical Description.** An exceptional strike, with fine detail on all design elements. Original mint-red color remains in areas around the devices, with attractive deep blue toning on the fields. Deeper toning on the reverse, with a dark spot at 6 o'clock. **NGC Census:** 1 in PR64 Red and Brown, 7 finer in either Brown or Red and Brown. **PCGS Population:** None in PR64 Red and Brown, 3 finer (12/08).

**Provenance.** *Ex: Corrado Romano Collection (Stack's, 6/1987), lot 836.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70477)

## Very Rare 1863 Half Dime Pattern Judd-323, PR65 Red and Brown

1602 **1863 Half Dime, Judd-323, Pollock-388, R.7, PR65 Red and Brown NGC.**

**Design.** Both obverse and reverse dies are the designs used on regular-issue coinage for the year. Struck in copper with a reeded edge.

**Commentary.** Traditionally listed as a die-trial mintage, Judd-323 is now believed to be a restrike issue. The USPatterns.com website elaborates: "... these are actually restrikes deliberately made in the early 1870s and sold as part of complete off-metal sets with the silver coinage of this year containing quarter, half dollar, and dollar [pieces] which had the reverses of 1866 with the motto 'IN GOD WE TRUST' above the eagle." The hub used to produce the dies had a broken D in UNITED, as observed on the current offering. To a lesser degree, aluminum pieces—Judd-324—were produced from the same die marriage. Perhaps a dozen examples of Judd-323 are believed extant in all grades.

**Physical Description.** The bright surfaces retain much original red color, highlighted by shades of crimson and gold. A bold strike adds to the overall eye appeal of this Gem. The PR65 Red and Brown grade is the highest currently awarded at either of the leading grading services (11/08).

**Provenance.** *Ex: Public Auction Sale (Hollinbeck, 7/1953), lot 1985; Thomas Bergin; June Sale (Stack's, 6/1984), lot 1174; Stuart C. Levine Collection (Bowers and Merena, 4/1986), lot 2272.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70480)

# Interesting 1863 Ten Cent Postage Currency Pattern
# Judd-325, PR64

1603 **1863 Ten Cents, Judd-325, Pollock-390, Low R.6, PR64 NGC.**

**Design.** The obverse design features the heraldic shield with arrows, inside an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY above, and ACT JULY 1862 below. Struck in standard silver alloy, with a plain edge. However, in his groundbreaking study *United States Pattern Postage Currency Coins*, David Cassel tested examples of this issue and consistently found that the coins tested failed to match the standard 90% silver, 10% copper composition. The composition varied from 88% silver, 12% copper to 96.1% silver, 3.9% copper.

**Commentary.** The POSTAGE CURRENCY issues were intended to redeem small denomination postal currency notes during the Civil War. Hoarding of regular coinage created a catastrophic shortage of small change in the national economy. Judd-325 was coined using several weight standards (three different standards according to Cassel, four according to Pollock), all lighter than the standard dime. It was hoped that the lighter-weight coins would circulate more readily than their standard counterparts. Fractional currency proved to be a more practical solution.

Interestingly, the obverse die used on Judd-325 was also used to strike another issue, Judd-646, dated 1868. A number of prominent die cracks are visible on the present specimen. David Cassel has determined that examples of Judd-646 are from an earlier state of the die than Judd-325. In light of this evidence, some researchers have concluded that Judd-325 is a restrike issue, created in the time period after 1868. Alternatively, Cassel believes Judd-646 was actually minted in 1863, the result of a Mint error when a small 8 punch was inadvertently substituted for the 3 in the date. Cassel cites the set of coins presented to Salmon P. Chase in May 1863, which included examples of Judd-325. While there is much confusion surrounding this issue, the presentation set does establish that at least some examples of Judd-325 and Judd-646 were coined during May 1863.

**Physical Description.** The reflective surfaces are suffused with iridescent gold and lavender toning. A few scattered handling marks are consistent with the grade. **NGC Census:** 6 in PR64, 4 finer. **PCGS Population:** 8 in PR64, 2 finer (12/08).

**Provenance.** *Ex: Stack's (2/1967); David B. Silberman Collection (Bowers and Merena, 11/1988), lot 5385.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60482)

# Historic 1863 Ten Cent Postage Currency Pattern
# Judd-326A, PR64

1604 **1863 Ten Cents, Judd-326A, Pollock-394, High R.6, PR64 NGC.**

**Design.** The obverse features the heraldic shield with arrows, surrounded by an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY and ACT JULY 1862 around. Struck in billon with a plain edge. In 12 coins tested by SEM-EDX analysis, David Cassel found the composition varied from a low of 9.4% silver, 90.6% copper to a high of 39.2% silver, 60.8% copper.

**Commentary.** The Civil War hoarding of metal coins began in December 1861 with the gold issues, and in that same month banks suspended specie payments. Silver coins soon followed, and by July 1862 even copper-nickel cents had disappeared from commerce. The Postage Currency pieces were designed to redeem small denomination postal currency notes. In the end, fractional currency was found to be a more practical solution. Those low-denomination "shinplasters" were supplemented, unsatisfyingly so, by an emergency private coinage of (mostly) bronze and copper Civil War tokens and store cards, as merchants desperately tried to keep sufficient currency in circulation.

**Physical Description.** The surfaces are attractively toned in shades of charcoal and lavender. Sharply struck, with fewer than average handling marks for the grade. The obverse exhibits several prominent die cracks. **NGC Census:** NGC has certified only two examples of Judd-326A in PR64, with two finer, both PR65 examples. **PCGS Population:** 7 in PR64, 2 finer (12/08).

**Provenance.** *Ex: ANA Midwinter Auction (Heritage, 2/1987), lot 1304; Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60485)

# Fascinating 1863 Ten Cent Postage Currency Pattern
# Judd-330A, PR64

1605 **1863 Ten Cents, Judd-330A, Pollock-401, High R.7, PR64 NGC.**

**Design.** The obverse features a heraldic shield with arrows, framed by an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the peripheral inscriptions POSTAGE CURRENCY and ACT JULY 1862. Struck with a medal turn, in cupro-nickel with a reeded edge.

**Commentary.** Various weight and metal combinations on the Postage Currency pieces were experimented with in the hope that the coins would circulate because of their lower intrinsic value. David Cassel examined the present coin in his study *United States Pattern Postage Currency Coins*. Its weight is 33.29 grains; SEM-EDX analysis determined its composition to be 76.15% copper, 23.26% nickel, and 0.59% iron. The purpose of the iron is a mystery, as its usual function is to strengthen a weaker metal. A cupronickel coin, such as the present example, should not need strengthening.

**Physical Description.** The strike is better than average for this early nickel issue. There are only a few, scattered handling marks and the surfaces are enhanced by pale, hazy, gray-lilac toning. A few flyspecks on both sides are consistent with the grade. **NGC Census:** One in PR64 and one in PR65. **PCGS Population:** None (12/08).

**Provenance.** *Ex: Public Auction Sale (Stack's, 10/1988), lot 610. From The Lemus Collection, Queller Family Collection Part Two.* (#60490)

# Finest Certified, Extremely Rare 1863 Quarter Pattern
# Judd-335, PR66

1606 **1863 Quarter Dollar, Judd-335, Pollock-407, High R.7, PR66 NGC.**

**Design.** The obverse die is from the Seated Liberty design used for regular-issue coinage in 1863. The reverse features the standard perched eagle motif with the addition of a scroll with the motto IN GOD WE TRUST inscribed. Struck in silver with a reeded edge.

**Commentary.** This extremely rare issue was probably struck in the late 1860s or early 1870s to fill up complete sets of transitional patterns. According to USPatterns.com, such sets were offered to select dealers and collectors circa 1869. An early auction appearance of such a set was in the Woodside Collection (New York Coin and Stamp, 4/1892), lot 129. That lot description was: "1863 Proof set: Dollar, Half and Quarter: same as regular issue with additions of "IN GOD WE TRUST," over eagle: this set is *unique* and has never before been offered, even the existence of such a set being known to but few numismatists: brilliant silver proofs: 3 pcs." Judd-335 was missing in Idler, Fewsmith, Linderman, Davis, Parmelee and many other great 19th century pattern collections, lending credence to the cataloger's claims about the issue's rarity.

In recent times the issue remains very elusive. The present coin has been off the market for more than 20 years. A search of auction records uncovered only three auction appearances of Judd-335 since 1990, and two of those appearances were of the same coin. The present offering represents an important opportunity to acquire this extremely rare pattern in Premium Gem condition. Such an opportunity may not repeat for many years.

**Physical Description.** The exceptional strike reveals every detail in Liberty's hair, the star radials, and the eagle's feathers. The flawless surfaces are enhanced by even golden-brown toning, with touches of brilliance on the reverse. The coin possesses outstanding eye appeal to complement the highest numeric grade currently awarded by NGC or PCGS (11/08).

**Provenance.** *Ex: Stack's private treaty transaction (12/1987). From The Lemus Collection, Queller Family Collection Part Two.* (#60497)

## Exceptional 1863 GOD OUR TRUST Half Dollar Pattern Judd-338, PR65

1607 **1863 Half Dollar, Judd-338, Pollock-410, R.5, PR65 NGC.**

**Design.** The obverse die is from the Seated Liberty used for regular-issue coinage in 1863. The reverse die features the standard perched eagle design with the addition of a scroll with the motto GOD OUR TRUST inscribed. Struck in silver with a reeded edge.

**Commentary.** Seven sets of original GOD OUR TRUST patterns are reported, with the other examples being restrikes (see commentary under Judd-340). The motto tested on this and other, related patterns was directly influenced by Secretary of the Treasury Salmon Chase, who wrote to Mint Director Pollock in November 1861: "The trust of our people in God should be declared on our national coins. You will cause a device to be prepared without unnecessary delay with a motto expressing in the fewest and tersest terms possible this national recognition." The GOD OUR TRUST motto was devised by either Longacre or Pollock shortly thereafter. Approximately two dozen examples of Judd-338 are extant and the present specimen is the finest certified.

**Physical Description.** Vibrant, variegated shades of golden-rose toning cover virtually flawless surfaces. The strike is bold, with markedly pronounced definition of the Miss Liberty's features, the central shield, and all 13 stars. Definition of the reverse devices is consistently strong. **NGC Census:** 1 in PR65, none finer. **PCGS Population:** 8 pieces have been graded PR64, with none finer (12/08).

**Provenance.** *Ex: Lester Merkin private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60500)

## High-End 1863 Half Dollar Pattern Judd-339, PR65 Brown

1608 **1863 Half Dollar, Judd-339, Pollock-411, Low R.6, PR65 Brown NGC.**

**Design.** The obverse die is from the Seated Liberty design used for regular-issue coinage in 1863. The reverse die features the standard perched eagle motif with the addition of a scroll with the motto GOD OUR TRUST inscribed. Struck in copper with a reeded edge.

**Commentary.** Judd-339 was part of an ongoing series of experimental patterns started in 1861. The reverse die was first used to strike Judd-277 in 1861. Conventional wisdom says that seven sets of GOD OUR TRUST patterns in silver were struck as originals, and others are restrikes (see commentary under Judd-340). Approximately two dozen examples of Judd-339 are extant today.

**Physical Description.** An extraordinary strike, with all details fully brought up. The surfaces are olive-brown, with subtle red and lilac overtones. **NGC Census:** 3 in PR65 Brown; 2 finer including one PR65 Red and Brown. **PCGS Population:** No examples of Judd-339 have been graded PR65, with a single PR66 Brown piece graded finer (12/08).

**Provenance.** *Ex: French (9/1939); William Reece Smith Collection (Stack's, 12/1987), lot 1020.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60501)

# 1863 Half Dollar Pattern Judd-340, PR65
## Tied for Finest Certified

1609 **1863 Half Dollar, Judd-340, Pollock-412, Low R.6, PR65 NGC.**

**Design.** The obverse die is the same design used on regular-issue coinage in 1863. The reverse die features the standard perched eagle design with the addition of the motto GOD OUR TRUST in the field above the eagle's head. Struck in silver with a reeded edge.

**Commentary.** An entry in George Eckfeldt's journal reads, "Nov. 16th. Struck 30 sets of silver 'GOD IS OUR TRUST' half dollars and 20 sets of copper for Gov. Pollock. Date 1863." Combine this entry with W. Elliot Woodward's comments in the catalog for The Haines Collection (Woodward, 10/1880), to understand the real purpose of this pattern issue. Under lot 921, Woodward writes, "... a son of a late official of the Mint, as he appeared at the store of the writer, when on a peddling expedition from Philadelphia to Boston, he drew from his pocket rolls of 'GOD OUR TRUST' patterns, and urged their purchase at wholesale...". The issue is one of the more available patterns today, although it is considered very rare by regular coinage standards. Eckfeldt's journal entry courtesy of Alan Meghrig and USPatterns.com.

Four members of the Eckfeldt family worked at the Mint in a nearly unbroken string from 1792 until 1930. Theodore Eckfeldt, son of engraving room foreman George Eckfeldt, was a Mint night watchman and leader of the "Midnight Minters" and was probably the peddler of illicit goods that Woodward refers to.

**Physical Description.** Strongly impressed devices, with exquisite detail in the hair and star centers. Silver centers with beautiful cerulean-blue toning on the periphery. An extremely desirable example of this very rare pattern. **NGC Census:** 3 in PR65, 1 finer as a PR65 Cameo. **PCGS Population:** 2 in PR65, none finer (12/08).

**Provenance.** *Ex: Anderson Dupont Part II (Stack's, 11/1954), lot 2423.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#60502)

## 1863 GOD OUR TRUST
## Half Dollar Pattern
## Judd-341, PR63 Brown

1610 **1863 Half Dollar, Judd-341, Pollock-413, R.5, PR63 Brown NGC.**

**Design.** The obverse die is from the standard Seated Liberty design used for regular-issue coinage in 1863. The reverse die is similar to the regular-issue design, with the addition of the motto GOD OUR TRUST in the field above the eagle's head. Struck in copper with a reeded edge.

**Commentary.** The experimentation at the Mint with the GOD OUR TRUST motto provided many dies for new marriages, and the lax Mint discipline under free-wheeling Director Henry R. Linderman produced a flood of new pattern issues, many of them strictly numismatic delicacies with no true pattern intent. This is one such, a restrike issue created for sale to collectors in the 1870s.

**Physical Description.** Attractive brown, green, and gold patination covers strongly impressed devices. A few scattered handling marks account for the grade. **NGC Census:** 1 in PR63 Brown, 8 finer. **PCGS Population:** 1 in PR63 Brown, 10 finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60503)

## Extremely Rare 1863
## IN GOD WE TRUST
## Half Dollar Pattern, Judd-343
## PR63 Red and Brown Cameo

1611 **1863 Half Dollar, Judd-343, Pollock-415, R.7, PR63 Red and Brown Cameo NGC.**

**Design.** The obverse die is the design used on regular-issue half dollars in 1863. The reverse features the normal perched eagle design, with the addition of the scroll and motto IN GOD WE TRUST above the eagle's head. Struck in copper, with a reeded edge.

**Commentary.** According to USPatterns.com, Judd-343 was a restrike issue, created for sale to collectors in the 1870s. The coins were typically offered with other denominations as year sets. An early auction appearance of such a set was in the Woodside Collection (New York Coin & Stamp, 4/1892), lot 131. The Woodside sale also included complete sets in silver and aluminum. The issue is rare, with an estimated population of about one dozen survivors. A search of auction records indicate only two appearances at Heritage in the last 15 years.

**Physical Description.** Sharply struck, with all features intricately detailed. Lovely, bright orange-red luster shows just a bit of spotty darkening on the reverse. Deeply reflective fields and thickly frosted devices. The only factors limiting the grade are some carbon spots and handling marks (possibly fingerprints) in the obverse fields. An attractive example of a rare and popular pattern. **NGC Census:** 1 in PR63 Red and Brown Cameo, 1 finer. **PCGS Population:** None in PR63, regardless of designation; 4 finer, none of which are Cameos (12/08).

**Provenance.** *Ex: DEA and Marshal's Services Sale (Heritage, 12/1988), lot 1881.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70505)

# 1863 IN GOD WE TRUST Silver Dollar
# Judd-345, PR66 ★ Cameo

1612 **1863 Dollar, Judd-345, Pollock-417, Low R.7, PR66 ★ Cameo NGC.**

**Design.** A so-called transitional issue, this pattern uses the dies of the regular Seated Liberty dollar of the year, but it bears the addition of the motto IN GOD WE TRUST on a swirling scroll on the reverse, of the type introduced on circulating (intended to circulate, at least) coinage in 1866. Struck in silver with a reeded edge.

**Commentary.** The Judd ninth edition comes down firmly on one point—that no two cent pieces made in 1863 also display either the mottos IN GOD WE TRUST or GOD OUR TRUST: "These transitional patterns were not made in 1863 or any time close. None were known to exist until the 1870s and, further, they employ a reverse die thought to have been first used on a regular basis a few years after the date on the coins."

The explication concerning the silver IN GOD WE TRUST coinage is much less clear—purposely fuzzy? One hopes not. "A series of pattern quarter dollars, half dollars, and silver dollars with motto IN GOD WE TRUST above the eagle on the reverse began this year and continued through 1865. At a later date, possibly 1865, patterns for the silver coins were made with IN GOD WE TRUST. It was a natural marketing idea to resurrect some older Proof dies dated 1863 and 1864 and thus produce patterns for these dates."

The relevant text in the Bowers *Bass Museum Sylloge* is more direct, although still full of questions: "Certain quarter dollars, half dollars, and silver dollars were struck with the motto IN GOD WE TRUST, ... . Whether these pieces were backdated 1863 and made at a later date is not known. The entire era of the 1860s was one of many private productions for the numismatic trade." USPatterns.com estimates that about a dozen are known, commenting that "these were made after 1866, possibly into the 1870s."

**Physical Description.** Gorgeous iridescent patina in shades of rose, steel-blue, and lilac lavishly covers the rims on each sides, with lighter centers and wonderful eye appeal that is well-deserving of the NGC Star Cameo appellation. **NGC Census:** 2 in PR66 Cameo with only the current piece also bearing the ★ designation. None are finer. **PCGS Population:** 1 in PR66, none finer, and none with a Cameo designation regardless of numerical grade (12/08).

**Provenance.** *Ex: Stack's private treaty (circa 1982). From The Lemus Collection, Queller Family Collection Part Two.*(#60507)

# 1863 IN GOD WE TRUST Dollar in Copper, Judd-346
# PR66 ★ Cameo Red and Brown, Tied for Finest Certified

1613 **1863 Dollar, Judd-346, Pollock-418, R.7, PR66 ★ Red and Brown Cameo NGC.**

**Design.** A so-called transitional issue, this pattern uses the dies of the regular Seated Liberty dollar of the year, but it bears the addition of the motto IN GOD WE TRUST on a swirling scroll on the reverse, of the type introduced on regular-issue coinage in 1866. Struck in copper with a reeded edge.
**Commentary.** Like the silver issues, there is no clear evidence but it appears that these copper pieces were actually later restrikes after the motto IN GOD WE TRUST had been officially adopted. The motto first appeared on the two cent coin that debuted in 1864, before being disseminated to the nation's larger regular-issue coins in 1866.

The copper examples of this pattern appear about equally as rare as the already-rare silver examples, judging by most measures (and those are precious few, in the world of pattern research). There are equal numbers of the Judd-345 (silver) and Judd-346 (copper) certified at NGC—four of each—while PCGS has graded three of the Judd-345 and four of the Judd-346. The always-useful USPatterns.com rates both types R.7 (the site does not as a rule distinguish between Low R.7, R.7, and High R.7), or "about a dozen known."

**Physical Description.** The needle-sharp strike on both sides further accentuates the eye appeal of the even copper-rose mint luster that covers each side. We see very little to indicate a Red and Brown designation. Neither side reveals even the most remote distraction, and the Premium Gem ★ Cameo grade seems justified, if—believe it or not—understated. **NGC Census:** 2 in PR66 Red and Brown Cameo, both with the ★ designation; none finer. **PCGS Population:** 2 in PR65, none finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70508)

# 'Once in a Lifetime' Opportunity 1863 Aluminum Dollar
# Judd-347, PR67 Cameo; Finest Certified
# Only Three or Four in Private Hands

1614 **1863 Dollar, Judd-347, Pollock-419, High R.7, PR67 Cameo NGC.**

**Design.** A so-called transitional issue, this pattern uses the dies of the regular Seated Liberty dollar of the year, but it bears the addition of the motto IN GOD WE TRUST on a swirling scroll on the reverse, of the type introduced on regular-issue coinage in 1866. Struck in copper with a reeded edge.

**Commentary.** Another product of the U.S. Mint that was likely produced some time later than the date it bears, perhaps well into the 1870s. Aluminum was an extreme rarity in 1863 and for a couple of decades after, although its rarity decreased as better ways were found to isolate the highly reactive metal from its many different naturally occurring chemical compounds. The examples in aluminum, rated High R.7 (four to six known) are notably rarer than those in copper and silver, however, with USPatterns.com providing a meager estimate of "at least four known including an example in the American Numismatic Society."

It is certainly worth noting here that, in a largely fruitless search through the several landmark pattern auctions of the last several decades—Bass, Garrett, Rogers Fred, Sieck, Rarities Sale—each one of those remarkable sales has *lacked an example of this variety*. Even in this remarkable collection of patterns, we believe the present lot poses a remarkable "chance of a lifetime" opportunity.

**Physical Description.** Aluminum patterns from the early days of the Mint—regardless of the particular year in which they were struck—frequently show trapped air bubbles or other surface roughness on the struck coins, indicative of Mint personnel's inexperience in handling the new and experimental metal. This piece, however, as expected for the Superb Gem Cameo grade, is remarkably free of such distractions—or any others, for that matter. Much delightful field-device contrast is evident, with powder-gray surfaces overall and an exceptional strike. **NGC Census:** one each in PR65, PR66 Cameo, PR67 Cameo (this piece). **PCGS Population:** one PR64, one PR65. There could easily be two or three duplications among these five pieces (10/08).

**Census and Provenance.** We believe that only four pieces exist, although a fifth is not out of the question.

1. New Millennium Collection; Heritage (11/2003), lot 11046, which realized $19,550; Pittsburgh ANA (Heritage, 7/2004), lot 7903; FUN Platinum Night (Heritage, 1/2006), lot 3703. PR64 PCGS.
2. ANS specimen.
3. Stack's private treaty. **The present specimen, almost certainly the finest known.**
4. Possibly one or at most two other pieces (see Pollock)—although auction appearances are so infrequent and fragmentary as to make verification impossible.

*From The Lemus Collection, Queller Family Collection Part Two.* (#60509)

# Beautiful Bronzed Copper 1863 Eagle Pattern GOD OUR TRUST Judd-352, PR66 Brown; Tied for Finest Certified

1615 **1863 Ten Dollar, Judd-352, Pollock-424, High R.6, PR66 Brown NGC.**

**Design.** Similar to the adopted design for the ten dollar Liberty, with the addition of the motto GOD OUR TRUST directly onto the field above the eagle's head. The obverse is the identical die used to coin 1863 proof gold eagles. Struck in bronzed copper with a reeded edge.

**Commentary.** Today the Judd-352 eagle pattern is considered High R.6, with only about 13 to 16 pieces known. The rarity rating for the variety has been quoted at several different levels over the years. In Adams-Woodin, the R.3 level suggested that 101 to 300 pieces existed. In Judd, the R.3 level meant that 201 to 500 still existed. Pollock rated this variety R.6, or 13 to 30 pieces. Today the rarity has been adjusted to a higher level, partly on a contemporary note that George Eckfeldt wrote in his diary: "Nov. 17th, 1863. Struck 20 sets of copper 10 dollar pieces 'God is our Trust.'"

**Physical Description.** Incredible mahogany surfaces with matte or satiny luster. Considered a proof, although the bronzed copper finish prevents a mirrored appearance. The reverse is rotated about 20 degrees clockwise, netting a die alignment of about 200 degrees. The devices are exceptionally full and the surfaces are essentially free of blemishes, other than a few minuscule spots. Although NGC has certified an even half-dozen examples of the bronzed and unbronzed variants of the issue, the present specimen is the numerically finest graded among them. The finest at PCGS are two PR66 Brown examples, although it does not single out the bronzed pieces (11/08).

**Provenance.** *Ex: Major Lenox R. Lohr; Empire Coin Company (1961); Connecticut Collection; Bowers and Merena (6/1991), lot 1142. From The Lemus Collection, Queller Family Collection Part Two.* (#60514)

## Intriguing 1864 Pattern Cent
## Struck in Aluminum-Copper
## Judd-353, MS62

**1616 1864 One Cent, Judd-353, Pollock-425, Low R.6, MS62 PCGS.**

**Design.** The regular obverse and reverse designs used to coin 1864 Indian cents, without L on the ribbon. Struck in an experimental aluminum-copper alloy with a plain edge.

**Commentary.** Several different experimental alloys were tested in early 1864, including pieces in business strike and proof format. The Judd-353 attribution is tentative in the absence of specific elemental analysis. Various compositions were all based in copper, with 5% aluminum (Judd-354), 7.1% aluminum (Judd-353), or 10% aluminum (Judd-355), according to official records. Others were made with 10% tin (Judd-356) or 10% nickel (Pollock-426a), or with an alloy of 90% copper, 5% tin, and 5% silver (Judd-356a). It is obvious that none of the experimental alloys were suitable.

**Physical Description.** PCGS has certified this piece, and it remains in a green-label holder. Both sides have satiny luster with a distinctive yellow-tan color. The strike is sharp, and both sides have prominent clash marks. **PCGS Population:** 2 in MS62, 4 finer. **NGC Census:** None in MS62, 4 finer (12/08).

**Provenance.** *Ex: Stack's (5/1998), lot 509.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#70520)

# 1864/1858 Indian/Flying Eagle 'Two-Headed Cent,' Judd-362, PR65 Cameo Finest Certified, One of Three Known

1617 **1864/1858 Indian/Flying Eagle Cent, Judd-362, Pollock-428, R.8, PR65 Cameo NGC.**

**Design.** A two-headed cent. The obverse is struck from the Indian Head cent die of 1864, with no L on ribbon, while the "other obverse" is made from the regular-issue 1858 Small Letters Flying Eagle cent die. Struck in copper-nickel with a plain edge.

**Commentary.** This marvelous Gem Cameo is the finest certified of this R.8 pattern, and it is almost certainly the finest known. As a reminder, the Small Letters die is easily distinguishable by the separated AM in AMERICA—on the Flying Eagle cent side. This dual-dated coin is strictly a flight of fancy, bearing as it does two heads but no tails. It accordingly also lacks a denomination of any kind.

The presence of a piece such as this speaks volumes about both the breadth and depth of the coins in the Lemus Collection, a simply unparalleled assemblage and one of the finest pattern offerings in decades. Notably, this pattern is so rare that not only was it lacking in many other pattern offerings of the last several decades—Rogers Fred, Sieck, Bass, Garrett—but the present piece appears certainly to be the *finest available at any price*. This piece has no doubt been viewed as "something special" ever since the first recorded example came to numismatic light, in an October 1868 Mason and Company sale, according to USPatterns.com.

**Physical Description.** Close examination confirms the No L Indian cent die of 1864 and the Small Letters Flying Eagle cent obverse die of 1858. Under magnification a few trivial flecks appear on each side, but there is no mentionable evidence of contact, and a perusal confirms the Gem grade of this coin and provides confirmation that it is much nicer than the other certified example in the census below, a still-nice PR62 that we handled in 2007. This piece possesses much more original color, in shades of rose-tan and pinkish-red, than the PR62 that was an even brown shade. The frosted devices show considerable contrast against the depth of reflectivity in the fields. The strike is decent although short of bold, with the normal design weakness showing on the feather tips of the Indian Head side and the center breast of the Flying Eagle side.

**Census and Provenance.** USPatterns.com notes that "three or four examples are known," but we can trace only three:

1. Gaston DiBello Collection (Stack's, 5/1970), lot 263, where it realized $775, an extremely high price for a cent of that period; Stack's (12/1980), lot 437; Auction '86 (Paramount, 7/1986), lot 1798. **The present piece, finest certified and likely finest known.**
2. Lahrman (Abe Kosoff, 2/1963), lot 918-16. Proof.
3. Grand Central (Paramount, 11/1974), lot 345; ANA (Heritage, 3/2007), lot 1575, which realized $63,250; Stack's (7/2008), lot 4179, which fetched $115,000. PR62 PCGS.

*From The Lemus Collection, Queller Family Collection Part Two.* (#60532)

## Splendid 1864 Copper Ten Cent Pattern, Regular Dies Judd-381, PR63 Brown

1618 **1864 Ten Cents, Judd-381, Pollock-449, Low R.7, PR63 Brown NGC.**

**Design.** Regular dies of the 1864 Seated Liberty dime. The dies are different from those that Breen described for the 1864 proof dimes. Struck in copper with a reeded edge.

**Commentary.** Most of the current numismatic generation are of the opinion that these pieces are restrikes that were made in the early 1870s, from backdated dies. They were sold as part of sets that included the 1864 "With Motto" quarter (Judd-387), half dollar (Judd-392), and dollar (Judd-397). About a dozen examples are believed to exist.

**Physical Description.** Rich violet and blue surfaces with traces of pinkish-orange mint color. The fields are deeply mirrored, and the devices are boldly defined. Both sides have a few insignificant hairlines reflected in the proof surfaces. **NGC Census:** 1 in PR63 Brown, 5 finer. **PCGS Population:** 1 in PR63 Brown, 9 finer (12/08).

**Provenance.** *Ex: Numisma '95 (RARCOA and David Akers, 11/1995), lot 2586.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60552)

## Dazzling 1864 Paquet Quarter Pattern in Silver Judd-384, PR64

1619 **1864 Quarter Dollar, Judd-384, Pollock-452, Low R.7, PR64 NGC.**

**Design.** The obverse is the regular-issue Seated Liberty design of 1864. Paquet's reverse features an eagle and shield, olive, and arrows in the claws. Around, the legend UNITED STATES OF AMERICA with the denomination QUARTER DOLLAR below. Struck in silver with a reeded edge.

**Commentary.** Paquet's distinctive reverse die made its earliest appearance in 1858 on Judd-221. The same reverse design was also used in 1859 (Judd-234), 1864 (this Judd-384), and 1865 (Judd-423). The two latter varieties are both considered restrikes, made circa 1870.

The obverse die is different from any die listed in Larry Briggs' reference, with the date farther to the left than on any regular-issue business strike or proof. However, we have also handled several 1864 proof quarters from the regular issue that have the same date position found on the patterns. It also appears to be a different die from that of Judd-386 in the present sale, although the date position on both pieces is nearly identical.

**Physical Description.** Both sides are fully brilliant, with faint cameo contrast. The fields are nicely mirrored, though not deeply so. Slight evidence of die rust in the obverse field is most evident near star 3. **NGC Census:** 2 in PR64, 3 finer. **PCGS Population:** 2 in PR64, none finer (12/08).

**Provenance.** *Ex: Stack's (10/1998), lot 501.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60555)

## Captivating 1864 With Motto Quarter, Judd-386, PR64

1620 **1864 Quarter Dollar, Judd-386, Pollock-454, Low R.7, PR64 NGC.**

**Design.** The obverse is a regular die trial striking, while the reverse has the motto IN GOD WE TRUST above the eagle as adopted in 1866. Struck in silver with a reeded edge.

**Commentary.** Judd-386, along with the similar half dollar (Judd-391) and silver dollar (Judd-396), is a so-called "transitional pattern" that, in terms of its nominal date, at least, bridges the gap between the No Motto and With Motto pieces—except it is actually a restrike that was produced several years later. About a dozen of these pieces are known in silver, along with others in copper and aluminum, and even a single piece in nickel.

**Physical Description.** A gorgeous Choice proof with light golden toning on both sides that masks the deeply mirrored fields. The devices are lustrous and boldly defined. Minor friction on the high points of the obverse is evident, from improper use of a standard coin album. **NGC Census:** 2 in PR64, 3 finer. **PCGS Population:** 3 in PR64, 3 finer (12/08).

**Provenance.** *Ex: Stack's private treaty (12/1987).*
*From The Lemus Collection, Queller Family Collection Part Two.*(#60557)

# Marvelous 1864 Transitional Seated Dollar
# Struck in Copper, Judd-397, PR66 Brown
# The Second Finest Certified

1621 **1864 Dollar, Judd-397, Pollock-465, Low R.7, PR66 Brown NGC.**

**Design.** The obverse is the regular Seated Liberty design for 1864. The obverse die is apparently different from that used for the regular-issue 1864 proof silver dollars, which have the shield point entirely left of the serif of the 1. This pattern obverse has the shield point about over the left upright of the 1. The reverse is the With Motto Seated Liberty design introduced in 1866. Close examination reveals a raised die line from the N of IN to the G of GOD. Struck in copper with a reeded edge.

**Commentary.** This is the first example of Judd-397 that has appeared in any of our auctions since 1993. Just under a dozen examples of this so-called "Transitional" pattern are known. Today, it is certain that Judd-397, along with others from this die pairing in silver (Judd-396), aluminum (Judd-398), and nickel (Judd-399), are restrikes produced in the late 1860s or early 1870s.

If the reverse die of this pattern can be matched to a regular-issue reverse die, a clue will be available that may help determine when these pieces were actually produced. The die line from N to G mentioned above may be a clue. There is also a stray letter beneath the G in GOD that looks like an E, but that feature appears to be common to all proof With Motto dollars. A review of proof Seated dollars in our Permanent Auction Archives shows the same die line only appearing on proof Seated dollars dated 1871.

**Physical Description.** This lovely Premium Gem proof has exceptional field-device contrast beneath the deep olive, steel blue, and tan patina. The fields are fully mirrored around frosty and sharply detailed devices. This piece is the second finest graded at NGC, surpassed numerically only by a single PR66 ★ Red Cameo example (11/08). The finest at PCGS are a handful of PR64s.

**Provenance.** *Ex: Superior (2/1987), lot 1371.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#60568)

## Attractive 1865 Copper-Nickel Indian Cent, Judd-404, PR64

**1622 1865 One Cent, Judd-404, Pollock-473, Low R.7, PR64 NGC.**

**Design.** The obverse is the regular-issue design for the 1865 Indian cent, with a Plain 5 in the date. There is minute repunching on the top of the 1, and a diamond-shaped die chip extends from the ribbon into the neck. The reverse has light die polish lines from the second arrow to the border, both dies as described for Snow PR-2. Struck in copper-nickel on a thick planchet with a plain edge.

**Commentary.** Andrew Pollock records the weight of this piece as 71.1. grains, one of the thick planchet examples. Others are known on a thin planchet, with a weight of about 48 grains. This is apparently a different die pair from other known examples of Judd-404, which Richard Snow identifies as his PR-1. There are also other examples known from at least two different Fancy 5 obverse dies.

The June 1977 Stack's sale that was the source for this piece offered an extensive collection of 42 different pattern Flying Eagle and Indian cents, a remarkable offering.

**Physical Description.** A gorgeous, boldly detailed proof with only a few tiny contact marks and lines on each side. The reverse has a minuscule planchet defect on the rim at 3 o'clock. Lovely pale pink toning graces the light tan surfaces. **NGC Census:** 3 in PR64, 1 finer. **PCGS Population:** 2 in PR64, 5 finer (12/08).

**Provenance.** *Ex: Great Eastern Sale (Paramount, 9/1974); Stack's (6/1977), lot 381.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60581)

## Very Rare 1865 Copper-Nickel Cent Pattern, Judd-405, PR63 Ex: Woodin, Col. Green

**1623 1865 One Cent, Judd-405, Pollock-474, High R.7, PR63 NGC.**

**Design.** Both obverse and reverse dies are the familiar Indian Head designs adopted for regular coinage in 1865. Struck in medal die alignment on a copper-nickel planchet with a reeded edge.

**Commentary.** Ostensibly made to test the dies on this difficult-to-coin composite metal. Some varieties were later sold in complete off-metal sets. The issue comes on thin and thick planchets, with this example being a thick flan (72.2 grains). USPatterns.com speculates that the copper-nickel planchets may have been left over from pre-1864 Indian Head cents.

**Physical Description.** Brilliant, somewhat speckled fields complement the strongly impressed devices. **NGC Census:** 2 coins, both of which are graded PR63. **PCGS Population:** 2 coins, both of which are graded PR64 (12/08).

**Provenance.** *Ex: William H. Woodin; Colonel E.H.R. Green; J.M. Wade; ANA 80th Anniversary (Stack's, 8/1971), lot 307; Public Auction Sale (Stack's, 12/1980), lot 439.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60582)

## Desirable 1865 Cent Pattern, Judd-406, PR66

**1624 1865 One Cent, Judd-406, Pollock-475, Low R.6, PR66 NGC.**

**Design.** Obverse and reverse dies are the regular designs for the year. Pollock notes that the point of Liberty's bust is to the left of the 1 in the date. Struck in nickel with a plain edge.

**Commentary.** The issue has some credibility as a die trial, but most pieces were probably made as numismatic delicacies.

**Physical Description.** Untoned, brilliant surfaces complement sharply struck design elements. NGC and PCGS together have graded five examples in PR66 with none finer. Census: 2 in 66, 0 finer (10/08).

**Provenance.** *Ex: J. Wiley Aulick Collection (George Cogan, 4/1883), lot 436; T. Harrison Garrett; Garrett Collection (Stack's, 3/1976), lot 572.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60583)

## Intriguing 1865 'Judd-408' Two Cent PR65 Red and Brown

**1625 1865 Two Cents, Judd-408, Delisted in Pollock, High R.7, PR65 Red and Brown NGC.**

**Design.** Same dies as the regular issue two cent piece. Struck in either copper or bronze with a plain edge.

**Commentary.** The visual difference between copper and bronze is so slight that Andrew Pollock delisted the Judd-408 from his reference.

**Physical Description.** Essentially full red with a hint of gold on each side. The fields are fully mirrored around the devices. Only the slightest light brown toning appears, primarily on the devices.

**Provenance.** *Ex: Stack's via private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70587)

## Extremely Rare 1865 Two Cent Pattern In Nickel Judd-409A, MS66

**1626 1865 Two Cents, Judd-409A, Pollock-479, High R.7, MS66 NGC.**

**Design.** Both obverse and reverse are the regular two cent dies of the year. The obverse is the Fancy 5 variety. Struck in nickel with a plain edge.

**Commentary.** A rare and popular issue that began appearing in auction catalogs as early as 1869 (Mason, 10/1869, lot 516). Nickel is an extremely hard metal, making it almost impossible to strike good-quality coins with the technology available in early 1865. The difficulties of the striking process account for the unfinished, granular areas on the surfaces of all examples seen.

**Physical Description.** Attractive pale iridescent silver and gold toning, with satiny luster. A few granular areas near the date and inside the wreath on the reverse are characteristic of this issue. This is the lone example of this rare Judd-409A issue that NGC has certified in any grade, and the finest certified at PCGS are two MS64 examples (11/08).

**Provenance.** *Ex: Public Auction Sale (Stack's, 1/1987), lot 496; Frank F. Sprinkle Collection (Stack's, 6/1988), lot 450.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60589)

## Popular 1865 Three Cent Nickel Pattern, Judd-410, PR65

1627 **1865 Three Cent Nickel, Judd-410, Pollock-481, Low R.6, PR65 NGC.**

**Design.** The obverse die is similar to the design used for regular coinage, the only difference being a higher placement of the date. The reverse is likewise similar to the regular die, but the ribbon ends are larger and actually encroach on the denticles. Struck in nickel with a plain edge.

**Commentary.** A popular issue with collectors from the first. Listed by R.C. Davis in his seminal work on patterns in *The Coin Collectors Journal*. An early auction appearance of this pattern was in the Parmelee Collection (New York Coin & Stamp, 6/1890), lot 151. The lot description asserted, "(Not in Davis)." We believe that the cataloger failed to notice Davis' number 191, which corresponds to this issue.

**Physical Description.** Sharply struck and free of distractions. A beautiful prize with light oil-slick iridescence on each side. **NGC Census:** 1 in PR65; 3 finer including 2 as PR65 Cameo. The NGC insert has BN after the grade. Most likely they looked at the next line of the Judd book and added that as if it were a copper striking (Judd-411). **PCGS Population:** 4 in PR65, 3 finer (12/08).

**Provenance.** *Ex: The Spring Sale (Stack's, 4/1978), lot 259. The coin, mistakenly sold as a regular-issue proof, realized $1,650.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60591)

## High-End 1865 Three Cent Nickel Pattern, Judd-413, PR65 Brown

1628 **1865 Three Cent Nickel, Judd-413, Pollock-484, R.5, PR65 Brown NGC.**

**Design.** Both obverse and reverse dies are the designs used on regular-issue three cent nickel coinage in 1865. Struck in copper with a plain edge.

**Commentary.** Ostensibly a die trial piece, but the number of pieces extant is more than would be required to test the dies. Most likely struck for sale to collectors. The date shows evidence of recutting. The obverse die was used to strike regular proofs of this date.

**Physical Description.** Iridescent red and blue toning creates exceptional eye appeal. Tied for second finest graded. **NGC Census:** 1 in PR65 Brown, 7 finer either by numerical grade or designation. **PCGS Population:** 1 in PR65 Brown; 2 finer (12/08).

**Provenance.** *Ex: Corrado Romano Collection (Stack's, 6/1987), lot 837.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60594)

## Rare 1865 Three Cent Silver Pattern in Copper Judd-415, PR65 Red and Brown

1629 **1865 Three Cent Silver, Judd-415, Pollock-487, R.7, PR65 Red and Brown NGC.**

**Design.** Both obverse and reverse dies are the same design used for regular-issue coinage in 1865. Struck in copper with a plain edge.

**Commentary.** The issue was allegedly struck to test the dies that were used for regular coinage in 1865. USPatterns.com believes that the issue was created to be sold as part of the off-metal pattern sets that were so popular with collectors. Experts estimate that fewer than a dozen specimens are extant.

**Physical Description.** Gunmetal-blue and red accent both sides of this well-preserved specimen. A lintmark near the date provides a pedigree marker. **NGC Census:** One in PR65 Red and Brown, the finest of the three pieces certified by this service. **PCGS Population:** Four coins total, the finest of which is a PR65 Brown (12/08).

**Provenance.** *Ex: advertisement (Robert Hughes, 7/1977); 50th Anniversary Sale (Kagin's, 5/1978), lot 1275; 1998 ANA (Heritage, 8/1998), lot 5074; Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70597)

## Pleasing 1865 Shield Nickel Prototype, Judd-416, PR65

1630 **1865 Shield Five Cents, Judd-416, Pollock-488, High R.6, PR65 NGC.**

**Design.** The obverse features the familiar shield motif used for regular-issue coinage in 1866, but dated 1865. The reverse design is the Rays variety used in 1866 and early 1867. Struck in nickel with a plain edge.

**Commentary.** USPatterns.com believes that original prototypes of the shield nickel and later restrikes were made using the same Judd-416 dies. There are two reverse dies known for the issue, one with a prominent center dot and the other without. The die with the center dot was used to strike regular proofs in 1866, confirming that it was in use before the era when most restrikes were produced. There is also an early auction appearance of the issue in the Mickley Collection (Woodward, 10/1867), lot 2241, which supports the pattern's status as a legitimate prototype. The reverse die without the center dot was used on pieces that were struck after 1868, according to research by Victoria Stone-Moledor. The present coin has the reverse center dot and can claim to be a true prototype of the Shield nickel.

**Physical Description.** The design elements are strongly impressed, with fine definition on the star centers. The brilliant surfaces have just a wisp of lavender toning. An extremely attractive example of this popular issue. **NGC Census:** 3 in PR65; 3 finer, one of which is a PR65 Cameo. **PCGS Population:** None in PR65, 1 finer (12/08).

**Provenance.** *Ex: Fraser Collection (Stack's, 3/1978), lot 608.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60598)

## Popular 1865 Shield Nickel Pattern Judd-418, PR66 Cameo

1631 **1865 Shield Five Cents, Judd-418, Pollock-490, High R.6, PR66 Cameo NGC.**

**Design.** The obverse is the traditional Shield nickel design used for regular-issue coinage in 1865. The reverse features the Without Rays design adopted in 1867. Struck in nickel with a plain edge.

**Commentary.** There is little doubt that the present issue was struck for sale to collectors circa 1870. The obverse shows many die cracks, while the reverse die has been polished to remove the telltale signs of repeated use. The overzealous polishing has resulted in loss of detail in the letters D, S, and A in UNITED STATES OF AMERICA.

**Physical Description.** A perfectly preserved example, with brilliant, untoned surfaces. The devices are heavily frosted and present a stark contrast against the deeply mirrored fields. **NGC Census:** 2 in PR66 Cameo, 1 finer. **PCGS Population:** 3 in PR66, none finer, and none with the Cameo designation in any grade (12/08).

**Provenance.** *Ex: Fraser Collection (Stack's, 3/1978), lot 609. From The Lemus Collection, Queller Family Collection Part Two.* (#60600)

## High-End 1865 Half Dime Pattern Judd-420, PR66 Red and Brown

1632 **1865 Half Dime, Judd-420, Pollock-492, R.7, PR66 Red and Brown NGC.**

**Design.** The obverse die features the Liberty Seated motif used on regular coinage for 1865. The reverse die is likewise the regular-issue wreath design. Struck in copper with a reeded edge.

**Commentary.** Like so many other patterns from this period, this "regular-dies trial piece" was probably made for sale to collectors. The issue is extremely rare, however. USPatterns.com estimates that fewer than six examples are extant. Describing another specimen in the June Sale (Stack's, 6/1986, lot 497), the cataloger noted that this issue averages one auction appearance every four years. A search of auction records at Heritage reveals that we have handled no examples in the last decade.

**Physical Description.** Brilliant surfaces under light, lavender toning complement the sharp strike. An attractive example of a rare and important issue. **NGC Census:** Three pieces total, of which this is the finest by two grade points and the only Red and Brown specimen. **PCGS Population:** Two coins total, the finest of which is graded PR65 Red and Brown (12/08).

**Provenance.** *Ex: Reed Hawn Collection (Stack's, 3/1977), lot 759. From The Lemus Collection, Queller Family Collection Part Two.* (#70602)

## Elegant 1865 Paquet Reverse Silver Quarter, Judd-423, PR62

1633 **1865 Quarter Dollar, Judd-423, Pollock-495, Low R.7, PR62 NGC.**

**Design.** The obverse is the regular Liberty Seated design for 1865. The reverse features a perched eagle with wings spread widely, clutching arrows with extremely long shafts. The legend UNITED STATES OF AMERICA is above, with the denomination fully spelled out below. Anthony Paquet designed the reverse, using the tall, thin letters often associated with his work. Struck in silver with a reeded edge.

**Commentary.** In addition to the present issue, the Paquet reverse was used on patterns dated 1858, 1859, and 1864. These pieces are believed to be restrikes, produced circa 1870, to satisfy demand from favored collectors. The first auction appearance of Judd-423 was in the famous Fewsmith Cabinet (Mason, 10/1870), lot 1325. The coin was purchased at that sale by Ebenezer Locke Mason, who had cataloged the coin himself. Mason paid $6.37 for his prize.

**Physical Description.** The surfaces are suffused with beautiful russet toning, accented by violet highlights. The fields show scattered hairlines and contact marks, consistent with the grade. An attractive example of this famous pattern. **NGC Census:** 1 in PR62, 6 finer. **PCGS Population:** 1 in PR62, 5 finer (12/08).

**Provenance.** *Ex: Auction '87 (Paramount, 7/1987), lot 331.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60607)

## Transitional 1865 Quarter Pattern Judd-425, PR65 Cameo

1634 **1865 Quarter Dollar, Judd-425, Pollock-497, High R.6, PR65 Cameo NGC.**

**Design.** The obverse die is the familiar Liberty Seated design used for regular-issue coinage in 1865. The reverse die incorporates the scroll with motto that was not used on regular-issue strikes until 1866. Struck in silver with a reeded edge.

**Commentary.** The transitional pieces of 1865 and related issues have long been viewed as restrikes, created at a later date to meet collector demand. The basis for this view was the apparent discovery of an 1865 transitional pattern dollar overstruck on a regular silver dollar dated 1866. Recent discovery of a transitional quarter overstruck on a regular 1842-O quarter has caused this supposition to be reexamined. Careful evaluation reveals that the supposed overstruck 1866 dollar is actually dated 1853. While this does not prove that the transitional issues were produced as legitimate patterns, it does remove much of the reason for doubting them. USPatterns.com believes that approximately one dozen examples of the issue are extant.

**Physical Description.** Strongly impressed devices, with crisp detail on Liberty's head and star centers. Golden-brown toning, with more color on the reverse. The presence of this color cannot subdue the significant field-device contrast on each side. Census: 1 in 65 Cameo, 0 finer (11/08). PCGS has certified one PR65 finest at that service.

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60610)

## Attractive 1865 Quarter Pattern
## Judd-426, PR65 Brown

1635 **1865 Quarter Dollar, Judd-426, Pollock-498, Low R.7, PR65 Brown NGC.**

**Design.** The obverse die is the traditional Liberty Seated design used for regular coinage in 1865. The reverse die features the familiar perched eagle design, with the addition of the scroll and motto IN GOD WE TRUST adopted for regular coinage in 1866. Struck in copper with a reeded edge.

**Commentary.** The transitional pattern issues of this era are the cause of much controversy. It is possible that some examples were actually struck to test the dies adopted for use in 1866. However, it is clear that the bulk of the surviving population was coined for sale to collectors at a later date. In the Fewsmith Collection (Mason, 10/1870, lot 1330), the cataloger states that only 10 pieces were struck in copper. There are 12 or more examples known to collectors today. Perhaps the 10 pieces discussed in the Fewsmith sale are restrikes, and a couple more examples survive that are true die trial pieces.

**Physical Description.** Sharply struck, with all devices crisply delineated. The reflective fields are a pleasing pale blue with golden-brown patina overall. **NGC Census:** 1 in PR65 Brown; 3 finer including a piece graded PR65 Red Ultra Cameo. **PCGS Population:** The only PR65 example of Judd-426 that PCGS has graded is designated Red and Brown; none are finer (12/08).

**Provenance.** *Ex: Corrado Romano Estate (Stack's, 6/1987), lot 857.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#60611)

# Unique 1865 Judd-428A Quarter
# Struck in Copper and Silver

1636 **1865 Quarter Dollar, Judd-428A, Pollock-500, Unique—Improperly Cleaned—NCS. Proof.**

**Design.** From the regular dies for *business strike* 1865 Seated Liberty quarters, Briggs 1-A. The obverse has a Large 1 punched over a Small 1, and the reverse has a crack through the tops of TATE. Struck in copper and silver with a reeded edge.

**Commentary.** The Judd plate coin, and illustrated on page 83 of the seventh edition. The Pollock plate coin for the variety, illustrated as figure 203 in that reference. Traditionally described as Judd-424A, the variety was renumbered to Judd-428A in the eighth edition of the Judd reference. The obverse is entirely copper, while the reverse is a combination of copper and silver, as illustrated.

The planchet was a combination of silver and copper rolled together, with the intention to have the entire obverse show copper and the entire reverse show silver, as on Judd-407, a similar 1865 two cent pattern. Adams and Woodin wrote of the two cent piece that it is "said to have been struck from native Michigan ore" but they gave no source for their statement.

**Physical Description.** A satiny and sharply detailed obverse exhibits a blend of pale green and gold toning with faint traces of orange mint color. The reverse is mostly bright silver with satiny luster, and partly faded orange copper that shows hairlines from cleaning. These minor distractions hardly detract from the importance of this pattern, unique per all of the usual references.

**Provenance.** *Ex: Auction '83 (Stack's, 7/1983), lot 645; Auction '86 (Paramount, 7/1986), lot 1801; Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#60613)

## Pleasing 1865 With Motto Silver Half Dollar Pattern Judd-429, PR64

1637 **1865 Half Dollar, Judd-429, Pollock-502, Low R.7, PR64 NGC.**

**Design.** The obverse die is the traditional Liberty Seated design adopted for regular coinage in 1865. The reverse features the familiar perched eagle with scroll and motto above that was adopted for regular issues in 1866. Struck in silver with a reeded edge.

**Commentary.** USPatterns.com acknowledges that some examples of Judd-429 may be legitimate transitional patterns, but concludes that most specimens were struck for sale to collectors at a later date. Experts estimate a population of perhaps one dozen survivors. Don Taxay mentions a notation in the Mason and Company catalog of June 1870 that states that only three pieces were struck. It is possible that the three pieces referred to were true prototypes, while the remaining nine or so pieces represent later restrikes.

**Physical Description.** Sharply struck, with crisp detail on the frosty devices. Light gray toning on both sides with only a few contact marks, consistent with the grade. NGC and PCGS have graded a combined total of seven examples at the PR64 level, with only two higher (10/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60614)

## Historic 1865 Transitional Half Dollar Pattern, Judd-430 PR66 Red and Brown

1638 **1865 Half Dollar, Judd-430, Pollock-503, High R.6, PR66 Red and Brown NGC.**

**Design.** The obverse design is the familiar Liberty Seated motif used in regular-issue coinage in 1865. The reverse is similar to the regular die, with the addition of the scroll and motto that would be adopted in 1866. Struck in copper with a reeded edge.

**Commentary.** One of the earliest auction appearances of this issue was in the Fewsmith Sale (Mason, 10/1870, lot 1329). The lot was purchased by "Stone" for three dollars. Lot 1330 in the sale was a transitional quarter pattern in copper. In the description for the transitional quarter, the cataloger discussed all the pattern denominations. He reported that only 10 pieces were struck of each denomination in copper, except for the dollar, which had five examples struck. This figure of 10 struck accords well with the modern estimate of fewer than one dozen survivors. According to USPatterns.com, many of the "transitional" pattern pieces were restruck as numismatic delicacies circa 1870.

**Physical Description.** Fully struck, with crisp detail on all design elements. The satiny surfaces are accented by lovely reddish-brown and purple toning. This specimen is tied with only two others as the highest graded coin in the Red and Brown category at both grading services (11/08).

**Provenance.** *Ex: Anderson Dupont Collection, Part II (Stack's, 11/1954), lot 2429.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70615)

# Unique 1865 Half Dollar Pattern
# Judd-431, PR66 Cameo

1639 **1865 Half Dollar, Judd-431, Pollock-504, Unique, PR66 Cameo NGC.**

**Design.** The obverse features the familiar Liberty Seated design used for regular-issue coinage in 1865. The reverse design consists of the traditional perched eagle motif, with the addition of the scroll and motto IN GOD WE TRUST. The reverse design was not adopted for regular coinage of this denomination until 1866. Struck in aluminum with a reeded edge.

**Commentary.** It is possible that Judd-431 was struck in 1865 as a die trial piece, but it seems unlikely. There is no discernible reason to test the transitional pattern dies in such an exotic and expensive metal in 1865. Walter Breen noted that the obverse die was different from any of the regular-issue No Motto proofs produced in that year. It is most likely that Judd-431 is a fantasy piece, created for sale to collectors at a later date.

Whatever its origin, the extreme rarity of this issue is not in doubt. Andrew Pollock, the latest Judd reference, and USPatterns.com all list this coin as unique. Robert Coulton Davis was aware of the issue and listed it as number 198 in his pioneering work on patterns in 1885. There was no example of Judd-431 in the R.C. Davis Collection (New York Coin and Stamp, 1/1890) at the time it was sold. Davis must have known about the coin from another source. The piece was also missing from the Parmelee Collection, Woodin's consignment at the 1914 ANS Exhibition, the King Farouk Collection, and the Lohr Collection.

A search of auction records has uncovered only two appearances in the last century, the last more than 24 years ago. It is clear that this issue has been underestimated in the past. The present offering may represent a once-in-a-lifetime opportunity to acquire this *unique and desirable pattern*.

**Physical Description.** The obverse features an extraordinary strike, with exquisite detail in the hair and star centers. The reverse is equally sharp, with all design elements crisply delineated. The brilliant surfaces show strong field-device contrast on each side and, in addition to the extraordinarily well preserved surfaces, produce outstanding eye appeal. A stunning and, of course, unimprovable specimen. Neither NGC nor PCGS has ever certified another.

**Provenance.** *Ex: Woodside Collection of Patterns (New York Coin and Stamp, 4/1892), lot 167; Anderson Dupont (Stack's, 11/1954), lot 2430; Thomas Bergin; June Sale (Stack's, 6/1984), lot 1226. From The Lemus Collection, Queller Family Collection Part Two.* (#60616)

## Stunning 1865 Half Dollar Pattern
## Judd-432, MS66 Brown

1640 **1865 Half Dollar, Judd-432, Pollock-505, Low R.7, MS66 Brown NGC.**

**Design.** Both obverse and reverse dies are the designs used for regular-issue coinage in 1865. Struck in copper with a reeded edge.

**Commentary.** Traditionally, Judd-432 has been listed as a die trials issue, but there was no intent to change the design or metal composition of the Seated Liberty half; the only planned change was the introduction of the motto, as occurred in 1866, and in any case it is missing here. Like many off-metal strikings, it is possible that this issue was actually produced by unscrupulous Mint employees for sale to collectors. USPatterns.com estimates a population of a half-dozen survivors.

**Physical Description.** Interesting, Mint-made roller striations are visible on the obverse. Attractive olive toning highlights the surfaces, while some original mint red lingers in sheltered areas. This coin is the finest certified in the Brown category by NGC and PCGS. It should be noted that NGC has designated this piece as Mint State rather than proof.

**Provenance.** *Ex: Sprinkle Collection (Stack's, 6/1988), lot 436.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#60617)

# Pleasing 1865 Transitional Silver Dollar Pattern, Judd-434, PR63

1641 **1865 Dollar, Judd-434, Pollock-507, Low R.7, PR63 NGC.**

**Design.** The obverse die features the standard Seated Liberty motif used in regular-issue coinage in 1865. The reverse die consists of the familiar perched eagle design also used on circulation strikes and proofs of 1865, with the addition of a scroll above the eagle's head with the motto IN GOD WE TRUST. Struck in silver with a reeded edge.

**Commentary.** Recent findings have caused experts to reconsider the opinion that this is a restrike issue, created for sale to collectors in the late 1860s and early 1870s. The single most convincing piece of evidence for the restrike theory was the overstruck example of Judd-434 in the Harry W. Bass, Jr. Research Foundation. This specimen was long believed to be overstruck on a business strike 1866 silver dollar—clearly indicating it could not have been minted in 1865.

But this clue has recently been reevaluated. Close examination of the Bass example reveals the undertype may be dated 1853, so it is entirely possible that the Judd-434 specimen was coined in 1865. Most experts still believe the coins are restrikes, but they acknowledge the possibility that some examples may be originals, struck as transitional patterns in 1865.

Whether their status is original or restrike, examples of Judd-434 are rare and beautiful coins. Gobrecht's classic design dominated U.S. coinage in the 19th century, and it is seen to best advantage on the large silver dollar format. USPatterns.com estimates approximately one dozen specimens are extant. The opportunity to acquire this numismatic prize may not recur for years.

**Physical Description.** The present coin is well but not fully struck, with some softness on the star centrils and Liberty's hair, as usually seen on this issue. Handling marks are minimal. Mottled shades of lime-green and rose toning accent the surfaces. A most attractive specimen of this rare issue. **NGC Census:** 1 in PR63, 5 finer. **PCGS Population:** 3 in PR63, 4 finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60619)

# Splendid 1865 Silver Dollar Pattern
# Judd-435, PR66 Red and Brown

1642 **1865 Dollar, Judd-435, Pollock-508, Low R.7, PR66 Red and Brown NGC.**

**Design.** The obverse die is the design adopted for regular-issue coinage of silver dollars in 1865. The reverse die is the design adopted for use in 1866, with a scroll containing the motto IN GOD WE TRUST added above the eagle's head. Struck in copper with a reeded edge.

**Commentary.** Traditionally listed as a transitional pattern, Judd-435 has become a controversial issue with pattern collectors. Many researchers now feel that the coins were struck in the late 1860s by unscrupulous Mint employees for sale to collectors. An argument for the issue's authenticity is the fact that the obverse die was used to strike regular proofs in 1865, so we can be sure it was available to strike patterns in that year. Against the traditional view is the fact that many complete sets of copper patterns were sold to collectors circa 1870. There are approximately one dozen examples of Judd-435 extant, a larger number than one would expect from a dies trial issue. An early auction appearance was in the Fewsmith Collection (Mason, 10/1870), lot 1328. In the description for a related pattern (Judd-430), the cataloger related that only five specimens of the silver dollar had been struck in copper. Perhaps the coins referred to were true transitional patterns, and the balance of the population represent later restrikes.

**Physical Description.** A spectacular strike complements virtually unblemished fields. The natural mint color is highlighted with glints of violet and blue. NGC and PCGS combined have certified only this PR66 specimen in the Brown category, with none finer (10/08).

**Provenance.** *Ex: The Frederick Taylor Collection (Bowers and Merena, 3/1987), lot 586.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70620)

## Attractive 1865 Gold Dollar Struck in Copper Judd-438, PR62 Brown

1643 **1865 Gold Dollar, Judd-438, Pollock-511, Low R.7, PR62 Brown NGC.**

**Design.** Both obverse and reverse dies are the design adopted for use on regular-issue gold dollar coinage in 1865. Struck in copper with a reeded edge.

**Commentary.** Classified as a die trial issue by many researchers, Judd-438 is more likely a numismatic delicacy, coined for sale to collectors circa 1870. There are approximately one dozen examples extant, with one specimen impounded in the Connecticut State Library and another in the ANS Collection. Auction appearances are uncommon, so this specimen represents an important opportunity for the advanced collector.

**Physical Description.** The obverse is sharp and well detailed. The reverse shows some softness on the bow and wreath. The surfaces are deeply toned with mottled yellow-green on the obverse and even light blue patina over the reverse. NGC and PCGS combined have graded only three coins finer in the Brown category (11/08).

**Provenance.** *Ex: Auction '85 (Stack's, 7/1985), lot 902.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60623)

## Elusive 1865 Quarter Eagle Pattern Judd-439, PR64 Brown

1644 **1865 Quarter Eagle, Judd-439, Pollock-512, Low R.7, PR64 Brown NGC.**

**Design.** Both obverse and reverse dies were the designs used in regular-issue coinage of quarter eagles in 1865. Struck in copper with a reeded edge.

**Commentary.** Auction appearances of the Judd-439 occur on average about every two years or so. Like many pattern issues dated in the 1860s, Judd-439 was probably struck clandestinely, and sold as part of complete copper pattern sets circa 1870, probably under the Henry R. Linderman directorship. (Actually, Linderman's two terms as Mint director were from April 1867-April 1869 and April 1873-December 1878.) The coins are rare today, with no more than a dozen specimens extant.

**Physical Description.** The coin is fully struck, with exquisite detail on all devices and no areas of weakness. Reddish-tinged brown and olive-green toning highlights the virtually undisturbed surfaces. A rare prize for the discerning collector. NGC has certified two PR64 Brown, with none finer. A gilt piece, PR62 NGC, is also known (11/08). Only a PR66 Red and Brown PCGS piece is numerically finer.

**Provenance.** *Ex: 1979 ANA (New England Rare Coin Auctions, 7/1989), lot 1314; The Seneca Collection (Heritage, 5/1984), lot 353.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60624)

## Very Rare 1865 Three Dollar
## Struck in Copper
## Judd-441, PR66 Brown

1645 **1865 Three Dollar, Judd-441, Pollock-516, Low R.7, PR66 Brown NGC.**

**Design.** The obverse is from the same die used to coin regular proofs in 1872. The reverse follows the regular-issue three dollar format, but the date is seen to slant upward, to the right. Struck in copper with a reeded edge.

**Commentary.** Because the obverse die was first used in 1872, it is believed that all examples of this issue are restrikes, created for sale to collectors in the 1870s. USPatterns.com estimates a population of about six pieces extant. One example has been silver-plated; another is gilt. Yet another example is impounded in the Connecticut State Library. The Harry W. Bass, Jr. Research Foundation owns another. The number of available specimens must be extremely small.

**Physical Description.** The devices are strongly impressed, with fine detail in the hair and feathers. Iridescent pink and lilac toning cover the flawless surfaces. **NGC Census:** 1 in PR66 Brown, the finest numerically by two points. **PCGS Population:** 4 in PR64 Brown, none finer (12/08).

**Provenance.** *Ex: Auction '79 (Superior, 7/1979), lot 1624; Stack's private treaty transaction. From The Lemus Collection, Queller Family Collection Part Two.*(#60626)

# Extremely Important R.8 1865 Three Dollar Pattern Struck in Copper-Nickel, Judd-443, PR64

1646 **1865 Three Dollar, Judd-443, Pollock-514, R.8, PR64 NGC.**

**Design.** The obverse design follows the standard Indian Princess motif for three dollar gold pieces, but this die was actually first used to strike proofs in 1867. The reverse die also closely resembles the design used in regular-issue coinage, but the date is placed lower and to the right. Struck in copper-nickel with a reeded edge.

**Commentary.** Collecting patterns can be confusing. In its 1979 auction appearance, this coin was listed as Judd-444A, with a bronze composition. The most recent edition of the Judd pattern reference has dropped the Judd-444A designation and lists this example as Judd-442, a copper piece. Recently, the coin was certified by NGC as Judd-443, a copper-nickel piece. Whatever its composition, the coin's status as a rare and important pattern is undisputed.

It is impossible to overstate the importance of this offering. The issue is extremely rare, with only two or three pieces known. One piece is impounded in the Durham Western Heritage Museum and thus is off the market forever. King Farouk's specimen was auctioned in the Palace Collections of Egypt (Sotheby's, 2/1954, lot 1793). That coin has not resurfaced in the more than 50 years since the Farouk sale. It seems entirely possible the Farouk offering was an earlier appearance of another specimen. The specimen in the 1976 ANA Sale (Stack's, 8/1976, lot 3657) reappeared in the Stanford Sale (Steve Ivy, 7/1977, lot 1347), and has not been heard from since. The coin offered here has been off the market since 1979. A search of auction records has failed to turn up any additional appearances. The present offering truly represents a once-in-a-lifetime opportunity to obtain this nearly unique pattern.

**Physical Description.** The coin is sharply struck, with fine detail on the hair and feathers. The surfaces are attractively toned, with shades of golden-brown evenly distributed over each side. This is the only coin certified by either of the leading grading services (11/08).

**Provenance.** *Ex: 1979 ANA (New England Rare Coin Auctions, 7/1979), lot 1315.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60630)

## High-End 1865 Half Eagle Pattern Judd-446, PR66 Brown

1647 **1865 Five Dollar, Judd-446, Pollock-518, High R.6, PR66 Brown NGC.**

**Design.** The obverse die is the regular design for the year. The reverse is the design adopted in 1866, with the scroll over the eagle's head and the motto IN GOD WE TRUST added. Struck in copper with a reeded edge.

**Commentary.** A true transitional pattern, struck in 1865. More than a dozen pieces survive, leading experts to conclude that some examples may be restrikes from the 1870s. The first auction appearance of Judd-446 was in the Idler Collection (Haseltine, 4/1870), lot 225. Specimens of Judd-450 (eagle in copper) and Judd-453 (double eagle in copper) were also offered in that sale for the first time. The patterns were often sold as sets in the 1870s. Idler was well known for his connections at the Mint, which gives credence to the speculation about restrikes.

**Physical Description.** Fully struck with fine detail on all the devices. The coin has a wire rim. Original mint red blends with attractive lilac toning on virtually undisturbed surfaces. Census: 5 in 66 Brown, 0 finer (11/08). The finest at PCGS is a single 65 Brown.

**Provenance.** *Ex: T. Henry Allen Collection (Stack's, 2/1977), lot 1140.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60633)

## Desirable 1865 With Motto Eagle Struck in Copper Judd-450, Proof

1648 **1865 Ten Dollar, Judd-450, Pollock-522, High R.6—Improperly Cleaned—NCS. Proof.**

**Design.** The regular issue obverse design of the 1865 eagle, muled with the With Motto reverse design that appeared in 1866. Struck in copper with a reeded edge.
**Commentary.** Unlike the With Motto silver patterns, the similar gold issues may have actually been made in 1865. The obverse die matches the regular-issue proof obverse of 1865, with a tiny horizontal die chip far above the right side of the 8.
**Physical Description.** Both sides of this boldly detailed proof have unnatural bright orange surfaces, with reflective but no longer mirrored fields. A tiny lint mark crosses Liberty's chin and may serve as a pedigree marker.
**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#80637)

# Spectacular 1865 Double Eagle Pattern
# Judd-453, PR66 Brown

1649 **1865 Twenty Dollar, Judd-453, Pollock-526, High R.6, PR66 Brown NGC.**

**Design.** The obverse is the familiar Liberty Head design used on regular-issue coinage in 1865. The reverse design is the type adopted in 1866, with IN GOD WE TRUST in the circle of stars above the eagle's head. Struck in copper with a reeded edge.

**Commentary.** A true transitional pattern, Judd-453 was struck in 1865. There are more than a dozen survivors accounted for today, a larger number than would be needed to test the dies. It is likely that some pieces represent restrikes made for sale to collectors at a later date. The first auction appearance of Judd-453 was in the Idler Collection (Haseltine, 4/1870), lot 223. Idler was Haseltine's father-in-law, and both men were closely connected to the underground market in restrikes.

A prominent die crack is seen to the left of the date on this coin, as well as on several other examples of Judd-453. The die crack is present on one of the two known specimens of Judd-452, from he same dies as Judd-453 but struck in gold. It seems reasonable to conclude that the perfect die examples of Judd-453 were struck as die trials in 1865, after which the dies were used in regular coinage. The examples with the die crack probably represent restrikes, made at a later time. According to Andrew Pollock in *United States Patterns and Related Issues*, some examples of Judd-453 have been bronzed or gilded.

**Physical Description.** An extraordinary strike. Every detail of the design is fully brought up. The undisturbed surfaces are accented by iridescent red, orange, and violet toning. Outstanding eye appeal. **NGC Census:** 1 in PR66 Brown, none finer. **PCGS Population:** 1 in PR66 Brown, none finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60640)

## Attractive 1866 Indian Cent Pattern Judd-456, PR63

1650 **1866 One Cent, Judd-456, Pollock-530, Low R.7, PR63 NGC.**

**Design.** Both obverse and reverse are the regular-issue dies of 1866. Struck in copper-nickel with a plain edge.

**Commentary.** Traditionally classified as patterns, examples of Judd-456 may simply be Mint errors. Most specimens are struck on planchets that meet the specifications of the old copper-nickel cents—standard issue until 1864. It is possible that a few leftover planchets were mixed in with the regular stock in 1866 and coined by accident. Another theory is that the coins were struck clandestinely for sale to collectors. Approximately one dozen examples are extant.

**Physical Description.** Bold detail shows on all design elements. Brilliant mint "white" color is intermingled with a touch of golden-brown toning. A few scattered handling marks are consistent with the grade. **NGC Census:** This is the sole example graded by this service. **PCGS Population:** 2 in PR63, 6 finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60651)

## Popular 1866 Washington Five Cent Pattern in Nickel Judd-461, PR66

1651 **1866 Five Cents, Judd-461, Pollock-535, R.5, PR66 NGC.**

**Design.** The obverse features a bust of Washington facing right with UNITED STATES OF AMERICA around and the date below. The reverse displays the denomination centered in a laurel wreath, with the motto IN GOD WE TRUST above. Struck in nickel with a plain edge.
